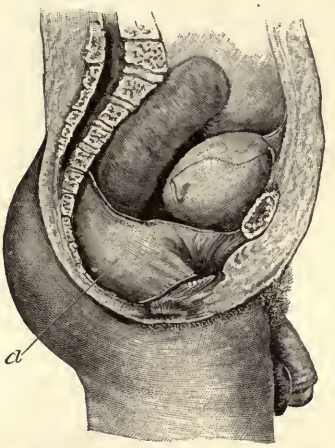
FOSTER'S MEDICAL DICTIONARY.

C E Reed M D 1894

FASCIA (Lat.), n. f. Fa²s(fa³s)'si²(ki²)-a³. Gr., δεσμός. Fr., *f.* Ger., *Fascie. Binde.* It., Sp., *f.* 1. A bandage. 2. A ligature. 3. A sheet of dense connective tissue, especially one serving as an investment for a muscle or a group of muscles. 4. A tape-worm. 5. In cerebral anatomy, the tænia hippocampi. [I, 3 (K).] 6. In botany, a broad band of color. [B, 123 (α, 24).]—**Abdominal fasciæ.** The fasciæ in the walls of the abdomen. [L, 117 (α, 29).]—**Anal f.** Lat., *f. analis.* A layer of connective tissue situated upon the levator ani muscle, continuous anteriorly with the posterior layer of the deep perineal f. [L.]—**Antibrachial f.** See *Antibrachial* APONEUROSIS.—**Aponeurotic f.** See *Deep f.*—**Axillary f.** Lat., *f. axillaris.* Ger., *Fascie der Achselgrube.* A stout, fibrous membrane which commences at the lower border of the pectoralis major muscle and passes outward and backward across the axilla to its posterior border, where it unites with the sheaths of the latissimus dorsi and teres major muscles. Below, it is continuous with the sheath of the brachial vessels and the brachial f. [L, 31, 142.]—**Bicipital f.** See *Semilunar f.*—**Brachial f.** Lat., *f. brachialis, f. brachii.* See *Brachial* APONEUROSIS.—**Broad f.** See *F. lata.*—**Buccal f.** Lat., *f. buccalis.* Ger., *Fascie der Backengegend.* 1. The bucco-pharyngeal f. 2. The bucco-pharyngeal f. and the parotid f. taken as one structure and regarded as forming a deep and a superficial layer. [L, 332.]—**Buccinator f.** Lat., *f. buccinatoria.* That portion of the bucco-pharyngeal f. which covers the buccinator muscle. [L, 142.]—**Bucco-pharyngeal f.** Lat., *f. buccopharyngea.* Fr., *aponévrose bucco-pharyngienne.* A f. which covers the external surface of the buccinator muscle, and is prolonged backward beneath the masseter muscle to the pterygo-maxillary ligament, from whence it extends over the lateral wall of the pharynx and joins with the deep cervical f. Anteriorly, it unites at the angle of the mouth with the superficial cervical f., and above and laterally with the masseteric and parotid fasciæ. [L, 31, 42, 332.]—**Cervical f.** Lat., *f. cervicalis, f. colli.* Ger., *Halsfascie.* The deep and superficial fasciæ of the neck regarded as one structure; or, in a more restricted sense, the deep cervical f. [L, 332.]—**Clavipectoral f.** A layer of f. continuous above with the superficial cervical f. and below with the pectoral f. [L, 114.]—**Colles's f.** See *Superficial perineal f.*—**Cooper's f.** See *F. propria of the scrotum.*—**Coraco-clavicular f., Costo-coracoid f.** Lat., *f. coracoclavicularis.* Fr., *aponévrose coraco-claviculaire.* A strong f. which begins at the clavicle and first rib, being continuous with the cervical f. It covers the subclavius muscle, fills up the infraclavicular fossa, passes out on the arm, ending above at the coracoid process of the scapula, and is united below with the brachial aponeurosis on a level with the insertion of the pectoralis major and deltoid muscles. [L, 332.]—**Cremasteric f.** Lat., *f. cremasterica.* The layer of fibrous tissue which unites the loops of the cremaster muscle. [L, 142, 172.]—**Cribriform f.** Lat., *f. cribriformis.* The portion of the superficial f. of the thigh which overlies the saphenous opening of the f. lata. It is attached to the edge of the saphenous opening, and has a number of openings for blood-vessels and lymphatics. [L, 142, 172.]—**Crural f.** Lat., *f. cruralis.* Ger., *Beinfascie.* See APONEUROSIS *of the leg.*—**Deep cervical f.** Lat., *f. cervicalis profunda, f. profunda colli.* Ger., *tiefe Halsfascie.* The deep layer of the cervical f., or, according to some authorities, an independent structure; a strong layer of fibrous tissue which lies beneath the platysma myoides and gives off a number of processes which invest the muscles and vessels of the neck. It is attached posteriorly to the ligamentum nuchæ and the spinous processes of the cervical vertebræ, and passes forward to the posterior edge of the sterno-mastoid muscle, where it divides into two layers (between which the muscle lies), which unite at the anterior border and join in the middle line with the f. of the other side. The most superficial of these layers is continuous above with the parotid and masseteric fasciæ, and below is attached to the clavicle, in the posterior triangle of the neck. Below the thyreoid gland the united layers again separate into two sheets, which are attached respectively to the anterior and posterior surfaces of the upper border of the sternum and the interclavicular ligament, the deeper of the two closely investing the sterno-hyoid and the sterno-thyreoid muscles. From the layer beneath the sterno-mastoid muscle are given off: (1) a process which covers the posterior belly of the omo-hyoid muscle, binding it down to the clavicle and to the cartilage of the first rib, (2) the dense portion termed the stylo-maxillary ligament, (3) an offshoot which forms the carotid sheath, (4) a thin layer which passes in front of the trachea and thyreoid gland, and (5) a process which is continuous with the fibrous portion of the pericardium. Posteriorly, it passes back to form the prevertebral f. [L, 142, 172, 332.]—**Deep f.** Lat., *f. aponeurotica.* A membranous covering of muscles, also furnishing sheaths for the deep vessels and surfaces from which other muscles arise. [L.]—**Deep f. of the back.** A dense fibrous layer of f. which covers the superficial muscles of the back, and furnishes sheaths for them.—**Deep f. of the pectoral region.** See *Coraco-clavicular f.*—**Deep f. of the sole.** See *Plantar f.*—**Deep f. of the thigh.** See *F. lata.*—**Deep perineal f.** Lat., *f. perinæi profunda* (seu *media*, seu *propria*). Fr., *aponévrose périnéale profonde.* Ger., *mittlere Mittelfleischaponeurose.* The deep layer of the perineal f., a triangular, two-layered f. (the triangular ligament of the urethra) which fills in the front part of the outlet of the pelvis, lying on the deep surface of the crura of the penis and bulb of the urethra. Between the two layers are found the membranous portion of the urethra, the dorsal vein of the penis, Cowper's glands and their ducts, the subpubic ligament, the pudic vessels and nerves, and the artery and nerve of the bulb. The inferior (anterior) layer is attached on each side to the rami of the ischium and pubes; below, its base is continuous with the superior layer and the edge of the superficial perineal f., being connected to the central point of the perinæum; and above, its apex is attached to the lower surface of the symphysis pubis and the subpubic ligament. The superior (posterior) layer is separated into two halves by the urethra, just in front of the prostate gland. It unites below with the inferior layer, is continuous on each side with the pelvic and anal f., and covers the outer portion of the prostate gland. In the female this last layer is divided by the vagina. [L, 142, 172, 332.]—**Diophthalmic f.** See BINOCULUS.—**Dorsal f.** The f. of the back. [L.]—**Dorsal f. of the foot.** Lat., *f. dorsalis pedis.* A thin f. which passes down upon the dorsum of the foot. It commences at the lower margin of the anterior annular ligament, extends out upon the toes, and at the sides of the tarsus is continuous with the plantar f., but is attached to the internal and external metatarsal bones. [L, 332.]—**Dorsal f. of the hand.** Lat., *f. dorsalis manus.* See *Dorsal* APONEUROSIS *of the metacarpus.*—**External spermatic f.** See *Intercolumnar f.*—**F. abdominalis subcutanea, F. abdominalis superficialis.** The subcutaneous cellular tissue on the anterior surface of the abdomen. [L, 175 (α, 29).]—**F. abdominalis transversalis.** See *F. transversalis.*—**F. adiposa renum.** The adipose areolar tissue which surrounds the kidney and holds it in place. [α, 29.]—**F. analis, F. ani, F. anoperinæalis, F. anoperinæalis propria.** See *Anal f.*—**F. antibrachii.** See *Antibrachial* APONEUROSIS.—**F. aponeurotica.** See *Deep f.*—**F. aponeurotica femoris.** See *F. lata.*—**F. ascialis.** See ASCIA (3d def.).—**F. axillaris.** See *Axillary f.*—**F. brachialis, F. brachii.** See *Brachial* APONEUROSIS.—**F. buccalis.** See *Buccal f.*—**F. buccinatoria.** See *Buccinator f.*—**F. bucco-pharyngea.** See *Buccopharyngeal f.*—**F. bulbi (oculi).** See *Tenon's* CAPSULE.—**F. capitalis.** See *Capeline* BANDAGE.—**F. capitis.** 1. In anatomy, a fibro-cellular layer in the scalp. 2. In surgery, the occipito-frontal aponeurosis. [α, 29.]—**F. celluleux** (Fr.). See *F.* (3d def.).—**F. celluleux profond** (Fr.). See *Deep f.*—**F. cervicalis.** See *Deep cervical f.* and *Superficial cervical f.*—**F. clavicularis.** The clavicular portion of the coraco-clavicular f. [L, 7.]—**F. clavipectoralis.** See *Clavipectoral f.*—**Fasciæ coli.** See LIGAMENTA *coli.*—**F. colli.** See *Cervical f.*—**F. colli profunda (media).** See *Deep cervical f.*—**F. colli superficialis.** See *Superficial cervical f.*—**F. Cooperi.** See *F. propria of the scrotum.*—**F. coracoclavi-costalis, F. coraco-clavicularis.** See *Coraco-clavicular f.*—**F. coraco-costalis.** That portion of the coraco-clavicular f. covering the pectoralis minor muscle. [L, 31.]—**F. coraco-pectoralis.** See *Coraco-clavicular f.*—**F. costocoracoidea.** See *Costocoracoid f.*—**F. cremasterica.** See *Cremasteric f.*—**F. cribriformis, F. cribrosa.** See *Cribriform f.*—**F. cruralis, F. cruris.** See APONEUROSIS *of the leg.*—**F. deltoidea.** See *Deltoid* APONEUROSIS.—**F. dentata (hippocampi, seu Tarini).** Ger., *gekräuselte graue Leiste.* A band of gray matter seen on the outer wall of the descending cornu of the lateral ventricle of the brain, beneath the corpus fimbriatum. It corresponds to the edge of the dentate convolution. [I, 15.]—**F. dentata cinerea, F. denticulata.** See *F. dentata.*—**F. digitalis, F. digitorum.** See *Finger*-BANDAGE.—**F. dividens.** See *Dividing* BANDAGE.—**F. dorsualis.** See *Dorsal f.*—**F. dorsualis manus.** See *Dorsal* APONEUROSIS *of the metacarpus.*—**F. dorsualis pedis.** See *Dorsal f. of the foot.*—**F. endo-abdominalis, F. endogastrica.** See *Transversalis f.*—**F. endothoracica.** The layer of dense connective tissue which unites the costal pleura with the walls of the thorax. [L, 332.]—**F. epicrania.** See *Epicranial* APONEUROSIS.—**F. fasciolis separatim dispositis.** See *Many-tailed* BANDAGE.—**F. femoris.** See *F. lata.*—**F. glutæa.** See *Gluteal* BANDAGE.—**F. gypsea.** See *Plaster-of-Paris* BANDAGE.—**F. Heliodori.** See *Heliodorus's* BANDAGE.—**F. humeri.** See *Brachial* APONEUROSIS.—**F. hypogastrica.** See *Pelvic f.*—**F. iliaca.** See *Iliac f.*—**F. infraspinata.** A strong, tendinous f. which covers the infraspinatus and teres minor muscles where they are not covered by the deltoid muscle. [L, 142, 332.]—**F. infundibuliformis.** See *Infundibuliform f.*—**F. ischioprostatica.** The transverse ligament of the pelvis. [L, 332.] Cf. *Deep perineal f.*—**F. lata (cru-**

ris, seu femoris). Ger., *Oberschenkelfascie.* The stout fibrous tissue which invests the free surfaces of the muscles of the thigh. It is attached above to the back part of the coccyx and sacrum, the outer lip of the crest of the ilium, Poupart's ligament, the body and ramus of the pubes, the ramus and tuberosity of the ischium, and the great sacro-sciatic ligament; and below to the head of the tibia, the margins of the patella and the head of the fibula, being continuous with the f. of the leg. At the upper edge of the glutæus maximus it divides into two layers, between which the muscle is included, and which unite at the lower edge of the latter. It gives off from its inner surface numerous intermuscular septa, the two most important being attached to the linea aspera of the femur, and separating respectively the vastus externus muscle from the short head of the biceps muscle, and the vastus internus muscle from the adductor muscles. At the upper and inner part of the thigh, close to Poupart's ligament, is found the saphenous opening for the transmission of the internal saphenous vein. The f. lata is usually divided into two portions—the iliac, external to, and the pubic, internal to, the saphenous opening, below which the two unite. The upper part of the pubic portion passes behind the



THE PELVIC FASCIA. (DRAWN BY DR. H. MACDONALD.)

a, the fascia lata; *b*, the perineal fascia; *c*, the levator ani.

femoral vessels, and is continuous with the ilio-psoas muscle and the capsule of the hip joint. [L, 142, 172, 332.]—**F. levatoris ani.** See *Anal f.*—**Fasciæ ligamentosæ coli.** See LIGAMENTA *coli.*—**F. linguæ.** The dense connective tissue which unites the muscles of the tongue with the mucous membrane. [L, 332.]—**F. longa (seu longitudinalis) anterior (seu antica) vertebralis.** See *Anterior vertebral* LIGAMENT.—**F. longa (seu longitudinalis) posterior (seu postica) vertebralis.** See *Posterior vertebral* LIGAMENT.—**F. lumbalis, F. lumbaris, F. lumbodorsualis, F. lumborum.** See *Lumbar f.*—**F. masseterica.** See *Masseteric f.*—**F. medullaris** [Malacarne]. A pyramid of the medulla oblongata. [I, 3 (K).]—**F. musculi transversi.** See *Transversalis f.*—**F. nodosa.** See *Knotted* BANDAGE.—**F. nuchæ.** A thin layer of f. immediately underlying the trapezius and rhomboidei muscles. It is attached above to the middle curved lines of the occipital bone, and laterally is continuous at the edges of the trapezius muscles. In the middle line it blends with the ligamentum nuchæ. [L, 332.]—**F. obturatoria.** See *Obturator f.*—**F. ocularis (seu oculi) simplex.** See *Eye*-BANDAGE.—**F. of Colles.** See *Superficial perineal f.*—**Fasciæ of origin.** Ger., *Ursprungsehnen.* The fasciæ which serve for the origin of muscles. [L, 31.]—**F. of Scarpa.** Lat., *f. Scarpæ.* A portion of the superficial f. which overlies the external abdominal ring. [L, 332.]—**F. of Tenon.** See *Tenon's* CAPSULE.—**F. orbitæ.** See *Orbital f.*—**F. palmaris.** See *Palmar f.*—**F. palpebralis.** The subconjunctival tissue of the eyelids. [L.]—**F. parotidea.** See *Parotid f.*—**F. parotideomasseterica.** The parotid and masseteric fasciæ, regarded as one structure. [L.]—**F. pectinea.** The pubic portion of the f. lata. [L.]—**F. pectoralis profunda.** The deep layer of the pectoral f., which is continuous with the fibrous sheath of the recti muscles. [A, 319 (*a*, 29).]—**F. pectoralis superficialis.** The superficial layer of the pectoral f., from which fibres of the platysma arise. [A, 319 (*a*, 29).]—**F. pelveos.** See *Pelvic f.*—**F. pelveos externa.** See *Superficial perineal f.*—**F. pelveos interna.** The internal layer of the pelvic f. [L.]—**F. pelvica, F. pelvina.** See *Pelvic f.*—**F. pelvi-prostatica.** A process of the recto-vesical f. which forms the capsule of the prostate. [L, 142 (*a*, 29).]—**F. pelvis.** See *Pelvic f.*—**F. penis.** The layer of fibrous tissue which surrounds the penis. It is continuous with the dartos, the superficial f. in the groin, and the perineal f., and extends forward as far as the collum penis. [L, 332.]—**F. perinealis, F. perinæi.** See *Perineal f.*—**F. perinæi media.** See *Deep perineal f.*—**F. perinæi profunda.** See *Deep perineal f.* and *F. ischio-prostatica.*—**F. perinæi propria.** See *Deep perineal f.*—**F. perinæi superficialis.** See *Superficial perineal f.*—**F. perinæi transversa.** See *Deep perineal f.*—**F. pharyngis.** The pharyngeal portion of the bucco-pharyngeal f. (*q. v.*). [L.]—**F. pharyngis interna.** The fibro-elastic layer beneath the mucous membrane of the pharynx. [L, 332.]—**F. pharyngo-basilaris.** The fibrous membrane which fills in, on each side, the space between the superior constrictor of the pharynx and the inferior surface of the basilar portion of the occipital bone. [L, 332.]—**F. plantaris.** See *Plantar f.*—**F. prævertebralis.** See *Prevertebral f.*—**F. profunda abdominis.** See *Transversalis f.*—**F. profunda colli.** See *Deep cervical f.*—**F. profunda cruris (seu femoris).** See *F. lata.*—**F. propria, F. propria of the scrotum.** Of Sir Astley Cooper, the infundibuliform f., together with the areolar tissue immediately underlying it. [C.]—**F. propria of the spermatic cord.** See *Infundibuliform f.*—**F. recta abdominis, F. recto-abdominalis.** See APONEUROSIS *of the internal oblique muscle.*—**F. rectovesicalis.** See *Recto-vesical f.*—**F. renalis, F. renis.** See *Renal f.*—**F. repens.** See *Open spiral* BANDAGE.—**F. salpingopharyngea.** An offshoot of the bucco-pharyngeal f. which covers the tensor palati muscle. [L, 332.]—**F. scapularis.** See *Scapulary* BANDAGE.—**F. Scarpæ.** See *F. of Scarpa.*—**F. Sculteti.** See *Many-tailed* BANDAGE.—**F. semicircularis.** See TÆNIA *semicircularis.*—**F. semilunaris.** See *Semilunar f.*—**F. serrata.** See *F. dentata.*—**F. solaris.** See *Knotted* BANDAGE.—**F. spiralis.** See *Spiral* BANDAGE.—**F. stellata.** See *Knotted* BANDAGE.—**F. subcutanea.** See *Subcutaneous f.*—**F. subpubica.** See *Deep perineal f.*—**F. subscapularis.** See *Subscapular f.*—**F. superficialis.** See *Subcutaneous f.*—**F. superficialis abdominis.** The superficial f. of the abdominal region. [L.]—**F. superficialis colli.** See *Superficial cervical f.*—**F. superficialis perinæi.** See *Superficial perineal f.*—**F. suprahyoidea.** The portion of the superficial cervical f. above the hyoid bone. [L, 332.]—**F. supraspinata.** See *Supraspinous f.*—**F. Tarini.** See *F. dentata.*—**F. tarso-orbitalis.** See *Tarso-orbital f.*—**F. temporalis.** See *Temporal f.*—**F. temporalis profunda.** The deep layer of the temporal f. [A, 319 (*a*, 29).]—**F. temporalis superficialis.** The superficial layer of the temporal f. [*a*, 29.]—**F. Tenonis.** See *Tenon's* CAPSULE.—**F. T-formis.** See *T*-BANDAGE.—**F. thoracica.** See *Pectoral f.*—**F. thoracica interna.** See *F. endothoracica.*—**F. thyreolaryngea.** Of Hueter, that portion of the capsule of the thyreoid gland which is inserted into the cricoid cartilage. [Pauly (A, 319).]—**F. tortilis.** Fr., *f. tortile.* See *Spiral* BANDAGE and TOURNIQUET.—**F. transversa, F. transversalis (abdominis).** See *Transversalis f.*—**F. transversalis umbilicalis.** A portion of the transversalis f. lying immediately behind the umbilicus. [L.]—**F. triangularis.** See *Triangular* LIGAMENT.—**F. umbilicalis.** See *F. transversalis umbilicalis.*—**F. uncinata.** See *F. dentata.*—**F. vaginalis bulbi.** See *Tenon's* CAPSULE.—**F. volaris.** See *Palmar f.*—**Fibro-areolar f.** See *Superficial f.*—**Iliac f.** Lat., *f. iliaca.* 1. An aponeurotic layer of f. which lines the back part of the abdominal cavity and covers the psoas and iliacus muscles. It is blended above with the internal arcuate ligament, and, as it descends upon the psoas muscles, is attached to the intervertebral cartilages, the bodies of the vertebræ, the fibrous arches through which the lumbar arteries pass, and the sacrum. Externally it is attached to the inner lip of the crest of the ilium, and internally to the brim of the pelvis, where it blends with the periosteum. Below, it is prolonged down into the thigh, forming, in part, the femoral sheath. On the outer side of the femoral vessels it unites with the transversalis f. and the f. lata, and is attached to Poupart's ligament. Internally to the vessels, it is attached to the ilio-pectineal line, and joins with the f. lata. 2. The iliac portion of the f. lata. [L, 142, 172, 332.]—**Ilio-pectineal f.** See *Obturator f.*—**Infraspinous f.** See *F. infraspinata.*—**Infundibuliform f.** Lat., *f. infundibuliformis.* Ger., *gemeinschaftliche Scheidenhaut des Samenstrangs und Hodens.* An offshoot of the transversalis f. which passes down through the inguinal canal and forms one of the coats of the spermatic cord, lying beneath the cremasteric f., and fused with the tunica vaginalis of the testicle. [L, 142, 172, 332.]—**Intercolumnar f.** A thin f. derived from the margins of the external abdominal ring, and prolonged downward, lying external to the cremasteric f., and covering the outer surfaces of the spermatic cord and the testicle. [L, 142, 172.]—**Intercostal f.** A term applied indifferently to a layer of f. which covers the outer surface of the external intercostal muscles, to one lining the inner surface of the internal intercostal muscles, or to one separating the same muscles. [L, 172.]—**Intermuscular fasciæ.** The processes of fasciæ that separate muscles. [L.]—**Ischio-rectal f.** See *Anal f.*—**Laryngo-thyreoid f.** See *F. laryngo-thyreoidea.*—**Lingual f.** See *F. linguæ.*—**Lumbar f., Lumbo-dorsal f.** Lat., *f. lumbalis, f. lumbodorsualis.* Fr., *aponévrose lumbodorsale.* A dense fibrous structure from which a portion of the transversalis abdominis muscle arises. At the posterior margin of the latter it divides into three layers, the anterior, middle, and posterior. The anterior is attached to the ilio-lumbar ligament, to the crest of the ilium, and to the front of the transverse processes of the lumbar vertebræ, along the inner border of the quadratus lumborum muscle. Superiorly it forms the internal arched ligament of the diaphragm, and at its outer border it unites with the middle layer. The middle layer (posterior aponeurosis of the transversalis muscle) is attached above to the lower border of the last rib, to the tips of the transverse processes of the lumbar vertebræ, and to the ilio-lumbar ligament and the crest of the ilium. In front it unites with the anterior layer, and behind, at the outer edge of the erector spinæ, with the posterior layer. The superficial or posterior layer is attached to the tips of the spinous processes of all the lumbar vertebræ and of a varying number of the lower dorsal vertebræ, and is united in front with the latissimus dorsi and serratus posticus inferior muscles. Between the anterior and middle layers is the quadratus lumborum muscle, and between the middle and posterior is the erector spinæ muscle. [L, 142, 172, 332.]—**Masseteric f.** Lat., *f. masseterica.* Fr., *aponévrose massétérine.* A layer of f. continuous with the deep cervical, the parotid, and the bucco-pharyngeal fasciæ, and attached above to the zygoma. It lies upon the outer surface of the masseter muscle, with which it is closely united. [L, 142.]—**Middle perineal f.** See *Deep perineal f.*—**Obturator f.** Lat., *f. obturatoria.* The parietal layer of the pelvic f. It is attached above to the ilio-pectineal line, in front to the lower margin of the body of the pubes, behind to the anterior margin of the great sciatic notch and to the great sacro-sciatic ligament, and below to the falciform process of the sacro-sciatic ligament. It unites with the upper end of the thyreoid membrane, passing beneath the obturator vessels. Below the pubes it unites with its fellow of the opposite side and with the posterior layer of the triangular ligament. At the posterior border of the obturator internus it gives off the f. of the pyriformis muscle. [L, 142, 172,

332.]—**Palmar f.** Lat., *f. palmaris, f. volaris.* Ger., *Handsehne, Hohlhandsehne, Hohlhandfascie, Palmarfascie.* A stout f. consisting largely of longitudinal fibres lying beneath the skin of the palm of the hand. It consists of two lateral portions, and a central portion to which the term palmar f. is by some restricted. The lateral portions are thin; they cover the muscles of the ball of the thumb and of the little finger, and are united with the central portion. The latter is thick, and is derived from the expansion of the palmaris longus muscle and the anterior annular ligament. It becomes broader and thinner as it passes down in the hand, and divides at the heads of the metacarpal bones into four parts, each of which passes to one of the fingers. Each one of these again divides into two parts (between which are situated the flexor tendons), which are inserted, one on each side, into the sides of the first phalanx. [L, 142, 172, 332.]—**Parotid f.** Lat., *f. parotidea.* A prolongation backward of the masseteric f., which closely invests the parotid gland. [L, 142.]—**Parotideo-masseteric f.** Fr., *aponévrose parotidéo-massétérine.* The masseteric and parotid fasciæ, regarded as one structure. [L.]—**Pectoral f.** The superficial covering of the pectoral region. [L.]—**Pelvic f.** Lat., *f. pelveos, f. pelvis, f. pelvina.* Ger., *Beckenfascie, obere Mittelfleischaponeurose.* The fibrous structure which lines the interior of the pelvic cavity, covering the muscles and supporting the viscera. It is attached to the lower border of the symphysis pubis, to a portion of the lateral brim of the pelvis, to the anterior surface of the coccyx, and to the inner surface of the innominate bone around the attachment of the obturator internus. It divides on each side at the level of a line extending between the lower margin of the symphysis pubis and the spine of the ischium into the obturator and recto-vesical fasciæ, the line of division being indicated by a thickened white band, the arcus tendineus fasciæ pelveos. [L, 142, 172, 332.]—**Perineal f.** Lat., *f. perinœalis.* Fr., *aponévrose périneale.* Ger., *Mittelfleischaponeurose.* 1. The deep and superficial perineal fasciæ, regarded as one structure. [L.] 2. See *Deep perineal f.*—**Plantar f.** Lat., *f. plantaris.* Fr., *aponévrose plantaire.* Ger., *Plantarfascie.* The deep f. of the sole of the foot. It is a dense, white structure consisting mainly of longitudinal fibres, and is divided into two lateral portions and one central portion, the lines of division being indicated by two vertical intermuscular septa which include between them the flexor brevis digitorum muscle, separating it on one side from the abductor hallucis, and on the other from the abductor minimi digiti. The central portion is attached posteriorly to the inner tuberosity of the os calcis, and becomes broader as it passes down upon the foot to a point opposite the middle of the metatarsal bones, where it divides into five slips, one for each toe. Each slip divides into two others near the heads of the metatarsal bones, between which the flexor tendons pass, and which are inserted into the sides of the metatarsal bones, the transverse metatarsal ligament, the sheaths of the tendons, and the integument. The lateral portions are thinner than the central, are continuous with the dorsal f. of the foot, and envelop the abductor minimi digiti muscle on one side, and the abductor pollicis muscle on the other. [L, 31, 142, 172.]—**Prevertebral f.** Lat., *f. prævertebralis.* A portion of the deep cervical f. which separates the prevertebral muscles from the œsophagus and pharynx. It assists in forming the carotid sheath, and descends upon the subclavian vessels and the brachial plexus, forming the axillary sheath. [L, 142, 172,332.]—**Recto-abdominal f.** Lat., *f. recto-abdominalis.* Ger., *gerade Bauchmuskelscheide.* See Aponeurosis *of the internal oblique muscle.*—**Recto-vesical f.** Lat., *f. rectovesicalis.* The visceral layer of the pelvic f. It arises from the body of the pubes, being separated from the obturator f. by the origin of the levator ani muscle, and from the inner (peritoneal) surface of the obturator f., and posteriorly is continuous with the f. of the pyriformis. It passes down upon the surface of the levator ani muscle, to the prostate gland, the bladder, and the rectum, and, passing between the two latter, invests the vesiculæ seminales and unites with its fellow of the opposite side, covering, in part, the upper surface of the rectum. Behind the symphysis pubis it forms a thickened band which passes down upon the upper surface of the prostate gland and the neck of the bladder, forming the pubo-prostatic ligament. Laterally it forms the lateral true ligaments of the bladder. In the female the vagina is covered in part by that portion which in the male passes over the neck of the bladder and the prostate gland. [L, 142, 172, 332.]—**Renal f.** Lat., *f. renalis, f. renis.* See Capsule *of the kidney.*—**Retrorenal f.** Fr., *f. rétro-rénal.* Of Zuckerkandl, the posterior layer of the fibrous capsule of the kidney. ["Wien. med. Jahrb.," 1883, 1. p. 59; "Rev. des sci. méd.," Jan., 1885, p. 5.]—**Semilunar f.** Lat., *f. semilunaris.* A flat, fibrous band of f. which passes downward and inward from the inner side of the biceps humeri and its tendon, and unites with the f. covering the antibrachial muscles arising from the inner condyle of the humerus. [L, 142.]—**Spermatic f.** See *Intercolumnar f.*—**Subcutaneous f.** Lat., *f. subcutanea, f. superficialis.* Ger., *Hautbinde, Unterhautfascie.* The layer of loose connective tissue lying immediately beneath the skin. [L, 142, 332.]—**Subpubic f.** See *Deep perineal f.*—**Subscapular f.** Lat., *f. subscapularis.* A thin layer of f. covering the subscapularis muscle. [L, 332.]—**Superficial cervical f.** Lat., *f. cervicalis superficialis, f. superficialis colli.* A thin layer of f. lying immediately beneath the integument of the cervical region. [L, 172.]—**Superficial f.** See *Subcutaneous f.*—**Superficial f. of the abdomen.** Lat., *f. abdominalis superficialis.* A two-layered f. lying beneath the integument of the abdomen, and continuous behind with the dorsal f. The external layer is thin, and contains in its meshes a considerable quantity of fat. In the inguinal region it is separated from the deep layer by the circumflex iliac and superficial epigastric arteries and by lymphatic glands. The deep layer is loosely connected with the subjacent muscles. Along the linea alba and at the umbilicus it is closely united with the aponeurosis beneath it. Below, it gives off the suspensory ligament of the penis, passes over Poupart's ligament, and unites with the f. lata, except over the external abdominal ring, where it descends over the spermatic cord and forms the dartos. [L, 142, 172, 332.]—**Superficial perineal f.** Lat., *f. perinœi superficialis.* Fr., *aponévrose périnéale superficielle.* Ger., *untere Mittelfleischaponeurose.* A two-layered f. which lies beneath the integument of the perineal region. Its superficial layer is thin and loose, and is continuous with the dartos and the superficial fasciæ of the adjoining parts. The deep layer (the one to which the term is usually restricted) is continuous with the dartos, is attached to the rami of the pubes and ischium as far back as the tuberosity, and at the posterior margin of the transversus perinæi muscle passes back to unite with the deep perineal f. In the middle line it sends off a vertical septum toward the urethra, and continues forward into the middle line of the scrotum. [L, 142, 172, 332.]—**Superior pelvic f.** See *Pelvic f.*—**Suprahyoidean f.** See *F. suprahyoidea.*—**Supraspinous f.** Lat., *f. supraspinata.* An offshoot of the brachial f. which covers the infraspinatus and teretes muscles. [L, 332.]—**T-f.** See *T-*bandage.—**Tarso-orbital f.** Lat., *f. tarso-orbitalis, septum orbitale.* Fr., *f. tarso-orbitaire.* A sheet or membrane of fibrous tissue which connects the lids with the margin of the orbits and shuts off communication between the connective-tissue space of the lids and the orbital cavity. It is attached to the orbital margin, usually to its inner lip, especially on the upper and lower margin, and is intimately connected with the periosteum on the one hand and the capsule of the eyeball on the other; also, at the canthi, with the internal and external or canthal ligaments, extending behind the latter to the canthi. It is prolonged to the upper border of the tarsi of the upper lids and the lower border of the tarsi of the lower lids, where it is firmly united. [F, 1.]—**Temporal f.** Lat., *f. temporalis.* Ger., *Schläfenfascie.* A white and shining f. which overlies the temporal muscle. It is attached above to the temporal crest of the frontal bone and the uppermost of the lines on the parietal bone, and below, after dividing into two layers, to the inner and outer surfaces of the zygomatic arch. [L, 142, 172, 332.]—**Transversalis f.** Lat., *f. transversa, f. transversalis, f. musculi transversi.* Ger., *quere Bauchbinde.* The f. situated upon the posterior surface of the transversalis abdominis muscle. It is continuous above with a thin aponeurotic layer upon the lower surface of the diaphragm. Below, on the outer side of the femoral vessels, it is attached to Poupart's ligament, where it is continuous with the iliac f. and the periosteum of the crest of the ilium; on their inner side to the pubes and the ilio-pectineal line. It furnishes a prolongation which forms the anterior portion of the crural sheath. About half way between the anterior superior spine of the ilium and the spine of the pubes, and half an inch above Poupart's ligament, is an opening, the internal abdominal ring, to the margin of which is attached the infundibuliform f. [L 142, 172, 332.]—**Triangular f.** See *Triangular* ligament.

The visceral layer (*a*) of the pelvic fascia. (Drawn by Dr. H. Macdonald.)

FASCIAL, adj. Fa^{2}s'si^2-a^{2}l. Lat., *fascialis.* Fr., *f.* Belonging to or of the nature of a fascia. [L, 107.]

FASCIANS (Lat.), adj. Fa^{2}s(fa^{3}s)'si^2(ki^2)-a^{2}nz(a^{3}ns). From *fasciare*, to swathe. Separating into filaments or layers (see Neuritis *f.*). [E. Eichhorst, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," cxii, 2; "Ctrlbl. f. klin. Med.," Oct. 20, 1888, p. 775.]

FASCIARIS (Lat.), **FASCIARIUS** (Lat.), adj's. Fa^{2}s(fa^{3}s)-si^2(ki^2)-a(a^3)'ri^{2}s, -ri^2-u^{3}s(u^{4}s). Fr., *rubanaire.* In botany, narrow and long with the two opposite margins parallel. [B, 1, 19 (*a*, 24).]

FASCIATE, adj. Fa^{2}s'si^2-at. Lat., *fasciatus* (from *fascia*, a bundle). Fr., *fascié, rubané.* Ger., *bandirt, gebändert.* Having a band of color differing from that of the rest of the surface; marked with bands. [B, 1, 123 (*a*, 24); L, 42.]

FASCIATED, adj. Fa^{2}s-si^2-at'e^{2}d. In botany, much flattened (said of the branches or stem). [B, 19, 77 (*a*, 24).]

FASCIATION, n. Fa^{2}s-si^2-a'shu^{3}n. Lat., *fasciatio* (from *fasciare*, to swathe). Fr., *f.* Ger., *Bänderung, F.* It., *fasciatura* (1st def.). 1. The binding up of a diseased or wounded part. 2. The condition of the axis of a plant when it is abnormally enlarged, broadened, and furnished with supernumerary appendages. [B, 1 (*a*, 24); L, 107.]

FASCICLE, n. Fa^{2}s'i^{2}k'l. Gr., φάκελος. Lat., *fasciculus* (from *fascia*, a bundle). Fr., *fasicule, faisceau.* Ger., *Büschel, Blüthenbüschel, Fascikel.* A little bundle or cluster; in botany, an inflorescence having the form of a contracted biparous cyme in which the peduncles are very short and the flowers closely approximated. [B, 1, 77, 123 (*a*, 24).] See Fasciculus.—**Bicollateral f.** See *Bicollateral* bundle.—**Collateral f.** See *Collateral* bundle.—**Concentric libero-ligneous f.** See *Concentric* bundle.—**Crossed pyramidal f.** See *Anterior* columns *of the medulla oblongata.*—**Cuneiform f.** See Fasciculus *cuneatus.*—**Liber f.** See *Fibro-vascular* bundle.—**Libero-ligneous f's.** Fibrous bundles formed by the coalescence of the woody elements with the bast fibres. [B, 229 (*a*, 24).]—**Ligneous f.** See *Fibro-vascular* bundle.

FASCICLED, FASCICULAR, adj's. Fa^{2}s'i^{2}k'ld, -i^{2}k'u^2-la^{3}r. Lat., *fascicularis*. Fr., *fasciculaire*. Ger., *fasciculär*. 1. Pertaining to or separated into fascicles. 2. See FASCICULATE.

FASCICULATE, FASCICULATED, adj's. Fa^{2}s-si^{2}k'u^2-lat, -e^{2}d. Lat., *fasciculatus*. Fr., *fasciculé*. Ger., *büschelig, bündelig*. United into bundles (said of leaves, etc.); of roots, thick and succulent. [B, 1, 77, 123 (*a*, 24); L, 343.]

FASCICULATION, n. Fa^{2}s-si^{2}k-u^2-la'shu^{3}n. Lat., *fasciculatio*. Separation into fascicles.

FASCICULATO-RAMOSE, adj. Fa^{2}s-si^{2}k-u^2-la"to-ra'mos. From *fasciculus*, a little bundle, and *ramus*, a branch. Having branches or roots drawn closely together and almost parallel. [B, 19 (*a*, 24).]

FASCICULE, n. Fa^{2}s'si^2-ku^{2}l. Fr., *f*. See FASCICLE and FASCICULUS.

FASCICULUS (Lat.), n. m. Fa^{2}s(fa^{2}s)-si^{2}k(ki^{2}k)'u^2(u^4)-lu^{3}s-(lu^{4}s). Fr., *faisceau, fascicule*. Ger., *Bündel, Bündelchen, Faserbündel, Fascikel Fibrillenbündel*. It., *fascello*. Sp., *fascículo*. 1. A collection of fibres or fibrillæ in a more or less distinct bundle. [J, 30, 35.] 2. In pharmacy, a handful. [L, 94 (*a*, 21).]—**Ascending cerebellar f.** The direct cerebellar tract of the spinal cord. [I.]—**Cerebellar fasciculi.** Bundles of fibres originating in the cerebellum. [Meynert (*a*, 29).]—**Direct pyramidal fasciculi.** See *Antero-lateral* COLUMN.—**Dorsal crossed f., Dorsal direct f.** One of the four components of the columna fornicis recognized by Gudden [I.]—**F. accessorius internus musculi pharyngopalatini.** An anomalous bundle of the palato-pharyngeus muscle which passes along the inferior posterior margin of the choana. [L, 332.]—**F. accessorius musculi tragici.** An anomalous bundle of muscular fibres extending between the tragicus muscle and the spine of the helix. [L, 332.]—**F. arciformis olivæ.** Superficial and deep transverse and curved fibres crossing the lower portion of the olivary bodies, continuous with the fibres of the restiform bodies. [L, 114 (*a*, 29).]—**F. arcuatus, F. arcus.** A f. sent from the middle part of the corpus callosum into the cerebral hemisphere of the same side. [L, 55 (*a*, 29).]—**F. baseos internus.** Ger., *inneres Grundbündel*. Of Burdach, a bundle of nerve-fibres which extend from the lower surface of the occipital lobe, beneath the cuneate lobule, to unite with the corpus callosum. [I, 3 (K).]—**F. basilaris internus.** Of Burdach, a f. composed of arched bundles which lie in the axis of the gyrus glossiformis and tend toward the gyrus uncinatus. [Meynert (*a*, 29).]—**F. bigeminogenicularis.** A bundle of fibres which unites the corpus bigeminum and the corpus geniculatum. [Meynert (*a*, 29).]—**F. cerebralis.** The antero-lateral column of the spinal cord. [*a*, 29.]—**Fasciculi corticales.** The bundles of nerve-fibres leading to and from the cortical substance. [*a*, 29.]—**F. cortico-bulbaris.** The innermost fibres of the pedunculi cerebri. [*a*, 29.]—**F. cuneatus.** Syn.: *funiculus cuneatus*. A prolongation of the posterior lateral column in the medulla oblongata, which expands into a wedge-like form as it ascends. [L, 142 (*a*, 29).]—**F. descendens.** A bundle of white fibres in the genu of the corpus callosum which passes downward, describing an arc looking inward and forward, to the inferior lobe, and partly to the intermediate lobe. [L, 7 (*a*, 29).]—**F. exilis.** A bundle of muscular fibres which arise from the internal condyle of the humerus or the coronoid process of the ulna and, passing between the ulnar artery and the median nerve, unite with the flexor pollicis longus muscle. [L, 332.]—**F. fastigialis.** See *F. tegmenti*.—**Fasciculi fronto-caudato-thalamici.** Bundles of nerve-fibres which extend from the caudate nucleus and optic thalamus to the frontal lobe. [I, 73 (K).]—**F. gangliosus hypogastricus.** A flattened trunk of nerve fibres which forms the commencement of the lateral hypogastric plexus. [L, 7 (*a*, 29).]—**F. geniculatus.** See FAISCEAU *geniculé*.—**Fasciculi graciles.** The posterior pyramids. [*a*, 29.]—**F. inferior.** Of Burdach, a thin bundle of gray matter which forms the floor of the posterior cornu of the lateral ventricle. [I, 6 (K).]—**F. infraspinatodeltoideus.** See BASIODELTOIDEUS.—**F. longitudinalis.** Of Arnold, a bundle of gray matter which extends from the posterior extremity of the occipital lobe anteriorly to the posterior horn of the lateral ventricle, beneath which it dips to form a portion of the floor. [I, 6 (K).]—**Fasciculi longitudinales coli.** The longitudinal bands of the colon. [*a*, 29.]—**F. longitudinalis inferior.** Ger., *unteres Längenbündel*. Of Burdach, a bundle of nerve-fibres which extend from the extremity of the occipital lobe to the anterior portion of the frontal lobe at the base of the corona radiata. [I, 3 (K).]—**F. longitudinalis posterior.** See *Posterior longitudinal f*.—**F. longitudinalis superior.** Of Carpenter, Meynert's system of arciform fibres which pass from the summit of one gyrus to that of another, connecting all parts of the same hemisphere by a vast system of commissures. [L, 114 (*a*, 29).]—**Fasciculi marginales aquæductus.** Bundles of fibres which form a convex swelling along the anterior margin of the aqueduct of Sylvius. [Meynert (*a*, 29).]—**Fasciculi medullæ spinalis.** The columns of the spinal cord. [*a*, 29.]—**Fasciculi musculares coli.** The bundles of muscular fibres in the walls of the colon. [*a*, 29.]—**F. nuclei olivæ.** A small bundle of fibres extending backward from the side of the olivary body. [L, 332 (*a*, 29).]—**F. obliquus.** Of Schwalbe, a well-marked bundle of nerve-fibres which arise near the basilar sulcus of the pons Varolii behind the origin of the fifth cranial nerve, and extend obliquely backward to the point of emergence of the facial and auditory nerves. [I, 17 (K).]—**Fasciculi occipito-thalamici.** The bundles of nerve-fibres which connect the optic thalamus with the occipital lobe of the brain. [I, 73 (K).]—**F. of Goll.** The column of Goll. [*a*, 29.]—**F. of reinforcement.** Of Cruveilhier, the lateral column of the spinal cord. [L, 35 (*a*, 29).]—**F. of Türck.** The antero-lateral column of the spinal cord. [*a*, 29.]—**F. olivaris, F. olivarum.** See *Olivary* PEDUNCLE.—**Fasciculi ovales.** See *Olivary* BODIES.—**Fasciculi pyramidales.** See *Medullary* RADII.—**F. radiorum.** See CORONA *radiata*.—**F. restiformis.** See *Restiform* BODY.—**F. solitarius.** See FUNICULUS *gracilis*.—**F. retroflexus.** A band of white fibres extending from the ganglion habenulæ to the ganglion interpedunculare. [*a*, 29.]—**F. superficialis musculi tragici.** See *F. accessorius musculi tragici*.—**F. tegmenti.** Ger., *Haubenfascikel*. Of Forel, a bundle of longitudinal nerve-fibres found in the tegmentum of the dog's brain. [I, 17 (K).]—**F. temporo-thalamici.** A bundle of nerve-fibres which extends from the optic thalamus to the temporal lobe. [I, 3 (K).]—**F. teres.** An eminence on the floor of the fourth ventricle. It is near the lower angle of the ventricle, being bounded on the median side by the median groove, and above by the striæ medullares. It represents the base of the anterior gray cornu of the spinal cord, and is seen on section to contain a number of large ganglion-cells, which give origin to the hypoglossal nerve. [I, 6 (K).] See *Hypoglossal* NUCLEUS.—**F. teres pontis, Fasciculi teretes.** A band of white fibres in the floor of the fourth ventricle formed by the middle fibres of the lateral tract, together with fibres from the restiform body. [L, 172 (*a*, 29).]—**Fasciculi teretes cordis.** See COLUMNÆ *carneæ*.—**F. trineuralis.** See *Solitary f*.—**Fasciculi tubulosi.** See PYRAMIDS *of Ferrein*.—**F. unciformis.** A band of white substance within the fissure of Sylvius, which connects the frontal and temporo-sphenoidal lobes. [I, 3 (K).]—**F. uncinatus.** See *F. unciformis*.—**Fibro-vascular f.** See *Fibro-vascular* BUNDLE.—**Gratiolet's f.** A tract of nerve-fibres extending between the cerebellum and the occipital lobe. ["Med. Record," Nov. 1, 1884, p. 477 (K).]—**Habenal f.** A bundle of fibres extending between the ganglion of the habenula and the interpeduncular ganglion. [*a*, 29.]—**Inferior longitudinal f.** A set of fibres lying along the outer wall of the lateral ventricle, uniting the temporo-sphenoidal and occipital lobes. [I, 15 (K).]—**Inferior parietal f.** That portion of the corona radiata which extends into the upper part of the parietal lobe. [I, 1 (K).]—**Inferior pediculo-parietal f.** Those fibres of the corona radiata which extend from the crus cerebri to the lower portion of the parietal lobe. [I, 1 (K).]—**Lateral bulbular f.** See *Olivary f*.—**Median posterior fasciculi of the medulla oblongata.** See *Posterior* PYRAMIDS.—**Middle parietal f.** The bundle of nerve-fibres which extends in the corona radiata to the middle of the parietal lobe. [I, 1 (K).]—**Middle pediculo-frontal f.** The portion of the corona radiata which extends from the crus cerebri to the middle of the frontal lobe. [I, 1 (K).]—**Olivary f.** Of Tiedemann, a bundle of nerve-fibres subjacent to the olivary body. [L, 87 (*a*, 29).]—**Pedo-lemniscal f.** A bundle of white fibres which connect the pes pedunculi cerebri with the lemniscus. [*a*, 29.]—**Posterior longitudinal f.** Lat., *f. longitudinalis posterior*. Of Spitzka, a bundle of nerve-fibres originating in the gray matter of the anterior corpora quadrigemina and running beneath the floor of the fourth ventricle to terminate in the cervical cord. It communicates with the trochlearis and abducens nuclei. ["Jour. of Nerv. and Ment. Dis.," July, 1880, p. 407 (K).]—**Primitive f.** See *Muscular* FIBRE.—**Respiratory f.** Ger., *Respirationsbündel*. See *Solitary f*.—**Solitary f.** Of Meynert and Stilling, a sensitive bundle of fibres found in the posterior part of the internal capsule, which curve upon themselves in the posterior part of the lenticular body to extend backward into the occipital lobe. [*a*, 29.]—**Sphenoidal f.** Of Allen, a tract of nerve-fibres representing the portion of the corona radiata which enters the temporo-sphenoidal lobe. [I, 1 (K).]—**Superior parietal f.** That portion of the corona radiata which extends into the upper part of the parietal lobe. [I, 1 (K).]—**Superior pediculo-frontal fasciculi.** The bundle of nerve-fibres in the corona radiata which enter the superior part of the frontal lobe. [I, 1 (K).]—**Tegmental f.** See *F. tegmenti*.—**Trineural f.** Lat., *f. trineuralis* [Spitzka]. See *Solitary f*.—**Uncrossed pyramidal f.** See *Antero-lateral* COLUMN.—**Ventral crossed f.** Of Seguin, the radix descendens fornicis of Meynert, one of the four constituents of the columna fornicis recognized by Gudden. [I.]—**Ventral direct f.** Of Seguin, one of the four components of the columna fornicis recognized by Gudden. [I.]

FASCIE (Fr.), n. Fa^{3}s-se. A stem or branch affected with fasciation. [A, 301.]

FASCIE (Ger.), n. Fa^{3}s'tsi^2-e^2. See FASCIA.—**Beinf'.** See *Crural* FASCIA.—**F. der Achselgrube.** See *Axillary* FASCIA.—**F. der Backengegend.** See *Buccal* FASCIA.—**Halsf'.** See *Cervical* FASCIA.—**Hohlhandf'.** See *Palmar* FASCIA.—**Oberschenkelf'.** See FASCIA *lata*.—**Porenf'n.** An arrangement of pores in bands, characteristic of certain species of the echinoderms. [*a*, 29.]—**Schläfenf'.** See *Temporal* FASCIA.—**Tenon'sche F.** See *Tenon's* CAPSULE.

FASCIÉ (Fr.), adj. Fa^{3}s-se-a. See FASCIATE.

FASCIKEL (Ger.), n. Fa^{3}s'tsi^2-ke^{2}l. See FASCICLE and FASCICULUS.

FASCINATION, n. Fa^{2}s-i^{2}n-a'shu^{3}n. Gr., *βασκανία*. Lat., *fascinatio* (from *fascinare*, to bewitch). Fr., *f*. Ger., *Bezauberung*. It., *fascinazione*. Sp., *fascinación*. 1. The production of a state of suspension or enfeeblement of the will by the exercise of another's will or as the result of emotion or of gazing fixedly at an object, as in the first stage of hypnotism; also the state of having the will so affected. [A, 322, 385.] 2. Enchantment, the alleged exercise of a malign influence by a person over another. [A, 322.]

FASCINOSUS (Lat.), adj. Fa^{2}s(fa^{3}s)-si^{2}n(ki^{2}n)-os'u^{3}s(u^{4}s). From *fascinum* (*q. v.*). Endowed with a large penis. [A, 318.]

FASCINUM (Lat.), n. n. Fa^{2}s(fa^{3}s)'si^{2}n(ki^{2}n)-u^{3}m(u^{4}m). 1. See FASCINATION. 2. An old name for the penis. [A, 318, 325.]

FASCIOLA (Lat.), n. f. Fa^{2}s(fa^{3}s)-si(ki^2)'ol(o^{2}l)-a^3. Fr., *fasciole*. 1. A small bandage (*e. g.*, a separate strip of the many-tailed bandage). [E.] 2. Of B. G. Wilder, the *fascia dentata*. [I, 80 (K).] 3. A genus of the *Distomidæ*. 4. See DISTOMA. [Linnæus (L, 16).]—**F. cinerea cinguli.** A continuation of the fascia dentata in the lower surface of the great commissure. [*a*, 29.]—**F. dentata.** See FASCIA *dentata*.—**F. hepatica.** See DISTOMA *lanceolatum*.—

F. heterophyes. See DISTOMA *heterophyes.*—**F. humana.** See DISTOMA *lanceolatum.*

FASCIOLATE, adj. Fa^{2}s'si^2-ol-at. See FASCICULATE.

FASCIPENNIS (Lat.), adj. Fa^{2}s(fa^{3}s)-si(ki^2)-pe^{2}n'ni^{2}s. From *fascia*, a bundle, and *penna*, a wing. Fr., *fascipenné*. Having the wings banded. [L, 180.]

FASCIS (Lat.), n. m. Fa^{2}s(fa^{3}s)'si^{2}s(ki^{2}s). Gen., *fas'cis.* See FASCICULUS.

FASCITIS (Lat.), n. f. Fa^{2}s(fa^{3}s)-sit(ket)'i^{2}s. Gen., *fascit'idos* (*-is*). Inflammation of a fascia. [*a*, 18.]

FASEL (Ger.), n. Fa^{3}z'e^{2}l. See DOLICHOS.—**Aegyptische F.** See DOLICHOS *lab-lab.*—**F'wurzel.** The *Bryonia alba.* [B, 92 (*a*, 14).]—**Juckende F.** The *Mucuna pruriens.* [B, 180 (*a*, 24).]

FASELLES (Fr.), n. Fa^3-ze^{2}l. The *Phaseolus vulgaris.* [B, 275 (*a*, 24).]

FASELN (Ger.), n. Fa^{3}z'e^{2}l'n. See DELIRIUM.

FASÉOLE (Fr.), n. Fa^3-za-ol. The *Phaseolus vulgaris* and *Faba minor.* [B, 121 (*a*, 24).]

FASELUS (Lat.), n. m. and f. Fa^{2}s(fa^{3}s)-el(al)'u^{3}s(u^{4}s). Gr., φάσηλος. The marsh-bean (*Vicia faba*). [B, 121 (*a*, 24).]

FASER (Ger.), n. Fa^{3}z'e^{2}r. See FIBRE.—**Achsenf'.** See AXIS *cylinder.*—**Auslaufer F'n.** Connective-tissue fibres formed by the elongated processes of connective-tissue corpuscles. ["Arch. f. Anat. u. Phys.," 1858, p. 168 (J).]—**Balkenf'n.** Fibres present in or constituting a framework. ["Arch. f. Anat. u. Phys.," 1852, p. 130 (J).]—**Beugef'n.** Motor nerve-fibres which innervate flexor muscles. ["Arch. f. Anat. u. Phys.," 1846, p. 76 (J).]—**Bewegungsf'n, Bewegungsnervenf'n.** See *Motor* NERVE-FIBRES.—**Bindegewebef'n.** See *Connective-tissue* FIBRES.—**Blasse Nervenf'n.** See *Non-medullated* NERVE-FIBRES.—**Blastenf'n.** Fibres of connective tissue which are supposed to be formed by the fibrillation of a homogeneous intercellular substance. [J.]—**Bogenf'n.** See *Arciform* FIBRES.—**Centrale Nervenf'.** See *Central* NERVE-FIBRE.—**Druckf'n.** Fibres producing pressure. ["Arch. f. Anat. u. Phys.," 1883, p. 117 (J).]—**Druckf'system.** A system of fibres producing pressure. ["Arch. f. Anat. u. Phys.," 1883, p. 117 (J).]—**Druckpolster-F'system.** A system of fibres producing compression. ["Arch. f. Anat. u. Phys.," 1883 (Phys.), p. 117 (J).]—**Dunkelrandige Nervenf'n.** See *Medullated* NERVE-FIBRES.—**Durchbohrende F'n.** See *Perforating* FIBRES.—**Elementarf'n.** See *Elementary* FIBRES.—**Empfindungsf'n, Empfindungsnervenf'n.** See *Sensory* NERVE-FIBRES.—**Endf'n.** See *Non-medullated* NERVE-FIBRES.—**Ependemf'n.** See under EPENDYM.—**Epilemmate F.** That part of a nerve-fibre in a motorial end-plate immediately without or upon the sarcolemma. [Kühne, "Arch. f. Biol.," 1886, p. 63 (J).]—**Extranucleare F'n.** Fibres of the cerebellum which are without the dentate nucleus. [J.]—**F'ausstrahlung des Kleinhirnschenkels.** The radiation of the fibres of the cerebellar peduncle in the medullary centre of the cerebellum. [I, 17 (K).]—**F'austausch.** The exchange or commingling of the fibres of different nerve trunks as seen in a nervous plexus. [J.]—**F'baum.** A tree or brush-like division of a connective tissue or other fibrous bundle into fibres or bundles. ["Arch. f. Anat. u. Phys.," 1856, p. 55 (J).]—**F'bildung.** A formation of fibres or a tissue composed of fibres. ["Arch. f. Anat. u. Phys.," 1849, p. 307 (J).]—**F'bündel.** See FASCICULUS.—**F'nbüschel.** A tuft or bundle of fibres. [J.]—**F'capsel.** The fibrous capsule of a joint. [L, 80.]—**F'complexus.** A combination or intricate arrangement of fibres. [I, 17 (K).]—**F'cylinder.** A bundle of zoosperms. ["Arch. f. Anat. u. Phys.," 1845, p. 185 (J).]—**F'fettgeschwulst.** A fibro-lipoma. [*a*. 29.]—**F'geschwulst.** See FIBROMA. —**F'gewächs.** See ALGÆ.—**F'gewebe.** 1. See *Connective* TISSUE. 2. Of Haeckel, a general term for nerve and muscular fibres. ["Jena. Ztg.," 1884, p. 206 (J).] 3. See PROSENCHYMA.—**F'glieder.** See *Medullary* SEGMENTS.—**F'gyps.** Fibrous gypsum. [B, 180 (*a*, 24).]—**F'haut.** See the major list.—**F'hülle.** See TUNICA *fibrosa.* —**Fibrinf'n.** See FIBRIN.—**F'ig.** Fibrous. [L, 43.]—**F'kalk.** See ATLAS*spath.*—**F'kerngeschwulst.** A fibro-nucleated tumor. [E.]—**F'knorpel.** See the major list.—**F'körbe.** 1. Of M. Schultze, the basket-like or crate-like appearance of the membrana limitans externa of the retina after the removal of the rods and cones; due to the delicate terminal processes of the radial or Müllerian fibres extending outward from the external limiting layer to surround and support the rods and cones. [J, 30, 140, 157.] 2. The basket-like form of the nucleus in the diaster stage of division. [J, 67.]—**F'krebs.** See SCIRRHUS, CARCINOMA, and *Fibrous* CANCER.—**F'kreuzung.** A decussation of fibres. [I, 67 (K).] —**F'lücke.** See AREOLA.—**F'netz.** A network of fibres. [J.]—**F'ring.** See *Annular* FIBRE.—**F'sarkom.** Fibro-sarcoma. [E.]—**F'schicht.** A layer of fibres. [J.]—**F'schwefel.** A fibrous variety of sulphur. [B, 180.]—**F'stoff.** See FIBRIN.—**F'strang.** See FASCICULUS.—**F'substanz.** The material of fibrous tissue. [J.]—**F'system.** Any system of fibres. [J.]—**F'verlauf.** The course of fibres. [I, 6 (K).]—**F'zellen.** In general, elongated, fibre-like cells. [J, 137.]—**F'zug.** See the major list.—**Gefässf'n.** The muscular fibres of the blood-vessels. ["Arch. f. Anat. u. Phys.," 1842, Bericht, Beichert, cxvi (J).]—**Gehirnf'n.** Nerve-fibres of the brain. [J.]—**Gerade F'n der Rhaphe.** Fibres extending dorso-ventrally in the rhaphe or septum of the medulla oblongata. [J, 30.]—**Glatte Muskelf'n.** See *Muscular fibre*-CELLS.—**Haarf'n.** See *Hair* FIBRES.—**Hirnf'n.** The nerve-fibres of the brain. [J.]—**Hörnervenf'n.** See *Auditory* FIBRES.—**Hypolemmale F.** In a motorial end-plate, that part of a nerve-fibre within the sarcolemma. [J.]—**Intranucleare F'n.** Fibres of the cerebellum which originate in or traverse the dentate nucleus. [I, 94.]—**Kernf'n.** See *Achromatic* FIBRILS.—**Längliche F'n, Längsf'n.** Longitudinal fibres. [L, 80.]—**Laryngeusf'n.** The fibres of the nervus laryngeus superior. [J.]—**Leitungsf'n.** Conducting fibres of any kind; especially nerve-fibres which convey an impulse or a stimulus. ["Arch. f. Anat. u. Phys.," 1877 (Phys.), p. 96 (J).]—**Linsenf'n.** The fibre-like cells of the crystalline lens. ["Arch. f. Anat. u. Phys.," 1854, p. 374 (J).]—**Markf'.** The central nerve-fibre of a Pacinian corpuscle. [J, 67.]—**Markhaltige F'n.** See *Medullated* NERVE-FIBRES.—**Mauthner'sche F.** An enormous nerve-fibre extending along the ventral horn of the myeline in bony fishes. [J, 67.]—**Müller'sche F'n.** 1. The radial or Müllerian fibres of the retina. [J, 30, 80, 140.] 2. Large longitudinal nerve-fibres on each side of the central canal in the myeline of *Petromyzon fluviatilis.* ["Arch. f. Anat. u. Phys.," 1860, p. 556 (J).]—**Muskelf'n.** See *Muscular* FIBRES.—**Muskelf'scheide.** See SARCOLEMMA.—**Nervenf'.** See NERVE-FIBRE.—**Nervenf'scheide.** The sheath of Schwann. ["Arch. f. Anat. u. Phys.," 1846, p. 227 (J).]—**Nervenprimitivf'.** See NERVE-FIBRE.—**Organische Muskelf'n.** See *Muscular fibre* CELLS.—**Parenchymf'n.** Fibres of connective tissue formed from the intercellular or ground substance in contra-distinction to those formed by the elongation of connective-tissue corpuscles or their processes. ["Arch. f. Anat. u. Phys.," 1858, p. 168 (J).]—**Perforirende F'n.** See *Sharpey's* FIBRES.—**Plasmaf'.** See *Muscular* FIBRE.—**Primitivf'.** A primitive or ultimate fibre of any kind, as of a nerve or muscle. ["Arch. f. Anat. u. Phys.," 1859, p. 326 (J).]—**Primitivf'scheide.** The sheath of a primitive fibre, such as the sarcolemma or neurilemma. ["Arch. f. Anat. u. Phys.," 1842, p. 116 (J).]—**Radiärf'n.** See *Radiating* FIBRES.—**Radiäre F'krone.** See CORONA *radians.*—**Schraubenf'n.** See *Spiral* FIBRES.—**Secretorische Nervenf'n.** See *Secretory* NERVE-FIBRES.—**Sensible Nervenf'n.** See *Sensory* NERVE-FIBRES.—**Spindelf'n.** See *Achromatic* FIBRILS.—**Spiralf'.** See *Spiral* FIBRE.—**Stammf'.** A trunk or stem fibre. [J, 102, 124, 186.]—**Streckf'n.** Motor nerve-fibres which innervate extensor muscles. [J.]—**Stützf'n.** In general, connective-tissue fibres or networks which serve for support. ["Arch. f. Anat. u. Phys.," 1852, p. 66, 67 (J).]—**Sympathische Nervenf'.** See *Sympathetic* NERVE-FIBRES. —**Terminalf'n.** See *Terminal* FIBRES.—**Tomes'sche F'n.** See *Dentinal* FIBRES.—**Trophische Nervenf'n.** See *Trophic* NERVE-FIBRES.—**Umspinnende F.** An elastic fibre wound straight or spirally around a bundle of white fibrous tissue. [J, 30, 143.]—**Ungekreuzte F'n.** Those fibres in the optic chiasm which do not cross to the opposite side. [I, 17 (K).]—**Vagusf'n.** See *Vagus* FIBRES.—**Varicöse Nervenf'n.** See *Varicose* NERVE-FIBRES.—**Wurzelf'n, Wurzel-Primitivf'n.** The nerve-fibres of the nerve-roots. [J.]—**Zellf'n.** Of Henle, fibres supposed to be formed from cells. [J, 143.]—**Zellgewebef'n, Zellgewebsf'n.** See *Connective* TISSUE.

FÄSERCHEN (Ger.), n. Faz'e^{2}r-ch^{2}e^{2}n. See FIBRIL.

FASERHAUT (Ger.), n. Fa^{3}z'e^{2}r-ha^3-u^{4}t. A fibrous membrane.—**Aeussere F.** The outer coat of a hair follicle. [L, 31.]—**Innere F.** The middle coat of a hair follicle. [L, 31.]—**Muskelf'.** See SARCOLEMMA.

FASERKNORPEL (Ger.), n. Fa^{3}z'e^{2}r-kno^{2}rp-e^{2}l. Fibro-cartilage. [J.]—**F. der Zunge.** See SEPTUM *linguæ.*—**F'ig.** Fibro-cartilaginous. [L, 43.]

FASERSTRANG (Ger.), n. Fa^{3}z'e^{2}r-stra^{3}n^2. See FASCICULUS. —**Grosshirn-Faserstränge.** The bundles of nerve-fibres of the cerebrum. [I, 6 (K).] See CORONA *radians.*

FASERUNG (Ger.), n. Fa^{3}z'er^2-un^2. See FIBRILLATION.

FASERZUG (Ger.), n. Fa^{3}z'e^{2}r-tsug. A tract or bundle of fibres. [I, 4 (K).]—**Dendritischer F.** Of Stilling, certain interlacing nerve-fibres in the cerebellum. [I, 17 (K).]—**Fleischf'zugl.** A slip or bundle of muscular fibres. [J.]—**Gratiolet'scher F.** Of Gratiolet, a tract of nerve-fibres in the posterior part of the internal capsule of the brain. ["Arch. f. Psych.," xiv, 1883, p. 697 (J).] —**Halbzirkelförmiger F.** Of Stilling, certain bundles of fibres in the medullary centre of the cerebellum. They originate in the middle and inferior peduncles, and surround the corpus dentatum. [I, 17 (K).]—**Ventral-F. vom Thalamus.** The tract of nerve-fibres proceeding from the lower portion of the optic thalamus. ["Arch. f. Psych.," vii, 1877 (I).]

FASHOOK, n. In Morocco, a plant said to yield gum ammoniac; according to Lindley, the *Ferula orientalis;* according to others, the *Elæoselinum humile* or *Ferula tingitana.* [B, 46, 121 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]

FASI, n. In Japan, the *Corylus avellana.* [B, 121 (*a*, 24).]

FASI NO KI, n. Of Kaempfer, the *Rhus succedanea.* [B, 121 (*a*, 24).]

FASKOMYLEA, n. In Greece, the *Salvia pomifera.* ["Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]

FASKOOK, FASOGH, n's. See FASHOOK.

FASS (Ger.), n. Fa^{3}s. See CADUS.—**F'ähnlich.** See DOLIOLOID. —**F'kraft.** See CAPACITY.

FASSEN (Ger.), n. Fa^{3}s'se^{2}n. Prehension.

FAST, v. intr. Fa^{3}st. A.-S., *fæstan.* Lat., *jejunium servare.* Fr., *jeûner.* Ger., *fasten.* To abstain from food.

FAST, n. Fa^{3}st. Gr., νηστεία. Lat., *jejunium.* Fr., *jeûne.* Ger., *Fasten.* A period of abstinence from food.

FASTIDIUM (Lat.), n. n. Fa^{2}s(fa^{3}s)-ti^{2}d(ted)'i^2-u^{3}m(u^{4}m). From *fastidire*, to loathe. A loathing.—**F. cibi, F. ciborum.** See ABOMINATIO and ANOREXIA.—**F. potus.** Aversion to drink. [L, 116.]

FASTIGIATE, adj. Fa^{2}s-ti^{2}j'i^2-at. Lat., *fastigiatus.* Fr., *fastigié.* Ger., *ebengipfelig, gleichhoch.* Of feathers, forming a conical bundle or a bundle with an enlarged head, like a wheat-sheaf; of branches, conoidal, or pyramidal. [B, 19, 121 (*a*, 24); L, 343.]

FASTIGIUM (Lat.), n. n. Fa^{2}s(fa^{3}s)-ti^{2}j(ti^{2}g)'i^2-u^{3}m(u^{4}m). Fr., *faîte* (1st def.), *acmé* (2d def.). Ger., *Giebel* (1st def.), *Zelt* (1st def.), *Gipfelpunkt* (2d def.). Lit., the summit of a gabled roof. 1. The

angle formed at the point of junction of the velum medullare anterius and the inferior vermiform process. [I, 6 (K).] 2. Of a disease, see ACME.

FASTING, adj. Fa^{3}st'i^{2}n^{2}. Lat., *jejuniosus*. Fr., *à jeune*, *jeunant*. Ger., *fastend*. Abstaining from food; as a n., abstinence from food.

FASTUCA (It.), n. Fa^{3}s-tu'ka^{3}. In Sicily, the *Pistacia vera*. [B, 88 (*a*, 14).]

FAT, adj. Fa^{2}t. Gr., πίων. Lat., *pinguis*. Fr., *gras*. Ger., *fett*. It., *grasso*. Sp., *gordo*. Plump, fleshy. [C.]—**F. hen.** A name for various plants, but especially for certain species of the *Chenopodiaceæ* having thick, succulent foliage, including *Chenopodium album*, *Chenopodium bonus Henricus*, *Chenopodium rubrum*, *Chenopodium vulvaria*, *Atriplex patula*, *Atriplex erecta*, *Atriplex hastata*, *Polygonum fagopyrum*, *Glechoma hederaceum*, *Chrysanthemum segetum*, *Capsella bursa-pastoris*, and *Artemisia vulgaris*. [A, 505 (*a*, 21).]—**F.-pork.** The *Clusia flava*. [B, 19, 275 (*a*, 24).]

FAT, n. Fa^{2}t. Gr., στέαρ. Lat., *adeps*. Fr., *graisse*. Ger., *Fett*. It., *grasso*. Sp., *grasa*. 1. A solid oil; an oily concrete substance. [L, 77.] 2. See *Adipose* TISSUE.—**Badger's f.** See AXUNGIA *taxi*.—**Bear's f.** See AXUNGIA *ursi*.—**Beaver's f.** See AXUNGIA *castoris*.—**Cholesterin f.** See under CHOLESTERIN.—**Corpse-f.** See ADIPOCERE.—**Dog's f.** See AXUNGIA *canis*.—**Duck's f.** See AXUNGIA *anatis*.—**F. of the neck of the horse.** See AXUNGIA *equi*.—**F. tissue.** See *Adipose* TISSUE.—**F. vesicles.** See *Fat* CELLS and *Milk* GLOBULES.—**Fox's f.** See AXUNGIA *vulpis*.—**Hare's f.** See AXUNGIA *leporis*.—**Hedge-hog's f.** See AXUNGIA *erinacei*.—**Hen's f.** See AXUNGIA *gallinæ*.—**Heron's f.** See AXUNGIA *ardeæ*.—**Human f.** See AXUNGIA *hominis*.—**Liquid f.** 1. Melted f. 2. See *Fixed* OIL.—**Macaw f.** A semi-solid yellow substance with a violet odor, obtained from the seeds of *Cocos aculeata*. [B, 81 (*a*, 27).]—**Marmot's f.** See AXUNGIA *muris alpini*.—**Quail's f.** See AXUNGIA *coturnicis*.—**Neutral f's.** Normal propenyl ethers of fatty acids. [B, 3, 52, 270 (*a*, 27).]—**Rabbit's f.** See AXUNGIA *cuniculi*.—**Saponifiable f's.** See *Neutral f's*.—**Seal's f.** See AXUNGIA *phocæ*.—**Snakes' f.** See AXUNGIA *serpentum*.—**Stork's f.** See AXUNGIA *ciconiæ*.—**Vipers' f.** See AXUNGIA *viperarum*.—**Wild cat's f.** See AXUNGIA *catis silvestris*.—**Wolf's f.** See AXUNGIA *lupi*.

FATAGNE (Fr.), n. Fa^{2}-ta^{3}n-y'. In the Mauritius, the *Panicum mapinum*. [B, 121 (*a*, 24).]

FATAK, n. In Madagascar, a name for many forage grasses. [B, 121 (*a*, 24).]

FATCH, FATCHES, n's. Fa^{2}ch. fa^{2}ch'e^{2}z. The *Vicia sativa*. [A, 505 (*a*, 21).]—**Meadow f.** The *Onobrychis sativa*. [A, 505 (*a*, 21).]

FATHER-OF-HEATH, n. Fa^{3}th''u^{5}r-o^{2}v-heth'. The *Erica tetralix*. [A, 505 (*a*, 21).]

FATIGUE, n. Fa^{2}t-eg'. Gr., κόπος, πόνος, κάματος. Lat., *fatigatio* (from *fatigare*, to weary). Fr., *f.* Ger., *Müdigkeit*. Weariness, impaired functional capability due to over-exertion.—**Retinal f.** Fr., *f. de la rétine*. A state of diminished excitability of the optic nerve following continued excitation. [L, 88 (*a*, 29).]

FATNIA (Lat.), n. f. Fa^{2}t(fa^{3}t)'ni^{2}-a^{3}. See PHATNE.

FATSI, n. The *Aralia japonica*. [B, 121 (*a*, 24).]

FATTY, adj. Fa^{2}t'i^{2}. Gr., πιμελής, λιπαρός. Lat., *adiposus*. Fr., *gras*, *graisseux*. Ger., *fettig*. It., *grassoso*, *grassetto*. Sp., *grasoso*, *grasiento*. Pertaining to, of the nature of, or abounding in fat. [D.]

FATUISM, n. Fa^{2}t'u^{2}-i^{2}z'm. See FATUITY.

FATUITAS (Lat.), n. f. Fa^{2}t(fa^{3}t)-u^{2}(u^{4})'i^{2}t-a^{2}s(a^{3}s). Gen., *-at'is*. See FATUITY.

FATUITY, n. Fa-tu^{2}'i^{2}-ti^{2}. Gr., μωρία. Lat., *fatuitas* (from *fatuus*, foolish). Fr., *fatuisme*, *fatuité*. Ger., *Blödsinn*. Idiocy, dementia. [A, 385.]

FATURASALIUM, n. In India, the seeds of *Prangos papularium*. ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]

FAU, n. In Samoa, the *Hibiscus abelmoschus*; elsewhere, the *Fagus silvatica*. [B, 121 (*a*, 24).]

FAUCAL, adj. Fa^{4}'ka^{2}l. See FAUCIAL.

FAU-CAPILLERO, n. In Provence, the *Asplenium trichomanes*. [B, 121 (*a*, 24).]

FAU-CAROUBIÉ, n. In Provence, the *Lotus edulis*. [B, 121 (*a*, 24).]

FAUCES (Lat.), n. f., pl. of *faux*. Fa^{4}'(fa^{3}'u^{4})-sez(kas). Fr., *gosier*. Ger., *Rachen*, *Schlund*. The posterior part of the cavity of the mouth, behind the palate; of a flower, the throat of the calyx or the corolla; of a shell, the portion of its first chamber visible from the aperture. [*a*, 24; L, 115, 343.]

FAUCET (Fr.), n. Fo-sa. See FALSETTO.

FAUCHIO, n. In Provence, the *Coronilla varia*. [B, 121 (*a*, 24).]

FAUCIAL, adj. Fa^{4}'si^{2}-a^{2}l. Pertaining to the fauces.

FAUCILLE (Fr.), n. Fo-sel-y'. The *Coronilla varia*. [B, 121 (*a*, 24).]

FAUCITIS (Lat.), n. f. Fa^{4}(fa^{3}-u^{4})-sit(ket)'i^{2}s. Gen., *-cit'idos* (*-is*). See ISTHMITIS.

FAUCON (Fr.), n. Fo-ko^{2}n^{2}. See FALCO.

FAUDENIGI (Ar.), n. The *Origanum vulgare*. [L, 105.]

FAUFEL, n. In India, the *Areca catechu*. [B, 88, 121 (*a*, 24).]

FAU-FRÉSIÉ, n. In Provence, the genus *Arbutus*. [B, 121 (*a*, 24).]

FAU-JOUNC, n. In Provence, the *Juncus conglomeratus*. [B, 121 (*a*, 24).]

FAUL (Ger.), adj. Fa^{3}'u^{4}l. Putrid.—**F'baum.** The *Rhamnus frangula* and the *Prunus padus*. [B, 180 (*a*, 24).]—**F'baumrinde.** The bark of *Rhamnus frangula*. [B, 180 (*a*, 24).]—**F'brut.** See FOUL-BROOD.—**Flüssiges f'baumrindenextrakt.** See *Extractum* FRANGULÆ *fluidum*.—**F'end.** Septic. [E.]—**F'fähig.** Susceptible of putrefaction. [L, 37 (*a*, 14).]—**F'fieber.** See the major list.—**F'fleck.** A carious spot; an ulcer. [*a*, 29.]—**F'fleckig.** Ulcerous. [*a*, 29.]—**F'heit.** Putridity. [L, 80.]—**F'icht, F'ig.** Putrid. [L, 80.]—**F'machend.** Putrefactive. [L, 43.]—**F'rübe.** The *Bryonia alba*. [B, 180 (*a*, 24).]—**F'sein.** The cachexia ictero-verminosa of sheep. [L, 30, 37 (*a*, 14).]—**F'stoffe.** See PTOMAINES.—**F'sucht.** See *F'sein*.—**F'tod.** The condition of maceration of a dead fœtus which is still retained within the maternal organism.—**F'todt.** See TODT-*faul*.—**F'todtsein.** See *F'tod*.

FAULENSEEBAD (Ger.), n. Fa^{3}'u^{4}l-e^{2}n-za-ba^{3}d. A health resort on the southwestern shore of Lake Thun, in the canton of Berne, Switzerland, where there are springs containing gypsum. [A, 319 (*a*, 21).]

FAULEX, n. Of the alchemists, steel. [L, 94 (*a*, 21).]

FAULFIEBER (Ger.), n. Fa^{3}'u^{4}l-feb-e^{2}r. A putrid or septic fever. [L, 80.]—**Milchiges F.** The equivalent of a term used by Willis (in 1662) to designate a form of puerperal fever supposed to be due to milk metastasis. [A, 57.]

FÄULNISS (Ger.), n. Foil'ni^{2}s. Putrefaction. [D, 4.]—**F'alkaloid, F'base.** See PTOMAINE.—**F'bacterien.** See BACTERIA *of putrefaction*.—**F'bewirkend.** Causing putrefaction. [A, 521.]—**F'bewohner.** See SAPROPHYTE.—**F'brand.** Septic gangrene. [A, 319 (*a*, 21).]—**F'erregend.** Exciting putrefaction. [A, 521.]—**F'erreger.** See BACTERIA *of putrefaction*.—**F'fleck.** See FAUL-*fleck*.—**F'gifte.** See PTOMAINES.—**F'hemmend.** See ANTISEPTIC.—**F'hemmung.** See ANTISEPSIS.—**F'herd.** A centre or focus of putrefaction. [*a*, 14.]—**F'keim.** The germ of putrefaction. [*a*, 14.]—**F'pilz.** A fungus that gives rise to putrefaction. [L, 37 (*a*, 14).]—**F'widrig.** Antiseptic. [K, 16.]

FAUM, n. The *Angræcum fragrans*. [B, 173 (*a*, 24).]

FAUNA (Lat.), n. f. Fa^{4}n'(fa^{3}u^{4}n)-a^{3}. From *Faunus*, a Faun. Fr., *faune*. Ger., *F.* The assemblage of animals peculiar to any particular country or region. [L.]

FAUNAL, adj. Fa^{4}n'a^{2}l. Pertaining to a fauna. [L.]

FAUNIST, n. Fa^{4}n'i^{2}st. A student of a fauna. [L.]

FAU-PULEGI, n. In Provence, the *Mentha arvensis*. [B, 121 (*a*, 24).]

FAUQUIER WHITE SULPHUR SPRINGS, n. Fa^{4}-ker'-hwit su^{3}l'fu^{5}r spri^{2}n^{2}z. A place in Fauquier County, Virginia, where there are purgative and diuretic springs. [A, 363 (*a*, 21).]

FAU-RIS, n. In Provence, the *Leersia oryzoides*. [B, 121 (*a*, 24).]

FAURSA, n. In Afghanistan, the *Alhagi Maurorum*. [B, 121 (*a*, 24).]

FAUSOGA, n. In Samoa, the *Pipturus propinquus*. [B, 121 (*a*, 24).]

FAUSSET (Fr.), n. Fo-sa. See FALSETTO.

FAUST (Ger.), n. Fa^{3}-u^{4}st. The fist. [L, 30.]

FAUTEL NOYAU (Fr.), n. Fo-te^{2}l-nwa^{3}-yo. The betel-nut. [B, 121 (*a*, 24).]

FAUTIA, n. In Tahiti, the *Hibiscus abelmoschus*. [B, 121 (*a*, 24).]

FAU-TOULIPAN, n. In Provence, the *Anemone coronarioides*. [B, 121 (*a*, 24).]

FAUTU, n. In Samoa, the *Hibiscus* (*Paritium*) *tiliaceus*. [B, 121 (*a*, 24).]

FAUVE (Fr.), adj. Fov. Fallow, tawny. [L.]

FAUVI, n. In Provence, the *Rhus coriaria*. [B, 121 (*a*, 24).]

FAUX (Lat.), n. f., sing. of *fauces* (*q. v.*). Fa^{4}x(fa^{3}-u^{4}x). Gen., *fau'cis*.

FAUX (Fr.), adj. Fo. False, spurious.

FAUX (Fr.), n. Fo. See FALX.—**F. du cerveau** (Fr.). See FALX *cerebri*.—**F. du cervelet** (Fr.). See FALX *cerebelli*.—**F. de la veine ombilicale, F. du péritoine.** See FALX *peritonæi maxima*.—**Grande f. du cerveau.** See FALX *cerebri*.—**Grande f. du péritoine.** See FALX *peritonæi maxima*.—**Petite f.** See FALX *cerebelli*.—**Petite f. du péritoine.** See *Lesser* FALX *of the peritonæum*.

FAVAGELLO (It.), n. Fa^{3}-va^{3}-je^{2}l'lo. The *Ranunculus ficaria*. [B, 121 (*a*, 24).]

FAVAGGINE (It.), n. Fa^{3}-va^{3}-je'na. The genus *Zygophyllum*. [B, 121 (*a*, 24).]

FAVAGINOUS, adj. Fa^{2}v-a^{2}j'i^{2}n-u^{3}s. See FAVOUS.

FAVAROUN, n. In Provence, the *Faba equina*. [B, 121 (*a*, 24).]

FAVE (Fr.), n. Fa^{3}v. The *Faba major*. [B, 121 (*a*, 24).]

FAVELOTTE (Fr.), n. Fa^{3}v-lot. The *Faba major*. [B, 173 (*a*, 24).]

FAVELOUN, n. In Provence, the *Viburnum tinus*. [B, 121 (*a*, 24).]

FAVEOLATE, n. Fa-ve'o-lat. Lat., *faveolatus*, *favosus* (from *favus*, a honey-comb). Fr., *alvéolé*. Ger., *kleinwadig*. Alveolar (2d def.); of seeds, pitted. [B, 1, 123 (*a*, 24).]

FAVERELL, n. Fa^{3}-ve^{2}r-e^{2}l'. The *Veronica anagallis*. [B, 275 (*a*, 24).]

FAVEROLLE (Fr.), n. Fa^{3}v-rol. The *Phaseolus vulgaris.* [B, 121, 173 (α, 24).]

FAVEROLE, n. Fa^{2}v-e^2-rol′. The *Dracunculus vulgaris.* [B, 275 (α, 24).]

FAVETOUN, n. See Faveloun.

FAVEUX (Fr.), adj. Fa^3-vu^5. See Favous.

FAVIEU, n. In Provence, the *Verbascum thapsus.* [B, 121 (α, 24).]

FAVIFORMIS (Lat.), adj. Fa(fa^3)-vi(wi^2)-fo^{2}rm′i^{2}s. From *favus*, a honey-comb, and *forma*, form. Of ulcers, honey-combed. [L, 94.]

FAVILLA (Lat.), n. f. Fa(fa^3)-ve^{2}l(wi^{2}l)′la^3. Lit., fine dust; in the *Algæ*, a capsule in which the nucleus, consisting of many spores, is formed within a single mother-cell; of Martyn and of Mirbel, the liquid containing granules showing Brownian movement in the pollen grain. [A, 301, 385; B, 19 (α, 24).]

FAVILLIDIUM (Lat.), n. n. Fa(fa^3)-vi^{2}l(wi^{2}l)-li^{2}d′i^2-u^{3}m(u^{4}m). Fr., *favillidie.* In *Algæ*, a group of several contiguous fertile cells. [B, 19 (α, 24).]

FAVINIER (Fr.), n. Fa^3-ve-ne-a. The *Fagus silvestris.* [B, 121, 173 (α, 24).]

FAVIQUE (Fr.), adj. Fa^2-vek. See Favous.

FAVIU, n. In Provence, the *Phaseolus vulgaris.* [B, 121 (α, 24).]—**F. negre.** In Provence, the genus *Dolichos.* [B, 121 (α, 24).]

FAVO, n. In Provence, the *Faba major.* [B, 121 (α, 24).]—**F. fero.** The *Faba narbonensis.* [B, 121 (α, 24).]

FAVOSE, adj. Fa′vos. See Faveolate and Favous.

FAVOSO-AREOLATE, adj. Fa-vo″so-a^{2}r-e′o-lat. From *favus*, a honey-comb, and *areola* (*q. v.*). Pitted with net-like markings. [α, 24.]

FAVOSO-DEHISCENS (Lat.), adj. Fa(fa^3)-vo(wo)″so(so^3)-de(da)-hi^{2}s′se^{2}nz(kans). Dehiscing by a number of openings, so as to present the appearance of a honey-comb. [B, 198.]

FAVOSUS (Lat.), adj. Fa(fa^3)-vo(wo)′su^{3}s(su^{4}s). See Faveolate and Favous.

FAVOUETTE (Fr.), n. Fa^3-vu-e^{2}t. The *Lathyrus tuberosus.* [B, 121, 173 (α, 24).]

FAVOUS, adj. Fa′vu^{3}s. Lat., *favosus.* Fr., *faveux, favique.* Relating or belonging to favus. [J.]

FAVULOSUS (Lat.), adj. Fa(fa^3)-vu^2(wu^4)-lo′su^{3}s(su^{4}s). Fr., *favuleux.* Ger., *zellig.* Marked with small cells upon the surface. [L, 180.]

FAVULUS (Lat.), n. m. Fa(fa^3)′vu^2(wu^4)-lu^{3}s(lu^{4}s). See Alveolus (4th def.).

FAVUS (Lat.), n. m. Fa(fa^3)′vu^{3}s(wu^{4}s). Gr., κηρίον. Fr., *teigne faveuse* (ou *à rayon de miel*), *coton.* Ger., *Erbgrind, Honigwabengrind, ansteckender Grindkopf.* It., *favo.* Sp., *tiña.* Lit., a honey-comb. 1. Honey-comb ringworm (or scall); an old term for various skin diseases, usually pustular and attended with the formation of yellow, honey-comb-like crusts. 2. Of Alibert and Fuchs, a term for both f. (3d def.) and ringworm. 3. In modern dermatology, a contagious and parasitic skin disease in man and other animals produced by the *Achorion Schönleinii* (*q. v.*). In its most usual form it is characterized by yellow, rounded, musty-smelling crusts within and upon the skin, varying in size from that of a pin-head to that of the finger-nail, each of which presents a concave surface above and a corresponding convexity of the surface beneath. The disea e may affect the skin, the hair, or the nails. Its most usual situation is the scalp, where it is attended with loss of the hair, which, when the disease is long-continued, may be permanent in consequence of cicatrization or atrophy of the affected skin. Sometimes, especially when occurring elsewhere than upon the hairy scalp, it appears in the form of spreading, vesicular rings, or scaly, rounded patches, resembling the vesicular or macular form of ringworm, but which are usually followed by the formation, at certain points, of the characteristic yellow crusts. [G, 5, 7.]—**Epidemic f.** F. affecting the epidermis, as distinguished from f. of the hairs. [G.]—**F. achatinus.** Lit., agate-like f.; f. (2d def.) marked with lines and rings of varying color. [G.] See *F. urceolaris.*—**F. confertus.** F. with the crusts closely aggregated together. [G.]—**F. crustosus.** F. attended with the formation of thick crusts. [G.]—**F.-cup.** See under Cup.—**F. dispersus, F. disseminatus.** Fr., *f. disséminé.* F. in which the crusts are usually of small size with a hair perforating the centre of each, and separated from each other by considerable intervals. [G.]—**F. eczematodes.** F. associated with eczematous inflammation. [G.]—**F. en écu** (Fr.). See Teigne *faveuse scutiforme.*—**F. en grouppe** (Fr.). Ringworm of the scalp. [G, 15.]—**F. fungus.** See Achorion *Schönleinii.*—**F. granulatus.** Fr., *teigne faveuse squarreuse.* F. in which the crusts are irregular, usually thick, and more or less broken or granular; a form resulting commonly from the intersection and coalescence of adjacent scutula. [G.] Cf. Teigne *faveuse squarreuse.*—**F. herpeticus.** Of H. Quincke, a form of f. resembling herpes and generally affecting the parts that are not hairy; caused, according to him, by his variety α of the f. fungus. ["Mntshft. f. prakt. Dermat.," Jan. 15, 1889, p. 49.]—**F. lupinosus.** See Porrigo *lupinosa.*—**F. nummularis.** Fr., *f. nummulaire.* See Teigne *faveuse scutiforme.*—**F′pilz** (Ger.). See Achorion *Schönleinii.*—**F. scutiformis.** Fr., *f. scutiforme.* Ringworm of the scalp. [G, 7.] See Mycosis *trichophytina.*—**F. scutulatus.** See *F. urceolaris.*—**F. scutulum.** See under Scutulum.—**F. sparsus.** See *F. dispersus.*—**F. squamosus.** F. usually without crusts and showing simply a desquamating surface, as in ringworm. It is generally followed by the production of characteristic scutula at one or more points. [G.]—**F. squarrosus.** See *F. crustosus.*—**F. suberinus.** Lit., cork-like f.; f. with thick crusts that resemble cork. [G, 15.]—**F. turriformis.** F. with thick, elevated crusts. [G.]—**F. unguium.** See Onychomycosis *favosa.*—**F. urceolaris.** Fr., *teigne faveuse urcéolaire.* Lit., f. like a little pitcher or dish; a variety affecting either the hairy scalp or other parts of the body, which begins in circumscribed, reddened, scaly patches, sometimes with a vesicular border, followed by the development of the characteristic f. crusts. [G, 26.] Cf. *F. squamosus.*—**F. vulgaris.** Fr., *f. vulgaire.* See *F.* (3d def.).—**Ungual f.** Fr., *f. des ongles.* See Onychomycosis *favosa.*

FAYARD (Fr.), n. Fa-ya^{3}r. The *Fagus communis*; in Provence, the genus *Fraxinus.* [B, 121, 173 (α, 24).]

FAYAU (Fr.), n. Fa-yo. The *Fagus silvatica.* [B, 121, 173 (α, 24).]—**F.-coco.** In Provence, a variety of the *Phaseolus vulgaris.* [B, 121 (α, 24).]

FAYAUX (Fr.), n. Fa-yo. The *Phaseolus vulgaris.*

FAYBERRY, n. Fa′be^{2}r-i^2. 1. The fruit of *Ribes grossularia.* 2. Rarely, the *Vaccinium myrtillus.* [A, 505 (α, 21).]

FAYETTE SPRINGS, n. Fa-e^{2}t′. A place in Fayette County, Pennsylvania, where there are chalybeate springs. [A, 363 (α, 21).]

FAYOUS (Fr.), n. Fa-yu. See Fayaux.

FAYSSÉ (Fr.), n. Fe^{2}s-sa. The *Russula alutacea.* [B, 121 (α, 24).]—**Faux-f.** The *Russula emetica.* [B, 121 (α, 24).]

FAZETTE (Ger.), n. Fa^{3}ts-e^{2}t′e^2. See Facet.

FEABERRY, n. Fe′be^{2}r-i^2. The genus *Grossularia.* [B, 121 (α, 24).]

FEABERS, n. Fe′bu^{5}rz. See Fabes.

FEATHER, n. Fe^{2}th^2′u^{5}r. A.-S., *fedher.* Gr., πτερόν. Lat., *penna.* Fr., *plume.* Ger., *Feder.* It., *penna, piuma.* Sp., *pluma.* The tegumentary covering peculiar to birds, which serves as a protective covering and assists in flight. They "are evolved within sacs from the surface of conical papillæ of the dermis," and typically consist of a quill, shaft, and vane. The quill (calamus), or barrel, is a hollow, semi-transparent tube imbedded in the integument, and contains a pitch-like substance, the dried-up papilla. It is continuous with the shaft (rhachis), which is a four-sided prism tapering very gradually to a point, and has a well-defined longitudinal groove upon its inferior surface. It consists of an external horny sheath, within which is a white spongy substance resembling the pith of a plant. Projecting upon each side are the vexilla (vanes), which are made up of the narrow, flat laminæ termed barbs. At the union of the quill and shaft a small f. (aftershaft, hyporhachis) is very often found. [L, 147, 221.]—**Arrested f's.** Ger., *Kümmerfedern.* See Filoplumæ.—**Barbary f.** An old name for *Corallina alba nodosa.* [B, 307 (α, 24).]—**Bastard f's.** See Alula.—**Clothing f's.** The f's covering the body of a bird. [L, 147.]—**Contour-f's.** Lat., *pennæ plumæ.* Those f's having a stiff shaft and firm vane. [L, 353.]—**Covert f's.** See Tectrices.—**Down f's.** The more deeply situated f's. They have a soft shaft and vane with the barbules destitute of hooklets. [L, 221.]—**F.-edged.** Having a thin f.-like edge. [L.]—**F.-foil.** The *Hottonia palustris.* [B, 275 (α, 24).]—**F.-tracts.** See Pterylæ.—**Flag-f.** Ger., *Schwungfeder.* The wing-f. next to the body. [α, 27.]—**Flight-f's.** See Remiges.—**Peacock's-f.** The *Fucus maraternum.* [B, 307 (α, 24).]—**Primary f's.** The f's growing upon the manus. [L, 147, 221.]—**Prince's-f.** The *Amaranthus hypochondriacus* and the *Polygonum orientale.* [B, 19 (α, 24).]—**Quill-f's.** The tail-f's and wing-f's; so-called from the large size of their quills. [L.]—**Scapular f's.** Those overlying the humerus and the scapula. [L, 147.]—**Secondary f's.** Those arising over the distal ends of the radius and ulna. [L, 149, 221.]—**Spurious f's.** See *Bastard f's.*—**Tertiary f's.** Those f's attached to the proximal end of the forearm. [L, 147.]

FEATHERED, adj. Fe^{2}th^2′u^{5}rd. 1. See Pinnate. 2. See Plumose.

FEATHERFEUIL, FEATHERFEW, FEATHERFEWL, FEATHERFOLD, FEATHERFOOLY, FEATHERFOWLIE, FEATHERFOY, FEATHERFULL, FEATHERWHEELIE, n's. Fe^{2}th^2′u^{5}r-fu^2-i^{2}l, -fu^2, -fu^{2}l, -fold, -ful-i^2, -fu^5-u^4-li^2, -foi, -fu^{4}l, -hwel-i^2. The *Pyrethrum parthenium.* [B, 81 (α, 21).]

FEATHERY, adj. Fe^{2}th^2′u^{5}r-i^2. Feather-like, feathered; of a plant-organ, consisting of long hairs, themselves hairy. [B, 19 (α, 24).]

FEBRICITANS (Lat.), adj. Fe^{2}b-ri^{2}s(ri^{2}k)′i^{2}t-a^{2}nz(a^{3}ns). Fr., *fébricitant.* Feverish. [Bouchard, "Union méd.," Apr. 10, 1886, p. 577.]

FEBRICITY, n. Fe^{2}b-ri^{2}s′i^2-ti^2. Lat., *febricitatio.* Feverishness. [α, 29.]

FEBRICOSUS (Lat.), adj. Fe^{2}b-ri^2-kos′u^{3}s(u^{4}s). Feverish. [A, 318.]

FEBRICULA (Lat.), n. f. Fe^{2}b-ri^{2}k′u^2(u^4)-la^3. Dim. of *febris*, a fever. Fr., *fébricule, petite fièvre.* Ger., *leichtes Fieber.* It., *febbricola.* Sp., *fiebre leve, calenturita.* Slight and brief fever. [A, 385.]—**Septic f.** A mild form of septicæmia. [E.]

FÉBRICULE (Fr.), n. Fa-bre-ku^{6}l. See Febricula.—**F. typhoïde.** An abortive form of typhoid fever. [Laveran, "Arch. gén. de méd.," 6e série, t. xv, p. 424; Notta, "Union méd.," Dec. 30, 1884, p. 1081.]

FEBRICULOSE, adj. Fe^{2}b-ri^{2}k′u^2-los. Slightly feverish. [L, 56.]

FEBRICULOSITY, n. Fe^{2}b-ri^{2}k-u^2-lo^{2}s′i^2-ti^2. Feverishness. [α, 29.]

FEBRICUS, FEBRIENS (Lat.), adj's. Fe^{2}b′ri^2-ku^{3}s(ku^{4}s), -e^{2}nz(ans). Feverish. [A, 322.]

FEBRIFACIENT, adj. Fe^{2}b-ri^2-fa'si^2-e^{3}nt. From *febris*, a fever, and *facere*, to make. Fr., *febrifique, febrigène*. Causing or producing fever; as a n., an agent or agency so acting. [L, 56.]

FEBRIFEROUS, adj. Fe^{2}b-ri^{2}f'e^{3}r-u^{3}s. From *febris*, a fever, and *ferre*, to carry. Conveying or producing fever. [D, 1.]

FEBRIFIC, adj. Fe^{3}b-ri^{2}f'i^{2}k. From *febris*, a fever, and *facere*, to make. Fr., *fébrifique*. See FEBRIFACIENT.

FEBRIFUGA (Lat.), n. f. Fe^{2}b-ri^{2}f'u^3(u^4)-ga^3. From *febris*, fever, and *fugare*, to put to flight. The *Erythraca centaurium*. [B, 180 (*a*, 24).]—**F.-bark tree.** The *Icica altissima*. [B, 180 (*a*, 24).]

FEBRIFUGAL, FEBRIFUGE, adj's. Fe^{2}b-ri^{2}f'u^{2}g-a^{2}l, fe^{2}b'-ri^2-fu^{2}j. Gr., ληξιπύρετος. Lat., *febrifugus*. Fr., *fébrifuge*. Ger., *fieberheilend*. It., *febbrifugo*. Sp., *febrifugo*. Preventing or reducing fever; as a n. (Lat., *febrifugum*; Ger., *Fiebermittel*), a remedy so acting. Cf. ANTIPYRETIC.—**F. of Craanen.** See *Regulus* ANTIMONII *medicinalis*.

FEBRIFUGUM (Lat.), n. n. Fe^{2}b-ri^{2}f'u^{2}g(u^{4}g)-u^{3}m(u^{4}m). 1. See FEBRIFUGE. 2. The *Centaurium minus*. [L, 94 (*a*, 21).]—**F. Craanii.** See *Regulus* ANTIMONII *medicinalis*.—**F. salsum.** See *Decoctum carbonatis* POTASSÆ *absinthii*.

FÉBRIGÈNE (Fr.), adj. Fa-bre-zhe^{2}n. From *febris*, a fever, and γεννᾶν, to produce. See FEBRIFACIENT.

FEBRILE, adj. Fe^{2}b'ri^{2}l. Gr., πυρετώδης. Lat., *febrilis*. Fr., *fébrile*. Ger., *fieberhaft, fieberisch*. It., *febbrile*. Sp., *febril*. Pertaining to, affected with, or accompanied by fever.

FEBRILITY, n. Fe^{2}b-ri^{2}l'i^2-ti^3. See FEBRICITY.

FEBRINA (Lat.), n. f. Fe^{2}b-ri(re)'na^3. The *Menyanthes trifoliata*. [B, 180 (*a*, 24).]

FEBRIS (Lat.), n. f. Fe^{2}b'ri^{2}s. For *ferbis* (from *fervere*, to be hot). See FEVER.—**F. ab ascensione lactis.** Milk fever. [*a*, 34.]—**F. ab emotione.** Fr., *courbature fébrile par émotion*. Fever due to excessive emotion. [Éloy, "Union méd.," May 24, 1884, p. 913 (D).]—**F. ab empyemate.** Of Darwin, fever from empyema. [*a*, 34.]—**F. a calore.** See *Thermic* FEVER.—**F. acmastica.** Fr., *fièvre acmastique*. See *Continued* FEVER.—**F. acuta.** Of Plouquet, simple continued fever. [*a*, 34.]—**F. acuta benigna.** See *Benign* FEVER.—**F. acuta continua.** See *Continued* FEVER.—**F. acuta intestinalis.** Enteric fever. [*a*, 34.]—**F. acuta neurica (seu nervosa).** Of Selle, typhus fever. [*a*, 34.]—**F. acuta sanguinea.** Of Hoffmann, simple continued fever. [*a*, 34.]—**F. acuta simplex.** Of Stoerk, simple continued fever. [*a*, 34.]—**F. acuta stomachica aut intestinalis.** Of Heister, enteric fever. [*a*, 34.]—**F. adeno-meningea.** Of Pinel, a fever in which the symptoms indicate irritation of the mucous membrane of the intestinal canal. [*a*, 34.]—**F. adeno-nervosa.** Fr., *fièvre adéno-nerveuse*. Of Pinel, a general term for the different forms of the plague. [*a*, 34.]—**F. adeno-nervosa continua.** Of Pinel, the plague. [*a*, 34.]—**F. adynamica.** See *Adynamic* FEVER.—**F. adynamica continua.** Fr., *fièvre adynamique*. Of Pinel, a general term for the adynamic fevers. [*a*, 34.]—**F. adynamica continua simplex.** Of Pinel, a simple adynamic fever. [*a*, 34.]—**F. adynamica intermittens.** Of Pinel, an intermittent adynamic fever. [*a*, 34.]—**F. adynamica remittens.** Of Pinel, a remittent adynamic fever. [*a*, 34.]—**F. adynamico-atactica, F. adynamo-ataxica** [Bégin]. Typhus fever. [*a*, 34.]—**F. æstatis.** Of Stoll, thermic fever. [*a*, 34.]—**F. æstiva.** Fr., *fièvre estivale*. Intermittent fever appearing in summer. [*a*, 34.]—**F. a fame.** See *Famine* FEVER.—**F. a fatigatione.** See *Fatigue* FEVER.—**F. africana.** See *African* FEVER.—**F. a frigore.** Fr., *courbature fèbrile de froid*. Fever due to exposure to cold. [Éloy, *l. c.* (D).]—**F. agrypnodes.** Fr., *fièvre agrypnode*. A fever with sleeplessness. [*a*, 34.]—**F. alba.** Fr., *fièvre blanche*. An old term for chlorosis.—**F. alba miliaris.** See MILIARIA.—**F. alba virginum (seu virginea).** See CHLOROSIS.—**F. algida.** See AMPHEMERINA *phricodes* and *Algid* FEVER.—**F. amatoria.** See CHLOROSIS.—**F. americana.** See *Yellow* FEVER.—**F. amphemera, F. amphemerina.** See AMPHEMERINA.—**F. amphemerina hectica.** See *Hectic* FEVER.—**F. amphemerina latica.** See AMPHEMERINA *latica*.—**F. ampullacea, F. ampullosa.** See PEMPHIGUS *acutus*.—**F. anabatica.** Fr., *fièvre anabatique*. A fever that increases steadily until the crisis is reached. [A, 322.]—**F. angeiosthenica** [Hildebrand]. See SYNOCHA.—**F. angeistenica.** Of Pinel, continued fever. [A, 322.]—**F. anginosa.** See *Febrile* ANGINA.—**F. angeiothenica.** Fr., *fièvre angioténique*. Of Pinel, a genus including simple inflammatory fever and febricula. It is divided into inflammatory fever and continued fever. [*a*, 34.]—**F. annua.** Fr., *fièvre annuelle*. A fever returning annually at the same season. [*a*, 34.]—**F. anomala.** See *Anomalous* FEVER.—**F. anomala batavensis.** Fr., *fièvre endémique de Batavie*. Pernicious malarial fever of the island of Java. [*a*, 34.]—**F. anxiosa.** See under ASODES.—**F. aphonica.** See *Aphonic* FEVER.—**F. a phthisi.** Of Darwin, fever from consumption. [*a*, 34.]—**F. aphthosa.** See *Aphthous* FEVER.—**F. a pure aerato.** Of Darwin, fever from exposure of a suppurating surface to the air. [*a*, 34.]—**F. a pure contagiosa.** Of Darwin, fever from contagious pus. [*a*, 34.]—**F. a pure clauso.** Of Darwin, septicæmia. [*a*, 34.]—**F. apoplectica.** See *Comatose* FEVER.—**F. a putredine orta.** Of Tralliamus, enteric fever. [*a*, 34.]—**F. ardens.** See *Ardent* FEVER.—**F. ardens æstiva.** Of Rouppe, yellow fever. [*a*, 34.]—**F. ardens periodica.** See *Ardent* FEVER.—**F. arte promota.** See *F. artificialis*.—**F. arthritica.** See *Arthritic* FEVER.—**F. arthropuodica.** Of Darwin, fever from disease of the joints. [*a*, 34.]—**F. artificialis.** Fr., *fièvre artificielle*. A fever produced by the physician to increase the action of the vital forces in certain chronic diseases. [*a*, 34.]—**F. a sanie putrida.** Of Darwin, fever from interstitial putrid matter. [*a*, 34.]—**F. a sanie contagiosa.** Of Darwin, fever from contagious matter. [*a*, 34.]—**F. asodes.** See under ASODES.—**F. a sphacelo.** Of Darwin, fever from gangrene. [*a*, 34.]—**F. assidua.** See *Continued* FEVER.—**F. asthenica.** See *Asthenic* FEVER.—**F. asthenica gravis.** Typhus fever. [*a*, 34.]—**F. asthmatica.** See *Asthmatic* FEVER.—**F. atacta.** See *Ataxic* FEVER.—**F. atacta acuta.** Of Huskin, typhus fever. [*a*. 34.]—**F. atacto-adynamica.** See *Ataxo-adynamic* FEVER.—**F. atacta biliosa.** Probably pernicious malarial fever. [*a*, 34.]—**F. atacta cerebralis.** Of Pinel, a variety of typhus fever. [*a*, 34.]—**F. atacta continua.** Of Pinel, typhus fever. [*a*, 34.]—**F. atacta continua sporadica.** Of Pinel, probably typhoid fever. [*a*, 34.]—**F. atacta inflammatoria.** Of Pinel, a variety of typhus fever. [*a*, 34.]—**F. atacta intermittens.** Fr., *fièvre ataxique intermittente*. Of Pinel, a general term for quotidian, tertian, and double tertian fevers. [*a*, 34.]—**F. atacta intermittens quartana.** Fr., *fièvre ataxique intermittente quarte*. Of Pinel, a variety of quartan fever. [*a*, 34.]—**F. atacta intermittens tertiana.** Of Pinel, a variety of tertian fever. [*a*, 34.]—**F. atacta mucosa.** Of Pinel, probably typhoid fever. [*a*, 34.]—**F. atacta putrida.** Fr., *fièvre ataxique putride*. Of Pinel, a variety of typhus fever. [*a*, 34.]—**F. atacta remittens.** Of Pinel, a general term for tritæophyia and tetartophyia. [*a*, 34.]—**F. atacta remittens quartana.** Of Pinel, see TETARTOPHYIA.—**F. atacta remittens tertiana.** Of Pinel, see TRITÆOPHYIA.—**F. atacta sporadica.** Fr., *fièvre ataxique sporadique*. Of Pinel, typhoid fever. [*a*, 34.]—**F. ataxo-adynamica.** See *Ataxo-adynamic* FEVER.—**F. atrabilaria.** See *Atrabiliary* FEVER.—**F. auriginosa.** Of Vogel, jaundice. [*a*, 34.]—**F. autumnalis incipiens.** Fr., *fièvre automnale*. Intermittent fevers appearing in the autumn. [*a*, 34.]—**F. a vomica.** Of Darwin, fever from a vomica. [*a*, 34.]—**F. benigna imputris.** Benign fever. [*a*, 34.]—**F. biliosa.** See *Bilious* FEVER.—**F. biliosa æstatis.** Of Rouppe, pernicious malarial fever. [*a*, 34.]—**F. biliosa ardens letalis.** Of Acoluth, pernicious malarial fever. [*a*, 34.]—**F. biliosa continua.** Of Pinel. see *Bilious* FEVER.—**F. biliosa cum exanthematibus** [Stoll]. A form of remittent fever with an erysipelatous eruption on the chest, neck, arms, and thighs; possibly ergotism. [*a*, 34.]—**F. biliosa neglecta.** Of Stoll, gastro-hepatitis. [*a*, 34.]—**F. biliosa inflammatoria.** A simple continued fever with symptoms of gastro-hepatic irritation. [*a*, 34.]—**F. biliosa lausanensis** [Tissot]. See *F. biliosa cum exanthematibus*.—**F. biliosa perniciosa.** Fr., *fièvre bilieuse pernicieuse*. Pernicious malarial fever. [*a*, 34.]—**F. bilioso-putrida.** 1. Of Pinel, a variety of gastric fever. 2. Of Selle, typhoid fever. [*a*, 34.]—**F. brevis.** Diary fever. [*a*, 34.]—**F. bullosa.** See PEMPHIGUS *acutus*.—**F. cacatoria.** Fr., *fièvre cacatoire*. Ger., *Purgirfieber, Scheissfieber*. Of Sylvio, an intermittent fever accompanied by diarrhœa. [L, 104.]—**F. cacochymica.** Fr., *fièvre cacochymique*. Fever with a depraved state of the humors. [A, 301, 322, 325.]—**F. cacoethes.** Of Bellini, typhus fever. [*a*, 34.]—**F. calida.** See *Ardent* FEVER and MENINGITIS.—**F. caput impetens.** See *F. quotidiana soporosa*.—**F. campestris.** Paludal fever. [*a*, 34.]—**F. carbuncularis, F. carbunculosa.** See *Splenic* FEVER and *Contagious* ANTHRAX.—**F. carceraria, F. carceris, F. carcerum.** See *Jail* FEVER.—**F. carcinomatosa.** Of Darwin, fever from cancer. [*a*, 34.]—**F. cardiaca.** Fever with cardiac pains. [*a*, 34.]—**F. cardialgica.** See *Cardialgic* FEVER.—**F. carditica.** See *Carditic* FEVER.—**F. carotica.** See *Comatose* FEVER.—**F. castrensis.** 1. Typhus fever. 2. Of Pringle, remittent fever.—**F. castrensis epidemica.** Of Lancisi, pernicious malarial and typhoid fevers. [*a*, 34.]—**F. castrensis Gallorum in Bohemia.** Typhus fever. [*a*, 34.]—**F. castrensis petechialis epidemica.** Of Brandhorst and Haller, typhus and typhoid fever. [*a*, 34.]—**F. catarctica.** See *F. cacatoria*.—**F. catarrhalis.** See *Catarrhal* FEVER and AMPHEMERINA *catarrhalis*.—**F. catarrhalis epidemica.** See INFLUENZA.—**F. catarrhalis benigna Germanorum.** Of Selle, see *F. adeno-meningea*.—**F. catarrhalis maligna.** See AMPHEMERINA *hungarica*.—**F. catarrhalis maligna petechizans.** Of Juncker, typhus fever. [A, 325 (*a*, 34).]—**F. catarrhalis putrida.** Of De Mertens, probably typhoid fever. [*a*, 34.]—**F. cathemerinus.** Fr., *fièvre cathémérine*. Quotidian fever. [*a*, 34.]—**F. caumatodes, F. causodes.** See *Ardent* FEVER (3d and 4th def's.).—**F. cephalalgica.** See *Cephalalgic* FEVER.—**F. cephalica.** 1. Meningitis. 2. Brow ague. [*a*, 34.]—**F. cerebralis.** See *Cerebral* FEVER.—**F. cerebro-spinalis.** See *Cerebro-spinal* FEVER.—**F. chinica.** See *Quinine* FEVER.—**F. cholepyretica.** See *Bilious* FEVER.—**F. cholerica.** Fr., *fièvre cholérique*. Intermittent fever with watery stools. [*a*, 34.]—**F. cholerica minus acuta.** Of Hoffmann, intermittent fever.—**F. chronica.** See *Hectic* FEVER.—**F. coalterna.** A double intermittent fever. [Bellini (A, 325).]—**F. coccinia.** See SCARLATINA.—**F. cærulea.** Ger., *blaues Fieber*. Of Goelis, fever in children from four to twelve months old with cardiac complications causing cyanosis. [Hufeland, "Jour. d. prac. Heil.," April, 1825, p. 55 (*a*, 34).]—**F. colliquativa.** See *Colliquative* FEVER.—**F. colliquativa essentialis, F. colliquativa primaria.** Of Burserius, a continued fever with diarrhœa; probably typhoid fever. [*a*, 34.]—**F. colliquativa putrefaciens.** Of Quesnay, probably typhoid fever. [*a*, 34.]—**F. comatosa, F. comatodes.** See *Comatose* FEVER.—**F. comitata.** An intermittent or relapsing fever. [D, 72; R. Longuet, "Union méd.," Jan. 5, 1886, p. 13.]—**Febres communicantes.** Two intermittent fevers which attack a patient simultaneously, the exacerbations of one immediately succeeding those of the other. [Bellini (L, 104).]—**F. communis continua.** A name formerly applied to any fever not distinctly paroxysmal.—**F. complicata.** See *Complicated* FEVER.—**F. composita.** Of Forestus, see *Intermittent* FEVER. [*a*, 34.]—**F. composita ex acuto periodo.** Of Juncker, intermittent fever.—**Febres confusæ.** Intermittent fevers with irregular paroxysms. [*a*, 34.]—**F. contagiosa.** Of Lind, typhus fever. [*a*, 34.]—**F. contagiosa in carceribus genita** [Huxham]. See *F. putrida contagiosa in carceribus genita*.—**F. continens (non putrida** [Selle]**).** Continued fever. [*a*, 34.]—**F. continens inflammatoria simplex.** Of Selle, simple continued fever. [*a*, 34.]—**F. continens putrida.** Of Selle, typhus fever. [*a*, 34.]—**F. continua.** See *Continued* FEVER.—**F. con-**

tinua asodes. See *F. tertiana cardiaca.*—**F. continua benigna sporadica.** Of Le Roy, typhoid fever. [α, 34.]—**F. continua composita inflammatoria.** Of Vogel, inflammatory fever. [α, 34.]—**F. continua continens.** Fr., *fièvre continente.* A fever in which the temperature remains elevated for some time. [D, 3.]—**F. continua defæcatoria (seu depuratoria).** Of Quesnay, see *F. acuta simplex.*—**F. continua elodes.** See *F. tertiana diaphoretica.*—**F. continua epiala et leipyria.** See AMPHEMERINA *epiala.*—**F. continua epidemica.** Of Sydenham, synocha followed by typhus fever. [α, 34.]—**F. continua inflammatoria.** Of Hoffmann, inflammatory fever. [α, 34.]—**F. continua lymphatica.** Of Ettmüller, lymphatic fever. [A, 325 (α, 34).]—**F. continua lyngodes.** Of Vogel, singultous fever. [α, 34.]—**F. continua non putris.** The f. acuta of Boerhaave. [α, 34.]—**F. continua non putrida.** Of Lemnius, f. acuta simplex. [α, 34.]—**F. continua periodica.** Of Sennert, intermittent fever. [A, 325 (α, 34).]—**F. continua putrida.** See *Typhus* FEVER.—**F. continua putrida icterodes caroliniensis.** Of Macbride, yellow fever. [α, 34.]—**F. continua remittens.** A form of continued fever in which there is a regular alternation in the beginnings of exacerbations and remissions, with marked differences each day. [D, 3.]—**F. continua remittens proportionata.** Of Torti, intermittent fever. [α, 34.]—**F. continua sanguinea** [Hoffmann], **F. continua simplex** [Lieutaud]. Simple continued fever. [α, 34.]—**F. continua syncopalis.** Tertian fever with syncope. [A, 525 (α, 34).]—**F. convulsiva.** See *Convulsive* FEVER.—**F. critica.** Fr., *fièvre critique.* 1. Of Rouppe, remittent fever. 2. Of Linnæus, a general term for ephemeral and intermittent fevers. [α, 34.]—**F. critica simplex.** Of Quesnay, typhus fever. [α, 34.]—**F. crymodes.** See *F. leipyria.*—**F. culicaris, F. culicularis.** See MILIARIA.—**F. cum angina.** See *Malignant* ANGINA.—**F. cum delirio.** Fr., *fièvre délirante.* Fever with delirium. [L, 116.]—**F. cum nigro vomito.** Yellow fever. [α, 34.]—**F. decimana.** Of Sauvages, see *Decimal* FEVER.—**F. dejectoria.** See *F. cacatoria.*—**F. depuratoria.** See *Depuratory* FEVER.—**F. deurens.** Continued fever. [α, 34.]—**F. diaphoretica.** See *Sweating* FEVER.—**F. diaria.** See FEBRICULA and EPHEMERA.—**F. diphtheroides.** A fever, in China, accompanied by inflammation of the mucous membranes with diphtheritic exudation. Anorexia, high temperature, general muscular soreness, pronounced abdominal tenderness, and local paralyses are the prominent symptoms. The disease lasts from one to two weeks, usually terminating favorably. [α, 34.]—**F. duodecimana.** Intermittent fever in which the paroxysm returns on the twelfth day. [α, 34.]—**F. duplex tertiana anomala.** Of Pinel, an irregular tertian fever. [α, 34.]—**F. duplex tertiana regularis.** Of Pinel, tertian intermittent fever.—**F. duplicata.** A double tertian fever. [α, 34.]—**F. dysenterica.** See *Dysenteric* FEVER.—**F. ectymatica.** See SCARLATINA.—**F. elodes.** See HELODES.—**F. endemica.** Fr., *fièvre endémique.* 1. A fever endemic to a country. 2. Typhoid fever. [α, 34.]—**F. endemica Bataviæ.** See *F. anomala bataviensis.*—**F. endemica et epidemica.** Of Rogers, typhus fever. [α, 34.]—**F. enterica.** See *Enteric* FEVER and *Typhoid* FEVER.—**F. entero-mesenterica.** See *Typhoid* FEVER.—**F. epacmastica, F. epanadidusa.** See *F. anabatica.*—**F. ephemera.** See EPHEMERA and FEBRICULA.—**F. ephemera infantum.** Simple fever in children. [α, 34.]—**F. epiala.** See EPIALOS.—**F. epidemica.** Fr., *fièvre épidémique.* An epidemic fever. [α, 34.]—**F. epidemica autumni.** Of Willis, probably typho-malarial fever. [α, 34.]—**F. epidemica contagiosa.** See PEMPHIGUS *acutus.*—**F. epidemica cum angina ulcusculosa.** Of Douglas, see DIPHTHERIA.—**F. epidemica leidensis.** Of Koker, intermittent fever. [α, 34.]—**F. epidemica Lipsiæ.** Typhus fever.—**F. epidemica maligna a Coutances.** Typhus fever.—**F. epidemica putrida.** Of Gattenhof, typhus fever. [α, 34.]—**F. epidemica urbevetana.** See *F. tertiana lethargica.*—**F. epileptica.** See *Epileptic* FEVER.—**F. erotica.** See *Erotic* FEVER.—**F. errana.** Of Linnæus, see *F. erratica.*—**F. errans e mensibus.** A fever accompanying menstruation. [α, 34.]—**F. erratica.** Of Sauvages, irregular forms of tertian or quartan fevers. See *Erratic* FEVER. [α, 34.]—**F. erratica decimana.** Of Lusitanus, decimal fever. [α, 34.]—**F. erratica nona.** Of Sauvages, a nonal fever.—**F. erratica octana.** Of Sauvages, an octan fever. [A, 525 (α, 34).]—**F. erratica quintana.** Of Sauvages, a quintan fever. [A, 525 (α, 34).]—**F. erratica septana.** Of Sauvages, a septan fever. [A, 525 (α, 34).]—**F. erratica vaga.** Of Sauvages, an irregular quartan fever. [A, 525 (α, 34).]—**F. erronea.** See *F. erratica.*—**F. erysipelacea, F. erysipelatosa.** See ERYSIPELAS.—**F. erythematosa.** See ROSEOLA *febrilis.*—**F. essentialis.** See *Essential* FEVER.—**F. esserosa.** See MILIARIA.—**F. exacerbans tymorensis.** See AMPHEMERINA *mimosa.*—**F. exanthematica.** See *Exanthematic* FEVER.—**F. exanthematica articularis.** See DENGUE.—**F. exanthematica maligna (seu perniciosa, seu venenosa).** Of Fortunat and Bianchi, typhus fever. [D, 74.]—**F. exanthematosa orientalis.** Of N. Chevers, beri-beri. ["Brit. Med. Jour.," Apr. 5, 1884, p. 671.]—**F. exquisita.** Of Pinel, a quotidian fever. [α, 34.]—**F. famelica.** See under FAMELICUS.—**F. ferneliana.** Of Raymond Fortis, a remittent fever accompanied by some affection of the viscera. [A, 325 (α, 34).]—**F. fixa.** Continued fever. [α, 34.]—**F. flava (Americanorum), F. flava Hispaniæ** [Fogo], **F. flava Indiæ occidentalis** [Warren], **F. flava regionum calidarum** [Fisher]. Yellow fever. [α, 34.]—**F. gangrænodes, F. gangrænosa.** See *Gangrenous* FEVER.—**F. gastrica.** See *Gastric* FEVER.—**F. gastrica acuta.** Of Burserius, enteric fever. [α, 34.]—**F. gastrica atacta.** Typhoid fever. [α, 34.]—**F. gastrica putrida.** Of Born, typhus fever. [α, 34.]—**F. gastrico-inflammatoria** [Frank]. Acute gastritis. [α, 34.]—**F. gastrico-nervosa.** Typhus fever. [α, 34.]—**F. gastro-adynamica.** Of Pinel, typhoid fever. [α, 34.]—**F. glutinosa gastrica.** Typhoid fever. [α, 34.]—**F. gravidarum et parturientium.** An old term for a form of puerperal fever that shows itself almost immediately after or even before delivery. [A, 84.]—**F. habitualis.** Of Porro, a division of fevers including inflammation of the solids of the body. [α, 34.]—**F. hæmoptoica.** Fr., *fièvre hémoptoïque.* 1. Symptomatic fever accompanying hæmoptysis. 2. Periodical hæmoptysis due to malaria. [α, 34.]—**F. hæmorrhoidalis.** Of Haën, fever supposed to be due to piles. [α, 34.]—**F. hebdomadana, F. hebdomadaria.** See *Hebdomadal* FEVER.—**F. hectica.** See *Hectic* FEVER.—**F. hectica a scabie.** Hectic fever from scabies. [α, 34.]—**F. hectica calculis.** Hectic fever from calculus. [α, 34.]—**F. hectica chlorotica.** Hectic fever from chlorosis. [α, 34.]—**F. hectica fluxuum (a vomitu).** Hectic fever from gastric or intestinal catarrh. [α, 34.]—**F. hectica hydropum.** Hectic fever with dropsy. [α, 34.]—**F. hectica infantum.** See TABES *mesenterica.*—**F. hectica lymphatica.** Hectic fever with inflammation of the lymphatics. [α, 34.]—**F. hectica maligna nervosa** [Willis], **F. hectica nervea.** Typhus fever. [α, 34.]—**F. hectica nostalgica.** Hectic fever from nostalgia. [α, 34.]—**F. hectica pestilens.** Of Forestus, typhus fever. [A, 525 (α, 34).]—**F. hectica scrofulosa.** Hectic fever from scrofula. [α, 34.]—**F. hectica syphilitica.** Hectic fever from syphilis. [α, 34.]—**F. hectica verminosa.** Hectic fever from helminthiasis. [α, 34.]—**F. hectica vespertina.** Of Sauvages, irregular fever occurring in the evening. [α, 34.]—**F. helodes.** See HELODES.—**F. helodes icterodes.** See *Yellow* FEVER.—**F. helodes sudatoria.** Malarial fever with diaphoresis. [α, 34.]—**F. hemeresia.** A quotidian intermittent fever. [α, 34.]—**F. hemitritæa.** See AMPHEMERINA *hemitritæa.*—**F. hemitritæa pestilens.** Of Schenck, probably pernicious malarial fever. [A, 525 (α, 34).]—**F. hepatica.** See *Hepatic* FEVER.—**F. hepatica inflammatoria.** See HEPATITIS.—**F. hermeticus.** A fever supposably caused by nitro-sulphurous impurities. [α, 34.]—**F. herpetica.** Fr., *fièvre herpétique.* A transitory catarrhal fever terminating in a few days in an eruption of herpes facialis, especially herpes labialis. [A, 326 (α, 21).]—**F. hiemalis.** Fr., *fièvre hiémale.* Intermittent fever appearing in winter. [α, 34.]—**F. horrida, F. horrifica.** See AMPHEMERINA *phricodes.*—**F. humoralis.** Of Porro: 1. A general term for inflammation of the four humors, sanguineous, phlegmatic, bilious, and melancholic. 2. See *Humoral* FEVER. [α, 34.]—**F. hungarica.** Fr., *fièvre hongroise* (ou *de Hongrie*). Typhoid fever. [α, 34.]—**F. hydrocephalica.** See *Acute internal* HYDROCEPHALUS.—**F. hydrophobica.** A fever with fear of liquids. [α, 34.]—**F. hypersthenica.** An ephemeral fever with over-action of the heart. [A, 326 (α, 21).]—**F. hysterica.** See *Hysterical* FEVER.—**F. icterica.** Fr., *fièvre ictérique.* Malarial hæmaturia. [α, 34.]—**F. icterodes.** See *Yellow* FEVER.—**F. iliaca inflammatoria.** Typhoid fever. [α, 34.]—**F. implacida.** An asthenic continued fever. [α, 34.]—**F. impura.** See *Complicated* FEVER.—**F. infana.** A fever with an eruption. [α, 34.]—**F. infantum remittens.** See *Infantile remittent* FEVER.—**F. inflammatoria (simplex** [Huxham]). See SYNOCHA.—**F. inflammatoria universalis** [Starck]. See *F. acuta simplex.*—**F. inirritativa** [Darwin]. See *Inirritative* FEVER.—**F. intercurrens.** Fr., *fièvre intercurrente.* A fever that occurs unexpectedly during the course of another fever. [α, 34.]—**F. intermittens.** See *Intermittent* FEVER.—**F. intermittens anadiplotica.** A double intermittent fever. [L, 50.]—**F. intermittens anomala et mali moris** [Hoffmann]. Pernicious malarial fever. [A, 525 (α, 34).]—**F. intermittens l'Isle-en-Jourdain.** Intermittent fever of Isle-en-Jourdain. [α, 34.]—**F. intermittens aphonica.** Fr., *fièvre intermittente aphonique.* Intermittent fever with aphonia. [α, 34.]—**F. intermittens apoplectica.** Pernicious congestive malarial fever. [α, 34.]—**F. intermittens asthmatica.** Fr., *fièvre intermittente asthmatique.* Intermittent fever with respiratory spasms. [α, 34.]—**F. intermittens cardialgica.** Of Spitzer, an intermittent fever with severe burning and darting pains in the gastric region, and nausea, retching, and vomiting. [α, 34.]—**F. intermittens cephalalgica.** Fr., *fièvre intermittente céphalalgique.* Intermittent fever with cephalalgia. [α, 34.]—**F. intermittens cephalica larvata.** Fr., *fièvre larvée céphalalgique.* Cephalalgia recurring at regular periods, with masked febrile symptoms. [α, 34.]—**F. intermittens comitata.** Of Frost, intermittent fever accompanied by some other disease. [α, 34.]—**F. intermittens convulsiva.** Fr., *fièvre intermittente convulsive.* Intermittent fever with convulsions. [α, 34.]—**F. intermittens cum delirio.** Fr., *fièvre intermittente délirante.* Intermittent fever with delirium. [α, 34.]—**F. intermittens dysenterica.** Intermittent fever with dysentery. [α, 34.]—**F. intermittens eclamptica.** Intermittent fever with loss of consciousness and sensibility. [α, 34.]—**F. intermittens epidemica.** Of von Brunn, epidemic intermittent fever. [α, 34.]—**F. intermittens epileptica.** Intermittent fever with epileptoid spasms. [α, 34.]—**F. intermittens hydrophobica.** Fr., *fièvre intermittente hydrophobique.* Intermittent fever during which the patient has a horror of liquids. [α, 34.]—**F. intermittens irregularis Tolosæ.** Intermittent fever epidemic at Toulouse in 1772. [α, 34.]—**F. intermittens larvata.** Fr., *fièvre intermittente larvée* (ou *masquée*). A masked intermittent fever. [α, 34.]—**F. intermittens larvata in cute.** See DERMATOTYPOSIS.—**F. intermittens maligna.** Pernicious malarial fever. [α, 34.]—**F. intermittens perniciosa comitata tetanica.** An atypical malarial fever with tetanic rigidity and soreness of the muscles of the neck and occasional mental disturbances. [M. Rózsa, "Orvosi Hetilap, 1888, No. 21; "Pester med.-chir. Presse," 1888, No. 27; "Ctrlbl. f. klin. Med.," Dec. 22, 1888, p. 956.]—**F. intermittens soporosa.** Fr., *fièvre intermittente soporeuse.* Intermittent fever with great sleepiness. [α, 34.]—**F. intermittens syncopalis.** Fr., *fièvre intermittente syncopale.* Intermittent fever with syncope. [α, 34.]—**F. intermittens tertiana typhodes.** Of Cless, pernicious malarial fever. [α, 34.]—**F. intermittens tetanica.** Intermittent fever with tetanic spasms. [L, 20; α, 34.]—**F. intermittens urticata.** Intermittent fever associated with urticaria, the latter appearing usually during the paroxysm and disappearing during the apyrexia. [G, 18.]—**F. intestinalis (ulcerosa).** Fr., *fièvre intestinale.* See *Typhoid* FEVER.—**F. intestinalis.** Of Riedel, typhoid fever. [α, 34.]—**F. intestinorum inflammatoria ex**

mesenterico. Of Hoffmann, enteritis. [A, 525 (*a*, 34).]—**F. irregularis.** See *Anomalous* FEVER.—**F. ischiadica.** Of Darwin, fever from abscess in the muscles of the pelvis. [*a*, 34.]—**F. italica.** The plague. [*a*, 34.]—**F. lactantium, F. lactea.** See *Milk* FEVER.—**F. lactea protracta.** An old term for a state of fever prolonged beyond what was considered the proper duration of "milk fever." [A, 53.]—**F. larvata.** See *Masked* AGUE.—**F. leipyria.** Fr., *fièvre lipyrienne.* Fever with coldness of the extremities. [*a*, 34.]—**F. lenta.** 1. Of Juncker, hectic fever. 2. Slow fever. [*a*, 34.]—**F. lenta nervosa** [Huxham]. Typhoid fever. [A, 525 (*a*, 34).]—**F. lenta nervosa maligna** [Burserius]. Typhus fever. [*a*, 34.]—**F. lenticularis** [Leroy]. 1. See *Typhus* FEVER. [D, 74.] 2. See MILIARIA.—**F. lethargica.** Fr., *fièvre léthargique.* Of Torti, intermittent fever with apoplectoid symptoms. [L, 290.]—**F. levis.** See FEBRICULA.—**F. localis.** A fever from a local inflammation. [*a*, 34.]—**F. lochialis.** See *Lochial* FEVER.—**F. lochialis inflammatoria.** A mild puerperal fever. [*a*, 34.]—**F. lygmodes.** Singultous fever. [*a*, 34.]—**F. lymphatica.** See *Lymphatic* FEVER.—**F. lymphatica continua.** See AMPHEMERINA *latica.*—**F. lyngodes.** Singultous fever.—**F. maculosa.** Typhus fever. [*a*, 34.]—**F. maligna.** Fr., *fièvre maligne.* An old generic term for a number of malignant fevers, especially typhus.—**F. maligna barbadensis, F. maligna biliosa (Americæ).** Yellow fever. [*a*, 34.]—**F. maligna cacoethes** [Bellini], **F. maligna cum peticulis** [Fonseca], **F. maligna cum sopore** [Riverius]. Typhus fever. [*a*, 34.]—**F. maligna flava Indiæ occidentalis.** Yellow fever. [*a*, 34.]—**F. maligna hectica** [Willis], **F. maligna lenta** [Vogel], **F. maligna pestilens** [Riverius], **F. maligna petechizans** [Hoffmann], **F. maligna petechialis Rintelii** [Furstenau], **F. maligna pulicularis** [Petrus a Castro], **F. maligna puncticularis** [Petrus a Castro], **F. mali moris.** Typhus fever. [*a*, 34.]—**F. marasmodes** [Schaffner]. Hectic fever. [*a*, 34.]—**F. mediterranica.** Yellow fever; probably also applied to a pernicious malarial fever of the Mediterranean shores. [*a*, 34.]—**F. melancholia** [Petræus]. Quartan fever. [*a*, 34.]—**F. meningo-gastrica.** Fr., *fièvre méningo-gastrique.* Of Pinel, a general term for febriculæ due to gastric or intestinal irritation. [*a*, 34.]—**F. menstrua.** A fever occurring monthly. [*a*, 34.]—**F. mesaraica** [Wendt], **F. mesenterica** [Darwin], **F. mesenterica acuta** [Burchard], **F. mesenterica maligna** [Baglivi and Hoffmann]. Typhoid fever. [*a*, 34.]—**F. meseraica.** Tubercular disease of the mesenteric glands. [H. Eichhorst (A, 319).]—**F. methemerina.** Quotidian intermittent fever. [*a*, 34.]—**F. methystica.** Fever accompanying alcoholic intoxication. [*a*, 34.]—**F. miliaria, F. miliaris.** See MILIARIA.—**F. miliaris rubra** [Huxham]. See SCARLATINA.—**F. militaris** [Petri]. Typhus fever. [*a*, 34.]—**F. minuta.** Syncopal fever. [*a*, 34.]—**F. mixta.** Complicated fever. [*a*, 34.]—**F. monoleptica.** A fever consisting of a single attack or paroxysm. [A, 326 (*a*, 21).]—**F. morbillosa.** See MEASLES.—**F. mucosa.** Fr., *fièvre muqueuse.* Verminous, inflammatory, and bilious fever and epidemic influenza. It is divided into simple and continued fever according to the febrile curve. [*a*, 34.]—**F. mucosa adynamica.** Adynamic fever. [*a*, 34.]—**F. mucosa atacta.** Fr., *fièvre muqueuse ataxique.* Mucous fever with nervous symptoms. [*a*, 34.]—**F. mucosa gastrica.** Fr., *fièvre muqueuse gastrique.* A complicated form of f. mucosa. [*a*, 34.]—**F. mucosa hemitritæa.** The *f. mucosa remittens* of Pinel. [*a*, 34.]—**F. mucosa intermittens quotidiana.** Of Pinel, quotidian intermittent fever. [*a*, 34.]—**F. mucosa intermittens quartana.** Of Pinel, quartan intermittent fever. [*a*, 34.]—**F. mucosa putrida.** Of Pinel, probably typhoid fever. [*a*, 34.]—**F. mucosa remittens.** Of Pinel, f. hemitritæa. [*a*, 34.]—**F. mucosa semi-tertiana.** Of Pinel, see *F. mucosa remittens.*—**F. mucosa verminosa.** Of Pinel, verminous fever. [*a*, 34.]—**F. nautica pestilentialis.** Of Huxham, typhus fever. [*a*, 34.]—**F. nephritica.** See *Nephritic* FEVER.—**F. nervosa.** Ger., *Nervenfieber.* An old term for typhus fever; so called on account of the usual manifestation of serious derangement of the nervous system. [A, 326 (*a*, 21).]—**F. nervosa acuta cum vi nervorum acuta.** Of Stark, typhus fever. [*a*, 34.]—**F. nervosa acuta sporadica.** Of Daniel, typhus fever. [*a*, 34.]—**F. nervosa artificialis (seu factitia).** Ger., *Pseudonervenfieber.* Of Hufeland, a simple fever with irritability of the nervous system. [*a*, 34.]—**F. nervosa contagiosa.** Of Campbell, typhus fever. [*a*, 34.]—**F. nervosa cum tabe intestinale** [Heilmann], **F. nervosa enterica.** Typhoid fever. [*a*, 34.]—**F. nervosa epidemica.** See *Typhus* FEVER.—**F. nervosa epigastrica (seu præcordialis).** Of Gorden, typhoid fever. [*a*, 34.]—**F. nervosa erethica.** Of Hanegraaff, typhus fever. [*a*, 34.]—**F. nervosa exanthematica (seu gastrica).** See *Typhus* FEVER.—**F. nervosa mesenterica.** Typhoid fever. [*a*, 34.]—**F. nervosa petechialis.** See *Typhus* FEVER.—**F. nervosa inflammatoria.** Of Paulus, enteric fever. [*a*, 34.]—**F. nervosa stupida.** An old term for the typhoid condition; fever with somnolence or coma. [Samuel (A, 319).]—**F. nervosa versatilis.** Fever characterized by psychical excitation. [A, 326 (*a*, 21).]—**F. neurodes.** See *Nervous* FEVER.—**F. nigra** [Lyons]. See *Cerebro-spinal* MENINGITIS.—**F. nocturna.** A fever occurring at night. [*a*, 34.]—**F. nonana.** See *Nonan intermittent* FEVER.—**F. non pestilens.** Of Forestus, typhoid fever. [*a*, 34.]—**F. nosocomialis, F. nosocomiorum.** Fr., *fièvre nosocomiale.* Typhus fever. [*a*, 34.]—**F. notha.** Tertian fever with paroxysms lasting longer than twelve hours. [*a*, 34.]—**F. nova anni 1685.** Of Sydenham, typhus fever. [*a*, 34.]—**F. nycterina.** See *F. nocturna.*—**F. octana.** See *Octan* FEVER.—**F. oscitans.** Fr., *fièvre oscitante.* A fever in which there is yawning. [*a*, 34.]—**F. paludosa, F. paludum** [Pringle]. Malarial fever. [A, 525 (*a*, 34).]—**F. pannonica.** See *Hungarian* FEVER.—**F. paracmastica.** Fr., *fièvre paracmastique.* A continued fever that decreases in intensity during its course. [*a*, 34.]—**F. paralytica.** See *Comatose* FEVER.—**F. pemphigodes, F. pemphigosa.** See PEMPHIGUS *acutus.*—**F. pemptæ.** See *Quintan intermittent* FEVER.—**F. periodica.** See *Periodical* FEVER.—**F. permaligna.** An excessively malignant fever, such as the plague. [*a*, 34.]—**F. perniciosa.** Pernicious (malarial) fever. [D, 18.]—**F. perniciosa algida.** Fr., *fièvre pernicieuse algide.* Of Alibert, algid pernicious intermittent fever. [*a*, 34.]—**F. perniciosa aphonica.** Fr., *fièvre pernicieuse aphonique.* Of Alibert, a comatose pernicious intermittent fever. [*a*, 34.]—**F. perniciosa apoplectica.** Fr., *fièvre pernicieuse apoplectiforme.* A comatose form of pernicious intermittent fever. [*a*, 34.]—**F. perniciosa atrabilaria.** See *F. perniciosa hepatica.*—**F. perniciosa cardialgica.** Fr., *fièvre pernicieuse cardialgique.* Of Alibert, pernicious intermittent fever with gastric symptoms. [*a*, 34.]—**F. perniciosa catarrhalis.** Fr., *fièvre pernicieuse catarrhale.* Of Alibert, pernicious intermittent fever with catarrh. [*a*, 34.]—**F. perniciosa cephalalgica.** Fr., *fièvre pernicieuse céphalalgique.* Of Alibert, pernicious intermittent fever with cephalalgia. [*a*, 34.]—**F. perniciosa cholerica.** See *F. perniciosa dysenterica.*—**F. perniciosa convulsiva.** Of Alibert, f. perniciosa epileptica. [*a*, 34.]—**F. perniciosa cum delirio.** Fr., *fièvre pernicieuse délirante.* Of Alibert, pernicious intermittent fever with delirium. [*a*, 34.]—**F. perniciosa diaphoretica.** Fr., *fièvre pernicieuse diaphorétique.* Of Alibert, pernicious intermittent fever with profuse sweating. [*a*, 34.]—**F. perniciosa dysenterica.** Fr., *fièvre pernicieuse dysentérique.* Of Alibert, pernicious intermittent fever with dysentery. [*a*, 34.]—**F. perniciosa dyspnoica.** Fr., *fièvre pernicieuse dyspnéique.* Of Alibert, pernicious intermittent fever with respiratory spasms. [*a*, 34.]—**F. perniciosa epileptica.** Fr., *fièvre pernicieuse épileptique.* Of Alibert, pernicious intermittent fever with epileptoid spasms. [*a*, 34.]—**F. perniciosa exanthematica.** Fr., *fièvre pernicieuse exanthématique.* Of Alibert, pernicious intermittent fever with an eruption of the skin. [*a*, 34.]—**F. perniciosa gastralgica.** Fr., *fièvre pernicieuse gastralgique.* Pernicious intermittent fever with gastralgia. [*a*, 34.]—**F. perniciosa hæmorrhagica.** Fr., *fièvre pernicieuse hémorrhagique.* Pernicious intermittent fever with hæmorrhages. [*a*, 34.]—**F. perniciosa hepatica.** Pernicious fever with hepatitis. [*a*, 34.]—**F. perniciosa hydrophobica.** Fr., *fièvre pernicieuse hydrophobique.* Of Alibert, pernicious intermittent fever with aversion to water. [*a*, 34.]—**F. perniciosa icterica.** Fr., *fièvre pernicieuse ictérique.* Of Alibert, pernicious intermittent fever with jaundice. [*a*, 34.]—**F. perniciosa lethargica.** See *F. perniciosa soporosa.*—**F. perniciosa maniacalis.** Pernicious malarial fever with delirium. [*a*, 34.]—**F. perniciosa nephritica.** Fr., *fièvre pernicieuse néphrétique.* Of Alibert, pernicious intermittent fever with renal symptoms. [*a*, 34.]—**F. perniciosa pleuritica.** Intermittent fever with pleuritic friction sounds during the paroxysms. [L, 20 (*a*, 34).]—**F. perniciosa pneumonica.** Fr., *fièvre pernicieuse péripneumonique.* Of Alibert, intermittent fever with pneumonic symptoms during the paroxysms. [L, 20 (*a*, 34).]—**F. perniciosa rheumatica.** Fr., *fièvre pernicieuse rhumatismale.* Of Alibert, pernicious intermittent fever with rheumatism. [*a*, 34.]—**F. perniciosa scorbutica.** Fr., *fièvre pernicieuse scorbutique.* Pernicious intermittent fever with scurvy. [*a*, 34.]—**F. perniciosa soporosa.** Fr., *fièvre pernicieuse soporeuse.* Of Alibert, pernicious intermittent fever with marked lethargy. [*a*, 34.]—**F. perniciosa syncopalis.** Fr., *fièvre pernicieuse syncopale.* Of Alibert, pernicious intermittent fever with syncope. [*a*, 34.]—**F. perniciosa tetanica.** See *F. perniciosa epileptica.*—**F. pessimi moris.** Of Morgagni, typhus fever. [*a*, 34.]—**F. pestilens** [Fracastor], **F. pestilentialis.** Fr., *fièvre pestilentielle.* Pestilential fever. [D, 72.]—**F. pestilentialis Europæ.** See PLAGUE.—**F. pestilens Ægypti, F. pestilens maligna** [Sennertus], **F. pestilens sine charactere veneni** [Forestus], **F. pestilentialis nautica** [Huxham]. Typhus fever. [*a*, 34.]—**F. petechialis.** Fr., *fièvre pétéchiale.* An old term for various malignant fevers accompanied by the appearance of petechial spots.—**F. petechialis contagiosa, F. petechialis epidemica (Coloniæ, 1672** [Donckers], seu **Cremonæ, 1734** [Valcharenzi], seu **Lipsiæ, 1757** [Ludwig], seu **Mutinæ, 1692** [Ramazzini], seu **Posonii, 1683** [Loeu], seu **Silesiæ, 1741** [Brandhorst], seu **variis Germaniæ locis, ab anno 1755 ad 1761** [Strack], seu **Viennæ, 1757** [Hosenohrl], seu **Vigorniæ** [Wall]). **F. petechialis nervosa a Dijon (1760), F. petechialis vera** [Hoffmann], **F. petechialis Wratiflaviæ (1699)** [Helwich], **F. petechizans epidemica** [Hoyer], **F. petechizans Petropoli (1735)** [Weitbrecht], **F. peticularis, F. peticularis Tridenti (1591)** [Roboretus]. Typhus fever. [*a*, 34.]—**F. phlegmatica.** Of Petræus, quotidian fever. [*a*, 34.]—**F. phlogistica.** Fr., *fièvre phlogistique.* Of Linnæus, a division including inflammations of the muscles, nerves, and viscera. [*a*, 34.]—**F. phricodes.** See AMPHEMERINA *phricodes.*—**F. phthisica.** See *Hectic* FEVER.—**F. pituitaria, F. pituitosa.** See *Pituitary* FEVER.—**F. pituitosa nervosa** [Jacobi]. Typhoid fever. [*a*, 34.]—**F. planetes.** See *Irregular* FEVER.—**F. pleuritica.** See PLEURISY.—**F. pneumonica.** See PNEUMONIA.—**F. podagrica.** See GOUT.—**F. polycholica.** See *Bilious* FEVER.—**F. polyleptica.** A fever consisting of several attacks or paroxysms. [A, 326 (*a*, 21).]—**F. præfocans.** Ger., *Stickfieber.* A fever with the sensation of suffocation. [*a*, 34.]—**F. primaria.** See *Essential* FEVER.—**F. puerpera** [Darwin], **F. puerperalis.** See *Puerperal* FEVER.—**F. puerperalis biliosa.** Of Stahl, a variety of puerperal fever. [*a*, 34.]—**F. puerperalis complicata.** Fr., *fièvre puerpérale compliquée.* Of Doublet, puerperal fever complicated with other symptoms. [*a*, 34.]—**F. puerperalis inflammatoria.** Fr., *fièvre puerpérale inflammatoire.* Puerperal fever supposed to be due to lacteal matter being diverted to the uterus or the brain, or infiltrated in the chest. [*a*, 34.]—**F. puerperalis putrida.** Puerperal fever with adynamia. [*a*, 34.]—**F. puerperarum.** See *Puerperal* FEVER.—**F. pulicularis.** See *Pulicular* FEVER.—**F. puncticularis.** See *Typhus* FEVER.—**F. pura.** See *F. simplex.*—**F. purpurata** [Rivière]. 1. See *Typhus* FEVER. 2. Of Carl, cerebro-spinal fever. [D, 74.]—**F. purpurata miliaris.** See MILIARIA.—**F. purpurata rubra et alba miliaris.** Of Hoffmann, miliary fever. [*a*, 34.]—**F. purpurea** [Juncker]. Miliary fever. [*a*, 34.]—**F. purpurea epidemica.** Of Theræus, Typhus fever. [*a*, 34.]—**F. purpurea pestifera.** Cerebro-spinal

meningitis. [α, 34.]—**F. purulenta.** See SEPTICÆMIA.—**F. putrida.** See *Putrid* FEVER.—**F. putrida biliosa.** 1. Of De Martens, a form of typhus fever. 2. Of Hillary, yellow fever. [α, 34.]—**F. putrida colliquativa.** Of Rouppe, yellow fever. [α, 34.]—**F. putrida contagiosa in carceribus genita.** Of Huxham, typhus fever. [α, 34.]—**F. putrida epidemica.** Of Huxham, probably typhoid fever. [α, 34.]—**F. putrida inflammatoria** [Pinel], **F. putrida maligna petechialis** [Huxham], **F. putrida nervosa** [De Martens]. Typhus fever. [α, 34.]—**F. putrida quæ vulgo lenta apellatur.** Of Willis, typhoid fever. [α, 34.]—**F. putrida sanguinea.** Of Vogel, typhus fever. [α, 34.]—**F. pythogenes** [Murchison]. See *Pythogenic* FEVER.—**F. quæ lenticulas, puncticala, aut peticulas vocant.** Of Fracastor, typhus fever. [α, 34.]—**F. quartana.** See *Quartan* FEVER.—**F. quartana amens.** Of Sydenham, quartan fever with delirium. [α, 34.]—**F. quartana arthritica.** Quartan fever with inflammation of the joints. [α, 34.]—**F. quartana cataleptica** [Bonetus], **F. quartana comatosa** [Werlhof]. Pernicious malarial fever. [α,. 34.]—**F. quartana contumacia.** Of Pechlin, prolonged quartan fever. [α, 34.]—**F. quartana duplex.** A quartan fever in which there is fever daily except on the third day. [α, 34.]—**F. quartana duplicata.** Of Bonetus, quartan fever with two paroxysms every fourth day. [α, 34.]—**F. quartana epileptica.** Of Scholzius, quartan fever with epileptoid spasms. [α, 34.]—**F. quartana hepatica.** Of Macbride, quartan fever with inflammation of the liver. [α, 34.]—**F. quartana hysterica.** Of Morton, quartan fever with hysteria. [α, 34.]—**F. quartana legitima.** Of Sydenham, quartan fever. [α, 34.]—**F. quartana maniaca.** The f. quartana hysterica of Spangenberg. [α, 34.]—**F. quartana metastatica.** Quartan fever with metastatic symptoms. [α, 34.]—**F. quartana nephralgica.** Quartan fever with nephralgic symptoms. [α, 34.]—**F. quartana remittens.** See TETARTOPHYIA.—**F. quartana scorbutica** [Bartholini]. Quartan fever with scurvy. [α, 34.]—**F. quartana splanchnica** [Pinel]. Quartan intermittent fever. [α, 34.]—**F. quartana splenetica.** Fr., *fièvre quarte splénique.* Of Ettmüller, quartan fever with inflammation of the spleen. [α, 34.]—**F. quartana syphilitica.** Quartan fever with syphilis. [α, 34.]—**F. quartana triplex.** Of Bartholin, quartan fever with daily paroxysms; those of every fourth day alike. [α, 34.]—**F. quartana triplicata.** Quartan fever with three paroxysms every fourth day. [α, 34.]—**F. querquera.** See AMPHEMERINA *phricodes.*—**F. quinta, F. quintana.** See *Quintan* FEVER.—**F. quotidiana.** See *Quotidian* FEVER.—**F. quotidiana anomala** [Pinel]. See *F. quotidiana spuria.*—**F. quotidiana catarrhalis.** Quotidian fever with catarrh. [α, 34.]—**F. quotidiana cephalalgica.** Of Morton, quotidian fever with cephalalgia. [α, 34.]—**F. quotidiana continua** [Vogel]. See AMPHEMERINA.—**F. quotidiana deceptiva.** See *Tertian intermittent* FEVER.—**F. quotidiana duplicata.** Quotidian fever with two paroxysms daily. [α, 34.]—**F. quotidiana epileptica.** Quotidian fever with epileptoid spasms. [α, 34.]—**F. quotidiana erratica** [Pinel]. See *F. quotidiana spuria.*—**F. quotidiana hysterica.** See *F. quotidiana epileptica.*—**F. quotidiana ischiadica.** Quotidian fever with sciatica. [α, 34.]—**F. quotidiana legitima.** Of Sennertus, quotidian intermittent fever. [α, 34.]—**F. quotidiana nephralgica.** Of Morton, quotidian fever with nephralgia. [α, 34.]—**F. quotidiana ophthalmica.** Of Morton, quotidian fever with ophthalmia. [α, 34.]—**F. quotidiana partialis.** A quotidian fever with paroxysms returning at different hours. [α, 34.]—**F. quotidiana postponens.** Of Pucheit, the f. quotidiana spuria. [α, 34.]—**F. quotidiana remittens.** See AMPHEMERINA *latica.*—**F. quotidiana simplex.** See *Quotidian intermittent* FEVER.—**F. quotidiana soporosa.** Quotidian fever attended with drowsiness. [α, 34.]—**F. quotidiana spuria.** Of Pinel, irregular quotidian fever. [α, 34.]—**F. quotidiana stranguriosa.** See *Hæmaturic bilious* FEVER.—**F. quotidiana uretico-sputatoria.** Of B. Scharf, quotidian fever with frequent micturition. [α, 34.]—**F. quotidiana vera** [Pinel]. Quotidian intermittent fever. [α, 34.]—**F. recidiva.** See *Relapsing* FEVER.—**F. recidiva de variolis.** See AMPHEMERINA *variolosa.*—**F. recurrens.** See *Relapsing* FEVER.—**F. regularis.** See *Regular* FEVER.—**F. remittens.** See *Remittent* FEVER.—**F. remittens ardens sive causus** [Macbride]. Remittent fever.—**F. remittens a l'Isle-en-Jourdain.** Remittent fever of Isle-en-Jourdain. [α, 34.]—**F. remittens biliosa** [Macbride]. Remittent fever. [α, 34.]—**F. remittens catarrhalis** [Macbride]. Remittent fever with catarrh. [α, 34.]—**F. remittens choleroidea** [Murray]. Pernicious remittent fever of a choleroid character; the same as Malwa sweating sickness. [Chevers, "Med. Times and Gaz.," Aug. 25, 1883, p. 208 (D).]—**F. remittens gastro-inflammatoria, F. remittens gastrica simplex** [Pinel]. Remittent fever. [α, 34.]—**F. remittens gravior cum ictero.** See *Yellow* FEVER.—**F. remittens hæmorrhagica** [Falkenstein]. Hæmorrhagic malarial fever. [α, 34.]—**F. remittens Indiæ Orientalis.** Of Lind, remittent fever of the East Indies. [α, 34.]—**F. remittens infantum.** See *Infantile remittent* FEVER.—**F. remittens mucosa simplex** [Pinel]. Remittent fever. [α, 34.]—**F. remittens regionum calidarum.** Of Lind, probably typho-malarial fever. [α, 34.]—**F. resolutoria.** A benign fever. [α, 34.]—**F. rheumatica (inflammatoria), F. rheumatodes.** See *Rheumatic* FEVER.—**F. rubra** [Heberden]. See SCARLATINA.—**F. rubra pruriginosa.** See URTICARIA.—**F. sanguinea.** Fr., *fièvre sanguine.* Of Avicenna, fever supposed to be due to inflammation of the blood; probably simple continued fever. [α, 34.]—**F. sapropyra.** See *Typhus* FEVER.—**F. scarlatina.** See SCARLATINA.—**F. scarlatina miliaris.** Scarlet fever with miliaria. [α, 34.]—**F. scarlatino-miliaris anginosa.** Scarlet fever with a miliary eruption. [α, 34.]—**F. scarlatinosa.** See SCARLATINA.—**F. scarlatinosa sine exanthemate.** Fever in which the efflorescence is confined to the throat and mouth. [α, 34.]—**F. scorbutica.** See *Scorbutic* FEVER.—**F. scrofulosa** [Darwin]. Fever with scrofula. [α, 34.]—**F. secundaria.** Fr., *fièvre secondaire.* A fever secondary to general or local irritation. [α, 34.]—**F. semitertiana.** 1. A tertian fever with two paroxysms one day, and a single paroxysm the next. 2. Enteric fever. [α, 34.]—**F. semitertiana primi ordinis.** Of Galen, semitertiana. [α, 34.]—**F. semitertiana secundi ordinis** [Galen]. See AMPHEMERINA *hemitritæus.*—**F. senegallensis.** Typho-malarial fever. [α, 34.]—**F. sensitiva.** Of Darwin, a fever attended with little diminution of the sensorial power of irritation, such as pulmonary consumption. [α, 34.]—**F. sensitiva inirritata.** Of Darwin, a combination of the sensitive and inirritative fevers; typhus gravior, etc. [α, 34.]—**F. sensitiva irritata.** Of Darwin, irritative fever accompanied with pain. [α, 34.]—**F. septana.** See *Septan* FEVER.—**F. septenaria** [Platner], **F. septimana, F. septimanaria.** See SYNOCHA.—**F. sesquialtera.** See *F. semitertiana.*—**F. sextana.** See *Sextan* FEVER.—**F. siamensis.** Fr., *fièvre de Siam.* Yellow fever; so called because it was supposed to have originated in Siam. [α, 34.]—**F. simplex.** See *Simple* FEVER.—**F. singultuosa.** See *Singultous* FEVER.—**F. soporosa** [Werlhofer]. See *F. tertiana lethargica.*—**F. spiritalis.** Of Porro, one of his three divisions of fever; consisting of inflammation of the so-called animal spirit. [α, 34.]—**F. sporadica.** Fr., *fièvre sporadique.* A fever that attacks a few persons in a place. [α, 34.]—**F. spuria.** Of Hoffmann, see *F. notha.*—**F. stationaria.** Fr., *fièvre stationnaire.* Of Sydenham, a fever prevalent in one locality many years. [α, 34.]—**F. stercoralis.** Fr., *fièvre stercorale.* Ger., *Kothfieber.* 1. Gastric fever; supposed to be due to the accumulation of stercoral matter in the intestine. 2. Of Quesnay, probably enteric fever. [α, 34.]—**F. sthenica.** Fr., *fièvre sthénique.* 1. An ideal fever of J. Brown in which he supposed that all of the vital forces were exalted. 2. See *Inflammatory* FEVER. [α, 34.]—**F. stigmatica.** Typhus fever. [α, 34.]—**F. stomachica (inflammatoria).** Of Hoffmann, see GASTRITIS.—**F. stomachica intestinalis.** Of Schenckbecker, enteric fever. [α, 34.]—**F. subcontinua.** See *Subcontinuous* FEVER.—**F. subintrans.** Fr., *fièvre subintrante.* An intermittent fever in which a second paroxysm commences before the first is completed. [α, 34.]—**F. sudatoria.** See *Sweating* FEVER.—**F. sudoralis.** Of Tomaselli, Malta fever. [α. 34.]—**F. sympathetica, F. symptomatica.** See *Inflammatory* FEVER.—**F. syncopalis.** Fr., *fièvre syncopale.* See AMPHEMERINA *syncopalis.*—**F. syncopalis humorosa.** See AMPHEMERINA *cardiaca.*—**F. syncopalis repletionalis.** See AMPHEMERINA *humorosa.*—**F. synocha, F. synochalis.** See SYNOCHA.—**F. synochus** [Cullen]. Synochal fever. [D.]—**F. syphilitica.** See *Syphilitic* FEVER.—**F. tabida.** See *Colliquative* FEVER.—**F. tertiana.** See *Tertian* FEVER.—**F. tertiana accidentalis.** Of Sydenham, tertian fever supposed to be due to traumatism. [α, 34.]—**F. tertiana algida.** See *F. continua epiola.*—**F. tertiana apoplectica.** Of Morton, see *F. tertiana lethargica.*—**F. tertiana arthritica** [Morton]. Tertian fever with inflammation of the joints. [α, 34.]—**F. tertiana a scabie** [Juncker]. Tertain fever accompanied with scabies. [α, 34.]—**F. tertiana asthmatica.** Of Bonetus, tertian fever attended with respiratory spasms. [α, 34.]—**F. tertiana atrabiliaris.** See *F. tertiana subcruenta.*—**F. tertiana cardiaca.** Of Torti, intermittent fever with cardiac complications.—**F. tertiana carotica.** Of Werlhof, tertian fever with drowsiness. [α, 34.]—**F. tertiana cholerica.** Of Torti, tertian fever with cholera nostras. [α, 34.]—**F. tertiana continua.** See *Tertian intermittent* FEVER.—**F. tertiana diaphoretica.** Of Torti, intermittent fever with pronounced diaphoresis. [α, 34.]—**F. tertiana duplicata.** Of Jones, a tertian fever returning every second day, with two paroxysms in the same day. [α, 34.]—**F. tertiana duplex** [Vogel]. See *F. duplicana.* [α, 34.]—**F. tertiana dysenterica** [Torti]. Tertian fever with dysentery. [α, 34.]—**F. tertiana epidemica.** Of Bartholin, probably typho-malarial fever. [α, 34.]—**F. tertiana epileptica.** Tertian fever with epileptoid spasms. [α, 34.]—**F. tertiana hemiplegica** [Werlhof]. See *F. tertiana carotica.*—**F. tertiana hysterica** [Wedell]. Tertian fever with hysterical paroxysms. [α, 34.]—**F. tertiana legitima.** Tertian fever with paroxysms not lasting over twelve hours. [α, 34.]—**F. tertiana leipyria.** See *F. continua epiala et leipyria.* [α, 34.]—**F. tertiana lethargica.** Intermittent fever with marked lethargy. [α, 34.]—**F. tertiana maligna pestilens.** Of Riverius, pernicious malarial fever. [α, 34.]—**F. tertiana miliaris** [Walther]. Tertian fever with miliaria. [α, 34.]—**F. tertiana notha sive spuria.** Of Sennertus, tertian fever with paroxysms lasting more than twelve hours. [α, 34.]—**F. tertiana perniciosa.** See *Pernicious malarial* FEVER.—**F. tertiana perniciosa et pestilenta** [Lancisi]. Pernicious malarial fever. [α, 34.]—**F. tertiana pestilens.** Pernicious malarial fever. [α, 34.]—**F. tertiana petechialis.** Of Donatus. tertian fever with efflorescence. [α, 34.]—**F. tertiana pleuritica.** Of Valesius, see PLEURITIS *periodica.* [α, 34.]—**F. tertiana proportionata** [Torti]. Tertian intermittent fever. [α, 34.]—**F. tertiana remittens.** Tertian intermittent fever. [α, 34.]—**F. tertiana scorbutica.** Of Ettmüller, tertian fever accompanied with scurvy. [α, 34.]—**F. tertiana subcontinua** [Torti]. Tertian intermittent fever. [α, 34.]—**F. tertiana subcruenta** [Torti]. Intermittent fever accompanied with hæmorrhage. [α, 34.]—**F. tertiana subintrans.** Tertian intermittent fever. [α, 34.]—**F. tertiana syncopalis** [Torti]. See *F. continua syncopalis.* [α, 34.]—**F. tertiana syphilitica.** Of Deidier, tertian fever accompanied with syphilis. [α, 34.]—**F. tertiana tetanodes.** Tertian fever with tetanoid spasms. [α, 34.]—**F. tertiana triplex.** See *F. semitertiana.*—**F. tertiana urticata.** Of Planchon, tertian fever with urticaria. [α, 34.]—**F. tertiana vera** [Cleghorne]. See *F. tertiana legitima.*—**F. tertiana verminosa.** Tertian fever accompanied with worms. [α, 34.]—**F. tetartophyia.** See TETARTOPHYIA.—**F. tonica.** See SYNOCHA.—**F. topica.** Facial neuralgia. [α, 34.]—**F. torminalis.** Fever with tormina. [α, 34.]—**F. torpida.** See *Enteric* FEVER.—**F. toxica.** Yellow fever. [α, 34.]—**F. traumatica.** See *Traumatic* FEVER.—**F. traumatica secundaria.** A febrile movement occurring after the cessation of a primary traumatic fever, generally due to the retention or metastasis of pus. [A, 326 (α, 21).]—**F. tritæophyia.** See TRITÆOPHYIA.—**F. tritæus.** See *Intermittent* FEVER.—**F. tropicalis.** See *Tropical* FEVER.—**F. tussiculosa.** Ger., *Hustenfieber.* A fever with

coughing. [*a*, 34.]—**F. tympanica** [Rabington]. Typhoid fever. [*a*, 34.]—**F. typhodes.** 1. Of the old writers, "inflammations of the skin, liver, stomach, or uterus, that induce fever associated with mental anxiety, chills, and exhausting sweats" [Juncker (*a*, 34).] 2. See *Typhus* and *Typhoid* FEVER.—**F. typhoides.** 1. See *Typhoid* FEVER. 2. Of German writers, a form of fever of the same type as typhoid fever, but in which the symptoms are all less intense. [D, 29.] See also *Schleim*FIEBER.—**F. typhica** (seu **typhosa**). Typhus fever. [*a*, 34.]—**F. typhosa infantum** [Scheller]. Enteric fever in children. [*a*, 34.]—**F. typhus icterodes.** Yellow fever. [*a*, 34.]—**F. typica.** A fever that follows a definite course. [*a*, 34.]—**F. typo inverso.** A fever characterized by a rise of temperature in the morning and a fall in the evening. [A, 326 (*a*, 21).]—**F. urethralis.** See *Urethral* FEVER.—**F. uretica.** A fever with increased micturition. [*a*, 34.]—**F. urinosa.** See URÆMIA.—**F. urticata.** Fr., *fièvre ortiée.* Ger., *Nesselfieber.* Febrile urticaria. [G.]—**F. urticata intermittens.** See *F. intermittens urticata.* —**F. uterina.** See METRITIS.—**F. vaga.** See *F. erratica.*—**F. variolosa.** See VARIOLA.—**F. variolosa secundaria.** Of Darwin, the secondary fever of small-pox. [*a*, 34.]—**F. vasorum** [Reil]. See *Typhus* FEVER.—**F. venenosa.** Of Fortunat and Bianchi, typhus fever. [D, 74.]—**F. venerea.** Of Darwin, fever from venereal disease. [*a*, 34.]—**F. vere pestilens.** The plague. [*a*, 34.]—**F. verminosa.** See *Verminous* FEVER.—**F. vernalis.** Fr., *fièvre vernale.* An intermittent fever appearing in the spring. [*a*, 34.]—**F. vesicatoria.** See PEMPHIGUS *acutus.*—**F. vesicularis.** Fr., *fièvre vésiculeuse.* 1. Miliaria. 2. Pemphigus acutus. [G.]—**F. vesiculosa.** Erysipelas. [L, 84.]—**F. vesicularis catarrhalis** [Delius]. See PEMPHIGUS.—**F. virginea, F. virginum.** Chlorosis.—**F. visinocha.** Synochus. [*a*, 34.]—**F. vomitoria.** Ger., *Brechfieber.* A fever with vomiting. [*a*, 34.]—**F. vulneraria.** See *Traumatic* FEVER.—**Secunda f. variolarum confluentium.** Of Mead, the secondary fever of small-pox. [*a*, 34.]

FEBRIZITIREN (Ger.), v. intr. Fa-brets-e-te're^{2}n. To have a slight febrile movement. [A, 326 (*a*, 21).]

FECAL, adj. Fe'ka^{2}l. See FÆCAL.

FÉCALIFORME (Fr.), **FÉCALOÏDE** (Fr.), adj's. Fa-ka^2-le-fo^{3}rm, -o-ed. Resembling fæces. [A, 385.]

FÉCAMP (Fr.), n. Fa-ka^{3}n^2. A sea-bathing resort in the department of the Seine-Inférieure, France. [A, 518.]

FÉCATION (Fr.), n. Fa-ka^2-se-o^{2}n^2. See FÆCATION.

FÈCES (Fr.), n. Fe^{2}s. See FÆCES.

FECLA (Lat.), n. f. Fe^{2}k(fak)'la^3. See FÆCULA (1st def.).

FÉCOND (Fr.), adj. Fa-ko^{2}n^2. See FECUND.

FÉCONDABLE (Fr.), adj. Fa-ko^{2}n^2-da^2-b'l. Capable of being fecundated. [A, 385.]

FÉCONDANT (Fr.), **FÉCONDATEUR** (Fr.), adj's. Fa-ko^{2}n^2-da^{3}n^2, -da^2-tu^{5}r. Fecundating. [A, 301.]

FÉCONDATION (Fr.), n. Fa-ko^{2}n^2-da^2-se-o^{2}n^2. See FECUNDATION.—**F. à sec.** The artificial fecundation of fishes' eggs without the contact of water. [A, 385.]—**F. croisée.** See *Crossed* FERTILIZATION.—**F. directe.** See *F. à sec.*—**F. externe.** The fecundation of ova after they have been expelled from the body of the female. [A, 4.]—**F. humide.** The artificial fecundation of the ova of fishes, etc., with the access of water. [A, 385.]—**F. interne.** The fecundation of ova within the body of the female. [A, 4.]

FÉCONDITÉ (Fr.), n. Fa-ko^{2}n^2-de-ta. See FECUNDITY.

FECULA (Lat.), n. f. Fe^{2}k(fak)'u^2(u^4)-la^2. See FÆCULA.

FÉCULE (Fr.), n. Fa-ku^{6}l. See FÆCULA.—**Cataplasme de f.** [Fr. Cod.]. Lat., *cataplasma fœculosum.* A poultice made by diluting 1 part of potato-starch with double its weight of water, stirring in little by little more water until 10 parts have been employed, and boiling for a few moments while stirring. [B, 113 (*a*, 21).]—**F. amylacée.** See STARCH.—**F. azotique.** See XYLOIDIN.—**F. blanche.** See STARCH.—**F. de terre.** The *Terfezia leonis.* [B, 121 (*a*, 21).]—**F. de tolomane, F. de tolomans.** Canna starch. [B, 81.]—**F. diazotique** [Béchamp]. Nitroxyloidin (tetranitroxyamylum). [B, 92.]—**F. monoazotique insoluble** [Béchamp]. Insoluble xyloidin (dinitroamylum). [B, 92.]—**F. monoazotique soluble** [Béchamp]. Soluble xyloidin (dinitroamylum). [B, 92.]—**F. nitrique.** Xyloidin. [B, 92.]—**Gras de f.** The layer of insoluble cells forming on the surface of the starch-layer in the process of extraction of starch from potatoes. [B, 86.]

FECULENCE, n. Fe^{2}k'u^2-le^{2}ns. Lat., *fæculentia.* Fr., *féculence, féculité.* Ger., *Hefen, Bodensatz.* 1. The condition of being feculent. [K.] 2. See FÆCULA (1st def.).

FECULENT, adj. Fe^{2}k'u^2-le^{2}nt. Lat., *fæculentus.* Fr., *féculent.* Ger., *hefig, fäculent.* 1. Containing or consisting of fæcula; of the humors, dense and muddy. 2. In physiology, fæcal, excrementitious. [K.]

FÉCULIFÈRE (Fr.), adj. Fa-ku^4-le-fe^{2}r. From *fæcula* (*q. v.*), and *ferre*, to bear. Furnishing fæcula. [A, 385.]

FECULITE, n. Fe^{2}k'u^2-lit. Fr., *féculite.* A generic term for pulverulent, odorless, and tasteless vegetable proximate principles. [B, 52.]

FÉCULITÉ (Fr.), n. Fa-ku^4-le-ta. See FECULENCE.

FECULOID, adj. Fe^{2}k'u^2-loid. From *fæcula* (*q. v.*), and εἶδος, resemblance. Fr., *féculoïde.* See FECULENT.

FECULOMETER, n. Fe^{2}k-u^{2}l-o^{2}m'e^{2}t-u^{5}r. From *fæcula* (*q. v.*), and μέτρον, a measure. Fr., *féculomètre.* An instrument for determining the amount of water in commercial starch. A given quantity of the starch is put into a graduated tube and a determined volume of water added. The length of the column of water increases in a ratio proportional to the amount of water contained in the starch. [B, 270 (*a*, 27).]

FECUND, adj. Fe^{2}k'u^{3}nd. Gr., γόνιμος. Lat., *fecundus.* Fr., *fécond.* Ger., *fruchtbar, befruchtungsfähig.* Fruitful, prolific, susceptible of fecundation.

FECUNDATING, adj. Fe^{2}k'u^{3}nd-at-i^{2}n^2. Fr., *fécondant, fécondateur.* Ger., *befruchtend.* Serving to effect fecundation. [A, 301.]

FECUNDATION, n. Fe^{2}k-u^{3}n-da'shu^{3}n. Lat., *fecundatio.* Fr., *fécondation.* Ger., *Befruchtung.* It., *fecondazione.* Sp., *fecundación.* The union of the male and female generative cells, whereby the ovum acquires the power of becoming developed into a separate individual.—**Artificial f.** Fr., *fécondation artificielle.* Ger., *künstliche Befruchtung.* F. by the artificial application of the seminal fluid to extruded ova or its injection into the uterine canal.

FECUNDITY, n. Fe-ku^{3}n'di^2-ti^2. Fr., *fécondité.* Ger., *Fruchtbarkeit.* It., *fecondità.* Sp., *fecundidad.* The state of being fecund. [L, 343.]

FEDDERFEW, n. Fe^{2}d'u^{5}r-fu^2. See FEATHERFEW.

FEDEGAZO (Port.), n. Fa-da-ga^3'zo. In Brazil, the *Cassia hirsuta.* [B, 88 (*a*, 14).]

FEDEGOSO, n. Fe^{2}d-e^2-go'so. Fr., *fédégose, fédégosse.* The *Cassia occidentalis.* [*a*, 24.]

FEDER (Ger.), n. Fad'e^{2}r. 1. See FEATHER. 2. See CALAMUS (1st def.).—**Deckf'n.** See *Contour* FEATHERS.—**F'artig.** Feathery. [L, 80.]—**F'barometer.** See *Aneroid* BAROMETER.—**F'blättrig.** Feather-leaved. [*a*, 24.]—**F'busch.** See CRISTA.—**F'chen.** 1. See CALAMUS *scriptorius.* 2. See PLUMULE.—**F'chenscheide.** See COLEOPTILUM.—**F'förmig.** See CALAMIFORM.—**F'geistchen.** The *Pterophoridæ.* [L, 353.]—**F'harz.** See the major list.—**F'ig.** Feathery. [L, 80.]—**F'kiel.** See CALAMUS *scriptorius.*—**F'kraft.** See ELASTICITY.—**F'los.** Destitute of feathers. [L, 80.]—**F'meissel.** See CHARPIE.—**F'tragend.** See CALAMIFEROUS.—**F'weiss.** See ASBESTOS.—**Flossf'.** See FIN-*ray.*—**Schwungf'.** See *Flag*-FEATHER.

FEDERHARZ (Ger.), n. Fad'e^{2}r-ha^{3}rts. Caoutchouc. [B, 180 (*a*, 24).]—**F'baum.** The genus *Siphonia.* [B, 180 (*a*, 24).]—**Eigentlicher F'baum.** The *Siphonia elastica.* [B, 180 (*a*, 24).]

FEDERKOPF (Ger.), n. Fad'e^{2}r-ko^{2}pf. The genus *Lagœcia.* [L, 80.]—**Kümmelartiger F.** The *Lagœcia cuminoides.* [L, 80.]

FEDIA (Lat.), n. f. Fe(fa)'di^2-a^3. Fr., *fédia.* Of Mönch, a genus of the *Valerianeæ;* of Adanson, the genus *Patrinia;* of Gärtner, the genus *Valerianella.* The *Fediacea* of Rafinesque are a subfamily of the *Gilonanthiæ.* The *Fediaceæ* are the *Valerianeæ.* The *Fidieæ* of Dumortier are a tribe of the *Valerianceæ.* [B, 42, 121 (*a*, 24); L, 180.]—**F. olitoria.** The *Valerianella olitoria.* [B, 173, 180 (*a*, 24).]—**F. samolofolia.** Fr., *fédia à feuilles de mouron.* An edible species of *F.* (1st def.) indigenous to Chili. [B, 173 (*a*, 24).]

FEDUM (Lat.), n. n. Fe(fa)'du^{3}m(du^{4}m). Of Roland, the *Crocus sativus.* [L, 94 (*a*, 21).]

FEDYRFOY, n. Fe^{2}d'u^{5}r-foi. See FEATHERFEW.

FEEDER, n. Fed'u^{5}r. Of M. Sims, a forked instrument used for directing the traction in tightening sutures so that they shall not cut into the tissues. [A, 21.]

FEEDING, n. Fed'i^{2}n^2. See ALIMENTATION (1st def.).

FEELER, n. Fel'u^{5}r. See ANTENNA.

FEELING, n. Fel'i^{2}n^2. Of Herbert Spencer, the conscious side of nervous activity; one of the states of consciousness produced by the action of the nerve centres. The f's are divided into two great groups: (*a*) the emotions, or centrally initiated f's; and (*b*) the sensations, or peripherally initiated f's, arising from the excitation of peripheral nerves (including the nerves and nerve-endings of special sense), and comprising the general, auditory, visual, olfactory, gustatory, and tactual f's, etc. [J, 189.]—**Entoperipheral f's.** Sensations arising from the stimulation or excitation of peripheral nerves distributed to the interior of the body and viscera. [J, 189.] See *Epiperipheral f's.*—**Epiperipheral f's.** Sensations arising from excitation or stimulation of peripheral nerves distributed to the surface of the body, including all the nerves of special sense. [H. Spencer (J, 189).]—**Presentative f's.** Sensations; primary f's produced by direct excitation. [J, 189.]—**Representative f's.** Revived f's; ideas; f's produced by indirect excitation. [J, 189.]

FEET (Hind.), n. The *Cucumis momordica.* [B, 172 (*a*, 24).]

FEF, n. The *Poa abyssinica.* [B, 121 (*a*, 24).]

FÉGARES (Fr.), **FÉGARITE** (Fr.), n's. Fa-ga^{3}r, -ga^{3}r-et. A form of gangrenous stomatitis that has been observed as an epidemic in Spain. [A, 301; D, 74.]

FEGATELLA (Lat.), n. f. Fe^{2}g-a^{2}t(a^{3}t)-e^{2}l'la^3. A genus of the *Marchantiaceæ* (*Targoniaceæ* [Endlicher]). [B, 121 (*a*, 24).]—**F. conica, F. officinalis.** The *Marchantia conica.* [B, 121, 173 (*a*, 24).]

FEGATELLINA (It.), n. Fe^{2}g-a^3-te^{2}l-le'na. The *Targionia hypophylla.* [B, 121 (*a*, 24).]

FÉGRA (Fr.), n. Fa-gra^3. See FÉGARITE.

FEHI, n. In New Caledonia, the *Musa f.* [B, 121 (*a*, 24).]

FEHLEND (Ger.), adj. Fal'e^{2}nd. See ECLIPTICUS.

FEHLBILDUNG (Ger.), n. Fal'bi^{2}ld-un^2. A defective formative process. [*a*, 34.]

FEHLER (Ger.), n. Fal'e^{2}r. Absence or defective formation of a part. [L, 80.]

FEHLGEBÄREN (Ger.), **FEHLGEBURT** (Ger.), n's. Fal'-ge^2-bar-e^{2}n, -burt. See ABORTION.

FEIFELN (Ger.), n. pl. Fif'e^{2}l'n. 1. The salivary glands of horses. 2. The fives, or vives, a disease of horses; really a spasmodic colic, but formerly attributed by veterinary surgeons to an affection of the salivary glands. [L, 30 (α, 14).]

FEIGBOHNE (Ger.), n. Fig'bon-e^2. The genus *Lupinus*, in the pl., *F'n*, the seeds of *Lupinus albus*. [B, 81 (α, 21); 180 (α, 24).] —**Weisse F.** The *Lupinus albus*. [B, 180 (α, 24).]

FEIGE (Ger.), n. Fig'e^2. 1. The fig (fruit of *Ficus carica*). 2. See CONDYLOMA. [B, 180 (α, 24).]—**Afrikanische F.** The *Mesembryanthemum geniculiflorum*.—**F'nartig.** See CARICOUS.—**F'nbaum, F'ndistel.** See the major list.—**F'nfrüchte.** See SYCONIUM.—**F'nkaffee.** See FIG *coffee*.—**F'nknoten.** The lumps occurring in sycosis. [L, 80.]—**F'nkrankheit, F'nmal.** Sycosis. [A, 521.]—**F'nkraut.** See FIGWORT.—**F'nwachs.** A grayish, brittle substance with waxy fracture, obtained in Java and Sumatra by evaporating the sap of *Ficus ceriflua*. It has a sp. gr. of 0·963, melts at 61° C., and is soluble in chloroform, in hot ether, and in alcohol. [L, 57 (α, 14).]—**Gemeine F.** The *Ficus carica*. [L, 80.]—**Heilige F.** The *Ficus religiosa*. [L, 80.]—**Kranzf'n** [Austr. Ph., Gr. Ph.]. Lit., garland-figs, from Morea and the Greek islands; so called because they are imported strung on bast-rope tied in the form of a garland. [B, 49, 95 (α, 14).]—**Ostindische F.** The *Ficus indica*. [L, 80.]—**Pappelartige F.** The *Ficus populnea*. [L, 80.]—**Seeblumenblättrige F.** The *Ficus nymphæifolia*. [L, 80.]—**Teufelsf'.** See ARGEMONE *mexicana*.

FEIGENBAUM (Ger.), n. Fig'e^{2}n-ba^3-u^{4}m. The genus *Ficus*. [B, 180 (α, 24).]—**Aegyptischer F.** The *Ficus sycomorus*. [B, 180 (α, 24).]—**Elastischer F.** The *Ficus elastica*. [L, 80.]—**Gemeiner F.** The *Ficus carica*. [B, 180 (α, 24).]—**Pharaonischer F.** The *Ficus religiosa*. [L, 80.]

FEIGENDISTEL (Ger.), n. Fig'e^{2}n-di^{2}st-e^{2}l. The genus *Opuntia*. [B, 180 (α, 24).]—**Cochenilltragende F.** The *Opuntia coccinellifera*. [B, 180 (α, 24).]—**Indische F.** The *Opuntia vulgaris*. [B, 180 (α, 24).]—**Netzförmige F.** The *Opuntia reticulata*. [B, 180 (α, 24).]

FEIGMAAL (Ger.), n. Fig'ma^{3}l. Sycosis. [L, 80.]

FEIGWARZE (Ger.), n. Fig'va^{3}rts-e^2. See CONDYLOMA.—**F'nkraut.** The *Ranunculus ficaria*. [B, 180 (α, 24).]—**F'nwurz.** The *Scrophularia nodosa*. [B, 180 (α, 24).]—**Gemeines F'nkraut.** The *Ranunculus ficaria*. [B, 180 (α, 24).]—**Gewöhnliche F.** See CONDYLOMA *acuminatum*.—**Hahnenkammähnliche F.** See CRÊTE *de coq* (2d def.).—**Spitze F.** See CONDYLOMA *acuminatum*.

FEIGWARZKRAUT (Ger.), n. Fig'va^{3}rts-kra^3-u^{4}t. The *Tormentilla erecta*. [L, 105.]

FEILSEL (Ger.), **FEILSPÄNE** (Ger.), n's. Fil'ze^{2}l, -span-e^2. Filings. [α, 30.]

FEIN (Ger.), adj. and adv. Fin. Fine, finely.—**F'gekerbt.** See CRENULATE.—**F'gespitzt.** See CUSPIDATE.—**F'haarig.** See PUBESCENT.

FEINTE (Fr.), n. Fa^{2}n^{2}t. See BOITERIE.

FEISO (Jap.), n. The *Nuphar japonica*. ["Proc. of the Am. Pharm. Assoc.," xxviii (α, 14).]

FEL (Lat.), n. n. Fe^{2}l. Gen., *fel'lis*. See BILE.—**Extractum fellis bovini.** See *F. bovis inspissatum*.—**F. anguillæ.** The bile of *Murœna anguilla* (the common eel). [B, 180 (α, 24).]—**F. bovinum** [Belg. Ph.]. See *F. bovis*.—**F. bovinum depuratum** [Belg. Ph.]. See *F. tauri depuratum siccum*.—**F. bovinum purificatum** [Br. Ph.]. See *F. bovis purificatum*.—**F. bovis** [U. S. Ph.]. Fr., *bile de bœuf* [Fr. Cod.], *fiel de bœuf*. Ger., *Ochsengalle, Rindsgalle*. Sp., *hiel del toro* [Sp. Ph.]. Syn.: *f. bovinum* [Belg. Ph.], *tauri f.* [Gr. Ph.], *f. tauri, bilis bubula*. The fresh bile of *Bos taurus*; a somewhat viscid, brownish-yellow or dark-green liquid, having a peculiar, disagreeable smell and a very bitter, unpleasant taste, and having, according to the U. S. Ph., a neutral or weakly alkaline reaction and a sp. gr. of from 1·018 to 1·028. [B, 81, 95 (α, 21).]—**F. bovis inspissatum** [U. S. Ph.]. Fr., *extrait de fiel de bœuf* [Fr. Cod.]; *extrait de bile de bœuf, fiel épaissi*. Ger., *eingedickte Rindsgalle*. Sp., *extracto de hiel* [Sp. Ph.]. Syn.: *f. tauri inspissatum* [Ger. Ph. (1st ed.), Swiss Ph., Russ. Ph., Netherl. Ph., Gr. Ph., Finn. Ph.]; *extractum fellis bovini*. A preparation made by straining fresh ox-bile through muslin, either when taken directly from the gall-bladder or after a moderate heating (to a temperature not exceeding 80° C. [U. S. Ph.]), and evaporating on the water-bath to the consistence of honey [Sp. Ph.], to dryness [Gr. Ph.], or, according to the other pharmacopœias (except the U. S. Ph.), to the consistence of a thick extract. The U. S. Ph. directs that 100 parts of fresh ox-gall shall be evaporated to 15, the consistence of which is not specified. According to the Ger. Ph. (1st ed.), Gr. Ph., and Russ. Ph., the product is of a brownish-green; according to the Swiss Ph., brownish olive-green, and when dissolved in water is clear [Ger. Ph. (1st ed.), Gr. Ph., Swiss Ph., Netherl. Ph.], or turbid [Russ. Ph.]. [B, 95 (α, 21).]—**F. bovis purificatum** [U. S. Ph.]. Fr., *fiel de bœuf purifié, bile purifiée*. Ger., *gereinigte Ochsengalle*. Syn.: *f. bovinum purificatum* [Br. Ph.], *bilis bovina depurata* [Swed. Ph.], *fel tauri depuratum*. Purified ox-gall; made by evaporating 3 parts of fresh ox-gall in a porcelain capsule on the water-bath to 1 part, adding 1 part of alcohol, agitating the mixture thoroughly, allowing it to stand well covered for 24 hours, decanting the clear solution, filtering the remainder, and, having mixed the liquids and distilled off the alcohol, evaporating to a pilular consistence [U. S. Ph.]; by precipitating 1 pint of fresh ox-bile with 2 pints of rectified spirit [Br. Ph.]; or by mixing equal parts of fresh ox-gall and alcohol of the sp. gr. of 0·832, allowing the mixture to stand for several days, and evaporating on the water-bath to a pilular consistence [Swed. Ph.]. [B, 81, 95 (α, 21).] —**F. draconis.** See *Spiritus* ARGENTI VIVI *sublimati*.—**F. metallorum.** An old term for crystallized silver nitrate. [L, 105 (α, 14).]—**F. phasiani.** The bile of the common pheasant (*Phasianus colchicus*). [B, 180 (α, 24).]—**F. porci.** Hog-gall (the bile of *Sus scrofa*). [B, 180 (α, 24).]—**F. salaris.** The bile of *Salmo salar*. [B, 180 (α, 24).]—**F. strigis.** The bile of *Strix aluco*. [B, 180 (α, 24).]—**F. tauri** [Fr. Cod.]. See *F. bovis*.—**F. tauri depuratum.** 1. See *F. bovis purificatum*. 2. Of the Austr. Ph., see *F. tauri depuratum siccum*.—**F. tauri depuratum siccum** [Ger. Ph., 1st ed., Russ. Ph.]. Syn.: *f. bovinum depuratum* [Belg. Ph.], *bilis bovina depurata* [Dan. Ph.], *f. tauri depuratum* [Austr. Ph.]. A preparation made by mixing equal parts of fresh ox-bile and alcohol of the sp. gr. of 0·832, allowing the mixture to stand (twenty-four hours [Russ. Ph.]), filtering, distilling off the alcohol, and treating the remainder with moist animal charcoal, purified by hydrochloric acid, until the test-filtrate appears pale-yellow, then filtering, and evaporating to dryness [Ger. Ph. (1st ed.), Russ. Ph.]; or by mixing equal parts of fresh ox-bile and alcohol of the sp. gr. of 0·832, filtering, allowing the mixture to stand for several days, and evaporating on the water-bath to dryness [Dan. Ph.]; or by mixing 3 parts of fresh ox-bile with 5 [Austr. Ph.] or 3 [Belg. Ph., Roum. Ph.] of 90- to 92-per-cent. alcohol, allowing the mixture to stand twelve (twenty-four [Roum. Ph.]) hours, filtering, and boiling with animal charcoal until the filtrate presents a yellow color, then filtering, and distilling off the alcohol; or, according to the Belg. Ph., by evaporating on the water-bath, and drying the remainder, which consists of a yellow, hygroscopic powder yielding a clear solution in water and in alcohol, and having a bitter or sweetish [Austr. Ph.] taste. [B, 95 (α, 21).]—**F. tauri inspissatum.** See *F. bovis inspissatum*.—**Fel taurinum.** See *F. bovis*.—**F. terræ.** The *Erythræa centaurium*. [B, 180 (α, 24).]—**F. ursi.** The bile of the European brown bear (*Ursus arctos*). [B, 180 (α, 24).]—**F. vitri.** See ANATRON.—**Tauri f.** [Gr. Ph.]. See *F. bovis*.

FEL-BROOM, n. Fe^{2}l'bru^{4}m. The *Lotus corniculatus*. [A, 505 (α, 21).]

FELD (Ger.), n. Fe^{2}ld. A field. area, or tract; in comp., in names of plants, see ARVENSIS.—**Afterf'.** The region of the anus. [J.]—**Ambulacralf'.** See AMBULACRUM.—**Cohnheim'sche F'er.** See *Cohnheim's* AREAS.—**Embryonalf'.** See *Embryonic* AREA.—**F'erwerk.** See AREOLATION.—**Gesichtsf'.** See FIELD *of vision*. —**Hinteres F. des verlängerten Marks.** The dorsal region of the medulla oblongata. [I, 17 (K).]—**Interambulacralf'.** See INTERAMBULACRUM.—**Kernlose F'er.** See *Non-nucleated* AREAS.—**Kölliker'sche F'er.** See *Cohnheim's* AREAS.—**Mediales F. des verlängerten Marks.** The median region of the medulla oblongata. [I, 17.]—**Motorisches F.** See *Motor* TRACT.—**Sehf'.** See FIELD *of vision*.—**Seitliches F. der Oblongata.** Of Flechsig, the lateral region of the medulla oblongata. [I, 17 (K).]

FELDAFING (Ger.), n. Fe^{2}ld'a^{3}f-i^{2}n^2. A place in Bavaria where there is a sulphurous spring. [L, 49.]

FELDBERG (Ger.), n. Fe^{2}ld'be^{2}rg. A place in the grand duchy of Mecklenburg-Strelitz, Germany, where there are cold-water-cure establishments and hot-air baths. [A, 319 (α, 21).]

FELDCHEN (Ger.), n. Fe^{2}ld'ch^{2}e^{2}n. See AREOLA.

FELDKÜMMEL (Ger.), n. Fe^{2}ld'ku^{6}m-me^{2}l. The *Thymus serpyllum* and the *Carum carvi*. [B, 48, 88 (α, 14), 180 (α, 24).]—**Zottiger F.** The *Lychnis githago*. [B, 180 (α, 24).]

FELDWOOD, n. Fe^{2}ld'wu^{4}d. 1. The *Verbascum thapsus*. [B, 275 (α, 24).] 2. Probably a species of *Gentiana*. [A, 505 (α, 21).]

FELFAL TAVIL, n. Of Prosper Alpinus, the Egyptian name of a plant the acrid juice of which was used locally for rheumatic pains (according to Linnæus, a *Euphorbia*; according to Bory, the *Cynanchum viminale*). [B, 46, 48 (α, 14).]

FELFAR AHMER, n. In Egypt, the *Capsicum frutescens*. [B, 88 (α, 14).]

FELFILDRAZ (Hind.), n. The *Chavica Roxburghii*. [B, 172 (α, 24).]

FELFILGIRD (Hind., Beng.), n. The *Piper nigrum*. [B, 172 (α, 24).]

FELIDÆ (Lat.), n. f. pl. Fe^{2}l(fal)'i^{2}d-e(a^3-e^2). From *felis*, a cat. Fr., *félins, féliens*. Ger., *Katzen*. The cats; a group or family of carnivorous animals, including the lions, tigers, etc. [L, 121, 147, 353 (α, 27).]

FÉLIEN (Fr.), adj. Fa-le-a^{3}n^2. See FELINE; as a n., in the pl., *f's*, see FELIDÆ.

FELILECH, n. Of the alchemists, iron. [Ruland (L, 94 [α, 21]).]

FELINE, adj. Fel'i^{2}n(in). Lat., *felinus* (from *felis*, the cat). Fr., *félin, félien*. Resembling the cat or belonging to the *Felidæ*. The *Felina* of Gray are a tribe of the *Felidæ*. [L, 180.]

FELIS (Lat.), n. f. Fel(fal)'i^{2}s. Gen., *fel'is*. Gr., αἴλουρος. Fr., *chat*. Ger., *Katze*. A genus of the *Felidæ* or of the *Felina*. [L.]—**F. catus.** The wild cat. [L, 147.]—**F. domestica.** The domestic cat, probably descended from *F. maniculata*. [L, 147.]—**F. leo.** The lion. [L, 147.]—**F. leopardus.** The leopard. [L, 147.]—**F. lynx.** The lynx. [L.]—**F. maniculata.** The Nubian cat, a species found in northern Africa and in Syria. [L, 14, 121.] —**F. pardus.** The panther. [B, 180 (α, 14).]—**F. tigris.** The tiger. [L, 147.]

FELL (Ger.), Fe^{2}l. A skin-like structure. See BAUCHFELL, BAUSTFELL, and TROMMELFELL.

FELLA, n. Sulphurous or sulphurated water. [Ruland (A, 325).]

FELLANIC ACID, n. Fe^{2}l-a^{2}n'i^{2}k. Fr., *acide fellanique*. Ger., *Fellansäure*. An acid of the empirical formula $C_{50}H_{72}O_6+3H_2O$, obtained by Berzelius by treating putrescent bile with hydrochloric acid. According to Mulder, it also exists in fresh bile, but subsequent investigations have not confirmed the existence of this acid. [B, 46 (α, 14); B, 93.]

FELLATHAL (Ger.), n. Fe^{2}l'la^3-ta^{3}l. A place in Illyria where there are gaseous springs containing sodium sulphate, bicarbonate, and chloride. [L, 49, 135 (α, 14).]

FELL-BLOOM, n. Fe^{2}l'blum. The *Lotus corniculatus*. [A, 505 (*a*, 21).]

FELLCHEN (Ger.), n. Fe^{2}l'ch^{2}e^{2}n. See ENDOPLEURA.

FELLEUS (Lat.), adj. Fe^{2}l'e^2-u^{3}s(u^{4}s). Pertaining to or resembling bile. [A, 322.]

FELLIC ACID, n. Fe^{2}l'i^{2}k. Fr., *acide fellique*. See FELLINIC ACID.

FELLIDUCUS (Lat.), adj. Fe^{2}l-i^2-du^2(du)'ku^{3}s(ku^{4}s). From *fel*, the gall, and *ducere*, to lead. See CHOLAGOGUE.

FELLIFLUUS (Lat.), adj. Fe^{2}l-li^{2}f'lu^2(lu^4)-u^{3}s(u^{4}s). From *fel*, bile, and *fluere*, to flow. Flowing with or discharging bile. [L, 107.]

FELLINIC ACID, n. Fe^{2}l-i^{2}n'i^{2}k. Fr., *acide fellinique*. Ger., *Fellinsäure*. Of Berzelius, an acid of the empirical composition $C_{50}H_{72}O_8+4H_2O$, obtained by treating bile with hydrochloric acid. Subsequent observers have failed to confirm this discovery. [A, 301; B, 93.]

FELLRISSKRAUT (Ger.), n. Fe^{2}l'ri^{2}s-kra^3-u^{4}t. The *Malva alcea*. [B, 180 (*a*, 24).]

FELLWORT, n. Fe^{2}l'wu^{5}rt. The genus *Gentiana* and the genus *Swertia*. [B, 275, 370 (*a*, 24).] Cf. FELTWORT.

FELO DE SE (Lat.), n. m. Fe(fa)'lo(lo^3)-de(da)-se(sa). In medical jurisprudence, one who commits felony by attempting suicide. [L.]

FELON, n. Fe^{2}l'u^{3}n. See PARONYCHIA.

FELONWORT, n. Fe^{2}l'u^{3}n-wu^{5}rt. The *Solanum dulcamara*. [B, 275 (*a*, 24).]—**Hollow-leaved f.** The *Saponaria anglica*. [B, 370 (*a*, 24).]

FELS (Ger.), n. Fe^{2}ls. A rock; in comp., *Fen-*, see PETROUS and SAXATILIS.—**F'enartig, F'ig.** See PETROUS.

FELSO-ALAP (Hung.), n. See under ALAP.

FELSO-BAJOM (Hung.), n. A place in the district of Medias, Transylvania, where there are springs containing potassium chloride and various earthy matters. [L, 135 (*a*, 14).]

FELSTEAD, n. Fe^{2}l'ste^{2}d. A place in Essex, England, where there is a disused chalybeate spring. [A, 316.]

FELT, n. Fe^{2}lt. Gr., πῖλος. Lat., *lana coacta*. Fr., *feutre*. Ger., *Filz*. It., *feltro*. Sp., *fieltro*. 1. A fabric made of wool or hair tangled and pressed together. 2. The *Triticum repens*. [B, 275 (*a*, 24).]

FELTED, adj. Fe^{2}lt'e^{2}d. Lat., *coactus*. Tangled like the elements of felt.

FELTRIKE, n. Fe^{2}lt'rik. The *Erythræa centaurium*. [A, 505 (*a*, 21).]

FELTRISSKRAUT (Ger.), **FELTRISSWURZEL** (Ger.), n's. Fe^{2}lt'ri^{2}s-kra^3-u^{4}t, -vurts-e^{2}l. The *Malva alcea*. [B, 180 (*a*, 24).]

FELTWORT, n. Fe^{2}lt'wu^{5}rt. The *Verbascum thapsus*, the *Gentiana amarella*, and the genus *Swertia*. [A, 505 (*a*, 21); B, 275 (*a*, 24).]

FÉLURE (Fr.), n. Fe^2-lu^{6}r. A fissure or incomplete fracture of a bone. [A, 385, 518.]

FELWORT, n. Fe^{2}l'wu^{5}rt. The *Gentiana amarella*. [A, 505 (*a*, 21).]

FEMALE, adj. Fe'mal. Gr., γυναικεῖος. Lat., *fœmineus*. Fr., *femelle*. Ger., *weiblich*. It., *femmineo*. Sp., *femenino*. 1. Belonging or pertaining to the sex that lays eggs or conceives and brings forth young; as a n., a member of that sex. 2. Of a flower, provided with a gynœcium and destitute of male organs; of a plant, bearing only such flowers. [*a*, 24.] 3. Of a screw-thread, turned on the inner wall of a tube, etc., to fit the male screw. 4. Provided with an opening for the reception of a pivot, or the like (said of one blade of a double-bladed instrument).—**Dimorphic f's.** F's of the same species having two distinct forms. [L, 210.]—**F.-hems.** Probably the *Galeopsis tetrahit*. [A, 505 (*a*, 21).]

FEMBLE, n. Fe^{2}m'b'l. The male plant of *Cannabis sativa*. [A, 505 (*a*, 21).]

FEMELLE (Fr.), adj. Fe^2-me^{2}l. See FEMALE.

FEMEN (Lat.), n. n. Fe^{2}m'e^{2}n. Gen., *fem'inis*. See FEMUR.

FEMINELLE (Fr.), n. Fe^{2}m-e-ne^{2}l. 1. A commercial term for saffron suitably dyed. 2. A commercial term for the ligulate florets of *Calendula officinalis* dyed with Campeachy wood; used to adulterate saffron. [B, 81 (*a*, 21); "Proc. of the Am. Pharm. Assoc.," xxiii (*a*, 14).]

FEMINEOUS, adj. Fe^{2}m-i^{2}n'e^2-u^{3}s. Lat., *femineus*, *fœmineus* (from *femina*, a woman). See FEMALE.

FEMINIFLORUS (Lat.), adj. Fe^{2}m-i^{2}n-i^2-flo'ru^{3}s(ru^{4}s). From *femina*, a female, and *flos*, a flower. Fr., *féminiflore*. Bearing female flowers. [B, 1 (*a*, 24).]

FEMININITY, n. Fe^{2}m-i^{2}n-i^{2}n'i^2-ti^2. Fr., *fémininité*. Ger., *Weiblichkeit*. The state of being or resembling a female; of Burdach, the assemblage of qualities that characterize a female. [A, 385.]

FÉMINISME (Fr.), n. Fa-me-nez'm. Of Lorain, a state of arrested development of the distinctive features of a male. [A, 385.]

FEMORÆUS (Lat.), n. m. Fe^{2}m-o^{2}r-e'(a^2'e^2)-u^{3}s(u^{4}s). See CRURÆUS.

FEMORAL, adj. Fe^{2}m'o-ra^{2}l. Lat., *femoralis* (from *femur*, the thigh). Fr., *fémoral*. Ger., *Zum Schenkel gehörig*. Pertaining to or connected with the femur or the thigh. [L, 141.]

FEMORALIS (Lat.), adj. Fe^{2}m-o^{2}r-a(a^3)'li^{2}s. See FEMORAL; as a n., see EXTENSOR *cruris quadriceps*.

FÉMORALI-VASCULAIRE (Fr.), adj. Fa-mo-ra^3-le-va^{3}s-ku^6-le^{2}r. See FEMORO-VASCULAR.

FEMOREN, adj. Fe^{2}m'o^{2}r-e^{2}n. See FEMORAL.

FEMOREUS (Lat.), n. m. Fe^{2}m-o^{2}r-e(a)'u^{3}s(u^{4}s). See CRURÆUS.

FEMORO-ARTICULAR, adj. Fe^{2}m''o-ro-a^{3}r-ti^{2}k'u^2-la^{3}r. Articulating with the femur. ["Proc. of the Zool. Soc.," 1874, p. 484 (*a*, 29).]

FEMORO-CALCANEUS (Lat.), adj. Fe^{2}m'o^{2}r-o(o^3)-ka^{2}lk-(ka^{3}lk)-a^{2}n(a^{3}n)'e^2-u^{3}s(u^{4}s). For deriv., see FEMUR and CALCANEUM. Fr., *fémoro-calcanien*. Pertaining to or connected with the femur and the calcaneum. [*a*, 29.]

FÉMORO-CALCANIEN (Fr.), adj. Fa-mo-ro-ka^{3}l-ka^3-ne-a^{2}n^2. See FEMORO-CALCANEUS.—**Petit f.-c.** See PLANTARIS.

FEMORO-CAUDAL, adj. Fe^{2}m''o-ro-ka^{4}d'a^{2}l. From *femur*, the thigh, and *cauda*, a tail. Relating to or connected with the thighs or femora and the tail. [L.]

FEMOROCELE (Lat.), n. f. Fe^{2}m-o^{2}r-o(o^3)-sel(kal)'e(a); in Eng., fe^{2}m'o^{2}r-o-sel. Gen., *-cel'es*. From *femur*, the thigh, and κήλη, a tumor. Fr., *fémorocèle*. See *Femoral* HERNIA.

FEMORO-COCCYGEUS (Lat.), adj. Fe^{2}m'o^{2}r-o(o^3)-ko^{2}k-si^{2}j-(ku^{6}g)'e^2-u^{3}s(u^{4}s). For deriv., see FEMUR and COCCYX. Pertaining to, or connected with, the femur and the coccyx. [*a*, 29.]

FEMORO-CUTANEOUS, adj. Fe^{2}m'o-ro-ku^2-tan'e^2-u^{3}s. From *femur*, the thigh, and *cutis*, the skin. Fr., *fémoro-cutané*. Belonging to the integument of the thigh. [L, 43 (*a*, 29).]

FEMORO-FIBULARIS (Lat.), adj. Fe^{2}m-o^{2}r-o(o^3)-fi^{2}b-u^2-(u^4)-la(la^3)'ri^{2}s. A portion of the biceps cruris in the orang-outang which is inserted into the outer edge of the fibula from the head to the middle of the bone, and into the fascia in front of the leg. ["Proc. of the Zool. Soc.," 1830, p. 68 (*a*, 29).]

FEMORO-GENITAL, adj. Fe^{2}m''o-ro-je^{2}n'i^{2}t-a^{2}l. For deriv., see FEMUR and GENITAL. Belonging to the thigh and the pudenda. [*a*, 29.]

FEMORO-PHALANGEUS (Lat.), n. m. Fe^{2}m-o^{2}r-o(o^3)-fa^{2}l-(fa^{3}l)-a^{2}n(a^{3}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From *femur*, the thigh, and *phalanx*, a phalanx. Fr., *fémoro-phalangien*, *fléchisseur superficiel des phalanges*. Ger., *Backkronbeinmuskel*, *Kronbeinbeuger*, *oberflächlicher* (oder *durchbohrter*) *Zehenbeuger*. The analogue in lower animals of the plantaris and flexor digitorum brevis muscles of man. [L, 13.]

FEMORO-POPLITEAL, adj. Fe^{2}m''o-ro-po^{2}p-li^{2}t'e^2-a^{2}l. Lat., *femoro-popliteus* (from *femur*, the thigh, and *poples*, the hough). Fr., *fémoro-poplité*. 1. Pertaining to, or situated in, the thigh and the popliteal space. 2. Pertaining to the posterior surface of the thigh. [L, 43 (*a*, 29); *a*, 34.]

FEMORO-POPLITEO-TIBIAL, adj. Fe^{2}m''o-ro-po^{2}p-li^{2}t''-e^2-o-ti^{2}b'i^2-a^{2}l. Lat., *femoro-popliti-tibialis* (from *femur*, the thigh, *poples*, the hough, and *tibia*, the tibia). Fr., *fémoro-popliti-tibial*. Pertaining to the femur, popliteal space, and tibia. [L, 43 (*a*, 24).]

FEMORO-PRÆPHALANGEUS (Lat.), adj. Fe^{2}m-o^{2}r-o(o^3)-pre(pra^3-e^2)-fa^{2}l(fa^{3}l)-a^{2}n(a^{3}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). Fr., *extenseur antérieur des phalanges*, *fémoro-pré-phalangien*. Ger., *Backbeinmuskel* (oder *vorderer Strecker*, oder *langer Strecker*) *des Fesselkron- und Hufbeins*. The analogue in lower animals of the extensor longus digitorum pedis muscle of man. [L, 13.]

FEMORO-PRETIBIAL, adj. Fe^{2}m''o-ro-pre-ti^{2}b'i^2-a^{2}l. From *femur*, the thigh, *præ*, in front of, and *tibia*, the tibia. Fr., *fémoro-prétibial*. Pertaining to the thigh and the anterior portion of the leg. [L, 43 (*a*, 29).]

FÉMORO-ROTULIEN (Fr.), adj. Fa-mo-ro-ro-tu^6-li^2-a^{2}n^2. Belonging to the femur and patella. [*a*, 29.]

FEMORO-TIBIAL, adj. Fe^{2}m''o-ro-ti^{2}b'i^2-a^{2}l. Lat., *femoro-tibialis* (from *femur*, the thigh, and *tibia*, the tibia). Fr., *fémoro-tibial*. Pertaining to the femur and tibia. [*a*, 29.]

FEMORO-VASCULAR, adj. Fe^{2}m'o-ro-va^{2}sk'u^2-la^{3}r. From *femur*, the thigh, and *vasculum*, a little vase. Fr., *fémoro-* (ou *fémorali-*) *vasculaire*. Pertaining to the femoral canal. [*a*, 29.]

a *b*

THE FEMUR.

a, the anterior surface; *b*, the posterior surface.

FEMUR (Lat.), n. n. Fem-(fe^{2}m)'u^{2}r(ur). Gen., *fem'oris*, *fem'inis*. Fr., *fémur*. Ger., *F.*, *Schenkelknochen*. 1. The largest, longest, and strongest bone in the body situated between the hip bone and the tibia. The upper extremity presents a head, which forms two fifths of a sphere and articulates with the acetabulum, joined to the shaft by a neck which extends outward at an angle varying at different periods of life. At the outer side of the neck at its junction with the shaft is a large, rough, quadrilateral eminence, the great trochanter, which serves for the insertion of the external rotators of the thigh. The lesser trochanter, a conical

eminence at the base of the neck, posteriorly, serves for the insertion of the internal rotators of the thigh. The shaft is nearly cylindrical, slightly arched, strengthened behind by a longitudinal ridge, the linea aspera. The lower extremity is cuboidal and divided into the external and internal condyles by the intercondyloid notch behind and the trochlea in front. The external condyle is the broader and more prominent in front, the internal is the longer and more prominent inferiorly. The trochlea articulates with the patella. Both condyles articulate with the tibia. 2. In entomology, the third segment (counting that next the body as first) of an insect's leg. [L, 142, 172, 353 (a, 29).]

FENA, n. In Samoa, the *Eugenia neurocalyx*. [B, 121 (a, 24).]

FENABREGNE, n. In Provence, the *Celtis australis*. [B, 173 (a, 24).]

FÉNASSE, n. In Provence, the *Avena elatior* and the *Onobrychis sativa*. [B, 121, 173 (a, 24).]

FENBERRY, n. Fe^{2}n'be^{2}r-i^2. The *Vaccinium oxycoccus*. [B, 275 (a, 24).]

FENCE, n. Fe^{2}ns. An abbreviation of *defence*. Of A. Seibert, a line of cross-scarifications of the skin made around an erysipelatous area, to which a germicide is applied ; designed to prevent the spread of the disease. ["N. Y. Med. Jour.," Oct. 19 and Nov. 23, 1889, pp. 430, 586.]

FENCHEL (Ger.), n. Fe^{2}nch^2'e^{2}l. See FŒNICULUM and FENNEL.—**Cretischer F.** The seed of *Fœniculum dulce*. [B, 180 (a, 24).]—**F'holz.** The wood of *Sassafras officinale*. [B, 180 (a, 24).]—**F'holzrinde.** The bark of *Sassafras officinale*. [B, 180 (a, 24).]—**F'öl.** See *Oil of* FENNEL.—**F'ölzucker.** An elæosaccharum of the ethereal oil of *Fœniculum dulce* used in the form of a powder. [L, 135 (a, 21).]—**F'saft.** The juice of *Fœniculum vulgare*. [L, 77 (a, 21).]—**F'samen.** See FENNEL *fruit*.—**F'wasser.** See *Aqua* FŒNICULI.—**F'wortel, F'wurzel.** See FENNEL-*root*.—**Gemeiner F.** The *Fœniculum officinale*. [B, 180 (a, 24).]—**Indischer F.** The *Fœniculum panmorium*. [B, 180 (a, 24).]—**Italienischer F.** The *Fœniculum dulce*. [B, 180 (a, 24).]—**Meerf'.** See CRITHMUM *maritimum*.—**Moskowitischer F.** The fruit of *Illicium anisatum*. [B, 180 (a, 24).]—**Pfefferartiger F.** The *Fœniculum piperitum*. [B, 180 (a, 24).]—**Römischer F.** Sweet fennel ; the fruit of *Fœniculum dulce*. [B, 180 (a, 24).]—**Sibirischer F.** The fruit of *Illicium anisatum*. [B, 180 (a, 24).]—**Süsser F.** The fruit of *Fœniculum dulce*. [B, 180 (a, 24).]—**Zusammengesetztes F'pulver.** See *Pulvis* FŒNICULI *compositus*.

FENDILLÉ (Fr.), adj. Fa^{3}n^2-del-ya. See RIMULOSUS.

FENDU (Fr.), adj. Fa^{3}n^2-du^6. Cleft, fissured. [L, 180.]

FENECEL, n. Fe^{2}n'e^{2}s-e^{2}l. The *Peucedanum officinale*. [A, 505 (a, 21).]

FÉNÉROTET (Fr.), n. Fa-na-ro-ta. In Burgundy, the *Mentha pulegium*. [B, 121, 173 (a, 24).]

FENESTRA (Lat.), n. f. Fe^{2}n-e^{2}s'tra^3. Fr., *fenêtre*. Ger., *Fenster*. A window-like opening.—**F. cochleæ, F. cochlearis.** See *F. rotunda*.—**F. oculi.** An obsolete term for the pupil of the eye. [F.]—**F. ovalis.** Fr., *fenêtre ovale*. Ger., *ovales* (oder *eirundes*) *Fenster*, *Vorhofsfenster*. The oval window of the tympanic cavity ; an oval or bean-shaped opening which leads to the vestibule of the labyrinth, and is situated at the extremity of a deep niche on the inner wall of the tympanum. It receives the footplate of the stapes, the edge of which is fastened to the margin of the opening by means of a fibro-elastic annular ligament. The longest diameter of the window, 4 mm., extends from before backward and downward ; the height from without inward and downward is 1½ mm. [F, 32.]—**F. rotunda.** Fr., *fenêtre ronde*. Ger., *rundes Fenster*, *Schenkelfenster*, *Schneckefenster*, *Schneckenfenster*. A round aperture situated upon the inner wall of the tympanic cavity, from 3 to 4 mm. below the f. ovalis. It lies at the bottom of a small niche which is directed backward. It is the opening between the tympanic cavity and the canal of the cochlea. [F, 32.]—**F. semi-ovalis (ossis temporis)** [M. J. Weber]. See *F. ovalis*.—**F. triquetra.** See *F. rotunda*.—**F. vestibularis, F. vestibuli.** See *F. ovalis*.

FENESTRAL, FENESTRATE, FENESTRATED, adj's. Fe-ne^{2}s'tra^{2}l, -trat, -trat-e^{2}d. Lat., *fenestratus*. Fr., *fenêtré*. Ger., *gefenstert*. It., *finestrato*. Sp., *agujereado*. 1. Provided with fenestræ. [B, 1, 77, 291 (a, 24) ; J ; L, 343.] 2. Having a number of transparent spots. [L.]

FENESTRIFORMIS (Lat.), adj. Fe^{2}n-e^{2}st-ri^2-fo^{2}rm'i^{2}s. From *fenestra*, a window, and *forma*, form. Ger., *fensterförmig*. Window-shaped.

FENÊTRE (Fr.), n. Fe^2-ne^2-tr'. See FENESTRA.

FENÊTRÉ (Fr.), adj. Fe^2-ne^2-tra. See FENESTRATED.

FENEU (Fr.), n. Fe^2-nu^5. A place in the department of the Maine-et-Loire, France, where there is a gaseous alkaline and ferruginous spring. [L, 49, 87 (a, 14).]

FENICULUM (Lat.), n. n. Fe^{2}n(fan)-i^{2}k'u^2(u^4)-lu^{3}m(lu^{4}m). See FŒNICULUM.

FENIGRÉ, n. In Provence, the *Frigonella fœnum græcum*. [B, 121 (a, 24).]

FENKELLE, n. Fe^{2}n^2'ke^{2}l. The *Fœniculum vulgare*. [A, 505 (a, 21).]

FENNEL, n. Fe^{2}n'e^{2}l. Lat., *fœniculum* [U. S. Ph.]. Fr., *fenouil doux* [Fr. Cod.]. Ger., *Fenchel*. It., *finocchio*, *finichio*. Sp., *hinojo*. 1. The *Fœniculum vulgare*. 2. Of the U. S. Ph., its fruit. [a, 24.]—**Azorian f.** The *Anethum fœniculum*. [L, 84 (a, 21).]—**Bear's f.** Fr., *fenouil d'ours* (ou *des Alpes*). The root of *Meum athamanticum*. [L, 77 (a, 21).]—**Bitter f.** Fr., *fenouil amer*. Wild f. ; a commercial name for a bitterish, spicy f. collected in the south of France, where the plant grows wild. [B, 18 (a, 24).]—**Common f.** The *Fœniculum vulgare*. [B, 81 (a, 21).]—**Common giant-f.** The *Ferula communis*. [B, 275 (a, 24).]—**Dog-f., Dog's f.** The *Athemis cotula*. [A, 505 (a, 21) ; B, 275 (a, 24).]—**F.-flower.** The *Nigella sativa*. [B, 81 (a, 21).]—**F.-fruit.** Lat., *fœniculum* [U. S. Ph.], *fœniculi fructus* [Br. Ph.], *fructus fœniculi* [Ger. Ph.]. Fr., *fruits* (ou *semences*) *de fenouil doux* [Fr. Cod.]. Ger., *Fenchelsamen*. It., *finocchio*. Sp., *hinojo*. The fruits of *Fœniculum officinale* (seu *vulgare*) [U. S. Ph.], or the dried fruits of *Fœniculum capillaceum* [Br. Ph.]. They are about 4 lines in length and 1 line in diameter, are more or less arched, of smooth surface, pale-green color, aromatic odor, and pleasant, spicy taste, and contain a volatile oil (see *Oil of f.*) and an oil isomeric with oil of turpentine. They are sometimes employed in medicine as a corrigent and aromatic, but are chiefly used in veterinary practice. [B, 5, 18 (a, 24).]—**F.-root.** Lat., *radix fœniculi* (*vulgaris*, seu *marathri*). Fr., *racine de fenouil doux* [Fr. Cod.]. Ger., *Fenchelwurzel*. The root of *Fœniculum capense* and of *Fœniculum officinale*. The latter was once official. [B, 180 (a, 24).]—**F.-seed.** See *F.-fruit*.—**F.-water.** See *Aqua* FŒNICULI.—**F.-wood.** Fr., *pavanne*, *sassafras*. Ger., *Fenchelholz*. The *Laurus sassafras*. [L, 77, 135 (a, 21).]—**Florence f.** Fr., *fenouil de Florence* (ou *d'Italie*). The *Fœniculum dulce*. [L, 49 (a, 21).]—**Furrowed giant-f.** The *Ferula sulcata*. [B, 275 (a, 24).]—**German f.** Saxon f. ; a commercial name for f. of a greenish-brown color and aromatic, sweet taste, produced in the Prussian province of Saxony. [B, 18 (a, 24).]—**Giant-f.** The genus *Ferula*. [B, 275 (a, 24).]—**Giant-f. of Candia.** The *Hippomarathrum creticum*. [B, 307 (a, 24).]—**Great round-headed f.** The *Hippomarathrum erocephalum*. [B, 307 (a, 24).]—**Hog's f.** The *Peucedanum officinale*. [B, 275 (a, 24).]—**Horse-f.** The *Seseli hippomarathrum*. [B, 275 (a, 24).]—**Indian f.** The *Fœniculum panmorium*. ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 14).]—**Larger sweet f.** Fr., *fenouil doux majeur*. The *Fœniculum officinale*. [L, 41 (a, 21).]—**Oil of f.** Lat., *oleum fœniculi* [U. S. Ph., Ger. Ph.]. Fr., *essence* (ou *huile volatile* [Fr. Cod.]) *de fenouil*. Ger., *Fenchelöl*. A colorless, neutral oil obtained from the fruit of *Fœniculum capillaceum*, with the taste and odor of the seeds, and consisting chiefly of anethol. [B, 5 (a, 24).]—**Pepper-f.** Fr., *fenouil âcre d'Italie*. The *Fœniculum piperitum*. [L, 41 (a, 21).]—**Saxon f.** See *German f.*—**Scorching f.** The *Thapsia fœnicula*. [B, 119 (*a*, 21).]—**Pastilles de l'hydrate de f.** See *Trochisci* FERRI.—**Perchlorure de f.** [Fr. Cod.]. Ferric chloride. [B, 119 (*a*, 21).] See IRON *chloride.*—**Perchlorure de f. liquide** [Fr. Cod.]. See *Liquor* FERRI *chloridi.*—**Permuriate de f.** Ferric chloride. [B, 119 (*a*, 21).]—**Peroxyde de f.** Iron sesquioxide. [B, 119 (*a*, 21).]—**Peroxyde de f. hydraté** [Fr. Cod.]. See FERRI *oxidum hydratum.*—**Peroxyde de f. mamelonné** (ou **stalactique**). See HÆMATITE.—**Persulfate de f.** Ferric sulphate. [B, 119.]—**Phosphate de f.** Iron phosphate. [B.]—**Phosphure de f.** Iron phosphide. [B.]—**Picrate de f.** Iron picrate. [B.]—**Pilules d'aloès et de f.** See *Pilulæ* ALOES *et ferri* (under ALOE).—**Pilules de f. aloétiques.** See *Pilules d'*ALOÈS *martiales.*—**Protochlorure de f.** [Fr. Cod.]. Ferrous chloride. [B, 113.]—**Proto-iodure de f.** Ferrous iodide. [B, 119 (*a*, 21).]—**Protosulfate de f.** Ferrous sulphate. [B, 119.]—**Protosulfure de f.** [Fr. Cod.]. Iron protosulphide (mono-sulphide), especially when obtained by precipitation. [B, 113.]—**Protosulfure de f. fondu** [Fr. Cod.]. Iron monosulphide obtained by warming sulphur and metallic iron together. [B, 113.]—**Prussiate de f.** Iron ferrocyanide. [B, 81 (*a*. 21).]—**Pyrophosphate de f.** Iron pyrophosphate. [B, 81 (*a*. 21).]—**Pyrophosphate de f. citro-ammoniacal** [Fr. Cod.]. Lat., *pyrophosphas ferricus cum citrate ammoniaco.* A preparation identical with the so-called iron pyrophosphate as prepared by the process of the U. S. Ph. of 1870. It is made by first preparing ferric pyrophosphate, which is precipitated from 156 parts of a solution of ferric chloride (containing 40 of the salt), by the addition of 81 of sodium pyrophosphate; then 26 parts of citric acid in aqueous solution are neutralized with an excess of ammonia (forming ammonium citrate); and to this the freshly prepared ferric pyrophosphate is added, and the resulting solution is evaporated. The product is in the form of bottle-green scales, having but little taste, and soluble in water. [B, 113.]—**Pyrophosphate de f. et de soude** [Fr. Cod.]. Lat., *pyrophosphas ferrico-sodicus.* A product forming grayish-white scales, prepared by warming together a mixture of 1 part of sodium pyrophosphate and 4 parts of gelatinous iron pyrophosphate freshly precipitated from a solution of ferric chloride by the action of sodium pyrophosphate. It resembles in constitution the so-called iron pyrophosphate of the U. S. Ph. [B, 113.]—**Rouille de f.** See FERRI *subcarbonas.*—**Saccharate de f., Saccharure d'oxyde de f. soluble.** See FERRUM *oxydatum saccharatum solubile.*—**Saccharure de protocarbonate de f.** See FERRI *carbonas saccharatus.*—**Sesquichlorure de f.** [Fr. Cod.]. Ferric chloride. [B, 113.]—**Sesquioxyde de f.** Iron sesquioxide. [B, 119 (*a*, 21).]—**Sesquioxyde de f. anhydre** [Fr. Cod.]. Lat., *oxydum ferricum igne paratum.* Syn.: *oxyde rouge de f.* (*colcothar*). Iron sesquioxide. [B, 113.]—**Sesquioxyde de f. bihydraté** [Fr. Cod.] (ou **hydraté**). See FERRI *oxidum hydratum.*—**Silicate de f.** Iron silicate. [B.]—**Sirop de bromure**

de f. See *Syrupus* FERRI *bromidi.*—**Sirop de citrate de f. ammoniacal** [Fr. Cod.]. Lat., *syrupus cum citrate ferrico-ammoniacale.* A preparation made by dissolving 25 parts of iron and ammonium citrate in 25 of water, and mixing with 950 of syrup. [B, 113.]—**Sirop de perchlorure de f.** [Fr. Cod.]. Lat., *syrupus cum chlorureto ferrico.* A preparation consisting of 15 parts of official solution of ferric chloride (chlorure ferrique dissous [Fr. Cod.]), mixed with 985 of syrup ; 1,000 parts contain 3·6 parts of anhydrous ferric chloride and 1¼ part of iron. [B, 113.]—**Sirop de pyrophosphate de f.** [Fr. Cod.]. Lat., *syrupus cum pyrophosphate ferrico.* A preparation made by dissolving 1 part of the *pyrophosphate de f. citro-ammoniacal* (corresponding to the iron pyrophosphate of the U. S. Ph. of 1870) in 2 parts of water, and adding 97 of syrup. [B, 113.]—**Sirop de tartrate de f. ammoniacal** [Fr. Cod.]. A preparation containing 1 part each of water and iron and ammonium tartrate mixed with 38 parts of syrup. [B, 113.]—**Sirop d'iodure de f.** [Fr. Cod.]. See *Syrupus* FERRI *iodidi.*—**Soluté de citrate de f. et de quinine.** See *Liquor* FERRI *et quininæ citratis.*—**Solution au sulfate de f.** [Fr. Cod.]. A solution of 1 part of commercial iron sulphate in 9 parts of water, used in veterinary practice. [B, 113 (α, 21).]—**Solution de cyanure de f. et de potassium** [Austr. Ph., 1820, Bav. Ph., 1822]. A solution of 1 part of potassium ferrocyanide in 9 parts [Bav. Ph., 1822] or 4 [Austr. Ph., 1822] of distilled water. [B, 119 (α, 21).]—**Solution de pyrophosphate de f. et de soude (Leras)** [Gr. Ph.]. A preparation consisting of tablets each of which contain 5 centigrammes (¾ grain) of iron citrate with sugar up to a gramme, flavored with vanilla, and given a suitable consistence by the addition of mucilage of tragacanth. [B, 113.]—**Tablettes de lactate de f.** [Fr. Cod.]. Lat., *tabellæ cum lactate ferrico.* A preparation consisting of tablets each of which contain 5 centigrammes (¾ grain) of iron lactate made up with sugar and a little mucilage of tragacanth to a gramme weight, and flavored with vanilla. [B, 113.]—**Tablettes de l'hydrate de f.** See *Trochisci* FERRI.—**Tablettes de tartrate de f. ammoniacal** [Fr. Cod.]. A preparation consisting of tablets each of which contain 5 centigrammes (¾ grain) of iron and ammonium tartrate, together with sugar up to a gramme, flavored with vanilla, and given a suitable consistence with mucilage of tragacanth. [B, 113.]—**Tablettes d'oxyde noir de f.** [Ph. man., 1812]. Tablets containing 12 grains each, composed of 8 parts of black iron oxide, 2 of cinnamon, 40 of sugar, and a sufficient quantity of tragacanth mucilage. [B, 119 (α, 21).]—**Tannate de f.** Iron tannate. [α, 21.]—**Tartrate de f.** Iron tartrate. [B.]—**Tartrate de f. ammoniacal** (ou **et d'ammoniaque**). See IRON *and ammonium tartrate.*—**Tartrate de f. et de potasse.** See IRON *and potassium tartrate.*—**Teinture alcoolique de protochlorure de f.** See *Tinctura* FERRI *chlorati.*—**Teinture de f. acétique éthérée.** See *Tinctura* FERRI *acetatis* (1st def.).—**Teinture de f. cydoniée.** See *Tinctura* FERRI *pomata.*—**Teinture de f. muriaté** (ou **de muriate de f.**). See *Tinctura* FERRI *chlorati* and *Tinctura* FERRI *chloridi.*—**Teinture d'iodure de f.** [Port. Ph., 1711]. A preparation made by mixing 1 part of iron iodide with 8 parts of wine. [B, 119 (α, 21).]—**Teinture éthérée alcoolique de muriate de f., Teinture éthérée de chlorure de f.** (ou **de f., ou de muriate de f.**). See *Tinctura* FERRI *chlorati œtherea.*—**Tournure de f.** Iron turnings. [B.]—**Tritoxyde de f.** Iron sesquioxide. [B.]—**Valérianate de f.** Iron valerianate. [B, 81 (α, 21).]—**Vin d'hydriodate** (ou **d'iodure**) **de f.** [Port. Ph., 1711]. A preparation made by mixing 1 part of a solution of iron iodide with 4 parts of Bordeaux wine. [B, 119 (α, 21).]—**Vitriol de f.** Ferrous sulphate. [B, 119 (α, 21).]

FERACONITINE, n. Fe^{2}r-a^{2}k-o^{2}n'i^{2}t-en. Syn.: *pseudaconitine.* An alkaloid contained in Nepal aconite, at first supposed to be identical with aconitine, but afterward described under various names—acraconitine (Ludwig, 1869), napelline (Wiggers, 1857), and nepalline (Flückiger, 1869). According to Groves (1870–1874), it exists in two modifications—one crystalline, but yielding uncrystallizable salts, the other amorphous. The latter becomes sticky in boiling water, while the former coheres and becomes plastic only if treated with boiling water immediately after having been precipitated by ammonia. [B, 81 (α, 21).]

FERÆ (Lat.), n. f. pl. Fe(fe^{2})'re(ra^{3}-e^{2}). See CARNIVORA.

FERAHY, n. In Lybia, a variety of date-tree. [B, 121 (α, 24).]

FERAL, adj. Fe'ra^{2}l. Lat., *ferus, ferinus.* Of animals, wild, not domestic. [L, 343.]

FERALIS (Lat.), adj. Fe^{2}r(far)-a(a^{3})'li^{2}s. 1. See CADAVERIC. 2. Deadly, dangerous. [A, 318.]

FERARIA (Lat.), n. f. Fe^{2}r-a(a^{3})'ri^{2}-a^{3}. The *Scrophularia nodosa.* [B, 180 (α, 24).]

FERCULUM (Lat.), n. n. Fu^{5}rk(fe^{2}rk)'u^{2}(u^{4})-lu^{3}m(lu^{4}m). Food. [A, 325.]

FERDINANDSBRUNNEN (Ger.), n. Fe^{2}rd'i^{2}n-a^{3}nds-brun''-ne^{2}n. See under MARIENBAD.

FERDINANDSQUELLE (Ger.), n. Fe^{2}rd'i^{2}n-a^{3}nds-kwe^{2}l-le^{2}. See GASTEIN.

FERESIA (Lat.), n. n. pl. Fe^{2}r-e(a)'si^{2}-a^{3}. See CETACEA.

FERIA (Lat.), n. n. pl. Fe(fa)'ri^{2}-a^{3}. A group of *Diptera* having a pale ferruginous body clothed with black hairs and bristles. [L, 301 (α, 27).]

FERIGOULETO, n. In Provence, the *Thymus serpyllum.* [B, 121 (α, 24).]

FERIGOULO, n. In Provence, the *Thymus vulgaris.* [B, 121 (α, 24).]

FERINE, adj. Fe'ri^{2}n. Gr., θηριώδης. Lat., *ferinus.* Fr., *férin.* Ger., *wild, heftig, hartnäckig.* Severe, obstinate (said of diseases). [B, 52.] Cf. TUSSIS *ferina.*

FERINGIE-DATURA (Hind., Beng.), n. The *Argemone mexicana.* [B, 172 (α, 24).]

FERKELKRAUT (Ger.), n. Fe^{2}rk'e^{2}l-kra^{3}-u^{4}t. The *Achyrophorus maculatus.* [B, 180 (α, 24).]—**Fleckenf'.** The *Hypochœris maculata.* [B, 88.]

FERMENT, n. Fu^{5}r-me^{2}nt'. Gr., ζύμη. Lat., *fermentum* (from *fervere,* to ferment). Fr., *f.* Ger., *F., Gährungsstoff.* It., Sp., *fermento.* An organic body, capable, in small quantities, of decomposing other organic bodies without yielding any of its own substance to the product of the fermentation. The f's are divided into two great classes, the organized f's and the soluble f's (*q. v.*). [α, 27.]—**Acetic f., Acetous f.** See *Vinegar f.*—**Albuminosic f.** Ger., *eiweissspaltendes F.* A f. (such as pepsin) that decomposes albumin or other proteids. [J ; K, 16.]—**Alcoholic f.** Any one of the several species of *Saccharomyces* which produce alcoholic fermentation. [B.] See also BACILLUS *fitzianus* and BACILLUS *caucasicus.*—**Alterative f.** A soluble f. contained in yeast, having the power of splitting cane-sugar (saccharose) into glucose and lævulose by hydration. [B, 31, 244 (α, 27).]—**Ammoniacal f.** Of Musculus, a soluble f. supposed by him to be the cause of the ammoniacal fermentation of urine, which, however, has been since shown to be due to an organized f. (the *Bacillus ureæ*). [B, 31, 238.]—**Amylolytic f.** Fr., *f. amylolytique, f. glycosique, f. diastasique.* Ger., *diastatisches F. Stärkeferment, amylolytischer Gährungsstoff.* A soluble f. (*e. g.*, diastase and glycogen f.) which converts starch and other amylaceous substances (glycogen, etc.) into sugar or glucose. [J.]—**Animal f.** Fr., *f. animal.* Ger., *thierischer Gährungsstoff.* 1. Of Hoffmann, see *Morbific f.* 2. An f. secreted by the animal organism. Cf. *Vegetable f's.* [α, 34.]—**Apiculated f.** The *Saccharomyces apiculatus.* [B, 31 (α, 27).]—**Bacterium f.** The diastatic ferment of bacteria. It converts wheat-starch, canna, and other varieties, except potato-starch, into a soluble modification which under favorable circumstances is transformed into sugar. [Wortmann, "Ztschr. f. phys. Chem.," vi, p. 287 (B).]—**Bee f's.** Soluble f's contained in the head, thorax, and abdomen of working bees. They completely invert cane-sugar, and convert starch into dextrin and sugar. [α, 27.]—**Beer f.** The *Saccharomyces cerevisiæ.* [B, 246.]—**Blood-f's.** See *F's of the blood.*—**Butyric f.** Lat., *fermentum butyricum.* The f. producing butyric fermentation. [B.] See BACILLUS *butyricus,* BACILLUS *amylobacter,* BACILLUS *butylicus,* and BACTERIUM *of butyric-acid fermentation.*—**Cellulosic f.** The *Bacillus amylobacter.* [B, 244 (α, 27).]—**Chemical f.** See *Soluble f.*—**Diastatic f.** Fr., *f. diastatique.* Ger., *diastatisches F.* See *Amylolytic f.*—**Digestive f.** Fr., *f. digestif.* Ger., *Verdauungsf'.* A soluble f. of either animal or vegetable origin, which acts upon a special kind of food. The digestive f's are the amylolytic or diastatic f., the proteolytic or albuminosic f.; the alterative or inversive f., the emulsive and saponifying f., and the milk-curdling f. [J.]—**Eiweissspaltendes F.** (Ger.). See *Albuminosic f.*—**Emulsive f.** A soluble f. found in pancreatic juice, having the property of emulsifying fats. [Landois and Stirling (B).]—**Fat-decomposing f., Fat-digesting f., Fat-f., Fat-splitting f.** Ger., *fettzerlegendes F.* A f. supposed to exist in the pancreatic juice, which is capable of splitting up the fats into glycerin and fatty acids. [K, 3, 16.] See STEAPSIN.—**F. figuré** (Fr.). See *Organized f.*—**F. non figuré** (Fr.). See *Soluble f.*—**F. of beer.** See *Beer f.*—**F. of bread.** The *Saccharomyces minor.* [B, 246 (α, 27).]—**F. of carnivorous plants.** An unorganized f. found in the secretion of the glands of the sundew (*Drosera*), Venus fly-trap (*Dronœa*), and other insectivorous plants. It is similar to, if not identical with, pepsin, and has the power to transform proteid matters into peptone. [B, 229, 291 (α, 24).]—**F. of chyle.** A diastatic f. found in chyle. [A, 429.]—**F. of fruit.** The *Saccharomyces apiculatus.* [B, 246 (α, 27).]—**F. of milk.** A diastatic f. found in the milk. [A, 429.]—**F's of the blood.** These include a diastatic f. and a fibrin-forming f. [A, 429.] See also BACILLI *of the blood.*—**F's of the intestine.** These include invertin and a proteolytic f., a diastatic f., and a milk-curdling f. [A, 429.]—**F. of the liver.** See *Glycogen f.*—**F's of the pancreas.** These include amylopsin, trypsin, an emulsive f., steapsin, and a milk-curdling f. [A, 429.]—**F. of the saliva.** See PTYALIN.—**F's of the stomach.** Lat., *fermenta ventriculi.* These include pepsin, the milk-curdling f., the lactic-acid f., and the fat-decomposing f. [A, 429.]—**F. of the urine.** See *Ammoniacal f.*—**F. of wine.** The *Saccharomyces ellipsoideus, Saccharomyces pastorianus,* and *Saccharomyces conglomeratus.* [B, 246 (α, 27).]—**F'papier** (Ger.). Turmeric paper impregnated with the urinary f. by passing through it the muco-purulent urine of vesical catarrh. Such paper brought into contact with a urea solution is colored brown by decomposition of the urea through the urinary f. into ammonium carbonate. [B, 270.]—**F. vivant** (Fr.). See *Organized f.*—**Fibrin f., Fibrin-forming f.** Ger., *Fibrinf'.* Of Schmidt, a body existing in blood-plasma which promotes the combination of fibrinogen and paraglobulin, and thus brings about the coagulation of the blood. [Pflüger's "Archiv," xi, pp. 291, 515 ; xiii, pp. 93, 146 (K).]—**Formed f.** See *Organized f.*—**Gastric f's.** See *F's of the stomach.*—**Glycogen f.** Fr., *f. glycogénique.* Ger.,

glycogenischer Gährungsstoff. A f. existing in the hepatic cells which converts glycogen into glucose. [K.]—**Harnf** (Ger.). See *Urinary f.*—**Hepatic f.** See *Glycogen f.*—**Hydrolytic f.** Fr., *f. hydrolytique.* Ger., *hydrolytischer Gährungsstoff.* Syn.: *enzyme* [W. Kühne]. A f., such as the amylolytic f., which acts only in the presence of water, causing the addition of 1 or more molecules of water to the molecule of the substance acted upon. [K.]—**Hydrophobic f.** The hypothetical substance that, inoculated in an animal organism, produces rabies. [a, 34.] Cf. Bacillus *lyssæ.*—**Indirect f.** See *Soluble f.*—**Insoluble f.** See *Organized f.*—**Intestinal f's.** See *F's of the intestine.*—**Inversive f., Inverting f.** Fr., *f. inversif.* A f. that converts cane-sugar into grape-sugar. [K.] See *Alterative f.* and Invertin.—**Labf** (Ger.). See *Milk-curdling f.*—**Lactic f.** Fr., *f. lactique.* Ger., *Milchsäuregährungsstoff.* See Bacilli *of lactic-acid fermentation.*—**Liver f.** See *Glycogen f.*—**Living f.** See *Organized f.*—**Milk-curdling f.** Ger., *Labf.* 1. A soluble animal f. existing in the gastric and pancreatic juices, and supposed to exist in the juice of the small intestine, having the property of coagulating milk. [A, 429; Hammarsten, "Upsala Läkareförenings Förhandingar," viii, p. 63 (K).] 2. A soluble vegetable f. having the power of coagulating milk, such as that found in the seeds of the *Withania coagulans.* [B.] 3. An organized f. (*e. g.*, the *Bacillus amylobacter*, *Bacillus mesentericus vulgatus*, etc.) capable of coagulating casein. [B.]—**Milk f.** See *F. of milk.*—**Morbific f's.** Those organized f's that, introduced into the animal organism, produce disease. [a, 34.]—**Non-living f.** See *Soluble f.*—**Organized f.** Fr., *f. organisé.* Ger., *organisirtes F.* A f. which owes its activity to a living organism present in it, and becomes inert with the death of that body (*e. g.*, yeast). [K.]—**Pancreatic f's.** See *F's of the pancreas.*—**Peptic f., Peptone-forming f.** See Pepsin, *F. of carnivorous plants*, Papayotin, and Ficoin.—**Physiological f.** See *Organized f.*—**Piarolytic f.** See *Fat-decomposing f.*—**Proteolytic f.** Fr., *f. protéolytique.* Ger., *proteolytischer Gährungsstoff.* See *Albuminosic f.*—**Putrefactive f's, Putrid f's.** F's producing putrefaction. See Bacilli *of putrefaction.* [a, 27.]—**Rennet f.** See *Milk-curdling f.*—**Salivary f.** See Ptyalin.—**Septic f.** A substance obtained by chemical processes from putrid animal tissues, that produces septic infection when introduced into the blood of animals. It was called sepsin by Bergmann. ["Report of the Medical Officer of the Privy Council," 1876 (a, 31).] Under this name are probably grouped the products of the action of a number of septogenic *Bacilli.* See Ptomaine. [B.]—**Soluble f.** Fr., *f. soluble*, *f. inorganique*, *f. non figuré*, *zymase.* Ger., *auflösliches F.*, *unorganischer Gährungsstoff*, *ungeformtes F.* Syn.: *enzyme.* A soluble, neutral, nitrogenous principle, resembling the albuminoids in composition, and originating in living organisms (probably from the physiological splitting up of proteids), but having none of the properties of living matter. In a dry state the soluble f's occur as amorphous, colorless, pulverulent bodies, precipitated from their aqueous solutions by alcohol, corrosive sublimate, etc. They act catalytically by a process of hydration on organic substances, converting very large quantities of matter in proportion to their own bulk. They are soluble in water and in glycerin, but insoluble in alcohol, and are destroyed at from 70° to 100° C., but not by freezing. [B, 31 (a, 27); J.]—**Spirituous f.** See *Alcoholic f.*—**Starch-transforming f.** See *Amylolytic f.*—**Sugar-forming f.** See *Amylolytic f.*—**Sulphydric f.** *Algæ* of the family *Oscillatoria* and of the genera *Oscillaria* and *Beggiatoa* found in natural mineral waters and constituting glairine (*q. v.*). [B, 244 (a, 27).]—**Unformed f., Unorganized f.** Fr., *f. inorganique*, *f. non figuré.* Ger., *unorganischer Gährungsstoff*, *ungeformtes F.* See *Soluble f.*—**Urinary f.** Fr., *f. urinaire.* Ger., *Harnf.* See *Ammoniacal f.*—**Vegetable f.** Fr., *f. végétal.* Ger., *pflanzlicher Gährungsstoff.* A f. obtained from a vegetable; as diastase, papayotin, jequirity, etc. [a, 34.]—**Verdauungsf** (Ger.). See *Digestive f.*—**Vinegar f.** See Saccharomyces *mycoderma*, Bacillus *aceti*, Bacterium *aceti*, and Bacterium *xylinum.*—**Vinous f.** See *Alcoholic f.*—**Viscous f.** The f. causing viscous fermentation (*q. v.*). [B, 246.]—**Zuckerbildendes F.** (Ger.). See *Amylolytic f.*

FERMENTABLE, adj. Fu^{6}r-me^{2}nt'a^{2}-b'l. Ger., *gährungsfähig.* Capable of fermentation. [a, 27.]

FERMENTAL, adj. Fu^{4}r-me^{2}nt'a^{2}l. Having power to cause fermentation. [L, 56 (a, 27).]

FERMENTATION, n. Fu^{6}r-me^{2}nt-a'shu^{3}n. Gr., ζύμωσις. Lat., *fermentatio.* Fr., *f.* Ger., *Gährung.* 1. The process of decomposition, or of conversion, effected by a ferment. 2. A subjecting to the action of a ferment. [K; a, 17.] 3. In ancient medicine, a peculiar disturbance of the animal fluids thought to be analogous to the f. of wine, etc. [B, 52.]—**Acetic-acid f., Acetic f., Acetous f.** Fr., *f. acétique.* Ger., *Essigsäuregährung.* The f. by which alcohol is converted into acetic acid. It consists essentially in a process of oxidation and dehydration as shown in the equation $C_2H_6O + O_2 = C_2H_4O_2 + H_2O$, and is produced by various organized ferments, especially by the *Bacillus aceti*, the *Bacterium aceti*, and the *Bacterium xylinum.* Acetic acid is also developed by fermentative processes in the course of putrefaction and as a result of the fermentative decomposition of citric, mucic, quinic, tartaric, and glyceric acids, effected by various *Bacilli.* [B, 3, 238.]—**Alcoholic f.** Fr., *f. alcoolique*, *f. vineuse.* Ger., *alkoholische Gährung.* A f. by which saccharine and other substances are converted into alcohol, occurring in the formation of all fermented alcoholic beverages. It consists essentially in a transformation of glucose into alcohol and carbon dioxide according to the equation $C_6H_{12}O_6 = 2C_2H_6O + 2CO_2$. In the f. of sugar-cane, beet-sugar, dextrin, starch, etc., these substances are first transformed into glucose by a process of hydration, effected either by the agency of a ferment (as diastase in the case of starch), or by ordinary chemical action. The further conversion of the glucose into alcohol is accomplished by the action of various species of *Saccharomyces* which require for their development a temperature of 0° C. to 35° C. and the presence of phosphates and certain nitrogenous substances. The whole of the glucose is not converted into alcohol, about 5 per cent. being converted into glycerin and succinic acid, while some of the higher alcohols, and certain fatty acids and compound ethers, are also developed, constituting the fusel-oils. A peculiar form of alcoholic f. is that by which glycerin is converted into alcohol by the action of the *Bacillus fitzianus.* [B, 3, 4, 238; Dubourg and Gayon, "Compt. rend.," ciii, Nov. 8, 1886; "Ctrlbl. f. Bacteriol. u. Parasitenk.," 1887, i, 1, p. 168.]—**Alkaline f.** See *Urinary f.*—**Ammoniacal f.** Fr., *f. de l'ammoniaque* (2d def.), *f. ammoniacale.* Ger., *Ammoniakgährung.* 1. See *Urinary f.* 2. The formation by f. of ammonia, nitrites, and nitrogen, as a result of the decomposition of nitrates; occurring in the soil and effected by various microbes. 3. See *Nitrous f.* [B, 238.]—**Amygdalous f., Benzoic f.** The decomposition of amygdalin into glucose, hydrocyanic acid, and oil of bitter almonds, consisting essentially in a process of hydration according to the equation $C_{20}H_{27}NO_{11} + 2H_2O = C_7H_6O + HCN + 2C_6H_{12}O_6$; due to the presence of emulsin (*q. v.*). [B, 4, 81; B, 244 (a, 27).]—**Butyric-acid f., Butyric f., Butyrous f.** Fr., *f. butyrique.* Ger., *Buttersäuregährung.* A f. by which butyric acid is developed from the decomposition of inulin, starch, dextrin, saccharose, lactose, glucose, glycerin, and the lactates. It is effected by the agency of various microbes (see under *Butyric* ferment).—**Caseous f.** Fr., *f. caséeuse.* A f. by which the conversion of milk into cheese is effected; consisting essentially in a coagulation of the casein which, after being compressed, constitutes the essential part of cheese. The f. is effected by the milk-curdling f. (*q. v.*). [B.]—**Cellulosic f.** Fr., *f. cellulosique.* 1. Of E. Durin, a peculiar variety of f. occurring in beet-juice, and resulting in the formation of a white, hard substance resembling cellulose. The same effect is also produced by the action of the organisms deposited from beet-juice upon a solution of beet-molasses. [B, 2 (a, 27).] 2. See *F. of cellulose.*—**Dextran-f.** Ger., *Dextrangährung.* A f. produced by the *Leuconostoc mesenterioides*, by which glucose is transformed first into invertin and then into dextran. It is formed in the course of the viscous and lactic f's. [B, 3, 238.]—**Dextrinic f.** A f. by which starch is converted into dextrin; effected by diastase, emulsion, ptyalin, etc. [B, 108; B, 244 (a, 27).]—**Direct f.** Fr., *f. vraie*, *f. à ferments organisés.* Ger., *Gährung durch organisirte (geformte) Fermente.* F. produced by the direct action of a living organism (organized ferment) which lives and develops among the products of fermentation. [Pasteur (B, 93); B, 244.]—**Elective alcoholic f.** Fr., *f. alcoolique élective.* The unequal action of a ferment on different forms of sugar mixed in solution; attributed to an elective property in the ferment. [E. Bourquelot, "Prog. méd.," June 13, 1885, p. 486.]—**Fæcal f.** A decomposition of fæcal matter retained in the body. [Routh, "Assoc. Jour.," June 28, 1856, p. 540 (a, 34).]—**Fat f.** Fr., *f. des corps gras.* Ger., *Fettgährung.* A f. causing the decomposition of fats; effected by the fat-ferments (*q. v.*). [K.]—**F. ammoniacale** (Fr.). See *Ammoniacal f.*—**F. amyl.** See under Amyl.—**F. caséeuse** (Fr.). See *Caseous f.*—**F. des corps gras** (Fr.). See *Fat f.*—**F. étherée** (Fr.). The process by which ether is produced and which formerly was conceived by Berzelius and Mitscherlich to be due to catalysis. [A, 301.]—**F. intestinale** (Fr.). A f. produced in the intestinal tract by microbes, giving rise to certain toxic substances. [Roger, "Gaz. des. hôp.," March 31, 1888, p. 353 (a, 34).]—**F. of cellulose.** Ger., *Cellulosevergährung.* 1. See *Marsh-gas f.* 2. A f. of cellulose, the chief products of which are carbon dioxide and hydrogen, with by-products consisting of hydrogen sulphide, aldehyde, and isobutyric and acetic acids; occurring when cellulose is infused in an alkaline extract of meat. [B, 238.]—**F. of glycerin.** Ger., *Glycerinvergährung.* A f. by which glycerin is decomposed into (*a*) alcohol with caproic, butyric, and acetic acids by the action of the *Bacillus fitzianus*; (*b*) alcohol with formic and succinic acids by the action of small, slender, rod-shaped organisms; (c) butyl alcohol by the action of a motile sporophorous *Bacillus* upon a mixture of glycerin and a hay-infusion; (*d*) butyric acid with alcohol and succinic acid by the action of the *Bacillus pyocyaneus.* [B, 238.]—**F. of the blood, F. of the humors.** Fr., *f. du sang*, *f. des humeurs.* A hypothetical condition of the blood or of the humors compared to that produced by f. [B, 52.]—**F. panaire** (Fr.), **F. panique** (Fr.). The variety of alcoholic f. which takes place in the process of making bread. [A. Girard, "Union méd.," Sept. 26, 1885, p. 515; B, 52 (a, 27), 93.]—**F. protéique** (Fr.). The f. by which proteids are decomposed; due to the action of an albuminosic ferment (*q. v.*). [B, 244 (a, 27).]—**F. spiritueuse, F. vineuse** (Fr.). See *Alcoholic f.*—**Formic-acid f.** Ger., *Ameisensäuregährung.* A f. by which formic acid is generated; produced by the decomposition of calcium glycerate by certain *Bacilli*, and also as an accompaniment of putrefactive processes. [B, 238.]—**Gallic-acid f.** A form of f. occurring in vegetable tissues, under the influence of which tannic acid is converted into gallic acid. The conversion is a process of hydration, as represented by the formula $C_{14}H_{10}O_9 + H_2O = 2C_7H_6O_5$. It is effected by the presence of a ferment probably identical with pectose. [B, 5.]—**Glairy f.** See *Viscous f.*—**Gluconic-acid f.** Ger., *Gluconsäuregährung.* A f. by which gluconic acid is produced from the decomposition of lactose; effected by a microbe resembling the *Mycoderma aceti.* [Boutroux (B, 238).]—**Glucosic f.** See *Viscous f.*—**Glycerin f.** Ger., *Glyceringährung* (1st def.), *Glycerinvergährung* (2d def.). 1. The f. by which glycerin is formed from fats. See *Fat f.* and *Fat* ferment. 2. A f. by which glycerin is decomposed. See *F. of glycerin.* [B.]—**Gummic f.** See *Viscous f.*—**Indirect f.** Fr., *fausse f.*, *f. à ferments solubles* (ou *non organisés*). Ger., *Gährung durch lösliche* (oder *chemische*, oder *ungeformte*) *Fermente.* F. produced as the indirect result of the action of living organisms; *i. e.*, f. produced by certain soluble nitrogenous principles (unorganized ferments) which are themselves the products of the physiological activity of a living organism. [Pasteur (B, 93); B, 244.]—**Lactic (-acid) f., Lactous f.** Fr., *f. lactique.* Ger., *Milchsäuregährung.* The f. by which lactic acid is developed from glucose, lactose, alcohol, etc.; effected by the agency of the lactic ferments (*q. v.*), in the presence of nitrogenous matters. It consists in a decomposition of 1 molecule of glucose (either occurring ready

formed or formed from the lactose, etc., by hydration) into 2 molecules of lactic acid according to the equation $C_6H_{12}O_6 = 2C_3H_6O_3$. [B, 3, 238.]—**Mannitic f.** See *Viscous f.*—**Marsh-gas f.** Ger., *Sumpfgasgährung.* A f. by which cellulose is converted into marsh-gas and carbon dioxide, with by-products consisting of hydrogen sulphide, aldehyde, and acetic and isobutyric acids. It occurs in the intestinal canal of ruminants and in the soil of marshes, fields, and forests; and may be produced artificially by infusing cellulose in a neutral extract of meat. [B, 238.]—**Mucic f.** See *Viscous f.*—**Mucor f.** Alcoholic f. set up in a saccharine solution by the presence of *Mucor mucedo* (ordinary mold). Such a f. has its optimum T. at 25° to 28° C., and is terminated very soon after the first formation of alcohol. [B, 2.]—**Mucous f.** Fr., *f. muqueuse.* Ger., *schleimige Gährung.* See *Viscous f.*—**Nitrous f.** Fr., *f. nitreuse.* A f. by which ammonia is oxidized to nitrous acid; occurring in the soil and effected by various microbes. [Heræus (B, 238).]—**Pancreatic f.** Fr., *f. pancréatique.* The digestive changes in the food effected by the three active elements of the pancreatic juice. [a, 27.]—**Pathological f.** The transformations effected in the physiology and chemistry of the animal organism by living organic ferments (micro-organisms). [a, 34.]—**Pectic f., Pectous f.** Fr., *f. pectique.* A f. causing the transformation of pectose into pectin, parapectin, and metapectin, with subsequent change to pectosic and pectic acids. [a, 27.]—**Physiological f.** Fr., *f. physiologique.* A f. that is produced in an animal organism by the soluble ferments; it includes the transformation of starches into maltose, of maltose into glucose, of proteids into peptones, etc. [a, 34.]—**Propionic-acid f.** Fr., *f. propionique.* Ger., *Propionsäuregährung.* A f. by which propionic acid is developed; effected by the decomposition of glucose by the *Bacillus cavicidus*, of lactic acid by a special *Bacillus*, and of tartaric acid. [B, 238.]—**Putrefactive f., Putrid f.** Fr., *f. putride.* See PUTREFACTION.—**Saccharine f., Saccharous f.** See *Alcoholic f.*—**Salivary f.** Fr., *f. salivaire.* The f. by which starch is converted into sugar by ptyalin. It is most active at the temperature of the body, and ceases at 70° C. [B, 244 (a, 27).]—**Sinapic f., Sinapous f.** Fr., *f. sinapique.* The f. by which the myronate contained in mustard is converted by myrosin into grape sugar, mustard-oil, and an acid sulphate according to the equation $C_{10}H_{18}NKS_2O_{10} = C_6H_{12}O_6 + C_3H_5NCS + KHSO_4$. [B, 4.]—**Spiritous f.** See *Alcoholic f.*—**Succinic f.** Fr., *f. succinique.* Ger., *Bernsteinsäuregährung.* A f. by which succinic acid is developed. This occurs regularly as an accompaniment of alcoholic f. by decomposition of a part of the glucose; and succinic acid is also formed as a result of putrefactive processes and by the direct f. of many organic acids, especially malic acid. [B, 3, 238.]—**Tannic f., Tannous f.** See *Gallic-acid f.*—**True f.** Fr., *f. vraie.* See *Direct f.*—**Urinary f., Urinous f.** Fr., *f. urinaire.* Ger., *Harngährung.* A f. occurring in the alkaline decomposition of urine, by which urea is split up into ammonia and carbon dioxide according to the equation $CON_2H_4 + H_2O = 2NH_3 + CO_2$. This f. is produced by the *Bacillus ureæ.* [B, 238.]—**Vinous f.** See *Alcoholic f.*—**Viscous f.** Fr., *f. visqueuse, f. glaireuse.* Ger., *schleimige Gährung, Mannitgährung.* A f. by which glucose is converted into mannite, carbon dioxide, and dextran. It renders saccharine liquids viscid A similar f. occurs in wine, causing the latter to become ropy. It is due to the *Micrococcus viscosus.* [B, 3. 238, 246.]

FERMENTED, adj. Fu⁵r-me²nt'e²d. Having undergone fermentation. [a, 27.]

FERMENTESCENT, adj. Fu⁵r-me²nt-e²s'e²nt. Becoming fermented. [a, 27.]

FERMENTESCIBLE, n. Fu⁵r-me²nt-e²s'i²-b'l. Capable of fermentation. [L, 56 (a, 30).]

FERMENTOLEUM (Lat.), n. n. Fu⁵r(fe²r)-me²nt-ol(o²l)'e²-u³m(u⁴m). From *fermentum*, a ferment, and *oleum*, oil. An obsolete term for amyl alcohol. [B, 270.]

FERMENTUM (Lat.), n. n. Fe²r-me²nt'u³m(u⁴m). 1. See FERMENT. 2. Of the U. S. Ph., 1870, see *Beer* YEAST.—**Cataplasma fermenti (cerevisiæ)** [Br. Ph.]. Fr., *cataplasme avec la levûre de bière.* Ger., *Hefenumschlag.* A yeast poultice; made by mixing 6 fl. oz. of beer yeast with 6 fl. oz. of water heated to 100° F., stirring in 14 ounces of flour, and placing the mass near the fire to ferment; applied to unhealthy and gangrenous ulcers. [B, 81 (a, 21).] **Cataplasma fermenti panis theriacale.** See CATAPLASMA *ad singultum.*—**F. album.** An alchemical name for silver. [B, 50.]—**F. butyricum.** See *Butyric* FERMENT.—**F. cerevisiæ.** See *Cerevisiæ f.*—**F. morbi.** See *Morbific* FERMENT.—**F. pressum.** Compressed yeast. [B, 81 (a, 21).]—**Fermenta ventriculi.** See FERMENTS *of the stomach.*

FERN, n. Fu⁵rn. A.-S., *fearn.* Lat., *filix.* Fr., *fougère.* Ger., *Farn, Farnkraut.* A general name for plants of the order *Filices.* [B, 275 (a, 24).]—**Adder's f.** The *Polypodium vulgare.* [B, 275 (a, 24).]—**Alpine bladder-f.** The *Cystopteris alpina.* [B, 275 (a, 24).]—**American maiden-hair-f.** The *Adiantum pedatum.* [B, 275 (a, 24).]—**American wood-f.** The genus *Aspidium.* [B, 275 (a, 24).]—**Ash-leaf-f.** The *Marattia fraxinea.* [B, 275 (a, 24).]—**Australian tree-f.** The *Dicksonia antarctica.* [B, 275 (a, 24).]—**Balsam of f.** See *Oleoresina* FILICIS.—**Basket-f.** The *Aspidium filix mas.* [B, 275 (a, 24).]—**Beech-f.** The *Polypodium phegopteris.* [B, 275 (a, 24).]—**Bird's-foot f.** 1. The *Pellæa ornithopus.* [B, 275 (a, 24).] 2. See ALLOSORUS *crispus.*—**Bird's-nest-f.** The *Asplenium serratum.* [B, 275 (a, 24).]—**Black oak-f.** The *Adiantum capillus Veneris.* [A, 505 (a, 21); B, 275 (a, 24).]—**Bladder-f.** The genus *Cystopteris* and the *Cystopteris fragilis.* [A, 505 (a, 21); B, 34, 275 (a, 24).]—**Blunt shield-f.** The *Aspidium filix mas.* [a, 24.]—**Boss-f.** A name for various species of *Nephrodium.* [B, 275 (a, 24).]—**Bracken-f., Brake-f.** 1. The *Pteris aquilina.* 2. The *Aspidium filix mas.* [A, 505 (a, 21); B, 275 (a, 24).]—**Branching maiden-hair-f.** The *Adiantum formosum.* [B, 275 (a, 24).]—**Bristle-f.** The genus *Trichomanes* and the *Trichomanes radicans.* [A, 505 (a, 21); B, 275 (a, 24).]—**Brittle bladder-f., Brittle cup-f.** The *Cystopteris fragilis.* [a, 24.]—**Buckler-f.** The genus *Lastrea.* [B, 275 (a, 24).]—**Californian chain-f.** The *Woodwardia radicans.* [B, 275 (a, 24).]—**Chignon-f.** The *Cibotium regale.* [B, 275 (a, 24).]—**Cinnamon f.** The *Osmunda cinnamomea.* [B, 34, 275 (a, 24).]—**Cliff brake-f.** The genus *Pellæa.* [B, 275 (a, 24).]—**Climbing polypody-f.** The *Niphobulus heteractis.* [B, 275 (a, 24).]—**Climbing shield-f.** The *Aspidium capense.* [B, 275 (a, 24).]—**Cloak-f.** The genus *Nothochlæna.* [B, 275 (a, 24).]—**Coal f.** The *Callipteris* SULLIVANTI.—**Comb-f.** The genus *Schizæa.* [B, 275 (a, 24).]—**Common f.** The *Pteris aquilina.* [A, 505 (a, 21).]—**Conjuror of Chalgrave's f.** The *Puccinia anemones.* [B, 19, 275 (a, 24).]—**Creeping oak-f.** The *Dryopteris repens.* [B, 307 (a, 24).]—**Crisped hart's-tongue-f.** The *Scolopendrium crispum.* [B, 275 (a, 24).]—**Culcit-f.** See *Cushion-f.*—**Curled rock brake-f.** The *Allosorus crispus.* [B, 275 (a, 24).]—**Cushion-f.** The *Dicksonia (Balantium) culcita.* [B, 275 (a, 24).]—**Darsham f.** The *Aspidium cristatum.* [A, 505 (a, 21); B, 275 (a, 24).]—**Deer-f.** The *Lomaria spicant.* [B, 275 (a, 24).]—**Eagle-f.** The *Pteris aquilina.* [B, 275 (a, 24).]—**East Indian elk's-horn-f.** The *Platycerium biforme.* [B, 275 (a, 24).]—**Edible f.** The *Pteris esculenta.* [B, 275 (a, 24).]—**Elk's-horn-f.** The *Platycerium alicorne.* [B, 275 (a, 24).]—**English maiden-hair-f. of New Zealand.** The *Adiantum æthiopicum.* [B, 275 (a, 24).]—**Ern f.** The *Pteris aquilina.* [A, 505 (a, 21).]—**Ever f.** The *Polypodium vulgare.* [B, 275 (a, 24).]—**Female f.** See *Ern f.*—**F.-bush.** The genus *Comptonia*, especially the *Comptonia asplenifolia.* [B, 19, 34, 275 (a, 24).]—**Filmy f.** A name for various species of *Hymenophyllum, Todea*, and *Trichomanes.* [B, 275 (a, 24).]—**Finger-f.** The *Phyllitis laciniata* and the *Asplenium ceterach.* [B, 275, 307 (a, 24).]—**Florida ribbon-f.** The *Vittaria lineata.* [B, 275 (a, 24).]—**Flowering f.** The *Osmunda regalis.* [B, 34, 275 (a, 24).]—**Golden f.** The genus *Acrostichum.* [B, 34 (a, 24).]—**Grape-f.** The genus *Botrychium.* [B, 34, 275 (a, 24).]—**Gray f.** The *Aspidium furcatum.* [a, 24.]—**Ground-f.** The *Aspidium thelypteris.* [B, 275 (a, 24).]—**Grove f.** The genus *Alsophila.* [B, 275 (a, 24).]—**Guinea elk's-horn-f.** The *Platycerium stemmaria.* [B, 275 (a, 24).]—**Hard f.** The *Lomaria spicant.* [B, 275 (a, 24).]—**Hare's-foot-f.** 1. The *Trichomanes radicans.* 2. The genus *Davallia*, especially the *Davallia canariensis.* [B, 185, 275 (a, 24).]—**Hartford f.** The *Lygodium palmatum.* [B, 275 (a, 24).]—**Hart's-tongue-f.** See SCOLOPENDRIUM *officinarum.*—**Heath-f.** The *Aspidium oreopteris.* [B, 275 (a, 24).]—**Herring-bone f.** The *Lomaria spicant.* [B. 275 (a, 24).]—**Holly-f.** The *Aspidium lonchitis.* [B, 275 (a, 24).]—**Killarney f.** The *Trichomanes radicans.* [B, 275 (a, 24).]—**King-f.** The *Osmunda regalis.* [B, 275 (a, 24).]—**Ladder-f.** The *Nephrolepis cordifolia.* [B, 275 (a, 24).]—**Lady-f.** The *Asplenium filix fœmina.* [B, 34, 275 (a, 24).]—**Limestone-f.** The *Polypodium calcareum.* [B, 275 (a, 24).]—**Lip-f.** The genus *Cheilanthes.* [B, 34, 275 (a, 24).]—**Liquid extract of f.** See *Extractum* FILICIS *liquidum.*—**Liquid extract of male f.** See *Oleoresina* ASPIDII.—**Lobed prickly shield-f.** The *Polystichum lobatum.* [B, 275 (a, 24).]—**Maiden-hair f.** The *Adiantum capillus Veneris* and the *Adiantum pedatum.* [A, 505 (a, 21).]—**Male f.** See ASPIDIUM *filix mas.*—**Marsh-f.** The *Aspidium thelypteris.* [A, 505 (a, 21).]—**Meadow-f.** See *Sweet f.*—**Moon-f.** The *Botrychium lunaria.* [B, 275 (a, 24).]—**Moss-f.** The *Polypodium dryopteris.* [B, 275 (a, 24).]—**Mountain f.** The *Aspidium oreopteris.* [A, 505 (a, 21).]—**Mule-f.** The *Hemionitis palmata* and the *Scolopendrium hemionitis.* [B, 275 (a, 24).]—**New Zealand gray tree-f.** The *Cyathea medullaris.* [B. 275 (a, 24).]—**Northern hard f.** The *Blechnum boreale.* [a, 24.]—**Oak-f.** 1. The *Polypodium dryopteris*; formerly the *Polypodium vulgare.* 2. The *Cystopteris fragilis.* 3. In Norfolk, England, sometimes the *Pteris aquilina.* [A, 505 (a, 21); B. 275 (a, 24).]—**Oil of f.** See *Oleoresina* FILICIS, under FILIX.—**Oleoresin of male f.** See *Oleoresina* ASPIDII.—**Oregon rock brake-f.** The *Allosorus acrostichoides.* [B, 275 (a, 24).]—**Ostrich f.** See STRUTHIOPTERIS *germanica.*—**Parsley-f.** The *Allosorus crispus.* [B, 275 (a, 24).]—**Petty f.** The *Adiantum nigrum.* [A. 505 (a, 21).]—**Pod-f.** The *Peratopteris thalictroides* and the *Ellobocarpus oleraceus.* [B, 275 (a, 24).]—**Polypody f.** The genus *Polypodium.* [B, 275 (a, 24).]—**Prickly shield-f.** The *Aspidium aculeatum.* [B, 275 (a, 24).]—**Queensland elk's-horn-f.** The *Platycerium grande.* [B. 275 (a, 24).]—**Rock brake-f.** The *Allosorus crispus.* [B, 275 (a, 24).]—**Rock f.** See POLYPODIUM *vulgare.*—**Royal f.** The *Osmunda regalis.* [a, 24.]—**Rue-leaved f.** The genus *Gymnogramma.* [B, 275 (a, 24).]—**Rush-f.** The genus *Schizæa.* [B. 275 (a, 24).]—**Scale-f., Scaly f.** The *Asplenium ceterach.* [B, 19, 275 (a, 24).]—**Scented f.** The *Aspidium oreopteris.* [A, 505 (a, 21).]—**Sea-f.** The *Asplenium marinum.* [B. 307 (a, 27).]—**Sensitive f.** The *Onoclea sensibilis.* [B, 34, 275 (a, 24).]—**Shield-f.** The genus *Aspidium.* [B, 34, 275 (a, 24).]—**Small oak-f.** The *Polypodium vulgare* (the *Polypodium dryopteris* of the old herbalists). [a, 24.]—**Snake-f.** 1. The *Lomaria spicant.* 2. The *Osmunda regalis.* [A, 505 (a, 21); B, 275 (a, 24).]—**Spider-f.** The *Pteris serrulata.* [B, 275 (a, 24).]—**Spleenwort-f.** See SPLEENWORT.—**Stag's-horn f.** The *Platycerium grande*, etc. [B, 275 (a, 24).]—**Stone-f.** The *Asplenium ceterach* and the *Filix saxatilis.* [B, 275, 307 (a, 24).]—**Sweet f.** The *Comptonia asplenifolia* and the *Myrrhis odorata.* [B, 275 (a, 24).]—**Sword-f.** The genus *Xiphorpteris.* [B, 275 (a, 24).]—**Tall hart's-tongue f.** The *Scolopendrium erectum.* [B, 275 (a, 24).]—**Tasmanian cup-f.** The *Cyathea arborea.* [B, 275 (a, 24).]—**Tasmanian tree-f.** The *Dicksonia antarctica.* [B, 275 (a, 24).]—**Toothed bladder-f.** The *Cystopteris dentata.* [B, 275 (a, 24).]—**Tree-f.** A name for various species of *Dicksonia, Alsophila*, and *Cyathea.* [B, 275 (a, 24).]—**Virginian rattlesnake-f.** The *Botrychium virginicum.* [B, 275 (a, 24).]—**Walking American f.** The *Lycopodium alopecuroides.* [B. 275 (a, 24).]—**Walking leaf-f.** The *Camptosorus rhizophyllus.* [B, 275 (a, 24).]—**Wall-f.** The *Polypodium vulgare.* [B, 275 (a, 24).]—**Water-f.** The *Osmunda regalis.* [B, 275 (a, 24).]—**White oak-f.** The *Cystopteris fragilis* and the *Dryopteris alba.* [A, 505 (a. 21); B. 307 (a, 24).]—**Wood-f.** The *Polypodium vulgare.* [B. 275 (a, 24).]—**Woolly cloak-f.** The *Nothochlæna distans.* [B, 275 (a, 24).]

FERNAMBUKHOLZ (Ger.), n. Fe2rn-a3m-buk'ho3lts. The wood of *Cæsalpinia echinata.* [L, 135 (a, 14).]—**Gelbes F.** The wood of *Cæsalpinia crista.* [B, 180 (a, 24).]—**Rothes F.** The wood of *Cæsalpinia brasiliensis.* [B, 180 (a, 24).]

FERNFRECKLE, n. Fu8rn'fre2k'l. See FERNTICLE.

FERNGALE, n. Fu8rn'gal. The *Comptonia asplenifolia.* [B, 81 (a, 21).]

FERNPUNKT (Ger.), n. Fe2rn'punkt. In optics, the punctum remotum. [L, 57.]

FERNSEHEN (Ger.), n. Fe2rn'za-he2n. See HYPERMETROPIA.

FERNSICHTIGKEIT (Ger.), n. Fe2rn'zi2ch2t-i2g-kit. Far-sightedness (hypermetropia). [L, 80.]

FERNSMUND, n. Fu8rnz'mu2nd. The *Osmunda regalis.* [A, 505 (a, 21.]

FERNTICLE, n. Fu8rn'ti2k'l. A provincial name for a freckle resembling the seed of a fern. [G, 30.]

FÉROGOSSE (Fr.), n. Fa-ro-go2s. A species of palm growing in Madagascar, probably belonging to the genus *Areca*; the sprouts are edible. [B, 88, 121 (a, 24).]

FEROLIA (Lat.), n. Fe2(fa)-rol'i2-a3. Fr., *férolie, férole.* A genus of artocarpaceous or, according to some, rosaceous trees found in Guiana. [A, 385.]—**F. guianensis** [Aublet], **F. variegata** [Lamarck]. Fr., *férole de la Guiane, bois de férole* (ou *marbré,* ou *satiné*). Atlas-wood; a species found in Guiana. The inner bark is used in ptisans and baths. [B, 173, 180 (a, 24).]

FÉRON (Fr.), n. Fa-ro2n2. A place near Avesnes, in the department of Le Nord, France, where there are gaseous springs containing sodium chloride, calcium sulphate and carbonate, and magnesium sulphate. [L, 87, 105, 135 (a, 14).]

FERONIA (Lat.), n. f. Fe2(fa)-ro'ni2-a3. Fr., *féronie.* An East Indian genus of aurantiaceous trees. [B, 172, 173, 185 (a, 24).]—**F. asinifolia.** See *F. elephantum.*—**F. balanghas.** The *Sterculia balanghas.* [B, 173 (a, 24).]—**F. elephantum.** Fr., *f. géant.* Ger., *Elephantenapfel.* Elephant-wood (or -apple), a species having an edible fruit of the size of an apple, from which a jelly is made. A gum obtained from the stem is used in dysentery and diarrhœa. The leaves smell like anise, and are used as a carminative in the intestinal complaints of children. [B, 172, 173, 185 (a, 24).]—**F. pellucida.** See *ÆGLE marmelos.*

FERRAMENTUM (Lat.), n. n. Fe2r-ra3-me2nt'u3m(u4m). From *ferrum,* iron. Fr., *ferrament.* Ger., *Eisenwerk.* Any instrument made of iron or steel, especially an obstetrical or surgical instrument. [L, 94 (a, 21).]

FERRANDIA (Lat.), n. f. Fe2r-ra2n(ra3n)'di2-a3. The *Cocculus ferrandianus.* [B, 121 (a, 24).]

FERRARIA (Lat.), n. f. Fe2r-ra(ra3)'ri2-a3. Fr., *ferrarie.* 1. Of the old pharmacists, the *Scrophularia aquatica.* [B, 97 (a, 21).] 2. A genus of the *Iridieæ,* tribe *Moræeæ.* [B, 42, 121 (a, 24).]—**F. cathartica, F. purgans.** Fr., *f. cathartique, f. purgatif.* Port., *batatinha do campo.* Species of *F.* (2d def.) found in Brazil. The bulbs are used as a purgative. [B, 173, 180 (a, 24).]

FERRARIUS (Lat.), adj. Fe2r-ra(ra3)'ri2-u3s(u4s). See CHALYBEATE.

FERRATE, n. Fe2r'at. A salt of ferric acid. [B.]

FERRATED, adj. Fe2r'at-e2d. Lat., *ferratus.* Fr., *ferré.* Ger., *eisenhaltig.* Containing or combined with iron. [B.]

FERRATUS (Lat.), adj. Fe2r-rat(ra3t)'u3s(u4s). 1. See FERRATED. 2. Armed or fortified with iron or steel (said of instruments). [L, 94 (a, 21).]

FERREIRA (Sp.), n. Fe2r-ra-e'ra3. A place in the province of Murcia, Spain, where there are earthy ferruginous springs. [A, 319 (a, 21).]

FERREIREA (Lat.), n. f. Fe2r-re2-er'e2-a3. A genus of leguminous trees of the tribe *Sophoreæ,* made by Allemão. [B, 42 (a, 24).]—**F. spectabilis** [Allemão]. Port., *angelim pedra.* The only species of the genus. A Brazilian tree which exudes *resina d'Angelim pedra* or angelin resin (*q. v.* under ANGELIN) which contains, according to Gintl (1868), much *angelin* or *rhatanhin,* and has been used in intermittent fevers. [L, 78; B, 18, 42 (a, 24).]

FERREOLA (Lat.), n. f. Fe2r-re(re2)'ol(o2l)-a3. A section of the genus *Maba.* [B, 42, 121 (a, 24).]—**F. buxifolia.** A small tree found in the East Indies, having a pulpy and edible berry. [B, 172 (a, 24).]

FERREO-BORUSSICUS (Lat.), adj. Fe2r''re2-o(o3)-bo(bo2)-ru3s(ru4s)'si2-ku3s(ku4s). See FERROSO-HYDROCYANICUS.

FERRET. Fe2r'e2t. See PUTORIUS *furo.*

FERREUS (Lat.), adj. Fe2r're2-u3s(u4s). See FERRUGINOUS.

FERREUX (Fr.), adj. Fe2r-ru8. See FERROUS.

FERRI A CAVAN, n. In Provence, the *Hippocrepis unisiliquosa.* [B, 121 (a, 24).]

FERRIACETAT (Ger.), n. Fe2r-re a3-tse3t-a3t'. Iron (ferric) acetate. [a, 27.]—**F. lösung.** See *Liquor* FERRI *acetatis.*

FERRIAMMONCITRAT (Ger.), n. Fe2r-re-a3m-mon-tset-ra3t'. Citrate of iron and ammonium. [B, 81, 270 (a, 27).]

FERRIAMMONSULFAT (Ger.), n. Fe2r-re2-a3m-mon-zul-fa3t'. Sulphate of iron and ammonium. [B, 81 (a, 27).]

FERRIAMMONTARTRAT (Ger.), n. Fe2r-re-a3m-mon-ta3r-tra3t'. Tartrate of iron and ammonium. [B, 81 (a, 27).]

FERRIC, adj. Fe2r'i2k. Lat., *ferricus.* Fr., *ferrique.* Of, belonging to, or containing iron as a trivalent radicle. When so considered, iron has been given the name *ferricum,* Fe'''. In reality, however, it is probably quadrivalent in these compounds, the structural formula of f. chloride; for example, being $Cl_3{\equiv}Fe{-}Fe{\equiv}Cl_3$. [B.]—**F. acid.** Lat., *acidum ferricum.* Fr., *acide ferrique* (ou *de fer*). A dibasic acid, H_2FeO_4, known only through its salts, the ferrates. [B.]—**F. salts.** Fr., *sels ferriques.* Ger., *Eisenoxydsalze, Ferridsalz.* Salts having the general formula Fe_2R_{VI}, where R_{VI} is a sexvalent radicle or its equivalent. [B.] See under IRON.

FERRICHININCITRAT (Ger.), n. Fe2r-ri2-ken-en'tse-tra3t''. See IRON *and quinine citrate.*—**F.-Lösung.** See *Liquor* FERRI *et quininæ citratis.*

FERRICITRAT (Ger.), n. Fe2r-re-tse-tra3t'. Iron citrate. [B, 244, 270 (a, 27).]

FERRICO-CITRAS (Lat.), n. m. Fe2r''ri2k-o(o3)-si2t(ki2t)'-ra3s(ra3s). Gen., *-citrat'is.* Ferrous tartrate. [B, 98.]

FERRICOPOTASSIC, adj. Fe2r''i2-ko-po2t-a2s'i2k. Fr., *ferrico-potassique.* Containing both iron and potassium as basic radicles. [B, 52 (a, 27).]

FERRICO-TARTRAS (Lat.), n. m. Fe2r''ri2k-o(o3)-ta3rt'ra2s-(ra3s). Gen., *-trat'is.* Ferrous tartrate. [B. 98.]

FERRICUS (Lat.), adj. Fe2r'ri2k-u3s(u4s). Ferric; as a n., in the n., *ferricum,* a distinct variety of iron imagined to exist in ferric salts. [B.]

FERRICYANATE (Fr.), n. Fe2r-re-se-a3-na3t. See FERRICYANIDE.

FERRICYANHYDRIQUE (Fr.), adj. Fe2r-e-se-a3n-e-drek. Hydroferricyanic. [L, 49.]

FERRICYANIDE, n. Fe2r-i2-si'a2n-i2d(id). Lat., *ferricyanidum.* Fr., *ferricyanure.* Ger., *Eisencyanid, Ferridcyan.* A salt of hydroferricyanic acid; a salt having the general formula $R_v Fe_2(C_3N_3)_4$. [B.]—**Ferrous f.** Lat., *ferricyanidum ferrosum.* A dark-blue salt, $Fe_3(FeCn_6)_2$, precipitated from even dilute solutions of ferric salts by the f's. [Douglas and Prescott (a, 27).] See also *Turnbull's* BLUE.

FERRICYANOGEN, n. Fe2r-i2-si-a2n'o-je2n. Fr., *ferricyanogène.* The hexatomic radicle $Fe_2(C_3N_3)_4$, found in the ferricyanides. [B, 4, 93.]

FERRICYANURE (Fr.), **FERRICYANURET,** n's. Fe2r-re-se-a3-nu6r, fe2r-i2-si-a2n'u2-re2t. See FERRICYANIDE.

FERRIDES (Fr.), n. pl. Fe2r-red. In chemistry, a family of elements having iron as the type. [L, 41.]

FERRIÈRE (Fr.), n. Fe2r-re-e2r. A place in the department of Isère, France, where there is a sulphurous spring containing calcium. [A, 385.]

FERRIÈRES (Fr.), n. Fe2r-re-e2r. A place in the department of Loiret, France, where there is a spring containing iron, calcium, and magnesium sulphates. [L, 49, 105.]

FERRIFEROUS, adj. Fe2r-i2f'e2r-u2s. From *ferrum,* iron, and *ferre,* to bear. Fr., *ferrifère.* Ger., *eisentragend.* Containing or yielding iron. [L, 107.]

FERRIHYDRAT (Ger.), n. Fe2r-re-hu6d-ra3t'. See IRON *hydroxide.*—**F'pastillen.** See *Trochisci* FERRI.

FERRIHYPOPHOSPHIT (Ger.), n. Fe2r-re-hu6-po-fos-fet'. See IRON *hypophosphite.*

FERRIKALITARTRAT (Ger.), n. Fe2r-re-ka3-le-ta3r-tra3t'. See IRON *and potassium tartrate.*

FERRI - OXYCHLORIDES, n. pl. Fe2r-ri2-o2x-i2-klor'idz. Fr., *oxychlorures de fer.* Ger., *Ferrioxychloride.* Compounds of ferric chloride with variable quantities of ferric oxide. [B, 244 (a, 27).]

FERRIOXYD (Ger.), n. Fe2r-ri2-o2x-u6d'. See *Magnetic* IRON OXIDE.

FERRIPHOSPHAT (Ger.), n. Fe2r-re-fos-fa3t'. Ferric phosphate. [B, 270 (a, 27).]

FERRIQUE (Fr.), adj. Fe2r-rek. See FERRIC.

FERRISULFAT (Ger.), n. Fer-re-zul-fa3t'. Ferric sulphate. [B, 270 (a, 21).]—**F'lösung.** See *Liquor* FERRI *tersulphatis.*

FERRIVALERIANAT (Ger.), n. Fe2r-re-fa3-la-re-a3n-a3t'. Iron valerianate. [B, 81 (a, 21).]

FERRO-ALBUMINATE, n. Fe2r-ro-a2l-bu2'mi2n-at. See IRON *albuminate.*

FERRO-AMMONIA (Lat.), n. f. Fe2r''ro(ro3)-a2m(a3m)-mon'-i2-a3. See FERRO-AMMONIUM.—**F.-a. hydrochlorata.** Iron and ammonium chloride. [B.]

FERRO-AMMONIACALIS (Lat.), adj. Fe2r''ro(ro3)-a2m-(a3m)-mo-ni2-a2k(a3k)-a(a3)'li2s. Containing iron and ammonium. [B, 119.]

FERRO-AMMONIUM (Lat.), n. n. Fe2r''ro(ro3)-a2m(a3m)-mo'ni2-u3m(u4m). A supposed base consisting of a compound of iron and ammonium. [B.]—**F.-a. chloratum.** See IRON *and ammonium chloride.*—**F.-a. citricum.** See IRON *and ammonium citrate.*

FERRO-ARSÉNIFÈRE (Fr.), adj. Fe2r-ro-a3r-sa-ne-fe2r. From *ferrum,* iron, *arsenicum,* arsenic, and *ferre,* to bear. Composed of iron and arsenic. [Pisani (a, 27).]

FERROBROMID (Ger.), n. Fe2r-ro-brom-ed'. See IRON *bromide.*

FERRO-CALCAIRE (Fr.), adj. Fe2r-ro-ka3l-ka3r. Composed of calcium carbonate and iron carbonate. [Pisani (a, 27).]

FERROCARBONAT (Ger.), n. Fe2r-ro-ka3rb-o-na3t'. See IRON *carbonate.*—**Zuckerhaltiges F.** See FERRI *carbonas saccharatus.*

FERRO-CHINICUS (Lat.), adj. Fe2r''ro(ro3)-ki2n(che2n)'i2k-u3s(u4s). Containing both iron and quinine. [B.]

FERROCHLORIDE, n. Fe^{2}r-ro-klor'i^{2}d(id). Ger., *Eisenchlorür.* A compound of a radicle with ferrous chloride. [B.]

FERRO-CITRICUS (Lat.), adj. Fe^{2}r''ro(ro^3)-si^{2}t(ki^{2}t)'ri^{2}k-u^{3}s(u^{4}s). Citric, or in the state of citrate, and containing iron. [B.]

FERROCYANAMMONIUM (Ger.), n. Fe^{2}r-ro-tsu^6-a^{3}n-a^{3}m-mo'ni^2-um. Ammonium ferrocyanide.

FERROCYANATE, n. Fe^{2}r-ro-si'a^{2}n-at. Lat., *ferrocyanas.* See FERROCYANIDE.

FERROCYANATUS (Lat.), adj. Fe^{2}r''ro(ro^3) si(ku^6)-a^{2}n(a^{3}n)-a(a^3)'tu^{3}s(tu^{4}s). Containing or combined with iron and cyanogen. [B.]

FERRO-CYANE (Fr.), n. Fe^{2}r-ro-se-a^{3}n. See FERROCYANIDE.

FERROCYANEISEN (Ger.), n. Fe^{2}r-ro-tsu^6-a^{3}n'iz-e^{2}n. Ferric ferrocyanide. See IRON *ferrocyanide.*

FERROCYANHYDRATE, n. Fe^{2}r-o-si-a^{2}n-hi'drat. Fr., *f.* See HYDROFERROCYANIDE.

FERROCYANHYDRIC, adj. Fe^{2}r-o-si-a^{2}n-hi'dri^{2}k. Fr., *ferrocyanhydrique.* See HYDROFERROCYANIC.

FERROCYANIC, adj. Fe^{2}r-o-si-a^{2}n'i^{2}k. Fr., *ferro-cyanique.* Containing or composed of iron and cyanogen. [B.]—**F. acid.** Fr., *acide ferrocyanique.* See HYDROFERROCYANIC ACID.

FERROCYANIDE, n. Fe^{2}r-o-si'a^{2}n-i^{2}d(id). Lat., *ferrocyanidum, ferrocyanuretum, ferrocyanas.* Fr., *ferrocyanure, ferrocyane.* Ger., *Ferrocyan, Ferrocyanür, Eisencyanür.* A salt of hydroferrocyanic acid; a substance of the composition $R_{iv}(FeCn_6)$ or $R_{iv}Fe(C_3N_3)_2$, where R_{iv} is a quadrivalent radicle. The f's are either single or double, according as R_{iv} is a single or double radicle. [B.]

FERROCYANOGEN, n. Fe^{2}r-o-si-a^{2}n'o-je^{2}n. Fr., *ferro-cyanogène.* The tetratonic radicle, $Fe(C_3N_3)_2$, found in the ferrocyanides. [B, 4, 93.]

FERROCYANÜR (Ger.), n. Fe^{2}r-ro-tsu^6-a^{3}n-u^{6}r'. See FERROCYANIDE.

FERROCYANURE (Fr.), n. Fe^{2}r-ro-se-a^{3}n-u^{6}r. See FERROCYANIDE.—**F. ferrique** [Fr. Cod.]. Ferric ferrocyanide. See IRON *ferrocyanide.*

FERROCYANURET, n. Fe^{2}r-ro si-a^{2}n'u^2-re^{2}t. See FERROCYANIDE.

FERROCYANWASSERSTOFFSÄURE (Ger.), n. Fe^{2}r-ro-tsu^6-a^{3}n'va^{3}s''se^{2}r-sto^{3}f-zoir-e^2. Hydroferrocyanic acid. [B.]

FERROFERRIC, adj. Fe^{2}r-o-fe^{2}r'i^{2}k. Containing iron in both its ferrous and ferric combinations. [α, 27.]

FERROFERRIDCYANÜR (Ger.), n. Fe^{2}r-ro-fe^{2}r-ri^{2}d-tsu^6-a^{3}n-u^{6}r'. See IRON *ferricyanide.*

FERROFERRIOXYD (Ger.), n. Fe^{2}r-ro-fe^{2}r-ri^2-o^{2}x-u^{6}d'. See *Magnetic* IRON *oxide.*

FERRO-HYDRIODAS (Lat.), n. f. Fe^{2}r''ro(ro^3)-hid(hu^{6}d)-ri(ri^2)-od'a^{2}s(a^{3}s). Gen., *-odat'is.* Ferrous iodide. [B, 3, 270 (α, 27).]

FERRO-HYDROCYANAS (Lat.), n. f. Fe^{2}r''ro(ro^3)-hid(hu^{6}d)-ro(ro^3)-si(ku^6)'a^{2}n(a^{3}n)-a^{2}s(a^{3}s). Gen., *-anat'is.* Ferrous cyanide. [B; A, 385 (α, 27).]

FERROKALI (Lat.), **FERROKALIUM** (Lat.), n's n. Fe^{2}r''-ro(ro^3)-kal(ka^{3}l)'i(e), -i^2-u^{3}m(u^{4}m), fe^{2}r-rok'a^{2}l(a^{3}l)-i(e), -ro(ro^3)-ka^{2}l-(ka^{3}l)'i^2-u^{3}m(u^{4}m). A compound of iron (as a ferrous radicle) and potassium. [B.]—**Ferrokali tartaricum.** See IRON *and potassium tartrate.*—**Ferrokalium cyanatum** [Russ. Ph.]. Potassium ferrocyanide. [B, 95.]

FERROLAKTAT (Ger.), n. Fe^{2}r-ro-la^{3}k-ta^{3}t'. See IRON *lactate.*

FERRO-MAGNETIC, adj. Fe^{2}r-o-ma^{2}g-ne^{2}t'i^{2}k. Containing iron and having magnetic properties. [α, 27.]

FERRO-MANGANÉSIEN (Fr.), **FERRO-MANGANIQUE** (Fr.), adj's. Fe^{2}r-ro-ma^{3}n^2-ga^3-na-ze-a^{2}n^2, -nek. Containing iron and manganese. [α, 27.]

FERRO-MANGANUM LACTICUM (Lat.), n. n. Fe^{2}r-ro-(ro^3)-ma^{2}n(ma^{3}n^2)'ga^{2}n(ga^{3}n)-u^{3}m(u^{4}m) la^{2}k(la^{3}k)-ti^{2}k-u^{3}m(u^{4}m). Iron and manganese lactate. [A, 319 (α, 21).]

FERRO-OXALAT (Ger.), n. Fe^{2}r-ro-o^{2}x-a^{3}l-a^{3}t'. See IRON *oxalate.*

FERROPOTASSIC, adj. Fe^{2}r-ro-po-ta^{2}s'i^{2}k. Lat., *ferrosopotassicus.* Pertaining to the alloy of iron and potassium or to one of their double salts. [B, 244 (α, 27).]

FERRO-PROTOCARBONAS (Lat.), n. m., f., and n. Fe^{2}r-ro(ro^3)-pro-to(to^3)-ka^{3}rb-on'a^{2}s(a^{3}s). Gen., *-onat'is.* Ferrous carbonate. [B, 3 (α, 27).]

FERRO-PROTOSULPHAS VIRIDIS (Lat.), n. f. Fe^{2}r''ro-(ro^3)-pro-to(to^3)-su^{3}l(su^{4}l)'fa^{2}s(fa^{3}s) vi^{3}r(wer)'i^{2}d-i^{2}s. Green vitriol, ferrous sulphate. [B, 3 (α, 27).]

FERROPRUSSIATE, n. Fe^{2}r-o-pru^{3}s'i^2-at. See FERROCYANIDE.

FERROPRUSSIC, adj. Fe^{2}r-o-pru^{3}s'i^{2}k. Fr., *ferro-prussique.* See FERROCYANIC.

FERROSALINE, adj. Fe^{2}r-o-sa'lin. Containing iron. [α, 27.]

FERROSO-ALUMINIC, adj. Fe^{2}r-o''so-a^{2}l-u^2-mi^{2}n'i^{2}k. Ferrous and containing aluminium. [B.]

FERROSOFERRIC, adj. Fe^{2}r-o''so-fe^{2}r'ri^{2}k. Lat., *ferrosoferricus.* Fr., *ferroso-ferrique.* Containing iron both as a bivalent (ferrous) and a trivalent (ferric) radicle, as in f. oxide, $Fe_3O_4 = FeO.Fe_2O_3$. In reality, iron is probably quadrivalent in this class of compounds. [B, 6.]

FERROSO-HYDROCYANICUS (Lat.), adj. Fe^{2}r-ro''so-hi-(hu^6)-dro(dro^3)-si(ku^6)-a^{2}n(a^{3}n)'i^2-ku^{3}s(ku^{4}s). Containing iron and cyanogen; with the name of a base, the ferrocyanide of the base. [B, 119.]

FERROSOFERROUS, adj. Fe^{2}r-o''so-fe^{2}r'u^{3}s. Of a salt, compounded of two ferrous salts. [B.]

FERROSO-POTASSICUS (Lat.), adj. Fe^{2}r-ro'so(so^3)-po^{2}t-a^{2}s(a^{3}s)'si^{2}k-u^{3}s(u^{4}s). Fr., *ferroso-potassique.* Ferro-potassic. [B.]

FERROSO-QUINICUS (Lat.), adj. Fe^{2}r-ro''so(so^3)-kwi^{2}n'i^{2}k-u^{3}s(u^{4}s). Containing iron and quinine. [B.]

FERROSO-SODICUS (Lat.), adj. Fe^{2}r-ro''so(so^3)-sod'i^{2}k-u^{3}s-(u^{4}s). Fr., *ferroso-sodique.* Pertaining to the alloy of iron and sodium. [B, 244 (α, 27).]

FERROSULFAT (Ger.), n. Fe^{2}r-ro-zul-fa^{3}t'. Ferrous sulphate. [B.]—**Entwässertes F.** See FERRI *sulphas exsiccatus.*

FERROSUS (Lat.), adj. Fe^{2}r-ro'su^{3}s(su^{4}s). Ferrous; as a n., in the n., *ferrosum,* a distinct allotropic variety of iron imagined to exist in ferrous compounds. [B.]

FERRO-TARTRATE, n. Fe^{2}r-o-ta^{3}r'trat. Lat., *ferrico-* (seu *ferro-*) *tartras.* Ferrous tartrate. [B, 244.]

FERROUS, adj. Fe^{2}r'u^{3}s. Lat., *ferrosus.* Fr., *ferreux.* Of, belonging to, or containing iron (*ferrosum*) as a bivalent radicle. There is some reason to believe, however, that iron is quadrivalent in the f. compounds. The f. salts (Fr., *sels ferreuses*; Ger., *Eisenoxydulsalze, Ferrosalze*), accordingly, have the general formulæ FeR_{ii} and Fe_2R_{iv}, where R_{ii} and R_{iv} are respectively bivalent and quadrivalent radicles. [B.]

FERRUGINATED. Fe^{2}r-u^2'ji^{2}n-at-e^{2}d. Containing or having the properties of iron. [α, 27.]

FERRUGINEOUS, adj. Fe^{2}r-u^2-ji^{2}n'e^2-u^{3}s. See CHALYBEATE.

FERRUGINOSO-HYDROCYANICUS (Lat.), adj. Fe^{2}r-ru^2(ru)-ji^{2}n(gi^{2}n)-o''so(so^3)-hi(hu^6)-dro(dro^3)-si(ku^6)-a^{2}n(a^{3}n)'i^{2}k-u^{3}s-(u^{4}s). Ferruginous and containing, or derived from, hydrocyanic acid. [B.] See KALI *ferruginoso-hydrocyanicum.*

FERRUGINOUS, adj. Fe^{2}r-u^2'ji^{2}n-u^{3}s. Lat., *ferrugineus* (from *ferrugo,* iron rust). Fr., *ferrugineux, ferrugineuse.* Ger., *rostbraun, rostfarbig, eisenhaltig.* See CHALYBEATE.

FERRUGO (Lat.), n. f. Fe^{2}r-ru^2(ru)'go. Gen., *-ru'ginis.* Iron rust (ferric hydroxide). [B, 81 (α, 21).]

FERRULE, n. Fe^{2}r'u^{2}l. A metal band used to permanently bind broken or decayed teeth; or, in connection with a lever, to turn displaced teeth. [α, 34.]

FERRULING, n. Fe^{2}r'u^{2}l-i^{2}n^2. In dentistry, the process of attaching an artificial crown to a natural root by means of a gold ferrule. [E.]

FERRUM [U. S. Ph., Br. Ph., Fr. Cod., Gr. Ph., Russ. Ph.] (Lat.), n. n. Fe^{2}r'ru^{3}m(ru^{4}m). Fr., *fer métallique* [Fr. Cod.]. Ger., *Eisen.* It., *ferro.* Sp., *hierro* [Sp. Ph.]. Iron in the massive or metallic state. [B.]—**Acetas ferri.** See IRON *acetate* and ACETUM *chalybeatum.*—**Alcohol cum sulphate ferri tartarisatus.** See *Tinctura* MARTIS *aperitiva.*—**Alcohol sulphurico-æthereus ferri.** See *Tinctura ferri chlorati ætherea.*—**Arsenias ferri** [Belg. Ph.]. See IRON *arsenate.*—**Balneum ferri carbonici effervescens.** See BALNEUM *aerophorum martiatum.*—**Borussias ferri.** Iron ferrocyanide. [B, 119.]—**Bromuretum ferri** [Belg. Ph., 1st ed.]. See IRON *bromide.*—**Calx ferri imperfecta nigra.** Black iron oxide. [B, 119 (α, 21).]—**Carbonas ferri** [Belg. Ph.] (**præcipitatus**). See IRON *carbonate* and *Ferri subcarbonas.*—**Carbonas ferri saccharatus** [Belg. Ph.]. See *Ferri carbonas saccharatus.*—**Carburas** (seu **carburetum,** seu **carburum**) **ferri.** Graphite. [B, 180.]—**Chloretum** (seu **chloruretum**) **ferri.** See IRON *chloride.*—**Chloruretum ferri ammoniacale** [Belg. Ph.]. Iron and ammonium chloride. [B.]—**Chocolata carbonatis ferri** [Belg. Ph.], **Chocolata cum ferro.** See CHOCOLATA *ferruginosa.*—**Citras ferri** [Belg. Ph.]. See IRON *and ammonium citrate.*—**Citras ferri et chinini.** See IRON *and quinine citrate.*—**Crocus ferri.** See *Ferri subcarbonas.*—**Cyanuretum ferri.** See IRON *ferrocyanide.*—**Deutoxydum ferri cum sulphureto ferri mixtum.** See CROCUS *martis sulphuratus.*—**Emplastrum ex iodureto ferri** [Belg. Ph.]. A plaster made by mixing 80 parts of melted Burgundy pitch and 14 of iron iodide previously triturated with 6 of olive-oil. [B. 95 (α. 21).]—**Emplastrum ferri** [U. S. Ph.]. Fr., *emplâtre de Canet* [Fr. Cod.]. Ger., *Eisenpflaster.* Syn.: *emplastrum roburans* [Br. Ph.] (seu *martiale,* seu *cum oxydo ferrico* [Fr. Cod.]). A preparation consisting of 1 part of dried ferric hydroxide (*ferri oxidum hydratum* [U. S. Ph.]) added to a molten mixture of 1 part each of Canada turpentine and Burgundy pitch and 7 parts of lead plaster [U. S. Ph.]; of 1 part of hydrated iron peroxide (*ferri peroxidum hydratum*) added to a molten mixture of 2 parts of Burgundy pitch and 8 of lead plaster [Br. Ph.]; or of equal parts of dry iron sesquioxide, the *emplâtre simple* (lead plaster), the *emplâtre diachylon gommé,* and yellow wax [Fr. Cod.]. [B, 81, 95.]—**Emplastrum ferri jodati.** See *Emplastrum ex iodureto ferri.*—**Emplastrum oxydi ferri rubri** [U. S. Ph., 1820, Edinb. Ph., 1826]. Fr., *emplâtre défensif* (ou *styptique*). A plaster made by triturating 8 parts of red iron oxide with 3 of olive-oil, and incorporating 24 of plaster of semi-vitreous oxide of lead, 6 of white resin, and 3 of yellow wax melted together. [B, 97 (α. 21).] Cf. *Emplastrum ferri.*—**Emulsio ferri composita.** An emulsion made by mixing 12 parts each of myrrh and sugar, 6 of potassium carbonate, 5 of iron sulphate, 864 of rose-water, and 48 of volatile oil of nutmeg [U. S. Ph., 1820, Dubl. Ph., 1830, Lond. Ph., 1815]; 72 parts of myrrh, 25 of potassium carbonate, 4.608 of *herba menthæ crispæ,* 24 of iron sulphate, and 288 of sugar [Hamb. Ph., 1804]; 72 of myrrh, 25 of potassium carbonate, 24 of iron sulphate, 432 of tincture of *Lavandula vera,* 3,744 of water of *Mentha piperita,* and 144

of simple syrup [Swed. Ph., 1817]; or 72 of myrrh, 3,744 of *aqua alexiteria simplex*, 36 of potassium carbonate, 72 of iron sulphate, and 144 of simple sugar [Dutch Ph., 1805 (Niemann's Notes)]. [B, 119 (a, 21).] Cf. *Mistura ferri composita.*—**Extractum ferri** [Lipp. Disp., 1794]. Fr., *extrait de fer* (ou *de mars*). Syn.: *extractum martis.* An extract made by digesting for three days 1 part of iron filings in 3 parts of vinegar, filtering, pouring upon the residue 3 of vinegar, continuing in this way until the iron filings are dissolved, uniting the colatures, and evaporating to the consistence of an extract. [B, 119 (a, 21).]—**Extractum ferri cum tartaro** [Fr. Cod., 1818, Sard. Ph., 1773]. Syn.: *extractum martis cum tartaro.* Tartarized extract of iron, made by boiling 1 part of pure iron filings and 2 parts of acid potassium tartrate in 30 of water, adding more water as it becomes necessary, decanting, and evaporating to the consistence of an extract [Sard. Ph., 1773]; or by evaporating the tartarized tincture of iron to the consistence of an extract [Fr. Cod., 1818]. [B, 97 (a, 21).]—**Extractum ferri cydoniatum** [Dutch Ph., 1811, Belg. Ph., 1823, Bruns. Disp., 1777, Hannov. Ph., 1819, Palat. Disp., 1764, Sard. Ph., 1773, Würt. Ph., 1798]. An extract made by digesting with heat for several days 1 part of pulverized iron filings in 4 parts, or, according to some pharmacopœias, 3, of recently expressed and depurated juice of quinces, boiling down to one half, straining, and evaporating to the consistence of an extract. [B, 97 (a, 21).]—**Extractum ferri pomati** [Swiss Ph.] (seu **pomatum** [Ger. Ph., Belg. Ph., 1st ed., Russ. Ph.]). **Extractum malatis ferri** [Austr. Ph., Hung. Ph.]. Syn.: *extractum pomi ferratum* [Dan. Ph.] (seu *pomorum ferratum* [Finn. Ph., Norw. Ph., Swed. Ph.]), *succus pomorum ferrarius inspissatus* [Gr. Ph.]. Impure iron (ferrous and ferric) malate, made by digesting the pulp or the expressed juice of sour apples with varying quantities of iron filings, iron powder, or iron wire, until the reaction has ceased, filtering, and evaporating. [B, 81, 95 (a, 21).]—**Extractum malti cum ferro jodato** [Swiss Ph.]. See under Maltum.—**Ferri acetas.** See Iron *acetate.*—**Ferri albuminas.** See Iron *albuminate* and *F. albuminatum siccum.*—**Ferri ammonio-citras.** See Iron *and ammonium citrate.*—**Ferri ammonio-sulphas.** See Iron *and ammonium sulphate.*—**Ferri ammonio-tartras.** See Iron *and ammonium tartrate.*—**Ferri arsenias** [Br. Ph.]. See Iron *arsenate.*—**Ferri benzoas.** See Iron *benzoate.*—**Ferri bromidum.** See Iron *bromide.*—**Ferri carbonas.** See Iron *carbonate.*—**Ferri carbonas saccharata** [Br. Ph.] (seu **saccharatus** [U. S. Ph.]). Saccharated iron carbonate, consisting of extemporaneously prepared ferrous carbonate mixed with sugar to preserve it from oxidation. The former is obtained, in the process of the U. S. Ph. and Ger. Ph., by adding an aqueous solution of 10 parts of ferrous sulphate to an aqueous solution of 7 parts of sodium bicarbonate, and separating the precipitated ferrous carbonate from the dissolved sodium sulphate by repeated decantation. The precipitate is then mixed with 16 parts of cane-sugar [U. S. Ph.], or with 2 of milk-sugar and 8 of cane-sugar [Ger. Ph.]. In the process of the Br. Ph., the ferrous carbonate is made by precipitating an aqueous solution of 10 parts of ferrous sulphate with a solution of 6¼ of ammonium carbonate, and mixing with 5 of sugar. [B.]—**Ferri carburetum.** See Iron *carbide.*—**Ferri chloridum** [U S. Ph.]. Fr., *chlorure ferrique* [Fr. Cod.]. Syn.: *ferri perchloridum* [Br. Ph.], *f. sesquichloratum* [Ger. Ph.], *chloruretum ferricum* [Fr. Cod.]. Ferric chloride (of the U. S. Ph., the hydrated salt, $Fe_2Cl_6+12H_2O$; of the Fr. Cod., the anhydrous, Fe_2Cl_6). [B.] See Iron *sesquichloride.*—**Ferri citras** [U. S. Ph.]. Fr., *citrate de sesquioxyde de fer.* Ger., *citronensaures Eisenoxyd.* Syn.: *ferrum citricum oxydatum* [Ger. Ph., 1st ed., Swiss Ph., Russ. Ph.]. Iron (ferric) citrate, $(C_6H_5O_7)_2Fe_2+6H_2O$. [B.] See Iron *citrate.*—**Ferri deutoxidum nigrum.** Magnetic iron oxide. [A, 273 (a, 21).]—**Ferri et aluminæ sulphas.** Aluminum and iron sulphate. [a, 27.]—**Ferri et ammonii citras** [U. S. Ph., Br. Ph.]. See Iron *and ammonium citrate.*—**Ferri et ammoniæ murias.** See Ammonium *muriaticum ferratum.*—**Ferri et ammonii sulphas** [U. S. Ph.]. See Iron *and ammonium sulphate.*—**Ferri et ammonii tartras** [U. S. Ph.]. See Iron *and ammonium tartrate.*—**Ferri et magnesii citras.** See Iron *and magnesium citrate.*—**Ferri et potassii tartras** [U. S. Ph.]. See Iron *and potassium tartrate.*—**Ferri et quiniæ** [Br. Ph., U. S. Ph., 1870] (seu **quininæ** [U. S. Ph.]) **citras.** See Iron *and quinine citrate.*—**Ferri et sodæ pyrophosphas, Ferri et sodii pyrophosphas.** Pyrophosphate of iron and sodium, made by adding to a solution of 50 parts of sodium pyrophosphate in 100 of water sufficient ferric chloride in aqueous solution so that a permanent precipitate is not produced, then adding 250 parts of alcohol and collecting the precipitate. [Remington (a, 21).]—**Ferri et sodii citrophosphas.** See *Ferri phosphas* (2d def.).—**Ferri et strychninæ citras** [U. S. Ph.]. See Iron *and strychnine citrate.*—**Ferri ferricyanidum.** See Iron *ferricyanide.*—**Ferri ferrocyanas** (seu **ferrocyanidum,** seu **ferrocyanuretum**). See Iron *ferrocyanide.*—**Ferri filum** [U. S. Ph, 1850]. Iron wire. [B.]—**Ferri hypophosphis** [U. S. Ph.]. See Iron *hypophosphite.*—**Ferri iodidum** [Br. Ph.]. Iron (ferrous) iodide. [B.]—**Ferri iodidum saccharatum** [U. S. Ph.]. Ger., *Jodeisensaccharat.* Syn.: *f. jodatum* [Austr. Ph., Swiss Ph., Russ. Ph.] (seu *iodatum* [Ger. Ph., 1st ed.]) *saccharatum, jodetum ferrosum saccharatum* [Finn. Ph.]. Saccharated iron iodide, consisting of 1 part of ferrous iodide and 4 parts of milk-sugar. The ferrous iodide is prepared extemporaneously by treating 6 parts of iron wire with 17 of iodine and 20 of distilled water, and filtering. The filtrate is mixed with the sugar, and evaporated. [B, 5.]—**Ferri lactas** [U. S. Ph.]. See Iron *lactate.*—**Ferri lamina.** Sheets or plates of iron. [a, 21.]—**Ferri limatura purificata.** Iron filings. [L, 84 (a, 21).]—**Ferri malas.** See Iron *malate.*—**Ferri nitras.** See Iron *nitrate.*—**Ferri oxalas** [U. S. Ph.]. See Iron *oxalate.*—**Ferri oxidati citras.** Ferric citrate. [B.]—**Ferri oxidum.** See Iron *oxide.*—**Ferri oxidum fuscum.** See *F. oxydatum fuscum.*—**Ferri oxidum hydratum** [U. S. Ph.]. Fr., *sesquioxyde de fer bihydraté* [Fr. Cod.]. Ger., *Eisenoxydflüssigkeit.* Syn.: *f. oxydatum fuscum* [Ger. Ph., 1st ed.], *ferri peroxidum hydratum* [Br. Ph.], *f. oxydatum* [Swiss Ph.], *f. oxydatum hydratum* [Russ. Ph.], *hydras ferricus* [Norweg. Ph.]. Hydrated oxide of iron; freshly prepared ferric hydroxide (or a hydrated ferric oxide containing 1, 2, or 3 molecules of water), prepared by precipitating a solution of ferric sulphate (ferric chloride [Swiss Ph.]) with ammonia. It is a reddish-brown magma, used as an antidote to arsenic, for which purpose it should always be freshly prepared. [B, 95.]—**Ferri oxidum hydratum cum magnesia** [U. S. Ph.]. Syn.: *antidotum arsenici* [Ger. Ph., Belg. Ph., Swiss Ph., Netherl. Ph., Russ. Ph.], *f. oxydatum hydricum in aqua, hydras ferrico-magnesicus* [Swed. Ph., Finn. Ph., 1885], *mixtura hydratis ferrici et magnesici* [Finn. Ph., 1863]. A preparation made by precipitating 20 parts of the solution of ferric sulphate (*liquor ferri tersulphatis* [U. S. Ph.]), diluted with twice its weight of water, with 3 parts of magnesia, or, according to some pharmacopœias, by precipitating the solution of ferric chloride with magnesia. It consists of ferric hydroxide mixed with magnesium sulphate and hydroxide. [B.]—**Ferri oxidum magneticum** [Br. Ph.], **Ferri oxidum nigrum** [Ed. Ph.]. Magnetic iron oxide. [A, 430 (a, 21).]—**Ferri oxidum rubrum.** Red iron oxide, iron sesquioxide, or its hydrate, hydrated iron peroxide. [B.]—**Ferri perchloridum** [Br. Ph.]. Iron perchloride, ferric chloride. [B.] See Iron *chloride.*—**Ferri percyanidum** [Lond. Ph.]. See Iron *ferrocyanide.*—**Ferri pernitras.** Ferric nitrate. [B.] See Iron *nitrate.*—**Ferri peroxidum** [Br. Ph., 1864]. Iron sesquioxide. [B, 3 (a, 27).]—**Ferri peroxidum humidum** (seu **hydratum** [Br. Ph.]). See *Ferri oxidum hydratum.*—**Ferri persulphas.** Ferric sulphate, $Fe_2(SO_4)_3$. [B, 3 (a, 27).]—**Ferri phosphas** [U. S. Ph., Br. Ph.]. Syn.: *f. phosphoricum oxydulatum* (seu *oxydatum cum natrio citrico*) [Russ. Ph.]. Iron phosphate, soluble ferric (or sodio-ferric citro-) phosphate. 1. Of the Br. Ph., ferrous phosphate precipitated from a solution of iron sulphate by the addition of sodium phosphate and acetate. It is a white powder which in time becomes slate-colored, owing to a conversion of a portion of the ferrous phosphate into ferric phosphate. 2. Of the U. S. Ph., a preparation made by adding 6 parts of sodium phosphate to a solution of 5 of ferric citrate in 10 of water, and evaporating. It forms bright-green, transparent scales, having an acidulous taste, and dissolving readily in water. It is a mixture of phosphate and citrate of iron and sodium. It is used as a chalybeate. [B.]—**Ferri phosphas albus.** Ferric phosphate. [B.] See Iron *phosphate.*—**Ferri potassiotartras.** See Iron *and potassium tartrate.*—**Ferri pulvis** [U. S. Ph., 1850]. See *Reduced* iron.—**Ferri pyrophosphas** [U. S. Ph.]. See Iron *pyrophosphate.*—**Ferri ramenta** [U. S. Ph., 1850]. Iron filings. [B, 5, 119.]—**Ferri rubigo** [Dubl. Ph.]. See *Rubigo ferri* and *Ferri subcarbonas.*—**Ferri scobs.** Iron filings. [B, 119 (a, 21).]—**Ferri sesquichloridum.** Ferric chloride, Fe_2Cl_6. [B.]—**Ferri sesquinitras.** Ferric nitrate. [B.]—**Ferri sesquioxidum.** Ferricoxide, Fe_2O_3. [B.]—**Ferri squamæ.** Scales of iron; a preparation formerly official in the Dubl. Ph., made by washing the scales from a blacksmith's anvil with water, separating the iron from its impurities by means of a magnet, and pulverizing. It consisted of a mixture of metallic iron and its oxides. [B, 5.]—**Ferri subcarbonas** [U. S. Ph., 1870]. Fr., *safran de Mars apéritif* [Fr. Cod.]. Sp., *azafrán de Marte aperitivo* [Sp. Ph.], *carbonato de hierro* [Sp. Ph.]. Syn.: *f. carbonicum, f. hydricum* [Swiss Ph., 6th ed.], *f. subcarbonicum* [Gr. Ph.], *carbonas ferri* [Belg. Ph.], *hydras ferricus* [Finn. Ph.], *crocus Martis* [Netherl. Ph.]. An amorphous, brownish, odorless, and tasteless powder, consisting mainly of ferric hydroxide, made by precipitating a solution of ferrous sulphate with sodium carbonate, washing the precipitate, and drying with exposure to the air. Under a great variety of names this preparation has been official in numerous pharmacopœias. [B, 95, 119.]—**Ferri subsulphas.** See Iron *subsulphate.*—**Ferri succinas.** See Iron *succinate.*—**Ferri sulphas** [U. S. Ph., Br. Ph.]. Fr., *sulfate ferreux* [Fr. Cod.]. Ger., *Ferrosulfat.* Syn.: *f. sulfuricum* [Ger. Ph., Swiss Ph., Finn. Ph., Austr. Ph.] (et *oxydulatum purum* [Russ. Ph.]), *sulfas ferrosus* [Fr. Cod.] (seu *ferri*), *sulphas ferrosus* [Dan. Ph., Finn. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.] (seu *ferri* [Belg. Ph.], seu *ferri viridis*), *sulphas oxyduli ferri, vitriolum ferri.* Ferrous sulphate, $Fe_2SO_4+7H_2O$. The Fr. Cod. and the Ger. Ph. distinguish as special varieties *commercial ferrous sulphate* (Fr., *sulfate ferreux du commerce* [Fr. Cod.], *f. sulfuricum crudum* [Ger. Ph.]), and *pure ferrous sulphate* (Fr., *sulfate ferreux officinal* [Fr Cod.], *f. sulfuricum* [Ger. Ph.]). The latter is prepared by dissolving iron-wire in sulphuric acid. [B.] See also *Ferri sulphas exsiccatus.*—**Ferri sulphas calcinatum.** See *Ferri sulphas exsiccatus.*—**Ferri sulphas exsiccata** [Br. Ph.] (seu **exsiccatus** [U. S. Ph.]). Ger., *entwässertes Ferrosulfat.* Syn.: *f. sulfuricum* (*oxydulatum* [Russ. Ph., Swiss Ph.]) *siccum* [Ger. Ph.], *f. vitriolatum* (seu *vitriolicum*) *exsiccatum, sulphas ferri exsiccatus* [Netherl. Ph.] (seu *siccatus* [Dan. Ph.], seu *siccus* [Belg. Ph.]). Iron (ferrous) sulphate deprived of all but one of its molecules of water of crystallization, and reduced to a white powder. [B, 81.]—**Ferri sulphas granulata** [Br. Ph.] (seu **præcipitatus** [U. S. Ph.]). Ferrous sulphate obtained in the form of an efflorescent, green, crystalline powder by precipitating it with alcohol from a solution in water acidulated with sulphuric acid. The salt may be taken already formed and dissolved in the acid liquid [U. S. Ph.], or it may be prepared extemporaneously by the action of sulphuric acid and water upon metallic iron [Br. Ph.]. [B.]—**Ferri sulphidum** (seu **sulphuretum**). See Iron *sulphide.*—**Ferri tannas, Ferri tannicum.** See Iron *tannate.*—**Ferri tartarum** [Ed. Ph.]. Syn.: *balsamum chalybeatum.* A liniment composed of a solution of iron nitrate and olive-oil. [B, 119 (*a*, 21).]—**Liquor ferri acetatis** [U. S. Ph., Br. Ph.] (seu **acetici** [Ger. Ph., Swiss Ph.], seu **acetatis fortior** [Br. Ph.]). Syn.: *f. aceticum solutum* [Russ. Ph.] (seu *liquidum*), *solutio acetatis* [Netherl. Ph.] (seu *subacetatis* [Dan. Ph., Swed. Ph.]) *ferrici.* A reddish-brown aqueous solution of neutral [U. S. Ph.] ferric acetate, or of a basic [Ger. Ph., and most of the other Ph.'s] ferric acetate, prepared by the decomposition of ferric chloride [Ger. Ph.], or of ferric sulphate with acetic acid. It is also [U. S. Ph.] obtained by forming ferric hydroxide by precipitating 100 parts of solution of ferric sulphate (containing 29 of the salt) with ammonia-water, dissolving the precipitate in 26 of glacial acetic acid, and adding enough water to bring the whole up to 100 parts. A process in the Ger. Ph. (1st ed.) is almost dientical. The liquor ferri acetatis [Br. Ph.] is prepared by diluting 1 vol. of the liquor ferri aceta is fortior (prepared as above described) with 4 vols. of water. The preparation has the sp. gr. of 1·031 [Br. Ph.], 1·081 to 1·083 [Ger. Ph.], 1·127 (*liquor ferri acetatis fortior* [Br. Ph.]), 1·134 to 1·138 [Dan. Ph., Swiss Ph., Netherl. Ph., Russ. Ph., Swed. Ph.], 1·140 to 1·145 [Roum. Ph.], and 1·160 [U. S. Ph.]. It contains $1\frac{1}{4}$ per cent. of iron [Br. Ph.], 4·8 to 5 [Ger. Ph.], $6\frac{1}{4}$ (*liquor ferri acetatis fortior* [Br. Ph.]), about 8 [U. S. Ph., Dan. Ph., Swiss Ph., Russ. Ph., Swed. Ph.], and 9 [Netherl. Ph.]. The U. S. preparation contains 33 per cent. of anhydrous ferric acetate, and the present Ger. one, 20 per cent. [B.]—**Liquor ferri albuminati** [Drees]. Ger., *Eisenalbuminatflüssigkeit.* Syn.: *f. albuminatum solutum.* A German liquid preparation of iron in which all acid is said to be replaced by albumin; neutral, having no metallic or astringent taste, and readily absorbable; recommended in the treatment of round ulcer of the stomach. [Te Gempt, "Berlin. klin. Woch.," 1886, 15; "Ctrlbl. f. d. ges. Therap.," June, 1886, p. 258; "N. Y. Med. Jour.," July 10, 1886, p. 56.]—**Liquor ferri chlorati** [Ger. Ph., 1st ed.]. An aqueous solution of ferrous chloride of sp. gr. 1·226 to 1·230 and containing 19·2 per cent. of the iron salt. [B, 95.]—**Liquor ferri chloridi** [U. S. Ph.]. Fr., *chlorure ferrique dissous* [Fr. Cod.]. Sp., *solución de cloruro férrico* [Sp. Ph.]. Syn.: *liquor ferri perchlorati* (seu *perchloridi* [Br. Ph.] [et *perchloridi fortior* (Br. Ph.)]), *liquor ferri sesquichlorati* [Ger. Ph., Austr. Ph., Swiss Ph.] (seu *muriatici oxydati*), *liquor* [Finn. Ph.] (seu *solutio* [Dan. Ph., Norweg. Ph., Swed. Ph., Netherl. Ph.]) *chloreti ferrici, f. muriaticum oxydatum liquidum* [Gr. Ph.], *f. sesquichloratum solutum* [Austr. Ph., Hung. Ph., Russ. Ph.]. An aqueous solution of ferric chloride, made either by directly dissolving the salt in water [most of the pharmacopœias], by dissolving iron in hydrochloric acid [Gr. Ph.], by treating a solution of ferrous chloride with chlorine [Belg. Ph., Fr. Cod.], by subjecting ferrous chloride [U. S. Ph. (*liquor ferri perchloridi fortior* [Br. Ph.])] or its solution [Ger. Ph.] to the combined action of nitric acid and hydrochloric acid, or [U. S. Ph., Br. Ph.] by the successive action of aqueous hydrochloric acid and nitric acid on iron wire. In this last process the iron is first converted into a ferrous chloride, and this by the action of the nitric acid into the ferric salt; the solution so prepared contains an excess of hydrochloric acid, imparting to it a slight chlorinous odor; it is reddish-brown, and has a strong styptic, acid taste and acid reaction. The ordinary preparation is a clear, yellowish-brown liquid of sp. gr. 1·11 [Br. Ph.], 1·26 [Austr. Ph., Belg. Ph., Fr. Cod., Hung. Ph., Roum. Ph.], 1·261 [Sp. Ph.], 1·280 to 1·282 [Ger. Ph., Finn. Ph.], 1·290 to 1·300 [Swiss Ph., Russ. Ph.], 1·298 to 1·302 [Dan. Ph., Norweg. Ph., Swed. Ph.], 1·405 [U. S. Ph.], 1·42 (*liquor ferri perchloridi fortior* [Br. Ph.]), 1·480 to 1·484 [Netherl. Ph.], 1·500 [Gr. Ph.], and containing 8 per cent. of iron [Br. Ph.], or 9 per cent. [Belg. Ph., Fr. Cod.], 9·3 [Sp. Ph.], 10 [Ger. Ph., Finn. Ph., Dan. Ph.], 10·33 [Norweg. Ph., Russ. Ph.], 10·5 [Swiss Ph.], 13 [U. S. Ph.], 14 (*liquor ferri perchloridi fortior* [Br. Ph.]), 15 [Netherl. Ph.]. [B, 95.]—**Liquor ferri citratis** [U. S. Ph.] (seu **citrici**). Fr., *citrate de fer liquide.* Ger., *flüssiges Eisencitrat.* An aqueous solution of ferric citrate, a dark-brown liquid of slight chalybeate taste, containing about 35·5 per cent. of the anhydrous salt; made by precipitating iron oxide from 105 parts of the solution of iron tersulphate (previously diluted with 1,000 of water) by means of a solution of 84 of water of ammonia in 200 of water; the precipitate is repeatedly washed with water, and mixed with 30 of citric acid till solution takes place, filtered and evaporated down to 100 parts by weight. [B.]—**Liquor ferri dialysatus** [Br. Ph.]. Roum., *feru oxydatu dialysatu licuidu* [Roum. Ph.]. Syn.: *f. hydro-oxydatum dialysatum liquidum* [Austr. Ph.]. Dialyzed iron; solution of dialyzed iron. A solution of strongly basic iron oxychloride from which the greater part of the acid has been removed by dialysis, made by mixing 6 fl. oz. of liquor ferri perchloridi fortior with 40 oz. of distilled water, stirring in diluted ammonia, straining through linen, washing the precipitate of ferric hydroxide with distilled water, expressing the moisture, mixing with 1 fl. oz. of liquor ferri perchloridi fortior, stirring at a gentle heat until it becomes quite or nearly liquid, filtering, placing in a covered dialyzer, treating it in the same manner with water until the solution is nearly tasteless; it should measure 28 fl. oz., is a clear, dark-brownish red, free from any perceptible ferruginous taste, and has a neutral reaction and a specific gravity of about 1·407. The formulæ of the other pharmacopœias differ but slightly from that of the British. Dialyzed iron is used as a ferruginous tonic and as an antidote to arsenic. [B, 95 (*a*, 21).]—**Liquor ferri et chinini citrici, Liquor ferri et quininæ citratis** [U. S. Ph.]. Ger., *Ferrichinincitratlösung.* Fr., *citrate de fer et de quinine liquide, soluté de citrate de fer et de quinine.* Syn.: *liquor chinini ferro-citrici.* A preparation made by adding successively 28 parts of citric acid and 12 of dried quinine to a solution of 65 of iron and ammonium citrate in 200 of water, evaporating to 160, cooling, adding 30 of alcohol, and water up to 200 par s. It is a dark-yellow fluid, having a greenish or brownish tinge, devoid of odor, and has a bitter taste. It contains 50 per cent. of iron and quinine citrate and 6 per cent. of quinine. [B, 5.]—**Liquor ferri jodati.** See Jodetum *ferrosum.*—**Liquor ferri muriatici oxydati, Liquor ferri muriatosi.** See *Liquor ferri chloridi.*—**Liquor ferri nitratis** [U. S. Ph.] (seu **nitrici**). Syn.: *liquor ferri pernitratis* [Br. Ph.]. An aqueous solution of extemporaneously prepared ferric nitrate. In the U. S. preparation, ferric hydroxide is first made by precipitating with ammonia-water 18 parts of the solution of iron tersulphate, previously diluted with water. To the hydroxide so formed, 7 parts of nitric acid are added, with water up to 100 parts. In the Br. preparation $19\frac{1}{4}$ parts of nitric acid diluted with water are added to 3 of metallic iron, and, after solution of the latter, the whole is brought up to 100 parts by the addition of water. The U. S. preparation, which is a clear amber or reddish liquid, of styptic taste and acid reaction, contains 6 per cent. of anhydrous ferric nitrate. The Br. preparation contains 13 per cent. of the anhydrous salt. [B.]—**Liquor ferri oxychlorati** [Ger. Ph.] (seu **oxydati dialysati**). A preparation similar to the liquor ferri dialysati, made by mixing a solution of 35 parts of solution of ferric chloride in 160 of distilled water with 35 parts of ammonia-water and 320 of distilled water, washing the precipitate, redissolving by the aid of 3 parts of hydrochloric acid, and adding water to a sp. gr. 1·050. [B, 95.]—**Liquor ferri perchlorati.** See *Liquor ferri chloridi.*—**Liquor ferri perchloridi.** A preparation consisting of the liquor ferri perchloridi fortior (*liquor ferri chloridi* of the U. S. Ph.) diluted with 3 parts by volume ($=2\frac{1}{4}$ parts by weight) of distilled water. It contains about 11 per cent. of anhydrous ferric chloride. [B.]—**Liquor ferri perchloridi fortior** [Br. Ph.]. See *Liquor ferri chloridi.*—**Liquor ferri pernitratis** [Br. Ph.]. See *Liquor ferri nitratis.*—**Liquor ferri persulphatis** [Br. Ph.]. A preparation corresponding to the liquor ferri tersulphatis of the U. S. Ph. It is sometimes improperly considered as equivalent to the liquor ferri subsulphatis. [B.]—**Liquor ferri sesquichlorati** [Ger. Ph., Swiss Ph., Austr. Ph.]. See *Liquor ferri chloridi.*—**Liquor ferri subsulphatis** [U. S. Ph.]. Syn.: *liquor ferri sulfurici oxydati basici.* Solution of iron subsulphate, solution of basic ferric sulphate, Monsel's solution. An aqueous solution of iron subsulphate (often erroneously called the persulphate); prepared by treating 77 parts of hydrated ferrous sulphate with a mixture of 7 of sulphuric acid, 11 of nitric acid, and 50 of water, adding nitric acid, if necessary, till nitrous vapors cease to be given off, and bringing the whole amount up to 114 parts by the addition of water. The solution is a dark-red or brownish liquid, of thick, almost syrupy consistence, having a very styptic taste and an acid reaction. Its sp. gr. is 1·555, and it contains 43·7 per cent. of iron subsulphate. It is much used externally as a styptic. [B.]—**Liquor ferri sulfurici oxydati** [Ger. Ph.]. See *Liquor ferri tersulphatis.*—**Liquor ferri sulfurici oxydati basici.** See *Liquor ferri subsulphatis.*—**Liquor ferri sulfurici oxydulati.** A solution of ferrous sulphate. [B. 95.] See *Solution au sulfate de* fer.—**Liquor ferri tersulphatis** [U. S. Ph.]. Syn.: *liquor ferri persulphatis* [Br. Ph.] (seu *sulfurici oxydati* [Ger. Ph.]), *solutio sulphatis ferrici* [Dan. Ph.], *liquor sulfatis ferrici* [Finn. Ph.], *f. sulfuricum oxydatum liquidum* [Swiss Ph.] (seu *solutum* [Russ. Ph.]). Solution of iron tersulphate (persulphate), solution of normal ferric sulphate. A solution of ferric sulphate, made by dissolving ferrous sulphate in water with the addition of sulphuric acid, heating the mixture with nitric acid till nitrous fumes are no longer evolved, and adding water up to the required amount. The U. S. preparation is made with 40 parts per hundred of the hydrated ferrous sulphate, corresponding to 8 of iron, which by this process are converted into 28·7 parts of ferric sulphate. The Br. preparation contains originally 50 parts of the ferrous sulphate, corresponding to 10 of iron, which are converted into 36 of ferric sulphate. The Ger. preparation is of the same strength as the Br. The solution is a clear, dark-reddish or yellowish-brown, strongly astringent liquid, of acid reaction, and of the sp. gr. of 1·317 to 1·319 [Swiss Ph.], 1·320 [U. S. Ph.], 1·395 to 1·405 [Dan. Ph.], 1·400 [Russ. Ph., Roum. Ph.], 1·428 to 1·430 [Ger. Ph., Finn. Ph.], 1·441 [Br. Ph.]. It contains 8 per cent. of iron [U. S. Ph., Swiss Ph.], 9·5 [Russ. Ph.], 10 [Dan. Ph., Ger. Ph., Finn. Ph.], 10 to 16 [Br. Ph.]. It is not itself used medicinally, but is employed as a source of other ferruginous preparations, and especially the ferri oxidum hydratum. [B, 95.]—**Liquor muriatis ferri.** See *Tinctura* Martis *adstringens.*—**Liquor sesquichloreti** (seu **subbichloreti**) **ferri.** See *Liquor ferri chloridi.*—**Malas ferri.** Iron malate. [B, 119 (*a*, 21).]—**Massa ferri carbonatis** [U. S. Ph.]. Fr., *pilules de carbonate ferreux* [Fr. Cod.]. Syn.: *pilula ferri carbonatis* [Br. Ph., U. S. Ph., 1870], *pilulæ cum carbonato ferroso* [Fr. Cod.], *pilulæ ferri carbonici* [Ger. Ph.]. Mass or pill of iron carbonate, Vallet's mass; a preparation consisting of ferrous carbonate mixed with saccharine material to preserve it from oxidation. The process of Vallet is followed in the Fr. Cod. and the U. S. Ph. In this process the ferrous carbonate is freshly prepared by precipitating a saccharine aqueous solution of ferrous sulphate with a solution of sodium carbonate. The precipitate is freed from the supernatant liquid by decantation, is repeatedly washed with saccharine water, is then freed from water by expression, and made into a pill mass with honey and sugar.

The mass contains about half its weight of ferrous carbonate. In the Fr. process the mass is divided into pills, one third its weight of licorice powder being first added, and each pill is made to weigh 25 centigrammes, corresponding to 9 centigrammes (1⅓ grain) of ferrous carbonate. The Br. preparation is made by mixing 4 parts of saccharated iron carbonate with 1 part of confection of rose. It has about the same amount of iron as the U. S. preparation, but part of the ferrous carbonate is replaced by ferric oxide. The Ger. preparation resembles the U. S. and Fr. preparations, but sodium bicarbonate is employed instead of the carbonate, is made up with honey, sugar, and marsh-mallow (*Althœa*) root into pills each of which contains 2½ centigrammes of iron (*i. e.*, about 5 centigrammes [¾ grain] of ferrous carbonate). [B.]—**Mistura ferri aromatica** [Br. Ph.]. Syn.: *mixtura ferri aromatica.* A preparation made by macerating 1 oz. (av.) of pale cinchona-bark, ¼ oz. (av.) of cloves, 1½ oz. of powdered calumba-root, and ½ oz. (av.) of iron wire in 12 fl. oz. of peppermint-water, filtering, adding peppermint-water up to 12½ fl. oz., together with 3 fl. oz. of compound tincture of cardamoms and half an ounce of tincture of orange-peel. [B.]—**Mistura ferri composita** [U. S. Ph., Br. Ph.]. Syn.: *mixtura ferri composita* [Dan. Ph., Norw. Ph.]. Griffith's mixture; a mixture of 6 parts of ferrous sulphate, 8 of potassium carbonate, 18 each of sugar and myrrh, 50 of spirit of lavender, and rose-water up to 1,000 parts [U. S. Ph.]. The Br. preparation has almost the same strength, the proportions being 5½ parts of ferrous sulphate, 6⅔ of potassium carbonate, 13 each of sugar and myrrh, and about 44 of spirit of nutmeg, with rose-water up to 1,000 parts. In both, the ferrous sulphate is decomposed with the formation of ferrous carbonate, and the addition of the myrrh and sugar is made to prevent further chemical change. [B.] Cf. *Emulsio ferri composita.*—**Mistura ferri et ammonii acetatis** [U. S. Ph.] (seu **acetici**). Basham's mixture; a preparation made by mixing 2 parts of tincture of iron chloride with 20 of solution of ammonium acetate and 3 of dilute acetic acid, and adding 10 parts of elixir of orange, 15 of syrup, and 50 of water. It forms a clear, bright-red liquid, consisting essentially of a solution of iron and ammonium acetate. [B.]—**Mixtura ferri aromatica.** See *Mistura ferri aromatica.*—**Mixtura ferri composita.** 1. Of the Dan. and Norw. Ph.'s, see *Mistura ferri composita.* 2. See *Emulsio ferri composita.*—**Mixtura ferri et ammonii acetici.** See *Mistura ferri et ammonii acetatis.*—**Murias ammoniæ et ferri.** See Iron *and ammonium chloride.*—**Murias ferri.** Ferric chloride. [B, 119 (*a*, 21).]—**Murias ferri liquidus.** See *Liquor ferri chloridi.*—**Murias ferri sublimatus** (seu **viridis**). Ferrous chloride. [B, 119 (*a*, 21).]—**Oxidum ferri rubrum.** Red iron oxide.—**Oxodes ferri.** Black iron oxide. [B, 119 (*a*, 21).]—**Oxydulum ferri fuscum.** See *Ferri subcarbonas.*—**Oxydutum ferri muriaticum.** Ferrous chloride. [B. 119 (*a*, 21).]—**Oxydulum ferri nigrum** [Belg. Ph.]. Black iron oxide.—**Oxydum ferri muriaticum.** Ferric chloride. [B, 119 (*a*, 21).]—**Oxydum ferri nigrum.** Black iron oxide. [B, 119 (*a*, 21).]—**Oxydum ferri rubrum.** Red iron oxide; iron sesquioxide. [B, 119.]—**Oxydum ferri rubrum per præcipitationem.** See *Ferri subcarbonas.*—**Percarburetum ferri.** Graphite. [B, 180.]—**Pilulæ ferri antichloroticæ Blaud.** Fr., *pilules ferrugineuses de Blaud* [Fr. Cod.]. Syn.: *pilulœ D. Blaud* [Fr. Cod.]. Blaud's pills; composed of 10 grammes each of iron sulphate and potassium carbonate, 5 grammes of sugar, and a quantity of *Althœa*-root sufficient to make 150 pills. The preparation of the Fr. Cod. consists of pills containing 15 centigrammes each of ferrous sulphate and potassium carbonate, made up with acacia and syrup. [A, 319 (*a*, 21).] Cf. *Massa ferri carbonatis* and Pilulæ *ferratœ.*—**Pilula ferri carbonatis** [U. S. Ph., 1870, Br. Ph.], **Pilulæ ferri carbonici** [Ger. Ph.]. See *Massa ferri carbonatis.*—**Pilulæ ferri carbonici Blaud.** See *Pilulœ ferri antichloroticœ Blaud.*—**Pilulæ ferri compositæ** [U. S. Ph.]. Griffith's pills; each pill contains ½ grain each of sodium carbonate and ferrous sulphate, rubbed up with 1½ grain of myrrh, and made into a pilular mass with syrup. In this preparation the iron sulphate is decomposed with the formation of ferrous carbonate, which is kept from oxidation by the myrrh and syrup. [B.]—**Pilulæ** (seu **Pilula** [Br. Ph.]) **ferri iodidi** [U. S. Ph.]. Fr., *pilules d'iodure ferreux* [Fr. Cod.]. Syn.: *pilulœ cum iodureto ferroso* [Fr. Cod.]. Blancard's pills; pills containing ferrous iodide with an excess of metallic iron, and sufficient saccharine matter to act as a preservative against oxidation. In the U. S. preparation the ferrous iodide is formed by the action of iodine (60 parts) upon an excess of reduced iron (40 parts) in the presence of water, and the pills are made up with 50 parts each of sugar and licorice powder and 12 each of extract of licorice and gum arabic, and are coated with balsam of Tolu. Each pill contains about 1 grain of ferrous iodide and ⅔ grain of reduced iron. In the Fr. preparation 41 parts of iodine and 20 of iron filings are used, and are made into pills with 50 of honey. The pills are rolled in powdered iron filings and coated with mastic and balsam of Tolu. Each pill contains 5 centigrammes (¾ grain) of ferrous iodide and about 1 centigramme (⅙ grain) of metallic iron. The Br. preparation is a pill-mass consisting of 4 parts of metallic iron, 8 of iodine, 7 of sugar, and 14 of powdered licorice-root. It contains about 30 per cent. of ferrous iodide and about 6 per cent. of metallic iron. [B.]—**Protosulphas ferri.** Ferrous sulphate. Iron sulphide (monosulphide), obtained by precipitation. [B, 113 (*a*, 21).]—**Sulphas ferri** [Belg. Ph.]. See Iron *sulphate.*—**Sulphas ferri calcinatus** (seu **exsiccatus** [Netherl. Ph.], seu **siccatus** [Dan. Ph.], seu **siccus** [Belg. Ph.]). See *Ferri sulphas exsiccatus.*—**Sulphas ferri viridis** (seu **oxyduli ferri**). See *Ferri sulphas.*—**Sulphuretum ferri** [Belg. Ph.]. See Iron *sulphide.*—**Supercarburetum ferri.** Graphite. [B, 180.]—**Syrupus ferri bromidi** [U. S. Ph.]. A preparation made by treating 30 parts of iron wire with a mixture of 75 of bromine and 200 of water. By this process a green, aqueous solution of ferrous bromide is formed. This is then filtered and added to 600 parts of sugar, and the whole is brought by the addition of distilled water up to 1,000 parts. It contains 10 per cent. of ferrous bromide. [B.]—**Syrupus ferri iodidi** [U. S. Ph.] (seu **jodati** [Ger. Ph.]). Fr., *sirop d'iodure de fer* [Fr. Cod.]. Syn.: *syrupus cum iodureto ferroso* [Fr. Cod.]. Syrup of iodide of iron; a preparation consisting of ferrous iodide, extemporaneously prepared by the action of iodine on an excess of metallic iron in the presence of water, dissolved in a saccharine menstruum. The U. S. preparation contains 10 per cent. of ferrous iodide made up with 60 parts of sugar and 30 of water. It is a transparent, pale-green solution, having a sweet chalybeate taste. The Br. preparation contains 5·6 per cent. of ferrous iodide, made up with 63·4 parts of sugar and 30 of water. That of the Ger. Ph. contains 5 per cent. of ferrous iodide, made up with sugar and water in about the same proportions as the Br. Ph. The Fr. preparation contains only ½ per cent. of ferrous iodide, the rest being made up of 1 part of distilled water, 78½ parts of syrup of gum arabic (*sirop de gomme*), and 20 of syrup of orange-flower (*sirop de fleur d'oranger*). This preparation is much used as an alterative in scrofulous conditions, as well as a chalybeate tonic for children. [B.]—**Syrupus ferri oxydati solubilis** [Ger. Ph.]. Ger., *Eisensyrup.* A mixture of equal parts of ferrum oxydatum saccharatum solubile, water, and syrup. It contains 1 per cent. of iron. [A, 319 (*a*, 21).]—**Syrupus ferri phosphatis** [Br. Ph.]. Fr., *sirop de phosphate de fer.* Ger., *Eisenphosphatsyrup.* A preparation consisting of ferrous phosphate (extemporaneously prepared by precipitation from a solution of ferrous sulphate by the action of sodium acetate and phosphate), dissolved in dilute phosphoric acid, and mixed with sugar. Each fluid drachm contains 1 grain of ferrous phosphate. [B.]—**Syrupus ferri phosphorici cum chinino et strychnino, Syrupus ferri, quininæ et strychninæ phosphatum** [U. S. Ph.]. Fr., *sirop tonique d'Eaton.* Ger., *Eaton's Syrup.* Syn.: *syrupus Eatoni.* A syrup composed of 133 parts each of iron phosphate (*ferri phosphas* [U. S. Ph.]) and quinine, 4 of strychnine, 800 of phosphoric acid, 6,000 of coarsely powdered sugar, and a quantity of distilled water sufficient to yield 10,000 parts. [B, 81 (*a*, 21).]—**Tartarus ferri, Tartras lixivæ** (seu **potassæ**) **et ferri.** See Iron *and potassium tartrate.*—**Tinctura ætherea ferri muriatici, Tinctura chlorureti ferri ætherea** [Belg. Ph.]. See *Tinctura ferri chlorati œtherea.*—**Tinctura ferri acetatis.** Fr., *teinture d'acétate de fer.* Ger., *ätherische Eisenacetattinctur.* Syn.: *tinctura ferri acetici œtherea* [Ger. Ph., Russ. Ph., Swiss Ph.] (seu *acetatis ferrici œtherea* [Netherl. Ph.]), *œther acetico-alcoholicus ferruginosus* [Gr. Ph.], *solutio subacetatis ferrici spirituoso-œtherea* [Dan. Ph., Swed. Ph.]. 1. Of the U. S. Ph., a preparation made by mixing 50 parts of liquor ferri acetatis, 20 of acetic ether, and 30 of alcohol, and containing about 4 per cent. of iron. The preparations of the other pharmacopœias are essentially similar, but contain 6 per cent. of iron, with the exception of the preparation of the Gr. Ph., which contains also 4 per cent. It is a clear, dark-brownish liquid of aromatic odor and acid, astringent taste. 2. Of the Br. Ph., a preparation made by mixing 5 parts by volume of the liquor ferri acetatis fortior, 1 part of acetic acid, 5 parts of alcohol, and 9 of distilled water, and, after shaking, bringing the mixture up to 20 parts by the addition of water. [B, 81, 95.]—**Tinctura ferri acetici.** See *Tinctura ferri acetatis* (2d def.).—**Tinctura ferri acetici ætherea** [Ger. Ph., Russ. Ph., Swiss Ph.]. See *Tinctura ferri acetatis* (1st def.).—**Tinctura ferri acetici Rademacheri** [Swiss Ph.]. A preparation made by triturating 23 parts of pure ferrous sulphate with 24 of lead acetate, boiling the mixture with 48 parts of distilled water and 96 of vinegar, adding, after cooling, 80 of alcohol, macerating the resultant liquid till it has acquired a red color, and filtering. It is a clear liquid of the color and odor of Malaga wine. [B, 95.]—**Tinctura ferri ammoniati** (seu **aperitiva**). Fr., *teinture de Mars de Mynsicht.* Syn.: *tinctura hœmatitis* (seu *florum salis ammoniaci martialium*). A solution of iron and ammonium chloride; official in varying degrees of strength in several old pharmacopœias. [B, 119.]—**Tinctura ferri chlorati** [Ger. Ph., 1st ed., Swiss Ph., Russ. Ph.]. Syn.: *tinctura ferri muriatici oxydulati* [Gr. Ph.] (seu *ferri muriatis*). A solution of ferrous chloride in alcohol with or without the addition of a little hydrochloric acid. It is a greenish or yellowish liquid (the color becoming more pronounced with age), containing from 10 to 12·5 per cent. of ferrous chloride. Similar preparations, in which usually the ferrous chloride was made extemporaneously, were formerly official under a great variety of names. [B, 95, 119.]—**Tinctura ferri chlorati ætherea** [Ger. Ph.]. Roum., *spirtu etheriu de feru sesquichloratu crystalisatu* [Roum. Ph.]. Syn.: *œther sulphurico-alcoholicus ferruginosus* [Gr. Ph.], *solutio chloreti ferrici spirituoso-œtherea* [Dan. Ph., Norw. Ph., Swed. Ph.], *spiritus œthereus ferratus* [Swiss Ph.], *spiritus ferri sesquichlorati œthereus* [Austr. Ph., Hung. Ph., 2d ed.], *tinctura chloreti ferrosi œtherea* [Finn. Ph.] (seu *chlorureti ferri œtherea* [Belg. Ph.], seu *ferri sesquichlorati œtherea* [Russ. Ph.], seu *nervina Bestuscheffii* [Netherl. Ph.]). Ethereal tincture of ferric chloride; a preparation made up of ferric chloride (or solution of ferric chloride), ether, and alcohol in varying proportions. It is a colorless or yellowish liquid, of ethereal odor and burning styptic taste, containing 1 [Ger. Ph.] or more parts of iron in 100 parts. [B, 95.]—**Tinctura ferri chloridi** [U. S. Ph.]. Syn.: *tinctura ferri perchloridi* [Br. Ph.] (seu *ferri sesquichlorati*, seu *chloreti ferrici* [Finn. Ph.]), *solutio chloreti ferrici spirituosa* [Dan. Ph., Norweg. Ph., Swed. Ph.]. Tincture of chloride of iron; a prep-

aration made by dissolving 35 parts [U. S. Ph.] or 37·5 [Dan. Ph.] of the liquor ferri chloridi in 65 parts [U. S. Ph.] or 62·5 parts [Dan. Ph.] of alcohol; or by dissolving 25 volumes of the liquor ferri perchloridi in 25 volumes of alcohol and 50 volumes of distilled water [Br. Ph.]; or by dissolving 10 parts of ferric chloride in 90 of alcohol [Finn. Ph.] or dilute alcohol [Norw. Ph., Swed. Ph.]. The U. S. Ph. directs that it should be kept in a tightly closed vessel at least three months. It is a clear, yellowish, or, as prepared according to the U. S. Ph., a brownish liquid of styptic taste. It is considered a very valuable chalybeate tonic, and, as prepared by the method of the U. S. Ph., contains also certain ethers, due to the decomposition of the alcohol, which are said to impart diuretic and stimulant properties, making it a useful remedy in erysipelas, diphtheria, rheumatism, and nephritis. [B, 5, 95.]—**Tinctura ferri cydoniata** [Netherl. Ph.]. A preparation made by digesting 2 parts of pulverized iron with 30 of fresh quince juice, boiling down to one half, straining, and adding 1 part of spirit of cinnamon. [B, 95.]—**Tinctura ferri muriata, Tinctura ferri muriatici.** 1. See *Tinctura ferri chlorati.* 2. See *Liquor ferri chloridi.*—**Tinctura ferri muriatici oxydulati** [Gr. Ph.], **Tinctura ferri muriatis.** See *Tinctura ferri chlorati.*—**Tinctura ferri nitro-sulphatis.** A preparation made by macerating for 24 hours 1 pound each of ferri sulphas exsiccatus and nitric acid, and adding 1 scruple of diluted alcohol. ["Proc. of the Am. Pharm. Assoc.," vi (*a*, 14).]—**Tinctura ferri perchloridi** [Br. Ph.]. See *Tinctura ferri chloridi.*—**Tinctura ferri pomata** [Ger. Ph.] (seu **pomati** [Swiss Ph.]). Ger., *äpfelsaure Eisentinctur.* Syn.: *tinctura malatis ferri* [Austr. Ph., Hung. Ph.], *tinctura extracti pomorum ferrati* [Finn. Ph., Norw. Ph., Swed. Ph.], *tinctura ferri pomati* [Swiss Ph.] (seu *pomi ferrata* [Dan. Ph.]), *elixir e succo pomorum ferrario* [Gr. Ph.]. A preparation made up of 1 part of extractum ferri pomatum and 5 to 9 parts of cinnamon-water or 3 of cinnamon-water and 2 of dilute alcohol [Swed. Ph.]. [B, 95, 205 (*a*, 21).]—**Tinctura ferri sesquichlorati.** See *Tinctura ferri chloridi*—**Tinctura ferri sesquichlorati aetherea** [Russ. Ph.]. See *Tinctura ferri chlorati œtherea.*—**Tinctura ferri tartarici** [Swiss Ph.], **Tinctura ferri tartarisata.** Fr., *teinture de Mars apéritive.* Syn.: *tinctura martis aperiens* (seu *tartarisata*). A filtered mixture of 2 parts of iron and potassium tartrate, 2 of dilute alcohol, and 16 of distilled water. Similar preparations, in which the iron and potassium tartrate was, as a rule, extemporaneously prepared, were formerly official in several pharmacopœias. [B.]—**Tinctura malatis ferri.** See *Tinctura ferri pomata.*—**Tinctura muriatis ferri.** See *Tinctura ferri chloridi* and *Tinctura ferri chlorati.*—**Tritoxydum ferri.** Iron sesquioxide. [*a*, 21.]—**Trochisci ferri** [U. S. Ph.]. Syn.: *trochisci ferri subcarbonatis* [U. S. Ph., 1870]. Troches each containing 5 grains of ferric hydroxide (hydrated iron oxide), $\frac{1}{10}$ grain of vanilla, and 15 grains of sugar, made of a suitable consistence with mucilage of tragacanth. [B.]—**Trochisci ferri redacti** [Br. Ph.]. Ger., *Eisenpastillen.* Troches each containing 1 grain of reduced iron, 15 grains of sugar, and $\frac{1}{2}$ grain of gum arabic, made of a suitable consistence with mucilage and water. [B.]—**Trochisci ferri subcarbonatis** [U. S. Ph., 1870]. See *Trochisci ferri.*—**Vinum ferri** [Br. Ph.]. A preparation made by macerating for 30 days 1 oz. of fine iron wire in a pint of sherry wine, and filtering. It contains an uncertain amount of iron and potassium tartrate, derived from the action of the acid potassium tartrate present in the wine on the oxidized iron. [B, 5.]—**Vinum ferri amarum** [U. S. Ph.]. A preparation made of 8 parts of solution of iron and quinine citrate, 12 of tincture of sweet-orange peel, 36 of syrup, and 44 of stronger white wine. It contains 4 per cent. of iron and quinine citrate. A somewhat similar preparation is the Fr., *vin de quinquina ferrugineux.* [B.]—**Vinum ferri citratis** [U. S. Ph., Br. Ph.]. Fr., *vin chalybé* [Fr. Cod.]. Syn.: *vinum chalybeatum.* A preparation made by dissolving 4 parts of iron and amonium citrate in 12 each of tincture of sweet-orange peel and syrup and 72 of stronger white wine [U. S. Ph.], or by dissolving about 2 parts of iron and ammonium citrate in 98 of orange wine [Br. Ph.]. The Fr. preparation is much weaker, containing only 5 parts of iron and ammonium citrate in 1,000 of wine. [B.]—**Vitriolum ferri.** See IRON *sulphate.*

FERRUMINATUM (Lat.), n. n. Fe^{2}r-ru^2(ru)-mi^2-na(na^3)'tu^{3}m-(tu^{4}m). See ADPLUMBATUM.

FERRURETED, adj. Fe^{2}r'u^2-re^{2}t-e^{2}d. Fr., *ferruré.* Containing or combined with iron. [B, 119.]

FERSÆ (Lat.), n. f. Fu^{6}r(fe^{2}r)'ze(sa^3-e^2). An old name for measles. [A, 325.]

FERSE (Ger.), n. Fe^{2}r'ze^2. The heel. [A. 521.]—**F'nbein.** See CALCANEUM.—**F'nbeinkörper.** The body of the calcaneum. [L.]—**F'nhöcker.** See TUBEROSITAS *calcanei.*—**F'nknochen.** See CALCANEUM.

FERTILE, adj. Fu^{6}r'ti^{2}l. Lat., *fertilis.* Fr., *f.* Ger., *fruchtbar.* Productive; of an animal, capable of producing young; of a flower, bearing fruit; of an anther, having pollen; of a seed, having an embryo. [B, 1, 19, 121 (*a*, 24); L.]

FERTILITY, n. Fu^{6}rt-i^{2}l'i^2-ti^2. Lat., *fertilitas.* Fr., *fertilité.* Ger., *Fertilität, Fruchtbarkeit.* The state of being fertile.

FERTILIZATION, n. Fu^{6}r-ti^{2}l-i^2-za'shu^{3}n. Lat., *fertilisatio.* Fr., *fertilisation.* Ger., *Befruchtung.* See FECUNDATION.—**Close f.** The fecundation of a flower by its own pollen. [B, 229 (*a*, 24).]—**Cross-f.** The fecundation of a flower by the pollen of another plant of the same species. [B, 229 (*a*, 24).]—**Self-f.** 1. The f. which occurs sometimes in hermaphrodites. [L, 322.] 2. See *Close f.*

FERTIT, n. The *Dracunculus medinensis.* [Pruner (L, 17).]

FERU, n. Of the alchemists, tin. [Ruland, Johnson (A, 325).]

FERULA (Lat.), n. f. Fe^2'ru^2(ru^4)-la^3. Fr., *férule.* Ger., *Schiene* (1st def.), *Steckenkraut* (2d def.). 1. An iron band used as a splint. See FANON. 2. Of Linnæus, a genus of umbelliferous herbs of the *Peucedaneæ*; by some authors made a section of the genus *Peucedanum.* [A, 326 (*a*, 21); B, 42, 121, 173, 180 (*a*, 24).]—**F. africana galbanifera.** The *Bubon galbanum.* [*a*, 24.]—**F. alliacea.** A species found in China, Persia, and India; the root yields a sort of asafœtida called *hing* or *hinga*, which, after being fried, is used as a condiment, and as an antispasmodic, carminative, aphrodisiac, and hypnotic. [A, 479 (*a*, 21); "Proc. of the Am. Pharm. Assoc.," xxvi, xxxviii (*a*, 14).]—**F. ammonifera.** The *Dorema ammoniacum.* [B, 5 (*a*, 24).]—**F. asafœtida.** Fr., *cyrène.* 1. Of Linnæus, see *F. scorodosma.* 2. Of Willdenow, see *F. narthex.* 3. Of Boissier and Buhee, the *F. alliacea.* [B, 18 (*a*, 24).]—**F. communis.** Fr., *férule commune.* Ger., *gemeines Steckenkraut.* Giant-fennel; a species found in southern Europe, the νάρθηξ of Hippocrates and Dioscorides. The aromatic fruits were formerly used as a stomachic, the pith of the fresh stem as a styptic, and the roots as a remedy for snake-bites. In Sicily the pith of the stem is used as a substitute for amadou. [B, 19, 173, 180 (*a*, 24).]—**F. erubescens.** See *F. rubricaulis.*—**F. fœmina.** See *F. communis.*—**F. ferulago.** A species found in southern and eastern Europe, once supposed to be the source of galbanum. The roots yield a milky juice which has been used in intermittent fevers. [B, 5, 42, 180 (*a*, 24).]—**F. fœtida.** A species found in Afghanistan, yielding a species of asafœtida, called in India *hing.* Cf. *F. alliacea.* [B, 5 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxxvii (*a*, 14).]—**F. fœtidissima.** A species yielding asafœtida. ["Proc. of the Am. Pharm. Assoc.," xxxvii (*a*, 14).]—**F. galbanifera, F. galbaniflua.** A Persian species, the principal source of galbanum (*q. v.*). [B, 5, 18 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]—**F. graveolens.** The *Peucedanum graveolens.* [B, 173 (*a*, 24).]—**F. gummosa.** See *F. rubricaulis.*—**F. hooshee.** A species said to furnish some of the opopanax of commerce. [B, 121 (*a*, 24).]—**F. minor.** The small giant-fennel. [B, 307 (*a*, 24).]—**F. narthex.** Fr., *férule asafœtida, laser cyrenaïque.* Ger., *stinkendes Steckenkraut.* A species indigenous to Persia and Afghanistan, which yields asafœtida. The young plant is said to be edible. [B, 5, 173, 180 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxxvii (*a*, 14).]—**F. nodifera, F. nodiflora.** See *F. ferulago.*—**F. opopanax.** The *Opopanax cheironium.* [B, 180 (*a*, 24).]—**F. orientalis.** A species indigenous to Greece and the East. The root yields a variety of gum ammoniac. [B, 180 (*a*, 24); Holmes, "Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]—**F. persica.** Fr., *férule de Perse.* Ger., *persisches Steckenkraut.* A species formerly recognized in the Edinb. Ph. as yielding asafœtida. According to Holmes, it is one of the principal sources of the drug. [B, 5, 173, 180 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxxvii (*a*, 14).]—**F. rubricaulis.** A species found in Persia, either a variety of, or identical with, *F. galbanifera.* It yields galbanum. [B, 5 (*a*, 24); Borszczow, "Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]—**F. sagapenum.** The *F. persica.* [*a*, 24.]—**F'säure** (Ger.). See FERULIC ACID.—**F. Schair** [Borszczow]. A species found in the Kirgheez country, yielding a gum resin similar to galbanum. [B, 81 (*a*, 21).]—**F. scorodosma.** A Persian species resembling *F. narthex*, but smaller; it yields asafœtida. [B, 5 (*a*, 24).]—**F. suaveolens.** Of Atchison and Hemsley, a species found in Afghanistan. The scented root, called *sumbul*, is exported. It also yields a gum resin. ["Proc. of the Am. Pharm. Assoc.," xxxv (*a*, 14).]—**F. sulcata.** A species found in southern and eastern Europe; it was formerly supposed to be one of the sources of galbanum. [B, 180 (*a*, 24).]—**F. sumbul.** A species indigenous to the mountains between Russian Turkestan and Bucharia. Its root furnishes sumbul (*q. v.*). [B, 5 (*a*, 24).]—**F. silvatica.** A species growing in Podolia, where it is used as a remedy for gout and scrofula. [B, 121 (*a*, 24).]—**F. szowitziana.** One of the Persian species supposed to be sources of sagapenum. [B, 121, 180 (*a*, 24).]—**F. teterrima.** A Persian species, yielding asafœtida. ["Proc. of the Am. Pharm. Assoc.," xxxvii (*a*, 14).]—**F. tingitana.** A species found in northern Africa, yielding a gum supposed to be the ammoniacum of the ancients; the μαγύδαρις of Dioscorides. [B, 5, 180 (*a*, 24).] See also AMMONIACUM.

FERULA NARTHEX. [A, 327.]

FERULACEA (Lat.), n. f. Fe^2-ru^2(ru^4)-la(la^3)'se^2(ke^2)-a^3. Of Raus, the *Ferula galbanifera.* [L. 94 (*a*, 21).]

FERULÆFOLIUS (Lat.), adj. Fe^2-ru^2(ru)-le(la^3-e^2)-fol(fo^{2}l)'-i^2-u^{2}s(u^{4}s). From *ferula* (*q. v.*), and *folium*, a leaf. Having leaves like those of the genus *Ferula.* [B.] See BUNIUM *ferulæfolium.*

FERULAGO (Lat.), n. f. Fe^2-ru^2(ru^4)-la(la^3)'go. Gen., *-lag'inis.* Of Koch, the genus *Ferula.* [B, 42 (*a*, 24).]—**F. Dodonæi.** See FERULA *f.*—**F. galbanifera.** The *Ferula galbanifera.* [B, 18, 64 (*a*, 24).]—**F. nodiflora.** See FERULA *sulcata.*

FERULAIC ACID, n. Fe^{2}r-u^2-la'i^{2}k. See FERULIC ACID.

FERULANA (Lat.), n. f. Fe2r-u2(u4)-la(la3)'na3. Of Boerhaave, a species of *Ferula*. [L, 94 (α, 21).]

FERULIC ACID, n. Fe2-ru2'li2k. Fr., *acide férulique*. Ger., *Ferulasäure*. A crystalline substance, $C_{10}H_{10}O_4$, obtained from asafœtida; melting at 154° C., and nearly insoluble in water. [B, 4 (α, 27).]

FERVOR (Lat.), n. m. Fu5r(fe2r)'vo2r(wo2r). Gen., *-vo'ris*. From *fervere*, to be hot. A violent and scorching heat. [L, 107.]

FESE, n. A form of elephantiasis peculiar to inhabitants of the islands of the South Pacific. [L, 41, 87.]

FESHOOK, n. A plant found in Morocco; according to Falconer, the *Ferula tingitana*; said to yield a variety of gum ammoniac. [B, 5, 121 (α, 24).] See FASOGH.

FESSE (Fr.), n. Fe2s. See BUTTOCK.

FESSEL (Ger.), n. Fe2s'se2l. See PASTERN.

FESSIER (Fr.), adj. Fe2s-se-a. Pertaining to the breech; as a n., a muscle of the gluteal region. [L.]—**F. moyen.** See ILIO-TROCHANTERIUS *medius*.—**F. profond.** See ILIO-TROCHANTERIUS *parvus*.—**F. superficiel.** See ILIO-TROCHANTERIUS *medius*.—**Grand f.** See GLUTÆUS *maximus* and ILIO-TROCHANTERIUS *magnus*.—**Moyen f.** See GLUTÆUS *medius* and ILIO-TROCHANTERIUS *medius*.—**Petit f.** See GLUTÆUS *minimus*, ILIO-TROCHANTERIUS *medius*, and ILIO-TROCHANTERIUS *parvus*.—**Petit f. antérieur.** The anterior portion of the glutæus minimus which is occasionally separate from the rest of the muscle. [α, 29.]

FESTERED, FESTERING, adj's. Fe2st'u5rd, -u5r-i2n2. Inflamed and suppurating (said of wounds).

FESTINATION, n. Fe2st-i2-na'shu3n. Lat., *festinatio*, *festinantia*. Fr., *hâte*, *précipitation*. Ger., *Eile*. A morbid tendency to hurry, symptomatic of certain nervous diseases. [D, 34.]

FESTIVIEN (Fr.), adj. Fe2s-te-ve-a3n2. Of insects, flying, during the whole day, from flower to flower. [L, 41.]

FESTONNÉ (Fr.), adj. Fe2s-to2n-na. See SPANDUS.

FESTOONED, adj. Fe2st-und'. Fr., *festonné*. Arranged in wavy hanging curves. [A, 301.]

FESTUCA (Lat.), n. f. Fe2s-tu2(tu)'ka3. Fr., *fétuque*. Of Linnæus, a genus of grasses; of Bentham and Hooker, a genus of the *Festuceæ*. The *Festucaceæ* (Fr., *festucacées*) are: 1. Of Humboldt, Bonpland, and Kunth, a section (of Nees, a family) of grasses, comprising the *Avenaceæ*, *Arundinaceæ*, and the true *F.* (*Bromus*, *Festuca*, *Triodia*, *Poa*, and *Melica*), or (Nees) the *Avenaceæ*, *Arundinaceæ*, and *Festuceæ*. 2. Of Sprengel, an order (of Agardh and others, a tribe) of grasses, comprising *Festuca*, *Triodia*, *Glyceria*, *Bromus*, *Poa*, etc., or, according to Endlicher and others, comprising the *Bromeæ* and *Bambuseæ*. 3. Of Reichenbach, a division of grasses, comprising the *Festuceæ* and *Bambuseæ*, or, subsequently, the *Triticeæ*, *Poaceæ*, and *Festuceæ*. The *Festuceæ* (Fr., *festucées*) are: 1. Of Nees, a section of the *Festucaceæ*, or, subsequently, a tribe of the *Gramineæ*; of Reichenbach, a subdivision of the *Festucaceæ*; of Grisebach, a subtribe of the *Poaceæ*; and of Lindley, a tribe of the *Graminaceæ*, comprising (Nees) *Cynosurus*, *Bromus*, *Festuca*, *Poa*, etc., or, subsequently, the *Poëæ* and *Bromeæ*, or (Reichenbach) the *Seslerieæ*, *Cynosureæ*, and *Bromeæ*, or (Grisebach) *Catapodium*, *Scleropoa*, *Festuca*, *Molinia*, *Arundo*, *Glyceria*, *Poa*, *Bromus*, *Triodia*, etc., or (Lindley) the *Bromidæ* and *Bambusidæ*. The *Festucineæ* of Miquel are a subtribe of the *Poaceæ*, consisting of *Eragrostis*, *Poa*, *Festuca*, *Briza*, *Bromus*, *Centotheca*, etc. [B, 34, 42, 170 (α, 24).]—**F. aurea.** Fr., *coutille*. The *F. spadicea* or *Poa triflora*, a species growing in middle Europe. [α, 24.]—**F. cærulea.** The *Molinia cærulea*. [B, 173 (α, 24).]—**F. cristata.** The *Poa cristata*. [B, 173 (α, 24).]—**F. decumbens.** The *Danthonia decumbens*. [B, 173 (α, 24).]—**F. domingensis.** The *Cynosurus domingensis*. [B, 173 (α, 24).]—**F. fluitans.** The *Glyceria fluitans*. [B, 173, 180 (α, 24).]—**F. glomerata.** The *Dactylis glomerata*.—**F. quadridentata.** Fr., *fétuque à quatre dents*. The pigonil of Quito; a species found in Peru. It is said to poison animals that eat it. [B, 19, 173 (α, 24).]

FESTUCARIA (Lat.), n. f. Fe2s-tu2(tu4)-ka(ka3)'ri2-a3. See DISTOMA.—**F. lentis.** See DISTOMA *ophthalmobium*.

FESTUCINE, adj. Fe2s'tu2-si2n. From *festuca*, a straw. Of a straw color. [B, 116 (α, 24).]

FESTUCOUS, adj. Fe2s'tu2-ku3s. Formed of straw. [B, 116 (α, 24).]

FESTWEICH (Ger.), adj. Fe2st'vich2. Semi-solid. [K, 16.]

FETAL, adj. Fet'a2l. See FŒTAL.

FETATION, n. Fe-ta'shu3n. See FŒTATION.

FETCH, n. Fe2ch. The *Vicia sativa*. [B, 275 (α, 24).]—**Wild f'es.** The *Vicia cracca*. [B, 275 (α, 24).]

FETICIDE, n. Fe2t'i2-sid. See FŒTICIDE.

FETID, adj. Fet'i2d. See FŒTID.

FÉTIDIER (Fr.), n. Fa-te-de-a. See FŒTIDIA.

FÉTIDITÉ (Fr.), n. Fa-te-de-ta. The state of being fœtid. [L, 43.]

FETIFEROUS, adj. Fe-ti2f'e2r-u3s. See FŒTIFEROUS.

FETLOCK, n. Fe2t'lo2k. A corruption of *foot-lock*. The long tuft of hair in horses just above the hoof, on the posterior aspect of the foot. [L, 13.]

FETOR (Lat.), n. m. Fe(fa)'to2r. See FŒTOR.

FETT (Ger.), n. Fe2t. See FAT and ADEPS. In the pl., *F'e*, see *Fixed* OILS.—**Aeschenf'.** See AXUNGIA *aschiæ*.—**Amberf'.** See AMBERIN.—**Dachsf'.** See ADEPS *taxi*.—**Faserstoff'.** The fat contained in the connective tissue of flesh and the muscular tissue. [α, 14.]—**Feinf'.** See EUPION.—**F'ablagerung.** A fatty deposit. [D, 4.]—**F'aggregatkugeln.** Cells so far degenerated as to appear like a ball of fatty granules. [Virchow, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," 1851 (J).]—**F'ähnlich.** Adipose.—**F'anhänge.** The appendices epiploicæ. [L, 80.]—**F'artig.** See ADIPOSE.—**F'äste.** Branches from a large blood-vessel to fat lobules lying alongside its path. ["Arch. f. mikr. Anat.," xii, p. 438 (J).]—**F'auslaufen.** See ACMÆOPIMELORRHŒA.—**F'balg.** See LIPOMA and STEATOMA.—**F'beule.** See LIPOMA.—**F'bildung.** The formation of fat. See also ADIPOSIS. [J.]—**F'bläschen.** See *Fat*-CELL.—**F'bruch.** See LIPOCELE and STEATOCELE.—**F'darm.** See RECTUM.—**F'degeneration.** Fatty degeneration. [D, 4.]—**F'drüsen.** See *Sebaceous* GLANDS.—**F'embolie.** See *Fatty* EMBOLISM.—**F'entartung.** See *Fatty* DEGENERATION.—**F'entzündung.** See PIMELITIS.—**F'fütterung.** Fatty diet.—**F'gewebsläppchen.** See *Fat* LOBULES.—**F'haltig.** Containing fat. [L, 31.]—**F'haut.** See PANICULUS *adiposus*.—**F'heit.** See CORPULENCE.—**F'herd.** A collection of fat. [B.]—**F'igzellig.** See ADIPO-CELLULAR.—**F'infiltration.** See *Fatty* DEGENERATION.—**F'insel.** The isolated collections or nests of fat cells as seen around the sebaceous follicles of the sweat glands. ["Arch. f. mikr. Anat.," xii, p. 438 (J).]—**F'klumpen.** See PLICÆ *adiposæ*.—**F'körnchen.** Granules of fatty matter found in the various tissues and fluids of the body. [J, 67.]—**F'körnchenzellen.** Degenerating cells filled with fat granules. [Virchow, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med." (J).]—**F'läppchen.** See FAT *lobule*.—**F'leibig.** See CORPULENT.—**F'leibigkeit.** See CORPULENCE.—**F'säure.** See OLEIC ACID and *Fatty* ACID.—**F'strasse.** The course or path taken by the absorbed fat at the base of the Lieberkühnian glands [Gruenhagen]. ["Arch. f. Mikr. u. Anat.," 29 Bd., p. 143 (J).]—**F'sucht.** See ADIPOSIS.—**F'zellenbildung.** The development of fat-cells. [J, 80.]—**F'zerlegend.** Fat-decomposing.—**F'zipfel.** See *F anhänge*.—**Gallenf'.** See CHOLESTERIN.—**Gänsef'.** See ADEPS *anserinus* and AXUNGIA *anseris*.—**Gehirnf'e.** Fatty substance contained in the brain. [L, 30 (α, 14).]—**Hammelf'.** See ADEPS *ovillus*.—**Hirnf'e.** See *Gehirn-f.*—**Hundef'.** See ADEPS *caninus*.—**Kammf'.** See ADEPS *colli equini*.—**Krankhafte Beschaffenheit des F'es.** See DYSPIONIA.—**Kuckukf'.** See AXUNGIA *cuculi*.—**Markf'.** The yellow or fatty marrow of bone. [J, 140.]—**Murmelthierf'.** See ADEPS *muris alpini*.—**Nahrungsf'.** Nutritious fat. [α, 14.]—**Neutralf'.** See *Neutral* FAT.—**Rindsklauenf'.** See *Neats-foot* OIL.—**Rindsmarkf'.** See ADEPS *medullæ bovis*.—**Schlangenf'.** See AXUNGIA *serpentum*.—**Schweinef'.** See ADEPS *suillus*.—**Seröse F'zellen, Serumhaltige F'zellen.** See SERUM-CELLS.—**Speckf'.** The hard layer of fat between the outer skin and the flesh of some animals, such as whales, pigs, etc. [L, 30, 37 (α, 14).]—**Subcutanf', Unterhautf'.** Subcutaneous fat. [J.]

FETTERWORT, n. Fe2t'e2r-wu5rt. The *Helleborus fœtidus*. [B, 121 (α, 24).]

FETTHENNE (Ger.), n. Fe2t'he2n-e2. The genus *Sedum*. [B, 180 (α, 24).]—**Breitblätterige F., Grosse F.** The *Sedum maximum*. [B, 180 (α, 24).]—**Kleine F.** The *Sedum acre*. [B, 180 (α, 24).]—**Knollige F.** The *Sedum telephium*. [B, 180 (α, 24).]—**Kriechende F.** The *Sedum anacampseros*. [B, 180 (α, 24).]—**Scharfe F.** The *Sedum acre*. [B, 180 (α, 24).]—**Weisse F.** The *Sedum album*. [B, 180 (α, 24).]—**Zurückgekrümmte F.** The *Sedum reflexum*. [B, 180 (α, 24).]

FETTKRAUT (Ger.), n. Fe2t'kra3-u4t. The genus *Pinguicula*. [B, 180 (α, 24).]—**Gemeines F.** The *Pinguicula vulgaris*. [B, 180 (α, 24).]

FÉTU (Fr.), n. Fa-tu6. The *Bromus secalinus*. [B, 121, 173 (α, 24).]

FÉTUQUE (Fr.), n. Fa-tu6k. See FESTUCA.—**F. flottante, F. penchée.** The *Glyceria fluitans*. [B, 173 (α, 24).]

FETUS (Lat.), n. m. Fe(fa)'tu3s(tu4s). See FŒTUS.

FEU (Fr.), n. Fu5. 1. Fire, combustion. 2. A burning sensation. 3. The application of the actual cautery. 4. A popular name for certain skin diseases characterized by redness, itching, etc., such as acne and erysipelas. [A, 385.]—**F. anglais.** A mixture of essence of lavender, oil of cloves, powdered cantharides, and euphorbia; sometimes croton-oil is added. [L, 49 (α, 34).]—**F. ardent.** See BRYONIA *alba*.—**F's au visage.** Facial cutaneous eruptions. [L, 43.]—**F. belge.** See *Oleum* MORRHUÆ *vesicans*.—**F. céleste.** See ERYSIPELAS *grangrænosum*.—**F. de dents.** A cutaneous eruption in children during dentition. [L, 34.]—**F. de Saint-Antoine.** 1. See ERYSIPELAS. 2. Epidemic gangrenous ergotism. [A, 518.]—**F. des ardents.** See MAL *des ardents*.—**F'x liquides.** Syn.: *médicaments résolutifs*. Preparations for external use containing various volatile oils, alcohol, cantharides, euphorbia, alum, and mineral acids. [B, 113 (α, 21).]—**F. liquide ordinaire** [Fr. Cod.]. A preparation made by digesting for two hours at a gentle heat 1 part of powdered euphorbia and cantharides in 10 parts of olive-oil, and adding 20 of oil of *Lavandula vera*. [B, 113 (α, 21).]—**F. nu.** The application of the actual cautery. [A, 385.]—**F. persique.** See HERPES *zoster*.—**F. rouge.** Roseola.—**F. sacré.** See ERYSIPELAS.—**F. Saint-Antoine.** See *F. de Saint-Antoine*.—**F. Saint-Marcel.** See ERYSIPELAS.—**F. sauvage.** Syn.: *ignis silvaticus*. An eruption that affects the face, particularly of children; the term was applied to herpes, impetigo, and porrigo. [α, 34.]—**F'x vétérinaires.** See *F'x liquides*.—**F. volage.** An ephemeral redness appearing first on one portion of the body, then on another. [α, 34.]

FEUCHTIGKEIT (Ger.), n. Foich2t'i2g-kit. See HUMIDITY, HUMOR, FLUID, and LIQUOR.—**Absolute F.** See *Absolute* HUMIDITY.—**Amnische F.** See *Liquor* AMNII.—**Ausgetretene F.** An extravasation. [L, 80.]—**Crystallische F.** The crystalline lens. [L, 80 (α, 29).]—**F'smesser.** See HYGROMETER.—**Glaserne F., Glasf'.** The vitreous humor of the eye. [α, 29.]—**Krystallene F.** The crystalline lens. [α, 29.]—**Lymphatische F'en.** See LYMPH.—**Morgani'sche F.** See HUMOR *Morgagnii*.—**Mucilaginöse F.** See HUMOR *mucilaginosus*.—**Nährende F.** See HUMOR

alimentarius.—**Nützliche F'en.** See Humores *utiles.*—**Oelichte F'en.** See Humores *oleosi.* [L, 80.]—**Relative F.** See *Relative* humidity.—**Thierische F'en.** The animal juices. [L, 80.]—**Unnützliche F.** See Humores *inutiles.*—**Wässerige F.** 1. The aqueous humor. 2. A watery humor of the body.

FEUCHTTANNE (Ger.), n. Foich^{2}t'ta^{3}n-e^{2}. The *Picea vulgaris.* [B, 180 (a, 24).]

FEUER (Ger.), n. Foi'e^{2}r. Fire.—**F'ähnlich.** Febrile. [L, 80.]—**F'bestattung.** Cremation. [A, 521.]—**F'beständig.** See Apyrous.—**F'bohne.** The *Phaseolus multiflorus.* [B, 180 (a, 24).]—**F'busch, F'dorn, F'dornmispel.** See Cotoneaster *pyracantha.*—**F'eifer.** See Ardor.—**F'erzeugend.** Pyrogenic. [L, 80.]—**F'fest.** See Apyrous.—**F'flecken.** German measles. [D.] See Rötheln.—**F'gürtel.** See Zoster.—**F'ig.** Igneous. [L, 80.]—**F'kraut.** The *Cladonia coccifera*, the herb of *Clematis erecta*, and the *Epilobium angustifolium.* [B, 180 (a, 24).]—**F'mal.** A vascular nævus. [A, 523.]—**F'masern.** 1. Roseola. 2. Rubeola. [G.]—**F'pflanzen.** See Emproophyta.—**F'pilz.** See Boletus *lupinus.*—**F'puppe.** See Moxa.—**F'salamander.** See Salamandra *maculosa.*—**F'schwamm.** See Amadou.—**F'stoff.** See Phlogiston.—**F'strauch.** See Cotoneaster *pyracantha.*—**F'wurm.** The *Lucanus cervus.* [B, 180.]—**F'wuth.** See Pyromania.—**Heiliges F.** See Erysipelas.—**Persisches F.** See Herpes *zoster.*

FEUILLADE (Fr.), n. Fu^{5}-el-ya^{3}d. See Frond.

FEUILLÆA (Lat.), n. f. Fu^{2}-i^{2}l-le(la^{3}'e^{2})-a^{2}. See Fevillea.

FEUILLAGE (Fr.), n. Fu^{5}-el-ya^{3}zh. See Foliage.

FEUILLAISON (Fr.), n. Fu^{5}-el-ye^{2}-zo^{2}n^{2}. See Foliation.

FEUILLE (Fr.), n. Fu^{5}-el-y'. See Leaf.—**F. de crocodile.** The *Desmodium umbellatum.* [B, 121 (a, 24).]—**F. d'Inde.** The *Laurus malabathrum.* [B, 121 (a, 24).]—**F. d'or.** The *Chrysophyllum ccinito.* [B, 121, 173 (a, 24).]—**F. du ciel.** The *Nostoc commune.* [B, 121, 173 (a, 24).]—**F. du diable.** The *Urtica urentissima.* [B, 121 (a, 24).]—**F. grasse.** The *Sedum telephium.* [B, 173 (a, 24).]—**F's indiennes.** The leaves of *Laurus cassia.* [B, 173 (a, 24).]—**F.-morte.** The *Hypholoma lacrimabundus.* [B, 121 (a, 24).]—**F's orientales.** The leaves of *Cassia acutifolia.* [B, 173 (a, 24).]—**F. perlée.** The *Dracontium pertusum.* [B, 121 (a, 24).]—**F. raméale.** A leaf inserted on the branches. [B, 104, 123 (a, 24).]—**F. séminale.** See *Primordial* leaf.—**F. stipulaire.** See *Stipulary* leaf.

FEUILLÉ (Fr.), adj. Fu^{5}-el-ya. See Foliate.

FEUILLEA (Lat.), n. Fu^{2}-i^{2}l-le(la)'a^{2}. See Fevillea.

FEUILLET (Fr.), n. Fu^{5}-el-ya. See Layer, Lamina, and Psalterium.—**F. animal du blastoderme.** See Epiblast.—**F. blanc semblable.** A nameless lamina of white substance which separates the claustrum from the island of Reil. [I, 28 (K).]—**F. corné.** The part of the ectoderm giving rise to the epidermis. [J, 28.]—**F. du cervelet.** See Lamina *of the cerebellum.*—**F's fondamentaux.** See *Fundamental* layers.—**F. germinatif supérieur.** See Epiblast.—**F's germinatives.** The germinal membranes or layers. [J.]—**F. glandulaire (intestinal [Remak]).** The hypoblast. [H.]—**F. médullo-épidermique.** See Somatopleure.—**F. moto-germinatif.** Of Remak, the mesoblast.—**F. moyen.** See Mesoderm.—**F. muqueux.** The hypoblast. [J, 36 (K).]—**F. nervoso-cutané.** Of Remak, the epiblast.—**F. primordial ectodermique.** The ectoderm before it has given rise to any part of the mesoderm. ["Ann. d. sci. nat.," Zool., 7 sér., t. vi, p. 271 (J).]—**F. primordial entodermique.** The primordial entoderm. ["Ann. d. sci. nat.," Zool., 7 sér., t. vi, p. 271 (J).]—**F's primitifs.** See *Primitive* layers.—**F's primordiaux.** See *Primordial* layers.—**F. proligère externe.** The primordial ectoderm. [J, 28.]—**F. proligère interne.** The primordial entoderm. [J, 28.]—**F. sensoriel.** Of Huguier, the epiblast. [J, 28 (K).]—**F. vasculaire.** The mesoderm. [J, 23, 28.]

FEUILLETÉ (Fr.), adj. Fu^{5}-el-y'-ta. See Laminated.

FEUILLETTE (Fr.), n. Fu^{5}-el-ye^{2}t. The *Polygonum bistorta.* [B, 121 (a, 24).]

FEUILLIN, n. Fu^{2}-i^{2}l'i^{2}n. Fr., *feuilline.* A bitter principle found in the seeds of *Fevillea cordifolia.* [A, 518.]

FEUILLOTTE (Fr.), n. Fu^{5}-el-yo^{2}t. See Feuillette.

FEUILLU (Fr.), adj. Fu^{5}-el-yu^{5}. See Foliose.

FEURS (Fr.), n. Fu^{5}r. A place in the department of the Loire, France, where there is a cold chalybeate spring spouting from the trunk of a tree. [L, 49, 105 (a, 14).]

FEUTRAGE (Fr.), n. Fu^{5}-tra^{3}zh. A felt-like interlacement of filaments. [A, 385.]

FEUTRE (Fr.), n. Fu^{5}-tr'. See Felt.

FÈVE (Fr.), n. Fe^{2}v. 1. See Bean (1st def.). 2. Any leguminous plant. [B, 121, 173 (a, 24).] 3. In entomology, a chrysalis. 4. The disease of horses termed lampass or lampers. [A, 301.]—**Collyre à l'extrait de f. de Calabar.** A collyrium composed of 1 part of extract of physostigma and 100 parts of distilled water. [L, 87 (a, 21).]—**Extrait de f's de Calabar** [Fr. Cod.]. See *Extractum* physostigmatis.—**F. à cochon.** The *Hyoscyamus niger.* [B, 121 (a, 24).]—**F. à longues gousses.** See Faba *longisiliqua.*—**F. à visage.** The *Phaseolus vulgaris.* [B, 121, 173 (a, 24).]—**F. cultivée.** The *Vicia faba.* [B, 173 (a, 24).]—**F. de Bengale.** The fruit of *Terminalia citrina.* [B, 173 (a, 24).]—**F. de Calabar.** The Calabar bean (seed of *Physostigma venenosum*). [B, 121 (a, 24).]—**F. de Carthagène.** The seed of a tree called *haliba* in eastern Central America; referred to *Hippocratea scandens* and to *Hippocratea grandiflora.* [B, 121 (a, 24).] See also *Pichurim* bean.—**F. de cheval.** The horse-bean (*Faba vulgaris*, var. *equina*). [B, 173 (a, 24).]—**F. d'Égypte.** The *Nelumbium speciosum.* [B, 121, 173 (a, 24).]—**F. de l'Inde.** The *Strychnos Ignatii.* [B, 121, 173 (a, 24).] See also *Indian* bean.—**F. de loup.** The *Helleborus fœtidus* and the *Aconitum napellus.* [B, 121, 173 (a, 24).]—**F. de Malac (ou Malacca).** The *Semecarpus anacardium.* [B, 121, 173 (a, 24).]—**F. de marais.** The *Vicia faba.* [B, 121, 173 (a, 24).]—**F. de mer.** The *Phaseolus vulgaris.* [B, 173 (a, 24).]—**F. de porc.** The *Hyoscyamus albus.* [B, 121, 173 (a, 24).]—**F. de Pythagore.** The fruit of *Ceratonia siliqua.* [B, 121, 173 (a, 24).]—**F's de Saint-Ignace** [Fr. Cod.]. See Ignatia and *St. Ignatius's* bean.—**F. des champs.** The *Faba minor.* [B, 121, 173 (a, 24).]—**F. de terre.** The *Arachis africana.* [B, 173 (a, 24).]—**F. de Tonka.** The *Coumarouna odorata.* [B, 88 (a, 14).]—**F. de Windsor.** See Faba *rotunda.*—**F. du Calabar** [Fr. Cod.]. See Physostigma (2d def.).—**F. du diable.** See Capparis *breynia.*—**F's du Mexique.** The seeds of *Theobroma cacao.* [B, 81 (a, 21).]—**F. épaisse.** The *Sedum anacampseros* and the *Sedum telephium.* [B, 121, 173 (a, 24).]—**F. grasse.** The *Sedum telephium.* [B, 121, 173 (a, 24).]—**F. igasurique.** Ignatia. [B.]—**F. julienne.** See Faba *julianna.*—**F. lovine.** The *Lupinus albus*, or its fruit. [B, 121, 173 (a, 24).]—**F. lupine.** The *Securigera coronilla.* [B, 121, 173 (a, 24).]—**F. marine.** The *Umbilicus pendulinus.* [B, 121 (a, 24).]—**F. pichurim.** See *Pichurim* bean.—**F. peinte.** See *F. de mer.*—**F. pontique.** The *Nymphœa lotus.* [B, 121, 173 (a, 24).]—**F's puantes.** A kind of peas (believed to be the seeds of *Mucuna pruriens*) growing in Java; so called from the odor they communicate to one who eats them. [B, 88 (a, 14).]—**F. tonga, F. tongo.** See *F. de Tonka.*—**F. verte.** See Faba *viridis.*—**Petit f.** The *Phaseolus vulgaris.* [B, 173 (a, 24).]—**Poudre de f. de St.-Ignace** [Fr. Cod.]. A preparation made by washing the seeds of *Strychnos Ignatii* in cold water, steaming until quite soft, slicing, triturating, and passing through a No. 120 sieve. [B, 113 (a, 21).]—**Teinture de f. de Calabar** [Fr. Cod.]. A preparation made by macerating for ten days 1 part of the seeds of *Physostigma venenosum* in 5 parts of 80-per-cent. alcohol, agitating from time to time, straining with expression, and filtering. [B, 113 (a, 21).]

FEVER, n. Fe'vu^{5}r. Gr., πυρετός. Lat., *febris* (from *fervere*, to glow). Fr., *fièvre.* Ger., *Fieber.* It., *febbre.* Sp., *fiebre, calentura.* A morbid condition of the system characterized by a more or less enduring elevation of the bodily temperature, usually with acceleration of the heart's action, often associated with chills or chilly sensations, pains in various parts of the body, loss of appetite, and restlessness, and, when severe or long continued, with delirium and progressive feebleness and emaciation.—**Abdominal f.** See *Enteric f.* and *Typhoid f.*—**Abdominal typhus f.** See *Typhoid f.*—**Abortive typhoid f.** Typhoid f. that begins suddenly, the temperature being high from seven to twelve days, and defervescence occurring by the sixteenth day. The usual symptoms are present. [a, 34.]—**Acclimation f.** Fr., *fièvre d'acclimatement.* A f. occurring among recent immigrants and due to change of climate. [a, 34.]—**Acclimatization f. of the West Indies.** 1. Typhomalarial f. 2. Mild yellow fever. [a, 34.]—**Acute continual f.** [Langrish]. Simple continued f. [a, 34.]—**Acute infantile remittent f.** See *Infantile gastric remittent f.*—**Adeno-meningeal f.** Lat., *febris adenomeningealis.* Fr., *fièvre adéno-méningée.* Ger., *adenomeningeïsches Fieber.* 1. Of Gardien, a form of puerperal f. characterized by "slow f. with cerebral disturbance." [A, 43.] 2. See *Typhoid f.* 3. See *Catarrhal f.*—**Adeno-nervous** (or **neurotic**) **f.** Lat., *febris adenonervosa.* Fr., *fièvre adéno-nerveuse.* Ger., *adenoneurotisches Fieber.* Of Pinel, the plague of the Levant; so called because of the nervous symptoms and the engorgement of the lymphatic glands. [A, 306.]—**Adynamic f.** Lat., *febris adynamica.* Fr., *fièvre adynamique.* Ger., *adynamisches Fieber.* A term formerly applied indiscriminately to typhus and typhoid f's, and at the present time to any f. characterized by marked prostration. [a, 34.]—**Adynamic remittent f.** See *Aquamalarial f.*—**Adynamo-ataxic f.** See *Ataxo-adynamic f.*—**African f.** Lat., *febris africana.* An intermittent, remittent, or pernicious malarial f. occurring on the African coast. [a, 34.]—**Agrypnoid f.** See Agrypnodes.—**Albumose f.** Of Ott, f. produced by injecting proto-albumose or deuto-albumose into the circulation of a rabbit. [a, 34.]—**Algid congestive f.** A variety of congestive f. characterized by a persistent chill, and sometimes accompanied by vomiting and choleraic diarrhœa. [D, 25.]—**Algid f.** Lat., *febris algida.* Fr., *fièvre algide* (ou *hypothermique*), *hypothermie* (3d def.). Ger., *kaltes Fieber.* 1. A f. in which the extremities, face, and trunk rapidly become cold; the heart's action is slow, feeble, and struggling; the skin is livid, and the general appearance is that of impending dissolution. 2. An intermittent f. in which the cold stage is exaggerated. [a, 34.] 3. An abnormal lowering of the bodily temperature. [Paul, "Sem. méd.," Aug. 3, 1887, p. 268 (a, 18).]—**Algid yellow f.** Of Lyons, a variety of yellow f. presenting the most rapid course of all, and the earliest and most intense prostration. [D, 1.]—**Alterdian f.** A term proposed for tertian intermittent f. [Schauffler (A, 473).]—**Ambulatory typhoid f.** Fr., *fièvre typhoide ambulatoire.* Typhoid f. in which the usual symptoms are slight or absent, and the patient is able to walk about until sudden prostration occurs. [a, 34.]—**Amphemerine f.** See Amphemerina.—**Angeiocardiac f.** Fr., *fièvre angiocardique.* The fever of endocarditis. [L, 49 (a, 34).]—**Angeiothenic f.** See Febris *angeiothenica.*—**Anginous scarlet f.** Lat., *scarlatina anginosa.* Fr., *fièvre rouge.* A severe form of scarlet f., with angina, often of a phlegmonous sort. [D, 1.]—**Anomalous f.** Lat., *febris anomala.* Fr., *fièvre anomale.* Ger., *anomalisches Fieber.* A remittent or intermittent f. accompanied by nervous or other phenomena rendering its classification uncertain. [a, 34.]—**Anomalous scarlet f.** Scarlet f. presenting certain anomalous symptoms, particularly as to the eruption, the desquamation alone being similar to that occurring in ordinary scarlet f. [Squire, "Practitioner," p. 144, 1888, xl, (a, 34).]—**Anticipating intermittent f.** Lat., *febris anticipans.* Ger., *anticipirendes* (oder *vorsetzendes*) *Fieber.* An intermittent f. in which each paroxysm occurs earlier in the day than the preceding paroxysm did. [D, 1.]—**Aphonic f.** Lat., *febris aphonica.* Fr., *fièvre aphonique.* A form of pernicious intermittent f. in which aphonia is a prominent symptom. [D, 74.]—

Aphthous f. Lat., *febris aphthosa.* Fr., *fièvre* (ou *stomatite*) *aphtheuse*, *cocotte.* Ger., *Aphthenfieber.* See APHTHÆ *epizooticæ.* —**Apoplectic cerebral typhus f.** See *Cerebro-spinal* MENINGITIS. —**Apoplectic f.** See *Comatose f.*—**Aqua-malarial f.** A malarial remittent f. due to the drinking of water containing the malarial poison. [A. A. Gore, "Dublin Jour. of Med. Sci.," Apr., 1884, p. 306 (D).]—**Ardent continued f.** [Morehead]. See *Continued f.* —**Ardent f.** Lat., *febris ardens.* Fr., *fièvre ardente.* Ger., *Brennfieber.* 1. A f. with symptoms like those of typhoid f. 2. Of Boerhaave, an intensified remitten f. 3. Thermic f. [Eloy, "Union méd.," May 24, 1884, p. 913 (α, 34).] 4. Of Burnett, simple continued f. 5. Of Gillespie, yellow f. [α, 34.]—**Army f.** Typhus f. epidemic in an army. [α, 34.]—**Arracan f.** Various forms of malarial f. [α, 34.]—**Arterial f.** Of Marcus, a f. proceeding from the arterial system. [D, 3.]—**Arthritic f.** Lat., *febris arthritica.* Fr., *fièvre arthritique.* 1. A f. with inflammation of the joints. 2. The symptomatic f. of gout. [α, 34.]—**Articular f.** Of Thaly, dengue. [α, 34.]—**Artificial f.** F. produced by the use of some exciting agent by malingerers. [α, 34.]—**Aseptic f.** Ger., *aseptisches Fieber.* A traumatic f. not due to sepsis. [Horsley, "Lancet," Dec. 27, 1884, p. 1133.]—**Asodic f.** Asodes. [α, 34.]—**Asthenic f.** Lat., *febris asthenica.* Fr., *fièvre asthénique.* Ger., *asthenisches Fieber.* Syn.: *low f.* A term applied to any continued f., but particularly typhus, characterized by increasing feebleness, with great cardiac depression, a pinched expression of the face, and cold perspiration. [A, 2.]—**Asthenic simple f.** A simple continued f. in which there are, besides slight elevation of temperature and rapidity of pulse, anorexia, debility, headache, insomnia, furred tongue, and an asthenic condition for fourteen days or more. [Murchison (α, 34).]—**Asthmatic f.** Lat., *febris asthmatica.* Fr., *fièvre asthmatique.* A form of pernicious malarial f. accompanied by asthmatic breathing. [L, 116.]—**Ataxic f.** Lat., *febris atacta.* Fr., *fièvre ataxique.* Of Pinel, a general term for pernicious, malignant, typhus, and nervous f's. [α, 34.]—**Ataxo-adynamic f.** Lat., *febris atacto-adynamica.* Fr., *fièvre ataxo-adynamique.* Of Pinel, a febrile disorder that probably was typhoid f. [D, 72.]—**Atrabiliary f.** Lat., *febris atrabilaria.* Fr., *fièvre atrabiliaire.* Ger., *atrabiliarisches* (oder *schwarzgalliges*) *Fieber.* Hæmorrhagic malarial f. [Maillot (α, 34).]—**Atrabilious hectic f.** Lat., *febris hectica atrabilaria.* F. produced by chronic congestion or obstruction of the liver. [α, 34.]—**Atypical f.** Ger., *atypisches Fieber.* See *Anomalous f.*—**Atypical typhoid f.** 1. Of Greenley, typho-malarial f. 2. Typhoid f. with symptoms that do not conform to those usually present in that disease. [α, 34.]—**Auriginous f.** See FEBRIS *auriginosa.*—**Autumnal f.** Fr., *fièvre automnale.* A f. that prevails largely in the autumn, such as typhoid, typho-malarial, and malarial f's. [α, 34.]—**Awal f.** A form of malarial or climatic f. of an intermittent or remittent character, which prevails in the Kumaon hill-ranges in northwestern Bengal. [A. A. Gore, *l. c.* (D).] —**Ballast f.** F. from emanations from foul ballast.—**Barbadoes f., Barcelona f.** See *Yellow f.*—**Bastard f.** See *Anomalous f.* —**Bath f.** Ger., *Badsturm.* A febrile condition due to a too prolonged use of warm baths. [B, 15.]—**Bengal f.** The remittent f. of Bengal. [α, 34.]—**Benign f.** Lat., *febris benigna.* Ger., *gutartiges Fieber.* A f. that pursues a mild course. [α, 34.]—**Benign scarlet f.** See *Simple scarlet f.*—**Besika Bay f.** The pernicious malarial f. of Besika Bay. [α, 34.]—**Bight of Benin f.** The remittent f. of the Bight of Benin. [α, 34.]—**Biliary f.** Relapsing f. with jaundice. [α, 34.]—**Bilio-gastric f.** [Copland]. See *Typhoid f.*—**Bilio-inflammatory f.** See FEBRIS *biliosa inflammatoria.*—**Bilious continued f.** See *Typhoid f.*—**Bilious f.** Lat., *febris cholepyretica.* Fr., *fièvre bilieuse.* 1. Of Tissot, see *Typhoid f.* 2. Remittent f. supposed to be caused by biliary troubles. 3. Simple gastritis. [α, 34.]—**Bilious hæmaturic f.** Fr., *fièvre bilieuse hématurique.* Hæmorrhagic malarial f. with hæmaturia. [α, 34.]—**Bilious relapsing f.** [Steele]. Relapsing f. with jaundice. [α, 34.]—**Bilious remittent f.** A remittent f. with vomiting of bile, jaundice, and pronounced mental and physical prostration, but without hæmaturia or albuminuria. [α, 34.]—**Bilious remittent yellow f.** [Rush]. See *Yellow f.*—**Bilious typhoid f.** [Griesinger]. Lat., *typhus biliosus.* Fr., *fièvre bilieuse typhoïde.* Ger., *biliöser Typhus.* Relapsing f. with jaundice. [α, 34.]—**Black f.** [Lyons]. Cerebro-spinal meningitis. [α, 34.]—**Black-water f.** Fr., *fièvre bilieuse mélanurique* (ou *hématurique*). A form of tropical f. attacking persons already suffering from malarial f., and occurring on the western coast of Africa; characterized by a sudden onset, melanuria, vomiting of a clear green fluid, icterus, and an irregular febrile movement. [J. F. Easmon, "Med. Times and Gaz.," Aug. 29, 1885, p. 277 (α, 17).]—**Bladdery f.** See PEMPHIGUS *acutus.*—**Boa Vista f.** See *Yellow f.*—**Bona f.** Pernicious malarious f. of Bona, Algeria. [α, 34.]—**Bone f.** Septic f. from wounds of the fingers in workers in bone. [α, 34.]—**Boo Khar f.** The thermic f. of India. [Condict, "Buffalo Med. and Surg. Jour.," xxviii, p. 665 (α, 34).]—**Bouquet f.** Dengue. [α, 34.]—**Brain f.** Any febrile disease with inflammation of the brain or its membranes or with severe cerebral disturbance.—**Brain-water f.** F. accompanying hydrocephalus. [α, 34.]—**Break-bone f.** Fr., *fièvre brisant les os.* See DENGUE.—**Breslau f.** Lat., *tritæophyia vratislaviensis* [Sauvages]. An epidemic f. which broke out in the Prussian army at Breslau in the middle of the last century. [L, 107.]—**Broken-wing f.** See DENGUE.—**Bubonic typhus f.** Typhus f. with inflammatory swellings in the parotid, submaxillary, axillary, mammary, or inguinal region. The swellings may appear in the first week of the f., or during defervescence; they usually suppurate rapidly. [α, 34.] —**Bucket f.** Dengue. [α, 34.]—**Bukowina f.** The pernicious malarial f. of Bukowina. [α, 34.]—**Bulam f.** [Pym]. Fr., *fièvre de Boulam.* Ger., *Bulamfieber.* See *Yellow f.*—**Bullous f.** See PEMPHIGUS *acutus.*—**Bullous scarlet f.** Lat., *scarlatina pemphigoides* (seu *pustulosa*). Scarlet f. attended with a bullous or pustular eruption. [Bramwell, "Med. Times and Gaz.," Nov. 10, 1887, p. 517.]—**Burdwan f.** 1. Of Roy, the typho-malarial f. of lower Bengal. 2. Relapsing f.—**Burning f.** A f. in which the skin is very hot to the touch. [α, 34.]—**Cacochymic f.** See FEBRIS *cacochymica.*—**Caisson f.** See *Caisson* DISEASE.—**Calving f.** Puerperal f. in cows. [T. D. Hinebauch, "Am. Vet. Rev.," Apr., 1889, p. 28.]—**Camp-f.** Lat., *febris castrensis.* Fr., *fièvre des camps.* A general term for typhoid and typho-malarial f's occurring during a campaign. [α, 34.]—**Carbuncular f.** See *Contagious* ANTHRAX.—**Cardialgic f.** Lat., *febris cardialgica.* Fr., *fièvre cardialgique.* A f. that is accompanied by paroxysms of cardialgia. [α, 34.]—**Carditic f.** Fr., *fièvre carditique.* A severe intermittent f. with acute pain in the præcordium, great palpitation, extreme feebleness of the pulse, and syncope. [α, 34.]—**Cataleptic f.** Fr., *fièvre cataleptique.* A form of pernicious malarial f. marked by the occurrence of convulsions. [D, 74.]—**Catamenial f.** The chill, pallor, and mild f. that sometimes precede the first menstruation, and may occur at the change of life. Occurring during regularly established menstruation, it may be due to inflammation of the oviducts or ovaries. [α, 34.]—**Catarrhal f.** Lat., *febris catarrhalis.* Fr., *fièvre catarrhale* (ou *catarrheuse*). Ger., *Schleimfieber.* 1. F. caused by catarrh, especially of the nose, larynx, or bronchi. 2. Influenza. [α, 34.]—**Catarrhal typhus f.** Typhus f. complicated with bronchitis and hypostatic consolidation. [α, 34.]—**Cathemerine f.** See *Quotidian intermittent f.*—**Catheter f.** Of Sir A. Clark, a form of urethral f. due to the introduction of a catheter.—**Cattle-plague f.** F. occurring where rinderpest exists; the incubation period varies from seven to twenty-one days; the initial symptoms are a sensation of fullness over the eyebrows, oppression of the chest, listlessness, anxiety, staggering gait, trembling, anorexia, and rigors with spinal tenderness. The pulse is small and frequent; the tongue swollen and furred; the urine scanty; dysenteric stools of a putrid odor occur by the third day; the skin is wrinkled and covered with purpuric blotches followed by an herpetic eruption; in convalescence there is desquamation; there are arthritic pains; and vision is impaired. In favorable cases the eruption disappears and the f. ceases between the seventh and twenty-first days. In fatal cases a necropsy has shown lesions similar to those found in cattle that died of rinderpest. [Harbard, "Med. Times and Gazette," May 19, 1886, p. 519 (α, 34).]—**Cephalalgic f.** Lat., *febris cephalalgica.* Fr., *fièvre céphalalgique.* A f. accompanied by severe cephalalgia. [L, 116.]—**Cephalic f.** See FEBRIS *cephalica.*—**Cerebral f.** Fr., *fièvre cérébrale.* 1. An ataxic typhus f. 2. Brain f. [α, 34.]—**Cerebro-spinal f.** See *Cerebro-spinal* MENINGITIS. —**Cesspool f.** See *Typhoid f.*—**Chagres f.** A severe form of malarial f. acquired on the Isthmus of Panama, often developing into the pernicious or hæmorrhagic form of malarial f. ["Am. Jour. of the Med. Sci.," xxxi, p. 319 (α, 34).]—**Chickahominy f.** A severe and peculiar form of typho-malarial f. which prevailed extensively among the soldiers of the United States army during the Peninsula campaign of the War of the Rebellion when they were stationed for a long period in the Chickahominy swamps. [D, 25.] —**Childbed f.** Ger., *Kindbetterinfieber.* See *Puerperal f.*—**Chlorotic f.** See CHLOROSIS.—**Choleric f.** Lat., *febris cholerica.* Fr., *fièvre cholérique.* A malarial f. in which the paroxysms are accompanied by choleraic symptoms. [L, 116.]—**Choleric f. of infants** [Copland]. See CHOLERA *infantum.*—**Chronic f.** Lat., *febris chronica.* Fr., *fièvre chronique.* A f. which lasts for weeks or months. It is usually of an intermittent or a remittent form, as in pulmonary phthisis. [D, 3.]—**Chronic infantile remittent f.** Typhoid f. in children. [α, 34.]—**Chronic remittent f.** Remittent f. that is protracted for six or eight weeks. [α, 34.]—**Climate f.** See *Acclimation f.*—**Colliquative f.** Lat., *febris colliquativa.* Fr., *fièvre colliquative.* A f. attended with rapid and excessive emaciation, either from the intensity of the f. itself or from exhaustive diarrhœa and sweating. [B, 117.]—**Colonial f.** Of Hunt, the pernicious malarial f. of Australia. [α, 34.]—**Colo-typhus f.** [Louis]. A variety of typhoid f. in which the solitary glands of the colon undergo the same changes as those of the small intestine. [D, 1.]—**Comatose f.** Lat., *febris apoplectica* (seu *comatosa*). Fr., *fièvre comateuse.* A pernicious malarial f. with coma. [α, 34.]—**Common continued f.** Simple continued, ephemeral, or irritative f. [α, 34.]—**Complicated f.** Lat., *febris complicata.* Fr., *fièvre compliquée.* Ger., *Mischfieber.* 1. A f. in which there are disturbances of other nervous centres besides the thermic centre. [Samuel (A, 319 [α, 34]).] 2. Of the old nosologists, a mixed f. [α, 34.]—**Congestive continued f.** A f. of the tropics ushered in by dryness of the skin and epigastric oppression for a few days, when suddenly there are headache, acceleration of the pulse and respiration, anorexia, restlessness, and afterward delirium, jaundice, and cerebral or visceral congestion that may end fatally. [α, 34.]—**Congestive f.** 1. A form of malarial f. that may begin as either an intermittent or a remittent f.; during the course of the disease there are a rigor, with coldness of the body and limbs, a death-like hue of the face, and sometimes vomiting and purging. The respiration is rapid and superficial, the pulse is rapid and thready, and a clammy sweat often appears. Sometimes, with stimulating treatment, these symptoms disappear, though usually coma rapidly supervenes, ending in death. 2. Of Squire, cerebro-spinal meningitis. [α, 34.]—**Congestive puerperal f.** Of Copland, puerperal f. caused by inflammation of the uterus or its appendages or of the blood-vessels or lymphatic vessels. [α, 34.]—**Congestive typhus f.** Of Armstrong, typhus f. with symptoms of cerebral cardiac or pulmonary congestion. [α, 34.]—**Contagious f.** Lat., *febris contagiosa.* Fr., *fièvre contagieuse.* Of Bateman, see *Typhus f.*—**Contagious nervous f.** Typhus f. [α, 34.]—**Continent f., Continual f., Continued f.** Lat., *febris continua* (seu *acmastica*). Fr., *fièvre continuée* (ou *continente*). Ger., *anhaltendes Fieber.* A f. in which the daily variations of temperature are slight and the f. continues seven days or more. [D, 3; α, 34.]—**Continued thermic f.** Of Guitéras, see *Thermic f.* (1st def.).—**Convulsive f.** Lat., *febris convulsiva.* Fr., *fièvre convulsive.* Intermittent or remittent f. with convulsions. [α, 34.]—**Country f.** An endemic malarial f., usually of long duration. [α, 34.]—**Creole yellow f.** See *Hæmorrhagic malarial f.*—**Crete f.** The malarial f. of the island of Crete. [α, 34.]—**Critical f.** See FEBRIS *critica.*

—**Cutaneous f.** Of Bailly, an exanthematous f. [a, 34.]—**Cutaneous hectic f.** Of Broussais, a gastric hectic f. with cutaneous erythema, or urticaria, consequent on indigestion. [a, 34.]—**Cyprus f.** A pernicious malarial f. of Cyprus, with apoplectoid, epileptoid, or comatose symptoms. ["Lancet," 1878, ii, p. 879 (a, 34).]—**Dandy f.** Dengue; so called on account of the stiffness of the joints of the lower limbs, with consequent peculiarity of gait which accompanies it. [D, 20.]—**Date f.** [Vauvray]. A form of f. (supposed to be dengue) occurring in Egypt about the time of the date harvest. [D, 46.]—**Day f.** The sweating sickness; so called because it proves fatal in a few hours. [L, 73.]—**Deccan f.** Pernicious malarious f. [a, 34.]—**Decimal f., Deciman f.** Lat., *febris decimana.* Fr., *fièvre décimale* (ou *décimane*). A f. in which an exacerbation occurs every ninth day. [L, 116.]—**Delirious f.** Lat., *febris cum delirio.* Fr., *fièvre délirante.* F. accompanied with delirium. [L, 116.]—**Dengue f.** See Dengue.—**Dental f.** Fr., *fièvre dentaire.* Ger., *Zahnfieber.* A f., fleeting in character, with irregular crises, that may develop severe meningeal congestion; it appears during the first dentition, and seems to be of reflex nervous origin. [a, 34.]—**Depurative f., Depuratory f.** Lat., *febris depuratoria* (seu *depurativa*). Fr., *fièvre dépuratoire.* Ger., *reinigendes Fieber.* An old term for a f. lasting from fourteen to twenty-one days, with considerable prostration, and often associated with diarrhœa; probably typhoid f. [a, 34.]—**Diamond-field f.** A typho-malarial f. occurring among laborers in the South African diamond fields. [a, 34.]—**Diaphoretic f.** Lat., *febris diaphoretica.* Fr., *fièvre diaphorétique.* Malarial f. with profuse sweating during the exacerbations. [L, 116.]—**Diary f.** Fr., *fièvre diaire.* Ger., *Eintagsfieber.* See *Ephemeral f.*—**Diathetic f.** Fr., *fièvre diathésale.* A f. that results from some diathesia. [L, 49 (a, 34).]—**Digestive f.** A f. due to indigestion, presenting symptoms similar to those of gastritis. [a, 34.]—**Diphtheritic f.** Fr., *fièvre diphthéritique.* F. accompanying diphtheria. [a, 34.]—**Diphtheroid f.** See Febris *diphtheroides.*—**Divergent enteric f.** Typhoid f. with pronounced symptoms of affection of the nerve centres or of the gastro-intestinal, hepatic, respiratory, renal, or integumentary systems. [Neve, "Am. Jour. of the Med. Sci.," Oct., 1890, p. 358 (a, 24).]—**Double quartan intermittent f.** Fr., *fièvre double quarte* (ou *quarte doublée*). Ger., *doppeltviertägiges Fieber.* Intermittent f. in which two paroxysms occur every fourth day. [D, 72.]—**Double quotidian intermittent f.** Fr., *fièvre double quotidienne.* Malarial f. with two paroxysms each day. [a, 34.]—**Double tertian intermittent f.** Fr., *fièvre double tierce* (ou *tierce doublée*): Ger., *doppeltdreitägiges Fieber.* 1. A malarial f. having two paroxysms every second day, and none on the intervening day. 2. A malarial f. having a daily paroxysm, in which that on the first and third and the second and fourth days are at the same hour. [a, 34.]—**Double unequal tertian intermittent f.** A double tertian f. in which one set of paroxysms has a more perfect intermission than the other. [D, 90.]—**Duodecimane f.** See Febris *duodecimana.*—**Duplicated quartan intermittent f.** See *Double quartan intermittent f.* (1st def.).—**Dynamic f.** 1. A sthenic f. 2. Of Stoker, relapsing f. [a, 34.]—**Dysenteric f.** Lat., *febris dysenterica.* Fr., *fièvre dysentérique.* The f. associated with dysentery. [a, 34.]—**Dysenteric typhus f.** Typhus f. complicated by dysentery; in fatal cases no lesions of the ileum are found. [a, 34.]—**Emotional f.** A f. with no distinct prodromes, occasionally ushered in by a chill, with photophobia and hysterical symptoms during the pyrexia. It is due to excessive emotion. [Fleming, "Trans. of the Med. Soc. of Pa.," 1879, 2, p. 621 (a, 34).]—**Endemial f., Endemic f.** See Endemic.—**Endemico-epidemic f.** Of W. M. Wood, a sickness observed in twenty-two men of the garrison at Indian Keys, who were attacked suddenly, after eating spoiled beef, with high f., delirium, and pulmonary congestion. ["Am. Med. Intell.," 1839, p. 309 (a, 24).—**Endemic remittent f.** Of Cragie, a form of remittent f. chiefly met with in tropical climates. [D, 1.]—**Enteric f.** Lat., *febris enterica.* Fr., *fièvre entérique* (ou *intestinale*). 1. The f. of enteritis, also any f. with prominent enteric symptoms. 2. See *Typhoid f.*—**Enteritic f.** [Mills]. Typhoid f. [a, 34.]—**Entero-malarial f.** A f. in which the *Plasmodium malariæ* of Laveran is found in the blood, and the typhoid bacillus in the stools. [J. J. Kinyoun, "N. Y. Med. Jour.," Apr. 26, 1890, p. 475 (a, 34).]—**Entero-mesenteric f.** Fr., *fièvre entéro-mésentérique, entéro-mésentérite typhoïde.* See *Typhoid f.*—**Ephemeral arthritic f.** Of J. A. Ore, a form of f. observed on shipboard after leaving India; probably dengue. ["Edinb. Jour. of Med. Sci.," 1827, p. 229 (a, 24).]—**Ephemeral f.** Lat., *febris ephemera.* Fr., *fièvre éphémère.* A f. of very brief duration, usually completing its course within twenty-four hours. [a, 34.]—**Epidemical epidemic f.** [Rogers]. See *Typhus f.*—**Epidemic eruptive rheumatic f.** Dengue. [a, 34.]—**Epidemic erysipelatous f.** A f. accompanied by sore throat and enlarged tonsils, pain in the back and joints, nausea, constipation, and chills at the end of twenty-four hours. The cervical lymphatic glands are enlarged, and there is occasionally an erysipelatous eruption on the face or body, with subsequent subcutaneous suppuration. The danger of the disease depends upon the formation of sloughs in the throat or exhaustion from suppuration and gangrene elsewhere in the body. [Bennet, "N. Y. Jour. of Med.," July, 1853, p. 9 (a, 34).]—**Epidemic f.** Fr., *fièvre épidémique.* Of the old writers, typhus, typhoid, or relapsing f. [a, 34.]—**Epidemic f. of Edinburgh** [Welsh]. See *Relapsing f.*—**Epidemic f. of Gibraltar** [Halford]. See *Gibraltar f.*—**Epidemic f. of Ireland** [Barker]. See *Relapsing f.*—**Epidemic gastric f.** [Cheyne]. See *Typhoid f.*—**Epidemic gastro-rheumatic f.** Ger., *epidemischesgastrischrheumatisches Fieber.* An epidemic f. that prevailed at Blankenburg from 1859 to 1862, characterized by gastro-enteritis and œdema of the subcutaneous tissue and muscles. [Scholz, "Dtsch. Klin.," xiv, p. 485 (a, 34).]—**Epidemic inflammatory f. of Calcutta.** See Dengue.—**Epidemic petechial f.** Fr., *fièvre pétéchiale épidémique.* Of Fracastor (1505 to 1528), typhus f. [D, 74.]—**Epidemic remittent f.** See *Relapsing f.*—**Epigastralgic f.** A pernicious intermittent fever with severe epigastric pains due to gastro-enteritis. [Bailly (a, 34).]—**Epileptic f.** Lat., *febris epileptica.* Fr., *fièvre épileptique.* A malarial f. with epileptic symptoms during the paroxysms. [L, 116.]—**Epithelial f.** Of Bailly, f. supposed to originate from disease of the epithelial surfaces. [a, 34.]—**Equine relapsing** (or **spirillum**) **f.** An epizootic f. affecting horses, camels, and mules in India; it may be caused by a fusiform organism, flagellated at either end, similar to the *Hæmatomonas* of fishes, that is found in the blood of affected animals. ["Lancet," Dec. 11, 1886, p. 1130 (a, 34).]—**Erethetic f.** Of Schönlein, irritative f. [a, 34.]—**Erethitic scarlet f.** Ger., *erethisches Scharlach.* Ordinary mild scarlet f. [D, 39.]—**Erotic f.** Lat., *febris erotica.* Fr., *fièvre érotique.* A slow f. that sometimes accompanies erotomania. [a, 34.]—**Erratic f.** Lat., *febris erratica.* Fr., *fièvre erratique.* A f. with irregular paroxysms; properly septan, octan, nonan, or deciman. [A, 326 (a, 34).]—**Eruptive articular f., Eruptive epidemic f. of India.** See Dengue.—**Eruptive f.** Fr., *fièvre éruptive.* Ger., *Eruptionsfieber.* A f. following a period of incubation varying from a few hours to a few days, pursuing a definite course, with an associated eruption on the skin or mucous membrane or both; usually infectious. [a, 34.]—**Erysipelatous f.** Fr., *fièvre érysipélateuse.* Of Hall and Dexter, see *Epidemic erysipelatous f.*—**Essential f.** Lat., *febris essentialis.* Fr., *fièvre essentielle.* Ger., *essentielles Fieber.* A f. constituting a disease by itself, as distinguished from a symptomatic f.—**Exacerbating f.** Remittent f. [a, 24.]—**Exanthematic f.** See *Eruptive f.*—**Exanthematic typhus f.** Lat., *typhus exanthematicus.* Ger., *exanthematisches Nervenfieber.* Typhus f. in which the petechiæ are well marked. [a, 34.]—**Exanthematous f.** See *Eruptive f.*—**Exotic red f.** Of Bornier, dengue. [a, 34.]—**Fæco-malarial f.** [Donaldson]. See *Malta f.*—**Fainting f. of Persia.** A f. initiated by a chill, with early appearance of coma and the symptoms attending congestive f. [Bell, "Brit. and For. Med. Rev.," 1843, p. 558 (a, 34).]—**Fall f.** See *Autumnal f.*—**Famine f.** Lat., *febris a fame.* Fr., *fièvre de famine.* Ger., *Hungerpest.* See *Relapsing f.* and *Typhus f.*—**Fatigue f.** Lat., *febris a fatigatione.* Fr., *courbature fébrile de fatigue.* F. following protracted and unusual exertion. It is first manifested by a feeling of fatigue, with a chill subsequently if the patient exposes himself, and a f. attaining 103° or 104° F., with loss of appetite and general febrile symptoms. A few days' rest mitigates the severer symptoms, but if work is begun again the pulse remains quickened, there is f. each evening, and there are constipation and loss of appetite. The strength fails, and the patient is obliged to remain in bed. If there is pulmonary weakness, phthisical symptoms commence. The patient is usually obliged to keep his bed during the winter, in the spring grows weaker, and dies in the fall. [Knott, "Trans. of the Roy. Acad. of Med. in Irel.," vi, 1888 (a, 34).]—**Feigned f.** A semblance of f. produced by accelerating the heart's action by striking the elbow against a wall, artificially coloring the tongue, etc., by malingerers. [a, 34.]—**Fermentation f.** See Sapræmia.—**Fernando Po f.** The malarial f. of Fernando Po. [a, 34.]—**F.-bush.** See Benzoin *odoriferum.*—**F. gum-tree.** The *Eucalyptus globulus.* [B, 275 (a, 24).]—**F. of convalescence.** A febrile paroxysm of variable duration, occurring during convalescence from an infectious or exanthematic f. [a, 34.]—**F. of dentition.** See *Dental f.*—**F. of over-exertion.** See *Fatigue f.*—**F. of the New Constitution** [O'Brien]. See *Relapsing f.*—**F. of the spirits** [Quincy]. Grave typhus f. [a, 34.]—**F.-plant.** The *Datura arborea, Pæderia fœtida,* and *Ocimum viride.* [B, 275 (a, 24); a, 14.]—**F. poison.** Of authors, the principle that causes infection; now known to be microbic. [a, 34.]—**F.-root.** The *Triosteum perfoliatum* and the *Pterospora andromeda.* [B, 81 (a, 21); 121, 275 (a, 24).]—**F.-tree.** The *Eucalyptus globulus.* [B, 275 (a, 24).]—**F.-twig.** The *Celastrus scandens.* [B, 275 (a, 24).]—**F.-weed.** The *Gerardia pedicularia.* [B, 275 (a, 24).]—**F.-wort.** See the major list.—**Fifteen-day f.** Relapsing f. in which there is a relapse on that day. [a, 34.]—**Five-day f.** Of Rutty, relapsing f. [D, 1.]—**Fulminating urethral f.** Urethral f. initiated by a chill, followed by a high temperature within a few hours after the introduction of an urethral instrument. [a, 34.]—**Gall f.** Ger., *Gallenfieber.* In the Netherlands, remittent f. [D, 52.]—**Ganglionic f.** See *Glandular f.*—**Gangrenous f.** Lat., *febris gangrænosa.* Fr., *fièvre gangréneuse.* 1. A f. accompanied by local gangrene, as in some cases of typhoid f. 2. Pernicious malarial f. with gangrene during convalescence. [a, 34.]—**Gaol f.** See *Jail f.*—**Gastralgic f.** Intermittent f. with gastralgia. [a, 34.]—**Gastric f.** Lat., *febris gastrica.* Fr., *fièvre gastrique.* Ger., *gastrisches Fieber.* 1. See *Abortive typhoid f.* 2. Acute dyspepsia. [Flint (D, 5).] 3. See *Simple continued f.*—**Gastric hectic f.** Fr., *fièvre hectique gastrique.* Of Broussais, a f. from chronic irritation of the stomach; there are thirst, dryness of the mouth, a coated tongue, heartburn, acid eructations, and constipation, with moderate elevation of temperature. [a, 34.]—**Gastric intermittent f.** Of A. E. Beresford, intermittent f. with grave gastro-intestinal disorder. ["South. Pract.," May, 1881, p. 138 (a, 24).]—**Gastric remittent f.** Of Craigie and Marston, a f. occurring in and about the Mediterranean, having characteristics in common with some of the forms of continued f. [D, 1.]—**Gastro-adynamic f.** See Febris *gastro-adynamica.*—**Gastro-angeiotenic f.** An acute form of bilious f. [a, 34.]—**Gastro-ataxic f.** A form of ataxic f. with dryness of the tongue, excessive thirst, vomiting, diarrhœa, or constipation; actually, typhoid f. [a, 34.]—**Gastro-bilious f.** Gastric f. [a, 34.]—**Gastro-cephalic f.** Fr., *fièvre gastro-céphalique.* See *Simple continued f.*—**Gastro-enteric f.** 1. A variety of congestive f. prevalent in the southwestern United States, characterized by vomiting, dysentery, thirst, dyspnœa, restlessness, burning heat in the stomach, a weak pulse, and cold extremities. [D, 25.] 2. Of Craigie, typhoid f. [a, 34.]—**Gastro-hepatic f.** Of Ritchie, relapsing f. [a, 34.]—**Gastro-splenic f.** Of Craigie, typhoid f. [a, 34.]—**Genital hectic f.** Fr., *fièvre hectique génitale.* Of Broussais, f. with debility, from excessive sexual indulgence or masturbation. [a, 34.]—**Georgia**

f.-tree. The *Pinckneya pubens.* [B, 275 (α, 24).]—**Gibraltar f.** An infectious epidemic f. prevalent in Gibraltar in the early autumn, that presented symptoms similar to those of yellow f., and was so called, though the disease resembled hæmorrhagic malarial f. [α, 34.]—**Glandular f.** Fr., *fièvre ganglionnaire.* Ger., *Drüsenfieber.* An acute f. accompanied by a swollen condition of the cervical or intestinal lymphatic glands, with uneasiness, anorexia, and nausea. There is dysphagia or diarrhœa, according to the glands affected. ["N. Y. Med. Jour.," Sept. 28, 1889, p. 355 (α, 34).]—**Gouty f.** Fr., *fièvre goutteuse.* Ger., *Gichtfieber.* The f. of acute gout. [L, 49 (α, 34).]—**Grain-gaugers' f.** Fr., *fièvre des jaugeurs de blé.* A disease with malarial symptoms, affecting individuals charged with measuring foreign grain in the docks of Marseilles; attributed to a fine dust that rises from the grain during the process of handling. [Maurans, "Semaine méd.," quoted in "Prog. méd.," Mar. 4, 1882.]—**Grave anginose scarlet f.** Of Meigs and Pepper, a variety of scarlet f. characterized by pseudo-membranous, ulcerative, or gangrenous angina. [D, 40.]—**Grave cerebral scarlet f.** Of Meigs and Pepper, a variety of scarlet f. in which acute cerebral symptoms appear early. [D, 40.]—**Growing f.** Fr., *fièvre de croissance.* Febricula occurring occasionally during rapid growth in youth. [α, 34.]—**Hæmatemesic paludal f.** Of Faget, hæmorrhagic malarial f. with hæmatemesis. [α, 34.]—**Hæmaturic bilious (or malarial) f.** Fr., *fièvre bilieuse hématurique.* A form of pernicious malarial f., of rapid onset, in which the chill may be moderate but the subsequent pyrexia is very high, and on the second day the urine is reddish-brown or black, and icterus appears. The urine is albuminous, and, microscopically, crenated red corpuscles and crystals of hæmoglobin are found; the presence of the latter seems to be due to the rapid destruction of the red corpuscles by the malarial micro-organism. The disease is of brief duration; energetic treatment may stop the destruction of the red corpuscles and the microbial ptomaine formation; otherwise death ensues a few days after the appearance of the hæmaturia. [α, 34.]—**Hæmogastric f.** Yellow f. [α, 34.]—**Hæmoptoic f.** See FEBRIS *hæmoptoica.*—**Hæmorrhagic hectic f.** Fr., *fièvre hectique hémorrhagique.* Of Broussais, a f. that results from hæmorrhage. [α, 34.]—**Hæmorrhagic malarial f.** Pernicious malarial f. in which there is hæmorrhage from the nose, stomach, or kidneys. That from the stomach is similar to the black vomit of yellow fever. [α, 34.]—**Hæmorrhagic putrid f.** Typhoid f. with hæmorrhage from a mucous membrane. [α, 34.]—**Hæmorrhagic yellow f.** [Lyons]. A variety of yellow f. characterized by early, profuse, and generally fatal hæmorrhages from various tissues and organs. [D, 1.]—**Harvest f.** Gastric f. occurring in harvesters. [α, 34.]—**Hay f.** Fr., *fièvre de foin* (ou *des foins*), *coryza idiosyncrasique.* Ger., *Heufieber.* It., *catarro* (o *febbre*, o *asma*) *del fieno.* A periodical hyperæsthetic rhinitis, due to pollen or other exciting agents. It occurs principally in neurotic individuals, usually in the spring or in the middle of August; there is constant discharge from the nose, with malaise, injected conjunctivæ moderate f., and often asthmatic symptoms. [α, 34.]—**Heat f.** See INSOLATION.—**Hebdomadal (intermittent) f.** Lat., *febris hebdomadana.* Fr., *fièvre hebdomadaire.* 1. An intermittent f. in which the paroxysms recur every seven days. 2. Seven-day f.; simple continued f. [D, 74.]—**Hectic f.** Lat., *febris hectica.* Fr., *fièvre hectique.* Ger., *hektisches Fieber.* A type of f. associated with prolonged suppuration or some analogous condition involving an undue drain on the system. It is distinguished by its remarkable intermissions, which are usually periodical, a remission and an exacerbation occurring once, and sometimes twice, in the twenty-four hours; by excessive wasting of the tissues; and by the exhausting sweats that attend the paroxysms. It is generally of long duration. [α, 34.]—**Hepatic f.** Lat., *febris hepatica.* Fr., *fièvre hépatique.* 1. A form of pernicious intermittent f. in which hepatic disorder is a prominent symptom. [D, 2, 14.] 2. A f. due to inflammation of the liver, manifested by chills, pyrexia, jaundice, and hepatic tenderness. [α, 34.]—**Hepatic intermitting f.** A f. occurring in cases of obstruction of the bile-ducts; caused by the absorption of ptomaines contained in the bile. [Charcot (α, 34).]—**Herpetic f.** A continued f., lasting a few days, in which defervescence is accompanied by herpes on the nose or lips. [α, 34.]—**Hidrotic f.** See HIDROSIS.—**Hill f.** The pernicious and continued malarial f. of the hilly regions of India. [α, 34.]—**Homotonic f.** Simple continued f. [α, 34.]—**Horrific f.** Lat., *febris horrifica.* Fr., *fièvre horrifique.* See *Algid* (*congestive*) *f.*—**Hospital f.** Fr., *fièvre des hôpitaux* (ou *d'hôpital*). See *Typhus f.*—**Humoral f.** Lat., *febris humoralis.* Fr., *fièvre humorale.* A f. supposed to be due to a corruption of the humors. [α, 34.]—**Hungarian f.** Lat., *febris hungarica.* Fr., *fièvre hongroise* (ou *de Hongrie*). Ger., *ungarisches* (oder *hungarisches*) *Fieber.* A typhus f. that devastated the army of Maximilian II in Hungary in 1556. [α, 34.]—**Hybrid typhoid f.** See *Typhomalarial f.*—**Hydrophobic f.** A form of malarial f. in which there is an aversion that may become a horror for fluids. [α, 34.]—**Hyperpyretic f., Hyperthermic f.** Fr., *fièvre hyperthermique.* Fever with excessive elevation of the bodily temperature. [α, 18.]—**Hysterical f.** Lat., *febris hysterica.* Fr., *fièvre hystérique.* Real or apparent f. that depends upon the hysterical neurosis. ["Gaz. hebd. de méd. et de chir.," Oct. 5, 1883, p. 661 (D).]—**Icteric f.** F. accompanied by jaundice. [α, 34.]—**Icterode pernicious f., Ictero-hæmaturic f.** See *Hæmorrhagic malarial f.*—**Idiopathic f.** A f. that is not dependent upon infectious material, or visceral inflammation, or traumatism, but is apparently due to reflex action on the thermic centres. [α, 34.]—**Ileo-typhus f.** See *Typhoid f.*—**Illegitimate f.** Fr., *fièvre illégitime.* Irregular malarial f. [L, 49 (α, 34).]—**Imputrid continent f.** See *Continued f.*—**Infantile f.** The tubercular meningitis of children. [Leonard, "Boston Med. and Surg. Jour.," 1844, p. 292 (α, 34).]—**Infantile gastric f.** Typhoid f. in children. [α, 34.]—**Infantile gastric remittent f.** Gastric or typhoid f. in children. [α, 34.]—**Infantile hectic f.** Typhoid f. in infants. [α, 34.]—**Infantile remittent f.** 1. Of Evanson, typhoid f. occurring in children. [D, 1.] 2. Gastro-enteritis in infants from food fermentation or worms. [α, 34.]—**Infection f., Infectious f.** Fr., *fièvre d'infection.* Ger., *Infectionsfieber.* 1. A f. due to the entrance of infectious matter into the system. [D, 3.] 2. See *Typhus f.*—**Infectious ship f.** [Blaine]. See *Typhus f.*—**Inflammatory f.** Lat., *febris symptomatica* (seu *continua inflammatoria*). Fr., *fièvre inflammatoire.* Ger., *entzündliches Fieber, Entzündungsfieber.* A f. symptomatic of inflammation. [D, 1.]—**Inflammatory intermittent f.** Fr., *fièvre intermittente inflammatoire.* Intermittent f. marked by a short chill, a long period of f., elevated temperature, headache, somnolence, and a hard and full pulse. [B, 74.]—**Inflammatory remittent f.** Of Copland, an adynamic remittent f. usually classed as bilious remittent f. or hæmorrhagic malarial f. [α, 34.]—**Inflammatory seasoning f.** See *Acclimation f.*—**Inirritative f.** [Darwin]. Lat., *febris inirritativa.* See *Typhus f.*—**Insidious f.** Ambulatory typhus f. [α, 34.]—**Intercurrent f.** See FEBRIS *intercurrens.*—**Intermittent ataxic f.** Pernicious malarial f. [α, 34.]—**Intermittent f.** Lat., *febris intermittens.* Fr., *fièvre intermittente* (ou *d'accès*, ou *récurrente*). Ger., *kaltes Fieber, Intermittens, Wechselfieber.* It., *febbre intermittente.* Sp., *fiebre intermitente.* Syn.: *ague.* A form of malarial f. in which the premonitory symptoms are a feeling of malaise and restlessness with yawning and finally facial pallor, blue lips, cold skin, and a chill that is more or less pronounced in conformity with the physical character of the person affected. Succeeding the chill there are high f., a rapid pulse, and muscular pains, especially severe in the loins and the calves of the legs; this condition continues for some hours, when defervescence occurs and perspiration indicates a return of the system to an apparently normal condition. In cases that are not treated there is a return of the febrile paroxysm in one day (quotidian f.), two days (tertian f.), three days (quartan f.), four days (quintan f.), five days (sextan f.), six days (septan f.), seven days (octan f.), eight days (nonan f.), or nine days (deciman f.); and irregular types occur in which there are double paroxysms on certain days. There is also a masked form, in which, instead of a chill, there is a neuralgia, as of the supra-orbital nerve in brow-ague, or of the intercostal nerve in pleurodynia, or of the sacral nerves in lumbago; or there is some other manifestation of periodical irritation, such as vomiting, the f. following these paroxysms as usual; or in some cases, with malarial intermittent neuralgia, f. is either mild or absent. The f. lasts a variable time, in proportion to the thoroughness of quinine medication. Many supposed cases of reinvasion of the malarial poison are manifestations of increased activity of the malarial organism that has not been destroyed in the blood. [α, 34.]—**Intermittent f. from morphine.** An intermitting pyrexia, of quotidian or tertian type, that occurs occasionally in morphine-eaters. Though the spleen is enlarged and neuralgias (supra-orbital, intercostal, etc.) are present, quinine does not cure the patient; the disease persists until the use of morphine is discontinued. [Murchison, "Lancet," May 3, 10, 1879 (α, 34).]—**Intestinal f.** 1. Of R. U. West, a state of f. with diarrhœa in a lying-in woman. [A, 39.] 2. See *Typhoid f.*—**Irish f.** 1. Typhus f. 2. Probably an asthenic variety of relapsing f. [α, 34.]—**Irish immigrants' f.** A typhoid condition developed in a case of relapsing f. [Drake, "Boston Med. and Surg. Jour.," 1847, p. 149 (α, 34).]—**Irregular low nervous f.** [Fordyce]. See *Typhoid f.*—**Irritative f.** Fr., *fièvre d'irritation.* 1. A form of continued f. resulting from exposure, change of climate, or mental strain. 2. A symptomatic f., also called *constitutional irritation*, in which the nervous system is much affected. [D, 52; F. P. Porcher, "N. Y. Med. Jour.," Oct. 13, 1888, p. 412 (α, 17).]—**Irritative f. of the puerperal state** [D. D. Davis]. A form of puerperal f. characterized by: "1. An excited state of the heart and arteries for an uncertain period before the accession of labor. 2. An unusual apprehension of danger, or rather the confident belief of an approaching fatal event, also entertained for an uncertain period of several weeks before the declaration of the process of parturition. 3. An obstinate continuance of the same symptoms, both during labor and subsequent to that result. 4. Proofs of much morbid determination of blood to the head both before and after delivery, but without delirium. 5. Perfect vigilance. 6. A disease of about eight or ten days' duration subsequent to the delivery, but with full possession of the intellectual powers throughout the whole course of the malady. 7. A fatal termination, with rare, if with any, exceptions." [A, 42.]—**Jail f.** Lat., *febris carceraria* (seu *carceris*). Fr., *fièvre des prisons.* Typhus f. occurring among the inmates of jails or prisons.—**Jungle f.** Fr., *fièvre des jungles.* The pernicious malarial f. of the East Indian jungles. [α, 34.]—**Kendal f.** [Hughes]. See *Yellow f.*—**Kollas f.** See FIÈVRE *des Kollas.*—**Lake f.** In the lake region of the United States, remittent f. [D, 1.]—**Latent scarlet f.** A mild form of scarlet f., marked by the absence of the characteristic exanthem and angina. [D, 1.]—**Latent typhoid f.** See *Ambulatory typhoid f.*—**Lazaret f.** Typhus and typhoid f's occurring among persons confined in a lazaretto. [α, 34.]—**Leghorn f.** Fr., *fièvre de Livourne.* See *Yellow f.*—**Lent f.** Of Strother, typhoid f. [α, 34.]—**Lenticular f.** See *Miliary f.*—**Levant f.** [Irvine]. A severe malarial f. of the Levant. [α, 34.]—**Lipyrian f.** See FEBRIS *leipyria.*—**Littoral f.** Malarial f. that occurs on a coast. [α, 34.]—**Local f.** See FEBRIS *localis.*—**Lochial f.** Lat., *febris lochialis.* Fr., *fièvre lochiale.* A febricula accompanying the lochial discharge. [α, 34.]—**Low continued f.** See *Typhoid f.*—**Low f.** See *Asthenic f.* and *Typhoid f.*—**Low f. of the puerperal state** [J. Clarke]. An old term for an adynamic type of puerperal f. [A, 42.]—**Low nervous f.** See *Typhoid f.*—**Lung f.** Acute pneumonia.—**Lying-in f.** See *Puerperal f.*—**Lymphatic f.** Lat., *febris lymphatica.* Fr., *fièvre lymphatique.* A f. due to deficient or abnormal secretion from the "conglomerate (secreting) glands" (*e. g.*, the parotid gland and pancreas). [B, 117.]—**Maculated f.** See *Typhus f.*—**Malarial f.** Fr., *fièvre palustre* (ou *paludienne*, ou *paludique*). Ger., *Malariafieber.* A f. due to malaria. [α, 34.] See *Intermittent f.* and *Remittent f.*—**Ma-**

larial typhoid f., **Malario-typhoid f.** See *Typho-malarial f.*—**Malarious f.** See *Malarial f.*—**Malarious yellow f.** A variety of malarial f. in which there is decided yellowness of the skin. [D.]—**Malignant bilious f. of America.** See *Yellow f.*—**Malignant bilious typhus f.** Of Russegger, a form of f. peculiar to Nubia. [a, 34.]—**Malignant f.** Lat., *febris maligna.* Fr., *fièvre maligne.* Typhus f.; also a f. resembling in symptoms the severer forms of that disease. [B, 117; L.]—**Malignant f. of hospitals.** Of Pringle, typhus f. [a, 34.]—**Malignant f. of ships.** See *Ship f.*—**Malignant f. of the tropics.** Pernicious malarial f. [a, 34.]—**Malignant intermittent f.** See *Pernicious malarial f.*—**Malignant nervous f.** Fr., *fièvre maligne nerveuse.* Of Huxham, typhoid f. [D, 72.]—**Malignant pestilent f.** Fr., *fièvre maligne pestilentielle.* 1. One of the complications of the plague. [B, 117.] 2. Of Chisholm, yellow f. [a, 34.]—**Malignant puerperal f.** Puerperal f. with adynamia. [a, 34.]—**Malignant purple f., Malignant purpuric f.** Fr., *fièvre purpurine* (ou *pourprée maligne.* Epidemic cerebro spinal meningitis. [D, 1.]—**Malignant putrid f.** Fr., *fièvre maligne putride.* Of Buchan, typhus f. [D, 74.]—**Malignant remittent f.** See *Pernicious malarial f.*—**Malignant scarlet f.** Lat., *scarlatina maligna* (seu *gravior*). A severe form of scarlet f. in which the throat tends to slough, the exanthem is scarcely developed, petechiæ often appear, and the f. is adynamic. [D, 1.]—**Malta f.** A specific continued endemic f. of the Island of Malta, apparently due to a micro-organism; characterized by profuse perspiration and sudamina, constipation, swelling of the joints, and usually an enlarged spleen. In fatal cases no affection of Peyer's glands is found. ["Brit. Med. Jour.," May 18, 1889, p. 1101 (a, 34).]—**Marsh f.** See *Malarial f.*—**Martinique f.** Fr., *fièvre de la Martinique.* Of Hubert, a pernicious malarial f. observed at Martinique.—**Masked (malarial) f.** See *Masked* AGUE.—**Masked scarlet f.** Scarlet f. with a lack of prominence of the usual symptoms; commonly the anginous symptoms are most prominent and desquamation suggests the real nature of the disease. [Squire, "Lancet," 1888, i, p. 875 (a, 34).]—**Mediterranean f.** [Burnett]. Fr., *fièvre méditerranée* (ou *méditerranéenne*). Pernicious malarial f. occurring on the Mediterranean coast, presenting either continued or ictero-hæmaturic symptoms. [a, 34.]—**Mediterranean gastric remittent f.** [Chartres]. See *Mediterranean f.*—**Melanious f.** Of Jones, typhoid f. ["Lancet," 1858, ii, p. 117 (a, 34).]—**Melanuric (remittent) f.** See *Hæmorrhagic malarial f.*—**Membranous f.** Fr., *fièvre membraneuse.* F. from inflammation of a serous or mucous membrane. [a, 34.]—**Meningo-gastric f.** Fr., *fièvre méningogastrique.* 1. Of Gardien, a form of puerperal f. accompanied with biliary derangement. [A, 43.] 2. See *Typhoid f.*—**Menorrhagic f.** Fr., *fièvre ménorrhagique.* A febricula sometimes accompanying menstruation. [a, 34.]—**Mental hectic f.** See *Moral hectic f.*—**Mercurial f.** Fr., *fièvre mercurielle.* A febricula that results from irritation caused by mercury poisoning. [a, 34.]—**Mesenteric f.** Lat., *febris mesenterica.* Fr., *fièvre mésentérique.* See *Typhoid f.*—**Miasmatic f.** See *Malarial f.*—**Miasmatic typhoid f.** [Levick]. Typho-malarial f. ["Am. Jour. of the Med. Sci.," xlvii, p. 401 (a, 34).]—**Mild yellow f.** See *Relapsing f.*—**Miliary f.** Lat., *febris miliaris.* Fr., *fièvre miliaire.* Of the old authors, a f. in which miliaria appeared on the body; indiscriminately applied to contagious and non-contagious f's. [a, 34.]—**Military f.** Typhus f. [a, 34.]—**Milk f.** Lat., *febricula puerperalis, febris lactea.* Fr., *fièvre* (ou *montée*) *de lait* (ou *laiteuse*). Ger., *Milchfieber.* An old term for a febricula sometimes accompanying the establishment of the secretion of milk in lying-in women; now thought to be only a mild form of septic f. [a, 34.]—**Mixed continued f.** Typhoid f. [a, 34.]—**Mixed f.** Ger., *Mischfieber.* A f. in which there is a complication of diseases, such as entero-malarial f. [a, 34.]—**Moral hectic f.** Fr., *fièvre hectique morale.* Of old authors, a f. with pallor, emaciation, anorexia, insomnia, dyspnœa, and general malaise, dependent upon profound mental emotion. [a, 34.]—**Morbillous f.** Of Sydenham, a f. occurring during an epidemic of measles but with no associated eruption. [a, 34.]—**Mountain f.** 1. Of Wise, a mild f. with cardiac and respiratory irritability, lasting about a week; it is supposably due to sudden exposure to diminished atmospheric pressure and consequent rarefaction of the air. 2. Malarial, typho-malarial, or typhoid f. occurring in mountainous regions. The cases present no symptoms that are unusual in lower localities. [a, 34.]—**Mucous epithelial f., Mucous f.** Lat., *febris mucosa.* Fr., *fièvre muqueuse.* Ger., *Schleimfieber.* 1. Of Roederer, see *Typhoid f.* 2. See *Catarrhal f.*—**Mysore f.** Various forms of malarial f. at Mysore, India. [a, 34.]—**Nagpore f.** Various forms of malarial f. at Nagpore, India. [a, 34.]—**Nautical f.** Lat., *febris nautica.* See *Ship f.*—**Neapolitan f.** A f. observed in Naples, corresponding in its symptoms with typho-malarial f. [a, 34.]—**Necrosial f.** Of Simon, f. symptomatic of necrosis of bone. [a, 34.]—**Nephritic f.** Lat., *febris nephritica.* Fr., *fièvre néphritique* (ou *néphrétique*). A variety of pernicious malarial f. in which nephritis is a prominent symptom. [D, 74.]—**Nervous f.** Lat., *febris nervosa.* Fr., *fièvre nerveuse, courbature fébrile par émotion* (2d def.). 1. Any f. characterized by decided derangement of the nervous system, especially typhus f. and typhoid f. 2. A febricula due to emotional excitement.—**Nervous hectic f.** See *Hysterical f.*—**Neuralgic f.** See *Dengue.*—**Neuro-purpuric f.** Of Mopother, epidemic cerebro-spinal meningitis. [a, 34.]—**Neurotic f.** A f. of neurotic origin (*e. g.*, according to some writers, urethral f.). [Horsley, "Lancet," Dec. 27, 1884, p. 1133.]—**New f.** See *Malta f.*—**Niger f.** Pernicious malarial f. affecting Europeans on the River Niger. [a, 34.]—**Night-soil f.** [Brown]. Typhoid f. [a, 34.]—**Nonan intermittent f.** Lat., *febris nonana.* Fr., *fièvre nonane.* Intermittent f. in which the exacerbations recur every eighth day. [D, 72.]—**Non-contagious nervous f.** See *Typhoid f.*—**Non-infective f.** A f. produced by local inflammation, such as some forms of traumatic f. [a, 34.]—**Nosocomial f.** Lat., *febris nosocomialis.* Fr., *fièvre nosocomiale.* Typhus f. occurring in hospitals. [L, 116.]—**Nudden f.** An adynamic intermittent f. of Nudden, Lower Bengal. [a, 34.]—**Ochlotic f.** [Laycock]. Typhus f. [a, 34.]—**Octan intermittent f.** Lat., *febris octana.* Fr., *fièvre octane.* Intermittent f. in which the paroxysms recur every seventh day. [D, 72.]—**Oroya f.** A febrile stage of verruga. ["N. Y. Med. Jour.," July 2, 1887, p. 17 (a, 34).]—**Paludal f.** Fr., *fièvre paludéenne* (ou *paludique*). See *Malarial f.*—**Paludal f. of Mauritius.** A pernicious f. of the island of Mauritius. [a, 34.]—**Panama f.** See *Chagres f.*—**Paroxysmal f.** A f. in which there are varying intervals of apyrexia between the different febrile paroxysms; the latter consist of three stages, "cold," "hot," and "sweating." The f. may be from malaria, from ulcerative endocarditis, from lymphadenoma, etc. [Murchison, "Lancet," May 3, 1879, p. 617 (a, 34).]—**Pectoral hectic f.** Fr., *fièvre hectique pectorale.* Of Broussais, hectic f. from inflammation of the larynx, bronchi, lungs, or pleura. [a, 34.]—**Peculiar f.** Of Armstrong, f. with certain peculiar effects, such as the efflorescence of scarlet f., the rash of measles, etc. [a, 34.]—**Peptone f.** Of Ott, f. produced by injecting antipeptone or amphopeptone into the blood of an animal. [a, 34.]—**Periodical f.** A f. in which there is a periodicity in the recurrence of the paroxysms. [a, 34.]—**Peripneumonic f.** Fr., *fièvre péripneumonique.* See *Pneumonic f.* (1st def.).—**Peritoneal f.** Puerperal peritonitis. [A, 39.]—**Pernicious cardialgic intermittent f.** Fr., *fièvre pernicieuse cardialgique.* Pernicious malarial f. characterized by intense pain in the precordial region. [D, 72.]—**Pernicious catarrhal intermittent f.** Fr., *fièvre pernicieuse catarrhale.* Of Torti and Morton, see *Pernicious peripneumonic intermittent f.*—**Pernicious comatose f.** Fr., *fièvre pernicieuse comateuse* (ou *soporeuse*). Pernicious malarial f. in which profound or fatal coma occurs during an exacerbation. [D, 72.]—**Pernicious convulsive intermittent f.** Fr., *fièvre pernicieuse convulsive* (ou *tétanique*). Pernicious malarial f. characterized by tonic or clonic convulsions. [D, 72.]—**Pernicious delirious intermittent f.** Fr., *fièvre pernicieuse délirante.* Pernicious malarial f. characterized by delirium, preceded perhaps by hallucinations, beginning in the cold stage, increasing in intensity during the f., and finally disappearing after the sweating period has ended. [D, 72.]—**Pernicious dysenteric intermittent f.** Fr., *fièvre pernicieuse dysentérique.* Pernicious malarial f. with complications of a dysenteric character, [D, 72.]—**Pernicious epileptic intermittent f.** Fr., *fièvre pernicieuse épileptique.* Pernicious malarial f. characterized by epileptoid convulsions. [D, 72.]—**Pernicious f.** See *Pernicious malarial f.*—**Pernicious gastralgic intermittent f.** Fr., *fievre pernicieuse gastralgique.* Pernicious malarial f. in which a most painful gastralgia occurs during the paroxysms. The pain may be followed by the vomiting of mucous or bilious matter. [D, 72.]—**Pernicious hæmorrhagic intermittent f.** See *Hæmorrhagic malarial f.*—**Pernicious icteric f.** Fr., *fièvre pernicieuse ictérique.* Of Daulle, pernicious icteric remittent f. as occurring in Madagascar. [D, 74.]—**Pernicious intermittent f.** Fr., *fièvre intermittente pernicieuse.* Ger., *perniciöses Wechselfieber.* See *Pernicious malarial f.*—**Pernicious lethargic intermittent f.** Fr., *fièvre pernicieuse léthargique.* Pernicious malarial f. accompanied by lethargy. [D, 72.] Cf. *Pernicious comatose intermittent f.*—**Pernicious malarial f.** Fr., *fièvre pernicieuse.* A form of malarial f. in which the rapid destruction of the red corpuscles and the accumulation of ptomaines, in consequence of the presence of the malarial parasite, produce a profound impression on the central nervous system. The attacks begin as usual in malarial f's, when suddenly a chill is succeeded by coma (the old *febris comatosa*, seu *apoplectica*), or delirium (*febris epileptica, convulsiva*, etc.), or difficulty of respiration (*febris asthmatica*), or hæmorrhage; it is not unusual, in marshy countries in hot latitudes, to see several of the varieties combined, the algid passing into the comatose form, for instance. The disease usually occurs in persons that have had previous attacks of malarial f., and it has a high rate of mortality. [a, 34.]—**Pernicious peripneumonic intermittent f.** Fr., *fièvre pernicieuse péripneumonique.* Pernicious malarial f. in which the paroxysms are marked by severe dyspnœa and catarrhal bronchitis or broncho-pneumonia. [D, 72.]—**Pernicious pleuritic intermittent f.** Fr., *fièvre pernicieuse pleurétique.* Pernicious malarial f. characterized by severe pain in the pleura. [D, 72.]—**Pernicious scorbutic intermittent f.** Fr., *fièvre pernicieuse scorbutique.* An old variety of pernicious malarial f. associated with scorbutic symptoms. [a, 34.]—**Pernicious syncopal intermittent f.** Fr., *fièvre pernicieuse syncopale.* Pernicious malarial f. in the exacerbations of which dangerous attacks of syncope are apt to occur. [Trousseau (D, 72).]—**Pernicious yellow f.** An epidemic f. of great virulence which occurred in Nauplia, Greece (where it was called "yellow typhus"). The skin became of a deep yellow, changing to black soon after death. ["Brit. Med. Jour.," Dec. 4, 1886, p. 1111.]—**Peshawur f.** Typho-malarial f. of Peshawur, India. [a, 34.]—**Pestilential f.** Lat., *febris pestilens.* Fr., *fièvre pestilentielle.* 1. Of Stoker, typhus fever. 2. The plague. [D, 72; L, 116.]—**Pestilential yellow f.** See *Yellow f.*—**Petechial contagious f.** Fr., *fièvre pétéchiale contagieuse.* Of Chauffard (1856), typhus f. [D, 74.]—**Petechial f.** Lat., *febris petechialis.* Fr., *fièvre pétéchiale.* See *Typhus f.* and *Cerebro-spinal* MENINGITIS.—**Peyerian f.** See *Typhoid f.*—**Pharyngeal f.** Of Flint and H. E. Brown, a f. of brief duration, accompanied with pharyngitis; probably an epidemic erysipelatous f. [D, 25.]—**Phlogistic f.** See *Local f.*—**Phlyctænoid scarlet f.** A form of scarlet f. in which the exanthem is accompanied by the formation of vesicles filled with serum, or a cloudy, yellow liquid. [D, 1.]—**Phthisical f.** Lat., *febris phthisica.* Fr., *fièvre phthisique.* Ger., *phthisisches Fieber.* The hectic f. produced by tuberculosis; it appears early in the disease, the height of the temperature depending upon the extent of the tuberculous deposit. [a, 34.]—**Pituitary f.** [Ettmüller], **Pituitous f.** [Copland]. Lat., *febris pituitosa.* Fr., *fièvre pituiteuse.* Of Ettmüller, a slow f. supposed to be due to obstruction "in the pituitous glands." [B, 117.]—**Pituitous hectic f.** Lat., *febris hectica pituitosa.* Of Broussais, a gastric hectic f. with mucous diarrhœa. [a, 34.]—

Pleuritic f. The f. of pleurisy. [a, 34.]—**Pleuro-pneumonic f.** An infectious disease characterized by a sudden chill, pyrexia, pain in the side, vomiting or diarrhœa, or both; with delirium usually on the second or third day, and a cough with "prune-juice" expectoration. The physical signs of pleuro-pneumonia are usually quickly developed; the pleuro-pneumonia may affect one or both sides, and relapses may sometimes occur. The crisis usually occurs on the seventh day. Klein has found a specific bacillus in fatal cases. ["Brit. Med. Jour.," Apr. 20, 1889, p. 899 (a, 34).]—**Pneumonic f.** Fr., *fièvre pneumonique* (ou *péri-pneumonique* [Cayol], ou *synoque pneumonique* [Marrotte]), *érysipèle du poumon* [Marrotte]. 1. The fever of pneumonia. [a, 34.] 2. A form of pernicious malarial f. in which pneumonia is a prominent symptom. [D, 72.]—**Postponing intermittent f.** Ger., *nachsetzendes Fieber.* An intermittent f. in which each paroxysm occurs later in the day than the preceding paroxysm did. [D, 90.]—**Primary f.** 1. See *Idiopathic f.* 2. The f. accompanying the onset of an acute disease.—**Primary suppurative f.** F. occurring in the course of ordinary acute suppuration. [a, 34.]—**Prison f.** Fr., *fièvre carcéraire* (ou *des prisons*). See *Typhus f.* and *Typhoid f.*—**Prolonged ephemeral f.** Fr., *fièvre éphémère prolongée.* A febricula lasting three days or longer. [D, 74.]—**Protracted intermittent f.** An intermittent f. that usually returns on the seventh, fourteenth, twenty-first, or twenty-eighth day. [a, 34.]—**Pseudo-continued f.** Fr., *fièvre pseudo-continuée.* A remittent f. in which the remissions are not pronounced in character. [a, 34.]—**Pseudo-hay f.** Symptoms simulating those of hay f. produced by definite hypertrophic changes in the nasal mucous membrane. [Bronner, "Brit. Med. Jour.," Mar. 23, 1889, p. 656 (a, 34).]—**Pseudo-typhoid f.** Of McNutt, remittent bilious f. ["East Tenn. Rec. of Med. and Surg.," 1852-'53, p. 143 (a, 34).]—**Puerperal f.** Lat., *febris puerperalis.* Fr., *fièvre puerpérale.* Ger., *Puerperalfieber, Kindbettfieber, Kindbetterinfieber.* Sp., *fiebre puerperal.* Syn.: *childbed f., puerperal septicæmia.* A f., formerly supposed to be specific, appearing in puerperal women between the second and sixth days after delivery. It is now known that the disease is due to septic infection. [a, 34.]—**Puerperal hectic f.** Fr., *fièvre hectique puerpérale.* See *Milk f.*—**Puerperal intermittent f.** A form of puerperal f. with paroxysms recurring at intervals of from fifteen to thirty hours; "always," says D. D. Davis, "accompanied and followed by severe inflammation and suppuration of membrano-tendinous tissues." [A, 66.]—**Puerperal malarial f.** Malarial f. that attacks women after delivery, and may be considered to be a form of puerperal f. It usually appears about the fifth day after confinement. The temperature is quite high, the malaise is pronounced, and the remissions are marked. Occasionally secondary uterine hæmorrhage occurs during its course. [F. Barker, "Am. Jour. of Obstet.," Apr., 1880 (a, 34).]—**Puerperal scarlet f.** Lat., *scarlatina puerperalis.* Fr., *scarlatine puerpérale.* Ger., *Puerperalscharlach.* Scarlet f. occurring during the puerperal period; according to some authors, a form of true puerperal f. due to the infection of scarlet f. The term has been applied to cases that were doubtless not scarlet f. at all, but only a dermatitis symptomatic of septicæmia. [A, 22, 57.]—**Puka f.** In the East Indies, remittent f. [D, 1.]—**Puking f.** See FEBRIS *vomitoria.*—**Pulicular f., Puncticular f., Puncticulated f.** See *Petechial f.*—**Purple f., Purpuric f.** [Benson]. Cerebro-spinal meningitis. [a, 34.]—**Purpuric yellow f.** Of Lyons, a form of yellow f. characterized by purpuric patches, surrounded in some cases by œdema. [D, 1.]—**Purulent f.** See *Pyogenic f.*—**Putrid adynamic typhoid f.** See *Putro-adynamic f.*—**Putrid continued f.** Fr., *fièvre continuée putride.* Of Macbride, typhus f. [a, 34.]—**Putrid f.** Lat., *febris putrida.* Fr., *fièvre putride.* Ger., *fauliges Fieber.* Formerly, a f. that lasted from fifteen to twenty-one days, with offensive-smelling sweat, urine, and stools. The symptoms described by the old nosologists under this term closely resemble those of typhoid f. [a, 34.]—**Putrid hectic f.** Lat., *febris hectica putrida.* Of Hildenbrand, a f. produced by unwholesome food or by scurvy. [a, 34.]—**Putrid malignant f.** Of Huxham, typhus f. [a, 34.]—**Putro-adynamic f.** 1. Typhoid f. in which the petechiæ are numerous, and very dark, local gangrene occurs, the temperature may be subnormal, and there are hæmorrhages from mucous surfaces. 2. Relapsing f. [a, 34.]—**Putro-adynamic puerperal f.** See *Malignant puerperal f.*—**Putro-adynamic typhoid f.** Of the old authors, typhoid f. exhibiting symptoms of decomposition of the fluids and tissue of the body. [a, 34.]—**Pyæmic f.** F. associated with pyæmia. [a, 34.]—**Pyogenic f.** Fr., *fièvre pyogénique.* Of Sir W. Jenner, a febrile disorder resembling pyæmia, particularly in the formation of multiple abscesses. [D, 1.]—**Pythogenetic f., Pythogenic f.** Lat., *febris pythogenes.* Of Murchison, typhoid f. [D, 1.]—**Quartan (intermittent) f.** Lat., *febris quartana* (seu *quarta*). Fr., *fièvre quarte* (ou *quartre*). Ger., *Quartanfieber, viertägiges Fieber.* An intermittent f. in which the paroxysms recur every third day. [D.]—**Quinine f.** Lat., *febris chinica.* Fr., *fièvre quinique.* Syn.: *Tommaselli's disease.* Pyrexia caused by the administration of quinine; the urine becomes black (hæmaturia) and is passed with difficulty, the face presents a cadaveric appearance, there are chills, cold sweats, and difficulty of respiration. All the symptoms cease when the use of quinine is discontinued. ["Union méd.," March 14, 1889, p. 402 (a, 34).]—**Quintan (intermittent) f.** Lat., *febris quintana.* Fr., *fièvre quintane.* Ger., *Quintanfieber, fünftägiges Fieber.* An intermittent f. in which the paroxysms recur every fourth day. [D, 72, 90.]—**Quotidian (intermittent) f.** Lat., *febris quotidiana.* Fr., *fièvre* (*intermittente*) *quotidienne.* Ger., *Quotidianfieber, tägliches Fieber.* An intermittent f. in which a paroxysm occurs every day. [D.]—**Recurrent f., Recurring f.** Fr., *fièvre récurrente.* See *Relapsing f.*—**Red-tongued f.** In Kentucky, typhoid f. [a, 34.]—**Regular intermittent f.** Lat., *febris regularis.* Intermittent f. in which the paroxysms return at a regular time. [a, 34.]—**Relapsing f.** Lat., *febris recidiva* (seu *recurrens*). Fr., *fièvre à rechutes* (ou *de famine*). Ger., *recidives Fieber.* An infectious f., produced by the *Spirillum Obermeieri*, that occurs epidemically in overcrowded and underfed communities. The stage of incubation lasts about five days, a chill ushering in a f., with violent headache, pain in the loins and extremities, anorexia, nausea, and general malaise. The f. is high, reaching 106° F.; the skin is dry and becomes of a dirty-yellow color, and patches of purpura may form in severe cases. The tongue is dry and thickly coated; the liver and spleen enlarge. These symptoms persist for from five to seven days, when the temperature falls, perspiration is free, and the patient feels well. But in an interval of about a week a second attack occurs, lasting about five days, and subsequent relapses may occur several times. In the severe form, known as bilious typhoid f., the icterus is more intense, and petechiæ are found on the skin. In ordinary cases the disease is benign; fatal cases seem due to bad hygienic surroundings, lack of treatment, or pulmonic or renal complications. [a, 34.]—**Relapsing intermittent f.** An intermittent f. in which the paroxysms cease as a result of treatment, but slight exposure or excitement causes a recurrence of the f. [a, 34.]—**Relapsing remittent f.** Remittent f. that returns within a few weeks of the first attack. [a, 34.]—**Remittent African f.** See *African f.*—**Remittent f.** Lat., *febris remittens.* Fr., *fièvre rémittente* (ou *bilieuse des climats intertropicaux*). Ger., *remittirendes* (oder *nachlassendes*, oder *bösartiges endemisches* [oder *locales*]) *Fieber.* A form of malarial f. ushered in by a chill, succeeded by a f. of high temperature, with rapid pulse and respiration, pain in the head and muscles, injection of the capillaries of the cheeks and of the conjunctiva, a tongue coated grayish-white, great thirst and vomiting of any liquid shortly after drinking, and general mental and physical malaise. This condition persists as long as sixteen hours, when defervescence gives a few hours' relief from the more active symptoms, to be succeeded by their recurrence. In the progress of the f. the remissions may be so brief that the f. resembles continued f., or they may become so long that it simulates intermittent f. Besides the interference with the functions of the stomach, the liver is congested, and there may be vomiting of biliary matter, or bile-pigment in the urine, or jaundice. The spleen is enlarged and tender on percussion. The urine is decreased in quantity, but increased in specific gravity. In the early stages of the disease there is usually constipation; but, especially in marshy regions, diarrhœa and subsequently dysentery from an acute entero-colitis may supervene. Without the slightest intimation, and not infrequently, in paludal localities the disease passes into congestive or pernicious malarial f., or into hæmorrhagic or hæmaturic malarial f., and malarial cachexia may follow in any case. The average duration of the f. in ordinary cases under treatment is from ten to fifteen days, though some uncomplicated cases may last over thirty days. There is a susceptibility to frequent recurrences of the f. in those that have once had it and remain exposed to the same influences. [a, 34.]—**Remitting icteric f.** Relapsing f. with jaundice. [a, 34.]—**Remittent marsh f.** See *Remittent f.*—**Remitto-typhous f.** Of Drake, typhoid symptoms developing in the second week of an autumnal f. The morning remission shortens, the moist, white tongue becomes dry and brown, the cheeks are dusky, there is subsultus tendinum, a low delirium begins, and the passages become watery; the jaundiced hue characteristic of the remittent f. may increase. The description of the f. corresponds to that of typho-malarial f. [a, 34.]—**Retarding intermittent f.** See *Postponing intermittent f.*—**Rheumatic f.** Lat., *febris rheumatica inflammatoria.* Fr., *fièvre rhumatique* (ou *rhumatismale*, ou *rhumatoïde*). Ger., *Flussfieber, rheumatisches Fieber.* Febrile symptoms which are developed in connection with acute rheumatism. No well-defined type of f. is indicated by the term. A marked feature of this condition is a systolic apex heart-murmur which is usually developed early in the disease. [D, 68.]—**River Congo f.** Of Hunter, the pernicious malarial f. of the Congo River.—**Rock f.** A typho-malarial f. said to be very common at Gibraltar and along the Mediterranean. [R. W. Greenish, "Lancet," Nov. 14, 1885, p. 932.] See *Malta f.* and FEBRIS *comitata.*—**Rocky Mountain f.** A continued f. of one or two weeks' duration, presenting occasionally symptoms resembling typho-malarial f. The term has been applied to several varieties of f. ["N. Y. Med. Jour.," Jan. 8, 1887, p. 29 (a, 34).]—**Roman f.** A pernicious malarious, possibly entero-malarial, f. that occurs in the Roman Campagna. [Sullivan, "Med. Times and Gaz.," 1878, 1, p. 32 (a, 34).]—**Rose f.** A form of hay f. occurring in the late spring or early summer, commonly associated with the flowering period of roses. [D.]—**Rubeoloid f.** Of the Middlesex Hospital, typhus f. in which the rash resembles that of measles. [a, 34.]—**Sailor's f.** Fr., *fièvre des navigateurs.* See *Yellow f.* and *Typhus f.*—**Sanguineous continued f.** Of Hoffmann, continued f. [a, 34.]—**Sapræmic f.** F. associated with sapræmia. [a, 34.]—**Scarlet f.** Lat., *scarlatina, febris rubra.* Fr., *fièvre rouge, scarlatine.* Ger., *Scharlachfieber.* One of the eruptive or exanthematous f's that is contagious, the vitality of the organic ferment having been preserved for several years in packed-up clothing or toys, though so far the micro-organism that causes the disease has not been isolated. The period of incubation rarely exceeds a week, the pyrexia is high, the pulse is very rapid, the skin is dry and rough, and there is nausea. On the second day there is a red eruption appearing first on the breast and spreading rapidly over the entire body; it is most intense about the joints. There are considerable irritation and circumscribed tumefaction of the skin. With the cutaneous eruption there are redness of the pharyngeal region and pain on swallowing, and a diphtheroid membrane with superficial ulcerations may be observed in the fauces; the membrane may extend into the larynx. The tongue, at first thickly coated, becomes very red, with prominent papillæ; in severe cases it becomes dry, and eventually brownish. There may be delirium and convulsions from the beginning of the f. The eruption grows fainter on the fourth or fifth day, desquamation ensuing shortly; in some cases the eruption may be absent, only congested fauces occurring with the f., though desqua-

mation will occur as usual. With desquamation there are great physical prostration and often diarrhœa that lasts for some time. The cervical lymphatic glands enlarge during the pharyngeal inflammation, and they may suppurate during desquamation. The extension of the false membrane from the throat into the Eustachian tube may result in otitis media or mastoiditis. Œdema of the glottis, pleurisy, and renal complications are not unusual. Convalescence is slow and the complications of the disease may affect the patient for life. The contagiousness is greatest during desquamation. [a, 34.]—**Scinde f.** Both the pernicious malarial and typho-malarial f. of Scinde. [a, 34.]—**Scorbutic f.** Lat., *febris scorbutica.* Fr., *fièvre scorbutique.* See *Lymphatic f.*—**Scorbutic typhus f.** Typhus f. with extensive subcutaneous hæmorrhages, epistaxis, hæmorrhage from the gums, hæmatemesis, hæmoptysis, menorrhagia, or hæmaturia; it occurs in those having scurvy. [a, 34.]—**Scrofulous secondary f.** Of Graves, a fatal f. that begins when inflammatory, nervous, bilious, or typhoid f. should cease and convalescence begin. [a, 34.]—**Seasoning f.** See *Acclimation f.* —**Secondary f.** 1. See *Symptomatic f.* 2. A f. occurring after the subsidence of the initial f. of a febrile disease. 3. See *Suppurative f.* (2d def.).—**Secondary suppurative f.** Hectic f., as in caries of vertebræ, etc. [a, 34.]—**Secondary traumatic f.** See *Traumatic f.*—**Secondary typhus f.** See *Remitto-typhous f.*—**Secundan f.** A term proposed for tertian intermittent f. [Schauffler (A, 473).]—**Semitertian (intermittent) f.** See FEBRIS *semitertiana.*—**Septan (intermittent) f.** Lat., *febris septana.* Fr., *fièvre septane.* Ger., *siebentägiges Fieber.* Intermittent f. in which the paroxysms recur every sixth day. [D, 72.]—**Septicæmic f.** F. associated with septicæmia. [a, 34.]—**Septic f.** A f. due to septicæmia.—**Septic scarlet f.** Ger., *septisches Scharlach.* A grave form of scarlet f. in which the eruption is usually absent, gangrene of the mouth often occurs, and internal hæmorrhages and death quickly supervene. [D, 39.]—**Serous epithelial f.** Of Bailly, f. accompanying inflammation of serous epithelial surfaces, such as rheumatism, meningitis, etc. [a, 34.]—**Seven-day f.** See *Relapsing f.* and *Septan (intermittent) f.*—**Seventeen-day f.** See *Relapsing f.*—**Sewage-farm f.** Of Seaton, a f. that commences suddenly with rigors, frontal headaches, vomiting, and scantiness of urine, with absence of the chlorides. The fatal cases terminated in twenty-four hours; in other cases defervescence usually occurred in from two to five days. Otorrhœa or pneumonia might occur as a complication. The disease was observed among boys only in a school of six hundred pupils in which the earth-closet system was employed for fertilizing six acres of land. [a, 34.]—**Sextan (intermittent) f.** Lat., *febris sextana.* Fr., *fièvre sextane.* Intermittent f. in which the paroxysms recur every fifth day. [D, 72.]—**Ship f.** Lat., *febris nautica.* Fr., *fièvre des vaisseaux.* Of Lind, typhus f., formerly very prevalent on shipboard. [a, 34.]—**Short f.** See *Relapsing f.*—**Siam f.** Fr., *fièvre de Siam.* Yellow f.; so called because it was supposed to have originated in Siam. [a, 34.]—**Sierra Leone f.** The remittent f. of Sierra Leone. [a, 34.]—**Silesian f. (of 1847).** Relapsing f. [a, 34.] —**Simple asthenic f., Simple continued** (or **inflammatory** [Fordyce]) **f.** Lat., *febris continua simplex.* Fr., *fièvre continue simple, f. continente aigue simple* (ou *inflammatoire simple*). Ger., *Fieber von unbestimmtem Character.* A continued f. having no specific character. [a, 34.]—**Simple f.** Lat., *febris simplex.* Fr., *fièvre simple.* See FEBRICULA.—**Simple scarlet f.** Lat., *scarlatina simplex.* Scarlet f. in which the exanthem and redness, but no ulceration, of the throat are present. [D, 1.]—**Simple traumatic f.** Pyrexia occurring soon after an injury. [a, 34.]—**Singultous f.** Lat., *febris singultuosa.* Fr., *fièvre singultueuse.* A f. accompanied with hiccough. [L, 116.]—**Slow f.** Lat., *febris lenta.* Fr., *fièvre lente.* 1. Any f. of long duration. 2. An old term for typhoid f. [a, 34.]—**Slow nervous f.** Of Hilary and Huxham, probably typhoid f. [D, 46; a, 34.]—**Smyrna f.** The malarial f. of Smyrna. [a, 34.]—**Solar f.** See DENGUE.—**Soporose f.** Lat., *febris soporosa.* Fr., *fièvre soporeuse.* See *Comatose f.*—**Specific enteric f.** See *Typhoid f.*—**Specific f.** See *Essential f.*—**Specific yellow f.** See *Yellow f.*—**Spirillum f.** [Carter]. See *Relapsing f.*—**Splenic f.** See *Contagious* ANTHRAX.—**Spotted f.** Lat., *febris petechialis.* See *Typhus f.* and *Cerebro-spinal* MENINGITIS.—**Spring f.** See FEBRIS *vernalis.*—**Spurious worm f.** See *Infantile remittent f.*—**Spurious yellow f.** A f. with articular pains, with occasionally an eruption of but a few days' duration, occurring during an epidemic of yellow f. It has been supposed to be dengue, but is probably a malarial f. [a, 34.]—**Starvation f.** Of Da Costa, continued f. due to want and starvation. ["Chem. News," 1880, p. 217 (a, 24).]—**Station f.** Malarial f. affecting British troops on colonial stations. [a, 34.]—**Stercoral f.** See FEBRIS *stercoralis.*—**Sthenic f.** See FEBRIS *sthenica.*—**Sthenic yellow f.** Of Lyons, a variety of yellow f. in which the f. is intense. It occurs in persons of full muscular development. [D, 1.] —**Stiffnecked f.** See DENGUE.—**Stomachic f.** See *Gastric f.*—**Strangers' f.** A f. affecting an immigrant; either malarial or yellow f. [a, 34.]—**Subcontinuous f.** Lat., *febris subcontinua.* A f. having slight intermissions. [a, 33.]—**Subintrant f.** See FEBRIS *subintrans.*—**Sudatory f., Sudoral f.** Lat., *febris sudatoria.* Fr., *fièvre sudatoire* (ou *sudorale*). See *Sweating f.*—**Summer and autumn remittent f.** Of Craigie, the form of intermittent f. chiefly met with in warm countries. [D, 1.]—**Summer f.** See *Hay f.*—**Sun f.** 1. In Burmah and India, a febricula. [D, 1.] 2. See DENGUE. 3. See INSOLATION.—**Suppurative f.** Fr., *fièvre suppurative* (ou *de suppuration*). 1. Of Braidwood, pyæmia. 2. A f. associated with suppuration, as in small-pox.—**Surgical f.** The pyrexia consequent upon a surgical operation; there may be rigors or chilliness, with the usual signs of f., or simply a slight elevation of temperature. [a, 34.]—**Sweating f.** Lat., *febris diaphoretica.* Fr., *fièvre sudorale.* Ger., *Schweissfieber.* 1. A form of intermittent f. in which the sweating stage of the paroxysms is very pronounced. [D, 72.] 2. See MILIARIA.—**Swine f.** Fr., *rougel.* Ger., *Schweinseuche, Schweinsepticämie.* A fatal infectious epidemic prevailing among hogs; due to a microbe and characterized by extensive lesions of the intestines and lungs. [a, 24; a, 34.]—**Sympathetic f., Symptomatic f.** See *Inflammatory f.*—**Syncopal f.** Lat., *febris syncopalis.* Fr., *fièvre syncopale.* A f. characterized by fainting spells. [L, 116.]—**Synochal f.** Fr., *fièvre synoque* (*simple*). See *Simple continued f.*—**Synochal scarlet f.** Ger., *synochales Scharlach.* A form of scarlet f. distinguished by the rapidity of the invasion and the intensity of the f., eruption, angina, and cerebral symptoms. [D, 39.]—**Synochoid f.** [Copland]. Common continued f. [a, 34.]—**Synochoid puerperal f.** See *Congestive puerperal f.*—**Syphilitic f.** Fr., *fièvre syphilitique.* The fever that may occur as the result of constitutional syphilis, especially in its early stages. It often precedes the first appearance of general symptoms by a week or ten days. It may be either continuous, remittent, or sometimes intermittent, the exacerbations usually occurring toward night. [G.]—**Terai f.** A form of remittent f. of great intensity which prevails in India. [Chevers, "Med. Times and Gaz.," Aug. 25, 1883, p. 208 (D).]—**Tertian (intermittent) f.** Lat., *febris tertiana.* Fr., *fièvre tierce.* Ger., *Tertianfieber, dreitägiges Fieber.* Intermittent f. in which the paroxysms occur every second day. [a, 34.]—**Tetanic intermittent f.** See FEBRIS *intermittens tetanica.*—**Tetanoid f.** [Rodenstein]. Epidemic cerebrospinal meningitis. [a, 34.]—**Thermic f.** Fr., *fièvre thermal* (ou *thermique*). 1. A f. produced by excitation of the thermic nervous centres, or possibly by paralysis of the heart-inhibiting centres in consequence of prolonged exposure to the influence of continued atmospheric heat; it is seen in semi-tropical or tropical climates. The face is red, the conjunctivæ are often injected, the pupils are dilated, and there is a temperature of 104° F.; gastric irritability may be present or absent; sometimes there is diarrhœa, and often delirium. Adynamia often occurs, and the patient dies within a few days or about the second week. [a, 34.] 2. See INSOLATION.—**Third-day (intermittent) f.** See *Tertian (intermittent) f.*—**Three-day f.** In India, dengue. [a, 34.]—**Thoracic (congestive) f.** A variety of congestive f. characterized by intense pulmonary congestion and by dyspnœa. [D, 25.]—**Tonic f.** Lat., *febris tonica.* Fr., *fièvre tonique.* See *Sthenic f.*—**Tonkin f.** The bilious remittent f. of Tonkin. [a, 34.]—**Torpid scarlet f.** Ger., *torpides Scharlach.* That form of scarlet f. in which the phenomena of nervous disturbance are most prominent. The angina accompanying it is prone to take on a diphtheritic form, and the eruption comes out imperfectly. Death often occurs, and, when it does not, the sequelæ are apt to be severe. [D, 39.]—**Toxæmic malarial f.** Hæmorrhagic malarial f. [Williams, "Coll. and Clin. Rec.," 1889, x, 103 (a, 34).]—**Traumatic f.** Lat., *febris traumatica.* Fr., *fièvre traumatique.* Ger., *Wundfieber.* According to some writers, any febrile state due to an injury; according to others, a f. due to traumatism, but exclusive of puerperal, urethral, septicæmic, and pyæmic f's. [Horsley, "Lancet," Dec. 27, 1884, p. 1133.]—**Trembling f.** Malarial f. in which the ague is severe. [a, 34.]—**Triple quartan intermittent f.** Fr., *fièvre triple-quarte.* Quartan intermittent f. in which the paroxysms are repeated daily, or in which, in addition to the regular attack, there is a mild one on each intervening day. Sometimes the three paroxysms recur on the same, sometimes on different days; in that case the first corresponds to the fourth, the second to the fifth, and the third to the sixth. [D, 72, 90; a, 34.]—**Triple quotidian (intermittent) f.** Fr., *fièvre triple-quotidienne.* An intermittent f. in which there are three paroxysms every day. [D.]—**Triple tertian (intermittent) f.** An intermittent f. in which two paroxysms occur on alternate days, and one on the intermediate days. [A, 473.]—**Triplicated quartan (intermittent) f.** A quartan intermittent f. in which three paroxysms occur on the appropriate day, with a normal interval. [D, 90.]—**Tropical enteric f.** A form of typhoid f. met with in the tropics; characterized by suddenness of onset, high evening temperature, and the general absence of rose spots and of pea-soup evacuations, the latter being often of a bright orange-color. [G. H. Younge, "Med. Press and Circ.," June 29, 1887, p. 613 (a, 24).]—**Tropical f.** Lat., *febris tropicalis.* Fr., *fièvre tropicale.* See *Yellow f.*—**Tuberculous f.** Fr., *fièvre tuberculeuse.* See *Phthisical f.*—**Typhic f.** Of R. Chambers, typhus and typhoid f's. [a, 34.]—**Typhoid f.** Lat., *febris typhodes.* Fr., *fièvre typhoïde.* Ger., *Abdominaltyphus, Abdominalnervenf'.* 1. Any f. characterized by adynamic symptoms. 2. A continued infectious f. due to the introduction into the organism, by the respiratory passages or by food or drink, of the typhoid bacillus. The multiplication of this organic ferment produces in susceptible individuals, of any age or social station, an initial stage of languor, anorexia, and general nervous depression, culminating in a chill followed by f., which gradually increases during the first week (stage of increase), then remains at about the same height for a week or more (stage of acme), and then begins gradually to decline (stage of decrease [or defervescence]). The f. shows a morning remission and evening exacerbation. Shortly after the seventh day of the f. a red macular eruption resembling flea-bites usually appears on the abdomen, there is tympanites, and pressure over the right iliac region produces pain and a gurgling sound. The anorexia may be associated with nausea, the intestinal evacuations become watery and assume the appearance of pea-soup, and there is great debility. There are stupor and mental dullness and confusion; occasionally asthmatic, apoplectoid, or epileptoid symptoms are present, the entire nervous system manifesting the toxic influence of the ptomaines that are formed. There may be hæmorrhage from the nose, stomach, or bowels. The spleen is enlarged. At about the twenty-first day of the disease the pyrexia has disappeared in favorable cases, and an improvement in the nervous and gastro-intestinal symptoms begins. In some cases the f. is protracted for some weeks, while in others there seems to be no resistance, and a fatal termination occurs early. Before the discovery of the typhoid bacillus, typhoid f., as an entity, rested on definite lesions of the closed follicles of Peyer's patches and of the solitary glands of the ileum. The bacilli seem to have a special affinity for these lymphatic structures, producing cell-infiltration, necrobiosis of tissue, and eventually the production of ulcers that may, instead of cica-

trizing, perforate the peritoneal coat of the intestine and produce fatal peritonitis. During the third or fourth week abscesses and even gangrene may appear, and albuminuria and cardiac and pulmonary affections are occasional sequelæ. [α, 34.]—**Typhoid f. of India.** Asiatic cholera. [α, 34.]—**Typhoid f. of the tropics.** Pernicious malarial f. in tropical latitudes in which there is inflammation of Peyer's glands. [α, 34.]—**Typhoid malarial f.** See *Typho-malarial f.*—**Typho-malarial f.** Fr., *fièvre typhoïde palustre* (ou *des tropiques*, ou *thermique continue*), *typhus malarique*. 1. Of J. J. Woodward, a f. initiated by a chill that is succeeded by pyrexia remittent in character at first, but gradually becoming continuous toward the end of the first week; there are nausea, bilious vomiting, diarrhœa, and mental lethargy present at an early date. The face becomes pale, sallow, jaundiced, and emaciated; the tongue is moist, sometimes dry; the spleen is enlarged; the debility increases, and toward the end of the third week the patient enters upon a protracted convalescence, unless death from exhaustion has terminated the case earlier. The rose-colored eruption of typhoid f. is not present, and in fatal cases the usual lesions present in malarial cases are found, while the solitary and agminated glands of the ileum are simply enlarged. It was believed that the micro-organisms of typhoid and malarial f's were present in the same individual, and recent bacteriological research seems to confirm the correctness of this supposition. The disease was described by Drake and others (see *Remittent typhus f.*). 2. An asthenic form of remittent f. in which the typhoid bacillus is not present in the blood. [α, 34.]—**Typho-typhus f.** Mild typhus f., presenting such typhoid symptoms as looseness of the bowels, tympanites, epistaxis, and some bronchial irritation. The eruption appears on the fourth day, and the crisis occurs from the tenth to fourteenth day. [Pepper, "Phila. Med. Times," 1879, x, 189 (α, 34).]—**Typhous f.** See *Typhus f.*—**Typhous yellow f.** Of Lyons, yellow f. in which some of the symptoms of typhoid f. are present, and internal hæmorrhages sometimes occur. [D, 1.]—**Typhus f.** Lat., *febris typhus*. Fr., *typhus, fièvre carcéraire*. Ger., *exanthematischer Typhus, Fleckfieber*. It., Sp., *tifo*. A contagious, continued f.; formerly epidemically prevalent in camps, hospitals, jails, and a crowded population. The symptoms are a brief prodromal stage with lassitude, dejection, and occasional chilliness; at the invasion the f. is high, the pulse full at first but subsequently frequent and compressible, the skin dry; the tongue is furred, subsequently brown and dry, the face flushed; the patient is drowsy and in a state of mental hebetude, and there is a very unpleasant odor from the body. A red eruption appears on the skin between the fourth and seventh day, the spots at first disappearing on pressure, but subsequently being persistent until the fourteenth day. The flushed face, injected conjunctivæ, contracted pupils, mental obtuseness with a tendency to coma, tremors, subsultus, and general physical and mental prostration, indicate the profound impression the materies morbi makes upon the organism. The duration of the f. is from ten to twenty-one days, the temperature usually ranging above 104° F., with but little difference between the morning and evening temperature until defervescence is reached. The latter occurs suddenly (by crisis). The f. is not infrequently complicated with other diseases. In the dead body no specific lesions are found. From the eruption the f. derived its old names of spotted f., lenticular f., pulicular f., etc.; and the constant affection of the nervous system gave it the name of nervous f., low nervous f., etc. [α, 34.]—**Uniform f.** *Simple continued f.*—**Uræmic f.** Fr., *fièvre urémique*. Of Malherbe, an acute or prolonged f. occurring in diseases of, or after operations on, the urinary passages. It is caused by poisoning from retention of urinary ptomaines. [α, 34.]—**Urethral f.** Lat., *febris urethralis*. Ger., *Urethralfieber*. F. due to an operation upon the urethra; usually the result of septic infection, but occasionally due to reflex action of the sympathetic system on the thermic centres. [Horsley, "Lancet," Dec. 27, 1884, p. 1133 (α, 34).]—**Urinary intermittent f., Urinous f.** A f. that occurs in persons having obstruction of the urethra from an hypertrophied prostate or a stricture, or from a calculus obstructing a ureter, or from extravasation of urine. The pyrexia is caused by the absorption of products of excretion or by septic material introduced into the urine. [α, 34.]—**Uterine f.** Lat., *febris uterina*. Fr., *fièvre utérine*. The f. of uterine inflammation.—**Vaccinal f.** The symptomatic f. of vaccinia.—**Varicellar f.** The f. that occurs during varicella. [α, 34.]—**Varioloid f.** A continued f., preceded by a chill, that occurs during varioloid. [α, 34.]—**Variolous f.** Lat., *febris variolosa*. Fr., *fièvre varioleuse*. Of Sydenham, a febrile disease prevailing during an epidemic of variola, and regarded by him as a form of *variola sine eruptione*. [D.]—**Venous f.** Lat., *febris venosa*. Ger., *venöses Fieber*. Of Marcus, a f. which proceeds from the venous system. [D, 3.]—**Verminous f.** Lat., *febris verminosa*. Fr., *fièvre vermineuse*. Ger., *Wurmfieber*. 1. See *Worm f.* 2. Typhoid f. [α, 34.]—**Verminous hectic f.** See FEBRIS *hectica verminosa*.—**Vernal f.** See FEBRIS *vernalis*.—**Vesicular f.** Fr., *fièvre vésiculaire* (ou *vésiculeuse*). See PEMPHIGUS *acutus*.—**Vesicular scarlet f.** See *Phlyctænoid scarlet f.*—**Vittoria f.** Typhus f. epidemic among the British troops at Vittoria, Spain. [Lambton, "Lancet," 1831, i, p. 650 (α, 34).]—**Vitular f., Vitulary f.** Fr., *fièvre vitulaire*. Syn.: *parturient apoplexy*. A disease of cows, analogous to the puerperal f. of women. [A. Roux, "Am. Vet. Rev.," Apr., 1886, p. 11.]—**Walcheren f.** Ger., *Fieber zu Walcheren*. A malarial f. affecting the British troops in the island of Walcheren; it was often associated with entero-colitis. [α, 34.]—**Walking typhoid f.** See *Ambulatory typhoid f.*—**Water-brain f.** See *Brain-water f.*—**White f.** Lat., *febris alba*. Fr., *fièvre blanche*. Ger., *Bleichsucht*. A febricula accompanying chlorosis, to which it was attributed. [α, 34.]—**Winter f.** In southern Illinois and other malarious parts of the United States, pneumonia. [J. M. G. Carter, "Med. Record," July 5, 1890 (α, 17).]—**Winter malarial f.** Malarial f. occurring in winter. [Greenley, "Am. Pract. and News," 1889, viii, 67 (α, 34).]—**Worm f.** Syn.: *verminous f.* A continued f., with symptoms of gastro-intestinal irritation, that is produced by worms in the intestinal canal. [α, 34.]—**Wound f.** See *Traumatic f.*—**Yellow f.** Lat., *febris flava* (seu *icterodes*). Fr., *fièvre jaune* (ou *d'Amérique*, ou *bilieuse d'Amérique*). Ger., *Gelbfieber, gelbes* (oder *amerikanisches*) *Fieber*. It., *febbre gialla*. Sp., *fiebre amarilla, vómito prieto*. An acute infectious f. occurring endemically in the West India islands and Central and South America during the warm months, although sporadic cases may appear at any time during the year. It appears to be due to a specific organism, not yet discovered, that is transmitted by air, water, ballast, food, or clothing. The active manifestation of the disease is preceded by malaise of brief duration; the initial chill is rarely severe, and the temperature subsequently rises to about 104° F.; as a rule, the pulse is slow and not commensurate with the pyrexia, there are headache and lumbago, the tongue is usually clean, the stomach is irritable, and the vomitted matter, at first mucus, becomes black, resembling coffee-grounds. The urine early in the disease becomes albuminous. As the f. progresses, there may be hæmorrhage from the eyes, nose, gums, bowels, kidneys, or uterus. Jaundice comes on, and there is decided physical prostration. Suppression of urine occurs in severe cases, with the usual uræmic convulsions; where these and free black vomit are observed, the result is apt to be fatal. Convalescence is slow, and indiscretion in diet, exposure, or gratification of the exaggerated sexual desire that is sometimes present in adults, will bring on a serious relapse. One attack of the disease does not always prevent a second. [α, 34.]—**Yellow remittent f.** See *Bilious remittent f.*

FEVERFEW, n. Fe′vu^{5}r-fu^2. See MATRICARIA *parthenium*.—**Bastard f.** The *Parthenium hysterophorus*. [B. 275 (α, 24).]—**Common f.** See *F.*—**Marsh f.** The *Pyrethrum* (*Chrysanthemum*) *lacustre*. [B, 275 (α, 24).]—**Narrow-leaved f.** The *Pyrethrum achilleæfolium*. [B, 275 (α, 24).]

FEVERISH, adj. Fe′vu^{5}r-i^{2}sh. Lat., *febrilis*. Fr., *fiévreux, fébricitant*. Ger., *fieberisch, fieberhaft*. Suffering from fever; febrile. [D.]

FEVERISHNESS, n. Fe′vu^{5}r-i^{2}sh-ne^{2}s. The state of being feverish.

FÉVEROLE (Fr.), n. Fe^{2}v-rol. The *Vicia faba*, var. *minor*, and the *Phaseolus vulgaris*. [B. 173 (α, 24).]

FEVEROUS, adj. Fe′vu^{5}r-u^{3}s. See FEVERISH.

FEVERWORT, n. Fe′vu^{5}r-wu^{5}rt. The *Erythræa centaurium* and the *Triosteum perfoliatum*. [B, 81 (α, 21); B, 275 (α, 24).]—**American f.-w.** The genus *Triosteum*. [B, 275 (α, 24).]

FÉVIER (Fr.), n. Fa-ve-a. The genus *Gleditschia*. [B, 121 (α, 24).]—**F. à trois points, F. d'Amérique.** The *Gleditschia triacanthos*. [B, 173 (α, 24).]—**F. lisse.** The *Gleditschia triacanthos*, var. *inermis*. [B, 173 (α, 24).]—**Gros f.** The *Gymnocladus dioica*. [B, 173 (α, 24).]

FEVILLEA (Lat.), n. f. Fe(fa)-vi^{2}l(wi^{2}l)′e^2-a^3. Fr., *f.* A genus of the *Cucurbitaceæ*, tribe *Fevilleæ*. [B, 19, 42, 121 (α, 24).]—**F. à feuilles de lierre** (Fr.). See *F. trilobata*.—**F. cordifolia.** Fr., *f. à feuilles en cœur*. The cacoon, a species found in the West Indies and Brazil. The fruit (Fr., *boite à savonettes, noix de serpents, antidote cacoon*) yields a seed containing an emetic and purgative oil, which is used externally as a vulnerary, internally as an antidote in snake bites and for vegetable poisons, and as a vermifuge. [B, 173, 180 (α, 24).]—**F. grimpant** (Fr.). See *F. scandens*.—**F. hederacea.** See *F. trilobata*.—**F. javilla.** A New Granada species, used as a febrifuge. [B, 173 (α, 24).]—**F. monosperma.** A species found in Brazil, where the seeds are used as a cathartic. ["Proc. of the Am. Pharm. Assoc.," x (α, 14).]—**F. scandens.** Fr., *f. grimpant, liane à calabasse* (ou *à couleuvre*, ou *à savonette*, ou *contre-poison*). A species found in the West Indies, of which *F. cordifolia* and *F. trilobata* are varieties. [B, 173 (α, 24).]—**F. trilobata.** Fr., *f. à feuilles de lierre*. A species found in Brazil. The seed, *nhandiroba* seed, yields an oil used externally in rheumatism and gout. According to Martius, the fruit is the *fava do Santo Ignacio* of the Brazilians. [B, 46 (α, 14), 180 (α, 24).]

FEWS, n. Fu^{2}z. The *Sempervivum tectorum*. [A, 505 (α, 21).]

FEZ, n. Fe^{2}z. A place in Morocco where there is a warm sulphurous and ferruginous spring. [L, 49.]

FEZIQUE, n. In Saintonge, France, the *Cantharellus cibarius*. [B, 121 (α, 24).]

FIAFIATULI, n. In Samoa, the *Portulaca quadrifida*. [B, 121 (α, 24).]

FIALOWY-KOREN, n. In Bohemia, the *Iris florentina*. [B, 121 (α, 24).]

FIBER, n. Fi′bu^{5}r. See FIBRE.

FIBER (Lat.), n. m. Fib(fi^{2}b)′u^{5}r(e^{2}r). Gen., *fib′ri*. See CASTOR.—**F. zibethicus.** The musk-rat; an aquatic species of strong musky odor, found throughout North America. [B, 138.]

FIBER (Ger.), n. Fe′be^{2}r. See FIBRE.—**Bogenförmige F'n.** See *Arciform* FIBRES.

FIBICHIA (Lat.), n. f. Fi^2-bi^{2}k(bi^{2}ch^2)′i^2-a^3. See CYNODON.—**F. umbellata.** See CYNODON *dactylon*.

FIBIG, n. In Provence, the *Lagenaria pyrotheca*. [B, 121 (α, 24).]

FIBIGIA (Lat.), n. f. Fi^2-bi^{2}j(bi^{2}g)′i^2-a^3. See FARSETIA.—**F. clypeata.** See FARSETIA *clypeata*.

FIBRA (Lat.), n. f. Fı(fi^2)′bra^3. 1. A fibre. 2. A lobe. 3. In the pl., *fibræ*, of Martius, the receptacle of certain *Mucedineæ*. [B, 121 (α, 24); L, 349.]—**Fibræ accelerantes.** See *Augmentor* FIBRES.—**Fibræ accessoriæ.** See *Accessory* FIBRES.—**Fibræ adamantinæ.** See *Enamel* FIBRES.—**Fibræ ad nervum facialem accessoriæ.** The fibres forming the accessory root of the facial nerve. [I, 3; K.]—**Fibræ arciformes.** See *Arciform* FIBRES.—**Fibræ arciformes cerebelli.** Curved or arching fibres in the cerebellum. [α, 29.]—**Fibræ arciformes externæ.** See *Exter-*

nal arciform FIBRES.—**Fibræ arciformes horizontales.** See *Arciform* FIBRES.—**Fibræ arciformes internæ olivares.** The internal arciform fibres which pass through the olivary bodies. [I, 17; K.]—**Fibræ arciformes transversæ.** Of Arnold, the transverse fibres of the stratum zonale. [L. 31 (*a*, 29).]—**Fibræ arcuatæ, Fibræ arcuatæ gyrorum cerebri.** See *Arciform* FIBRES.—**Fibræ arcuatæ internæ.** Bundles of transverse fibres in the tegmental region of the crus cerebri, which, together with the longitudinal fibres, compose the formatio reticularis. [I, 7; K.]—**Fibræ arcuatæ orbitales nervi optici.** The fibres which lie with their concavity forward in the anterior angle of the chiasm of the optic nerve. [L, 31 (*a*, 29).]—**Fibræ arcuatæ tegmenti.** See *Arcuate* FIBRES *of the tegmentum.*—**Fibræ arcuatæ transversales.** See *Fibræ arcuatæ internæ.*—**F. aurea.** See FIBRAUREA.—**F. auriculæ.** The lobe of the ear. [L, 7.]—**Fibræ circulares.** The median layer of muscular fibres in the wall of the stomach.—**Fibræ circulares iridis externæ.** A band of muscular fibres near the ciliary border of the iris, described by Pappenheim and Valentin. [L, 7 (*a*, 29).]—**Fibræ circulares iridis internæ.** The sphincter pupillæ. [L, 7 (*a*, 29).]—**Fibræ collaterales.** See *Intercolumnar* FIBRES.—**Fibræ decussatæ.** The fibres of the pyramids which decussate. [*a*, 29.]—**Fibræ dentales.** See *Denticulated* FIBRES.—**Fibræ elasticæ.** See *Elastic* FIBRES.—**Fibræ elasticæ longitudinales tracheæ.** Fibres of elastic tissue found running longitudinally in and beneath the mucous membrane of the trachea. [L, 7 (*a*, 29).]—**Fibræ explementoriæ.** Fibres which pass from one cerebral lobe to the other. [L, 7 (*a*, 29).]—**Fibræ heterodesmoticæ.** Of Obersteiner, nerve-fibres connecting primary nerve-centres with peripheral organs or with secondary centres. [I.] Cf. *Projection* FIBRES.—**Fibræ homodesmoticæ.** Of Obersteiner, nerve-fibres connecting nerve-centres or ganglia of the same rank, such as different convolutions of the cerebrum. [I.] Cf. *Association* FIBRES.—**Fibræ horizontales.** The rhaphe of the medulla oblongata. [L, 332 (*a*, 29).]—**Fibræ intercolumnares.** See *Intercolumnar* FIBRES.—**Fibræ lentis.** See *Lens* FIBRES.—**Fibræ longitudinales iridis.** The radiating muscular fibres of the iris. [L, 7 (*a*, 29).]—**Fibræ longitudinales.** The external layer of muscular fibres in the wall of the stomach. [*a*, 29.]—**Fibræ mediæ ventriculi.** The circular fibres in the muscular coat of the stomach. [L, 80 (*a*, 29).]—**Fibræ medullares.** See STRIÆ *acusticæ.*—**Fibræ motoriæ.** Motor nerves. [L, 175 (*a*, 29).]—**F. muscularis (primaria).** See *Muscle* FIBRE.—**Fibræ nasi** [Falloppius]. The pinnæ of the nose. [L, 349.]—**Fibræ nerveæ.** See NERVE-FIBRES.—**Fibræ nervosæ organicæ.** See *Non-medullated* NERVE-FIBRES.—**Fibræ nervosæ primitivæ.** See NERVE-FIBRES.—**Fibræ nervosæ varicosæ.** See *Varicose* NERVE-FIBRES.—**Fibræ nervosæ vegetativæ.** See *Non-medullated* NERVE-FIBRES.—**Fibræ obliquæ.** The innermost layer of muscular fibres in the wall of the stomach.—**Fibræ pallidæ.** The ciliary processes. [L, 7 (*a*, 29).]—**Fibræ periphericæ cerebri et medullæ spinalis.** Cerebro-spinal nerve-fibres outside the central nervous system. [J.]—**F. primitiva.** See AXIS-*cylinder.*—**Fibræ primitivæ pyramidum.** Of Burdach, the fibres of the pyramids in the medulla oblongata which do not decussate. [L, 7 (*a*, 29).]—**Fibræ propriæ.** Of Meynert, the fibres in the cortex cerebri belonging to the association system (corona radiata). [I, 11 (K).]—**Fibræ propriæ cerebelli.** Of Burdach, Arnold, and Stilling, those bundles of nerve-fibres in the cortex cerebelli which extend from one convolution to another. Other *fibræ propriæ* connect distant parts of the cerebellum, such as the vermiform process, and different convolutions (median fasciculi). Meynert also speaks of commissural fibres which unite the hemispheres. [I, 11; K.]—**Fibræ propriæ gyrorum cerebri.** See *Arciform* FIBRES.—**Fibræ pulmonum** [Celsus]. The lobes of the lungs. [L, 349.]—**Fibræ pyramidum decussantes.** See DECUSSATION *of the pyramids.*—**Fibræ pyramidum primitivæ** [Burdach]. Those fibres of the pyramids which form the posterior wall of the anterior median fissure of the cord. [J, 3; K.]—**Fibræ radiatæ iridis.** The radiating muscular fibres of the iris. [L, 7 (*a*, 29).]—**Fibræ rectæ.** Fibres which extend directly from one point to another. [L, 80 (*a*, 29).]—**Fibræ rectæ mediales pedunculi.** The middle tract of direct fibres in the crus cerebri. [I, 73; K.]—**Fibræ rectæ of the rhaphe, Fibræ rectæ rhaphes** (seu **septi mediani tegmenti**). The vertical fibres in the rhaphe of the medulla oblongata. They are continuous posteriorly with the funiculi graciles, and have in their meshes numerous multipolar nerve-cells. [I, 15; K.]—**F. sanguinis.** See FIBRIN.—**Fibræ semicirculares cerebelli.** See *Semicircular* FIBRES *of the cerebellum.*—**Fibræ sensitivæ.** See *Sensory* NERVE-FIBRES.—**Fibræ spirales.** Fibres which follow a spiral direction. [L, 80 (*a*, 29).]—**Fibræ tendineæ.** The white shining fibres of which tendons are composed. [L, 175 (*a*, 29).]—**Fibræ transversæ arciformes.** The fibres which form the stratum zonale medullæ oblongatæ. [L, 7 (*a*, 29).]—**Fibræ transversæ externæ.** See STRATUM *transversale.*—**Fibræ transversæ (seu transversales) pontis** (seu **strati zonalis**). The transverse fibres of the pons Varolii. [J, 17, 31; K.]

FIBRALBUMINE (Fr.), n. Fe-bra^{3}l-bu^6-men. The globulin of the blood modified by agents used to extract or separate it. [L, 49.]

FIBRAUREA (Lat.), n. f. Fi(fe)-bra^4′(bra^3′u^4)-re^2-a^3. Fr., *fibraurée.* Of Loureiro, a genus of the *Menispermaceæ*, tribe *Pachygoneæ.* [B, 42 (*a*, 24).]—**F. tinctoria.** See COCCULUS *f.*

FIBRE, n. Fi′b′r. Gr., ἴς. Lat., *fibra.* Fr., *f.* Ger., *Fiber, Faser, Fädchen.* It., Sp., *fibra.* A filament or a filamentous structure; in particular, an anatomical element greatly elongated, and usually having its cellular character or origin obscured. [B, 19 (*a*, 24); J, 30, 31.]—**Accelerans f's, Accelerating f's.** See *Augmentor f's.*—**Accessory f's.** Ligamentous f's which extend from the posterior ligament of the wrist-joint to the dorsal surfaces of several of the carpal bones. [L, 31 (*a*, 29).]—**Achromatic f's.** See *Achromatic* FIBRILS.—**Actinotrichial f's.** The primary fibrous fin-rays of fishes. [Ryder, "Am. Nat.," 1890, p. 489 (J).]—**Albugineous f's.** Fr., *f's albuginées* [Chaussier]. Bundles of fibrous tissue. [L, 49.]—**Anastomosing f's.** Lat., *fibræ anastomoticæ.* Fr., *f's anastomotiques.* Ger., *anastomosirende Fasern.* F's of any kind (*e. g.*, nerve, muscle, or connective-tissue f's) which anastomose. [J, 28, 55, 57.]—**Annular f's.** Ger., *Ringfasern.* F's forming a ring around an organ or part, as the annular f's of the heart. [J, 28, 30, 140.]—**Annular f's of the heart.** Those muscle f's which encircle the auricular appendages, also the fossa ovalis. [C.]—**Arciform f's, Arcuate f's.** Lat., *fibræ arciformes* (seu *arcuatæ*). Fr., *f's* (ou *faisceaux*) *arciformes, couche des f's arciformes.* Ger., *Bogenfasern, Gürtelfasern, bogenförmige Fibern.* A collection of nerve-f's, occurring in curved bundles, situated at the upper part of the medulla oblongata, and divided into superficial and deep sets. The superficial f's emerge from the anterior median fissure of the medulla, and cross the olivary bodies and pyramids to reach and mostly end in the restiform bodies. The deep f's come from the rhaphe (probably originating in the formatio reticularis), cross through the rhaphe to the opposite half of the medulla, and reach (or extend toward) the olivary and restiform bodies. Those deep f's which extend anterior to the olivary bodies are joined by the superficial arciform f's. [J, 14, 15; K.]—**Arcuate f's of the tegmentum.** Lat., *fibræ arcuatæ tegmenti.* Fr., *f's arciformes de la coiffe.* Ger., *Bogenfasern der Haube.* Certain decussating f's derived from the peduncles of the cerebellum, together with a few from the fillet. According to Quain, some of the f's may come from the Sylvian aqueduct. [I, 15; K.]—**Arnold's spiral f.** See *Spiral f.*—**Arterial muscular f's.** Muscular f's or f.-cells in the arteries. [J, 19.]—**Ascending f's of the cerebrum.** See *Peduncular f's of the cerebrum.*—**Association f's** [Meynert]. Fr., *f's d'association.* White nerve-f's connecting adjacent cerebral convolutions; described as situated just beneath the cortical substance. [I, 15; K.] Cf. *Longitudinal f's.*—**Augmentor f's.** Lat., *fibræ accelerantes.* Fr., *f's accélératrices.* Ger., *accelerirende* (oder *beschleunigende*, oder *herzbeschleunigende*) *Fasern.* Nerve-f's conveying impulses which accelerate the rapidity and augment the force of the heart beat. They leave the central nervous system through the ventral or motor roots of the 2d and 3d (perhaps also the 4th and 5th) thoracic nerves, join the sympathetic ganglia, where they lose their myeline, and then pass to the heart as non-medullated f's, in one or more of the nerve-branches from the annulus of Vieussens, or from the lower and middle cervical sympathetic ganglia. [J, 19, 28, 57.]—**Auxiliary f's.** See *Secondary f's.*—**Axial-f. of a nerve-f.** See AXIS-*cylinder.*—**Bast f.** Lat., *sclerenchyma.* Ger., *Bastfaser.* The variety of vegetable f. found in the inner layer of bark, and in other situations where toughness and flexibility are required, especially in dicotyledons and gymnosperms. It consists of elongated, tough, and air-conducting cells, tapering, and sometimes forked at both ends. Bast f's are commonly more elastic and flexible than wood-f's, and contain but little wood-tissue, although frequently an abundance of crystals. They also have a greater length and thicker walls. Their length and toughness make them of value for textile purposes. [B, 77, 229, 270, 291 (*a*, 24).]—**Beale's spiral f.** See *Spiral f.*—**Bone-f's.** Sharpey's f's.—**Bühlmann's f's.** Ger., *Bühlmannischen Fasern.* Lines found in the carious parts of teeth, formed by rows of a bean-shaped micro-organism, the *Bacterium lineola*, lying upon one another. [A, 319 (*a*, 29).]—**Cambium f's.** F's immediately derived from cambium (2d def.). [B, 229 (*a*, 24).]—**Cardiac f's.** F's, as of muscle or nerve, belonging to the heart. [J, 57.]—**Cardiac muscular f's.** Fr., *f's du cœur* (ou *du myocarde*), *f's musculaires cardiaques* (ou *du cœur*). Ger., *Herzmuskelfasern.* The striated involuntary f's forming the muscular substance of the heart. They have the general appearance, and seem to possess the structure, of ordinary striated muscle, with these differences: There has been no sarcolemma demonstrated; the nuclei are more numerous and are imbedded in the muscular substance; the f's branch and anastomose so as to form a network; finally, the f's are composed of quadrangular cells (cardiac muscular f.-cells) placed end to end, and often branched or forked at one extremity. [J, 24, 30, 31, 34, 35.]—**Cardio-inhibitory f's.** Inhibitory nerve-f's from the vagus to the heart. [J, 124.]—**Carneous f.** See *Muscular f's.*—**Cell-f's.** 1. See CELL-*f's.* 2. The cells in plastic lymph. [J, 16, 19.]—**Cellular f's.** 1. See CELL-*f's.* 2. See *Connective-tissue f's.*—**Central f.** Ger., *Centralfaden, Centralfaser.* 1. In general, a f. surrounded by other f's or tissues. 2. The nerve-f. within a Pacinian corpuscle. [J, 30, 67.]—**Centripetal f's.** 1. See *Afferent* NERVE-F'S. 2. Nerve-f's serving to connect ganglia or nerve-centres of a lower order with those of a higher order. [H. Spencer (J, 189).]—**Cerebral f's.** Nerve-f's of the cerebrum. [J.]—**Cerebro-spinal f's.** Nerve-f's from the brain or spinal cord in contradistinction to those from the sympathic system. [J, 189.]—**Coiled f., Coil f.** See *Spiral f.*—**Collateral f's of the cerebrum.** See *Association f's* and *Longitudinal f's.*—**Commissural f's.** Nerve-f's in or forming a commissure. [J, 189.]—**Commissural f's of the cerebrum.** See *Transverse f's of the cerebrum.*—**Connecting f's.** F's serving to connect other f's or parts. [J.]—**Connective-tissue f's.** Fr., *faisceaux conjonctifs.* Ger., *Bindegewebsbündel, Bindegewebsfasern.* Syn.: *connective-tissue bundle* (or *fasciculus*). The f's forming the principal part of the ordinary soft connective tissues. They may be elastic, as in elastic tissue, or may be glue-yielding, and composed of fine fibrillæ, as seen especially well in fascia and tendon. [J, 30, 31, 175.] Cf. *Connective* TISSUE.—**Cortico-muscular f's.** Ger., *Rindenmuskelfasern.* Those nerve-f's which extend from the cerebral cortex and convey voluntary motor impulses. [Landois (K).]—**Corti's f's.** Fr., *f's de Corti.* The rods or pillars of Corti. [J, 28.]—**Crystalline f's.** See *Lens-f's.*—**Dartoic f's.** The muscular-f. cells or plain muscular f's in the dartos. [J, 30.]—**Decussating f's.** Of Sharpey, minute bundles, apparently of the nature of white fibrous tissue, which form a considerable part of the lamellæ of bone. They extend in a direction parallel with the surface of the lamellæ, and cross each other in such a way as to form a delicate network with fine meshes, the meshes being in some cases

square, in others diamond-shaped. These f's are supposed to remain uncalcified, the deposit of calcified matter being limited to the matrix in which they are imbedded. [J, 30.]—**Dental f's.** Fr., *f's dentaires* (ou *de la dentine*). Ger., *Dentinfortsatz*, *Zahnfasern*. Of Tomes, the minute protoplasmic processes extending into the dentinal canals from the odontoblasts. ["Phil. Trans.," 1846 (J, 26, 30, 35).]—**Denticulated f's.** Lens-f's with serrated edges. [J, 30.]—**Dentin f's.** See *Dental f's*.—**Depressor f's.** Ger., *depressorische Fasern*. F's of a depressor nerve whose stimulation has an inhibitory action on the vaso-motor nerve-centre, with a consequent dilatation of some part of the vascular system. [J, 19, 57.]—**Diverging f's.** The radiating f's of the corona radiata. [a, 29.]—**Double-contour f's.** Fr., *f's à double contour*. See *Medullated* NERVE-F's.—**Elastic f's.** Fr., *f's élastiques*. Ger., *elastische Fasern*. Branched and anastomosing f's of elastic tissue, found in nearly every part of the body, forming networks, as between the bundles of white fibrous tissue, in the corium of the skin, and mucous membranes. They form an essential part of areolar tissue and of the blood-vessels, and appear as ligaments in the ligamenta subflava of man and the ligamentum nuchæ of the ox. [J, 30, 32, 35.] See also *Elastic* TISSUE.—**Elementary f.** Ger., *Elementarfiber*. 1. In botany, the thread turned around the interior of the tubes in spiral vessels. [B, 19 (a, 24).] 2. One of the anatomical elements of a tissue composed mainly of f's. 3. Imaginary fibrous elements supposed by the ancients to make up the entire body. [J, 16.]—**Elementary cardiac muscular f.** A cardiac muscular f. consisting of a single row of united cardiac muscle-cells. [J, 19.]—**Elementary muscular f.** See *Muscular f*.—**Enamel-f's.** Lat., *fibræ* (seu *fibrillæ*) *adamantinæ*. Ger., *Schmelzfasern*. Syn.: *enamel prisms*. The hexagonal rods of which the dental enamel is composed. [L, 115.] See ENAMEL.—**Excito-vaso-motor f's.** See *Pressor f's*.—**External arciform f's.** Lat., *fibræ arciformes externæ*. A set of nerve-f's which emerge from the anterior median fissure of the spinal cord, extend outward, crossing the olivary body and anterior pyramid, and finally terminate at the restiform body. [I, 24.]—**External transverse f's.** F's which form the outer muscular tunic in the *Entozoa*. ["Proc. of the Zool. Soc.," 1836, p. 126 (a, 29).]—**Extrinsic f's of the uterus.** Fr., *f's extrinsèques*. A loose network (in some of the lower animals a complete investment) of muscular f's described by Rouget as surrounding the uterus and extending between the layers of the broad ligament to the round ligament, the ovarian ligament, the oviduct, etc. [A, 15.]—**Fasciculated muscular f.** Striated muscular tissue. [J.]—**F's accélératrices** (Fr.). See *Augmentor f's*.—**F's accessoires du triangulaire** (Fr.). See CORRUGATOR *labii inferioris*.—**F's à double contour** (Fr.). See *Medullated* NERVE-F's.—**F's albuginées** (Fr.). See *Albugineous f's*.—**F's à moelle** (Fr.), **F's à myéline.** The naked axis-cylinders seen in the gray substance of the central nervous system. [I, 28; K.] See *Medullated* NERVE-F's.—**F. annulaire** (Fr.). See *Spiral f*.—**F's à noyaux du tissu de la lentille** (Fr.). Lens-f's possessing a distinct nucleus. [J, 33.]—**F's arciformes de la coiffe** (Fr.). See *Arcuate f's of the tegmentum*.—**F's arquées** (Fr.). See *Arciform f's*.—**F's arrestatrices** (Fr.). See *Inhibitory f's*.—**F's artérielles** (Fr.). See *Arterial muscular f's*.—**F's cardiaques embryonnaires** (Fr.). See *F's of Purkinje*.—**F.-cellule** (Fr.). See *F.*-CELL and *Muscular f.*-CELL.—**F.-cellule contractile** (Fr.). See *Muscular f.*-CELL.—**F's centrifuges** (Fr.). See *Motor* NERVE-F's.—**F's centripètes.** See *Afferent* NERVE-F's.—**F's charnues du cœur** (Fr.). See *Cardiac muscular f's*.—**F's conjonctives** (Fr.). See *Connective-tissue f's*. [L, 49.]—**F's corticales directes** (Fr.). The f's of the internal capsule which pass directly from the crus cerebri. [L, 88 (a, 29).]—**F's cortico-optiques** (Fr.). The nerve-f's which connect the optic thalamus with the cortex cerebri. [I, 28; K.] Cf. *First association* SYSTEM.—**F's cortico-striées** (Fr.). The nerve f's which radiate from the corpus striatum to the cortex cerebri. [I, 41; K.] See CORONA *radiata*.—**F's d'association** (Fr.). See *Association f's*.—**F's de la dentine** (Fr.). See *Dentinal f's*.—**F's de noyaux** (Fr.). See *Achromatic* FIBRILS.—**F's dentaires** (Fr.). See *Dental f's*.—**F. droite** (Fr.). See *Straight f*.—**F's extrinsèques** (Fr.). See *Extrinsic f's of the uterus*.—**F's gustatives** (Fr.). F's of a nerve of taste. [J, 28.]—**F's intertubulaires** (Fr.). Ger., *intertubulare Fasern*. Neuroglia f's between the nerve-f's in the central nervous system, but especially in the spinal cord. [J, 31.]—**F's intrinsèques.** See *Intrinsic f's of the uterus*.—**F's lisses** (Fr.), **F's musculaires de la vie organique** (Fr.), **F's musculaires fusiformes (ou lisses, ou rubanées)** (Fr.). See *Muscular f.*-CELLS.—**F's nerveuses** (Fr.). See NERVE-F's.—**F's nerveuses à myéline** (Fr.). See *Medullated* NERVE-F's.—**F's nerveuses excito-toniques** (Fr.). Nerve f's conveying the impulses necessary for the preservation of the tonus of a sphincter, etc. [J, 28.]—**F's nerveuses sans myéline.** See *Non-medullated* NERVE-F's.—**F's nerveuses variqueuses** (Fr.). See *Varicose* NERVE-F's.—**F's nutritives.** See *Non-medullated* NERVE-F's.—**F's of Purkinje.** Fr., *f's de Purkinje*, *f's cardiaques embryonnaires*. Ger., *Purkinje'sche Fäden* (oder *Fasern*). Syn.: *Purkinje's filaments*. Thin, transversely striped muscular f's, having a centre of protoplasm with regularly disposed nuclei found in the subendocardial areolar tissue of birds and some mammals. The periphery of the f's appears like striated muscular tissue, but the central part consists of clear nucleated cells placed end to end. These are thought to be cardiac muscular f's in an embryonic condition. [Purkinje, "Arch. f. Anat.," 1845, p. 281 (J, 30, 31, 35); L, 351.]—**F's of Remak.** See *Non-medullated* NERVE-F's.—**F's of Tomes.** See *Dentinal f's*.—**F's organiques** (Fr.). See *Non-medullated* NERVE-F's.—**F's radiculaires du corps calleux** (Fr.). Of Gratiolet, the radiating f's of the corpus callosum. [I, 35; K.]—**F's transverses moyennes de la protubérance** (Fr.). The transverse f's of the pons Varolii. [I, 55; K.]—**F's transverses profondes de la protubérance.** The deep transverse f's of the pons Varolii. [I, 55 (K).]—**F's transverses superficielles de la protubérance.** The superficial transverse f's of the pons Varolii. [I, 55; K.]—**F's unitives du cœur** (Fr.). Muscular f's of the heart passing from one side to the other; *i. e.*, f's common to the two sides. [J, 28, 30.]—**F's variqueuses** (Fr.). See *Varicose* NERVE-F's.—**F's végétatives** (Fr.). See *Non-medullated* NERVE-F's.—**F's verticales moyennes de la protubérance** (Fr.). The longitudinal f's of the pons Varolii. [I, 55; K.]—**F's verticales superficielles de la protubérance** (Fr.). The superficial layer of the pons Varolii. [I, 55; K.]—**Fibrillated f's.** F's as in connective tissue, evidently composed of a bundle of fibrils. [Prudden (J, 55).]—**Figure-of-eight f's.** F's arranged in the form of the figure eight, like some of the muscular f's or fascicles of the heart. [J, 150.]—**Fleshy f.** See *Muscular f*.—**Ganglionic f's** [Remak]. Fr., *f's ganglionnaires*. Non-medullated nerve-f's, especially those of the sympathetic nervous system. [J, 24, 35.]—**Gelatiniform (or Gelatinous) nerve-f's.** See *Non-medullated* NERVE-F's.—**Gottstein's external radiatory f's.** The external ciliated cells, and the fine, knotty nerve-f's connected with them, which constitute a portion of the expansion of the auditory nerve in the cochlea. [F.] See under ORGAN *of Corti*.—**Hair-f's.** Fr., *f's pileuses*. Ger., *Haarfasern*. Fibrous masses composed of flattened spindle-shaped cells, into which the principal or cortical portion of a hair may be separated. [J, 24, 30, 35, 83, 175.]—**Henle's nucleated f's.** Fr., *f's nucléées de Henle*. Ger., *Henle'sche kernhaltige Fasern*. Elastic, nucleated f's in the embryonic state. Each f. is supposed to be developed from a single cell. According to Virchow, Ranvier, and others, elastic f's are not developed directly from cells, but by a deposition in the ground substance. [J, 30, 31, 83.]—**Homogeneous f.** A f. having a uniform structure throughout, as in the skeletal frame-work of some sponges. ["Proc. of the Zool. Soc.," 1867, p. 509 (J).]—**Horny f's.** Ger., *Hornfasern*. F's or filaments composed of horny substance, as in horny sponges on the opercula of molluscs, etc. ["Proc. of the Zool. Soc.," 1850, p. 50 (J).]—**In-coming f's.** See *Afferent* NERVE-F's.—**Inhibitory f's.** Fr., *f's arrestatrices*. Ger., *hemmende Fasern*. Nerve-f's which convey inhibitory or depressor impulses (*e. g.*, to the vaso-motor or respiratory centre or to the heart). [J, 19, 28, 57.]—**Intercellular f's.** Fr., *f's intercellulaires*. Ger., *Intercellularfasern*. The f's between the cells (in connective and other tissues, composed of cells and f's). [Prudden (J, 55).]—**Intercolumnar f's.** Lat., *fibræ intercolumnares*. Slender bundles of cross f's on the surface of the aponeurosis of the external oblique muscle of the abdomen, which bind the pillars of the external abdominal ring together.—**Internal arcuate f's.** See *Fibræ arcuatæ internæ* and *Arciform f's*.—**Intracellular f's.** Ger., *Wurzelfasern*, *Wimperwurzeln*. Syn.: *rootlets of cilia*. Doubly refracting f's traversing the body of a ciliated cell, and connected through intermediate portions with the cilia. They unite toward the attached end to form the originating f. [Engelmann, Pflüger's "Arch. f. Physiol.," 1880, p. 505 (J).]—**Intrinsic f's of the uterus.** Fr., *f's intrinsèques*. The muscular structure of the uterus proper, as distinguished from the extrinsic f's.—**Involuntary muscular f's.** See *Muscular f.*-CELLS.—**Keratose f.** A f. composed largely of a horny matrix, as in the skeletal frame-work of sponges. ["Proc. of the Zool. Soc.," 1874, p. 302 (J).]—**Kleinenberg's f's.** Delicate processes of the inner ends of the cells of the ectoderm of *Hydra*; regarded as either neuro-muscular or simply nervous in function. [L, 11.]—**Lamellar f's, Laminar f's.** Fr., *f's lamineuses*. The f's of white fibrous tissue. [J, 33, 174.]—**Lens-f's.** Lat., *fibræ lentis*. Fr., *f's cristallines*. Ger., *Linsenfasern*. Syn.: *crystalline f's*. The greatly elongated, band-like f's making up the major part of the crystalline lens of the eye. They are mostly hexagonal in section, and originate from the columnar cells forming the back or ental part of the embryonic lens-follicle or vesicle; the cells at the front or ectal part retain their cellular character, but become somewhat flattened, and are often spoken of as the epithelium of the lens-capsule. At the point of transition these cells gradually merge into the lens-f's, which at the surface of the lens are mostly nucleated and have smooth edges, while the deeper f's are mostly devoid of a nucleus, and have dentated or serrated edges which join neighboring f's. [J, 23, 30, 69, 83.]—**Libriform f.** See *Libriform* CELL.—**Longitudinal f's of the cerebrum.** Those groups of association f's in the brain which have an antero-posterior direction. [I, 15; K.]—**Looped f's.** F's forming a loop, such as the muscular f's or fascicles of the heart passing over the entire auricle and becoming attached by both extremities to the auriculo-ventricular rings. [J, 30.]—**Medullary f's.** Fr., *f's médullaires*. Of De Candolle, circular f's disposed in the medulla of plants upon the exterior of the central canal (*e. g.*, in the genus *Ferula*). [B, 1 (a, 24).]—**Medullated nerve-f's.** See under NERVE-F.—**Motor f.** See *Motor* NERVE-F.—**Müller's f's.** Finely striated f's whose bases form the internal limiting membrane of the retina, and which pass vertically to the external limiting membrane, and give off numerous small branches which by their anastomosis form a matrix for the retinal elements. [L, 351.]—**Muscle f., Muscular f.** Lat., *fibra muscularis* (*primaria*). Fr., *f. musculaire*. Ger., *Muskelfiber*, *muskulöse Fiber*, *Muskelfaser*, *Muskelfaden*. Any elongated anatomical element composed of muscular substance. [J.] See *Voluntary muscular f.* and *Muscular f.*-CELL.—**Muscular f.-cells** [Kölliker], **Muscular f's of organic life.** See *Muscular f.*-CELLS.—**Nerve-f.** See the major list.—**Neuroglia f's.** Ger., *Neurogliafasern*. F's of the supporting tissue of the central nervous system. [J, 31, 55.] See NEUROGLIA.—**Neuromuscular f's.** Ger., *Neuromuskelfasern*. See *Muscle*-EPITHELIUM.—**Non-striated (or -striped) muscular f.** See *Muscular f.*-CELL.—**Nuclear f's, Nucleated f's, Nucleoplasmic f's.** See *Nuclear* FIBRILS.—**Nucleus f's.** Ger., *Kernfasern*. F's of connective tissue supposed to be formed by the elongation and fibrillation of nuclei. [J, 70, 143.]—**Organic muscular f.** See *Muscular f.*-CELL.—**Origin f's.** Ger., *Ursprungsfasern*. Of Daae, the minute branches of a nerve-f. joining a spinal ganglion, all within the capsule of the cell. ["Arch. f. Mikr. u. Anat.," xxxi, p. 223; "Jour. of the Roy. Micr. Soc.," 1888, p. 556 (J).]—**Originating f.** Ger., *Stammfaser*. Syn.: *trunk-f*. A structure formed by the union of the intracellular fibrils of a ciliated cell; it extends toward the attached end of the cell. [Engelmann, "Arch. d. Physiol.," 1880, p. 505 (J).]—**Osteo-**

genic f's. Fr., *f's arciformes.* The soft, pliant bundles of fibrils which form the termination of the growing osseous rays in developing periosteal bone. With the advance of ossification they and the ground-substance connecting them become calcified. [J, 30, 31.]—**Out-going f's.** See *Efferent* NERVE-F'S.—**Parietal f.** A f. in the wall or side of an organ or structure. ["Proc. of the Zool. Soc.," 1811, p. 5 (J).]—**Peduncular f's of the cerebrum.** Those f's which connect the cerebrum with the medulla oblongata and pons Varolii. [I, 15; K.]—**Penniform f's.** F's arranged in a penniform manner (said especially of the f's of a penniform muscle). [J.]—**Perforating f's.** See *Sharpey's f's.*—**Perivascular f's.** Fr., *f's périvasculaires.* Ger., *perivasculare Fasern.* F's surrounding a blood-vessel, but not forming a part of it (*e. g.*, the network of neuroglia f's surrounding the blood-vessels in the central nervous system). [J. 31.]—**Pressor f's.** Ger., *pressorische Fasern.* Syn.: *excito-vaso-motor f's.* F's of a pressor nerve (*i. e.*, nerve-f's conveying impulses to the vaso-motor centre which increase its activity). [J, 19, 57.]—**Primary chromatic** (or **chromatin**) **f's, Primary** (**nuclear**) **f's.** Ger., *Hauptfäden.* The larger and more persistent chromatin fibrils in the nucleus. ["Arch. f. Mikr. Anat.," xxxii, p. 26; "Quart. Jour. of Micr. Sci.," xxx, p. 164 (J).]—**Primitive f.** One of the anatomical elements of a tissue composed of f's, such as a muscular f. [J.]—**Psalterial f's** [Owen]. Those f's "which connect the posterior genu of the corpus callosum with the tænia hippocampi." [I, 14; K.] Cf. LYRA.—**Psycho-motor f's.** See *Cortico-muscular f's.*—**Pulmonary f's.** Ger., *Lungenfasern.* Nerve-f's, especially from the vagus supplying the lungs. [J, 57.]—**Radial f's, Radiating f's.** Ger., *Radiärfasern.* F's arranged in the form of radii. [J.]—**Recurrent f.** Fr., *f. récurrente.* Ger., *zurücklaufende Faser.* A nerve-f. arising from a ganglion, and joining a nerve of a character opposite to its own (*e. g.*, the fourth cranial nerve, which is purely motor, but receives recurrent or sensory twigs from the fifth cranial nerve). [K.]—**Reticulate f., Reticulation f.** A f. or fascicle forming, with others, a reticulation or network; one of the f's of a network. ["Proc. of the Zool. Soc.," 1841, p. 4 (J).]—**Secondary chromatic** (or **chromatin, or nuclear**) **f's.** Ger., *Nebenfäden.* The smaller anastomosing chromatin fibrils in a nucleus. They connect the primary nuclear f's by a kind of network. ["Arch. f. mikr. Anat.," xxxii, p. 26; "Quart. Jour. of Micr. Sci.," xxx, p. 164 (J).]—**Secondary f's.** F's of secondary importance or size in a fibrous structure. ["Proc. of the Zool. Soc.," 1867, p. 508 (J).]—**Secretory f's.** Fr., *f's sécrétoires.* Those f's of the sympathetic nerve which enter glands, and are supposed to influence their secretion. [K, 31.]—**Semicircular f's of the cerebellum.** Lat., *fibræ semicirculares cerebelli.* A semicircular layer of fibres, 2 to 3 mm. thick, between the upper border of the nucleus cerebelli and the outer branches of the arbor medullaris. They form a part of the anterior peduncles, and become mingled with intranuclear f's which come from within the nuclei cerebelli. [L, 332 (α, 29).]—**Sharpey's f's.** Fr., *f's perforantes* (ou *de Sharpey*). Ger., *durchbohrende* (oder *Sharpey'sche*) *Fasern.* Syn.: *perforating f's.* Bundles of connective-tissue f's in bone, either branched or simple, agreeing in character with bundles of white fibrous tissue, and serving to bind the various lamellæ together. They originate either at the surface or in the substance of the bone, perforate a variable number of lamellæ obliquely or at right angles, and finally taper to a point. They are usually calcified, but may remain uncalcified, or may consist of elastic tissue. They were described by Sharpey in 1856, and, according to Heitzmann, by Troja in 1814. [J, 26.]—**Silicious f's.** Ger., *Kieselfasern.* The f.-like spicules in the skeletal frame-work, as in sponges. [J, 11.]—**Skeleton-f's.** The f's in a skeletal frame-work, as in sponges. [J.]—**Smooth muscular f.** See *Muscular f.*-CELL.—**Soft f's.** See *Non-medullated* NERVE-F'S.—**Spiculo-f's.** The f's mixed with spicules making up the skeletal frame-work of some sponges. ["Proc. of the Zool. Soc.," 1887, p. 524 (J).]—**Spindle f's.** See *Achromatic* FIBRILS.—**Spiral f.** Fr., *f. spirale, f. annulaire.* Ger., *Spiralfiber, Spiralfaser, Schraubenfaser, Schraubenfaden.* 1. The comparatively small or thin f. or process of nervous substance arising in the substance of a sympathetic ganglion cell, and winding spirally around the thicker straight process for a considerable distance. On leaving the latter, it becomes ensheathed with myelin, and is continued as a medullated nerve, while the straight process is continued as a non-medullated nerve. By Rawitz the appearance presented by a spiral f. is attributed to an optical phenomenon arising from a folding of the sheath. It was first found by Beale (1865) in the sympathetic ganglia of the frog, and has since been found in the sympathetic ganglia of mammals. 2. The annular or spiral constriction sometimes seen in bundles of connective tissue, especially after subjection to the action of acetic acid, or in cases of œdema; thought to be caused by an elastic f. that surrounds the bundle. [J, 30, 31, 32; "Arch. f. mikr. Anat.," 1880, p. 297 (J).]—**Straight f.** Fr., *f. droite.* Ger., *gerade Faser.* The large, straight f. of a spiral f. nerve-cell around which the small or spiral f. is wound. [J, 2, 35.]—**Striated** (or **striped**) **muscular f.** See *Voluntary muscular f.*—**Sympathetic f's.** Fr., *f's sympathiques.* Ger., *Sympathicusfasern.* F's of the sympathetic nerve. [J, 19.]—**Terminal f's.** Ger., *Terminalfasern.* F's at their termination, especially naked axis-cylinders at their termination in a nerve end-organ. [J, 67.]—**Textile f.** Fr., *f. textile.* Any f. or fibrous substance capable of being spun, woven, or felted. [B, 77 (α, 24).]—**Trophic nerve-f's.** See *Trophic* NERVE-F'S.—**Trunk f.** See *Originating f.*—**Ultimate f.** See *Primitive f.*—**Unstriated** (or **unstriped**) **muscular f.** See *Muscular f.*-CELL.—**Vagus f's.** Ger., *Vagusfasern.* F's of the vagus nerve. [J.]—**Vaso-constrictor f's.** Fr., *f's vaso-constrictrices* (ou *contractrices*). Ger., *constrictorische* (oder *vaso-constrictorische*, oder *gefässverengende*) *Fasern.* F's of a vaso-constrictor nerve conveying impulses that produce a constriction or narrowing of some part of the vascular channel. Cf. *Vaso-dilator f's.*—**Vaso-dilator f's.** Fr., *f's vaso-dilatrices.* Ger., *dilatirende Fasern, vaso-dilatorische Fasern.* Nerve-f's of a vaso-dilator nerve conveying impulses which produce dilatation or widening of some part of the vascular channel. [J, 19, 52, 57.]—**Vaso-motor f's.** Fr., *f's vaso-motrices.* Ger., *vaso-motorische Fasern.* The f's of a vaso-motor nerve conveying impulses from a vaso-motor centre to the blood-vessels and causing either constriction with consequent narrowing, or dilatation with consequent widening of the vascular channel. With many German writers the expression is synonymous with vaso-constrictor f's. [J, 19, 28, 52, 57, 106.]—**Voluntary muscular f.** A cylindrical, striated anatomical element, forming the contractile substance of voluntary or striated muscular tissue. The f's vary in diameter from 10 to 80 μ, and often attain a length of 3·5 mm. In vertebrates they rarely branch or anastomose except in the tongue, but in invertebrates they often branch and anastomose (see also *Cardiac muscular f.*-CELL). Each f. is composed of a continuous sheath (sarcolemma) apparently of elastic tissue, inclosing the soft contractile substance proper. There are also present the so-called muscle-nuclei or muscle-corpuscles, which in mammalian muscle are situated on the inner surface of the sarcolemma, but in other animals are scattered throughout the contractile substance. The structure of the proper contractile substance is still unsettled, but since the time of Bowman ["Phila. Trans.," 1840] it has been taught that it is made up of minute quadrangular particles (sarcous elements) united at their ends and sides by a clear cementing substance. Under some conditions the sarcous elements adhere more firmly by their ends than by their sides; then the f. may be separated into longitudinal fibrillæ; under other conditions they seem to adhere more firmly by their sides, when the muscle may be broken into transverse discs (see *Bowman's* DISCS). [J, 24, 30, 31, 32, 34.]—**White f's of connective tissue.** Exceedingly fine, transparent, and apparently homogeneous filaments which run in small waves or bundles through connective tissue. They never divide or anastomose. [C.]—**Woody f's.** Fr., *f's ligneuses.* Wood or libriform tissue, the libriform cells constituting in plants the portion between the pith and bark. [B, 1, 229, 291 (α, 24).] See *Wood*-CELLS and *Libriform* CELLS.—**Yellow elastic f.** One of the f's of yellow or elastic tissue. [J.]

FIBREUX (Fr.), adj. Fe-bru^5. See FIBROUS.

FIBRIFORM, adj. Fi^{2}b'ri^2-fo^{2}rm. From *fibra*, a fibre, and *forma*, shape. Fibre-shaped. [A, 66.]

FIBRIFICATION (Fr.), n. Fe-bre-fe-ka^3-se-o^{2}n^2. The formation of fibres, the process of becoming a fibril. [A, 385.]

FIBRIL, n. Fi'bri^{2}l. Lat., *fibrilla* (dim. of *fibra*, a fibre). Fr., *fibrille.* Ger., *Fibrille, Fäserchen, Primitivfibrille.* It., *fibrilla.* One of the ultimate, fibre-like divisions composing a fibre or bundle; also any very minute fibre. [α, 17.]—**Achromatic f's.** Fr., *fibrilles de noyaux, fils achromatiques* (ou *connectifs*), *filaments bipolaires* (ou *intranucléaires*). Ger., *Cytoplasma'* (oder *Kernspindel'*, oder *Spindel'*) *fasern, achromatische* (oder *blasse*, oder *intranucleäre*) *Fäden, Zellfäden.* Syn.: *cell-threads, interstellate lines.* F's of achromatic, nuclear, or cell-substance, forming lines which extend from pole to pole in a dividing nucleus, in such a way as to form a spindle-shaped or barrel-shaped figure. The latter incloses partly or wholly the chromatic nuclear f's which are separating to form the daughter-nuclei. In the diaster stage these achromatic f's form a kind of bridge between the daughter-nuclei. It has been suggested that the achromatic f's serve as lines along which the chromatic f's travel, and that the poles or ends of the achromatic f's represent the position of the fully developed daughter-nuclei. [Flemming and Strasburger, "Arch. f. mik. Anat.," 1878-1884 (J, 30).]—**Chromatic f's, Chromatin f's.** See *Nuclear f's.*—**Connective-tissue f's.** Fr., *fibrilles du tissu conjonctif.* Ger., *Bindegewebsfibrillen.* F's which, being collected in bundles, form the fibres or fasciculi of white fibrous connective tissue. [J, 55, 83.]—**Elementary f's.** See *Primitive f's.*—**Intermuscular f's.** Small branches of the intermediate plexus of nerve-fibres in unstriped muscular tissue which run between the muscle cells. [L, 351.]—**Intracellular f's.** The delicate, thread-like masses composing the more solid part of the protoplasm of the cell-body. [J, 26, 32.]—**Intranuclear f.** See *Nuclear fibril.*—**Moniliform f.** See *Varicose* NERVE-FIBRIL.—**Nuclear f's, Nucleoplasmic f's.** Fr., *boyaux* (ou *filaments*) *nucléiniens, reseaux nucléine, reticulum nucléaire* (ou *de chromatine*), *fibrilles nucléaires.* Ger., *intranucleäres Gerüst* (oder *Netz*), *Kern-Fäden* (*-Fasern, -Gerüst*, oder *-Netz*). The thread-like fibres consisting of the more solid substance or chromatin in a cell-nucleus. According to some authors, they are all connected so that in reality there is but one long complexly coiled filament. According to others, there are many closely intertwined f's forming a network. There seems to be reason for believing also that the nuclear f's are of two kinds: coarse f's, forming a comparatively wide mesh-work, and very fine f's, forming an exceedingly fine network in the meshes of the coarse network. To distinguish these two forms of nuclear network the term primary nuclear f's is sometimes restricted to the coarse, and secondary nuclear f's to the fine network. [J, 15, 30; "Arch. f. mikr. Anat.," 1878-1884; "Jena. Zeit.," 1884 (J).] Cf. CARYOCINESIS, *Primary* FIBRES, and *Secondary chromatic* FIBRES.—**Primitive f's** [Rüdinger]. Lat., *axis-fibrillæ.* Fr., *fibrilles primitives* (ou *élémentaires*, ou *nerveuses*). Ger., *Axenfibrillen, Primitivfibrillen.* 1. The ultimate or elementary f's of which the axis-cylinder is composed. [J, 26, 30, 31, 35.] 2. Of the older anatomists, an expression frequently employed for that which is now only designated as a fibre. ["Anat. u. Phys.," 1849, p. 260 (J).]—**Protoplasmic f.** A f. or thread of protoplasm. [J.]—**Ultimate f's.** See *Primitive f's.*

FIBRILE, adj. Fi'bri^{2}l. See FIBRILLAR.

FIBRILLA (Lat.), n. f. Fi(fe)-bri^{2}l'la^3. See FIBRIL.—**Axis** (or **elementary**) **fibrillæ.** See *Primitive* FIBRILS.—**Fibrillæ adamantinæ.** See *Enamel* FIBRES.—**Fibrillæ elasticæ.** Fibrils of elastic tissue. [J.]—**Fibrillæ musculares.** The fibrils composing a muscular fibre. [J.]—**Fibrillæ tendineæ.** The connective-tissue fibrils forming the fibres or bundles of a tendon. [J.]—**Gela-**

tiniferous fibrillæ. Connective-tissue fibrils which are changed to gelatin on boiling. [J, 19.]—**Primitive fibrillæ** [Schultze]. See *Primitive* FIBRILS.—**Ultimate fibrillæ.** See *Primitive* FIBRILS.

FIBRILLAR, adj. Fi'bri^{2}l-a^{3}r. Lat., *fibrillaris.* Fr., *fibrillaire.* Ger., *fibrillär.* Pertaining to or consisting of fibrils.

FIBRILLARIA (Lat.), n. n. pl. Fi(fi^2)-bri^{2}l-la(la^3)'ri^2-a^3. From *fibrilla*, a fibril. Of Persoon, the mycelia of various *Fungi.* [B, 121 (*a*, 24).]

FIBRILLARY, adj. Fi'bri^{2}l-a-ri^2. See FIBRILLAR.

FIBRILLATED, adj. Fi'bri^{2}l-at-e^{2}d. See FIBROUS and FIBRILLOUS.

FIBRILLATION, n. Fi-bri^{2}l-a'shu^{3}n. Lat., *fibrillatio* (from *fibrilla*, a fibril). Fr., *f.* Ger., *Faserung.* 1. The formation of, or the division into, fibres or fibrillæ. 2. The tendency of the so-called periplastic substance to break up into certain definite lines. [Huxley (J).]—**Muscular f.** See FIBRO-MYITIS.

FIBRILLE (Fr., Ger.), n. Fe-brel-y', -brel'le^2. See FIBRIL.—**Axenf'n** (Ger.). See *Primitive* FIBRILS.—**Bindegewebef'n** (Ger.), **Bindegewebsf'n** (Ger.). See *Connective-tissue* FIBRILS.—**Chromatische F'n** (Ger.). See *Nuclear* FIBRILS.—**Elementarf'n** (Ger.). See *Primitive* FIBRILS.—**F'nbalken** (Ger.). Bundles of fibre fibrils in the form of trabeculæ, as in the arachnoidea spinalis. [J, 66.]—**F'band** (Ger.), **F'nbündel** (Ger.). A bundle of f's; a muscle-column. [J, 175.] See FASCICULUS.—**F'ncylinder** (Ger.). A bundle of fibres or fibrils. [J.]—**F's du tissu conjonctif** (Fr.). See *Connective-tissue* FIBRILS.—**F'nhäutchen** (Ger.). See *Fibril*-SHEATH.—**F's nerveuses** (Fr.). See *Primitive* FIBRILS.—**F'nscheide** (Ger.). See *Fibril*-SHEATH.—**Haarf'n** (Ger.). See *Hair*-FIBRES.—**Hornf'n** (Ger.). Fine, horny fibrils differentiated in the cortical cells of hair. [Waldeyer (J, 140).]—**Knötchenf'n** (Ger.). See *Non-medullated* NERVE-FIBRES.—**Muskelnervenf'n** (Ger.). The fibres or fibrillæ of a nerve innervating a muscle. [J.]—**Primitivf'n** (Ger.). See *Primitive* FIBRILS.—**Stammf'** (Ger.). A nerve-fibre or fibril which gives off branches. [J.]—**Zellstofff'n** (Ger.). See *Connective-tissue* FIBRILS.

FIBRILLÉ (Fr.), adj. Fe-brel-ya. See FIBRILLATED.

FIBRILLEUX (Fr.), adj. Fe-brel-yu^5. See FIBROUS and FIBRILLOUS.

FIBRILLITIUM (Lat.), n. n. Fi(fi^2)-bri^{2}l-i^{2}sh(i^{2}t)'i^2-u^{3}m(u^{4}m). From *fibrilla*, a fibril. Of von Mohl, the filaments formed in palms by the splitting up of the foliaceous petioles. [B, 121 (*a*, 24).]

FIBRILLOSE, FIBRILLOUS, adj's. Fi'bri^{2}l-os, -u^{3}s. Lat., *fibrillosus* (from *fibrilla*). Fr., *fibrillaire, fibrillé, fibrilleux.* Pertaining to, composed of, or furnished with fibrils. [J.]

FIBRIN, n. Fi'bri^{2}n. Lat., *fibrinum, fibrina, fibra sanguinis, materia fibrosa, lympha plastica.* Fr., *fibrine, matière fibreuse du sang.* Ger., *F., Faserstoff.* It., Sp., *fibrina.* A body obtainable from several of the natural fluids of the system and in inflammatory exudations by the process of coagulation. It is filamentous in character, is insoluble in water, and may be best obtained from the blood by whipping that fluid with a bundle of twigs. [K.]—**F.-factor.** A term for substances in the blood supposed to yield f. by coagulation. [K.] See FIBRINOGEN and FIBRINOPLASTIN.—**F'schwarte** (Ger.). F. layer. [*a*, 34.]—**Plate-f.** Of Löwit, a form of f. produced by the transformation of blood-plates. ["N. Y. Med. Jour.," Aug. 4, 1888, p. 126.]—**Vegetable f.** See GLUTEN.

FIBRINE (Fr.), n. Fe-bren. See FIBRIN.—**F. concrète globutine.** Of Denis, a variety of fibrin obtained by pressing out the coagulum from blood which has clotted spontaneously. It swells up in a ten-per-cent. solution of common salt. According to Hammarsten, an impure variety of fibrin. [B.]—**F. concrète modifiée.** Of Denis, a modification of fibrin obtained from arterial blood, coagulated by heating. According to Hammarsten, an impure variety of fibrin. [B.]—**F. concrète pure.** Of Denis, fibrin obtained with special precautions from venous blood. It is pure fibrin.

FIBRINOGEN, n. Fi-bri^{2}n'o-je^{2}n. From *fibrin*, and γεννᾶν, to produce. Fr., *fibrinogène.* Ger., *F.* A proteid substance, first described by Schmidt (Pflüger's "Archiv," vi, p. 413 [1872]), existing in blood-serum and serous transudations, and by its union with parglobulin, under the influence of the fibrin ferment, forming fibrin. Wooldridge ("Proc. of the Roy. Soc.," April 6, 1886) describes four varieties of f.: *A-f.*, a proteid-lecithin compound, separable under the form of rounded granules from the blood-plasma by cooling; *B-f.*, a proteid-lecithin compound forming the bulk of the f. of the blood and coagulable by the addition of lecithin or of leucocytes from the lymphatic glands; *C-f.*, the f. of Schmidt, which is the only variety coagulable by the fibrin-f., but which exists in the blood in very minute quantities; a variety found in the lymph-serum of the lymphatic glands, closely related to *A-f.*, and differing from it in having the power of causing coagulation of the blood while in the vessels. According to Wooldridge, coagulation is a physical process allied to crystallization, consisting essentially in a loss of lecithin by *A-f* to *B-f.*, which is thus converted into fibrin. [B; K.]

FIBRINOGENIC, FIBRINOGENOUS, FIBRINOPLASTIC, adj's. Fi-bri^{2}n-o-je^{2}n-i^{2}k, -o^{2}j'e^{2}n-u^{3}s, -pla^{2}st'i^{2}k. See FIBRINOGENOUS.

FIBRINO-PLASTIN, n. Fi-bri^{2}n-o-pla^{2}st'i^{2}n. See PARAGLOBULIN.

FIBRINOUS, adj. Fi'bri^{2}n-u^{3}s. Lat., *fibrinosus* (from *fibra*, a fibre). Fr., *fibrineux.* Ger., *fibrinös.* Of or pertaining to fibrin.

FIBRINURIA (Lat.), n. f. Fl(fl^2)-bri^{2}n-u^2(u)'ri^2-a^3. From *fibra*, a fibre, and οὖρον, urine. Ger., *Fibrinurie.* Chyluria in which the urine coagulates spontaneously. [Baumüller, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," xxxii, 1880, p. 261 to 268 (*a*, 33).]

FIBRO-AREOLAR, adj. Fi''bro-a^{2}r-e'o-la^{3}r. Lat., *fibro-areolaris* (from *fibra*, a fibre, and *areola*, a small open space), *fibro-cellularis.* Fr., *fibrocellulaire.* Pertaining to a tissue composed of white fibrous and areolar tissue. [J, 43.]

FIBROBLAST, n. Fi'bro-bla^{2}st. From *fibra*, a fibre, and βλαστός, a germ. A cell or corpuscle giving rise to connective tissue. [J, 109, 129.]

FIBROBLASTIC, adj. Fi-bro-bla^{2}st'i^{2}k. Pertaining to or developed from fibroblasts. [J, 109, 129.]

FIBRO-BRONCHITIS (Lat.), n. f. Fi(fi^2)''bro(bro^3)-bro^{2}n^{2}k-(bro^{2}n^{2}ch^2)-i(e)'ti^{2}s. Gen., *-it'idos* (*-is*). Fr., *bronchite fibrineuse.* See *Croupous* BRONCHITIS.

FIBRO-CALCAREOUS, adj. Fi''bro-ka^{2}l-ka're^2-u^{3}s. From *fibra*, a fibre, and *calx*, lime. Fibrous and having undergone calcareous degeneration (said of tumors). [Paget (*a*, 34).]

FIBRO-CARCINOMA (Lat.), n. n. Fi(fi^2)''bro(bro^3)-ka^{3}r-si^{2}n-(ki^{2}n)-o'ma^3. Gen., *-om'atos* (*-is*). Fr., *fibrocarcinome.* A carcinoma in which the trabeculæ are thick and resistant, with more or less granular degeneration of the cells in the trabeculæ. [*a*, 34.]—**F.-c. cysticum.** A f.-c. (scirrhus) with inclosed cysts. [*a*, 34.]

FIBRO-CARTILAGE, n. Fi''bro-ka^{3}rt'i^{2}l-aj. Lat., *fibro-cartilago.* Fr., *f.-c., cartilage fibreux.* Ger., *Faserknorpel, Fibro-Knorpel.* It., *cartilagine fibrosa.* Sp., *fibro-cartilago.* Cartilage in which the matrix or intercellular substance contains a greater or less number of fibres of elastic or white fibrous connective tissue. [J.] See *Elastic* CARTILAGE and *White f.-c.*—**Acromio-clavicular f.-c.** Fr., *f.-c. acromio-claviculaire.* See CARTILAGE *of Weitbrecht.*—**Basilar f.-c.** A f.-c. which occupies the larger part of the foramen lacerum medium. [L, 332 (*a*, 29).]—**Central f.-c. of the heart.** A f.-c. found in the heart in certain animals, situated in the angle between the aortic and the two auriculo-ventricular openings. From it processes pass in various directions to form the basis of the fibrous or tendinous rings of the cardiac orifices. [L, 142 (*a*, 29).]—**Circumferential f.-c's.** F.-c's which surround the margins of certain of the articular cavities. [L, 172.]—**Connecting f.-c.** A f.-c. interposed between osseous surfaces where there is but little motion (*e. g.*, the interpubic f.-c.). [L, 172.]—**External semilunar f.-c.** Lat., *meniscus lateralis.* See *Semilunar f.-c's.*—**Falciform f.-c's.** See *Semilunar f.-c's.*—**F.-c's glénoïdiens des doigts** (Fr.). See *Glenoid* LIGAMENTS *of Cruveilhier.*—**F.-c's of Wrisberg.** See *Cuneiform* CARTILAGES.—**F.-c's péri-articulaires** (Fr.). See *Circumferential f.-c's.*—**Interarticular f.-c's of the knee.** See *Semilunar f.-c's.*—**Interarticular f.-c. of the temporo-maxillary articulation.** A thin oval plate of f.-c. interposed between the condyle of the inferior maxilla and the glenoid cavity of the temporal bone. [L, 142, 172.]—**Intercoccygean f.-c's.** Ring-like f.-c's between the segments of the coccyx. [L, 31, 172.]—**Intermediary f.-c., Intermediate f.-c.** A f.-c. situated between the radius and ulna at the carpal end, binding them firmly together. [L, 115 (*a*, 29).]—**Internal semilunar f.-c.** Lat., *meniscus medialis.* See under *Semilunar f.-c's.*—**Interosseous f.-c.** See *Connecting f.-c.*—**Interpubic f.-c.** A layer of f.-c. or cartilage attached to the surface of each pubic bone, and united by a layer of fibrous tissue and f.-c. At the upper and back part of the intermediate layer is a fissure in the median line which is larger in the female than in the male. [L, 31, 142, 172.]—**Intervertebral f.-c's.** See *Intervertebral* CARTILAGES.—**Marginal f.-c.** See *Circumferential f.-c.*—**Navicular f.-c.** A fibro-cartilaginous structure connected with the inferior calcaneo-scaphoid ligament, over which the tendon of the tibialis posticus glides. [L, 332.]—**Pubic f.-c.** See *Interpubic f.-c.*—**Radio-ulnar f.-c.** Lat., *fibrocartilago* (*intermedia*) *triangularis.* A triangular f.-c. attached by its apex at the base of the styloid process of the ulna, by its base to the edge of the radius, its upper surface resting on the head of the ulna, and its lower on the cuneiform bone. [L, 31, 142, 172, 332.]—**Sacro-coccygean f.-c.** A f.-c. interposed between the contiguous surfaces of the sacrum and coccyx. It is thinner than the other intervertebral f.-c's, and its central part is firmer in texture. [L, 172 (*a*, 29).]—**Scapulo-clavicular f.-c.** See CARTILAGE *of Weitbrecht.*—**Semilunar f.-c's.** Lat., *fibrocartilagines semilunares menisci.* Two crescent-shaped interarticular f.-c's interposed between the head of the tibia and the condyles of the femur. Their convex outer borders are thick, while the concave inner borders are thin. Each covers about the outer two thirds of the surface on either side of the spine of the tibia, and is invested on both surfaces by a synovial membrane. They are attached by their convex margins to the head of the tibia. Their upper surfaces are concave, the lower being flat. Their circumferences are continuous with the capsular ligament of the joint. They are termed internal and external according to their situation. [L, 31, 142, 172.]—**Sesamoid f.-c's.** See *Sesamoid* CARTILAGES.—**Sterno-clavicular f.-c.** Lat., *fibrocartilago sterno-clavicularis.* A flat disc of f.-c. between the sternum and the clavicle. [L. 172, 332.]—**Stratiform f.-c's.** F.-c's lining the grooves in bones in which the tendons of some muscles play. [L, 172.]—**Tarsal f.-c's.** See *Tarsal* CARTILAGES.—**Triangular (Interarticular) f.-c.** See *Radio-ulnar f.-c.*—**White f.-c.** Ger., *Bindegewebeknorpel, faseriger Knorpel.* It., *cartilagine connettiva.* Cartilage in which the matrix or intercellular substance is composed largely of white fibrous tissue arranged mostly in bundles of parallel fibres. The hyaline chondrogenous substance is relatively small in amount and directly surrounds the cells. This form of cartilage is found between the vertebræ and in amphiarthrodial joints generally. It yields both chondrin and gelatin upon boiling. [J, 24, 30, 31, 35.]—**Yellow f.-c.** The variety that constitutes the cartilaginous structure of the ear, the epiglottis, etc., being of a yellow color and very elastic, and having its intercellular substance made up of long, interlacing, wavy fibres. [A, 70.]

FIBRO-CARTILAGINOUS, adj. Fi'bro-ka^{3}rt-l^{2}l-a^{2}j'i^{2}n-u^{3}s. Fr., *fibro-cartilagineux.* Ger., *faserknorpelig.* Pertaining to, consisting of, or containing fibro-cartilage.

FIBROCARTILAGO (Lat.), n. Fi(fl^2)''bro^3-ka^{3}rt-i^{2}l-a(a^3)'go. Gen., *-la'ginis.* See FIBRO-CARTILAGE.—**F. basilaris.** The fibro-cartilage which fills in the foramen lacerum anterius. [L, 332.]—**Fibrocartilagines falcatæ** (seu **falciformes**). See *Semilunar* FIBRO-CARTILAGES.—**F. intermedia triangularis (carpi).** See *Radio-ulnar* FIBRO-CARTILAGE.—**Fibrocartilagines lunatæ.** See *Semilunar* FIBRO-CARTILAGES.—**F. navicularis.** See *Navicular* FIBRO-CARTILAGE.

FIBRO-CELLULAR, adj. Fi''bro-se^{2}l'u^{2}l-a^{3}r. Lat., *fibro-cellularis* (from *fibra*, a fibre, and *cellula*, a little cell). 1. See FIBRO-AREOLAR. 2. Of a tissue, composed in part of fibres and in part of cells. [J, 124.]

FIBRO-CELLULE (Fr.), n. pl. Fe-bro-se^{2}l-u^{6}l. See *Muscular fibre*-CELL.

FIBRO-CHONDRITIS (Lat.), n. f. Fi(fl^2)''bro(bro^3)-ko^{2}nd-(ch^{3}o^{2}nd)'ri(re)'ti^{2}s. Gen., *-ri'tidos* (-*is*). From *fibra*, a fibre, and χόνδρος, cartilage. Fr., *fibro-chondrite.* Inflammation of fibro-cartilage. [E, 24.]

FIBRO-CHONDROSTEAL, adj. Fi''bro-ko^{2}nd-ro^{2}st'e^2-a^{2}l. From *fibra*, a fibre, χόνδρος, cartilage, and ὀστέον, a bone. Of a mixture of fibrous tissue, cartilage, and bone. [J.]

FIBRO-CONNECTIVE, adj. Fi''bro-ko^{2}n-e^{2}k'ti^{2}v. Connecting and of fibrous structure. [J, 180.]

FIBRO-CYST, n. Fi'bro-si^{2}st. From *fibra*, a fibre, and κύστις, a cyst. Fr., *fibro-cyste.* Syn.: *mucoid fibroma.* A fibrous tumor that has undergone cystic degeneration, or one in which fluid has accumulated in the connective-tissue interspaces. [Paget (*a*, 34).]

FIBRO-CYSTIC, adj. Fi-bro-si^{2}st'i^{2}k. Fr., *fibro-cystique* (ou *kystique*). 1. Fibrous, and having undergone cystic degeneration. 2. Consisting of fibro-cysts. [Paget, Cornil and Ranvier (*a*, 34).]

FIBRO-CYSTOID, adj. Fi''bro-si^{2}st'oid. Having the formation of a fibro-cyst. [*a*, 34.]

FIBRO-ELASTIC, adj. Fi-bro-e-la^{2}s'ti^{2}k. Fr., *fibro-élastique.* Ger., *fibrös elastisch.* 1. Composed in part of white fibrous tissue and in part of elastic tissue. 2. Containing elastic fibres. [Prudden (J, 55, 123).]

FIBRO-ENCHONDROMA (Lat.), n. n. Fi(fi^2)''bro(bro^3)-e^{2}n^2-ko^{2}nd(ch^{2}o^{2}nd)-ro'ma^3. Gen., *-rom'atos* (*-is*). From *fibra*, a fibre, ἐν, in, and χόνδρος, cartilage. An enchondroma partially composed of strong and broad bands of fibrous tissue. [Wilkes, Moxon (*a*, 34).]

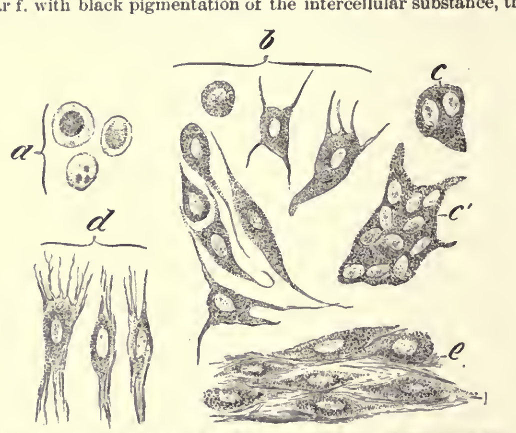
FIBRO-FATTY, n. Fi''bro-fa^{2}t'i^2. Composed of fibrous tissue and fat-corpuscles. [*a*, 34.]

FIBROGEN, n. Fi'bro-je^{2}n. See FIBRINOGEN.

FIBROGLIOMA (Lat.), n. n. Fi(fi^2)-bro(bro^3)-gli(gle)-o'ma^3. Fr., *fibro-gliôme.* Ger., *Fibrogliom.* A tumor of mixed form of fibroma and glioma. [*a*, 34.]

FIBROID, adj. Fi'broid. From *fibra*, a fibre. Fr., *fibroïde.* Resembling fibrous tissue; as a n., a tumor composed of fibrous tissue. [E.]—**Interstitial f.** A f. developing within the parietes of an organ. [*a*, 34.]—**Pedunculated f.** A f. attached by a pedicle. [*a*, 34.]—**Submucous f.** A f. developed beneath a mucous membrane. [*a*, 34.]

FIBROIN, n. Fi'bro-i^{2}n. Fr., *fibroïne.* Ger., *Fibroïn.* A nitrogenous substance, perhaps $C_{48}H_{78}N_{18}O_{17}$, which constitutes the essential principle of silk and of spider's-web. [B, 2, 93.]



FIBRO-KNORPEL (Ger.), n. Fe-bro-knorp'e^{2}l. See FIBRO-CARTILAGE.

FIBRO-LAMINAR, adj. Fi''bro-la^{2}m'i^2-na^{3}r. Lat., *fibro-laminaris* (from *fibra*, a fibre, and *lamina*, a thin piece of metal). Fr., *fibro-laminaire.* Fibrous and laminar. Pertaining to a fibrous lamina. [C, 3.]

FIBRO-LIPOMA. Fi(fi^2)''bro(bro^3)-li^{2}p-o'ma^3. Gen., *-om'atos.* A lipoma in which connective tissue is very abundant. [*a*, 34.]

FIBROM (Ger.), n. Fe-brom'. See FIBROMA.—**Hautf'.** Cutaneous f. formed by hyperplasia or degeneration of a sebaceous cyst. [*a*, 34.]—**Parosteales F.** F. developing from the periosteum. [*a*, 34.]—**Periglandulären F.** Hyperplasia of a sebaceous gland. [Klebs (*a*, 34).]—**Perisebaschisches F.** Fibro-calcareous degeneration of a sebaceous gland. [Klebs (*a*, 34).]—**Weiches F.** See FIBROMA *molluscum.*

FIBROMA (Lat.), n. n. Fi(fe)-bro'ma^3. Gen., *-ro'matos* (*-is*). From *fibra*, a fibre. Fr., *fibrome.* Ger., *Fibrom.* A generic term for fibrous tumors developed from proliferous connective-tissue cells. Hence they are found in the skin, nerves, fasciæ, periosteum, and glandular organs. Though multiple, they do not give rise to metastatic tumors. [Ziegler (*a*, 34).]—**Adult f.** Fr., *fibromes adultes.* Of Lancereaux, a tumor in which there is a complete development of ordinary connective tissue in the new formation. [*a*, 34.]—**Amorphous f.** A f. in which there is but moderate fibrillation. [*a*, 34.]—**Areolar f.** Fr., *fibrome mou.* See *F. molluscum.*—**Corneal f., Corneous f.** [Rindfleisch]. See *Lamellar f.*—**Cystic f.** A f. that has undergone cystic degeneration. [*a*, 34.]—**Diffuse f.** See ELEPHANTIASIS.—**Embryonal f.** Fr., *fibrome embryonnaire.* Ger., *Fibro-blastome.* A tumor composed of round or spindle-shaped cells, united by an intermediate substance. It was supposed to be due to an incomplete development of the embryonal globular into fusiform cells, and thence into connective-tissue fibres. [*a*, 34.]—**Fasciculated f.** Fr., *fibrome fasciculé.* A f. formed of bundles of intersecting connective tissue, with young connective-tissue cells in the interfascicular spaces. [Cornil and Ranvier (*a*, 34).]—**F. areolare.** See *F. molluscum.*—**F. congenitum.** See NÆVUS *verrucosus.*—**F. cutis.** F. of the skin. It may occur either as a hard or as a soft tumor, depending on the compactness of the fibrous structure. The soft variety is known as f. molluscum (*q. v.*). The hard variety may develop either from the connective-tissue layer of the skin or from the fibrous sheaths of muscles or of nerves (see NEUROMA *cutis*). It is of very slow growth, varies greatly in size, and usually occurs as a solitary tumor. [G.] Cf. KELOID.—**F. densum.** Fr., *fibrome dur.* Ger., *festes Fibrom.* A f. with dense fibrous structure like that of a tendon. [*a*, 34.]—**F. disseminatum.** See *F. molluscum.*—**F. dolorosum.** Of Dupuytren, fibro-neuroma. [*a*, 34.]—**F. endothelioideum.** Of Bozzolo, f. of the dura mater with cells resembling endothelial cells. [*a*, 34.]—**F. fungoides.** See GRANULOMA *fungoides.*—**F. keloides.** See KELOID.—**F. lipomatodes.** See XANTHOMA.—**F. molluscum** [Virchow]. Fr., *verrue charnue.* Ger., *weiches Fibrom.* A soft, flaccid, painless tumor of the skin, either sessile or pedunculated, consisting of a loose network of connective tissue containing more or less serous fluid in its meshes [Birch-Hirschfeld], and covered by epidermis of normal appearance. It is most commonly situated on the face, scalp, scrotum (or, in females, the labia pudendi), although the tumors may be disseminated over the whole cutaneous surface. The disease is often congenital. [G.]—**F. molluscum congenitum.** See NÆVUS *mollusciformis.*—**F. molluscum planum.** A variety of f. molluscum characterized by a flat elevation or thickening of the skin. [G.]—**F. ossificum.** Fr., *fibrome ossifié.* F. that has undergone calcareous degeneration. [*a*, 34.]—**F. papillare conjunctivæ.** Fr., *fibrome papillaire de la conjonctive.* Ger., *Bindehautpapillarfibrom.* A true conjunctival growth occurring almost always near the corneal margin and overlapping the cornea. These tumors are rare, are typical specimens of the papillary f., and are apt to recur when removed. [F.]—**F. periarticulare diffusum.** See *Fungous* ARTHRITIS.—**F. scleroticæ.** Fr., *fibrome de la sclérotique.* Ger., *Skleralfibrom.* A fibromatous tumor of the sclerotic proper, in which the normal fibrous structure of the latter is hypertrophied, sometimes enormously. [F.]—**F. sublinguale dei bambini** (It.). A disease of infants characterized by the formation of a globular, elongated, or membranous neoplasm under the point of the tongue. It is accompanied by adynamia, and followed by hydræmia, cachexia, and generally death. ["Gazz. deg. Ospit.," May 21, 1882, p. 326 (*a*, 34).]—**F. teleangeictaticum.** A highly vascular f. with wide and dilated blood-vessels. [*a*, 34.]—**Firm f.** See EPULIS and *F. sublinguale dei bambini.*—**Fuso-cellular embryonal f.** Fr., *fibrome fuso-cellulaire.* Of Lancereaux, a tumor composed of spindle cells united by an intermediate embryonal substance. The fibro-plastic tumor of Liebert. [*a*, 34.]—**Fuso-cellular melanic f.** Fr., *fibrome-cellulaire mélanique.* Of Lancereaux, a fuso-cellular f. with black pigmentation of the intercellular substance, the

FIBROMA TISSUE ELEMENTS. (FROM WOODHEAD, AFTER ZIEGLER.)

a, leucocytes; *b*, formative cells of various shapes; *c*, connective-tissue cells, with two nuclei; *c'*, the same, with giant cells; *d*, formative cells with developing fibrillar periplast; *e*, developed connective or fibrous tissue.

color of the cells being less intense. These f's are often found in white or white-spotted horses. [*a*, 34.]—**Globe-cellular embryonal f.** Fr., *fibrome embryonnaire globo-cellulaire.* Of Lancereaux, a tumor composed of small globular cells, united by a soft and amorphous (embryonal) connective tissue and supplied by blood-vessels. It is the round-celled sarcoma of Billroth, the embryo-plastic tumor of Robin, or the encephaloid sarcoma of Cornil and Ranvier. [*a*, 34.]—**Lacunar f.** Fr., *fibrome lacunaire.* A f. that is formed in the lacuna of the mamma; a nearly solidified proliferous cyst. [*a*, 34.]—**Lamellar f.** Fr., *fibrome lamelleux.* A flattened or lobular tumor formed on serous membranes, and composed of cells with flat nuclei. Microscopic sections resemble perpendicular sections of the cornea. [Cornil and Ranvier (*a*, 34).]—**Molluscoid f.** Fr., *fibrome molluscoïde.* A fasciculated f. in which the connective-tissue bundles are infiltrated with serous fluid. [Cornil and Ranvier (*a*, 34).]—**Mucoid f., Mucous f.** Fr., *fibrome muqueux.* A fasciculated f. in which the fibres have undergone mucoid degeneration. [Cornil and Ranvier (*a*, 34).]—**Papillary f.** A fibrous hyperplasia of the cutaneous papillæ. See PAPILLOMA. [*a*, 34.]—**Soft f.** See *F. molluscum* and WEN.

FIBROMATOSIS (Lat.), n. f. Fi(fe)-bro-ma^3-to'si^{2}s. Gen., *-o'seos* (*-is*). Ger., *F.* See FIBROSIS.

FIBROMATOUS, adj. Fi-brom'a^3-tu^{3}s. Pertaining to or of the nature of a fibroma. [E.]

FIBRO-MEMBRANOUS, adj. Fi''bro-me^{2}m'bra-nu^{3}s. From *fibra*, a fibre, and *membrana*, a membrane. Fibrous and membranous. ["Proc. of the Zool. Soc.," 1873, p. 26 (L).]

FIBRO-MUCOUS, adj. Fi″bro-mu^2′ku^{3}s. From *fibra*, a fibre, and *mucus*, mucous. Fr., *fibro-muqueux.* Composed in part of a mucous membrane and in part of fibrous tissue. [J.]

FIBRO-MUSCULAR. Fi″bro-mu^{2}sk′u^2-la^{3}r. Composed of connective tissue and muscle. [J.]

FIBRO-MYITIS (Lat.), n. f. Fi(fi^2)″bro(bro^3)-mi(mu^6)-i(e)′ti^{2}s. Gen., *-it′idos* (*-is*). An inflammation of the muscular system that is followed by atrophy and fibrous degeneration of the muscular fibres, with consequent diminution of motility of the muscle. [α, 34.]

FIBRO-MYOMA (Lat.), n. n. Fi(fi^2)-bro(bro^3)-mi(mu^6)-o′ma^3. Gen., *-o′matos* (*-is*). From *fibra*, a fibre, and μῦς, a muscle. Fr., *fibro-myome.* Syn.: *myo-fibroma.* Strictly, a tumor (as of the uterus) composed of fibrous and unstriped muscular tissue; as commonly used, it is synonymous with *fibrous tumor*, *fibroma*, *myoma*, *leio-myoma*, and *fibroid*.—**Lymphangiectatic f.-m.** A f. with enlargement and free formation of lymphatic vessels. [Rein, "Arch. f. Gyn.," 1876, p. 414 (α, 34).]—**Malignant f.-m.** Lat., *f.-m. malignum.* Fr., *fibro-myome malin.* Of Jürgens, a term for cases of f.-m. in which the lymphatic glands in connection with the part affected become the seat of fibro-myomatous degeneration. [Jürgens, "Berl. kl. Wchnschr.," Aug. 22, 1881, p. 492; "Rev. d. sci. méd.," Jan., 1885, p. 232.]

FIBRO-MYOMOTOMY, n. Fi″bro-mi-om-o^{2}t′o-mi^2. A cutting operation for the removal of a fibro-myoma. [α, 33.]

FIBRO-MYXOMA (Lat.), n. n. Fi(fe)″bro(bro^3)-mi^{2}x(mu^{6}x)-o′ma^3. Gen., *-om′atos* (*-is*). A fibroma that has partially undergone myxoid degeneration. [α, 34.]

FIBRO-MYXO-SARCOMA (Lat.), n. n. Fi(fe)″bro(bro^3)-mi^{2}x-(mu^{6}x)-o(o^3)-sa^{3}rk-o′ma^3. Gen., *-co′matos* (*-is*). From *fibra*, a fibre, μύξα, mucus, and σάρκωμα, a fleshy excrescence. 1. A fasciculated sarcoma that has undergone mucoid degeneration. 2. A tumor in which sarcomatous and myxoid tissue are found combined. [Ziegler (α, 34).]

FIBRO-NEUROMA (Lat.), n. n. Fi(fi^2)″bro(bro^3)-nu^2-ro′ma^3. Gen., *-om′atos* (*-is*). From *fibra*, a fibre, and νεῦρον, a nerve. Ger., *Fibroneurom.* See under NEUROMA.

FIBRO-NUCLEAR, FIBRO-NUCLEATED, adj's. Fi″bro-nu^2′kle-a^{3}r, -at-e^{2}d. From *fibra*, a fibre, and *nucleus*, a kernel. Of a tissue, showing many nuclei and fibres. [J, 30.]

FIBRO-PERICARDITIS (Lat.), n. f. Fi(fe)″bro(bro^3)-pe^{2}r-i^2-ka^{3}rd-i(e)′ti^{2}s. Gen., *-it′idos* (*-is*). See *Fibrinous* PERICARDITIS.

FIBRO-PLASTIC, adj. Fi″bro-pla^{2}st′i^{2}k. Lat., *fibroplasticus* (from *fibra*, a fibre, and πλάσσειν, to mold). Fr., *fibro-plastique.* Ger., *fibroplastisch.* Characterized by the formation of fibres (said of neoplasms); of Lebert, fibro-sarcomatous. ["Arch. gén. de méd.," Jan., 1853, p. 105.] According to Ziegler, the term was formerly applied erroneously to actinomycotic tumors. [α, 34.]

FIBRO-RETICULATE, adj. Fi″bro-re^{2}t-i^{2}k′u^2-lat. Marked with interlacing fibres, or composed of fibrous network. [B.]

FIBRÖS (Ger.), adj. Feb′ru^{5}s. See FIBROUS.

FIBRO-SARCOMA (Lat.), n. Fi(fi^2)″bro(bro^3)-sa^{3}rk-o′ma^3. Gen., *-om′atos* (*-is*). From *fibra*, a fibre, and σάρκωμα (see SARCOMA). Fr., *fibro-sarcome.* Ger., *Fibrosarkom*, *Fasersarkom.* The fibro-plastic tumor of Lebert; a fasciculated or spindle-celled sarcoma in which the embryonic tissue has attempted the evolution of connective tissue, the cell processes apparently starting from the nuclei and producing a fibrillated structure resembling that of fibroma. [Ziegler (α, 34).]—**F. endothelioideum.** See FIBROMA *endothelioideum.*

FIBRO-SARCOMATOUS, adj. Fi″bro-sa^{3}r-ko^{2}m′a^{2}t-u^{3}s. Of the nature of a fibro-sarcoma.

FIBROSE, adj. Fi′bros. See FIBROUS.

FIBRÖSELASTISCH (Ger.), adj. Fe-bru^{6}s″e^{2}l-a^{3}s′tish. See FIBRO-ELASTIC.

FIBRO-SEROUS, adj. Fi″bro-se′ru^{3}s. Fr., *fibro-séreux.* Made up of a serous membrane resting upon a fibrous stratum. [J, 33.]

FIBROSIS (Lat.), n. f. Fi(fi^2)-bro′si^{2}s. Gen., *-o′seos* (*-eis*). Fibroid degeneration or proliferation. [Gull, "Brit. Med. Jour.," 1872, ii, p. 673 (α, 34).] Cf. *Arterio-capillary f.*—**Arterio-capillary f.** Ger., *Arteriosclerose.* A primary and general fibroid degeneration of the arterioles and capillaries that develops about the middle of life; characterized by diminished calibre and elasticity of the diseased vessels, atrophy of the adjacent tissue (especially in the kidneys), and hypertrophy of the heart. Often the intima is most involved, though in some cases the muscular layer or adventitia is affected. [Gull, *l. c.* (α, 34).]

FIBROUS, adj. Fi′bru^{3}s. Lat., *fibrosus*, *fibrillatus* (from *fibra*, a fibre). Fr., *fibreux*, *fibrose*, *fibrillé*, *fibrillaire.* Ger., *faserig*, *fibrös.* Syn.: *fibrillar*, *fibrillated.* Containing or composed of fibres; of shells, consisting of successive layers of prismatic cells; of plant-organs, dividing into thin, nearly equal fibrils, or containing much woody fibre; in pathology, due to or characterized by the formation of adventitious f. tissue. [B, 19, 123 (α, 24); S. D. Gross (D); L, 147.]

FIBRO-VASCULAR, adj. Fi″bro-va^{2}sk′u^2-la^{3}r. From *fibra*, a fibre, and *vasculum*, a small vessel. Fibrous and abundantly supplied with vessels. [B, 19, 291 (α, 24); J.] Cf. *F.-v.* BUNDLE.

FIBULA (Lat.), n. f. Fib(feb)′u^2(u^4)-la^3. Gr., περόνη. Fr., *fibule.* Ger., *Wadenbein.* It., Sp., *perone.* 1. The smaller of the bones of the leg, lying on its outer side, and of nearly the same length as the tibia. Its upper extremity or head articulates with the external tuberosity of the tibia. The shaft or portion intermediate between the upper and lower extremities is triangular and twisted. The lower extremity, larger than the upper, constitutes the external malleolus, and articulates with the astragalus. 2. A clasp used for uniting the lips of wounds or the opening of a canal, as of the vagina. Cf. INFIBULATION. [E, 9; L, 31, 115, 142, 332.]

FIBULAD, adv. Fi^{2}b′u^{2}l-a^{2}d. Toward the fibular aspect. [L, 141.]

THE FIBULA.

FIBULÆUS. Fib(feb)-u^{2}l(u^{4}l)-e′(a^3′e^2)-u^{3}s-(u^{4}s). The peronæus longus muscle. [L, 5 (α, 29).]

FIBULAR, adj. Fi^{2}b′u^2-la^{3}r. Lat., *fibularis*, *peronæus.* Fr., *péronier.* Ger., *wadenbeinähnlich.* Syn.: *peroneal.* Relating to or situated near the fibula. [C.]

FIBULARE (Lat.), n. n. Fib(feb)-u^2(u^4)-la(la^3)′re(ra). Of Gegenbaur, see CALCANEUM.

FIBULARIS (Lat.), adj. Fib(feb)-u^2(u^4)-la(la^3)′ri^{2}s. See FIBULAR; as a n., a peroneal muscle.—**F. brevis.** The peroneus brevis muscle. [L, 10 (α, 29).]—**F. longus, F. primus.** The peroneus longus muscle. [α. 29.]—**F. secundus.** The peroneus brevis muscle. [L, 10 (α, 29).]

FIBULATION, n. Fi^{2}b-u^2-la′shu^{3}n. See INFIBULATION.

FIBULEN (Ger.), adj. Feb′u-le^{2}n. Related to, or connected with, the fibula. [L, 141.]

FIC (Fr.), n. Fek. 1. See FICUS. 2. A fig-like, fleshy growth. [L, 87 (α, 14).] See CONDYLOMA.

FICARIA (Lat.), n. f. Fi(fe)-ka(ka^3)′ri^2-a^3. From *ficus*, a fig. Fr., *ficaire.* Ger., *Feigwarzenkraut.* Of Dillenius, a genus of the *Ranunculaceæ*; of other authors, a section of the genus *Ranunculus.* The *Ficarieæ* (Fr., *ficariées*) are: 1. Of Dumortier, an order of the *Torosepalæ.* 2. Of Reichenbach, a section of the *Ranunculeæ genuinæ.* [B, 19, 42, 121 (α, 24).]—**F. aquatica.** The *Scrophularia aquatica.* [B, 180 (α, 24).]—**F. communis, F. minor, F. ranunculoides, F. verna.** See RANUNCULUS *f.*—**Herba ficariæ.** The herb of *Scrophularia nodosa.* [B, 180 (α, 24).]—**Radix ficariæ.** The root of *Scrophularia nodosa* and of *F. ranunculoides.* [B, 180 (α, 24).]

FICARIC ACID, n. Fi^{2}k-a^{2}r′i^{2}k. Fr., *acide ficarique.* A volatile acid obtained from *Ficaria ranunculoides* (*Ranunculus ficaria*). [B.]

FICARIN, n. Fi^{2}k′a^{2}r-i^{2}n. Fr., *ficarine.* A neutral light-yellow substance, obtained from *Ficaria communis* (especially the root) by treating with alcohol; first sweetish and afterward astringent in taste, soluble in water and in diluted alcohol, insoluble in absolute alcohol, in ether, and in oils; employed internally and externally for hæmorrhoids. [L, 49, 87 (α, 14).]

FICATIO (Lat.), n. f. Fi^{2}k(fek)-a(a^3)′shi^2(ti^2)-o. Gen., *-o′nis.* See FICUS and SYCOSIS.

FICATUS (Lat.), adj. Fi^{2}k(fek)-a(a^3)′tu^{3}s(tu^{4}s). From *ficus*, a fig. Gr., συκωτός. Of Galen, derived from animals fattened on dry figs (said of viscera and flesh). [L, 94 (α, 17).]

FICEÆ (Lat.), n. f. pl. Fi(fe)′se^2(ke^2)-e(a^3-e^2). From *ficus*, a fig. Fr., *ficées.* Of Gaudechaud, a division of the *Urticeæ*; of Dumortier, a tribe of the *Facineæ*; of Reichenbach, a subdivision of the *Dorstenieæ* (of Trécul and others, a tribe of the *Artocarpeæ*), consisting of the genus *Ficus*; of Miquel, a suborder (afterward a subtribe) of the *Artocarpeæ*, comprising *Pharmacosycea*, *Urostigma*, and *Ficus*; and of Engler, a tribe of the *Moraceæ*, suborder *Artocarpoideæ.* [B, 170, 245 (α, 24).]

FICHTE (Ger.), n. Fi^{2}ch^{2}t′e^2. The *Picea vulgaris.* [B, 180 (α, 24).]—**Canadische F.** The *Pinus canadensis.* [L, 80.]—**F′napfel.** A pine cone; a cone of *Pinus silvestris.* [α, 24.]—**F′nbaum.** The genus *Abies.*—**F′nharz.** See *Burgundy* PITCH.—**F′nknospen.** See *Turiones* PINI.—**F′nknospenextract.** See *Extractum gemmæ* PINI.—**F′nknospentinctur.** See *Tinctura gemmæ* PINI.—**F′nnadelbad.** A fir-needle bath. [B, 49.]—**F′nnadelöl.** See PINE-*needle oil.*—**F′nöl.** An oil pressed from the seeds of *Pinus silvestris* and mixed with rape-seed. It is extensively used in the south of Germany as illuminating oil. It is also edible when fresh. [L, 30 (α, 14).]—**F′nsäure.** Pinic acid. [A, 324.]—**F′nsprossen.** See *F′napfel.*—**F′ntheer.** Pine-tar. [B, 205 (α, 21).]—**F′nwolle.** A fibre made from the needles of the *Pinus silvestris.* The finest quality, mixed with cotton fibre and woven into a cloth, is used for wrapping the limbs when affected with rheumatism. [L, 30 (α, 14).]—**F′nzapfen.** See *F′napfel.*—**F′nzapfenähnlich.** Cone-like, pineal. [L, 80.]—**Gemeine F.** The *Picea vulgaris* and the *Pinus silvestris.* [B, 180 (α, 24).]—**Nordamerikanische F.** The *Abies canadensis.* [L, 43.]—**Norfolksf′.** The *Araucaria excelsa.* [B, 49 (α, 24).]

FICIFORMIS (Lat.), adj. Fi(fe)-si^2(ki^2)-fo^{2}rm′i^{2}s. From *ficus*, a fig, and *forma*, form. Fr., *ficiforme.* Fig-shaped. [L, 180.]

FICKI-TAGAR (Hind.), n. The *Tabernæmontana coronaria.* [B, 172 (α, 24).]

FICOID, FICOIDAL, adj's. Fi′koid, fi-koid′a^{2}l. Lat., *ficodes*, *ficoides*, *ficoideus* (from *ficus*, a fig, and εἶδος, resemblance). Fr., *ficoïde*, *ficoïdé.* Ger., *feigenähnlich.* 1. See FICIFORM. 2. Resembling the genus *Ficus*, having the flowers enveloped in a thick, succulent receptacle, as in that genus. The *Ficoideæ* are: Of Mirbel, a family of polypetalous dicotyledons; of De Candolle, an order of the *Calyciflorœ*; of Dumortier, a family of the *Calicungulia*, consisting of the genus *Mesembryanthemum.* The *Ficoidales* (*nixus ficoidalis*) are: 1. Of Lindley, an alliance of the *Apocarpæ*, comprising the *Ficoideæ*, and subsequently an alliance of perigynous exogens, consisting of the *Basellaceæ*, *Mesembryaceæ*, *Tetragoniaceæ*, and *Scleranthaceæ.* 2. Of Bentham and Hooker, a cohort of the *Calyciflorœ*, comprising the *Cacteæ* and *Ficoideæ.* The

Ficoideæ (Fr., *ficoïdées* ; Ger., *Ficoideen*) are the *Mesembryaceæ*. [B, 1, 19, 42, 70, 121, 170, 180 (*a*, 24).]

FICOÏDE (Fr.), adj. Fe-ko-ed. See Ficoid ; as a n., the genus *Mesembryanthemum*. — **F. glaciale.** The *Mesembryanthemum cristallinum*. [B, 121 (*a*, 24).]

FICOIN, n. Fi'ko-i^{2}n. Fr., *ficoïne*. A form of papayin derived from plants of the genus *Ficus*. [A, 385.]

FICOSIS (Lat.), n. f. Fi(fe)-ko^2'si^{2}s. Gen., *-os'eos* (*-sis*). See Sycosis.

FICOUS, adj. Fi'ku^{3}s. Lat., *ficosus* (from *ficus*, a fig). Pertaining to the disease ficus. [E.]

FICUS (Lat.), n. m. (1st def.) and f. Fi(fe)'ku^{3}s(ku^{4}s). Gen., *fi'ci* (*-us*). Gr., *συκέα* (2d def.), *κράδη* (2d def.). Fr., *fic* (1st def.), *figue* (2d def.), *figuier* (3d def.). Ger., *Feige* (2d def.), *Feigenbaum* (3d def.). It., *fico* (2d def.). Sp., *higo* (2d def.). 1. Of the old writers, a tumor having the form, volume, and consistence of a fig ; of Paracelsus, a hæmorrhoidal tumor ; of later writers, a condyloma. 2. The fig ; the receptacle, or fruit, of the genus *F.* ; of the U. S. and Br. Ph's, the receptacle of *F. carica*, the caricæ of other pharmacopœias. 3. The fig-tree ; of Linnæus, a genus of urticaceous trees or shrubs, by Bentham and Hooker referred to the *Artocarpeæ*. [B, 5, 42, 170 (*a*, 24) ; E ; H.]—**F. ægyptiaca.** Of Theophrastus, the *Ceratonia siliqua*. [B, 121 (*a*, 24).]—**F. amboinensis.** A Molucca Island species. The milky sap is used as an expectorant, and the bark as an astringent and febrifuge. [B, 180 (*a*, 24).]—**F. americana.** Laurel-leaved South American fig, a species found in Jamaica, Guiana, and Guadeloupe, having a pale-yellow, globose fruit. [B, 275 (*a*, 24).]—**F. ampelas.** A species found in the East Indies, where the root, infused in vinegar, is given in cholera. [B, 180 (*a*, 24).]—**F. anthelminthica.** Fr., *f. anthelmintique*. A species growing in Peru and yielding caoutchouc. The acrid juice is used as a vermifuge. [B, 173 (*a*, 24).]—**F. arbutifolia.** Fr., *figuier à petit fruit*. A species found in India and Mexico. The juice of the branches is applied to poisoned wounds, and is used as a resolvent. [B, 173 (*a*, 24) ; J. M. Maisch, "Am. Jour. of Pharm.," Feb., 1886, p. 76 (*a*, 17).]—**F. aspera.** The tongue fig ; a species growing in New Holland, where the leaves and fruit are eaten. [B, 275 (*a*, 24).]—**F. atrox.** A species found in South America, said to furnish one of the ingredients of curare. [B, 180 (*a*, 24).]—**F. auriculata.** A species growing in Cochin-China ; the fruit is eaten as a substitute for cucumber. [*a*, 24.]—**F. bengalensis.** Fr., *arbre des banians* (ou *des pagodes*), *figuier du Bengal*. The common banyan-tree, a very large and spreading species, furnishing East Indian lac. The seeds are considered cooling and tonic ; the white juice is used as an odontalgic, and the bark as a tonic and diuretic. [B, 172, 173, 180 (*a*, 24).]—**F. benjamina.** Sp., *amate*. See *F. arbutifolia*, and Cf. *F. complicata*.—**F. candida.** Fr., *figuier blanc*. Ger., *französischer Feigenbaum*. A variety of *F. carica* furnishing Marseilles figs. [B, 173.]—**F. carica.** Fr., *figuier commun* (ou *cultivé*). Ger.,

FICUS CARICA. [A, 327.]

gemeiner Feigenbaum. Sp., *higuera*. A species known from the earliest ages, and supposed to be indigenous to Caria, Asia Minor, but now growing wild in the tropics and cultivated in sheltered situations in temperate climates. It is from 12 to 20 feet high, with spreading branches, large, palmately lobed leaves, flowers small and inclosed within the fleshy receptacle, called the fruit (or fig), a term which properly belongs to the small seed on the inside of the receptacle. The dried figs (Lat., *caricæ* ; Fr., *figues* ; Ger., *Feigen* ; It., *fichi* ; Sp., *higos*) are official in the U. S. and Br. Ph's. They are nutritious and laxative, and are used externally in cataplasms. [B, 5, 173, 180 (*a*, 24).]—**F. cerifera.** A species growing in Sumatra, yielding a sort of wax called *getah-lahoë*. [B, 104 (*a*, 24).]—**F. citrifolia.** A species found in the East and West Indies and in Mexico. The root is used in fevers and pectoral complaints, and in large doses as an emetic and purgative. An infusion of the bark is used in aphthous affections, and externally in leprosy, and as an embrocation. [B, 172, 180 (*a*, 24).]—**F. columnaris.** The banyan-tree of Lord Howe's Island. It yields a gum resembling gutta-percha. [*a*, 24.]—**F. communis.** See *F. carica*.—**F. complicata.** Sp., *samatito* [Mex. Ph.]. A species growing in hot districts in Mexico. The milky juice is used as a resolvent. [J. M. Maisch, "Am. Jour. of Pharm.," Feb., 1886, p. 72 (*a*, 17).]—**F. conglomerata.** A species the fruit of which is used in the East Indies in aphthous complaints and, boiled in milk, in visceral obstruction. A bath made from the fruit or bark is considered useful in elephantiasis. [B, 172 (*a*, 24).]—**F. crassinerva.** A species found in Jamaica, Cuba, and Guadeloupe, with velvety, globose figs. [*a*, 24.]—**F. cunia.** See *F. conglomerata*.—**F. Cunninghamii.** A very large species growing in Queensland, and yielding caoutchouc. [*a*, 24.]—**F. cyprica.** See *F. sycomorus*.—**F. dæmona.** See *F. oppositifolia*.—**F. dimidiata.** A new species found in Jamaica, bearing globose, glabrate, and subsessile figs. [*a*, 24.]—**F. doliaria.** A species growing in Brazil, the juice of which contains doliarin. [B, 19, 42 (*a*, 24) ; L, 49.]—**F. elastica.**

FICUS ELASTICA. [A, 327.]

Fr., *figuier élastique*. Indian caoutchouc-tree, Assam rubber-tree, a species indigenous to India. The juice contains 30 per cent. of caoutchouc. [B, 5, 172 (*a*, 24).]—**F. elliptica.** Fr., *figuier élliptique*. A species growing in Colombia, and yielding caoutchouc. [B, 173, 180 (*a*, 24).]—**F. excelsa.** A species found in the East Indies. A decoction of the root is used in hepatic and aphthous complaints, and an infusion of the leaves in fever and diarrhœa. [B, 172, 180 (*a*, 24).]—**F. glomerata.** Cluster-fig ; a species found in the East Indies. The root is used in pectoral complaints and in dysentery ; the bark is applied to ulcers ; the fruit is edible, but insipid. [B, 172, 180, 275 (*a*, 24).]—**F. glumosa.** Fr., *figuier sans épiderme*. A species found in Egypt, where the fruits are eaten. [B, 173 (*a*, 24).]—**F. gonia.** A tall species growing in the East Indies. A decoction of the bark is used in aphthæ and toothache, and in nephritic and vesical complaints. The root and bark are used in baths. [B, 180 (*a*, 24).]—**F. granatum.** A species growing in the Isle of Tauna ; the fruit is red and has an insipid taste. [*a*, 24.]—**F. gummiflua.** A species growing in Java. It yields a variety of wax. ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]—**F. heterophylla.** A species found in the East Indies. The juice of the root is used in colic and, mixed with milk, in dysentery. The bark of the root mixed with aromatics is used in asthma and pectoral complaints. [B, 172, 182 (*a*, 24).]—**F. hispida.** A species found in the East Indies and in Java, yielding caoutchouc, and used in hepatic, aphthous, and cutaneous diseases. [B, 180 (*a*, 24).]—**F. indica.** Fr., *figuier de l'Inde*. 1. Of Roxburgh, see *F. bengalensis*. 2. Of Willdenow, see *F. tsjela*.—**F. infernalis.** 1. The fruit of *Jatropha curcas*. [B, 121, 180 (*a*, 24).] 2. See Argemone *mexicana*. Cf. *Infernal* fig.—**F. lancifolia.** See *F. bengalensis*.—**F. laurifolia.** The black fig ; a species found in Jamaica and Dominica. [B, 275 (*a*, 24).]—**F. lutea.** A variety of *F. carica*, yielding the angelic or oily figs of commerce. [B, 173 (*a*, 24).]—**F. martinicensis.** See *F. laurifolia*.—**F. mauritiana.** Fr., *figuier de l'Île-de-France*. See *F. nautarum*.—**F. microcarpa.** See *F. arbutifolia*.—**F. nautarum.** A species found in the Mauritius, having a globose receptacle, red when ripe. [*a*, 24.]—**F. nitida.** A species found in the East Indies. A decoction of the rind of the fruit is used as a vulnerary, and in aphthæ and scrofulous affections. [B, 180 (*a*, 24).]—**F. nymphæifolia.** A large species growing in the West Indies, Mexico, and South America, furnishing tescalama (*q. v.*). [B, 180 (*a*, 24) ; "Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]—**F. ochroleuca.** See *F. americana*.—**F. oppositifolia.** Syn. : *Covellia oppositifolia*. A species growing in the East Indian peninsula and Bengal. The fruit, seeds, and bark are used as emetics, and the bark is also antiperiodic and tonic. The milky juice is poisonous. [B, 172 (*a*, 24).]—**F. padana.** Fr., *figuier vénéneux*. A species found in the East Indies yielding caoutchouc. The fruit is poisonous. [B, 173 (*a*, 24).]—**F. pallida.** A species growing in New Granada and the West Indies. [B, 282 (*a*, 24).]—**F. pandana.** See *F. padana*.—**F. panifica.** The choddo ; a species found in Africa. In Abyssinia the interior bark is used as food. [B, 121 (*a*, 24).]—**F. passæ.** See *F.* (2d def.).—**F. pedunculata.** The broad- (or willow-) leaved fig, red fig, Jamaica cherry ; a species yielding globose, glabrous, red figs. [B, 275, 282 (*a*, 24).]—**F. pertusa.** See *F. americana*.—**F. populnea.** A species found in Antigua and Colombia, yielding caoutchouc and red, globose figs. [B, 180 (*a*, 24).]—**F. prinoides.** A species found in New Granada and English Guiana. It yields caoutchouc. [B, 180 (*a*, 24).]—**F. pseudo-carica.** A species found in Abyssinia, and called by the natives *bellas*. [B, 121 (*a*, 24).]—**F. pyriformis.**

Fr., *figuier pyriforme.* A variety of the *F. carica* furnishing Bordeaux figs. [B, 173 (*a*, 24).]—**F. racemosa.** Fr., *figuier rameux.* Redwooded (or country) fig-tree; a species found in the East Indies. A decoction of the root and bark is used as a tonic, and in hæmaturia and menorrhagia. An infusion of the bark is used in diabetes and as a cholagogue. The fruit is edible. [B, 172, 173, 180 (*a*, 24).]—**F. radula.** See *F. anthelminthica.*—**F. religiosa.** Fr., *figuier* (ou *arbre*) *des pagodes* (ou *de Dieu*, ou *des conseils*, ou *du diable*), *bogon.* Ger., *religiöser Feigenbaum.* Sacred fig. poplar-leaved fig-tree, a common tree of India, yielding Indian lac. The seeds are cooling and alterative, the leaves are astringent and purgative, and an infusion of the bark is used in scabies. [B, 5, 172, 173, 180 (*a*, 24).]—**F. rubescens.** See *F. heterophylla.*—**F. rubra.** See *F. nautarum.*—**F. Rumphii.** A species found in the islands of southeastern Asia. The bark and leaves are used in infusion in pectoral complaints and in catarrhs, and the bark and fruits in skin diseases. The fruit is edible. [B, 180 (*a*, 21).]—**F. septica.** Fr., *figuier septique.* A species found in the Moluccas and neighboring islands, and used as a diuretic and vulnerary. The leaves are employed as a vermifuge, and the fruit as an expectorant and purgative. [B, 173, 180 (*a*, 24).]—**F. sycomora, F. sycomorus.** Gr., συκόμορος. Fr., *figuier sycomore* (ou *de sycomore*, ou *de Pharaoh*). Egyptian or Pharaoh's fig; a large, bushy species found in Syria and Egypt. The small but abundant fruit is used for food, and its juice as an application to abscesses and ulcers. [B, 173, 180, 185 (*a*, 24).]—**F. terragena.** See *F. nautarum.*—**F. terebrata.** A species found in the Mauritius. [*a*, 24.]—**F. tinctoria.** Fr., *figuier des teinturiers.* A Tahiti species yielding a yellow dye. [B, 173 (*a*, 24).]—**F. toka.** Fr., *figuier toka.* A species found in Arabia. It yields caoutchouc. [B, 173 (*a*, 24).]—**F. tomentosa.** The *conti-pela* of the East Indians, who use the root-bark as a medicine. [B, 121 (*a*, 24).]—**F. toxicaria.** See *F. padana.*—**F. tsjela.** A species found in the East Indies. It is used, mixed with pepper, in pectoral complaints, and the juice of the fruit is employed in ophthalmia. [B, 172, 180 (*a*, 24).]—**F. undulata.** A species found in the East Indies. The astringent bark is employed in aphthæ and as a vulnerary, and an infusion of the root in baths. [B, 180 (*a*, 24).]—**F. vasculosa.** A species found in eastern India. The fruit is of the size of a pea. [*a*, 24.]—**F. vasta.** See *F. bengalensis.*—**F. venenata.** A species growing in Guiana, containing a poisonous juice. [B, 104 (*a*, 24).]—**F. venerea.** A venereal wart. [B.] See CONDYLOMA.—**F. venosa.** An East Indian species used like *F. glomerata.* [B, 180 (*a*, 24).]—**F. verrucosa.** Fr., *figuier verruqueux.* A species found in India, yielding caoutchouc. [B, 173 (*a*, 24).]—**F. violacea.** Fr., *figuier violet.* A variety of *F. carica* yielding the violet figs of commerce. [B, 173 (*a*, 24).]—**F. virens.** See *F. laurifolia.*—**F. vulgaris.** See *F.* (2d def.).—**Pulpa ficorum** [Fr. Cod., 1818]. Pulp of figs; made by boiling dried figs in a sufficient quantity of water, straining the pulp through a hair sieve, adding the water of the decoction, and evaporating to the proper consistence. [B, 97 (*a*, 21).]

FIDA, n. Of the alchemists, gold or silver. [Ruland (A, 325).]

FIDDLE, n. Fi^{2}d'l. The *Daucus carota* and the *Rumex pulcher.* [A, 505 (*a*, 21); L, 86.]—**F.-cases.** The *Rhinanthus crista galli.* [A, 505 (*a*, 21).]—**F.-shaped.** Lat., *panduriformis.* Fr., *panduriforme.* Ger., *geigenförmig.* Obovate, with deep indentations in each side. [B, 19 (*a*, 24).]—**F.-wood.** The genus *Citharexylon* and the *Scrophularia aquatica.* [A, 505 (*a*, 21); B, 19, 121 (*a*, 24).]—**Yellow f.-wood.** The *Petitia domingensis.* [B, 282.]

FIDDLES, n. Fi^{2}d'lz. The *Scrophularia aquatica.* [A, 505 (*a*, 21).]—**Snake's-f.** The *Iris fœtidissima.* [A, 505 (*a*, 21).]

FIDERIS (Fr.), n. Fe-da-res. A place in the canton of Grisons, Switzerland, where there are cold and gaseous springs containing iron bicarbonate and sodium sulphate. [L, 49, 105, 135 (*a*, 41).]

FIDGEL (Ar.), n. See FIDJEL.

FIDGETS, n. Fi^{2}j'e^{2}ts. General restlessness. [L, 107.]

FIDICINALES (Lat.), n. Fid(fi^{2}d)-i^2-si^{2}n(ki^{2}n)-al(a^{3}l)'ez(as). The lumbricales muscles of the hand. [L, 34 (*a*, 29).]

FIDISPINALIS (Lat.), n. f. Fid(fi^{2}d)-i^2-spin(spen)-al(a^{3}l)'i^{2}s. Of E. Coues, see MULTIFIDUS *spinæ.*

FIDJEL (Ar.), n. The *Rumex spinosus* and the *Rhaphanus sativus.* [B, 121 (*a*, 24).]—**F. el Djemal.** The *Isatis silvestris.* [B, 121 (*a*, 24).]

FIDLOKKUM, n. In Malta, the *Borago officinalis*, used there as a pectoral remedy. ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]

FIDO, n. Of the alchemists, quicksilver, sometimes gold. [L, 94 (*a*, 21).]

FIDOUS, adj. Fi'du^{3}s. Lat., *fidus* (from *findere*, to cleave). See CLEFT (adj.).

FIDUCIA (Lat.), n. f. Fi(fe)-du^2(du)'si^2(ki^2)-a^3. From *fidere*, to confide in. Gr., θάρσος. Confidence, as of a patient in his physician. [A, 325.]

FIEBER (Ger.), n. Feb'e^{2}r. See FEVER.—**Abdominalnervenf'.** See *Typhoid* FEVER.—**Abweichendes F.** See *Anomalous* FEVER.—**Adenomeningeïsches F.** See *Adeno-meningeal* FEVER.—**Alltägiges F.** See *Quotidian* (*intermittent*) FEVER.—**Amerikanisches F.** See *Yellow* FEVER.—**Anhaltendes F.** See *Continued* FEVER.—**Ansteckendes F.** An infectious fever. FIEBERN (Ger.), v. intr. Feb'e^{2}rn. To become feverish, to be attacked with fever.

FIEBERND (Ger.), adj. Feb'e^{2}rnd. Feverish. [*a*, 34.]

FIEBERRINDE (Ger.), n. Feb'e^{2}r-ri^{2}nd-e^2. Any febrifuge bark. [*a*. 24.]—**Falsche F.** See CASCARILLA-*bark.*—**F'nbaum.** See the major list.—**F'nkrugflechte.** The *Urceolaria cinchonarum.* [B, 180 (*a*, 24).]—**Graue F.** See CASCARILLA-*bark.*—**Jamaikanische F.** See *Cortex* CINCHONÆ *succedaneus.*—**Rothe F.** See *Red* CINCHONA.

FIEBERRINDENBAUM (Ger.), n. Feb'e^{2}r-ri^{2}nd-e^{2}n-ba^3-u^{4}m. See CINCHONA (1st def.).—**Aechter F.** See CINCHONA *condaminea.*—**Bergen's F.** The *Remijia* (*Cinchona*) *bergeniana.* [B, 180 (*a*. 24).]—**Condaminescher F.** See CINCHONA *condaminea.*—**Dickblättriger F.** See CASCARILLA *calyptrata.*—**Drüsentragender F.** See CINCHONA *glandulifera.*—**F. mit feingrubigen Blättern.** See CINCHONA *scrobiculata.*—**F. mit hinfälligen Blüthen.** The *Cinchona caduciflora.* [B. 180 (*a*, 24).]—**Gabelspaltiger F.** See CINCHONA *dichotoma.*—**Grossblättriger F.** See CINCHONA *magnifolia.*—**Grossfrüchtiger F.** See CINCHONA

ovalifolia.—**Grosskelchiger F.** See CINCHONA *macrocalyx.*—**Humboldt's F.** See CINCHONA *humboldtiana.*—**Kleinblüthiger F.** See CINCHONA *micrantha.*—**Lambert's F.** The *Cinchona* (*Cascarilla*) *lambertiana.* [B, 180 (a, 24).]—**Langschieniger F.** The *Cinchona* (*Remijia*) *macrocnemia.* [B, 180 (a, 24).]—**Lanzettblättriger F.** See CINCHONA *lancifolia.*—**Ovalblättriger F.** See CINCHONA *ovalifolia.*—**Purpurrother F.** See CINCHONA *purpurea.*—**Rosenrothblühender F.** The *Macrocnemum roseum.* [B, 42, 180 (a, 24).]—**Spitzblättriger F.** See CASCARILLA *acutifolia.*—**Weichhaariger F.** See CINCHONA *pubescens.*

FIEDER (Ger.), n. Fed'e^{2}r. A foliole (pinna) of a compound leaf. [B, 1, 123 (a, 24).]—**F'chen.** See PINNULA.—**F'nervig.** See *Feather*-VEINED.—**F'schnittig.** See PINNATISECT.—**F'theilig.** See PINNATIFID.

FIEL (Fr.), n. Fe-e^{2}l. From *fel*, gall. Gall, bile. [B.]—**Extrait de f. de bœuf** [Fr. Cod.]. A hard extract made by straining fresh ox-gall. and evaporating. [B, 113 (a, 21).]—**F. de bœuf.** See FEL *bovis.*—**F. de bœuf purifié.** See FEL *bovis purificatum.* —**F. de terre.** The *Fumaria centaurium* and *Chironia centaurium.* [B, 121, 173 (a, 24).]—**F. épaissi.** See FEL *bovis inspissatum.*

FIELAGNO, n. In Provence, the *Rhamnus alaternus.* [B, 121 (a, 24).]

FIELD, n. Feld. Gr., κῆπος. Lat., *campus.* Fr., *champ.* Ger., *Feld.* It., Sp., *campo.* 1. An inclosed tract of cultivated land; as an adj., in botany, growing on such laud. 2. Any definite circumscribed area.—**Antipole f.** Ger., *Gegenpolseite.* The parts of a dividing cell nearest the equator, and away from which the daughter-nuclei move. ["Quart. Jour. of Micr. Sci.," 1889, p. 180; "Arch. f. mikr. Anat.," xxxii, p. 26 (J).]—**Auditory f.** That portion of the space surrounding the ear in every part of which a given sound is audible by the ear. The *binaural auditory f.* is that portion of space in which a given sound is audible when both ears are used. [B.]—**Binocular f. of vision.** That portion of space in which the f's of vision of the two eyes overlap, *i. e.*, in which binocular vision is possible. [B.]—**Cohnheim's f's.** See *Cohnheim's* AREAS. —**Deaf f's of the ear.** Fr., *champs sourds de l'oreille.* Ger., *Taubfelde des Ohres.* Two small triangles, the first of which lies in front and above, the other behind and above the ear. The apex of the anterior triangle lies at the lower end of the tragus, from which point the sides diverge gradually toward the frontal and parietal bones. The apex of the second triangle is at the lobule of the auricle, or near the lower part of the helix, and the sides diverge in the direction of the lateral surface of the parietal and occipital bones. A sonorous object, when entering either of these regions, is heard much less distinctly than outside of them. [F, 33.]—**F. of a lens.** Fr., *champ d'une lentille.* The area from which rays coming to a lens are brought to a focus by the latter; the range of surface distinct through a lens. [B.]—**F. of a microscope.** See *F. of view.*—**F. of audition.** See *Auditory f.*—**F. of fixation, F. of regard.** See *Visual f.*—**F. of view.** Ger., *Gesichtsfeld des Mikroskops.* The area visible through the microscope when it is in focus. When properly lighted and there is no object under the microscope, the f. appears as a circle of light. When examining an object it appears in a part or the whole of the light circle, and by moving the object, if of sufficient size, different parts are brought into the f. of view. In general, the greater the magnification of the entire microscope, whether the magnification is produced mainly by the objective, the ocular, or the lengthening of the tube of the microscope, or by a combination of these, the smaller is the f. The exact size of the f. of view may be determined directly by the use of a stage micrometer. [J, 200.] —**F. of vision.** See *Visual f.*—**F'wort.** The *Gentiana amarella.* [A, 505 (a, 21).]—**Magnetic f.** The range of influence of a magnet. [B.]—**Pole f.** Ger., *Polfeld.* The part of a dividing cell nearest the pole toward which the daughter-nuclei move. ["Quart. Jour. of Micr. Sci.," 1889, p. 180; "Arch. f. mikr. Anat.," xxxii, p. 26 (J).] —**Unilateral** (or **uniocular**) **f. of vision.** The visual f. taken for one eye only. [B.]—**Visual f.** Fr., *champ visuel* (ou *de fixation*). Ger., *Sehfeld, Gesichtsfeld.* It., *campo visuale.* Sp., *campo visual.* The entire surface from which, at a given distance, light reaches the retina, the eye being fixed. It is usually measured upon a spherical surface, of which the eye occupies the centre of curvature, the limits of the f. being expressed in degrees, which measure the extent of the arc that the f. includes upon each meridian. The ordinary limits of the visual f. for white light are, internally, 55° to 60°, externally, 90° to 100°, upward, 55°, downward, 60°. The visual f. for colors is smaller than that for white light, that for blue having the widest limits, and then in succession the f's for yellow, orange, red, green, and violet. [F.]

FIENTE (Fr.), n. Fe-a^{3}n^{2}t. See DUNG.

FIESTEL (Ger.), n. Fest'e^{2}l. A place in Westphalia, Germany, where there are gaseous springs containing calcium and potassium sulphates and hydrogen sulphide. [L, 49, 105, 135 (a, 14).]

FIÈVRE (Fr.), n. Fe-e^{2}v-r'. See FEVER.—**F. abdominale.** Of Bordeu, enteritis. [a, 34.]—**F. amygdalienne.** The fever indicative of systemic intoxication in acute amygdalitis. [Landouzy, "Gaz. des hôp.," Dec. 3, 1885, p. 1114 (a, 34).]—**F. angiocardique.** See *Angeiocardiac* FEVER.—**F. aphtheuse des herbivores.** See APHTHÆ *epizooticæ.*—**F. à quinquina.** Of Monneret, a class of fevers including continued, pernicious, intermittent, and remittent fevers; curable with quinine. [a, 34.]—**F. à rechutes.** See *Relapsing* FEVER.—**F. bâtarde.** Irregular fever. [a, 34.]—**F. bilieuse des Pays-Bas.** The swamp fever of the Netherlands. [L, 132.]—**F. bilieuse d'Amérique.** Yellow fever. [D, 74.]—**F. bilieuse des climats intertropicaux** [Dutroulan] (ou **grave des pays chauds**). Malarial hæmaturia and pernicious malarial fever. [a, 34.]—**F. bilieuse hémosphérinurique palustre.** Hæmorrhagic malarial fever. ["Prog. méd.," July 7, 1888, p. 3 (a, 34).]—**F. bilieuse mélanurique.** Of Latière, malarial hæmaturia.—**F. biosique ataxique.** Of Récamier, see *F. grave.*—**F. biquotidienne.** A fever in which there are two paroxysms daily. [a, 34.]—**F. blanche.** See CHLOROSIS.—**F. brisant les os.** Dengue. [L, 49 (a, 34).]—**F. bromique.** A term proposed, in a spirit of raillery, by Fonssagrives, in 1869, on account of the lay and professional enthusiasm for potassium bromide. [J. Simon, "Prog. méd.," Feb. 2, 1884, p. 81 (D).]—**F. bulleuse.** Pemphigus. [A, 523.]—**F. cacochymique.** Hectic fever. [A, 523.]—**F. cérébrale des enfants.** See HYDROCEPHALUS *internus.*—**F. charbonneuse.** See *Contagious* ANTHRAX. —**F. chaude.** 1. Meningitis. 2. A common term for acute mania. [L, 49 (a, 34).]—**F. clavelée.** Sheep-pox. [a, 34.]—**F. comitée.** A fever due to another disease or by injury. [a, 34.]—**F. contagieuse des misseaux.** Typhus fever. [a, 34.]—**F. curarique.** Fever produced by the administration of curare. [L, 88 (a, 34).]—**F. d'accès.** A febrile paroxysm. [a, 34.]—**F. d'Amérique.** Yellow fever. [D, 74.]—**F. d'amour.** See *Erotic* FEVER. —**F. de barras.** A malignant form of bilious remittent fever met with among children in the West Indies.—**F. de Bombay.** A term for typhoid, typho-malarial, and pernicious malarial fevers in Bombay in 1866, 1867, and 1868. [L, 88 (a, 34).]—**F. de chaleur.** See INSOLATION.—**F. de consomption.** The hectic fever of consumption. [L, 49 (a, 34).]—**F. de convalescence.** See *F. de retour.*—**F. de croissance.** See FEBRIS *paracmastica.*—**F. de foin.** See *Hay* FEVER.—**F. des gens de lettres.** A febricula affecting literary men and people leading a sedentary life; it is characterized by dryness and heat of the skin, a quick, frequent pulse, insomnia, fatigue, a dry and pasty tongue, and general malaise. [Bailly, (a, 34).]—**F. de lait (des accouchées).** See *Milk* FEVER.—**F. de lait maligne.** Of Leroy, a form of puerperal fever supposed to be due to a metastasis of milk. [A, 89.] —**F. de la Martinique.** See *Yellow* FEVER.—**F. de la moisson.** Gastric fever. [a, 34.]—**F. de Livourne.** See *Yellow* FEVER.—**F. de Macacu.** A pernicious malarial fever of Macacu, Brazil. [a, 34.]—**F. demi-quarte.** A quartan fever in which one of the two days intervening between the paroxysms is marked by a slight paroxysm. [a, 34.]—**F. demi-tierce.** See FEBRIS *semi-tertiana.* —**F. de retour.** A fever that follows, after a few days of apyrexia, in convalescence from typhoid fever. [R. Longuet, "Union méd.," Jan. 5, 1886, p. 13 (a, 34).]—**F. des armées.** See *Camp* FEVER.—**F. des bois.** Pernicious malarial fever among the French in Tonquin. ["Union méd.," June 1, 1886, p. 893, feuilleton (a, 34).] —**F. des camps.** See *Camp* FEVER.—**F. de Siam.** See *Yellow* FEVER.—**F. des jaugeurs de blé.** See *Grain-gaugers'* FEVER.—**F. des jungles.** See *Jungle* FEVER.—**F. des Kollas.** A pernicious intermittent fever observed in Abyssinia. [L, 49 (a, 34).]—**F. des marais.** Swamp fever. [D, 74.]—**F. des navigateurs.** Typhus fever in sailors. [a, 34.]—**F. des Pays-Bas.** The pernicious malarial fever of the Netherlands. [L, 49 (a, 34).]—**F. des prisons.** See *Jail* FEVER.—**F. de surmenage.** A fever, presenting symptoms similar to those of typhoid fever, that occurs in overworked persons. [Rendon, "Rev. gén. de clin. et de thérap.," July 26, 1888, p. 483 (a, 34).]—**F. des vaisseaux.** See *Ship* FEVER.—**F. d'hôpital.** See *Hospital* FEVER.—**F. diaire.** Ephemeral fever. [a, 34.]—**F. pernicieuse ictérique.** Hæmorrhagic malarial fever. [a, 34.]—**F. pernicieuse ictéro-hémorrhagique.** Hæm-

orrhagic malarial fever with jaundice. [a, 34.]—**F. pestilentielle des vaisseaux.** See *Ship* FEVER.—**F. pétéchiale inflammatoire.** Sthenic typhus fever. [a, 34.]—**F. pourpre (ou pourprée).** 1. See *Scarlet* FEVER. 2. Of Buchan, see *Typhus* FEVER.—**F. putride continue.** Of Pugnet, yellow fever. [a, 34.]—**F. putride des Pays-Bas.** The malignant paludal fever of the Netherlands. [L, 132.]—**F. putride des vaisseaux.** See *Ship* FEVER.—**F. quarte.** See *Quartan intermittent* FEVER.—**F. redoublée.** Intermittent fever in which two attacks instead of one occur for each period, but on consecutive days. [D, 72.]—**F. rémittente lente.** Of Burserius, probably typhoid fever.—**F. rémittente maligne (ou nerveuse).** Of Burserius, typhus fever. [a, 34.]—**F. rémittente soporeuse.** Of Burserius, probably typhoid fever. [a, 34.]—**F. rouge.** Scarlet fever. [A, 523.]—**F. splénique.** 1. See FEBRIS *quartana splenetica.* 2. See *Contagious* ANTHRAX.—**F. stomacale.** Of Bordeu, gastritis. [a. 34.]—**F. thermique continue.** See *Typho-malarial* FEVER.—**F. tierce.** A tertian intermittent fever. [A, 523.]—**F. typhoïde adynamique.** Typhoid fever in its adynamic form. [D, 72.]—**F. typhoïde anomale.** Enteric fever presenting during its course symptoms of other diseases. [a, 34.]—**F. typhoïde des anciens.** A fever symptomatic of bilious inflammation. [a, 34.]—**F. typhoïde des tropiques (ou palustre).** See *Typho-malarial* FEVER.—**F. vaccinale.** The fever of vaccinia. [D, 74.]—**F. vésicatoire.** See PEMPHIGUS.—**F. vitulaire.** Puerperal fever in cows. [a, 34.]

FIÈVREUX (Fr.), adj. Fe-e²v-ru⁵. Feverish.

FIFEL, n. The *Areca catechu.* [B, 121 (a, 24).]

FIFI, n. In Provence, the *Mentha pulegium.* [B, 121 (a, 24).]

FIFLEF, n. Probably the *Potentilla reptans* [A, 505 (a, 21).]

FIG, n. Fi²g. Gr., σῦκον. Lat., *ficus* [U. S. Ph., Br. Ph.]; in the pl., *caricæ* [Austr. Ph., Belg. Ph., Ger. Ph. (1st ed.), Gr. Ph., Swiss Ph.]. Fr., *figue* [Fr. Cod.]. Ger., *Feige.* It., *fico.* Sp., *higo.* 1. The dried fleshy receptacle of *Ficus carica* and other allied species of *Ficus.* 2. The *Mesembryanthemum crystallinum.* [B, 19, 88; L, 77.]—**South American laurel-leaved f.-tree.** See FICUS *americana.*—**Adam's f.-tree.** Fr., *figuier d'Adam.* The *Musa paradisiaca.* [B, 275 (a, 24).]—**Angelic f's.** The fruit of *Ficus lutea.* [B, 173.]—**Balsam f. of the West Indies.** The *Clusia rosea* and other species of *Clusia.* [B, 275 (a, 24).]—**Barbary f.-tree.** The *Opuntia vulgaris.* [B, 275 (a, 24).]—**Bastard f.-tree.** The genus *Opuntia.* [B, 275 (a, 24).]—**Black f.** See FICUS *laurifolia.*—**Broad-leaved f.** See FICUS *pedunculata.*—**Cluster-f.** See FICUS *glomerata.*—**Common f.-tree.** The *Ficus carica.* [B, 275 (a, 24).]—**Country f.-tree.** The *Ficus racemosa.* [B, 172 (a, 24).]—**Creeping dwarf-f.** The *Ficus repens,* var. *minima.* [B, 275 (a, 24).]—**Cyprus f.** The *Ficus cyprica.* [B, 307 (a, 24).]—**Devil's f.** The *Ficus infernalis* and *Argemone mexicana.* [B, 275, 307 (a, 24).]—**Dwarf-f.** The genus *Chamæficus.* [B, 307 (a, 24).]—**Early blue f.** The *Ficus nigra* (seu *præcox*). [B, 307 (a, 24).]—**Egyptian f.** See FICUS *sycomorus.*—**Eleme f's.** A term applied to dried figs; probably a corruption of the Turkish *ellémé,* signifying hand-picked. [L, 78 (a, 21).]—**Fat f's.** See *Smyrna f's.*—**F. coffee.** A brown substance having a bitter taste and containing white seeds, prepared from roasted f's; much used in southern Germany, whither it is exported in large quantities from the Tyrol. [Loebisch (A, 319 [a, 21]).]—**F. of hell.** See FICUS *infernalis.*—**F. of the Christian.** Ar., *kermous-el-Nesara.* In the East, the fruit of *Opuntia vulgaris.* ["Proc. of the Am. Pharm. Assoc.," xxii (a, 14).]—**F.-tree.** See FICUS (2d def.).—**F'wort.** See the major list.—**Hottentot's f.** The *Mesembryanthemum edule.* [B, 19 (a, 24).]—**Indian f.-tree.** 1. The *Ficus indica.* 2. A popular name for the *Opuntia vulgaris.* [A, 511; B, 19, 275 (a, 24).]—**Infernal f.** Fr., *figue infernale.* See ARGEMONE *mexicana.*—**Jamaica f.-tree.** The *Ficus laurifolia.* [B, 282 (a, 24).]—**Keg-f. of Japan.** The *Diospyros kaki.* [B, 275 (a, 24).]—**Laurel-leaved South American f.** See FICUS *americana.*—**Mangrove f.** The *Rhizophora mangle.* [B, 275 (a, 24).]—**Marseilles f's.** F's derived from *Ficus candida.* [B, 173 (a, 24).]—**Oily f's.** See *Angelic f's.*—**Pharaoh's f.** See FICUS *sycomorus.*—**Poplar-leaved f.** See FICUS *religiosa.*—**Pulp of f's.** See *Pulpa* FICORUM (under FICUS).—**Red f.** See FICUS *pedunculata.*—**Sacred f.** See FICUS *religiosa.*—**Small-leaved red f.** The *Ficus pallida.* [B, 282.]—**Small-leaved white f.** See FICUS *americana.*—**Smyrna f's.** Lat., *caricæ pingues.* The largest, most juicy, and sweetest f's; they are distinguished into pulled and flat. [L, 130 (a, 21).]—**Sycamore f.-tree.** The *Ficus sycomorus.*—**Tongue f.** See FICUS *aspera.*—**Turkey f's.** See *Smyrna f's.*—**West Indian laurel-leaved f.-tree.** The *Ficus laurifolia.* [B, 275 (a, 24).]—**White f.** See FICUS *americana.*—**Wild f.** The genus *Caprificus.* [B, 307 (a, 24).]—**Wild West Indian f.** The *Clusia flava.* [B, 275 (a, 24).]—**Willow-leaved f.** See FICUS *pedunculata.*

FIGL, n. In Egypt, the genus *Rhaphanus.* [B, 121 (a, 24).]

FIGLUC (Ar.), n. The *Pistachia vera.* [B, 121 (a, 24).]

FIGO D'ANTIBO, n. In Provence, the genus *Opuntia.* [B, 121 (a, 24).]

FIGOULEIROU, n. In Languedoc, the *Arum maculatum.* [B, 121 (a, 24).]

FIGUE [Fr. Cod.] (Fr.), n. Feg. See FIG.—**Décoction de f's.** See *Decoctum* CARICARUM, in Supplement.—**F. angélique.** See *Angelic* FIGS.—**F. bacove, F. banane.** The *Musa sapientium* or its fruit. [B, 121, 173 (a, 24).]—**F. caque.** The fruit of *Diospyros kaki.* [B, 121, 173 (a, 24).]—**F. de Barbarie.** The fruits of *Opuntia vulgaris, Opuntia ficus indica,* and other species. [B, 121 (a, 24).]—**F. de Bordeaux.** The fruit of *Ficus carica,* var. *pyriformis.* [B, 173 (a, 24).]—**F. d'enfer.** The *Jatropha curcas* or its fruit. [B, 121, 173 (a, 24).]—**F. d'Espagne.** The fruit of *Cactus opuntia* (*Opuntia vulgaris*) and its varieties. [B, 121, 173 (a, 24).]—**F. de Surinam.** The fruit of *Cecropia peltata.* [B, 121 (a, 24).]—**F. d'Inde.** The fruits of *Opuntia vulgaris* and of *Opuntia ficus indica.* [B, 121 (a. 24).]—**F. grasse.** See *F. angélique.*—**F. gyrolle.** Of Paulet, an agaric. [B, 121 (a, 24).]—**F. infernale.** See ARGEMONE *mexicana.*—**F. marine.** The *Mesembryanthemum edule.* [B, 121, 173 (a, 24).]—**F. marseillaise.** See *Marseilles* FIGS.—**F. poison.** The fruit of *Ficus padana.* [B, 121, 173 (a, 24).]—**F. violette.** The fruit of *Ficus violacea.* [B, 173 (a, 24).]

FIGUEIRINHA (Port.), n. Fe-ga-e-ren'ya³. In Brazil, the *Inga cochliocarpus.* [B, 88 (a, 14).]

FIGUIER (Fr.), n. Fe-ge-a. See FICUS (3d def.).—**Feuille de f.** A deep groove on the inner surface of the parietal bone. [L, 41.]—**F. anthelmintique.** See FICUS *anthelminthica.*—**F. à petit fruit.** See FICUS *arbutifolia.*—**F. bananier.** See BANANIER *figuier.*—**F. blanc.** See FICUS *candida.*—**F. carica, F. commun, F. cultivé.** See FICUS *carica.*—**F. d'Adam.** The *Musa paradisiaca.* [B, 121, 173 (a, 24).]—**F. de Barbarie.** The *Opuntia ficus tuna.* [B, 173 (a, 24).]—**F. d'Egypte.** The *Ceratonia siliqua.* [B, 121, 173 (a, 24).]—**F. de l'Île-de-France.** See FICUS *mauritiana.*—**F. de l'Inde.** See FICUS *indica.*—**F. d'enfer.** The *Jatropha curcas.* [B, 121 (a, 24).]—**F. des Hottentotes.** The *Mesembryanthemum edule.* [B, 121, 173 (a, 24).]—**F. de Pharaon.** See FICUS *sycomorus.*—**F. des Îles.** The *Carica papaya.* [B, 121, 173 (a, 24).]—**F. des Indes.** The *Musa paradisiaca* and various species of *Opuntia.* [B, 121, 173 (a, 24).]—**F. des marais.** The FICUS *paludosa.* [B, 173 (a, 24).]—**F. des nègres.** The *Carica papaya.* [B, 121, 173 (a, 24).]—**F. des pagodes.** See FICUS *religiosa.*—**F. de Surinam.** The *Cecropia peltata.* [B, 121, 173 (a, 24).]—**F. des teinturiers.** See FICUS *tinctoria.*—**F. d'Inde.** The *Opuntia ficus indica.* [B, 121, 173 (a, 24).]—**F. du Bengale.** See FICUS *bengalensis.*—**F. élastique.** See FICUS *elastica.*—**F. elliptique.** See FICUS *elliptica.*—**F. infernal.** See ARGEMONE *mexicana.*—**F. jaune.** The *Ficus lutea.* [B, 173 (a, 24).]—**F. maudit.** The *Clusia rosea.* [B, 121, 173 (a, 24).]—**F. pyriforme.** See FICUS *pyriformis.*—**F. rameux.** See FICUS *racemosa.*—**F. sans épiderme.** See FICUS *glumosa.*—**F. sauvage.** The wild variety of *Ficus carica.* [B, 173 (a, 24).]—**F. septique.** See FICUS *septica.*—**F. sycomore.** See FICUS *sycomorus.*—**F. toka.** See FICUS *toka.*—**F. vénéneux.** 1. The *Ficus padana.* 2. The *Hippomane mancinella.* [B, 121, 173 (a, 24).]—**F. verruqueux.** See FICUS *verrucosa.*—**F. violet.** See FICUS *violacea.*

FIGUIERO, n. In Provence, the fig (*Ficus carica*). [B, 121 (a, 24).]

FIGUIEYRA, n. In Languedoc, the fig-tree. [B, 121 (a, 24).]

FIGUR (Ger.), n. Fe-gur'. See FIGURE.—**Asterf'.** See *Polar* FIGURE.—**Chromatinhaltige Fadenf', Chromatische F.** (oder **Kernf'**). See *Chromatin* FIGURE.—**Erste Knäuelf', Fadenf'.** See SPIREM.—**Karyokinetische F.** (oder **Kernf'**), **Kernf', Kerntheilungsf'.** See *Nuclear* FIGURE.—**Knäuelf'.** See SPIREM.—**Mitotische Kernf'.** See *Kinetic* FIGURE.—**Polare Strahlungsf'.** See *Polar* FIGURE.—**Purkinje's Kreuzspinnengewebef'.** See *Purkinje's* (*cross-cobweb*) FIGURE.—**Richtungsf'.** See *Achromatic* FIGURE.—**Sonnenf'.** See *Polar* FIGURE.—**Spindelf'.** See *Achromatic* FIGURE.—**Sternf'.** See *Star* FIGURE.—**Strahlenf'.** See *Polar* FIGURE.—**Theilungsf'.** See *Kinetic* FIGURE.—**Y-F.** See *Ypsiliform* FIGURE.

FIGURA (Lat.), n. f. Fi²g-u²(u)'ra³. See FIGURE.—**F. venosa.** See SINUS *terminalis.*

FIGURATE, adj. Fi²g'u²r-at. Lat., *figuratus* (from *fingere,* to shape). Fr., *figuré* [Buffon]. Ger., *ausgebildet.* Having a definite and fixed shape which is always the same in the same species of plant or animal (said of anatomical elements); of a cutaneous eruption, arranged in a definite shape. [A, 301; B, 198.]

FIGURE, n. Fi²g'u²r. Gr., σχῆμα. Lat., *figura* (from *fingere,* to touch, shape, fashion). Fr., *f.* Ger., *Figur.* It., Sp., *figura.* The outline of an organ or part. [B, 1 (a, 24).]—**Achromatic (spindle-) f., Achromatin f.** Ger., *achromatische Figur* (oder *Kernfigur*). A spindle shaped or cylindrical f. formed by achromatic fibrils in a dividing cell. The filaments traverse the nucleus, and the daughter-nuclei are finally formed at the outer or polar ends of the filaments. [J, 64. 124.] Cf. *Nuclear* SPINDLE and *Achromatic* FIBRILS.—**Bistellate f.** See AMPHIASTER.—**Chladni's f's.** F's found in sand or other loose material strewn upon vibrating plates. Since the plates contain certain nodal lines, or lines of no vibration, the sand which is displaced from other portions of the plate by the vibration will tend to accumulate at the nodal lines, the f's so formed being hence called *nodal f's.* [B.]—**Chromatic (nuclear) f., Chromatin f.** Fr., *f. chromatique.* Ger., *chromatische Figur, chromatinhaltige Fadenfigur.* Of Flemming, any one of the various forms or f's assumed by the chromatic fibrils of a nucleus during caryocinetic division. [J, 64, 124.] Cf. *Nuclear f.* and *Nuclear* SPINDLE.—**Coiled f.** See CONVOLUTION.—**Division f.** See *Nuclear f.*—**Eberth's f's.** Sheaths for intracellular nerve-terminations in the cutaneous epithelium of tadpoles; supposed by Eberth to be nerve terminations. ["Quart. Jour. of Micr. Sci.," 1886 (J).]—**F. cinétique** (Fr.). See *Nuclear f.*—**F. croisée à toile d'araignée** (Fr.). See *Purkinje's* (*cross-cobweb*) *f.*—**Kinetic f.** See *Nuclear* (*spindle*) *f.*—**Lichtenberg's f's.** F's produced on a resinous or vulcanite cake which is charged in succession with the knob and with the outer coating of a positively electrified Leyden jar. The f's are rendered evident by throwing upon the cake a mixture of red lead and sulphur, when the latter will attach itself to the positively-electrified and the former to the negatively-electrified lines traced upon the plate. [B, 21.]—**Magnetic f's.** The f's produced in a layer of iron-filings held in the vicinity of a magnet. [B.]—**Mitotic f.** See *Nuclear* (*spindle*) *f.*—**Nodal (sound) f's.** See *Chladni's f's.*—**Nuclear (spindle, or division) f.** Fr., *f. cinétique.* Ger., *Kernfigur, mitotische* (oder *karyokinetische*) *Kernfigur, Kerntheilungsfigur, Theilungsfigur, Kernspindelfigur.* 1. Of Flemming, any one of the phases which a nucleus assumes during indirect or caryocinetic division. The set of appearances produced by the achromatic fibrils is known as the achromatic f., and by the chromatin as the chromatic f. 2. Of

Strassburger, the middle or spindle stage of indirect nuclear division. ["Arch. f. mikr. Anat.," xviii, 1880, p. 156 (J, 64, 89, 140, 175).] Cf. *Nuclear* SPINDLE.—**Polar f.** Ger., *Kernpol, Polstrahlung, Sonnenfigur, Asterfigur, Strahlenfigur, Polarstrahlung.* The points or poles in the dividing cell which are ultimately occupied by the daughter-nuclei. The achromatic fibrils converge at these poles, and in ova there is often a radiate appearance (polar sun) around them. [J, 32; "Quart. Jour. of Micr. Sci.," 1878, p. 215 (J).] See CYTASTER.—**Primary nuclear f.** Ger., *erste Knäuelfigur.* See SPIREM.—**Purkinje's (cross-cobweb) f.** Fr., *arbre vasculaire* (ou *f. croisée à toile d'araignée*) *de Purkinje.* Ger., *Purkinje's Kreuzspinnengewebefigur, Purkinje'sche Aderfigur.* The image (shadow) of the retinal blood-vessels of one's own eye, perceived when a concentrated light is directed obliquely into the eye and the source of the light is moved. [A, 429; Helmholtz, "Encyc. d. Physik," ix, p. 156.]—**Radiating f., Ray f.** See *Polar f.*—**Star f., Stellate f.** Ger., *Sternfigur.* See ASTER, AMPHIASTER, DIASTER, and MONASTER.—**Thread-f.** See *Chromatic f.* and *Nuclear f.*—**Ypsiliform f., Y-shaped f.** Fr., *f. ypsiliforme.* Ger., *Y-Figur.* Of Van Beneden, the peculiar form acquired by the germinal vesicle of *Ascaris megalocephala* preparatory to throwing off the extrusion globule. It is supposed by some authors to be only a special form of the nuclear spindle (*i. e.*, a division at the upper pole). ["Arch. f. mikr. Anat.," xxx, p. 149 (J); J, 124, 187.]

FIGURÉ (Fr.), adj. Fe gu^6-ra. See FIGURATE.

FIGWORT, n. Fi^{2}g'wu^{5}rt. Ger., *Feigenkraut.* The genus *Scrophularia* and the *Ranunculus ficaria;* in the pl., *f's*, the *Scrophulariaceæ.* [A, 505 (a, 21); B, 19, 275, 307 (a, 24).]—**Balm-leaved f.** The *Scrophularia scorodonia.* [B, 275 (a, 24).]—**Barbary f.** The *Scrophularia mellifera.* [B, 275 (a, 21).]—**Cape f.** The *Phygelius capensis.* [B, 275 (a, 24).]—**F. family.** The *Scrophulariaceæ.* [a, 24.]—**Knot-rooted f.** The *Scrophularia nodosa.* [B, 97 (a, 21).]—**Water-f.** The *Scrophularia aquatica.* [B, 97 (a, 21).]—**Yellow-flowered f.** The *Scrophularia vernalis.* [B, 275 (a, 24).]

FIJI, n. In Japan, the *Wistaria sinensis.* [B, 275 (a, 24).]

FIJJIL, n. In Morocco, the *Rhaphanus sativa.* [B, 121 (a, 24).]

FIL (Fr.), n. Fel. See FILUM.—**F's achromatiques, F's connectifs.** See *Achromatic* FIBRILS.—**F. d'araignée.** A term for various species of *Sempervivum.* [B, 173 (a, 24).]—**F. de Florence.** Silkworm gut. [A, 385.]—**F. de mer.** The *Chorda filum.* [B, 121 (a, 24).]—**F. galvano-caustique.** See ANSA *galvanocaustica.*—**F. induit.** The wire by which an induced electrical current is conveyed. [a, 27.]—**F. inducteur.** The wire by which an inducing electrical current is conveyed. [a, 27.]

FILACEOUS, adj. Fi^{2}l-a'shu^{3}s. From *filum*, a thread. Furnished with a great number of filaments (said of roots). [L, 94 (a, 21).]

FILÆRA, n. f. Fil(fel)-e'(a^3'e^2)-ra^3. The *Eupatorium cannabinum.* [A, 505 (a, 21)]

FILAGO (Lat.), n. f. Fi(fe)-la(la^3)'go. Gen., *-a'ginis.* Perhaps from *filum*, a thread. Fr., *cotonnière, filage, filagine.* Ger., *Filzkraut.* The cotton-rose; of Cassini, a section of the genus *Evax;* of Gärtner, a section of the genus *Gnaphalium;* of Linnæus, a genus of the *Compositæ*, tribe *Inuloideæ.* The *Filagineæ* are: of Cassini, a division of the *Inuleæ Archetypæ;* of Fenzl, a subdivision of the *Cassinieæ;* and of Bentham and Hooker, a subtribe of the *Inuloideæ.* The *Filaginoideæ* of Schrank are a division of composite plants, of the *Gnaphaloideæ.* [B, 19, 34, 42, 121, 170 (a, 24).]—**F. arvensis.** The *Gnaphalium arvense.* [B, 214 (a, 24).]—**F. cæspitosa.** The *F. germanica.* [B, 214 (a, 24).]—**F. germanica.** Downweed, cudwort, owl's crown; a species found in Persia, Europe, and North America. The herb (*herba filaginis* [seu *impiæ*]) was once used as an astringent. [B, 42, 180, 275 (a, 24).]—**F. leontopodium.** The *Gnaphalium leontopodium.* [B, 214 (a, 24).]—**F. maritima.** See DIOTIS *candidissima.*—**F. minima.** Filewort, the commonest British species; astringent. [B, 19, 275 (a, 24).]—**F. montana.** The *Gnaphalium montanum.* [B, 214 (a, 24).]—**F. paniculata.** The *F. arvensis.* [B, 214 (a, 24).]—**F. pygmæa.** The pigmy cotton-rose, a species growing in Europe; usually found where the soil is moist. [a, 24.]—**F. rotundata, F. vulgaris.** See *F. germanica.*

FILAIRE (Fr.), n. Fe la^{2}r. See FILARIA.—**F. de l'œil.** See FILARIA *oculi.*—**F. de Médine.** See FILARIA *medinensis.*—**F. du cheval.** See FILARIA *papillosa.*—**F. du sang.** See FILARIA *sanguinis.*—**F. hématique.** See FILARIA *immitis.*—**F. sous-conjonctival.** See FILARIA *conjunctivæ.*

FILAMENT, n. Fi^{2}l'a^2-me^{2}nt. Lat., *filamentum* (from *filum*, a thread). Fr., *f.* Ger., *Fäserchen* (1st def.), *Staubfaden* (2d def.), *Staubträger* (2d def.), *Fädchen* (2d def.). 1. Any thread-like body or slender fibre. 2. In botany, the stalk which supports the anther. [B, 19, 77, 291 (a, 24).]—**Achromatic f's.** See *Achromatic* FIBRILS.—**Appendiculate f.** A f. (2d def.) having scaly appendages at its base. [B, 77 (a, 24).]—**Bipolar f's.** Fr., *f's bipolaires* (ou *reunissants*), *fils connectivs.* Ger., *Verbindungsfäden, Spindelfasern.* Fibrils of achromatic substance extending between the two poles of the nuclear spindle and forming the achromatic figure. When the daughter-nuclei are separating, the remnants of these fibrils serve for a while to bridge the space between them. [J, 30, 64, 175.] Cf. *Achromatic* FIBRILS.—**Chromatic f's.** See *Nuclear* FIBRILS.—**Cleft nuclear f's.** Ger., *Zwillungsfäden, Zwillungssegmente.* The longitudinally divided nuclear fibrils seen in caryocinesis just before the fibrils are arranged into sets to form the daughter-nuclei. ["Arch. f. mikr. Anat.," 1879-1884 (J).]—**F's axile des tubes nerveux** (Fr.). See AXIS-*cylinder.*—**F. coudé** (Fr.), **F. dodu** (Fr.). Two varieties of mico-organisms found by Duclaux in the process of formation of cheese along with other forms called *f. effilé, f. granuleux*, and *f. ténu.* [B, 30.]—**F. d'œil** (Fr.). See *Muscæ volitantes.*—**F's divergents** (Fr.). Of Gall, the fibres of the corona radiata. [I.]—**F's d'union** (Fr.). Ger., *Intercellularbrücken.* Of Ranvier, the protoplasmic processes connecting cells, especially prickle-cells. [J, 31.]—**F. effilé** (Fr.). See under *F. coudé.*—**F. fécondateur** (Fr.). See SPERMATOZOOID.—**F. granuleux** (Fr.). See under *F. coudé.*—**F's intranucléaires** (Fr.). See *Achromatic* FIBRILS.—**F's noueux** (Fr.). See *F's divergents.*—**F. nucléerien** (Fr.). See *Uncolored* DISC.—**F. nucléinien** (Fr.). Of Carnoy, a term for the fibrils in the nucleus of cells. He assumes the existence of but a single f., wound in a complicated manner. [J, 15.] See *Nuclear* FIBRILS.—**F's of Müller.** See FIBRES *of Müller.*—**F's sortants** (Fr.). See *F's divergents.*—**F. spermatique** (Fr.). See SPERMATOZOOID.—**F. suspenseur d'embryon.** See SUSPENSEUR.—**F. ténu** (Fr.). See under *F. coudé.*—**F. testiculaire** (Fr.). See SPERMATOZOOID.—**Moving f's of Needham.** The spermatophores of the *Cephalopoda.* [L, 147, p. 325.]—**Nuclear f's, Nucleoplasmic f's.** See *Nuclear* FIBRILS.—**Olfactory f's.** See *Olfactory* HAIRS.—**Protoplasmic f.** A f. or fibril of protoplasm; a fibril in the cell-body, in contradistinction to one in the nucleus. ["Jour. of Morph.," i, p. 250 (J).]—**Purkinje's f's.** See FIBRES *of Purkinje.*—**Seminal f., Spermatic f.** See SPERMATOZOOID.—**Terminal f.** Lat., *filum terminale.* Fr., *fil* (ou *filet*) *terminal.* Syn.: *central ligament of the spinal cord.* The delicate process which forms the inferior termination of the spinal cord. Its upper half consists of gray matter covered by pia. At its lower end it is made up of a bundle of connective-tissue fibres, inclosing blood-vessels, and fine medullary nerve-fibres. It is attached to the back of the coccyx. [I, 29; K.]—**Unipolar f's.** Fr., *f's unipolaires.* Ger., *Polstrahlung.* Syn.: *polar rays, cytaster.* The radiating, star-like or sun-like rays of achromatin or specialized cell protoplasm, extending from the poles of a nuclear spindle or amphiaster. [J, 83.]

FILAMENTARY, adj. Fi^{2}l-a^2-me^{2}nt'a-ri^2. See FILAMENTOUS.

FILAMENTOSA (Lat.), n. f. Fil(fel)-a^3-me^{2}nt-o'sa^3. From *filamentum*, a filament. 1. See ENAMEL. 2. In the pl., *Filamentosæ*, of Scopoli, a genus of the *Incompletæ.* [B, 170 (a, 24).]

FILAMENTOSE, FILAMENTOUS, adj's. Fi^{2}l-a^2-me^{2}nt'os. -u^{3}s. Lat., *filamentosus* (from *filamentum*, a filament). Fr., *filamenteux.* Ger., *fadig, faserig.* 1. Filiform. 2. Composed of filaments. [B, 121, 123 (a, 24); J.]

FILAMENTUM (Lat.), n. n. Fil(fel)-a^3-me^{2}nt'u^{3}m(u^{4}m). From *filum*, a thread. 1. A filament. 2. A filiform and viscid urinary deposit. 3. In the pl., *filamenta*, of Marsili, the mycelium of *Fungi.* [B, 121 (a, 24); L, 94 (a, 21).]—**Filamenta fibrosa.** Of Bergmann, the superficial fibres in the recess between the middle and anterior peduncles of the cerebellum. [I, 30.]—**Filamenta lateralia cerebelli.** The fibrous appearance in the prepeduncular fossa, between the anterior and middle peduncles. [I.]—**Filamenta nervea foveæ acusticæ inferioris.** Delicate medullary fibres sometimes seen in the inferior acoustic fovea. [L, 7 (a, 29).]—**F. nerveum.** See NERVE-FIBRES.—**Filamenta noduli perpendicularia.** Of Bergmann, the fibrous appearance at the sides of the nodulus of the cerebellum. [I, 30.]—**Filamenta pontis lateralia.** See TÆNIA *pontis.*—**F. terminale.** See *Terminal* FILAMENT.

FILANDRE (Fr.), n. Fe-la^{3}n^2-dr'. A string of detached or dead tissue. [A, 301.]

FILANDREUX (Fr.), adj. Fe-la^{3}n^2-dru^3. 1. Stringy, filamentous. [A, 301.] 2. In botany, fibrous. [a, 24.]

FILANGA, n. In Madagascar, the seed of *Cæsalpinia bonducella*, used as dice. [B, 173 (a, 24).]

FILAO, n. The *Casuarina.* [B, 121 (a, 24).]

FILARIA (Lat.), n. f. Fil(fel)-a(a^3)'ri^2-a^3. From *filum*, a thread. Fr., *filaire.* Ger., *F.* It., Sp., *f.* 1. Of Müller, a genus of the *Filaridæ;* of Rudolphi, a genus of the *Nematoidea.* 2. In botany, the genus *Phillyrea.* The *Filariadæ*, or *Filaridæ* (Fr., *filariens*), are a parasitic order or family of the *Nematoda*, characterized by a filiform body, smooth or transversely striated, a round or triangular mouth, surrounded by papillæ, a head continuous with the body, and an anus terminable or nearly so. [B, 121 (a, 24); L, 16, 27.]—**F. ægyptiaca** [Sonsino]. See BILHARZIA *hæmatobia.*—**F. Bancrofti.** See *F. medinensis.*—**F. bronchialis** [Rudophi]. Fr., *filaire bronchial.* A species about 27 mm. long, of a dark-brown color spotted with white, and having a semi-transparent posterior end; found in the enlarged bronchial glands of a patient dead of phthisis. [A, 319 (a, 21); L, 340.]—**F. conjunctivæ.** Fr., *filaire sous-conjonctivale* (ou *de l'œil*). Ger., *Fadenwurm des Augapfels.* A species found under the conjunctivæ of negroes in Africa, and possibly in America. It is about 30 mm. in length, and of the diameter of a small violin-string. It resembles a varicose vein, and sometimes causes intense pain. [F; T. G. Morton, "Am. Jour. of the Med. Sci.," lxxiv, 1877, p. 113; R. Blanchard, "Prog. méd.," July 17, 1886, p. 591; L, 17, 340.]—**F. cystica.** The sexually immature *Eustrongylus gigas.* [L, 24.]—**F. dermathemica** [O'Neile]. A species probably identical with *F. medinensis.* [G.]—**F. Disticl marginalis.** See GORDIUS *aquaticus.*—**F. dracunculus.** See *F. medinensis.*—**F. equi** [Gmelin]. See *F. papillosa.*—**F. Evansi.** A species discovered in the camel by Griffith Evans; the brood in the general circulation, and the parental form in the vessels of the lungs and mesentery. The embryonal form is indistinguishable from that of the f. sanguinis hominis, but the mature form differs from the human parasite in size and structure. ["Indian Med. Gaz.," April, 1882.]—**F. Grylli.** See GORDIUS *aquaticus.*—**F. hominis bronchialis.** See *F. bronchialis.*—**F. hominis oris.** A species found in the mouth of a child; probably accidental, and an immature form of some known species. [L, 24.]—**F. immitis.** Fr., *filaire hématique.* A viviparous species found frequently in the right ventricle of the dogs of eastern Asia. It passes into the blood, where its development is arrested. [B, 206 (a, 27); L, 17.]—**F. labialis.** A thread-like, cylindrical species 30 mm. long, with four papillæ surrounding the mouth in a cru-

cial form, a slender head, a blunt tail, and the vaginal aperture near the anal. Males are not known. Found in one case (in Naples) in a pustule of the upper lip. [A, 319 (α, 21); L, 24, 340.]—**F. lacrimalis.** See *F. conjunctivæ.*—**F. lentis** [Diesing]. Fr., *filaire du cristallin.* Ger., *F. der Linse.* A species the female of which has been found in several instances in cataractous lenses. It is from 1 to 3 mm. long, is coiled spirally, and is probably the immature form of some known species. The term has also been applied to a nematode found in a similar location, but which is probably a species of *Trichosoma.* [L, 16, 340.]—**F. Loa** [Guyot]. See *F. conjunctivæ.*—**F. locustæ.** See GORDIUS *aquaticus.*—**F. lymphatica.** See STRONGYLUS *bronchialis.*—**F. medinensis.** Fr., *filaire* (ou *veine*) *de Médine* (ou *de Guinée*), *ver de Guinée* (ou *cutanée des marchais*), *dragonneau.* Ger., *Medinawurm, Fadenwurm, Hautwurm, Beinwurm, Pharaohswurm, Guineawurm, medinensischer* (oder *guineischer*) *Fadenwurm.* Sp., *dragoncillo.* Pers., *pejunk, naru.* Hind., *narambo, narapoo chalandy.* 1. The Guinea worm; an animal parasite of the human body indigenous to the western coast of Africa, to Guinea, Senegal, India, Arabia, Persia, Egypt, and occasionally elsewhere. The female alone is known, and is from 1 to 12 feet in length, $\frac{1}{16}$ inch in diameter, cylindrical throughout its length, with a flat head, a blunt tail, and an oral aperture surrounded by four crucially placed papillæ. Its seat is in the subcutaneous cellular tissue in various parts of the body, most commonly of the feet or legs. Formerly it was supposed that it gained entrance to the skin by boring from without; but, according to late authorities, the parasite is introduced into the system probably by drinking impure water containing minute *Crustacea,* in which the embryos of the filaria pass through the larval state. From the alimentary canal the young worm is supposed to make its way to the cellular tissue. By some its parasitism is regarded as accidental. The presence of the worm in the skin manifests itself by the production of a painful tumor, blister, or furuncle. Sometimes severe inflammation, with ulceration or gangrene, occurs, accompanied with constitutional disturbance. It is supposed to be the fiery serpent which attacked the Israelites in the vicinity of the Red Sea (Numb., xxi, 6). 2. The disease caused by the *F. medinensis.* [Tenekart, "Mensch. Parasit.," xi, 1876, p. 284 (J); L.]—**F. oculi.** Fr., *filaire de l'œil.* Ger., *F. des Auges.* 1. Of Van Beneden, see *F. conjunctivæ;* of Owen, see *F. lentis.* 2. A species found in the aqueous humor in horses. [J. Mills, "Vet. Jour.," quoted in "Am. Vet. Rev.," Feb., 1886, p. 470.] Cf. *F. papillosa.*—**F. oculi humani** [Von Ammon]. See *F. lentis.*—**F. papillosa.** Fr., *filaire du cheval.* A species found in the peritonæum of the horse, donkey, mule, ox, and buffalo, and also in their thoracic cavity and aqueous humor. It is frequently epidemic, and is accompanied by meningitis and paralysis of the posterior legs. [L, 17, 87, 182 (α, 27).]—**F. peritonæi hominis** [Babesin]. A variety about 14 ctm. long, found, in one instance, in the gastro-splenic ligament. [L, 340.]—**F. piscium.** See SPIROPTERA *hominis.*—**F. Salisburyi, F. sanguinis (hominis).** A species indigenous to Brazil, India, eastern and southern Africa, Australia, China, the West Indies, and the Southern States. The adult female and the

FILARIA SANGUINIS (HOMINIS.)

embryos are alone known. The former is 5 to 6 ctm. in length, the body hair-like and of uniform diameter, the neck narrow, the head with a circular oral aperture, and the vulva near the head. They have been found, in several instances, in glandular swellings and in water. The embryos are less than 0·35 mm. long, with a rounded head and sharp tail, and are found in the urine and blood of patients affected with chyluria and hæmaturia. They are said to occur in the blood only at night. Their development is not clear, but it is believed that mosquitoes, in extracting blood from man, ingest at the same time these embryos, which, after becoming somewhat developed, escape into water at the time the mosquitoes deposit their eggs; and then, again entering the alimentary canal of man with the water, pass into the circulation, and thence escape into the connective tissue, where they attain their adult form. [L, 16, 147, 182, 340; W. M. Mastin, "Ann. of Surg.," Nov., 1888, p. 321.]—**F. sanguinis hominis ægyptiaca.** Of Sonsino, the *F. sanguinis hominis* met with in Egypt, afterward considered by him to be identical with the *F. sanguinis hominis.* ["Med. Times and Gaz.," May 13, 1882, p. 494.]—**F. trachealis.** A parasite, about $\frac{1}{16}$ inch in length, found in the trachea and larynx in one case; possibly a species of *Ascaris.* [L, 16.]—**F. Wuchereri.** A species found by Wucherer in Brazil, in 1818, in the urine of persons suffering from hæmaturia, and believed by Lewis to be identical with the *F. sanguinis hominis* described by him. [L, 87 (α, 27).]—**F. zebra.** A supposititious species found in the saphena vein; ascertained to be a blood-clot. [L, 16.]

FILARIAL, adj. Fi^{2}l-a'ri^2-a^{2}l. From *filaria.* Fr., *filarien.* Pertaining to or caused by *Filariæ.*

FILARIASIS (Lat.), n. f. Fi^{2}l(fel)-a(a^3)-ri^2-as(a^{3}s)'i^{2}s. Gen., *-rias'eos* (*-is*). A chronic disease, often terminating in spontaneous recovery, caused by the presence in the system of the *Filaria sanguinis;* characterized by soft tumefaction of the inguinal glands, hæmaturia or chyluria, and the periodical presence of the parasites in the blood. ["Gaz. hebd. de méd. et de chir.," Sept. 7, 1888, p. 572 (α, 34).]

FILARIO, n. In Provence, the *Phillyrea angustifolia.* [B, 121 (α, 24).]

FILARMASSE (Ger.), n. Fel-a^{3}r'ma^{3}s-se^2. See CYTOHYALOPLASMA.

FILASSE (Fr.), n. Fe-la^{3}s. From *filum,* a thread. A bundle of fibres (as of tow, oakum, or the like). [A, 385; B, 121 (α, 24).]—**F. de montagne.** See *Flexible* ASBESTOS.

FILBERT, n. Fi^{2}l'bu^{5}rt. 1. The nut of *Aleurites triloba.* 2. The nut of *Corylus avellana.* [A, 479 (α, 21); B, 34, 77, 173 (α, 24).] See HAZEL.—**Common f.** The nut of *Corylus avellana.* [B, 275 (α, 24).]—**Purging f.** The fruit of *Jatropha multifida.* [B, 180 (α, 24).]—**West Indian f's.** The seeds of *Entada scandens.* [B, 275 (α, 24).]

FILEA (Lat.), n. f. Fi^{2}l(fel)'e^2-a^3. See FILARIA.—**F. dermathemica** [O'Neile]. Probably the *Filaria medinensis.* [G.]

FILELLUM (Lat.), n. n. Fi^{2}l(fel)-e^{2}l'u^{3}m(u^{4}m). See CANIS (3d def.).

FILET (Fr.), n. Fe-la. From *filum,* a thread. 1. The filament of an anther. 2. See FRENUM. 3. A flagellum. 4. Of Vaillant, the filamentous receptacle of certain *Fungi.* [B, 121 (α, 24); E.] 5. See FILLET.—**F. longitudinaux.** The bundles of longitudinal nerve-fibres on the dorsal aspect of the corpus callosum at either side of the rhaphe. [I, 18.]—**F. terminal.** See *Terminal* FILAMENT.

FILETTA (It.), n. Fe-le^{2}t'ta^3. A place in Tuscany, Italy, where there is a thermal mineral spring. [L, 49.]

FILETUM (Lat.), n. n. Fi^{2}l(fel)-et(at)'u^{3}m(u^{4}m). From *filum,* a thread. See FRENUM.

FILEWORT, n. Fil'wu^{5}rt. The *Filago minima.* [A, 505 (α, 21).]

FILEY, n. Fi'li^2. A place in the County of York, England, where there is a cold, saline, mineral spring. [L. 49.]

FILFIL (Ar., Pers.), n. See CAPSICUM and PIPER.—**F. achmar** (Ar.). See CAPSICUM.—**F. burree.** In the East Indies, the fruits of *Vitex trifolia.* [B, 19 (α, 35).]—**F. siah** (Pers.), **F. uswad** (Ar.). See PIPER *nigra.*

FILIATION (Fr.), n. Fe-le-a^3-se-o^{2}n^2. From *filius,* a son. A regular succession, as from father to son; the establishment of a series of conditions each of which, after the first, is rendered possible by the occurrence of one or more of the preceding ones. [A, 385.]

FILICACEÆ (Lat.), n. f. pl. Fi^{2}l-i^2-ka(ka^3)'se^2(ke^2)-e(a^3-e^2). From *filix,* a fern. Of Presl, an order of the *Filicineæ,* comprising the *Helicogyratæ* and *Cathetogyratæ,* and subsequently a subclass of the *Filicineæ,* consisting of the same divisions as before, and, in addition, the *Pleurogyratæ.* The *Filicaceites* of Sternberg are an order of fossil ferns consisting of the *Gleicheniacites, Aspidiaceites, Adiantaceites, Polypodiacites,* etc. The *Filicarieæ* of Dumortier are an order of the *Dermogynæ,* consisting of the *Ophioglossineæ* and *Filices.* The *Filiceæ* are: 1. Of Necker, an order of plants including *Equisetum, Acrostichum,* etc.; of Dumortier, a family of the *Arcania,* including *Pteris,* etc. 2. Of Bridel, a tribe of *Musci,* consisting of the genus *Fissidens.* The *Filices* (Fr., *fougères;* Ger., *Farne, Farren, Farnkräuter, Farrnkräuter, Farrenkräuter*) are: 1. The ferns, one of the principal groups of cryptogams; of Linnæus, a group comprising *Ophioglossum, Osmunda, Pteris, Trichomanes, Adiantum, Lonchitis, Asplenium,* etc., or (Roth) the *Exannulatæ* (*Osmunda* and *Ophioglossum*) and *Annulatæ* (*Onoclea, Polypodium, Pteris,* etc.). The ferns are plants with solid, mostly unbranching, or but sparingly branching, stems, which increase in length by the division of a single apical cell. The leaves are more highly developed than in the other vascular cryptogams; the fibro-vascular bundles are of the concentric type; the sporangeia are always borne on the leaves, either at the margins or on the lower surface, generally in groups or clusters called *sori.* The sporangeia are cellular sacs inclosing usually a considerable number of spores. The ferns are variously classed by modern botanists. In Hooker's system they are divided into the *Gleicheniacheæ, Polypodiaceæ, Osmundaceæ, Schizaceæ, Marattiaceæ,* and *Ophioglossaceæ;* by others into the *Ophioglossaceæ, Marattiaceæ,* and *Polypodiaceæ,* of which the first two, known as pseudo-ferns, have the spore-cases ringless, while the latter, with the spore-cases having a jointed ring, contain the true ferns, and include the greater portion of all the known species. In some modern classifications the *Filices* are a group of the *Filiciniece,* and represent the true ferns. 2. Of Wiggers (1780), an order of cryptogams restricted to the *Epiphyllospermæ,* including *Ophioglossum* and *Osmunda.* The *Filicina* of Batsch are a family of the *Chlorophylla,* comprising *Osmunda, Acrostichum, Asplenium,* etc. The *Filicinæ* of Gleditsch are a class of plants including *Equisetum, Osmunda, Ophioglossum, Pteris, Lonchites, Adiantum, Asplenium, Polypodium, Trichomanes, Blechnum,* etc., or in Perleb's system including the *Diclidopterides, Epiphyllospermæ,* and *Thylacopterides,* or (Leunis) the *Lycopodiaceæ* and *Filices.* The *Filicineæ* are: Of Presl, a class of plants including the *Filicaceæ, Hymenophyllaceæ, Marattiaceæ, Osmundaceæ,* and *Ophioglossaceæ;* of Brongniart, a class of acrogens, including the *Filices, Marsiliaceæ, Lycopodiaceæ, Equiseta-*

ceæ, and *Characeæ*. The *Filicites* of Sternberg are an order of fossil plants, or a tribe of the *Filicaceites*.

FILICAL, adj. Fi2l'i2-ka2l. Lat., *filicalis* (from *filix*, a fern). Fr., *filiciné*. Belonging to the ferns. The f. alliance of Lindley (*Filicales*) consisted at first of *Polypodiaceæ*, *Gleichenieæ*, *Osmundaceæ*, *Danæaceæ*, and *Ophioglosseæ*; subsequently of the *Ophioglossaceæ*, *Polypodiaceæ*, and *Danæaceæ*. [B, 170 (a, 24).]

FILICAULINE, adj. Fi2l-i2-ka4l'i2n. Lat., *filicaulis* (from *filum*, a thread, and *caulis*, a stem). Fr., *filicaule*. Having a filiform stem. [L, 180.]

FILICIC ACID, n. Fi2l-i2s'i2k. From *filix*, a fern. Fr., *acide filicique*. Ger., *Filixsäure*. A light-yellow, nearly insoluble, crystalline powder, $C_{28}H_{36}O_9$, obtained from the ethereal extract of *Aspidium filix mas*. [B, 244 (a, 27).]

FILICIFORM, adj. Fi2l-i2s'i2-fo2rm. See FILICOID.

FILICIN, n. Fi2l'i2-si2n. From *filix*, a fern. Fr., *filicine*. Ger., *F*. 1. The active principle of the root of *Aspidium filix mas*. 2. Of Tromsdorf, filicic acid. [B, 46 (a, 14), 173 (a, 24).]

FILICINÉ (Fr.), adj. Fe-le-sen-a. See FILICAL.

FILICINIC ACID, n. Fi2l-i2-si2n'i2k. See FILICIC ACID.

FILICINUS (Lat.), adj. Fi2l-i2-sin(ken)'u2s(u4s). Fr., *filicin*. Fern-shaped. [L, 180.]

FILICITANNIC ACID, n. Fi2l-i2s-i2-ta2n'i2k. Fr., *acide filicitannique*. Ger., *Filixgerbsäure*. Of Malin (1867), a variety of tannin found in *Aspidium filix mas*. On being boiled with dilute sulphuric acid, it is split into sugar and filix-red. [B, 244 (a, 27).]

FILICOID, adj. Fi2l'i2k-oid. Fr., *filicoïde*. Syn.: *filiciform*. Resembling a fern, or the folioles of a fern (said of the impressions on fossil ferns). The *Filicoideæ* are: Of Wahlenberg, a division of the *Filices*, including *Lycopodium*, *Isoëtes*, *Pilularia*, *Equisetum*, and *Chara*; of Lindley, a division of the *Cellulares*; of Genth, the first family of the *Cryptogamæ*; of Kunth, an order of the *Cryptogamæ*; and of Rabenhorst, an order of the *Chlorophytes*, comprising (Lindley) the *Equisetaceæ*, *Filices*, *Lycopodiaceæ*, and *Marsileaceæ*, or (Genth) the *Equisetinæ*, *Lycopodiaceæ*, *Ophioglosseæ*, *Osmundaceæ*, *Polypodiaceæ*, *Rhizocarpeæ*, and *Characeæ*, or (Kunth) the *Filices*, *Lycopodiaceæ*, *Equisetaceæ*, and *Hydropterides*, or (Rabenhorst) the *Filices*, *Lycopodiaceæ*, and *Equisetaceæ*. The *Filicoidei* of Bridel are a single family of the *Entophyllocarpi*, comprising *Schistostega*, etc. [B, 1, 19, 34, 121, 170, 173, 180, 291 (a, 24).]

FILICOLOGY, n. Fi2l-i2k-o2l'o-ji2. From *filix*, a fern, and λόγος, understanding. The botany, etc., of ferns. [B, 19 (a, 24).]

FILICORNIS (Lat.), adj. Fi2l(fel)-i2-ko2rn'i2s. From *filum*, a thread, and *cornu*, a horn. Fr., *filicorne*. Having long, slender antennæ. The *Filicornæ* (Fr., *filicornées*) are: Of Lamarck, a family of the *Coleoptera*; of Latreille, a family of the *Neuroptera*; of Duméril, a family of the *Lepidoptera*. [A, 301, 385; L, 180.]

FILICULA (Lat.), n. f. Fi2l-i2k'u2l(u4l)-a2. Dim. of *filix*. Fr., *filicule*. Of Tournefort, the genus *Cystopteris*. [B, 121 (a, 24).]—**F. dulcis.** In old pharmaceutical works, the *Polypodium vulgare*. [B, 121 (a, 24).]

FILICULE (Fr.), n. Fe-le-ku6l. See FILICULA.—**F. frêle.** The *Aspidium fragile*. [B, 173 (a, 24).]

FILIÈRE (Fr.), n. Fe-le-e2r. From *filum*, a thread. Ger., *Maasstab* (2d def.). 1. See SPINNERET. 2. A catheter gauge, consisting of a plate pierced with numerous circular apertures of varying diameter. [L, 180, 216; a, 34.]

FILIFEROUS, adj. Fi2l-i2f'e2r-u2s. Lat., *filiferus* (from *filum*, a thread, and *ferre*, to bear). Fr., *filifère*. Bearing filaments. [L, 180.]

FILIFOLIUS (Lat.), adj. Fi2l(fel)-i2-fol(fo2l)'i2 u2s(u4s). From *filum*, a thread, and *folium*, a leaf. Having filiform leaves. [B.] See ARTEMISIA *filifolia*.

FILIFORM, adj. Fi2l'i2-fo2rm. Lat., *filiformis* (from *filum*, a thread, and *forma*, form). Fr., *filiforme*. Ger., *fadenförmig*, *fadenähnlich*, *fadenartig*. Thread-like. [a, 24.]

FILIGERUS (Lat.), adj. Fi2l(fel)-i2j(i2g)'e2r-u2s(u4s). From *filum*, a thread, and *gerere*, to bear. Fr., *filigère*. Ger., *fadentragend*. See FILIFEROUS.

FILIMINILIC ACID, n. Fi2l-i2-mi2n-i2l'i2k. Of Luck, an amorphous product of earthy appearance, obtained by treating filicinic acid with weak ammonia-water. [B, 46 (a, 14).]

FILIPENDELWURZ (Ger.), n. Fe-le-pe2nd'e2l-vurtz. The *Spiræa filipendula*. [B, 180 (a, 35).]

FILIPENDULA (Lat.), n. f. Fi2l(fel)-i2-pe2nd'u2l(u4l)-a2. From *filum*, a thread, and *pendulus*, hanging down. Fr., *filipendule*. Ger., *Filipendel*. Of Tournefort, the genus *Spiræa*. [B, 121 (a, 24).]—**F. aquatica.** The *Œnanthe fistulosa*. [B, 180 (a, 24).]—**F. tenuifolia.** The *Spiræa f.* [B, 180 (a, 24).]—**F. ulmaris.** See SPIRÆA *ulmaria*.—**F. vulgaris.** The *Spiræa f.* [B, 173 (a, 24).]—**Folia filipendulæ (seu tenuifoliæ).** The leaves of *Spiræa f.* [B, 180 (a, 24).]

FILIPENDULOUS, adj. Fi2l-i2-pe2nd'u2l-u2s. Lat., *filipendulus*, *filipendulatus* (from *filum*, a thread, and *pendulus*, hanging down). Fr., *filipendulé*. Ger., *fadenhängig*. Suspended by a filament (said of the radicles carrying tubers at their extremity, as in *Solanum tuberosum*). [a, 24.]

FILIPES (Lat.), adj. Fi2l(fel)'i2-pez(pas). From *filum*, a thread, and *pes*, a foot. Fr., *filipède*. Having very long, slender feet. [L, 180.]

FILIPODE (Fr.), n. Fe-le-pod. From *filum*, a thread, and πούς, the foot. The *Asplenium filix fœmina*. [B, 121, 173 (a, 24).]

FILIPUNCTURE, n. Fi2l'i2-pu2n2k-tu2r. From *filum*, a thread, and *punctura*, a pricking. Fr., *f*. [Verneuil]. The operation of inserting into an aneurysmal sac fine wire, catgut, horse-hair, or the like, and leaving it there coiled up, in order to cause coagulation of the blood in the sac; first proposed by C. H. Moore. ["Med.-chir. Trans.," xlvii, p. 129; "Gaz. hebd. de méd. et de chir.," July 13, 1888, p. 444 (a, 34).]

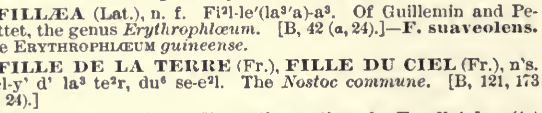
FILIROSTRIS (Lat.), adj. Fi2l(fel)-i2-ro2s(ros)'tri2s. From *filum*, a thread, and *rostrum*, a beak. Fr., *filirostre*. Having a filiform beak. The *Filirostres* of Schaeffer are an order of birds so characterized. [L, 180.]

FILITANNIC ACID, n. Fi2l-i2-ta2n'i2k. See FILICITANNIC ACID.

FILITARSIS (Lat.), adj. Fi2l(fel)-i2-ta2r'si2s. From *filum*, a thread, and ταρσός (see TARSUS). Fr., *filitarse*. Having long and slender tarsi. [L, 180.]

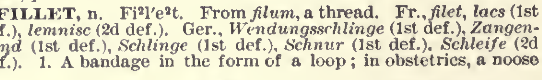
FILIUS (Lat.), n. m. Fil(fel)'i2-u2s(u4s). A son.—**F. ante patrem.** Lit., the son before the father; an old term for a plant in which the flowers appear before the leaves, especially the *Colchicum autumnale* and *Tussilago farfara*. [B, 46, 88 (a, 14); B, 121, 180 (a, 24).]

FILIX (Lat.), n. f. Fil(fi2l)'i2x. Gen., *fi'licis*. Gr., πτέρις. Fr., *fougère*. Ger., *Farnkraut*. A fern; of Tournefort, the genus *Aspidium*; of Haller, the genus *Pteris*; of Rupp, the genus *Polypodium*. In the pl., *Filices*, a division of cryptogams. See under *Filicaceæ*. [B, 121 (a, 24).]—**Balsamum filicis.** See *Oleoresina* ASPIDII.—**Decoctum filicis maris** [Belg. Ph.]. A decoction made by macerating for one hour 1 part of the root of *F. mas*, and straining with slight pressure so as to obtain 20 parts. [B, 95 (a, 21).]—**Extractum filicis** [Ger. Ph., Belg. Ph., Norweg. Ph., Swed. Ph.] (et **æthereum** [Swiss Ph.], seu **liquidum** [Br. Ph.], seu **maris** [Fr. Cod., Austr. Ph., Hung. Ph., Netherl. Ph.], seu **maris æthereum** [Finn. Ph., Gr. Ph., Russ. Ph.]). See *Oleoresina* ASPIDII.—**F. acid.** See FILICIC ACID.—**F. aculeata.** The *Aspidium aculeatum*. [a, 24.]—**F. aquatica, F. florida.** The *Spiræa filipendula*. [B, 180 (a, 24).]—**F. fœminea.** Ger., *Adlerkraut*. See ASPLENIUM *f. fœmina*.—**F'gerbsäure** (Ger.). See FILICITANNIC ACID.—**F. mas** [U. S. Ph., 1870, Br. Ph.]. See ASPIDIUM *f. mas*.—**F. non-ramosa dentata.** The *Aspidium f. mas*. [B, 180 (a, 24).]—**F. non-ramosa zeylanica.** The *Asplenium falcatum*. [B, 242.]—**F.-red.** Ger., *F'roth*. A substance (coloring principle?) found in *Aspidium f. mas*. [B, 33.]—**F'säure** (Ger.). See FILICIC ACID.—**F. Veneris.** The *Adiantum pedatum*. [a, 24.]—**Oleoresina filicis** [U. S. Ph., 1870], **Oleum filicis maris.** Fr., *huile de fougère mâle*. See *Oleoresina* ASPIDII.—**Oleum filicis maris.** Fr., *huile de fougère mâle*. A preparation made by digesting 4 parts of powdered rhizome of aspidium for 24 hours in 8 of alcohol, straining, repeating the operation with the residue and 5 parts of alcohol, mixing the liquors, and distilling off the alcohol. The residue is diluted with 3 parts of water, and the oleoresin that settles is washed with pure water. [Sax. Ph., 1820; Tur. Ph., 1833.] For the oil of the Gr. Ph., 1837, and Hamb. Ph., 1804, see *Oleoresina* ASPIDII. [B, 119 (a, 14).]—**Pulvis filicis maris** [Fr. Cod.]. See *Poudre de* FOUGÈRE *mâle*.



FILIXOID ACID, n. Fi2l-i2x'oid. Of Luck, a liquid fatty acid obtained by the saponification of the ethereal extract of *Aspidium filix mas*. [B, 46 (a, 14).]

FILIXOLINIC ACID, n. Fi2l-i2x-o-li2n'i2k. Fr., *acide filixolinique*. Of Luck, an acid obtained by the saponification of the ethereal extract of *Aspidium filix mas*. [B, 244 (a, 27).]



FILLÆA (Lat.), n. f. Fi2l-le'(la3'a)-a3. Of Guillemin and Perottet, the genus *Erythrophlœum*. [B, 42 (a, 24).]—**F. suaveolens.** See ERYTHROPHLŒUM *guineense*.

FILLE DE LA TERRE (Fr.), **FILLE DU CIEL** (Fr.), n's. Fel-y' d' la3 te2r, du6 se-e2l. The *Nostoc commune*. [B, 121, 173 (a, 24).]

FILLET, n. Fi2l'e2t. From *filum*, a thread. Fr., *filet*, *lacs* (1st def.), *lemnisc* (2d def.). Ger., *Wendungsschlinge* (1st def.), *Zangenband* (1st def.), *Schlinge* (1st def.), *Schnur* (1st def.), *Schleife* (2d def.). 1. A bandage in the form of a loop; in obstetrics, a noose

TARNIER'S FILLET. (MODIFIED BY OLIVIER.)

WILMOT'S FILLET.

or snare for passing around some part of the fœtus for the purpose of making traction. 2. See LEMNISCUS.—**F. of the corpus callosum.** Lat., *cingula*, *cingulum*. Of Mayo, the fibres forming the white substance of the gyrus fornicatus, extending from the anterior perforated space to the tip of the temporo-sphenoidal lobe, and passing around the splenium of the corpus callosum. [I, 15 (K).]—**Lemniscus f.** See LEMNISCUS.—**Lower f.** See *Inferior* LEMNISCUS.—**Superior f., Upper f.** See *Superior* LEMNISCUS.

FILLING, n. Fi^{2}l'li^{2}n^2. The thorough removal of disorganized substances from a carious tooth, disinfection of the cavity, and placing therein of a substance that restores the normal contour of the tooth and prevents the access of micro-organisms to the healthy dentin. [α, 34.]—**Permanent f.** A material used to close a tooth-cavity permanently, such as gold and amalgam. [α, 34.]—**Root canal f.** A f., preferably of tin-foil, for occluding the canals in teeth roots. [α, 34.]—**Temporary f.** A material used to close a tooth cavity temporarily, such as gum mastic on cotton, gutta-percha, and oxychloride of zinc. [α, 34.]

FILLYFINDILLAN, n. Fi^{2}l-i^2-fi^{2}n-di^{2}l'a^{2}n. The *Spiræa filipendula*. [A, 505 (α, 21).]

FILOID, adj. Fil'oid. From *filum*, a thread, and εἶδος, resemblance. Resembling a fibril or thread. ["Jour. of Morph.," i, p. 229 (J).]

FILOIR (Fr.), n. Fel-wa^{3}r. See FILIÈRE.

FILONIO (Sp.), n. Fe-lo'ne-o. A kind of opiate. [B, 127 (α, 14).]—**F. romano** [Mex. Ph.]. See *Electuarium* HYOSCYAMI *opiatum*.

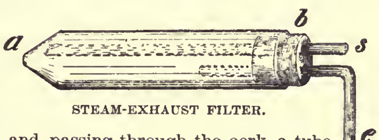
FILOPES (Lat.), adj. Fil(fel)-o(o^3)'pez(pas). From *filum*, a thread, and *pes*, the foot. Fr., *filopède*. Having the foot or stipes filiform. [L, 180.]

FILOPLUMACEOUS, adj. Fi^{2}l-o-plu^2-ma'shu^{3}s. From *filum*, a thread, and *pluma*, a feather. Having the structure of a filoplume. [L, 221, 343.]

FILOPLUMES, n. pl. Fil'o-plu^{2}mz. Lat., *filoplumæ* (from *filum*, a thread, and *pluma*, a feather). Fr., *f.* Ger., *Fadenfedern*. Syn.: *thread-feathers*. Long feathers with a very slender, scarcely distinguishable scape, and rudimentary, deficient, or very small vanes, composed of barbs and barbules. They are the ones which are removed from fowls by singeing. [L, 221, 343.]

FILOPLUMOUS, adj. Fi^{2}l-o-plu^{2}m'u^{3}s. See FILOPLUMACEOUS.

FILOPRESSURE, n. Fil'o-pre^{2}s-su^{2}r. The occlusion of an artery by a ligature. [α, 34.]



FILOSE, adj. Fil'os. From *filum*, a thread. Ending in a thread-like process. [L, 56.]

FILOSMYLIC ACID, n. Fi^{2}l-o^{2}s-mi^{2}l'i^{2}k. Fr., *acide filosmylique*. Of Luck, a volatile acid derived from *Aspidium filix mas* by the saponification of its ethereal extract. [B, 244 (α, 27).]

FILOUSO, n. In Provence, the *Typha latifolia*. [B, 121 (α, 24).]

FILOVARICOSIS (Lat.), n. f. Fi^{2}l-o(o^3)-va^{2}r(wa^{3}r)-i^2-ko'si^{2}s. Gen., *-cos'eos (-is)*. From *filum*, a thread, and *varix* (*q. v.*). Of Adamkiewicz, a thickening of the axis-cylinder of nerves. [α, 34.]

FILTER, n. Fi^{2}l'tu^{5}r. From *filtrum*, *feltrum*, fulled wool. Gr., ἠθμός. Fr., *filtre*. Ger., *Filtrirmaschine*. It., *filtro*, *feltro*. Sp., *filtro*. An apparatus containing some porous substance (unsized paper, sand, charcoal, etc.) through which a liquid is passed, in order to separate the substances held in suspension, which can not pass through the interspaces of the f., from the dissolved substances which pass through with the liquid. [B.]—**Asbestos f.** Ger., *Asbestf'. Glaswollenf'*. 1. Of C. Bovet, a f. consisting of equal parts of powdered asbestos and glass-wool. 2. Of K. Trobach, a f. having in the neck or top a perforated cone lined with asbestos. ["Proc. of the Am. Pharm. Assoc.," xxx, xxxviii (α, 14).]—**Chamberland-Pasteur f., Chamberland's microbe f.** Fr., *bougie Chamberland*. A f. designed to remove the most minute organisms from drinking-water. It consists of a candle-shaped vessel of biscuitware fastened into the lower part of a metallic receiver filled with water under pressure, and supplied from a pipe. The water passes through the pores of the vessel from without inward and escapes inferiorly from the orifice of the vessel. [L, 164 (α, 27).]—**Chanoit's f.** A f. in which ground slag is the straining medium, a pressure of 5 ctm. being necessary to force a liquid through it. [α, 34.]—**Compressed charcoal f.** A cake of compressed charcoal filling the bottom of a suitable vessel; used to deodorize and clarify. [α, 34.]—**Ephemeral f.** A porous surface or medium, suitable for filtration, that can easily be disposed of without physically or chemically affecting the precipitate, deposit, or separated substance it has collected. Cellulose and camphorated naphthaline are of this class. [W. Lascelles-Scott, "Brit. and Colon. Druggist," June 12, 1886, p. 431 (α, 34).]—**Faltenf'** (Ger.). See *Folded f.*—**F.-bed.** A f. on a large scale for purifying a water-supply, consisting of a bed of sand or porous masonry, either constructed in the bank or bed of a river or in connection with artificial reservoirs. [B, 77.]—**F. pulp.** See *Paper-pulp f.*—**Finely divided charcoal f.** Powdered charcoal poured on asbestos cloth and placed in a suitable vessel. [α, 34.]—**Folded f.** Ger., *Faltenf', Sternf'*. A f. composed of folded paper. It is preferable to the ordinary f. for filtering large masses of liquid, because it has a larger filtering surface, and the liquid must pass through one thickness only. [A, 319 (α, 21).]—**Fonvielle's f.** An hermetically closed wooden cylinder, 2·2 metres high and one metre in diameter, containing nine compartments; in the first and second is sponge divided into fragments of variable size; in the third, gravel, then sand, and thus alternately until the ninth layer. Between the adjacent layers of sand and gravel is a perforated diaphragm of zinc and wood. The water is filtered from either the top or the bottom. [A, 301 (α, 34).]—**Glass f.** Ger., *Glaswollenf'*. A f. consisting of glass-wool (fine threads of glass, felted). ["Proc. of the Am. Pharm. Assoc.," xxi (α, 14).]—**Maignen's f.** Asbestos cloth stretched over a frame or a perforated porcelain cone. [α, 34.]—**Paper-pulp f.** Unsized paper beaten into a pulp with water, strained, mixed with the filtering fluid, and poured on an asbestos cloth placed in a suitable filtering vessel. [α, 34.]—**Platinum f.** A funnel made of platinum foil with radial, linear, or punctiform perforations. [Parsons, "New Remedies," March, 1879, p. 77 (α, 34).]—**Porous stone f.** A piece of sandstone, about ⅓ inch thick, fitted as the bottom of a cylinder. [α, 34.]—**Pressure f.** Of Bunsen, the neck of a funnel containing a f. passed through a caoutchouc stopper in a two-necked flask; a bent tube, connected with a glass water-pump or any exhausting apparatus, passes through a stopper in the second neck. The air is exhausted from the bottle, and the pressure of the external air on the fluid in the filter hastens filtration. *Réal's pressure-f.* consists of two metallic cylindrical vessels end to end, one above the other, separated by a perforated diaphragm. The lower vessel contains a water-cock; the upper one is closed, the cover containing a tube 10 to 13 metres high, terminating in a reservoir. The diaphragm is covered with a filtering layer of cotton, sponge, charcoal, and sand. The weight of the fluid in the tube and f. hastens the filtration. [α, 34.]—**Respiratory f.** See RESPIRATOR.—**Silicated carbon f.** A f. composed of 75 per cent. of charcoal, 22 per cent. of silica, and a little iron oxide and alumina; these materials are compressed in suitable shapes, dried, and heated. [α, 34.]—**Spongy iron f.** A vessel on the perforated bottom of which a layer of coarse gravel is placed, on this a layer of fine quartz sand, then a layer of pyrolusite as thick as the first two layers, and, finally, a layer of spongy iron as deep as all the other layers. The spongy iron removes organic matter, and the dissolved iron is oxidized in the pyrolusite and deposited in the sand. [α, 34.]—**Souchon's f.** A wooden case containing bars of galvanized iron on which layers of felt are placed; a galvanized iron frame rests on the latter. [α, 34.]—**Steam-exhaust f.** A f. consisting of a wide tube *a b*, drawn to a small opening at *a*, and closed by a cork at *b*, and, passing through the cork, a tube (*s*) terminating in a fine opening near *a*. When steam under pressure is passed through *s*, the air is exhausted in *a b* if the openings of the tubes are properly adjusted. By means of the tube *e* the f. can be applied to a double-necked f.-bottle. [Draper (α, 34).]—**Sternf'** (Ger.). See *Folded f.*—**Taylor's f.** A long bag of drilling placed in a narrow and high cylindrical vessel of tinned copper; used for filtering syrups. [α, 34.]

STEAM-EXHAUST FILTER.

FILTERED, adj. Fi^{2}l'tu^{5}rd. Fr., *filtré*. Ger., *filtrirt*, *gefiltert*. Strained through a filter.

FILTRAGE (Fr.), n. Fel-tra^{3}zh. See FILTRATION.

FILTRATE, n. Fi^{2}l'trat. Ger., *Filtrat*. In filtration, that portion of the fluid which passes through the filter, opposed to the precipitate, which is left behind. [B.]

FILTRATION, n. Fi^{2}l-tra'shu^{3}n. Lat., *filtratio*. Fr., *f. filtrage*. Ger., *F., Filtrirung, Filterung, Seihung. Durchseihung, Durchseihen*. It., *filtrazione*. Sp., *filtración*. The process of passing fluids through porous media (filters), to separate the insoluble suspended contents from the substances held in solution. [B.]—**Automatic f.** A process occurring when liquid is put into a bottle closed by a twice perforated cork, into one opening of which a siphon is inserted, the outer arm being much longer than the inner, and ending in a funnel lined with the filtering material. A straight tube open at both ends is inserted through the second opening, and its lower end placed on a level with the height of the liquid to be reached in the funnel. The siphon is filled by carefully blowing through the straight tube, after which f. proceeds without further attention. ["Am. Jour. of Pharm.," June, 1887, p. 291 (α, 21).]—**Elective f.** Fr., *f. électif*. The f. of the serum of the blood through organic membranes, due to the fact that the power of adhesion of the capillary cavities of organic membranes to adjacent substances is greater for material charged with saline matter than for albuminoid substances mixed with the water or salts in the serum. [L, 158 (α, 21).]—**F'srückstand** (Ger.). The undissolved substances which remain after the process of filtering. [A, 319 (α, 21).]—**Membranf'** (Ger.). F. through a moist animal membrane (*e. g.*, a portion of intestine, bladder, or pericardium). Morphotic substances in solution do not usually pass through; crystalloid substances in solution pass through readily if the pressure is somewhat augmented, while in the case of colloid substances the strength of the filtrate is diminished. [A, 319 (α, 14).]

FILTRUM (Lat.), n. m. Fi^{2}l'tru^{3}m(tru^{4}m). See FILTER.—**F. laryngis.** Of Merkel, a groove lying between two small ridges which run parallel to each other on the posterior part of the lateral wall of the upper portion of the larynx. [L, 20 (α, 29).]

FILUM (Lat.), n. n. Fil(fel)'u^{3}m(u^{4}m). Fr., *fil*. Ger., *Faden*. A thread, wire, cord, filament, fibre, or fibril. [B, 121 (α, 24).]—**Æreum f.** Copper wire. [B, 50.]—**Æreum f. inauratum.** Gilded copper wire. [B, 50.]—**Æreum f. argentatum.** Silvered copper wire. [B, 50.]—**Cupreum f.** Copper wire. [B.]—**Fila adductoria.** See PROSPHYSES.—**F. arsenicale.** Sublimed arsenic. [Ruland (A, 325).]—**F. carneum.** See *Muscular* FIBRE.—**F. cupreum.** Copper wire.—**F. duræ matris externum.** The dura covering the terminal filament of the spinal cord. [L, 332.]—**F. musculare.** See *Muscular* FIBRE.—**Fila nervea.** Nerve-fibres. [J.]—**Fila pontis lateralia.** The lateral fibres of the pons Varolii. [I, 17 (K).]—**F. spermaticum.** See SPERMATOZOOID.—**F. tæniaforme.** Any band-like fibre. [J, 16.]—**F. terminale.** See *Terminal* FILAMENT.—**F. terminale exterius** (seu **externum**). See *F. duræ matris externum*.—**F. terminale medullæ spinalis.** See *Terminal* FILAMENT.

FILZKRAUT (Ger.), n. Fi^{2}lts'kra^3-u^{4}t. The *Cuscuta epilinum* and the *Cuscuta europæa*. [B, 180 (α, 24).]—**Knolliges F.** The *Phlomis tuberosa*. [B, 180 (α, 24).]

FILZ (Ger.), n. Fi^{2}ltz. See FELT.—**F'dosten.** The *Origanum maru*. [L, 80.]—**F'gewebe.** Of Schleiden and Unger, the filamentous tissue composing the thallus of *Fungi*. [B, 54.]—**F'ig.** See TOMENTOSE.—**F'kraut.** See the major list.—**F'krebs.** See PILOMA.—**F'schwamm.** See SPONGIO-PILINE.—**F'überzug.** See TOMENTUM.

FIMA (Jap.), n. The *Ricinus communis.* [B, 88 (a, 14); B, 121 (a, 24).]

FIMBLE, n. Fi^{2}mb'l. The male plant of *Cannabis sativa.* [B, 275 (a, 24).]

FIMBRIA (Lat.), n. f. Fi^{2}m'bri^2-a^3. Fr., *frange.* Ger., *Franse, Fimbrie.* 1. A border. 2. A fringe. 3. A fibre. 4. See CORPUS *fimbriatum.*—**Fimbriæ carnosæ coli.** See APPENDICES *epiploicæ.*—**Fimbriæ linguæ.** See PAPILLÆ *foliatæ.*—**F. cornu Ammonis, F. fornicis.** See CORPUS *fimbriatum.*—**F. medullaris hippocampi** (seu **transparens**). See CORPUS *fimbriatum.*—**Fimbriæ of the oviduct.** Ger., *Fimbrien des Eileiters.* Syn.: *morsus diaboli.* A number of ragged, fringe-like processes which surround the abdominal opening of the oviduct.—**F. ovarica.** That one of the fimbriæ of the oviduct which extends along the infundibulo-ovarian ligament to the ovary.—**Fimbriæ synoviales.** See *Synovial* FRINGES.—**Fimbriæ tubarum (Fallopii).** See *Fimbriæ of the oviduct.*

FIMBRIATE, FIMBRIATED, adj's. Fi^{2}m'bri^2-at, -at-e^{2}d. Lat., *fimbriatus, craspedodes.* Fr., *fimbrié, frangé.* Ger., *gefranst, fransig.* It., *frangiato.* Sp., *franjeado.* Fringed; provided with fimbriæ. The *Fimbriatæ* of Batsch are a family of the *Difformariæ.* [B, 121, 170 (a, 24).]

FIMBRILLA (Lat.), n. f. Fi^{2}m-bri^{2}l'la^3. Dim. of *fimbria.* Fr., *fimbrille.* Ger., *Spreuborste, Spreuhaar.* A little fringe. [B, 1, 121 (a, 24).]

FIMBRILLARIA (Lat.), n. f. Fi^{2}m-bri^{2}l-la(la^3)'ri^2-a^3. From *fimbria*, a border, fringe. The genus *Conyza.* [B, 121 (a, 24).]—**F. baccharoides.** The *Conyza ivæfolia.* [B, 173 (a, 24).]

FIMBRILLATE, FIMBRILLIFEROUS, FIMBRILLOSE, adj's. Fi^{2}m'bri^{2}l-at, fi^{2}m-bri^{2}l-i^{2}f'e^{2}r-u^{3}s, fi^{2}m'bri^{2}l-os. Lat., *fimbrillatus, fimbrillifer, fimbrilliferus* (from *fimbrilla*, a little fringe, and *ferre*, to bear). Fr., *fimbrillifère.* Ger., *spreuborstentragend.* Finely fringed. [B, 1, 19, 291 (a, 24).]

FIMBRIOCELE (Lat.), n. f. Fi^{2}m-bri^2-o(o^3)-sel(kal)'e(a); in Eng., fi^{2}m'bri^2-o-sel. Gen., *-cel'es.* From *fimbria*, a border, fringe, and κήλη, a tumor. A hernia containing fimbriæ of the oviduct. [A, 326 (a, 21).]

FIMEFAGI (Jap.), n. The *Polygala vulgaris.* [B, 88 (a, 14).]

FIMETARIOUS, adj. Fi^{2}m-e^2-ta'ri^2-u^{3}s. Lat., *fimetarius* (from *fimus*, dung). Fr., *fimétaire.* Living in excrement; of plants, growing on manure heaps. [B, 19, 121 (a, 24); L, 80.]

FIMICOLUS (Lat.), adj. Fi^{2}m-i^{2}k'o^{2}l-u^{3}s(u^{4}s). From *fimus*, dung, and *colere*, to inhabit. Fr., *fimicole.* See FIMETARIOUS.

FIMPI, n. In Madagascar, the *Canella alba.* [B, 46, 88 (a, 14).]

FIMUS (Lat.), n. m. Fim(fi^{2}m)'u^{3}s(u^{4}s). See EXCREMENT and FÆCES.—**F. anseris.** Goose's dung. [a, 21.]—**F. equinus.** Horse's dung. [a, 21.]—**F. vaccæ.** Cow's dung. [a, 21.]

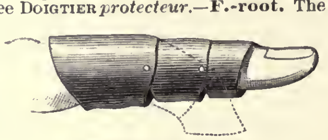
FIN, n. Fi^{2}n. Gr., πτέρος. Lat., *pinna* (1st def.). Fr., *nageoire* (1st def.). Ger., *Flosse* (1st def.), *Finne* (1st def.). It., *pinna* (1st def.). Sp., *aleta* (1st def.). 1. In fishes, the expansion of the integument strengthened by a bony or cartilaginous frame-work, which serves as an organ of locomotion and aids in maintaining the balance. 2. The *Ononis arvensis.* [A, 505 (a, 21); L, 147, 207.]—**Abdominal f's.** See *Ventral f's.*—**Adipose f.** Lat., *pinna adiposa.* Fr., *nageoire adipeuse.* A small unpaired f. containing fat within its fold, situated in the dorsal median line behind the dorsal f. [L, 207.]—**Anal f.** Lat., *pinna analis.* Fr., *nageoire anale.* Ger., *Afterflosse.* An unpaired f. situated in the median line behind the anus. [L, 147, 207.]—**Azygos f's.** See *Unpaired f's.*—**Caudal f.** Lat., *pinna caudalis.* Fr., *nageoire caudale.* The f. forming the termination of the tail of a fish. [L, 207.]—**Dorsal f.** Lat., *pinna dorsalis.* Fr., *nageoire dorsale.* An unpaired f. inserted in the median line of the back. [L, 147, 207.]—**F.-ray.** See *F.* (1st def.).—**F'weed.** See *F.* (2d def.).—**Horizontal f's.** See *Paired f's.*—**Impar f's.** See *Unpaired f's.*—**Jugular f's.** Lat., *pinnæ jugulares.* Fr., *nageoires jugulaires.* See under *Ventral f's.*—**Paired f's.** Fr., *nageoires paires.* F's which occur in pairs, one on each side of the body. [L, 147, 207.] See *Pectoral f's* and *Ventral f's.*—**Pectoral f's.** Lat., *pinnæ pectorales.* Fr., *nageoires pectorales.* The homologues of the anterior extremities of higher vertebrates. They are inserted, one on each side, on the lateral surfaces of the body, immediately behind the gill-openings. [L, 147, 207.]—**Pelvic f's.** See *Ventral f's.*—**Soft dorsal f.** The posterior part of the dorsal f. when composed of soft rays. [L, 341 (a, 27).]—**Spinous dorsal f.** The anterior part of the dorsal f., when composed of spinous rays. [L, 341 (a, 27).]—**Thoracic f's.** Lat., *pinnæ thoracicæ.* Fr., *nageoires thoraciques.* See under *Ventral f's.*—**Unpaired f's.** Fr., *nageoires impaires.* The f's which occupy the middle line of the body, and do not occur in pairs. [L, 147, 207.] See *Anal f., Caudal f.*, and *Dorsal f.*—**Ventral f's.** Lat., *pinnæ ventrales.* Fr., *nageoires abdominales.* Ger., *Bauchflossen.* The homologues of the posterior extremities. They are paired, and are inserted on the abdominal surface, being termed abdominal, thoracic, or jugular, according as they are behind, below, or in front of the pectoral f's. [L, 147, 207.]—**Vertical f's.** See *Unpaired f's.*

FINCKLE, n. Fi^{2}n^{2}k'l. See FINKLE.

FINDELANSTALT (Ger.), **FINDELHAUS** (Ger.), n's. Fi^{2}nd'e^{2}l-a^{3}n-sta^{3}lt, -ha^3-u^{4}s. A foundling asylum.

FINDELKIND (Ger.), n. Fi^{2}nd'e^{2}l-ki^{2}nd. A foundling. [L, 80.]

FINDELPFLEGER (Ger.), n. Fi^{2}nd'e^{2}l-pflag-e^{2}r. A person intrusted with the care of foundlings. [A, 319, 450 (a, 21).]



FINDER, n. Find'u^{5}r. Ger., *F.* In microscopy, any device enabling one to find easily some object or part in a microscopical preparation. It may consist simply of a ring painted around the object, of verniers on the stage of the microscope, or of a glass slide ruled in squares for registering the position of the microscopical specimen when the object is in the field. Then by putting the slide back in the same position on the stage of the microscope the object will be in the field. Frequently, as with a telescope, an objective of low power is used to find the object and get it into the middle of the field, where it can be found easily by the high objective. [J, 113.]

FIÑDUK-I-HIÑDI (Ar.), n. The nut of *Sapindus emarginatus.* [A, 479 (a, 21).]

FINE JOHN, n. Fin'jo^{2}n. The *Agrostis vulgaris.* [A, 505 (a, 21).]

FINE LEAF, n. Fin'lef. A violet. [A, 505 (a, 21).]

FINGER, n. Fi^{2}n^2'gu^{5}r. Gr., δάκτυλος. Lat., *dactylus, digitus manus.* Fr., *doigt.* Ger., *F.* It., *dito.* Sp., *dedo.* Any one of the prehensile members (except, in common parlance, the thumb) forming the termination of the hand. [C.]—**Annular f.** See *Ring f.*—**Bloody-f's, Bloody-man's f's.** The *Digitalis purpurea*, the *Orchis mascula*, and the *Arum maculatum.* [B, 275 (a, 24).]—**Clubbed f.** Fr., *doigt hippocratique.* Ger., *trommelschlägelförmige Fingerendphalangen.* A knob-like deformity of the ends of the f's attended with curvature of the nails, and associated usually with pulmonary phthisis, or cardiac disease, probably in connection with the chronic congestion produced by these diseases, and not merely resulting from emaciation. [A, 326 (a, 21).]—**Contracted f's.** See *Dupuytren's* CONTRACTION.—**Dead f's.** See ASPHYXIA *localis cum gangræna symmetrica.*—**Dead-men's f's.** See DEAD-MAN'S F'S.—**Devil's f's.** See DEVIL'S F'S.—**Dog-f's.** The *Digitalis purpurea.* [A, 505 (a, 21).]—**Ear-f.** See *Little f.*—**Fairy-f's.** The *Digitalis purpurea.* [A, 505 (a, 21).]—**Federnder F.** (Ger.). See *Trigger-f.*—**Fifth f.** See *Little f.*—**F'ähnlich** (Ger.). See DACTYLOID.—**F's-and-thumbs.** The *Lotus corniculatus.* [B, 275 (a, 24).]—**F's-and-toes.** 1. The *Lotus corniculatus.* 2. A diseased turnip. [A, 505 (a, 21).]—**F'artig** (Ger.). See DACTYLOID.—**F'beere.** The pulp of a f. [J.]—**F'beuger** (Ger.). See the major list.—**F'blättrig** (Ger.). See DIGITIFOLIATE.—**F'chen** (Ger.). See DIGITULE.—**F'druck** (Ger.). Digital pressure. [A, 521.]—**F'eindruck** (Ger.). A digitate impression. [L, 80.]—**F'entzündung** (Ger.). See DACTYLITIS.—**F'förmig** (Ger.). See DACTYLOID.—**F'flossig** (Ger.). See DACTYLOPTEROUS.—**F.-flower.** The *Digitalis purpurea.* [B, 275 (a, 24).]—**F'flügelig.** See DACTYLOPTEROUS (1st def.).—**F'förmig** (Ger.). See DIGITATE.—**F'gras** (Ger.), **F'hut** (Ger.). See the major list.—**F'ig-gefiedert** (Ger.). See DIGITIPINNATE.—**F'impressionen** (Ger.). Digitate impressions. [L, 80.]—**F'krant** (Ger.). See the major list.—**F'lappig** (Ger.). See DACTYLOBUS.—**F'ling** (Ger.). See DACTYLOTHECA (1st def.).—**F'mangel.** The state of having one or more f's lacking. [L, 57.]—**F'nervig** (Ger.). See DIGITINERVATE.—**F.-parted.** See DIGITATE.—**F.-protector.** Ger., *F'schützer.* See DOIGTIER *protecteur.*—**F.-root.** The *Digitalis purpurea.* [A, 505 (a, 21).]—**F'schmerz** (Ger.). An obscure disease with short and frequent paroxysms of pain in a f. and absorption of tissue. [L, 135, p. 192 (a, 34).]—**F'schützer** (Ger.). See DOIGTIER *protecteur.*—**F'spitze** (Ger.). The tip of a f. [L, 80.]—**F'sprache** (Ger.), **F'sprechen** (Ger.). See DACTYLOLOGY.—**F.-stall.** See DACTYLOTHECA (1st def.).—**F'strecker** (Ger.). See the major list.—**F'streckmaschine** (Ger.). See *F'strecker* (2d def.).—**F'ung** (Ger.). See DIGITATION.—**F'verwachsung** (Ger.). See SYNDACTYLISM.—**F'wurm** (Ger.). See PARONYCHIA.—**F'zeig** (Ger.). A diagnostic sign to be recognized by digital examination.—**First f.** 1. The index f. 2. The thumb. [L.]—**Fourth f.** 1. The little f. 2. The ring f. [L.]—**Fox-f's.** The *Digitalis purpurea.* [A, 505 (a, 21).]—**Glossy f's.** A red, moist, and glossy state of the f's due to injury or disease of a nerve.—**Hippocratic f.** See *Clubbed f.*—**Index f.** Lat., *index.* Fr., *indicateur.* Ger., *Zeigef'.* The f. nearest the thumb; so called from its use in pointing. [L.]—**Jerk-f.** See *Trigger-f.*—**King's-f's.** See the major list. [a, 21.]—**Kleinf'** (Ger.), **Kleinster F.** (Ger.). See *Little f.*—**Lady's-f's.** See the major list.—**Little f.** Lat., *digitus minimus manus* (seu *auricularis*). Fr., *doigt auriculaire.* Ger., *Ohrf', Kleinf', kleinster F., letzer F.* The fifth f. in five-fingered animals; the f. on the extreme ulnar side of the hand. [L.]—**Lords'-and-ladies'-f's.** The *Arum maculatum.* [A, 505 (a, 21).]—**Middle f.** Lat., *digitus medius.* Fr., *doigt médius.* Ger., *Mittelf'.* The f. on the ulnar side of the index f. [L.]—**Ohrf'** (Ger.). See *Little f.*—**Purple-f's.** The *Digitalis purpurea.* [A, 505 (a, 21).]—**Ring f.** Lat., *digitus annularis.* Fr., *doigt annulaire.* Ger., *Ringf', vierter F.* The f. on the ulnar side of the middle f. [L.]—**Schmerzhafte F'beugung** (Ger.). See DACTYLOCAMPSODYNIA.—**Schnellender F.** (Ger.). See *Trigger f.*—**Second f.** 1. The middle f. 2. The index f. [L.]—**Snap-f., Spring-f.** See *Trigger-f.*—**Third f.** 1. The ring f. 2. The middle f. [L.]—**Trigger-f.** Fr., *doigt à ressort.* Ger., *schnellender* (oder *federnder*) *F.* It., *dito a scatto.* Syn.: *jerk-f., snap-f., spring-f.* A disease of a f. characterized by occasional obstruction to its flexion or extension, followed by a sudden, jerky completion of the movement. [G. W. Jacoby, "N. Y. Med. Jour.," June 19, 1886, p. 684.]—**Trommelschlägelförmige F'endphalangen** (Ger.). See *Clubbed f's.*—**Vierter F.** (Ger.). See *Ring f.* and *Little f.*—**Webbed f's.** See SYNDACTYLISM.—**Zeigef'** (Ger.). See *Index f.*—**Zweiter F.** (Ger.). See *Index f.* and *Middle f.*

A FINGER-PROTECTOR.

FINGERBEUGER (Ger.), n. Fi^{2}n^2'e^{2}r-boig-e^{2}r. A flexor muscle of the fingers. [L.]—**Durchbohrter F., Hochliegender F., Oberflächlicher F.** See FLEXOR *digitorum manus sublimis.*—**Tiefer F., Tiefliegender F.** See FLEXOR *digitorum manus profundus.*

FINGERED, adj. Fi^{2}n^2'gu^{5}rd. See DIGITATE.

FINGERGRAS (Ger.), n. Fi^{2}n^2'e^{2}r-gra^{3}s. A popular name for various plants having finger-shaped parts.—**Gemeines F.** The *Digitaria sanguinalis.* [B, 180 (a, 24).]—**Sprossendes F.** The *Digitaria stolonifera.* [L, 80.]—**Wucherndes F.** The *Cynodon dactylon.* [B, 180 (a, 24).]

FINGERHUT (Ger.), n. Fi^{2}n^2'e^{2}r-hut. 1. See DIGITALIS. 2. See DACTYLOTHECA (1st def.).—**Aetherische F'tinctur.** See *Tinctura* DIGITALIS *ætherea.*—**Einfache F'tinctur.** See *Tinctura* DIGITALIS.—**F'aufguss.** See *Infusum* DIGITALIS.—**F'blätter.** See DIGITALIS-*leaves.*—**F'blüthen.** See DIGITALIS-*flowers.*—**F'essig.** See *Acetum* DIGITALIS.—**F'extract.** See *Extractum* DIGITALIS.—**F'kraut.** The leaves of *Digitalis purpurea.* [B, 180 (a, 24).]—**F'salbe.** See *Unguentum* DIGITALIS.—**F'syrup.** See *Syrupus* DIGITALIS.—**F'tinktur.** See *Tinctura* DIGITALIS.—**Flüssiges F'extrakt.** See *Extractum* DIGITALIS *fluidum.*—**Grossblüthiger F.** The *Digitalis grandiflora.* [B, 180 (a, 24).]—**Purpurf'.** See DIGITALIS *purpurea.*—**Rostfarbiger F.** The *Digitalis ferruginea.* [B, 180 (a, 24).]—**Rother F.** See DIGITALIS *purpurea.*

FINGERKAMMGRAS (Ger.), n. Fi^{2}n^2'e^{2}r-ka^{3}m-gra^{3}s. The genus *Dactyloctenium.* [B, 180 (a, 24).]—**Aegyptisches F.** The *Dactyloctenium ægyptiacum.* [B, 180 (a, 24).]

FINGERKRAUT (Ger.), n. Fi^{2}n^2'e^{2}r-kra^3-u^{4}t. 1. The genus *Potentilla.* [B, 180 (a, 24).] 2. See DIGITALIS *purpurea.*—**Felsenf'.** The *Potentilla rupestris.* [B, 180 (a, 24).]—**Frauenf'.** The *Lotus corniculatus.* [B, 180 (a, 24).]—**Kriechendes f.** The *Potentilla reptans.* [B, 180 (a, 24).]—**Purpurrothes F.** The *Potentilla palustris.* [L, 80.]—**Silberweisses F.** The *Potentilla argentea.* [B, 180 (a, 24).]—**Weissblühendes F.** The *Potentilla alba.* [L, 80.]

FINGERSTRECKER (Ger.), n. Fi^{2}n^2'e^{2}r-stre^{2}k-e^{2}r. 1. An extensor muscle of the fingers. 2. An apparatus for extending a contracted finger.—**Gemeinschaftlicher F.** See EXTENSOR *digitorum manus communis.*

FINGIRT (Ger.), adj. Fi^{2}n^2-gert'. Feigned, simulated. [a, 14.]

FINGOSAKE (Jap.), n. The *Fumaria officinalis.* [B, 88 (a, 14).]

FINGRIGO, n. In Jamaica, the *Pisoria aculeata.* [B, 121, 282 (a, 24).]

FIN-HOUSSY, n. The *Trifolium repens.* [B, 121 (a, 24).]

FININGS, n. pl. Fin'i^{2}n^{2}z. From *finire,* to finish. Substances used for clarifying infusions, etc., by reason of their property of engaging the suspended matter and carrying it to the bottom. The most common of them are isinglass, gelatin, white of egg, blood serum, carragheen, and the dried stomach of the cod. [A, 1.]

FINIS (Lat.), n. f. Fin(fen)'i^{2}s. Gen., *fin'is.* Fr., *fin.* See END.—**F. asperæ arteriæ.** The larynx. [a, 29.]

FINK (Ger.), n. Fi^{2}n^{2}k. See FRINGILLA.

FINKEL, n. Fi^{2}n^{2}k'e^{2}l. See FINKLE.

FINKLE, n. Fi^{2}n^{2}k'l. The *Fœniculum vulgare.* [A, 505 (a, 21).]—**Dog-f.** See DOG-*f.*

FINNA (Lat.), n. f. Fi^{2}n'na^3. Ger., *Finne.* See CYSTICERCUS.—**F. humana.** See CYSTICERCUS *cellulosæ.*

FINNE (Ger.), n. Fi^{2}n'ne^2. 1. See FIN. 2. See CYSTICERCUS. 3. In the pl., *F'n,* see ACNE.—**Afterf'.** See *Anal* FIN.—**F'nausschläge.** In Hebra's classification of skin diseases, a group of affections of the skin "due to exudation," including acne, sycosis, and gutta rosacea. [G, 3.]—**F. der Schweine.** Cysticercus cellulosæ in swine. [a, 34.]—**Gewöhnliche F.** See ACNE *vulgaris.*—**Kupferf'.** See ACNE *rosacea.*

FINNIG (Ger.), n. Fi^{2}n'i^{2}g. Of swine, measly. [L, 215.]

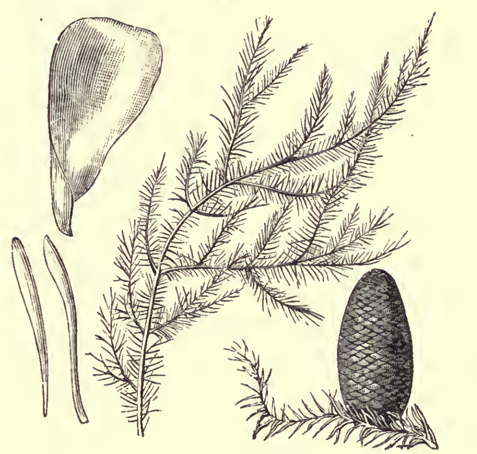
FINTIGA, n. In Dongola, the date. [B, 121 (a, 24).]

FINTOCK, n. Fi^{2}n'to^{2}k. The *Rubus chamæmorus.* [A, 505 (a, 21).]

FINZACH, n. Fi^{2}n'za^{2}k. The *Polygonum aviculare.* [A, 505 (a, 21).]

FIOLE (Fr.), n. Fe-ol. See PHIAL.

FIORIN (Fr.), n. Fe-o-ra^{2}n^2. See *F.*-GRASS.



FIQUE (Fr.), n. Fek. Of the veterinarians, a furuncle over the pastern in ruminants. [A, 518.]

FIR, n. Fu^{5}r. Gr., ἐλάτη. Lat., *abies.* Fr., *sapin.* Ger., *Tanne.* It., *abete.* Sp., *abeto.* A general name for various species of *Abies, Picea, Pinus, Larix,* etc.; more recently, restricted to the genera *Abies* and *Picea.* [B, 19, 275 (a, 24).]—**American black** (or **double**) **spruce-f.** The *Picea nigra.* [B, 275 (a, 24).]—**American silver-f.** The *Abies balsamea.* [B, 5, 19, 275 (a, 24).]—**American single** (or **white**) **spruce-f.** The *Picea alba.* [B, 275 (a, 24).]—**Balm of Gilead f., Balsam f.** The *Abies balsamea.* [B, 5, 19, 275 (a, 24).]—**Balsam of f.** See *Canadian* TURPENTINE.—**Black mountain-f.** The *Abies cephalonica.* [B, 275 (a, 24).]—**Black spruce-f.** The *Picea nigra.* [B, 275 (a, 24).]—**Californian f.** The *Abies concolor.* [B, 275 (a, 24).]—**Canada balsam-f.** The *Abies balsamea.* [B, 14 (a, 24).]—**Common f.** 1. Of the spruce f's, the *Abies excelsa.* 2. Of the silver f's, the *Abies pectinata.* [B, 77, 180 (a, 24).]—**Dantzic f.** The *Picea excelsa.* [B, 77 (a, 24).]—**Double spruce-f.** The *Picea nigra.* [B, 275 (a, 24).]—**European silver-f.** The *Picea excelsa.* [B, 5 (a, 24).]—**F. apples, F. balls, F.-bobs, F. cones.** The cones of any species of f. [A, 505 (a, 21); B, 275 (a, 24).]—**F. flout.** The *Papaver rhœas.* [A, 505 (a, 21).]—**F.-tree.** See *F.*—**F.-wool.** See the major list.—**Giant silver-f., Great Californian silver-f.** The *Picea* (*Pinus*) *grandis.* [B, 275 (a, 24).]—**Great silver-f.** The *Abies grandis.* [L, 86.]—**Ground-f.** The *Lycopodium sabinæfotium.* [B, 34 (a, 24).]—**Hemlock (spruce) f.** The *Tsuga canadensis.* [B, 275 (a, 24).]—**Joint f's.** The *Gnetaceæ.* [Lindley (B, 19).]—**Norway spruce-f.** The *Picea excelsa.* [B, 275 (a, 24).]—**Noble silver-f.** The *Abies nobilis.* [L, 86.]—**Oxamel f.** The *Pinus religiosa.* [B, 275 (a, 24).]—**Parasol-f.** The genus *Sciadopitys.* [B, 275 (a, 24).]—**Pitch silver-f.** The *Abies pichta.* [B, 275 (a, 24).]—**Plum-f.** The *Podocarpus andina* and the *Prumnopitys elegans.* [B, 275 (a, 24).]—

BALSAM FIR. [A, 327.]

Prussian f. The *Picea excelsa.* [B, 275 (a, 24).]—**Sacred silver-f.** The *Picea religiosa.* [B, 275 (a, 24).]—**Sapindus f.** The *Pinus orientalis.* [B, 275 (a, 24).]—**Scotch f.** The *Pinus silvestris.* [A, 505 (a, 21); B, 185 (a, 24).]—**Siberian silver-f.** The *Abies pichta.* [B, 275 (a, 24).]—**Silver-f.** The genus *Picea,* the *Abies alba* and

GREAT SILVER-FIR. [A, 327.]

Abies balsamea. [B, 19.]—**Single spruce-f.** The *Picea alba.* [B, 275 (a, 24).]—**Spanish silver-f.** The *Abies pinsapo.* [B, 275 (a, 24).]—**Spruce-f.** The *Picea excelsa;* also the various other species of *Picea* and *Abies.* [B, 19, 275 (a, 24).]—**Umbrella-f.** See *Parasol-f.* [B, 275 (a, 24).]

FIRAGGI, n. In Japan, the *Olea aquifolium.* [B, 121 (a, 24).]

FIRE, n. Fir. Gr., πῦρ. Lat., *ignis.* Fr., *feu.* Ger., *Feuer.* It., *fuoco.* Sp., *fuego.* 1. Combustion. 2. A popular name with various qualifying or supplementary words for inflammation, and especially for certain inflammatory affections of the skin. [G.]—**F.-blast.** The popular name for the burnt appearance of vegetation destroyed by plant parasites. [a, 24.]—**F.-bush.** The *Cratægus pyracantha.* [B, 275 (a, 24).]—**F.-damp.** See METHANE.—**F.-leaves.** See the major list.—**F.-o'-gold.** The *Caltha palustris.* [A, 505 (a, 21).]—**F.-root.** The *Acorus calamus.* [B, 121 (a, 24).]—**F'weed.** 1. The *Erechthites hieracifolia.* 2. See FIRE-LEAVES (2d def.). 3. The *Epilobium angustifolium.* [A, 505 (a, 21); B.]—**Jamaica f.-flower.** The *Euphorbia punicea.* [B, 275 (a, 24).]—**New Zealand f.-tree.** The *Metrosideros tormentosa.* [B, 275 (a, 24).]—**Persian f.** See IGNIS *persicus.*—**Saint Anthony's f.** See IGNIS *Sancti Antonii.*—**Wild f.** See ERYSIPELAS.

FIRE-LEAVES, n. Fir'levz. 1. The leaves of plantains. 2. The *Plantago media* and the *Scabiosa succisa.* [A, 505 (a, 21); B, 275 (a, 24).]—**American f.-l.** The *Erechthites hieracifolia* and the *Lactuca elongata.* [B, 275 (a, 24).]

FIREX, n. According to Ruland and Johnson, oil. [L, 94 (a, 21).]

FIRFIR, n. According to Ruland and Johnson, a red color. [L, 94 (a, 21).]

FIRING, n. Fir'i^{2}n^2. Of the veterinarians, the application of the actual cautery. [a, 34.]

FIRMIANA (Lat.), n. f. Fu^{5}rm(fi^{2}rm)-i^{2}-an(a^{3}n)'a^{3}. From *Firmius*, a Roman proper name. The genus *Sterculia*. [B, 34 (*a*, 24).]—**F. chinensis, F. platanifolia.** The *Sterculia platanifolia*. [B, 173 (*a*, 24).]

FIRMISTERNIAL, adj. Fu^{5}rm-i^{2}-stu^{5}rn'i^{2}-a^{2}l. From *firmus*, firm, and *sternum*, the breast-bone. Having a fixed sternum; of or pertaining to the *Firmisternia*, which are a division of the *Batrachia salientia*, comprising the true frogs; so called because the cartilaginous bands between the adjacent ends of the coracoid and precoracoid bones are firmly united. [D. S. Jordan (B).]

FIRNISS (Ger.), n. Fer'ni^{2}s. See VERNIX.—**F. des Fötus.** See VERNIX *caseosa*.—**F'sumach.** The *Rhus typhina*. [L, 80.]

FIRSTE (Ger.), n. Ferst'e^{2}. A crest. [L, 31.]

FIRST-OF-MAY, n. Fu^{5}rst-o^{2}v-ma. The *Saxifraga granulata*. [B, 275 (*a*, 24).]

FIRSUN, n. Fu^{5}r'su^{3}n. The *Ulex europæus*. [A, 505 (*a*, 21).]

FIR-WOOL, n. Fu^{5}r-wu^{4}l'. Ger., *Fichtenwolle*. The leaves of *Pinus silvestris* and other European firs and pines converted into a fibrous substance by pounding; used in Germany as a local application in chronic rheumatism. It is sometimes made into clothing for rheumatic persons. [B, 5 (*a*, 24).]—**F.-w. extract.** An extract made from the leaves of *Pinus silvestris*. [B, 5 (*a*, 21).]—**F.-w. oil.** See PINE-*needle oil*.

FIS, n. In Japan, the genus *Trapa*. [B, 121 (*a*, 24).]

FISARUM, n. Of Ruland and Johnson, a confection of an ammoniacal salt. [L, 94 (*a*, 21).]

FISBEAELTO, n. In Abyssinia, the *Woodfordia floribunda*. [B, 121 (*a*, 24).]

FISCH (Ger.), n. Fi^{2}sh. See FISH.—**F'bein.** See the major list.—**F'beschreibung.** See ICHTHYOGRAPHY.—**F'blase.** See *Air*-BLADDER.—**F'blasepräservativ.** A condom made of a fish's bladder.—**F'erwelde.** The *Salix viminalis*. [B, 180 (*a*, 24).]—**F'essen.** See ICHTHYOPHAGY.—**F'gallerte.** See GELATIN.—**F'gift.** Fish poison. [A, 319 (*a*, 21).]—**F'haut.** See ICHTHYOSIS.—**F'kiemen.** See GILLS and BRANCHIÆ.—**F'körner.** See the major list.—**F'lehre.** See ICHTHYOLOGY.—**F'öl.** Fish-oil. Cf. ICHTHYOL.—**F'reiher.** See ARDEA *cinerea*.—**F'schuppenansatz, F'schuppenausschlag, F'schuppenkrankheit.** See ICHTHYOSIS.—**F'thran.** 1. Whale-oil. 2. Fish-oil, especially cod-liver oil. [B, 180 (*a*, 21); L, 135 (*a*, 14).]—**F'wurzel.** The *Scrophularia nodosa*. [B, 180 (*a*, 24).]—**Lanzettf'.** See AMPHIOXUS *lanceolatus*.—**Schellf'.** See GADUS *æglefinus*.—**Stockf'.** Dried cod-fish. [*a*, 14.]

FISCHBEIN (Ger.), n. Fi^{2}sh'bin. See WHALEBONE and *Os* SEPIÆ.—**Gebranntes F.** See *Os* SEPIÆ *ustum*.—**Weisses F.** See *Os* SEPIÆ.

FISCHKÖRNER (Ger.), n. pl. Fi^{2}sh'ku^{5}rn-e^{2}r. The dried fruits of *Anamirta cocculus*. [B, 180 (*a*, 24).]—**F'strauch.** The genus *Anamirta*. [B, 180 (*a*, 24).]

FISCHLEIM (Ger.), n. Fi^{2}sh'lim. 1. Isinglass. 2. A gum exuded by *Penœa sarcocolla* and *Penœa squamosa*. [B, 180 (*a*, 24).]—**F'gummi.** See *F.* (2d def.) and SARCOCOLLA.—**F'pflaster.** See *Emplastrum* ICHTHYOCOLLÆ.—**F'strauch.** The genus *Penœa*. [B, 180 (*a*, 24).]—**F'zungen.** A variety of isinglass. [B, 180 (*a*, 24).]—**Gemeiner F'strauch.** The *Penœa sarcocolla*. [B, 180 (*a*, 24).]—**Krantzstacheliger F'strauch.** The *Penœa mucronata*. [B, 180 (*a*, 24).]—**Schuppiger F'strauch.** The *Penœa squamosa*. [B, 180 (*a*, 21).]

FISETIC ACID, FISETIN, n's. Fi^{2}s-e^{2}t'i^{2}k, fi^{2}s'e^{2}t-i^{2}n. Fr., *acide fisétique, fisétine*. Ger., *Fisetinsäure, Fisetin*. Of Chevreul, quercitin (obtained from *Rhus cotinus*). [B, 5, 244 (*a*, 27).]

FISH, n. Fi^{2}sh. Gr., ἰχθύς. Lat., *piscis*. Fr., *poisson*. Ger., *Fisch*. It., *pesce*. Sp., *pez*. One of a class of the *Vertebrata* which live in water, respire by means of gills, have a heart (when it exists) with a single auricle and a single ventricle (with one exception, the *Lepidosiren*, which has two auricles and a single ventricle), cold blood, limbs (when present) modified into fins, and a skin either naked or covered with scales or bony plates. As a rule, they are oviparous, a few, however, being viviparous. By Linnæus they were divided into *Amphibia nantia*, *Pisces apodes*, *Pisces jugulares*, *Pisces thoracici*, and *Pisces abdominales*; by Cuvier into the *Acanthopterygii*, *Chondropterygii*, and *Malacopterygii*; by Agassiz into the *Cycloidei*, *Ctenoidei*, *Ganoidei*, and *Placoidei*, according to the shape of their scales; by Müller into the *Leptocardia*, *Cyclostomata*, *Teleostei*, *Ganoidei*, and *Selachia*; by Günther into the *Palæichthyes*, *Teleostei*, *Cyclostomata*, and *Leptocardii*; by Huxley into the *Pharyngobranchii*, *Marsipobranchii*, *Elasmobranchii*, *Ganoidii*, *Teleostei*, and *Dipnoi*; by Cope into the *Holocephali*, *Selachii*, *Dipnoi*, *Crossopterygii*, and *Actinopteri*. Hæckel and Gill exclude from the f'es proper the *Marsipobranchii*, *Pharyngobranchii*, and *Dipnoi* of Huxley. [L.]—**Bony f'es.** See *Osseous f'es*.—**Cartilaginous f'es.** See CHONDROPTERYGII.—**Ctenoid f'es.** See CTENOIDEI.—**Cycloid f'es.** See CYCLOIDEI.—**File-f'es.** See BALISTIDÆ.—**F.-belly.** The *Cnicus heterophyllus*. [A, 505 (*a*, 21).]—**F'berries.** The *Cocculus indicus*. [B, 81 (*a*, 21).]—**F. leaves.** The *Potamogeton natans*. [A, 505 (*a*, 21).]—**F.-man.** See *Air*-BLADDER.—**F.-mint.** The *Mentha aquatica*. [B, 275 (*a*, 24).]—**F.-poison.** See COCCULUS *indica* and F.-POISON-PLANT.—**F.-poisoning.** Fr., *intoxication par des poissons*. Ger., *Fischvergiftung*. 1. A local irritation produced by a wound from certain f'es, such as the sting-ray, etc.; this is septic from slime, etc., on the f. In other f'es (*Thalassophryne*) a projecting spine is associated with a poison-secreting gland, and the contents of the latter are forced into any wound made by the spine. 2. Poisoning by eating the flesh of some f'es at certain localities and seasons of the year. 3. The toxic effects of certain ptomaines formed in decomposing f. The symptoms are choleraic, paralytic, or exanthematic. With the first there are vertigo, headache, pallor, thirst, abdominal pain, diarrhœa, and anuria; with the second the preceding symptoms are present, as well as mydriasis, ptosis, decrease of body temperature, weakness of the heart's action, and eventually coma and death. In the exanthematic form there are fever and an erysipelatous eruption, followed by desquamation. [*a*, 34.]—**F.-poison-plant.** See the major list.—**Ganoid f'es.** See GANOIDEI.—**Jelly-f'es.** See MEDUSIDÆ.—**Osseous f'es.** Fr., *poissons osseux*. Of Cuvier, an order of f'es closely corresponding to the *Teleostei*. [L.]—**Star-f'es.** The *Asteroidea*. [L, 353 (*a*, 27).]

FISH-POISON-PLANT, n. Fi^{2}sh'poiz'n-pla^{3}nt. A term for various plants used for poisoning fish.—**Brazilian f.-p.-p.** The *Serjania lethalis* and the *Paullinia pinnata*. [B, 275 (*a*, 24).]—**Ceylon f.-p.-p.** The *Hydnocarpus venenatus*. [B, 275 (*a*, 24).]—**East Indian f.-p.-p.** The *Walsura piscidia*. [B, 275 (*a*, 24).]—**Jamaica f.-p.-p.** The *Piscidia erythrina*. [B, 19.]—**South Sea Islands f.-p.-p.** The *Lepidium piscidium*. [B, 275 (*a*, 24).]—**Timboe f.-p.-p.** The *Serjania lethalis*. [B, 275 (*a*, 24).]—**West Indian f.-p.-p.** The *Tephrosia* (*Galega*) *toxicaria*. [B, 275 (*a*, 24).]

FISKI-TSAO (Chin.), n. The finest grade of tea obtained from the leaf-buds. [L, 105 (*a*, 14).]

FISLUC (Ar.), n. The *Pistaccia vera*. [B, 88 (*a*, 14).]

FISMA, n. In Bokhara, the *Morus alba*, var. *tatarica*. [B, 121 (*a*, 24).]

FISO, n. At Samoa, the *Saccharum floridulum*. [B, 121 (*a*, 24).]

FISOA, n. At Samoa, the *Colubrina asiatica*. [B, 121 (*a*, 24).]

FISSICOSTATE, adj. Fi^{2}s-i^{2}-ko^{2}st'at. Lat., *fissicostatus* (from *findere*, to cleave, and *costa*, a rib). Fr., *fissicoté*. Multicostate (said of leaves). [A, 316 (*a*, 24).]

FISSICULATIO (Lat.), n. f. Fi^{2}s-si^{2}k-u^{2}(u^{4})-la(la^{3})'shi^{2}(ti^{2})-o. Gen., *-o'nis*. From *fissiculare*, to open upon the entrails [Apuleius]. Fr., *f*. An incision exposing a part (obs.). [L, 41, 94.]

FISSIFLORUS (Lat.), adj. Fi^{2}s-si^{2}-flo'ru^{3}s(ru^{4}s). From *findere*, to cleave, and *flos*, a flower. Fr., *fissiflore*. Ger., *gespaltenblüthig*. Composed of flowers with fissured corollas. The *Fissifloræ* of Reichenbach are an order of the *Synblastæ* so characterized. [B, 1, 121, 170 (*a*, 24).]

FISSIFOLIUS (Lat.), adj. Fi^{2}s-si^{2}-fol(fo^{2}l)'i^{2}-u^{3}s(u^{4}s). From *findere*, to cleave, and *folium*, a leaf. Fr., *fissifolie*. Having linear or pinnatifid leaves. [L, 80.]

FISSIFORMIS (Lat.), adj. Fi^{2}s-si^{2} fo^{2}rm'i^{2}s. From *findere*, to cleave, and *forma*, form. Fr., *fissiforme*. Ger., *spaltförmig*. Having a cleft form. [L.]

FISSILABRUS (Lat.), adj. Fi^{2}s-si^{2}-lab(la^{3}b)'ru^{3}s(ru^{4}s). From *findere*, to cleave, and *labrum*, the lip. Fr., *fissilabre*. Ger., *spaltlippig*. Having cleft lips. The *Fissilabra* are a tribe of the *Coleoptera* so characterized. [L, 180.]

FISSILE, adj. Fi^{2}s'si^{2}l. Lat., *fissilis* (from *findere*, to cleave). Fr., *f*. Ger., *spaltig*. Susceptible of cleavage or of fissiparity. [A, 301, 385.]

FISSILINGUIS (Lat.), adj. Fi^{2}s-si^{2}-li^{2}n^{2}'gwi^{2}s. From *findere*, to cleave, and *lingua*, the tongue. Fr., *fissilingue*. Ger., *spaltzungig*. Having the tongue cleft. The *Fissilinguia* are a group of the *Lacertilia* so characterized. [B, 28 (*a*, 27); L, 147.]

FISSINERVIUS (Lat.), adj. Fi^{2}s-si^{2}-nu^{5}r(ne^{2}r)'vi^{2}(wi^{2})-u^{3}s(u^{4}s). From *findere*, to cleave, and *nervus*, a nerve. Fr., *fissinerve*. Having the folioles furnished with three nerves, the two lateral ones being bifid. [L, 180.]

FISSION, n. Fi^{2}sh'u^{3}n. Lat., *fissio* (from *findere*, to cleave). Fr., *f*. Ger., *Zweitheilung*. A mode of generation or of cell-division in which the organism separates into two or more equal parts, each of which becomes developed to the size and form of the original. [A, 12; B, 291 (*a*, 24); J, 87, 121; L, 11.]—**Binary f.** F. into two parts. [L, 121, 322 (*a*, 27).]

FISSIPARISM, FISSIPARITY, n's. Fis-i^{2}p'a^{2}r-i^{2}z'm, -i^{2}p-a^{2}r'i^{2}t-i^{2}. From *findere*, to cleave, and *parere*, to bring forth. Fr., *fissiparité, fissiparie*. See *Fissiparous* GENERATION.

FISSIPAROUS, adj. Fi^{2}s-si^{2}p'a^{2}r-u^{3}s. Lat., *fissiparus*. Fr., *fissipare*. Multiplying or propagating by fission. [J.]

FISSIPATION, n. Fi^{2}s-si^{2}-pa'shu^{3}n. See FISSION.

FISSIPED, FISSIPEDAL, FISSIPEDATE, adj's. Fi^{2}s'-si^{2}-pe^{2}d, fi^{2}s-si^{2}p'e^{2}d-a^{2}l, -at. Lat., *fissipes* (from *findere*, to cleave, and *pes*, the foot). Fr., *fissipède*. Ger., *spaltfüssig*. Having the feet cleft into separate toes. The *Fissipedes* are: Of Blumenbach, an order of the *Mammifera*; of Latreille and others, a family of the *Pachydermata*. The *Fissipedia* are a suborder of the *Carnivora*. [L, 153, 180, 354.]

FISSIPENNIS (Lat.), adj. Fi^{2}s-si^{2}-pe^{2}n'ni^{2}s. From *findere*, to cleave, and *penna*, a feather. Fr., *fissipenné*. Ger., *spaltflügelig*. Having cleft wings. The *Fissipennes* are a tribe of diurnal *Lepidoptera* so characterized. [L, 180.]

FISSIPES (Lat.), adj. Fi^{2}s'si^{2}pez(pas). Gen., *-sip'edis*. See FISSIPED.

FISSIROSTRAL, FISSIROSTRATE, adj's. Fi^{2}s-i^{2}-ro^{2}st'-ra^{2}l, -rat. From *findere*, to cleave, and *rostrum*, a beak. Fr., *fissirostre*. Having the bill cleft far beyond the base of its horny part. The *Fissirostres* of Cuvier are a family of the *Passeres* so characterized. [B, 28 (*a*, 27); L, 180, 221, 343.]

FISSLE, n. Fi^{2}s'l. A thistle. [A, 505 (*a*, 21).]

FISSUR (Ger.), n. Fes-sur'. See FISSURE.—**Afterf.**—See FISSURE *of the anus*.—**Obere F. der Augenhöhle.** See *Sphenoidal* FISSURE.—**Untere F. der Augenhöhle.** See *Infra-orbital* FISSURE.

FISSURA (Lat.), n. f. Fi^{2}s-su^{2}(su)'ra^{3}. See FISSURE.—**F. abdominalis.** Ger., *Bauchspalte*. A congenital deficiency in the

abdominal wall through which the contents of the abdomen protrude. [Förster (α, 29).]—**F. abdominalis completa.** Ger., *vollständige Bauchspalte.* A congenital deficiency in the anterior abdominal wall from the thorax to the pelvis. [*l. c.* (α, 29).]—**F. ani.** See FISSURE *of the anus.*—**F. anterior.** See *Anterior* FISSURE. [I, 3.]—**F. anterior cerebri, F. anterior inferior et externa.** See FISSURE *of Sylvius* and *Anterior* FISSURE.—**F. anterior mediana medullæ oblongatæ.** See *Anterior median* FISSURE *af the medulla oblongata.*—**F. antitragohelicina.** A f. in the cartilage of the external ear between the processus helicis caudatus and the antitragus. [F.]—**F. Bichatii.** See *Transverse cerebral* FISSURE. —**Fissuræ branchiales.** See *Visceral* CLEFTS.—**F. calcarina.** See *Calcarine* FISSURE.—**F. calloso-marginalis.** See *Callosomarginal* FISSURE.—**F. canalis Falloppii.** See HIATUS *Falloppii.* —**F. capillaris.** A condition in which the hairs become cleft at their free extremities.—**F. centralis.** 1. See *Central* FISSURE. 2. See FISSURE *of Sylvius.* 3. See *Median* FISSURE. 4. See *Precentral* FISSURE.—**F. centralis cerebelli.** See *Peduncular* SULCUS. —**F. cerebelli longitudinalis.** A broad, shallow groove on the inferior surface of the cerebellum separating the hemispheres. [L, 332 (α, 29).]—**F. cerebelli transversa.** See *Inferior transverse* FISSURE.—**F. cerebri.** See FISSURE *of the cerebrum.*—**F. (cerebri) centralis.** See *Central* FISSURE.—**F. cerebri collateralis.** See *Callateral* FISSURE.—**F. cerebri horizontalis.** See *Calcarine* FISSURE.—**F. cerebri longitudinalis.** See *Intercerebral* FISSURE.—**F. cerebri inferior.** See FISSURE *of Sylvius.*—**F. cerebri inferior externa.** See FISSURE *of Sylvius.*—**F. cerebri lateralis.** See FISSURE *of Sylvius.*—**F. cerebri lateralis anterior.** The anterior or ascending branch of the fissure of Sylvius. [L, 332 (α, 29).]—**F. cerebri lateralis posterior.** The posterior or horizontal branch of the fissure of Sylvius. [L, 332 (α, 29).]—**F. cerebri magna.** See *Transverse cerebral* FISSURE.—**F. cerebri parieto-occipitalis.** See *Occipital* FISSURE.—**F. cerebri parva.** See *Inferiar transverse* FISSURE.—**F. cerebri posterior.** See *Occipital* FISSURE.—**F. cerebri superior.** See FISSURE *of Sylvius.* —**F. cerebri transversa.** See *Transverse* FISSURE *of the brain.*—**F. cerebri transversa anterior** (seu **magna**). See *Great transverse* FISSURE *of the brain.*—**F. cerebri transversa parva.** See *Inferior transverse* FISSURE.—**F. cerebri transversa posterior** [Schwalbe]. See *Transverse cerebral* FISSURE.—**F. chorioidea.** See RIMA and *Transverse cerebral* FISSURE.—**F. collateralis.** See *Collateral* FISSURE.—**F. contrajacens.** See CONTRAFISSURA.—**F. cruciata.** See *Cruciate* FISSURE.—**F. cruciata of the præcuneus.** See *Precuneal* FISSURE.—**F. dorsi mesalis.** In teratology, a fissure in the middle line of the back. [L.]—**F. endomesognathica.** A fissure occasionally found in the superior maxilla between the endognathion and the mesognathion. [L, 332.] —**F. ethmoidalis.** See *Ethmoidal* FISSURE.—**F. fimbriæ.** See *Fimbrial* FISSURE.—**F. fossæ rhomboidalis longitudinalis media.** A slight median groove in the floor of the fourth ventricle. [L, 7 (α, 29).]—**F. fossæ Sylvii anterior** (seu **ascendens**). See *Presylvian* FISSURE.—**F. fossæ Sylvii horizontalis** (seu **posterior**). The posterior or horizontal branch of the fissure of Sylvius. [α, 29.]—**F. foveæ rhomboidalis longitudinalis** (seu **media**). See *F. fossœ rhambaidalis longitudinalis media.*—**F. frontalis primus.** See *Superfrontal* FISSURE.—**F. frontalis secundus.** See *Inferior frontal* FISSURE.—**F. frontalis tertius.** See *Subfrontal* FISSURE.—**F. genitalis.** A fissure of the genitals, producing when complete the condition known as hermaphrodism.—**F. genualis.** A fissure on the mesal aspect of the cerebrum of Ungulates, near the genu of the callosum, and homologized by Krause with his sulcus fornicatus superior (the callosal fissure of Wilder). [I, 94.]—**F. Glaseri.** See *Glaserian* FISSURE.—**F. hippocampi.** See *Hippocampal* FISSURE.—**F. horizontalis cerebri.** See *Calcarine* FISSURE.—**F. incisiva.** See *Incisor* FISSURE.—**F. incisiva facialis.** A fissure sometimes found on the outer surface of the superior maxilla, corresponding to the incisor fissure. [L, 332.]—**F. incisiva intermedia.** See *F. endomesognathica.*—**F. incisiva lateralis.** See *F. meso-exognathica.*—**F. incisiva medialis.** See *F. endomesognathica.*—**F. incisiva palatina.** See *Incisor* FISSURE.—**F. inferior (cerebri).** See *Basisylvian* FISSURE.—**F. interinsularis.** See *Transinsular* FISSURE.—**Fissuræ interlobulares hepatis.** Fissures which separate the lobes of the liver. [α, 29.]—**F. interparietalis.** See *Intraparietal* FISSURE.—**F. intervertebralis.** See FORAMEN *intervertebrale posterius.*—**F. iridis.** See COLOBOMA *iridis.*—**F. laryngea pharyngis.** The pharyngeal opening of the larynx. [L, 332 (α, 29).]—**F. lateralis** [Henle]. The fissure of Sylvius. [I, 17 (K).]—**F. lateralis anterior (cerebri).** See *Presylvian* FISSURE.—**F. lateralis posterior (cerebri).** The posterior limb of the fissure of Sylvius. [I, 6 (K).]—**F. limbica.** Fr., *scissure limbique.* Of Broca, the supercallosal, precuneal, and collateral fissures surrounding his *grand lobe limbique.* [I, 15, 17, 100.]—**F. longitudinalis anterior.** See *Ventral mesal* FISSURE *of the spinal cord.*—**F. longitudinalis anterior cerebri.** See *Intercerebral* FISSURE.—**F. longitudinalis anterior medullæ spinalis.** See *Ventral mesal* FISSURE *of the spinal card.*—**F. longitudinalis cerebelli.** See VALLICULA.—**F. longitudinalis cerebri.** See *Intercerebral* FISSURE.—**F. longitudinalis dorsalis.** See *Dorsal mesal* FISSURE *af the spinal cord.*—**F. longitudinalis fossæ rhomboideæ.** See *F. fossœ rhomboidalis longitudinalis media.*—**Fissura longitudinalis major.** See *Intercerebral* FISSURE.—**F. longitudinalis posterior medullæ spinalis.** See *Dorsal mesal* FISSURE *of the spinal cord.*—**F. longitudinalis superior.** See *Superior longitudinal* FISSURE.—**F. longitudinalis ventralis medullæ oblongatæ.** See *Ventral mesal* FISSURE *of the oblongata.*—**F. magna (cerebri).** See *Intercerebral* FISSURE. —**F. magna posterior.** See *Transverse* FISSURE *of the brain.*—**F. magna Sylvii.** See FISSURE *of Sylvius.*—**Fissura marsupialis.** See INCISURA *marsupialis.*—**F. mastoidea squamosa.** A small fissure in the line of junction of the mastoid and squamous portions of the temporal bone. [α, 29.]—**F. media fossæ rhomboideæ.** See *Dorsal mesal* FISSURE *of the spinal cord.*—**F. mediana anterior medullæ spinalis.** See *Ventral mesal* FISSURE *of the spinal cord.*—**F. mediana posterior medullæ spinalis.** See *Darsal mesal* FISSURE *af the spinal cord.*—**F. medullæ oblongatæ longitudinalis anterior.** The ventral mesal fissure of the oblongata. [L, 7 (α, 29).]—**F. medullæ oblongatæ longitudinalis posterior.** The dorsal mesal fissure of the oblongata. [L, 7 (α, 29).]—**F. medullæ spinalis (longitudinalis) [seu mediana] anterior.** See *Ventral mesal* FISSURE *of the spinal cord.*—**F. medullæ spinalis (longitudinalis) [seu mediana] posterior.** See *Posterior median* FISSURE *of the spinal cord.*—**F. meso-exognathica.** A fissure occasionally found in the superior maxilla between the exognathion and the mesognathion. [L, 332.]—**F. occipitalis.** See *Occipital* FISSURE.—**F. occipitalis externa.** See *Exoccipital* FISSURE—**F. occipitalis horizontalis.** See *Hippocampal* FISSURE.—**F. occipitalis interna** [Pansch]. See *Occipital* FISSURE.—**F. occipitalis minor.** See *Inferior occipital* FISSURE.—**F. occipitalis perpendicularis externa, F. occipitalis perpendicularis interior, F. occipitalis posterior** [Wagner]. See *Occipital* FISSURE.—**F. olfactoria.** See *Olfactory* FISSURE.—**F. orbitalis.** See *Orbital* FISSURE.—**F. orbitalis inferior.** See *Sphena-maxillary* FISSURE and *Infra-arbital* FISSURE. —**F. orbitalis superior.** See *Sphenoidal* FISSURE.—**F. oris.** The mouth in its restricted sense. [L, 332.]—**F. ossium.** A traumatic fissure of a bone. [A, 326 (α, 21).]—**F. palatina.** See *Cleft* PALATE. —**F. pallii.** See *Intercerebral* FISSURE.—**F. palpebrarum.** The cleft between the eyelids. [L, 332.]—**F. parallela.** See *Supertemporal* FISSURE.—**F. parieto-occipitalis, F. parieto-occipitalis interior.** See *Occipital* FISSURE.—**F. perpendicularis externa.** The lateral part of the occipital fissure. [I.]—**F. perpendicularis interna.** The mesal part of the occipital fissure. [I.]—**F. petrobasilaris.** A fissure, partly filled by connective tissue or ossicles, between the petrous portion of the temporal bone and the occipital and sphenoid bones. It unites the foramen lacerum medius and the jugular foramen. [L, 31, 332.]—**F. petrosa superficialis.** See HIATUS *Fallappii.*—**F. petroso-angularis.** A fissure between the apex of the pyramidal portion of the petrous portion of the temporal bone and the great wing of the sphenoid bone. [L, 31, 332.]—**F. petroso-mastoidea.** See *F. tympanico-mastoidea.*—**F. petrososquamosa, F. petro-squamosa (ossis temporis).** See *Petrosquamous* FISSURE.—**F. petro-tympanica (ossis temporis).** See *Glaserian* FISSURE.—**F. pilaris.** See *F. capillaris.*—**F. posterior** [Burdach]. Ger., *Hinterspaltc.* The occipital surface of the cerebral hemisphere, nearly corresponding to the calcarine fissure. [I, 3 (K).]—**F. posterior cerebri.** See *Occipital* FISSURE.—**F. pterygoidea, F. pterygopalatina.** The space between the lower ends of the pterygoid plates of the ethmoid bone, into which the pterygoid process of the palate bone fits. [L, 31, 332.]—**F. pudendi.** See CLEFT *of the vulva.*—**F. Rolandi.** See *Central* FISSURE.—**F. rostralis.** A fissure on the mesal aspect of the cerebrum of Ungulates, near the rostrum of the callosum. [I, 94.]—**F. semilunaris.** See *Calcarine f.*—**F. sphenoidalis (superior).** See *Sphenoidal* FISSURE.—**F. sphenomaxillaris.** See *Sphena-maxillary* FISSURE.—**F. spheno-petrosa.** See *F. petroso-angularis.*—**F. spinalis.** See SPINA *bifida.*—**F. sterni, F. sterni congenita.** See *Congenital* FISSURE *of the sternum.*—**F. superior (cerebri).** Ger., *Oberspalte.* Of Burdach, the space between the lateral surface of the insula and the ental surface of the operculum. [I, 3 (K).]—**F. Sylvii.** See FISSURE *of Sylvius.*—**F. tegmenti tympani.** A fissure occurring occasionally in the temporal bone between the petroso-squamous fissure and the hiatus Falloppii. [L, 332.]—**F. temporalis inferior.** See *Subtemporal* FISSURE.—**F. temporalis superior.** See *Supertemporal* FISSURE.—**F. thoracis.** In teratology. a congenital deficiency in the chest-wall. [α, 29.]—**F. transversa anterior (cerebri).** See *Transverse* FISSURE *af the brain.*—**F. transversa cerebelli.** See *Peduncular* FISSURE.—**F. transversa cerebri.** See *Transverse* FISSURE *of the brain.*—**F. transversa magna.** See *Grcat transverse* FISSURE *of the brain.*—**F. transversa parva.** See *Peduncular* FISSURE.—**F. tympanico-mastoidea.** A small fissure between the mastoid portion of the temporal bone and the posterior margin of the external auditory meatus, in which are the openings of the canalis mastoideus. [L, 31, 332.]—**F. tympano-squamosa.** See *Glaserian* FISSURE.—**F. urethræ completa.** See EPISPADIAS *penis.*—**F. urethræ incompleta.** See EPISPADIAS *glandis.*—**F. urethræ superior.** See ANASPADIAS.—**F. urethræ superior cum inversione.** See EPISPADIAS.—**F. ventri lateralis.** In teratology, a fissure on the side of the abdomen. [L.]—**F. ventralis.** See *Ventral mesal* FISSURE *of the spinal cord.*—**F. ventri mesalis.** In teratology, a fissure in the median line of the belly. [L.]—**F. vesicæ congenita.** See *Congenital* FISSURE *of the bladder.*—**F. vesicogenitalis.** Fissure of the bladder and genitals. [α, 34.]—**F. vulvæ.** See CLEFT *of the vulva.*—**F. zygomatico-sphenoidalis.** A space sometimes found between the orbital surface of the great wing of the sphenoid bone and that of the malar bone. [L, 332.]

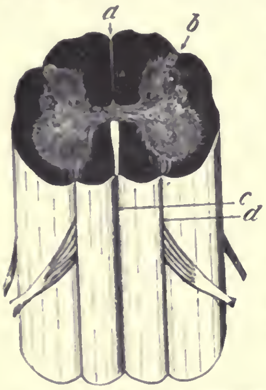
FISSURAIRE (Fr.), adj. Fes-su^6-ra^{2}r. Fissure-like. [A, 385.]

FISSURAL, adj. Fi^{2}s′su^{2}r-a^{2}l. Pertaining to a fissure.

FISSURATION, n. Fi^{2}s-su^{2}r-a′shu^{3}n. Fr., *f., fendillement.* Ger., *Spaltung.* The formation of a fissure.

FISSURE, n. Fi^{2}s′su^{2}r. Gr., ῥαγάς, ῥῆγμα. Lat., *fissura* (from *findere*, to cleave). Fr., *f., scissure, sillon, gerçure.* Ger., *Fissur, Spalte, Einriss, Furche.* It., *fessura.* Sp., *cisura, fisura.* A cleft or narrow slit, made by the parting or division of a structure or by a narrow infolding of its surface. [A, 326 (α, 21); C, 1.]—**Abdominal f.** Lat., *fissura abdominalis.* Ger., *Nabelschnurbruch, Bauchfurche.* A separation of the recti abdominales above and below the umbilicus. with separation of the cutaneous edges and exposure of the peritonæum. Actually a large umbilical hernia. [α, 34.] —**Accessory f.** Fr., *f. accessoire.* Ger., *Hilfsspalte.* The inferior end of the canal of the cartilaginous part of the Eustachian tube. [F.]—**Adoccipital f.** Of Wilder, a cerebral f. inconstant, but deep when present, across the caudal part of the præcuneus, forming an acute angle with the occipital f., and sometimes concealed within

its depths. [I, 98.]—**Ammon's f.** A pyriform f. or opening in the lower portion of the sclerotic during the early fœtal period, with its broader extremity toward the optic nerve and its smaller extremity directed forward. When this f. becomes closed, the globe is supposed to execute a movement of rotation from within outward and to retain for some time, on the outer side of its posterior pole, a protuberance covered by a thin membrane which closes the sclerotic f. ["Arch. f. Ophth.," iv, l, p. 1, 1858 (F).]—**Amygdaline f.** Of Wilder, a cerebral f. on the mesal aspect of the tip of the temporal lobe, collocated with the amygdala; it probably represents the relatively more extensive basirrhinal f. in animals, part of Broca's *scissure limbique.* ["Jour. of Nerv. and Ment. Dis.," p. 351 (I, 98).]—**Anal f.** See *F. of the anus.*—**Anterior f.** Lat., *fissura anterior.* Ger., *Vorderspalte.* Of Burdach, a cerebral f. vaguely indicated, probably the presylvian f. [I, 3.]—**Anterior (longitudinal) f. of the spinal cord.** See *Anterior median f. of the spinal cord.*—**Anterior lateral f. of the spinal cord.** See *Antero-lateral* GROOVE.—**Anterior median f. of the medulla oblongata.** Lat., *fissura anterior mediana* (seu *longitudinalis ventralis*) *medullæ oblongatæ.* Fr., *scissure médiane antérieure de la moelle allongée.* The continuation of the ventral f. of the cephalad into the oblongata, where it terminates at the pons Varolii in the foramen cæcum. It is partly interrupted below by the decussating bundles of the pyramids. [L, 142 (*a*, 29).]—**Anterior median f. of the spinal cord.** Lat., *fissura longitudinalis anterior medullæ spinalis.* Fr., *scissure longitudinale antéricure de la moelle épinière.* Ger., *vordere Medianspalte* (oder *mittlere Spalte*) *des Rückenmarks.* A deep longitudinal groove which occupies the median line of the ventral aspect of the spinal cord. It is broad and shallow. its depth is one third that of the cord, and it is lined by a fold of pia. [K.]—**Anterior occipital f.** See INCISURA *præoccipitalis*.—**Anterior orbital f.** The spheno-maxillary f. [*a*, 29.]—**Antero-lateral f.** A slightly marked depression along the ventro-lateral column of the spinal cord, which separates it into the ventral and lateral columns. [I, 1 (K).]—**Antero-median f.** See *Anterior median f. of the spinal cord.*—**Antero-parietal f.** See *Precentral f.*—**Antorbital f.** Of Owen, a transverse f. on the orbital surface of the frontal lobe, near its cephalic margin. [I, 14.]—**Ape f.** Ger., *Affenspalte.* Under this name have been included at least three different human f's or fissural combinations, in addition to the pomatic f. of apes, which they superficially resemble, viz.: 1. The dorsal outcrop of an unusually deep occipital f. 2. An independent f. on the lateral aspect of the cerebrum between the occipital and temporal regions (the *vordere Occipitalfurche* of Wernicke; the exoccipital f. of Wilder). 3. The combination of these on account of a supergyre which covers the adjacent ends of the occipital and exoccipital f's, so as to connect them superficially, as in a mulatto's brain. [I, 98.]—**Auricular f.** An opening on the inferior surface of the petrous portion of the temporal bone, situated between the vaginal and mastoid processes, through which passes the auricular branch of the pneumogastric nerve. [L, 172 (*a*, 29).]—**Basirrhinal f.** Of Owen, a short f. near the tip of the temporal lobe, constituting the continuation of the olfactory f. beyond the basisylvian f.; it probably represents the amygdaline f. [I, 14.]—**Basisylvian f.** Of Wilder, the basal or stem-portion of the Sylvian f. on the ventral aspect of the cerebrum. [I, 98.]—**Branchial f.** See *Visceral* CLEFTS.—**Calcarine f.** Lat., *fissura calcarina* (seu *horizontalis cerebri*). Fr., *f. calcarine.* Ger., *grosse horizontale Furche.* A f. on the mesal aspect of the cerebrum, extending from near the occipital end and joining the occipital f. It forms the ventral boundary of the cuneus, and is collocated with the calcar. [I, 15.]—**Callosal f.** Fr., *sinus du corps calleux.* Of Owen, the interspace between the dorsal surface of the callosum and the overhanging cortex; it differs from most cerebral f's in having only one wall of gray matter, the other wall, the callosum, consisting of white matter, originally continuous with the hippocampal f.; it is demarcated therefrom in the adult mammal by the splenium. [I, 14, 64, 98, 100.]—**Calloso-marginal f.** Lat., *fissura* (seu *sulcus*) *calloso-marginalis* (seu *medialis fronto-parietalis*). Fr., *scissure sous-frontale, grand sillon du lobe fronto-pariétal.* A f. on the mesal surface of the cerebral hemisphere, dividing the area between the callosum and the margin into nearly equal parts, but turning dorsad opposite the splenium. It constitutes the longer part of Broca's limbic f., but, according to Wilder, itself represents two fissural integers, the supercallosal and the paracentral. [I, 15, 98, 100.]—**Central f.** Lat., *fissura* (seu *sulcus*) *centralis, sulcus rolandica.* Fr., *scissure* (ou *sillon*) *rolandique.* Ger., *Centralfurche Rolando'sche Furche.* A deep and constant f. which crosses the lateral aspect of the cerebrum at about the middle of its length. It begins at or near the dorsal margin and extends ventro-cephalad at an angle of about 67° with the median plane; it extends upon the operculum, and sometimes enters the Sylvian f. [I, 98: Clevenger, "Jour. of Nerv. and Ment. Dis.," April, 1889; Cunningham, "Jour. of Anat. and Phys.," 1890 (I).]—**Cephalic f.** Ger., *Kopfspalte.* A longitudinal slit on each side of the head in all *Schizonemertines.* It varies in length, but is usually of considerable depth, and at its bottom the dark-red brain is visible.



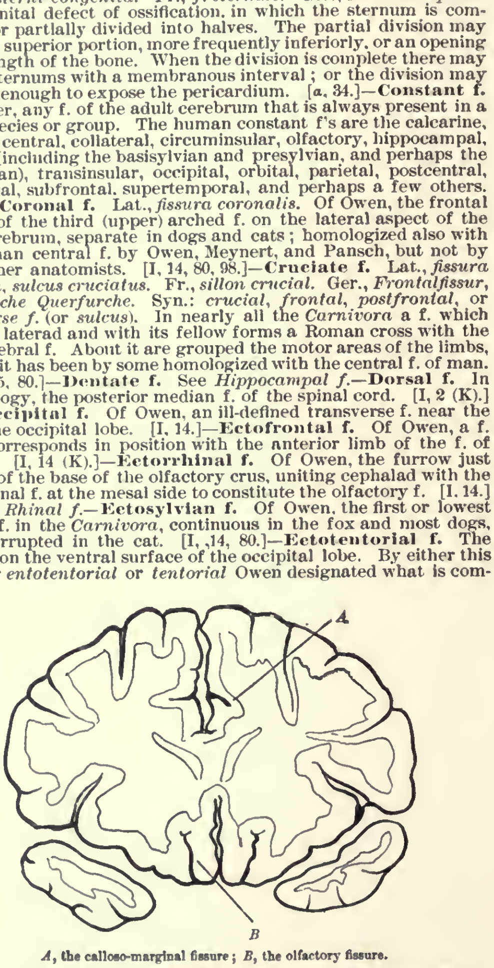


DIAGRAM SHOWING THE FISSURES OF THE SPINAL CORD.

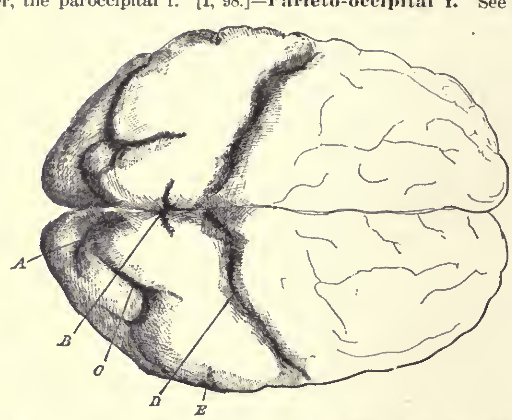
a, the posterior median fissure; *b*, the posterior lateral fissure; *c*, the anterior median fissure; *d*, the anterior lateral fissure.

They are continued into the ciliated duct and are strongly ciliated. During life they are commonly rhythmically opened and shut by a wavy movement. [L, 121 (*a*, 29).]—**Cervical f.** Fr., *f. cervicale.* A cleft, or fistula, produced by a failure of union of the respiratory or visceral clefts that appears in the cervical region. [*a*, 34.]—**Chorioidal f.** See RIMA and *Transverse cerebral f.*—**Circuminsular f.** Of Wilder, the furrow surrounding the base of the insula and, like it, concealed within the Sylvian f. [I, 98.]—**Collateral f.** Lat., *fissura* (seu *sulcus*) *collateralis.* Fr., *scissure collatérale.* Ger., *Collateralfurche.* A f. on the mesal aspect of the cerebrum ventrad of the calcarine f., between the subcalcarine (lingual) and subcollateral (fusiform) gyri; it extends upon the temporal lobe, and was named by Huxley from its collocation with the entocœlian (intraventricular) elevation, *eminentia collateralis.* [I, 15, 98.]—**Complete f.** See *Total f.*—**Congenital f.** A defect of development usually manifested by a solution of continuity, or cleft, in an organ or part of the body. [*a*, 34.]—**Congenital f. of the bladder.** Lat., *fissura vesicæ congenita.* Fr., *bifurcation de la vessiè.* Ger., *Blasenspalte.* A bladder divided into two pouches, such as is found in large land turtles. [*a*, 34.]—**Congenital f. of the cheek.** Fr., *f. congénitale des joues.* A single or double cleft of the cheek, that may be short or may extend from the orbit to the commissure of the lips. It depends upon a failure of union between that upper portion of the first visceral arch from which the superior maxilla is developed. Operative interference is usually successful in the second or third year. [*a*, 34.]—**Congenital f. of the sternum.** Lat., *fissura sterni congenita.* Fr., *f. sternale.* Ger., *Brustbeinspalte.* A congenital defect of ossification, in which the sternum is completely or partially divided into halves. The partial division may be in the superior portion, more frequently inferiorly, or an opening in the length of the bone. When the division is complete there may be two sternums with a membranous interval; or the division may be large enough to expose the pericardium. [*a*, 34.]—**Constant f.** Of Wilder, any f. of the adult cerebrum that is always present in a given species or group. The human constant f's are the calcarine, callosal, central, collateral, circuminsular, olfactory, hippocampal, Sylvian (including the basisylvian and presylvian, and perhaps the subsylvian), transinsular, occipital, orbital, parietal, postcentral, precentral, subfrontal, supertemporal, and perhaps a few others. [I, 98.]—**Coronal f.** Lat., *fissura coronalis.* Of Owen, the frontal portion of the third (upper) arched f. on the lateral aspect of the fox's cerebrum, separate in dogs and cats; homologized also with the human central f. by Owen, Meynert, and Pansch, but not by most other anatomists. [I, 14, 80, 98.]—**Cruciate f.** Lat., *fissura cruciata, sulcus cruciatus.* Fr., *sillon crucial.* Ger., *Frontalfissur, Leuret'sche Querfurche.* Syn.: *crucial, frontal, postfrontal,* or *transverse f.* (or *sulcus*). In nearly all the *Carnivora* a f. which extends laterad and with its fellow forms a Roman cross with the intercerebral f. About it are grouped the motor areas of the limbs, whence it has been by some homologized with the central f. of man. [I, 14, 35, 80.]—**Dentate f.** See *Hippocampal f.*—**Dorsal f.** In embryology, the posterior median f. of the spinal cord. [I, 2 (K).]—**Ectoccipital f.** Of Owen, an ill-defined transverse f. near the tip of the occipital lobe. [I, 14.]—**Ectofrontal f.** Of Owen, a f. which corresponds in position with the anterior limb of the f. of Sylvius. [I, 14 (K).]—**Ectorrhinal f.** Of Owen, the furrow just laterad of the base of the olfactory crus, uniting cephalad with the entorrhinal f. at the mesal side to constitute the olfactory f. [I, 14.] See also *Rhinal f.*—**Ectosylvian f.** Of Owen, the first or lowest arched f. in the *Carnivora,* continuous in the fox and most dogs, but interrupted in the cat. [I, 14, 80.]—**Ectotentorial f.** The outer f. on the ventral surface of the occipital lobe. By either this name or *entotentorial* or *tentorial* Owen designated what is com-

A, the calloso-marginal fissure; *B*, the olfactory fissure.

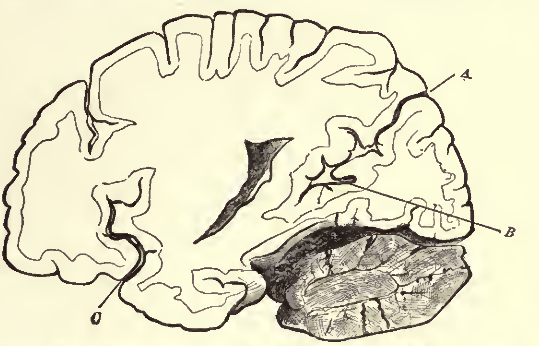
monly called the collateral f., but by which the figures and descriptions do not make clear. [I, 14.]—**Entoccipital f.** Of Owen, an an ill-defined f. on the occipital lobe. [I, 14.]—**Entolambdoidal f.** See *Adoccipital f.*—**Entorbital f.** Of Owen, an inconstant f. between the olfactory and orbital f's. [I, 14.]—**Entorrhinal f.** See *Ectorrhinal f.*—**Entotentorial f.** See *Ectotentorial f.*—**Episylvian f.** Of Wilder, an inconstant dorsal branch of the Sylvian f. [I, 98.]—**Ethmoidal f.** The superior meatus of the nares. [*a*, 29.]—**Exoccipital f.** Of Wilder, the ape f.; the *vordere Occipitalfissur* of Wernicke. [I, 98.]—**External parieto-occipital f., External parieto-occipital f. of the cerebrum, External perpendicular f.** The lateral portion of the occipital f. [L, 142, 149, 172.]—**Falcial f.** Of Owen, a f. on the mesial surface of the frontal lobe, sometimes continuous with the supercallosal f. [I, 14, 80.]—**Fimbrial f.** Lat., *fissura fimbriæ.* A small and constant



depression between the fasciola and the fimbria. [I, 80.]—**First frontal f.** See *Superior frontal f.*—**First temporal** (or **temporo-sphenoidal**) **f.** See *Supertemporal f.*—**F. de la voûte du palais** (Fr.). See *F. of the palate* and *Cleft* PALATE.—**F. for the gall-bladder.** Lat., *fossa cystidis felleæ.* A shallow depression on the lower surface of the right lobe of the liver which contains the gall-bladder. [L, 142, 172.]—**F. glenoïdale** (Fr.). See *Glaserian f.*—**F. in the enamel.** A solution of continuity in the enamel of a tooth, that is usually filled with the modification of cementum that constitutes Nasmyth's membrane. [Tomes (α, 34).]—**F. lateralis.** In the *Sus salvanius*, a straight f. lying between the suprasylvian f. and the longitudinal f. [B.]—**F. of a leaf.** The line of separation between the segments of a cleft leaf, when the division extends about half through its length. [B, 77, 121, 123 (α, 24).]—**F. of Bichat.** See RIMA and *Transverse cerebral f.*—**F. of bone.** Fr., *f. des os.* Ger., *Knochenfurche.* A forcible separation of the osseous fibres that may extend through the entire thickness of the bone through the outer table, or only the compact and areolar tissues, but not passing completely through them. It may be straight, curved, or angular. [Gross, "Surgery," vol. i, p. 926 (α, 34).]—**F. of Glaser, F. of Glaserius.** See *Glaserian f.*—**F. of Rolando.**

A, the fissure of Rolando; *B*, the parietal fissure; *C*, the transverse occipital fissure; *D*, the fissure of Sylvius.

See *Central f.*—**F's of Santorini.** F's, usually two in number, which traverse the cartilaginous meatus auditorius transversely. They are filled up by a fibrous tissue, and are of importance from their favoring the straightening of the meatus during examination of the membrana tympani. [F.]—**F. of Sylvius.** Lat., *fissura Sylvii* (seu *anterior cerebri*, seu *anterior inferior et externa*). Fr., *scissure de Sylvius.* Ger., *sylvische Spalte.* A deep f. of the brain which begins on the outer side of the anterior perforated space, extends outward to the surface of the hemisphere, and divides into a short anterior limb, which ascends to terminate in the lower frontal convolution, and a long posterior one, which forms the boundary between the parietal and temporo-sphenoidal lobes. The island of Reil is situated between the two divisions. [I, 15 (K).]—**F. of the anus.** Lat., *fissura ani.* Ger., *Afterfissur, Mastdarmspalte.* A solution of continuity involving the skin and mucous membrane of the anus, forming inflamed edges and a suppurating groove; it may extend to the sphincter muscle; the irritation of the peripheral nerves often causes excruciating pain, with spasm of the sphincters. [α, 34.]—**F. of the bladder.** Lat., *fissura vesicæ.* 1. A faulty development of the bladder, in which the anterior wall is more or less completely lacking, and the posterior wall is continuous with the skin of the abdomen. The ureters are exposed, as may be the neck of the uterus. There is usually f. or faulty development of the genitals. 2. A superficial ulceration of the mucous membrane of the bladder that may involve the fibrous and muscular coat. [α, 34.]—**F. of the calamus scriptorius.** Lat., *fissura calami scriptorii.* Fr., *scissure de la plume à écrire.* Ger., *Furche der Schreibfeder.* The termination of the mesal f. of the fourth ventricle, at the point corresponding to the apex of the calamus. [I, 47 (K).]—**F. of the cerebrum.** Lat., *fissura* (seu *sulcus*) *cerebri.* Fr., *scissure cérébrale.* Ger., *Hirnspalte.* Any one of the linear depressions of the surface of the cerebrum circumscribing the convolutions more or less completely. They vary in depth from 1 to 30 mm., and in length from 1 to 10 ctm. An adult brain seldom presents an unfissured area more than 22 mm. wide. [I, 15, 98.]—**F. of the chorioid.** A congenital cleft of the chorioid. See COLOBOMA *chorioideæ.* [α, 34.]—**F. of the clitoris.** Fr., *f. du clitoris.* A cleft of the clitoris, resembling f. of the penis. [Arnould, "Mém. de chirur.," t. i, p. 374 (α, 34).]—**F. of the cranium.** A cleft that may involve the skin, cranium, and meninges, exposing the brain in a more or less atrophied condition; or involve the cranial bones alone, forming a hernia cerebri when the cleft is large. [α, 34.]—**F. of the ductus venosus.** Lat., *fossa ductus venosi.* The posterior portion of the longitudinal f. of the liver. It lies between the lobus Spigelii and the left lobe, and lodges the ductus venosus of the fœtus and its remains in the adult. [L, 142, 172.]—**F. of the ear.** A cleft in the lobe of the ear, as from an earring being torn out. [Gross, "Surgery," vol. ii, p. 241 (α, 34).]—**F. of the eyelid.** Fr., *f. palpébrale.* A congenital cleft of the eyelid. [α, 34.]—**F. of the helix.** A slit in the helix of the external ear, above the insertion of the attrahens aurem. [F.]—**F. of the iris.** Fr., *f. iridienne.* A congenital cleft of the iris. See COLOBOMA *iridis.* [α, 34.]—**F. of the lip.** See HARE-LIP.—**F's of the liver.** Clefts in the tissue of the liver which divide that organ into lobes. [α, 29.]—**F's of the lungs.** Clefts which divide the lungs into lobes. [α, 29.]—**F's of the medulla oblongata.** Continuations of the ventral and dorsal mesal f's of the spinal cord, the former ending at the pons Varolii, and the latter terminating in the fourth ventricle. [I, 15 (K).]—**F. of the neck.** See *Cervical f.*—**F. of the nipple.** Fr., *f. du mamelon.* The formation of f's radiating from the nipple to the breast during lactation. It may be superficial or deep, according to the extent of the ulcerative process. [α, 34.]—**F. of the palate.** Fr., *f. palatine, f. de la voûte du palais.* 1. In the embryo, the cleft existing in the hard palate before the union of the two superior maxillæ. [A, 385.] 2. See *Cleft* PALATE.—**F. of the penis.** Fr., *division de la verge.* Ger., *Spaltung des Penis.* A more or less complete cleft from that of the glans to that of the entire organ. In the latter case it is called double penis. [α, 34.]—**F. of the prepuce.** Fr., *f. du prépuce.* Ger., *Vorhautspaltung.* A cleft of the prepuce extending from the corona to the preputial meatus. [α, 34.]—**F. of the rectum.** Lat., *fissura recti.* Ger., *Fissur des Mastdarms.* See *F. of the anus.*—**F. of the scrotum.** Fr., *f. du scrotum.* A cleft of the scrotum that may divide it into two distinct pouches, or may extend so far into the perinæum as to produce the appearance of labia majora and a vagina or hermaphroditism. [α, 34.]—**F. of the soft palate.** Fr., *f. du voile du palais.* A cleft of the soft palate; it may be partial or complete, and is usually associated with f. of the hard palate. [α, 34.]—**F. of the spleen.** Fr., *f. de la rate.* See HILUM *of the spleen.*—**F's of the spinal cord.** See *Anterior median f. of the spinal cord, Lateral f. of the spinal cord*, and *Posterior median f. of the spinal cord.*—**F. of the thorax.** Lat., *fissura thoracis.* A defective development in which there is a median cleft of the sternum. The ribs on one side are widely separated from the sternum; the defective ribs may be free or connected. [α, 34.]—**F. of the tongue.** Fr., *f. de la langue.* 1. A rare cleft of the tongue resembling that of serpents. 2. A f. of the dorsum or side of the tongue reaching into the tissue of that organ; it may be caused by syphilis. [α, 34.]—**F. of the urethra.** Fr., *f. uréthrale.* See EPISPADIAS and HYPOSPADIAS.—**F. of the uterus.** Fr., *division de la matrice.* A more or less complete cleft of the uterus. [α, 34.]—**F. of the uvula.** Ger., *Spaltung der Uvula.* A cleft of the uvula more or less complete; if the latter, the condition is called double uvula. [α, 34.]—**F. of the vena cava.** Lat., *fossa venæ cavæ.* A short f. upon the posterior surface of the liver between the Spigelian and right lobes, which contains the inferior vena cava. [L, 142, 172.]—**F. of the vertebræ.** Fr., *division des vertèbres.* See SPINA *bifida.*—**F. of the vulva.** A solution of continuity of the nymphæ or fourchette resulting from coitus or labor. [α, 34.]—**F. ombilicale** (Fr.). See *Umbilical f. of the liver.*—**F. palatine** (Fr.). See *F. of the palate* and *Cleft* PALATE.—**F. sphinctéralgique** (Fr.). F. of the anus involving the sphincter. [Chassaignac (α, 34).]—**F. tolérable de l'anus** [Mollière] (Fr.), **F. tolérante de l'anus** (Fr.). Of Gosselin, a f. of the anus with comparatively little pain or irritability. [α, 34.]—**Fœtal ocular f.** Fr., *f. oculaire fétale.* Ger., *fötale Augenspalte.* A cleft or interruption in the thick wall which surrounds the lens in the embryonic eye and which consists of the two leaves or laminæ of the secondary ocular vesicle. This f. varies in depth at different periods and in different animals, and reaches sometimes as far as the margin of the lens. When it is not closed in the process of development, it gives rise to a coloboma. [F.]—**Frontal f.** Of Owen, the precentral and supercentral f's of man, the cruciate f. of the *Carnivora.* [I, 14, 80, 98.]—**Glaserian f., Glenoid f.** Lat., *fissura Glaseri* (seu *tympano-squamosa*). Fr., *f. de Glaser.* Ger., *Glaser'sche Fissur* (oder *Ritze*). A small f. in the outer wall of the tympanic cavity, opening into the glenoid fossa. It lodges the processus glacilis of the malleus, and transmits the laxator tympani muscle and the anterior tympanic artery. [F, 31.]—**Great cerebral f.** See RIMA and *Great transverse f. of the brain.*—**Great horizontal f. of the brain.** See *Calcarine f.*—**Great horizontal f. of the cerebellum.** See *Peduncular* SULCUS.—**Great interlobular f.** See *Sylvian f.*—**Great longitudinal f. of the brain.** Lat., *fissura longitudinalis* (seu *dorsalis*, seu *magna*, seu *anterior*) *cerebri.* Fr., *grande scissure longitudinale.* Ger., *grosse Längespalte, längliche Furche.* The deep mesal f. which divides the cerebrum into two hemispheres. [I, 15 (K).]—**Great transverse f. of the brain.** Lat., *fissura cerebri transversa magna.* See *Transverse cerebral f.*—**Hippocampal f.** Lat., *fissura hippocampi* (seu *occipitalis horizontalis*). Fr., *scissure* (ou *partie antérieure de la scissure*) *de l'hippocampe.* Ger., *Hippocampalfurche, Bogenfurche, Ammonsfurche, Ammonshornspalte, gezähnte Spalte.* The cerebral f. which extends from the splenium to near the tip of the temporal lobe and is collocated with the hippocampus major in the middle horn of the lateral ventricle. It is constant in mammals, exists in some, if not all, birds and reptiles, and appears very early, being originally continuous with the callosal f. [I, 15, 98.]—**Horizontal f.** See *Calcarine f.*—**Horizontal f. of the cerebellum.** See *Peduncular* SULCUS.—**Hyposylvian f.** Of Wilder, an inconstant ventral branch of the Sylvian f. [I, 98.]—**Incisor f.** Lat., *fissura incisiva* (*palatina*). Syn.: *sutura incisiva.* A f. separating the intermaxillary portion from the remainder of the superior maxillary bone. [L, 332.]—**Inconstant f.** Of Wilder, a cerebral f. which is not always present in a given species or group, *e. g.*, the subcentral f. [I. 98.]—**Inferior cerebral f.** Lat., *fissura cerebri transversa parva.* See *Inferior transverse f.*—**Inferior collateral f.** In the lower animals, the very slight depression at the emergence of the ventral roots of the spinal nerves, which corresponds to the ventro-lateral groove in man. [L, 13 (α, 29).]—**Inferior frontal f.** Lat., *fissura* (seu *sulcus*) *frontalis inferior.* Fr., *scissure frontale inférieure.* Ger., *untere Frontalfurche* (oder *Stirnspalte*). The subfrontal f. [I.]—**Inferior occipital f.** Lat., *fissura occipitalis minor.* Of Clevenger, a small f. which lies between the second and third occipital convolutions. ["Jour. of Nerv. and Ment. Dis.," Oct., 1879, p. 658 (K).]—**Inferior temporal** (or **temporo-sphenoidal**)



f. Lat., *fissura* (seu *sulcus*) *temporalis inferior.* The subtemporal f. [I.]—**Inferior transverse f.** A f. between the cerebellum and the oblongata through which a fold of the pia enters the fourth ventricle. [L, 31, 332 (a, 29).]—**Infero-lateral f.** See *Calcarine f.*—**Inflected f.** Lat., *fissura inflecta.* A nearly constant f., described by Lausana and Lemoigne, indenting the margin of the cerebrum a little cephalad of the central f. [I, 26, 98.]—**Infra-orbital f.** Lat., *fissura infra-orbitalis* (seu *orbitalis inferior* [2d def.]). Fr., *f. sous-orbitaire* (1st def.). Ger., *untere Fissur der Augenhöhle* (2d def.), *Infra-orbitalspalte* (1st def.). 1. See *Suborbital f.* 2. See *Spheno-maxillary f.*—**Insular f.** Of Wilder, any of the f's crossing the insula. [I, 98.] See *Transinsular f.*—**Intercerebral f.** Of Wilder, the great longitudinal f. of the brain. [I, 98.]—**Intergyral f.** Of Wilder, a cerebral f. demarcating two convolutions. [I, 98.]—**Interhemispheral f., Interhemispheric f.** See *Great longitudinal f. of the brain.*—**Interlamellar f.** One of the sulci which separate the lamellæ of the cerebellum. [I, 14 (K).]—**Interlobar f.** Of Wilder, one of the f's that demarcate the cerebral lobes, they are the central, Sylvian, callosal, hippocampal, occipital, and circuminsular f's. [I, 98.]—**Interlobular f.** See *Longitudinal f.*—**Interlobular f. of the cerebrum.** The great longitudinal f. of the cerebrum. [a, 29.]—**Intermedial f.** Lat., *fissura intermedia.* Of Jensen, an inconstant f. near the end of the Sylvian f. Perhaps homologous with the f. described under the same name in the *Carnivora* by Krueg. ["Ztsch. f. wissensch. Zool.," xxxiii, 1880 (I).]—**Internal parieto-occipital f.** See *Occipital f.*—**Internal perpendicular f.** The portion of the occipital f. which is to be found on the mesal surface of the hemisphere. [L, 149 (a, 29).]—**Interpalpebral f.** See *Palpebral f.*—**Interparietal f.** See *Parietal f.*—**Interpeduncular f.** The depression between the crura cerebri, including the posterior perforated space. [L, 13 (a, 29).]—**Intragyral f.** Of Wilder, one of the smaller cerebral f's that are sometimes developed between the larger f's. [I, 98.]—**Intra-orbital f.** A f. in the dog's brain, between the olfactory bulb and the superorbital f., which Turner has homologized with the orbital or triradiate f. of man. ["Jour. of Anat. and Phys.," xxii, p. 580 (a, 29).]—**Intraparacentral f.** Of Wilder, a nearly constant depression in the paracentral convolution or lobule. [I, 98.]—**Intraparietal f.** See *Parietal f.*—**Lambdoidal f.** 1. Of Owen, the occipital f. 2. Of Wilder, a perhaps transitory, but sharply defined, depression near the occipital end of the cerebrum of three to seven months' fœtuses collocated accurately with the lambdoidal suture. ["Jour. of Nerv. and Ment. Dis.," Aug., 1880 (I); I, 98.]—**Lateral f.** Of Owen, an inconstant f. crossing the mesal surface of the frontal lobe between its margin and the supercallosal or fronto-marginal f.; regarded by Owen as the homologue of a constant f. on the lateral surface of the cerebrum in the dog and cat, near the margin. [I, 14, 80, 98.]—**Lateral f. of the spinal cord.** Lat., *fissura lateralis medullæ spinalis.* See *Antero-lateral* GROOVE.—**Longitudinal f. of the brain.** See *Great longitudinal f. of the brain.*—**Longitudinal f. of the liver.** Lat., *fossa longitudinalis sinistra.* Ger., *linke Sagittalfurche.* A deep groove upon the lower surface of the liver, separating its right and left lobes. At about one third the distance from its posterior extremity it is joined, nearly at a right angle, by the transverse f. The portion anterior to the junction of the transverse f. is called the umbilical f., and that posterior the f. of the ductus venosus. [L, 142, 172.]—**Mamillary f.** Syn.: *mamillary pouch.* A f. in the skin of the *Megaptera longimana* in which the mamillary gland is situated. ["Jour. of Anat. and Phys.," xxii, p. 17 (a, 29).]—**Marginal f.** Lat., *sulcus paracentralis.* Of Owen, a f. on the mesal aspect of the cerebrum parallel with the callosum in most animals, but in man nearly at right angles thereto, and forming the cephalic boundary of the paracentral convolutions, these representing part of the paracentral f. of Wilder. [I, 14, 98.]—**Maxillary f.** A f. on the internal surface of the superior maxilla which runs from the lower part of the orifice of the antrum obliquely downward and forward, and receives the maxillary process of the palate bone. [L, 172 (a, 29).]—**Medial f.** A sulcus parallel with and posterior to the f. of Rolando. It is said by Owen to be well marked in the *Carnivora.* [I, 14 (K).]—**Medifrontal f.** Of Owen, an inconstant f. subdividing the medifrontal convolutions. [I, 14, 98.]—**Medilateral longitudinal f.** See *Intercerebral f.*—**Meditemporal f.** Of Wilder, the inconstant and irregular f's ventrad of the supertemporal f.; included by Ecker under the *sulcus temporalis* and *sulcus temporalis inferior.* [I, 58, 98.]—**Midfrontal f.** See *Medifrontal f.*—**Midoccipital f., Midorbital f.** See *Orbital f.* (1st def.).—**Occalcarine f.** Of Wilder, the common stem of which the occipital and calcarine f's are, as it were, branches. In different fœtal brains this stem seems to be formed sometimes from one f. and sometimes from the other, and sometimes from both, but the recent observations of Turner ["Jour. of Anat. and Phys.," xxv, p. 14] indicate that the calcarine f. is primary and more constant. [I, 98.]—**Occipital f., Occipito-parietal f.** 1. Of Owen, the midoccipital f., an ill-defined and inconstant small f. on the dorso-caudal slope of the occipital lobe. In this sense the term has not been used by other anatomists. 2. Of Pansch, the constant and deep interlobar f., more commonly called *occipito-parietal, parieto-occipital,* or *internal* or *external perpendicular f.,* situated between the occipital and parietal lobes of the cerebrum, mainly on the mesal aspect, where it forms an acute angle with the calcarine f. so as to include the cuneus, but extends also for a greater or lesser distance upon the dorsal aspect, whence the common but undesirable names *external* and *internal perpendicular,* etc. (Cf. *Ape f.* and *Occalcarine f.*). In the fœtus (as shown by Wilder, "Jour. of Nerv. and Ment. Dis.," xvii, Aug., 1886) the occipital is a total f., its entocœlian correlative being the *occipital eminence* just dorsad of the calcar; much less distinct in the adult, it has been described by Henle as the *bulbus postcornu,* and by Wilder as the *eminentia splenialis.* ["N. Y. Med. Jour.," April 5, 1884, p. 373 (I); I, 6, 15, 98.]—**Occipito-temporal f.** See *Collateral f.*—**Ocular f.** See *Ocular* CLEFT.—**Olfactory f.** Lat., *fissura olfactoria.* The linear depression on the ventral aspect of the frontal lobe in which rest the olfactory bulb and its crus. Its diverging roots at the origin of the crus are called by Owen the *entorrhinal* and the *ectorrhinal f's;* the latter also the *rhinal f.* [I, 14, 98.]—**Orbital f.** Lat., *fissura* (seu *sulcus*) *orbitalis.* Fr., *scissure orbitaire, sillon de face orbitaire du lobe frontal.* A triradiate or quadrifurcate f. on the orbital surface of the frontal lobe laterad of the olfactory f. It includes Owen's orbital or postorbital f. and midorbital f. [I, 14, 15, 98.]—**Palpebral f.** The opening between the upper and lower lids extending from the internal to the external canthus. This f. is closed by an approximation of the ciliary margin of the lids. In the fœtal state it does not exist in the early stages, the lids being united. [F.]—**Paracentral f.** Of Wilder, the f. on the mesal surface of the cerebrum more or less completely circumscribing the paracentral lobule. It represents the caudal part of the calloso-marginal f. of most writers, together with the *sulcus paracentralis* of Schwalbe (the *marginal f.* of Owen), and is less complete in the ape than in man. [I, 14, 17, 98.]—**Parallel f.** Lat., *sulcus temporalis superior.* Fr., *scissure parellèle.* Ger., *Parallelfurche.* A constant f. of the temporal lobe which has a general direction parallel to the Sylvian f. It separates the superior from the middle temporo-sphenoidal convolution. [I, 4 (K).]—**Parietal f.** Lat., *fissura* (seu *sulcus*) *parietalis.* Fr., *scissure pariétale.* Ger., *Parietalfurche.* 1. Of Pansch and Dalton, the interparietal or intraparietal f. which begins near the ventral end of the central f., often connected there with the postcentral f., and extends as a gentle curve dorso-caudad to near the tip of the occipital lobe, joining the occipital f. of Ecker. [I, 15, 23, 57, 58; Turner, "Proc. of the Roy. Soc. of Edinb.," 1886, p. 578 (I).] 2. Of Wilder, the parietal portion of the f. indicated in the 1st def., the occipital portion, together with the "transverse occipital," constituting another fissural integer, the paroccipital f. [I, 98.]—**Parieto-occipital f.** See *Oc-*

A, the parieto-occipital fissure; *B*, the calloso-marginal fissure; *C*, the parietal fissure; *D*, the fissure of Rolando; *E*, the upper end of the fissure of Sylvius.

cipital f.—**Paroccipital f.** Of Wilder, the occipital portion of the intraparietal f. with the transverse occipital f. [B. G. Wilder, "Jour. of Nerv. and Ment. Dis.," June, 1886, p. 301 (a, 29).]—**Partial f's.** Ger., *Rindenfurchen.* The cerebral f's that do not involve the entire thickness of the parietes so as to be collocated with entocœlian elevations; some, however, have other structural correlatives, e. g., the olfactory f. with the olfactory crus and bulb. [I, 57, 98.] Cf. *Total f's.*—**Peritoneal f.** Ger., *Peritonealspalte.* A f. or cleft, of the lateral mesoblastic plates of the embryo, constituting the rudiment of the great visceral cavity of the abdomen. [A, 8.]—**Permanent f's.** The cerebral f's that persist, as distinguished from the *transitory f's.* [I, 98.]—**Perpendicular f.** See *Occipital f.*—**Petro-squamosal f., Petro-squamous f.** Lat., *fissura petroso-* (seu *petro-*) *squamosa.* A narrow f. between the upper surface of the petrous portion of the temporal bone and the internal surface of its squamous portion. [C.]—**Petrotympanic f.** Lat., *fissura petrotympanica.* Fr., *f. pétrotympanique, scissure glénoïdale.* Ger., *petrotympanische Spalte.* A groove or f. in the tympanic ring for the reception of the long process, or processus foliarus, of the malleus, and for transmitting various soft parts. [F.] See under *Glaserian f.*—**Pomatic f.** Of Wilder, the f. in apes and monkeys that crosses the cerebrum opposite the dorsal end of the occipital f., with which it is sometimes continuous. It represents the free margin of the poma, or occipital operculum. [I, 98.]—**Portal f.** See *Transverse f. of the liver.*—**Postcalcarine f.** Of Wilder, an inconstant, usually vertical f. at the occipital end of the cerebrum, sometimes joined by the calcarine f. and often branched at each end so as to be a zygal f. It may represent the postseptal f. of Owen. [I, 98.]—**Postcentral f.** Lat., *fissura centralis* (seu *retrocentralis,* seu *postrolandica*). A f. just caudad of the central f., nearly parallel to it, and often united with the parietal f. [I, 17, 98.]—**Posterior longitudinal** (or **median**) **f. of the spinal cord.** Lat., *fissura medullæ spinalis mediana* (seu *longitudinalis*) *posterior.* Fr., *scissure médiane postérieure de la moelle allongée.* Ger., *hintere Längsspalte* (oder *Rückenmarksspalte*). An apparently deep, narrow sulcus which extends the whole length of the cord, occupying the middle of its dorsal surface. On cross-section it is seen to be not a true f., but merely a connective-tissue septum prolonged from the pia mater. [I, 1 (K).]—**Posterior orbital f.** The sphenoidal f. [a, 29.]—**Postero-intermediary f.** A slight depression in the dorsal column of the cervical portion of the spinal cord. It extends from the lower part of the cervical enlargement to the oblongata. Between this f. and

the postero-median f. is included the dorsal median column. [I, 1 (K).]—**Postero-lateral f., Posterior lateral f. of the spinal cord.** See *Postero-lateral* GROOVE. [I, 38.]—**Postero-median f. of the spinal cord.** See *Posterior median f. of the spinal cord.*—**Postfrontal f.** Of Owen, his frontal f. [I.]—**Posthippocampal f.** Of Owen, see *Calcarine f.*—**Postoccipital f.** Of Owen, an inconstant f. which forms the anterior boundary of the

A, the parieto-occipital fissure; *B*, the calcarine fissure; *C*, the fissure of Sylvius.

superior occipital convolution. Its direction is mainly vertical. [I, 14 (K).]—**Postorbital f.** Lat., *fissura orbitalis.* Of Owen, a part of the orbital f. [I, 14, 98.]—**Postparoccipital f.** Of Wilder, an inconstant f. in the occipital part of the paroccipital convolution. [I, 98.]—**Postseptal f.** A small vertical f. in the posterior part of the occipital lobe on its mesal surface. It may be identical with the postcalcarine f. of Wilder. [I, 14 (K).]—**Postsylvian f.** Of Owen, the supertemporal or parallel f. [I, 14.]—**Precentral f.** Lat., *sulcus præcentralis inferior.* Fr., *scissure précentrale* (ou *prérolandique*). Ger., *Präcentralfurche.* A f. running parallel with the ventral part of the central f. and often joined by the subfrontal f. [I, 17, 98.]—**Precuneal f.** Lat., *fissura præcunea* (seu *subparietalis.* A f. in the præcuneus, consisting usually of one part parallel with the cerebral margin and of a second at right angles to it. [I, 17, 98.]—**Preorbital f.** Lat., *fissura preorbitalis* (seu *orbito-frontalis*). A transverse f. on the ventral surface of the frontal lobe cephalad of the orbital f.; the antorbital f. of Owen. [I, 15, 98.]—**Preparoccipital f.** Of Wilder, a f. in the parietal part of the paroccipital convolution. [I. 98.]—**Presylvian f.** Lat., *fissura præsylviana.* Of Wilder, the anterior limb of the Sylvian f. forming the frontal boundary of the operculum. It may represent the superorbital f. of the *Carnivora,* which was formerly called presylvian f. by Wilder, and is still named *fissura præsylvii* by Meynert. [I, 76, 98.]—**Primary f's, Primitive f's, Principal f's.** Ger., *Totalfurchen* (2d def.). 1. Of Owen, the more regular, or symmetrical, sulci of the brain, as distinguished from the irregular or secondary ones. 2. Of His and Pansch, the true cerebral f's (*i. e.*, those developed before the sixth month of fœtal life). [I, 14, 15 (K).] Cf. *F's of the cerebrum, Secondary f.,* and *Cerebral* SULCUS.—**Pterygomaxillary f.** A vertical slit in the zygomatic fossa. Superiorly it opens into the spheno-maxillary fossa, but is closed internally by the vertical plate of the palate bone. [C.]—**Purse-like f.** Of Reil, the vallicula. [I, 47 (K).]—**Reticular f.** See *Postcentral f.*—**Rhinal f.** Lat., *fissura rhinalis.* Of Owen (by whom, however, it is more commonly called ectorrhinal), the f. demarcating the olfactory crus and tract from the cerebrum proper, or pallium. Great morphological significance is ascribed to it by Turner ("Jour. of Anat. and Physiol.," xxv, p. 107, 1890); the temporal extension of it in man is probably the amygdaline f. of Wilder. [I, 14, 98.]—**Rolando's f.** See *Central f.*—**Sagittal f.** See *Intercerebral f.*—**Secondary f's.** Ger., *Rindenfurchen* (2d def.). 1. Of Owen, the asymmetrical, or inconstant, sulci of the brain. 2. Of His and Pansch, the cerebral sulci (*i. e.*, the so-called f's which are not developed until after the sixth month of fœtal life). [I, 14, 15 (K).] Cf. *F's of the cerebrum, Primary f.,* and *Cerebral* SULCUS.—**Semilunar f.** See *Calcarine f.*—**Septal f.** Of Owen, an inconstant f. in the cuneus just dorsad of the calcarine f. [I, 14.]—**Small cerebral f.** Lat., *fissura cerebri parva.* See *Inferior transverse f.*—**Sphenoidal f.** Lat., *fissura sphenoidalis* (seu *orbitalis superior*), *foramen lacerum anterius.* Fr., *f. sphénoïdale.* Ger., *obere Fissur der Augenhöhle.* A triangular f. bounded internally by the body of the sphenoid bone, superiorly by its lesser wing, and inferiorly by the orbital surface of its greater wing. It transmits the two divisions of the third, the fourth, sixth, and the three main branches of the ophthalmic division of the fifth cranial nerves, and the ophthalmic vein. [A, 478 (α, 17).]—**Spheno-maxillary f.** Lat., *fissura sphenomaxillaris* (seu *orbitalis inferior*). Ger., *Keilbein-kieferspalte.* A f. between the lateral margin of the superior maxilla and the orbital plate of the sphenoid bone. [L, 332.]—**Spinal f.** See SPINA *bifida.*—**Splenial f.** A f. found in the brain of the dog which Turner homologizes with the collateral and calloso-marginal f's of the monkey. ["Jour. of Anat. and Phys.," xxii, p. 580 (α, 29).]—**Subcentral f.** Of Wilder, an inconstant f. at the ventral end of the postcentral f. [I, 98.]—**Subfalcial f.** Of Owen, a small f. on the mesal surface of the frontal lobe. [I, 14 (K).]—**Subfrontal f.** A f. between the middle and inferior frontal convolutions. [I, 14 (K).]—**Suborbital f.** Fr., *fissure sousorbitaire.* Ger., *Infraorbitalspalte.* A f. in the floor of the orbit in the superior maxillary bone, forming the upper or posterior end of the infra-orbital canal. [F.]—**Subseptal f.** A f. on the cuneus, between the calcarine and collateral f's. [I, 14.]—**Subsylvian f.** 1. Of Owen, an inconstant f. on the ventral aspect of the temporal lobe. 2. Of Wilder (overlooking its prior application), the constant, or nearly constant, "horizontal branch" of the Sylvian f., sometimes so short and so completely covered by the postoperculum as to be ignored and homologized with what is probably a branch of the presylvian f. [I, 14, 98; "Jour. of Nerv. and Ment. Dis.," Nov., 1890 (I).]—**Supercallosal f.** Lat., *fissura supercallosalis.* 1. Of Owen, the calloso-marginal f. of most writers. 2. Of Wilder, the calloso-marginal f. less the portions ventrad and caudad of the paracentral convolution. [I, 14, 15, 17, 98.]—**Supercentral f.** Lat., *fissura* (seu *sulcus*) *supercentralis.* Ger., *obere Centralfurche.* Of Schwalbe, the f. cephalad of the dorsal portion of the central f. and parallel therewith; often joined by the superfrontal f. [I, 17, 98.]—**Superfrontal f.** Lat., *fissura superfrontalis, sulcus frontalis superior.* The f. on the lateral aspect of the frontal lobe not far from the dorsal margin, parallel therewith, and demarcating the second frontal convolution. [I, 14, 98.]—**Superior collateral f.** In the lower vertebrates, the groove in the spinal cord at the emergence of the dorsal nerve-roots corresponding to the postero-lateral groove in man. [L, 13 (α, 29).]—**Superior frontal f.** See *Superfrontal f.*—**Superior longitudinal f.** See *Intercerebral f.*—**Superior temporo-sphenoidal f.** See *Superfrontal f.*—**Superior transverse f.** See *Transverse f. of the brain.*—**Superoccipital f.** An irregular f. in the upper part of the occipital surface of the posterior lobe of the cerebrum. [L, 14 (α, 29).]—**Superseptal f.** A f. situated in the cuneus, nearly parallel with the occipital f. [I, 14 (K).]—**Supersylvian f.** Lat., *fissura supersylviana* (seu *suprasylviana*). Of Owen, in the *Carnivora,* the second arched f. on the lateral surface of the cerebrum, apparently homologized by him with the human parietal f. [I, 14.]—**Supertemporal f.** Lat., *fissura supertemporalis* (seu *temporalis,* seu *temporo-sphenoidalis superior*). Ger., *Parallelfurche.* The constant f. caudad of and parallel with the Sylvian f.; very deep and long in most apes and monkeys. [I, 15, 17, 98.]—**Suprasylvian f.** See *Supersylvian f.*—**Sylvian f.** See *F. of Sylvius.*—**Temporary f's.** See *Transitory f's.*—**Temporo-occipital f., Tentorial f.** See *Collateral f.*—**Transinsular f.** Of Wilder, the deepest and earliest of the f's crossing the insula. [I, 98.]—**Transitory f's.** Ger., *vorübergehende Rinnen, temporäre Furchen.* The cerebral depressions during the earlier months of fœtal life which represent corrugations of the entire thickness of the thin parietes, and are supposed to disappear at the sixth or seventh month. Sometimes they occur on one hemisphere and not on the other. [I, 98.]—**Transtemporal f's.** Inconstant, short f's on the lateral surface of the temporal lobe, perhaps representing a meditemporal f. [I, 98.]—**Transverse cerebral f., Transverse f. of the brain.** Lat., *fissura transversa anterior* (seu *magna*) *cerebri, fissura chorioidea* (seu *magna posterior*). Fr., *scissure transverse du cerveau, grande fente de Bichat.* Ger., *grosse quere* (oder *vordere*) *Hirnspalte, Querspalte.* The transverse cleft separating the anterior from the posterior and middle portions of the brain, and transmitting the folds of pia which are prolonged into the lateral ventricles and form the chorioid plexuses. By detaching these folds, an opening is made limited above by the corpus callosum and fornix, laterally by the corpora fimbriata, and below by the corpora quadrigemina (in the median line), and the posterior extremities of the thalami (laterally). [I, 15 (K).] See RIMA.—**Transverse f. of the cerebellum.** Lat., *fissura transversa cerebelli.* See *Horizontal f. of the cerebellum.*—**Transverse f. of the cerebrum.** See *Transverse cerebral f.*—**Transverse f. of the liver.** Lat., *fossa transversa hepatis.* A f., about two inches in length, which passes transversely across the lower surface of the right lobe of the liver, joining the longitudinal f. at nearly a right angle. In it are found the portal vein, hepatic artery and nerves, and hepatic duct. [L, 142, 172.]—**Transverse occipital f.** Lat., *sulcus occipitalis transversus.* Of Ecker, a f. on the dorsal aspect of the occipital lobe, which Wilder regards as the occipital portion of the paroccipital f. ["Jour. of Nerv. and Ment. Dis.," June, 1886; I, 59, 98.]—**Triradiate f.** The orbital f. [I.]—**Umbilical f. of the liver.** Lat., *fossa umbilicalis.* Fr., *f. ombilicale.* Ger., *Nabelfurche.* The anterior portion of the longitudinal f. of the liver. It is situated between the left lobe and the lobus quadratus, and contains the umbilical vein in the fœtus (the round ligament in the adult). [L, 142, 172.]—**Uncinate f.** See *Collateral f.*—**Ventral f.** See *Anterior median f. of the spinal cord.*—**Vertical frontal f.** See *F. of Rolando.*—**Wernicke's f.** An inconstant f. on the lateral aspect of the cerebrum, having in general a vertical direction, about midway between the end of the Sylvian f. and the occipital end of the cerebrum; the ape f. of many authorities; the occipital of Wilder. ["Arch. f. Psych.," vi, p. 298 (I).]—**Zygal f's.** Lat., *fissuræ zygales.* Of Wilder, f's which present a pair of branches at either end of a connecting bar. [B. G. Wilder, "Jour. of Nerv. and Ment. Dis.," June, 1886, p. 301 (α, 29).]

FISSURED, adj. Fi²s'yu²rd. Lat., *fissus* (from *findere,* to cleave). Fr., *fendu.* Ger., *spaltig, gespalten.* It., *fesso.* Sp., *hendido.* Cleft, split; in botany, divided for about half the length (said of leaves, sepals, petals, etc.). [B, 123 (α, 24).] Cf. BIFID, TRIFID, etc.

FIST, n. Fi²st. A.-S., *fyst.* Gr., πυγμή, κόνδυλος. Fr., *poing.* Ger., *Faust.* It., *pugno.* Sp., *puño.* The clenched hand.—**F.-balls.** The *Lycoperdon bovista.* [B, 275 (α, 24).]

FISTEL (Ger.), n. Fi²st'e²l. 1. See FISTULA. 2. See FALSETTO.—**Aderf'.** See under ADER.—**Afterf'.** See FISTULA *in ano.*—**Angeborene Halsf'.** See *Congenital cervical* FISTULA.—**Angeborene Ohrenf'.** See *Congenital* FISTULA *of the ear.*—**Blasengebärmutterf'.** See *Vesico-uterine* FISTULA.—**Blasenscheidenf'.** See *Vesico-vaginal* FISTULA.—**Blinde F.** See *Incomplete* FISTULA.—**Brustf'.** See *Thoracic* FISTULA.—**Canalförmige F.** A fistula having two mouths or openings, one outer and one inner, and a clearly defined canal between the two openings. [A, 319 (α, 21).]—**Communicationsf'.** A fistula connecting two internal cavities. [A, 319 (α, 21).]—**Complicirte F.** See FISTULA *complicata.*—**Darmf'.** An intestinal fistula. [A, 319 (α, 21).]—**Dauerf'.** A permanent fistula (*e. g.*, one established in a secreting

organ of an animal, with the object of obtaining a supply of the secretion for purposes of experiment. [K, 16.]—**Doppelmündige F., Eigentliche F.** See *Complete* FISTULA.—**Eiterf'.** A fistula secreting pus. [A, 326 (a, 21).]—**Ernährungsf'.** A fistula of the alimentary canal established for the purpose of feeding the patient. [a, 18.]—**F'artig.** See FISTULOUS.—**F'aufschneiden.** See SYRINGOTOMY.—**F'bildung.** The formation of a fistula. [D, 129.]—**F. der Harnröhre.** A urethral fistula.—**F'gang.** A fistulous passage; the tract of a fistula.—**F'geschwür.** A fistulous ulcer. [E.]—**F'kraut.** The genus *Pedicularis.* [L, 43.]—**F'stimme, F'ton.** See FALSETTO.—**Gallenblasencolonf'.** A fistulous communication between the gall-bladder and the colon. [a, 34.]—**Gallenblasenf'.** A fistula of the gall-bladder. [" Arch. f. Anat. u. Phys.," 1841, p. 131.]—**Gallengefässf'.** See *Gefässgallenf'.*—**Gallenf'.** See *Biliary* FISTULA.—**Gebärmutterdarmf'.** A utero-intestinal fistula. [A, 321.]—**Gefässgallenf'.** A fistulous communication between a blood-vessel and the gall-bladder or a bile-duct. [A, 521.]—**Gelenkf'.** A fistula communicating with the cavity of a joint. [E.]—**Halsf'.** See *Cervical* FISTULA.—**Halskiemenf'.** See *Branchial* FISTULA.—**Harnblasenf'.** See *Vesical* FISTULA.—**Harnleiterf'.** See *Ureteric* FISTULA.—**Harnleiterscheidenf'.** See *Uretero-vaginal* FISTULA.—**Harnröhrenf'.** See *Urethral* FISTULA.—**Harnröhrenmutterscheidenf'.** See *Urethro-vaginal* FISTULA.—**Kiemenf'.** See *Branchial* FISTULA.—**Kothf'.** See *Fœcal* FISTULA.—**Kreuzbeinf'.** See *Sacral* FISTULA.—**Leberlungenf'.** See *Hepatico-bronchial* FISTULA.—**Luftröhrenf'.** See *Aerial* FISTULA.—**Lungenf'.** See *Pulmonary* FISTULA.—**Lungenrückenf'.** See *Dorsal* FISTULA.—**Magenf'.** See *Gastric* FISTULA.—**Mastdarmf'.** Rectal or anal fistula. [D, 81.]—**Mastdarmharnblasenf'.** See *Recto-vesical* FISTULA.—**Mastdarmharnblasenmutterscheidenf'.** See *Recto-vesico-vaginal* FISTULA.—**Mastdarmharnröhrenf'.** See *Recto-urethral* FISTULA.—**Milchf'.** See *Milk* FISTULA.—**Nabeldarmf'.** See *Omphalo-enteric* FISTULA.—**Nabelf'.** See *Umbilical* FISTULA.—**Nierenf'.** See *Renal f.*—**Oesophagotrachealf'.** See *Tracheo-œsophageal* FISTULA.—**Schlundf'.** See *Pharyngeal* FISTULA.—**Speichelf'.** See *Salivary* FISTULA.—**Steissf'.** See FISTULA *in ano.*—**Stirnhöhlenf'.** See *Frontal* FISTULA.—**Thiry'sche F.** See *Thiry's* FISTULA.—**Thränenf'.** See *Lacrymal* FISTULA.—**Thränensackf'.** See FISTULA *sacci lacrimalis.*—**Unvollkommene F.** See *Incomplete* FISTULA.—**Vollkommene F.** See *Complete* FISTULA.—**Zusammengesetzte F.** A compound fistula. [a, 34.]

FISTULA (Lat.), n. f. Fi^{2}st'u^{2}l(u^{4}l) a^2. Gr., σύριγξ. Fr., *fistule.* Ger., *Fistel.* It., *fistola.* Sp., *fistula.* 1. A pipe, a tube. 2. An unnatural channel leading from a cutaneous or mucous surface to another free surface or terminating blindly in the substance of an organ or part. Cf. SINUS. 3. See CASSIA *f.*—**Abdominal f.** A f. of the abdominal wall.—**Aerial f.** Fr., *fistule aérienne.* Ger., *Luftröhrenfistel.* A f. of the air-passages.—**Alveolar f.** Lat., *f. dentis, f. maxillaris.* Fr., *fistule alvéolaire* (ou *maxillo-dentaire*). A f. produced by necrosis of an alveolus in consequence of septic infection from the mouth or from decayed teeth. [a, 34.]—**Anal f.** See *F. in ano.*—**Biliary f.** Lat., *f. biliaris.* Fr., *fistule biliaire.* Ger., *Gallenfistel.* A f. involving the biliary passages. See *Internal biliary f.* and *Cutaneo-biliary f.*—**Bi-mucous f.** Lat., *f. bimucosa.* A complete f. leading from one mucous surface to another. [" Med. Chron.," May, 1887, p. 89.]—**Blind f.** See *Incomplete f.*—**Branchial f.** Lat., *f. branchialis.* Fr., *fistule branchiale.* Ger., *Halskiemenf', Kiemenfistel.* It., *fistola branchiale.* Sp., *fistula branquial.* A congenital f. of the neck, usually communicating with the pharynx; due to imperfect closure of one of the visceral clefts of the embryo. [A, 63.]—**Bronchial f.** Fr., *fistule bronchiale.* Ger., *Bronchialfistel.* A fistulous opening into a bronchus, especially a fistulous communication between the bronchus and the skin. [a, 34.]—**Broncho-intestinal f.** A f. leading from a bronchus to the intestine.—**Canaliform f.** A long, narrow f. [a, 34.]—**Cervical f.** Lat., *f. colli.* Fr., *fistule cervicale.* Ger., *Halsfistel.* 1. A f. opening on the surface of the neck (usually a branchial f.). 2. A f. opening into the canal of the cervix uteri.—**Cervico-pulmonary f.** Fr., *fistule cervico-pulmonaire.* A f. leading from the surface of the neck into the pulmonary bronchial tubes or into a pulmonary cavity. [H. Morin, "Progr. méd.," 1885, No. 32; "Ctrlbl. f. Chir.," May 15, 1886, p. 356.]—**Cervico-vaginal f.** A f. leading from the vagina into the canal of the cervix uteri.—**Cicatricial f.** A f. lined with a cicatricial membrane. [a, 34.]—**Coccygeal f.** Fr., *fistule paracoccygienne.* See FOVEOLA *coccygea.*—**Complete f.** Lat., *f. completa.* Fr., *fistule complète.* Ger., *vollkommene Fistel.* It., *fistola compiuta.* Sp., *fistula completa.* A f. by which one internal cavity communicates with another or with the external surface.—**Confectio fistulæ.** See *Confectio* CASSIÆ.—**Congenital cervical f.** Lat., *f. colli congenita.* Fr., *fistule cervicale congénitale.* Ger., *angeborene Halsfistel.* A branchial f. opening on the neck.—**Congenital f. of the ear.** Lat., *f. auris congenita.* Fr., *fistule congénitale de l'oreille.* Ger., *angeborene Ohrenfistel.* A rare form of malformation or arrested development in the ear, consisting of a small fistulous opening close in front of the tragus, which may extend as far as the tympanic cavity. It may be symmetrical. Its cause is considered to be an arrest of development in the first visceral cleft. [F, 33.]—**Congenital lumbo-sacral f.** See FOVEOLA *coccygea.*—**Corneal f.** Lat., *f. corneæ.* A small opening through the cornea, usually the result of a perforating ulcer, establishing a communication with the anterior chamber. [F.]—**Cutaneo-biliary f.** A f. leading from the external surface into the gall-bladder or a bile-duct.—**Cutaneo-pharyngeal f.** A f. (usually branchial) leading from the cutaneous surface of the neck into the pharynx.—**Cystico-colic f.** A f. leading from the gall-bladder to the colon.—**Cystico-cutaneous f.** A f. leading from the external surface into the gall-bladder.—**Cystico-duodenal f.** A f. leading from the gall-bladder to the duodenum.—**Cystico-gastric f.** A f. leading from the gall-bladder to the stomach.—**Cystico-intestinal f.** A fistulous opening between the gall-bladder and an intestine.—**Cystico-urinary f.** A fistulous communication between the gall-bladder and the urinary tract.—**Dental f.** See *Alveolar f.*—**Diabetic f.** A f. in a diabetic person, supposed to be caused by that disease. [a, 34.]—**Diverticular entero-umbilical f.** Fr., *fistule entéro-ombilicale diverticulaire.* A fistulous communication between an intestinal diverticulum and the umbilicus. [a, 34.]—**Dorsal f.** Lat., *f. dorsalis.* A f. opening in the dorsal region, due to empyema or spinal caries. [a, 34.]—**Duodenal f.** A f. leading into the duodenum.—**Duodeno-colic f.** Of Sanderson, a fistulous communication between the duodenum and the colon. [a, 34.]—**Entero-umbilical f.** Lat., *f. entero-umbilicalis.* A fistulous communication between the umbilicus and an intestine. [a, 34.]—**Entero-vaginal f.** A fistulous communication between the intestine and the vagina.—**Entero-vesical f.** A f. leading from the vagina to the intestine.—**External biliary f.** See *Cutaneo-biliary f.*—**External blind f.** See *External incomplete f.*—**External complete f.** A complete f. leading from a cutaneous surface.—**External f.** A f. opening on the external surface of the body.—**External incomplete f.** An incomplete f. opening on the cutaneous surface.—**Fæcal f.** Fr., *fistule stercorale.* Ger., *Kothfistel.* It., *fistola stercoracea.* Sp., *fistula stercoral.* A fistulous communication between the intestinal canal and the outer surface of the body, or the connective tissue, or an abscess cavity.—**F. ani.** See *F. in ano.*—**F. ani completa.** A complete f. in ano.—**F. ani incompleta.** An incomplete f. in ano.—**F. ani et vesicæ.** F. of the anus and of the urinary bladder. [D, 81.]—**F. ani, vesicæ et vaginæ.** F. of the anus, bladder, and vagina. [D, 81.]—**F. antri Highmori.** A fistulous communication between the antrum of Highmore and the mouth, following an operation on the maxillary sinus, or in consequence of a diseased tooth. [a, 34.]—**F. armata.** A clyster-pipe. [L, 107.]—**F. auris congenita.** See *Congenital f. of the ear.*—**Fistulæ bellinianæ.** See *Excretory* TUBULES *of the kidney.*—**F. biliaris.** See *Biliary f.*—**F. bimucosa.** See *Bi-mucous f.*—**F. canaliculi lacrimalis.** See *Lacrymal f.*—**F. cibalis.** The œsophagus. [A, 318, 322.]—**F. colli congenita.** See *Congenital cervical f.*—**F. completa.** See *Complete f.*—**F. corneæ.** See *Corneal f.*—**F. dentis.** See *Alveolar f.*—**F. ductus stenoniani.** A f. from Stenson's duct to the skin. [a, 34.]—**F. fissuræ branchialis primæ congenita.** See *Congenital f. of the ear.*—**F. frontalis.** See *Frontal f.*—**F. gastrico-abdominalis.** See *Gastric f.*—**F. gingivalis.** See *Alveolar f.*—**F. glandulæ lacrimalis.** A f. opening into the lacrymal gland. [B.]—**F. hepatico-bronchialis.** A f. leading from the biliary passages to a bronchus.—**F. in ano.** Fr., *fistule à l'anus.* Ger., *Afterfistel, Mastdarmfistel.* It., *fistola anale.* Sp., *fistula anal.* A f. leading from the rectum or the anal canal to the cutaneous surface (complete f.), or into the substance of the surrounding tissue (internal incomplete), or from the skin near the anus into the substance of the tissue (external incomplete).—**F. incompleta.** See *Incomplete f.*—**F. incompleta externa.** See *External incomplete f.*—**F. incompleta interna.** See *Internal incomplete f.*—**F. lacrimalis.** See *Lacrymal f.*—**F. lactea.** See *Milk f.*—**F. laryngis congenita.** A congenital (branchial) f. leading into the larynx. [L, 135 (a, 14).]—**F. lymphatica.** See *Lymphatic f.*—**F. mammæ.** See *Milk f.*—**F. nephro-gastrica.** See *Nephro-gastric f.*—**F. perinæi.** See *Perineal f.*—**F. pharyngis.** See *Pharyngeal f.*—**F. pulmonalis.** Fr., *trachée-artère* (1st def.). Ger., *Luftröhre* (1st def.). 1. The trachea. [L.] 2. See *Pulmonary f.*—**F. recti.** See *F. in ano.*—**F. recto-urethralis.** See *Recto-urethral f.*—**F. recto-vaginalis.** See *Recto-vaginal f.*—**F. recto-vesicalis.** See *Recto-vesical f.*—**F. renalis.** See *Renal f.*—**F. sacci lacrimalis.** Fr., *fistule du sac lacrymal.* Ger., *Thränensackfistel.* A passage through the skin of the face leading into the lacrymal sac; the result of an abscess of the sac, which began as a phlegmonous inflammation, and opened externally upon the cheek. [F.]—**F. sacra.** See AQUEDUCT *of Sylvius.*—**F. salivalis.** See *Salivary f.*—**F. spiritualis.** See *F. pulmonalis.*—**F. stercoralis.** See *Fæcal f.*—**F. thoracis periodica.** Of Panarolus, a thoracic f. opening and closing at irregular intervals; due to empyema. [a, 34.]—**F. trachealis.** See *Tracheal f.*—**F. tuberculosa pulmonalis.** Of Lidell, a thoracic f. caused by tubercular empyema. [a, 34.]—**F. urachi.** See *Urachal f.*—**F. ureterica.** See *Ureteric f.*—**F. urethralis.** See *Urethral f.*—**F. urethro-cutanea penis.** See *Urethro-cutaneous f. of the penis.*—**F. urethro-vaginalis.** See *Urethro-vaginal f.*—**F. urinaria** [Celsus]. See URETHRA.—**F. ventriculi.** See *Gastric f.*—**F. vesicalis.** See *Vesical f.*—**F. vesico-cervicalis.** See *Vesico-cervical f.*—**F. vesico-vaginalis.** See *Vesico-vaginal f.*—**Frontal f.** Lat., *f. frontalis.* Ger., *Stirnhöhlenfistel.* A f. leading into the frontal sinus. [L, 135 (a, 14).]—**Gastric f.** Lat., *f. ventriculi.* Fr., *fistule stomacale* (ou *gastrique*). Ger., *Magenfistel.* A f. of the stomach that opens on the skin of the abdomen. [a, 34.]—**Gastro-colic f.** A f. leading from the stomach into the colon.—**Gastro-cutaneous f.** A f. leading from the stomach to the exterior of the abdominal wall.—**Gastro-duodenal f.** A f. leading from the stomach into the duodenum.—**Gastro-intestinal f.** A f. leading from the stomach into an intestine.—**Gastro-pulmonary f.** A f. leading from the stomach into the lung.—**Gastro-vaginal f.** A fistulous communication between the vagina, a large abdominal abscess, and the stomach. [Chadwick, " Boston Med. and Surg. Jour.," June 3, 1886 (a, 34).]—**Genito-urinary f.** See *Uro-genital f.*—**Hepatic f.** See *Biliary f.*—**Hepatico-bronchial f.** Ger., *Leberlungenfistel.* A fistulous communication between the liver and the lung, produced by abscess of the former. [a, 34.]—**Horse-shoe f.** An anal f. that has a cutaneous opening on one side of the median line, while the mucous opening is on the opposite side, the passage surrounding the anus. [a, 34.]—**Hypogastric f.** A f. having the external aperture in the hypogastric region. [a, 34.]—**Incomplete f.** Lat., *f. incompleta.* Fr., *fistule incomplète.* Ger., *unvollkommene Fistel.* Syn.: *blind f.* A f. having only one opening. [A, 301.]—**Inferior paravertebral f.** See FOVEOLA *coccygea.*—**Inguinal f.** A f. in the inguinal region. [a, 34.]—**Internal f.** A f. having no cutaneous opening.—**Internal biliary f.** A f. leading from the gall-bladder or a

bile-duct into the cavity of another organ, such as the stomach or an intestine.—**Internal blind** (or **incomplete**) **f.** An incomplete f. opening on an internal surface.—**Intestinal f.** A f. opening into the intestine.—**Intestinal cholecystic f.** A f. leading from the gall-bladder into the intestine.—**Intestino-tubal f.** A f. leading from the oviduct into the intestine.—**Intestino-uterine f.** A f. leading from the uterus into the intestine.—**Intestino-vaginal f.** A f. leading from the vagina into the intestine.—**Intestino-vesical f.** A f. leading from the urinary bladder into the intestine. —**Labiform f.** A f. with protruding lips at the outer margin. [α, 34.]—**Lacrymal f.** Lat., *f. lacrimalis.* Fr., *fistule lacrymale.* Ger., *Thränenfistel.* A f. of the lacrymal passages. [F.] See *F. glandulæ lacrimalis* and *F. sacci lacrimalis.*—**Lacteal f.** See *Milk f.*—**Laryngeal f.** A f. of the larynx.—**Laryngo-pharyngeal f.** A f. leading from the larynx into the pharynx.—**Lipped f.** See *Labiform f.*—**Lymphatic f.** Lat., *f. lymphatica.* Fr., *fistule lymphatique.* Ger., *Lymphfistel.* A f. leading into a lymphatic vessel. [A, 319 (α, 21).]—**Mammary f.** See *Milk f.*—**Mastoid f.** A fistulous communication between the skin covering the mastoid process and the cells of the mastoid, which may communicate with the cavity of the tympanum. The result of suppuration and caries of the bone. [F.]—**Metro-peritoneal f.** Of Tait, a persistent communication between the cavity of the uterus and the peritonæum, diagnosticated by the passage of a sound through the uterine canal for some seven inches. [α, 34.]—**Milk f.** Lat., *f. lactea.* Fr., *fistule galactophore* [Duval]. Ger., *Milchfistel.* A f. communicating with a milk duct.—**Muco-cutaneous f.** A f. leading from a mucous to a cutaneous surface.—**Muscular f.** Fr., *fistule musculaire.* Ger., *Muskelfistel.* A f. remaining after an abscess in a muscle. [α, 34.]—**Nephro-abdominal f.** A f. of the abdominal wall communicating with the kidney.—**Nephro-gastric f.** Lat., *f. nephro-gastrica.* A f. leading from the pelvis of the kidney into the stomach. [A, 319.]—**Non-urinary urethral f.** Fr., *fistule uréthrale non-urinaire.* A recto-urethral or a urethro-cutaneous f. through which urine does not escape. [Reliquet, "Union méd.," Mar. 28, 1885, p. 525.—**Œsophageal f.** A f. of the œsophagus.—**Œsophago-tracheal f.** A f. leading from the œsophagus into the trachea.—**Omphalo-enteric f.** Ger., *Nabeldarmfistel.* [E.]—**Ostial f.** See *Labiform f.*—**Pancreatic f.** A f. of the pancreatic duct.—**Penile f.** A urethral f. opening on the penis.—**Perineal f.** Lat., *f. perinœi.* A f. leading from the skin of the perinæum into the rectum, the anal canal, the vagina, the urethra, or the bladder.—**Perineo-vaginal f.** A f. leading from the vagina to the outer surface of the perinæum.—**Peritoneal f.** See *Metro-peritoneal f.*—**Peritoneo-vaginal f.** A fistulous communication between the vagina and the peritonæum. [α, 34.]—**Pharyngeal f.** Lat., *f. pharyngis.* Ger., *Schlundfistel.* A f. (usually branchial) leading into the pharynx.—**Phthisical f.** An anal f. in tuberculous patients. [α, 34.]—**Pleuro-cutaneous f.** A f. leading from the pleural cavity to the external surface.—**Pleuro-pulmonary f.** Of McSherry, thoracic f. in empyema. [α, 34.]—**Pulmonary f.** Lat., *f. pulmonalis.* Fr., *fistule pulmonaire.* Ger., *Lungenfistel.* Adhesion of the pulmonary and costal pleura, with fistulous communication between the surface of the chest and the lung. [α. 34.]—**Purulent f.** A f. that discharges pus only. [α, 34.] —**Rectal f.** A f. of the rectum.—**Recto-labial f.** A f. leading from the rectum to the surface of a labium pudendi. [I. E. Taylor, "N. Y. Med. Jour.," Nov. 28, 1885, p. 616.]—**Recto-urethral f.** Lat., *f. recto-urethralis.* Fr., *fistule recto-uréthrale.* Ger., *Mastdarmharnröhrenfistel.* A f. leading from the rectum into the urethra. [L, 135 (α, 14).]—**Recto-vaginal f.** Lat., *f. recto-vaginalis.* Fr., *fistule recto-vaginale.* Ger., *Mastdarmmutterscheidenfistel.* A f. leading from the rectum into the vagina.—**Recto-vesical f.** Lat., *f. recto-vesicalis.* Fr., *fistule recto-vaginale.* Ger., *Mastdarmharnblasenfistel.* A f. leading from the rectum into the urinary bladder.—**Recto-vesico-vaginal f.** Ger., *Mastdarmharnblasenmutterscheidenfistel.* A double f. giving rise to communication of the rectum, the vagina, and the urinary bladder.—**Recto-vestibular f.** A f. leading from the rectum to the vestibule of the vulva. ["Wien. klin. Woch.," Mar. 6, 1890, p. 183.]—**Recto-vulvar f.** A rectal f. opening at the vulva.—**Renal f.** Lat., *f. renalis.* Fr., *fistule rénale.* Ger., *Nierenfistel.* A f. communicating with the pelvis of the kidney. [L, 135 (α, 14).]—**Sacral f.** Lat., *f. sacralis.* Fr., *fistule sacrale.* Ger., *Kreuzbeinfistel.* A congenital f. or fissure occurring in the lumbo-sacral region. [α, 34.] Cf. Foveola *coccygea.*—**Salivary f.** Lat., *f. salivalis.* Fr., *fistule salivaire.* Ger., *Speichelfistel.* A f. of a salivary duct. [L, 135 (α, 14).]—**Scrotal f.** A urethral f. opening on the scrotum.—**Spermatic f.** A sinus resulting from chronic orchitis and discharging semen with the pus. [E, 16.]—**Stercoraceous f., Stercoral f.** See *Fæcal f.*—**Superficial f.** Fr., *f. superficielle.* A f. that does not penetrate to great depth, and that is either subcutaneous or submucous. [α, 34.]—**Synovial f.** A f. communicating with a joint. [E.]—**Thiry's f.** Ger., *Thiry'sche Fistel, Darmfistel.* A f. of the intestine, especially of the small intestine (suggested by Thiry, 1864), for obtaining the intestinal juices unmixed with the other digestive fluids. It is made by opening the abdomen and cutting out a segment of the intestine from 10 to 40 ctm. long, leaving its mesenteric vascular and nervous connections intact. The upper or cephalic end of the isolated segment is stitched to the wound in the abdomen so that it will remain open; the other end is closed. The two ends of the intestine from which the segment were cut are sutured together, thus making a continuous alimentary tube again. The intestinal juices flow spontaneously from such a f. and are increased during digestion. [Thiry (J); J, 18, 19, 57.]—**Thoracic f.** Lat., *f. thoracis.* Fr., *fistule thoracique.* Ger., *Thoraxfistel, Brustfistel.* A fistulous communication between the cavity and parietes of the thorax; often spontaneously formed in neglected cases of empyema, or remaining after operative measures for the relief of that disease. [α, 34.]—**Thyreo-hyoid f.** Fr., *fistule thyréo-hyoïdienne.* A f. extending from the hyoid bone to the skin over the thyreoid cartilage. [α, 34.] —**Tracheal f.** Lat., *f. trachealis.* Fr., *fistule trachéale.* Ger., *Luftröhrenfistel.* A f. between the trachea and the skin. [A, 319 (α, 21); α, 34.]—**Tracheo-œsophageal f.** Fr., *fistule œsophago-trachéale.* Ger., *Oesophagotrachealfistel.* A congenital or acquired fistulous communication between the trachea and the œsophagus. [α, 34.]—**True f.** A f. that communicates with a gland or duct, discharging a natural product, such as a biliary f. [α, 34.] —**Umbilical f.** Fr., *fistule ombilicale.* Ger., *Nabelfistel.* A fistulous communication having the external opening at the umbilicus; it may be congenital from a patent urachus, or inflammatory from adhesion and suppuration of the abdominal viscera in the retro-umbilical region. [α, 34.]—**Umbilico-ovarian f.** A f. communicating between the umbilicus and the ovary. [α, 34.]—**Urachal f.** Lat., *f. urachi.* A f. at the umbilicus communicating with an open urachus. The term *incomplete urachal f.* has been applied to a distended state of the umbilicus due to accumulation of urine in the urachus, there being no external opening.—**Ureteral f., Ureteric f.** Lat., *f. ureterica.* Ger., *Harnleiterfistel.* A f. of the ureter. [L, 135 (α, 14).]—**Uretero-rectal f.** A fistulous communication between the ureter and the rectum.—**Uretero-uterine f.** A f. leading from the ureter into the uterus. —**Uretero-vaginal f.** Fr., *fistule urétéro-vaginale.* Ger., *Harnleiterscheidenfistel.* A fistulous communication between the ureter and the vagina.—**Urethral f.** Lat., *f. urethralis.* Fr., *fistule uréthrale.* Ger., *Harnröhrenfistel.* A f. opening into the urethra.—**Urethro-cutaneous f. of the penis, Urethro-penic f.** Lat., *f. urethro-cutanea penis.* Fr., *fistule uréthro-pénienne.* A f. leading from the urethra to the skin of the penis.—**Urethro-perineal f.** Fr., *fistule uréthro-périnéale.* A f. leading from the urethra to the outer surface of the perinæum.—**Urethro-rectal f.** See *Recto-urethral f.*—**Urethro-scrotal f.** See *Scrotal f.*—**Urethro-vaginal f.** Lat., *f. urethro-vaginalis.* Fr., *fistule uréthro-vaginale.* Ger., *Harnröhrenmutterscheidenfistel.* A f. leading from the urethra into the vagina.—**Urinary f.** A f. of the urinary tract. Some writers apply the term only to those fistulæ that actually give passage to urine. See *Non-urinary urethral f.*—**Uro-genital f.** A f. leading from the urinary to the genital tract.—**Uterine f.** A f. of the uterus.—**Utero-peritoneal f.** See *Metro-peritoneal f.*—**Vaginal f.** A f. of the vagina.—**Vagino-intestinal f.** A f. leading from the vagina into the intestine.—**Vascular biliary f.** A f. of a bile-duct.—**Vella's f.** A modification of Thiry's f. in which the isolated segment of intestine has both ends stitched to the abdominal wound so that both ends shall remain open instead of but one end. [J, 57.]—**Vesical f.** Lat., *f. vesicalis.* Fr., *fistule vésicale.* Ger., *Harnblasenfistel.* A f. of the urinary bladder. [L, 135 (α, 14).] —**Vesico-abdominal f.** A f. leading from the exterior of the abdomen into the urinary bladder.—**Vesico-cervical f., Vesico-cervico-uterine f.** Lat., *f. vesico-cervicalis.* A f. leading from the urinary bladder into the canal of the cervix uteri. ["Ctrlbl. f. Gynäk.," June 9, 1888, p. 377.]—**Vesico-ovarian f.** A fistulous communication established by the adhesive inflammation of a suppurating ovary to the vesical peritonæum, with destruction of the intervening tissue. [α, 34.]—**Vesico-rectal f.** A fistulous communication between the urinary bladder and the rectum.—**Vesico-urethro-vaginal f.** A f. establishing a communication between the urinary bladder, the urethra, and the vagina.—**Vesico-uterine f.** A f. leading from the urinary bladder into the uterus. —**Vesico-utero-vaginal f.** Fr., *fistule vésico-utéro-vaginale.* Ger., *Blasengebärmutterscheidenfistel.* A f. involving the urinary bladder, the uterus, and the vagina.—**Vesico-vaginal f.** Lat., *f. vesico-vaginalis.* Fr., *fistule vésico-vaginale.* Ger., *Blasenscheidenfistel.* A f. leading from the urinary bladder into the vagina.—**Vesico-visceral f.** A fistulous communication between the urinary bladder and the interior of another organ.—**Vulvar f.** A f. opening at the vulva.—**Vulvo-rectal f.** See *Recto-vulvar f.*

FISTULAR, adj. Fi^{2}st'u^{2}l-a^{3}r. Lat., *fistularis.* Fr., *fistulaire.* Ger., *röhrig.* Tubular. [B, 19, 77, 123 (α, 24).]

FISTULARIA (Lat.), n. f. Fi^{2}st-u^{2}l(u^{4}l)-a(a^{3})'ri^{2}-a^{3}. The genus *Pedicularis.* [L, 94 (α, 21).]—**Herba fistulariæ.** The herb of *Pedicularis palustris* and *Pedicularis silvatica.* [B, 180 (α, 24).]

FISTULE (Fr.), n. Fi^{2}s-tu^{6}l. See Fistula.—**F. à l'anus.** See Fistula *in ano.*—**F. ano-périnéale.** An anal fistula that opens on the perinæum. [α, 34.]—**F. à trajets multiples.** A branching fistula.—**F. à trajet unique.** A fistula consisting of a single channel.—**F. borgne.** See *Incomplete* fistula.—**F. borgne cutanée** (ou **externe**). See *External incomplete* fistula.—**F. borgne interne** (ou **muqueuse**). See *Internal incomplete* fistula.—**F. de la mamelle.** See *Milk* fistula.—**F. dentaire.** See *Alveolar* fistula.—**F. des voies respiratoires.** See *Aerial* fistula.—**F. du cou.** See *Cervical* fistula. [L, 88, v. 9, pp. 659, 662.]—**F. en arrosoir.** A fistula having several external openings and only one internal opening. [A, 385.]—**F. intra-sphinctérienne.** An anal fistula within the sphincter muscle. [α, 34.]—**F. juxta-uréthrale.** A fistula close to the urethra, formed by the specific infection and suppuration of a mucous follicle of the urethra. [α, 34.]—**F. lombo-sacrée congénitale, F. paravertébrale inférieure.** See Foveola *coccygea.*—**F. pelvienne.** A fistulous communication with the pelvis produced by suppuration of some of the pelvic or abdominal viscera. [α, 34.]—**F. pelvi-fessière.** A gluteal fistula communicating with the pelvis. [α, 34.]—**F. pelvi-rectale.** A pelvic fistula communicating with the rectum. [α, 34.]—**F. pharyngienne bilatérale.** Of Serres, a bilateral branchial fistula. [α, 34.]—**F. recto-anale.** A fistula extending from the rectal parietes to the anus. [α, 34.]—**F. sous-cutanée congénitale.** See Foveola *coccygea.*—**F. sterco-purulente** [Verneuil]. A fæcal fistula opening not directly on the cutaneous surface, but into a pus-secreting cavity. [A, 385.]—**F. stercorale.** See *Fæcal* fistula.—**F. superficielle.** See *Superficial* fistula. —**F. sus-sphinctérienne.** A fistula of the anus external to the sphincter. [α, 34.]—**F. urétrale.** A fistulous communication between the skin and the ureter, caused by traumatism. [α, 34.]

FISTULÉ (Fr.), adj. Fi^{2}s-tu^{6}-la. See Fistular.

FISTULEUX (Fr.), adj. Fi^{2}st-u^{6}-lu^{5}. See Fistulous.

FISTULIFORM, adj. Fi2st-u2l'i2-fo2rm. See FISTULAR and FISTULOUS.

FISTULINA (Lat.), n. f. Fi2st-u2l(u4l)-in(en)'a3. Fr., *fistuline.* Of Bulliard, a genus of hymenomycetous *Fungi*, of the *Polyporeæ.* [B, 121 (*a*, 24).]—**F. buglossoides, F. hepatica.** Fr., *glu de chêne, langue* (ou *foie*) *de bœuf.* An edible species growing on old tree-trunks, especially of oaks. [B, 105, 121 (*a*, 24).]

FISTULIVALVOUS, adj. Fi2st-u2l-i2-va2lv'u3s. Lat., *fistulivalvus* (from *fistula*, a pipe, and *valva*, a valve). Fr., *fistulivalve.* Ger., *röhrenklappig.* In zoology, of Tournefort, having tubular shell-valves. [L, 41.]

FISTULOSE, FISTULOUS, adj's. Fi2st'u2l-os, -u3s. Lat., *fistulosus.* Fr., *fistuleux.* Ger., *fistulös.* 1. Pertaining to or resembling a fistula. [E.] 2. In botany, see FISTULAR.

FIT, n. Fi2t. An attack of disease or of any morbid manifestation; in common parlance, a convulsion.—**F.-plant.** The *Monotropa uniflora.* [B, 275 (*a*, 24).]—**F'weed.** See FITT-WEED.—**Nine-day f's.** See TRISMUS *nascentium.*

FITCH, n. Fi2ch. 1. The *Vicia sativa.* 2. In the pl., *f's*, of the Scriptures, the seeds of *Nigella sativa.* [B, 19, 185, 275 (*a*, 24).]—**Blue tar-f.** The *Vicia cracca.* [A, 505 (*a*, 21).]—**Medick f.** The *Onobrychis sativa.* [A, 505 (*a*, 21).]—**Yellow tar-f.** The *Lathyrus pratensis.* [A, 505 (*a*, 21).]

FITERO (Sp.), n. Fe-ta'ro. A place in Pampeluna, Spain, where there are feebly ferruginous springs containing potassium and calcium chlorides. [A, 518; L, 49, 87, 105 (*a*, 14).]

FITHERFEW, n. Fi2th2'u5r-fu2. See MATRICARIA *parthenium.*

FITT-WEED, n. Fi2t'wed. The *Eryngium fœtidum.* [B, 19, 275, 282 (*a*, 24).]

FITURASALIYUN, n. According to the Arabic physician Meer Mohammed Hussain, a Greek name for the seeds of *Apium graveolens.* In the bazaars of Bombay the name is now given to the fruit of *Prangos pabularia.* ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]

FIUMORBO (It.), n. Fe-u-mor'bo. See PIETRAPOLA.

FIVEFINGER, n. Fiv'fi2n2-gu5r. The *Potentilla canadensis.* [A, 505 (*a*, 21).]

FIVE-FINGERS, n. Fiv'fi2n2-gu5rz. 1. The *Potentilla reptans.* 2. The *Potentilla tormentilla.* 3. The *Lotus corniculatus.* 4. Oxlips, probably including the *Primula elatior*, and the caulescent forms of *Primula vulgaris.* [A, 505 (*a*, 21).]—**Canadian f.-f.** The *Potentilla canadensis.* [B, 275 (*a*, 24).]—**West Indian f.-f.** The *Syngonium auritum.* [B, 275 (*a*, 24).]

FIVE-LEAF, n. Fiv'lef. The *Potentilla reptans.* [A, 505 (*a*, 21).]

FIVE-LEAVES, n. Fiv'levz. The *Ampelopsis quinquefolia.* [B, 275 (*a*, 24).]

FIX, v. tr. Fi2x. In photography, to heat a plate or print with some agent which removes the silver which exposure to actinic rays would blacken, *e. g.*, by treatment with a solution of sodium hyposulphite. [L.]

FIXATEUR (Fr.), n. Feg-za3-tu5r. See FIXATOR.—**F. à gaîne.** An instrument invented by Lüer for retroverting the coats of a divided artery, and thus closing it. It consists essentially of a pair of fine hooks inclosed in a sheath. [E, 4.]

FIXATIVE, adj. Fi2x'a2t-i2v. Fixing; in microscopy and histology, serving to fix tissues in the structural condition and form found in life (said of reagents), or to fasten microscopic sections or preparations to a slide or cover-glass so that they will not be disturbed either wholly or in part during washing, staining, mounting, etc; as a n., a substance or agent serving such purposes. [J.]

FIXATION, n. Fi2x-a'shu3n. Lat., *fixatio* (from *figere*, to fasten). Fr., *f.* Ger., *Fixiren.* 1. The state of being fixed. 2. The act of fixing. 3. Of a displaced or floating organ, the operation of rendering it fixed by means of sutures. See HYSTERORRHAPHY, NEPHRORRHAPHY, etc.—**Vagino-f.** Of Péan, the operation of fixing the uterus to the side of the vagina. ["N. Y. Med. Jour.," May 18, 1889, p. 549.]—**Ventro-f.** The operation of fixing an organ to the abdominal wall.

FIXATOR (Lat.), n. m. Fi2x(fex)-a(a3)'to2r. Gen., *-tor'is.* Fr., *fixateur.* 1. An immobilizer. 2. A muscle that serves to fix a movable part, such as the diaphragm, which holds the abdominal contents fixed (*i. e.*, prevents their ascent), and thus enables the abdominal muscles to exert an expulsive action.—**F. baseos stapedis.** A structure on the tympanic surface of the stapes, first described by Rüdinger. It consists of unstriped muscular fibres arising from a small bony ridge, about 1 mm. from the upper and posterior border of the oval window, and inserted into the angle formed by the leg of the stapes and its somewhat projecting foot-plate. It is supposed to be an antagonist of the voluntary muscle, the stapedius. [F, 37.]—**F. labii superioris.** See DEPRESSOR *alæ nasi.*

FIXED, adj. Fi2xt. Lat., *fixus* (from *figere*, to fasten). Fr., *fixe.* Ger., *fixirt, fest.* 1. Fastened, motionless, immovable. 2. Insusceptible of volatilization. See *F.* OIL.

FIXITY, n. Fi2x'i2t-i2. Fr., *fixité.* The state of being fixed.

FIXURÆ (Lat.), n. f. pl. Fi2x(fex)-u2(u)'re(ra3-e2). From *figere*, to fix. Fr., *crampons.* Delicate fibrous expansions which fix a lichen on the substratum to which it grows (said of the thallus of lichens). See CRAMPON and RHIZINÆ. [B, 121 (*a*, 24).]

FIXUS (Lat.), adj. Fi2x(fex)'u3s(u4s). See FIXED.

FLABELL, n. Fla-be2l'. Of B. G. Wilder, see FLABELLUM.

FLABELLATE, adj. Fla-be2l'at. Lat., *flabellatus* (from *flabellare*, to fan). Fr., *flabellé.* Ger., *fächerförmig.* Of leaves, flabelliform, fan-shaped. [B, 19, 121, 123, 291 (*a*, 24).]

FLABELLATION, n. Fla2b-e2l-a'shu3n. Lat., *flabellatio* (from *flabellare*, to fan). Fr., *f.* Ger., *Anfächeln.* The process of keeping wounds cool by causing a free circulation of air around them. [E.]

FLABELLICORNIS (Lat.), adj. Fla(fla3)-be2l-li2-ko2rn'i2s. From *flabellum*, a fan, and *cornu*, a horn. Fr., *flabellicorne.* Ger., *fächerhornig.* Of insects, having fan-like antennæ. [L.]

FLABELLIFOLIUS (Lat.), adj. Fla(fla3)-be2l-li2-fol(fo2l)'i2-u3s(u4s). From *flabellum*, a fan, and *folium*, a leaf. Fr., *flabellifolié.* Ger., *fächerblättrig.* Having fan-shaped leaves. [L, 180.]

FLABELLIFORM, adj. Fla-be2l'i2-fo2rm. Lat., *flabelliformis* (from *flabellum*, a fan, and *forma*, form). Fr., *flabelliforme.* See FLABELLATE.

FLABELLINERVED, adj. Fla-be2l'i2-nu5rvd. From *flabellum*, a fan, and *nervus*, a nerve. Ger., *fächernervig.* Palminerved, as in the fan-palm, in which the veins of the leaf are straight and radiate from the petiole to the margin of the blade. [*a*, 24.]

FLABELLIPES (Lat.), adj. Fla(fla3)-be2l'li2-pez(pas). From *flabellum*, a fan, and *pes*, the foot. Fr., *flabellipède.* Ger., *fächerfüssig.* Of birds, having fan-like feet. [L, 41.]

FLABELLUM (Lat.), n. n. Fla(fla3)-be2l'lu3m(lu4m). Gr., ῥιπίδιον. Lit., a fan; any fan-shaped organ.

FLACCESCENTIA (Lat.), n. f. Fla2k(fla3k)-se2s(ke2s)-se2n-(ke2n)'shi2(ti2)-a3. See FLACCIDITY.—**F. paralytodes.** Suffocative catarrh (obs.). [A, 322.]

FLACCID, adj. Fla2k'si2d. Lat., *flaccidus.* Fr., *flaccide, flasque.* Ger., *schlaff, schwank* (2d def.). 1. Flabby, lacking in stiffness. 2. Wilted from loss of moisture. [B, 19, 123 (*a*, 24).]

FLACCIDITY, n. Fla2k-si2d'i2t-i2. Gr., μάρανσις. Lat., *flacciditas, flaccescentia.* Fr., *flaccidité.* Ger., *Schlaffheit.* It., *flaccidezza.* Sp., *flaccidez.* The state of being flaccid. [L, 43.]

FLÄCHE (Ger.), n. Flach2'e2. A surface.—**Gelenkf'.** An articular surface.

FLACHERIE (Fr.), n. Fla3sh-e2-re. A contagious disease of silkworms, caused by the *Micrococcus bombycis* of Cohn, and particularly localized in the digestive system. The worms suddenly cease to feed, become torpid, and perish while still retaining an appearance of vitality. In this state they are called *morts-flats.* [*a*, 27.]

FLACHS (Ger.), n. Fla3ch2s. The genus *Linum.* [B, 180 (*a*, 24); L, 180.]—**F'baum.** The genus *Antidesma.* [B, 180 (*a*, 24).]—**F'dotter.** See CAMELINA *sativa.*—**F'kraut.** See the major list.—**F'saite.** See FLACHSSEIDE.—**F'samen.** Flaxseed. [*a*, 24.]—**F'seide.** See the major list.—**F'stein.** See ASBESTOS.—**Gemeiner F.** The *Linum usitatissimum.* [B, 180 (*a*, 24).]—**Laxirf', Purgirf', Wiesenf'.** The *Linum catharticum.* [B, 180 (*a*, 24).]

FLACHSKRAUT (Ger.), n. Fla3ch2s'kra3-u4t. See LINARIA.—**Gelbes F.** The *Linaria vulgaris.* [B, 180 (*a*, 24).]

FLACHSSEIDE (Ger.), n. Fla3ch2s'sid-e2. The genus *Cuscuta.* [B, 180 (*a*, 24).]—**Aechte F.** The *Cuscuta epilinum.* [B, 180 (*a*, 24).]—**F'nkraut.** See *F.*—**Frauenf'.** The *Linaria vulgaris.* [B, 180 (*a*, 24).]—**Gemeine F.** See CUSCUTA *europæa.*—**Quendelf'.** The *Cuscuta epithymum.* [B, 180 (*a*, 24).]

FLACHVERTIEFT (Ger.), adj. Fla3ch2'fe2r-teft. See GLENOID.

FLACHWERDEN (Ger.), n. Fla3ch2've2rd-e2n. See APPLANATIO.

FLACON (Fr.), n. Fla3-ko2n2. A bottle.—**F. de lavage.** See *Wash*-BOTTLE.

FLACOURTIA (Lat.), n. f. Fla3-kurt'i2-a3. Of Commerson, a genus of the *Bixineæ.* The *Flacourteæ* of Lindley are a tribe of the *Flacourtiaceæ.* The *Flacourtiaceæ* of Dumortier and others are the *Bixineæ*, and the *Flacourtiæ* are the *Flacourtieæ.* The *Flacourtianæ* of Agardh are an order of the *Valvisporæ;* of De Candolle, an order of the *Thalamifloræ;* of Reichenbach (1827), a division of the *Samydeæ*, and subsequently a division of the *Cappariideæ;* of Bartling and others, a division of the *Cistifloræ;* of Endlicher, a tribe of the *Bixaceæ;* of Jussieu, a division of the *Flacourtiaceæ*, comprising (De Candolle) the *Patrisieæ, Flacourtieæ, Kiggelarieæ*, and *Erythrospermeæ;* or (Reichenbach) *Ryamia, Flacourtia, Erythrospermum*, etc.; or subsequently the *Melicyteæ, Flacourtieæ*, and *Kiggelarieæ;* or (Clos) the *Flacourtieæ, Azareæ, Lætieæ, Bixeæ*, and *Pangieæ.* The *Flacourtieæ* (Fr., *flacourtiées*) of De Candolle are a tribe of the *Flacourtianeæ;* of Reichenbach, a division of the *Cappariideæ;* of Dumortier, a tribe of the *Flacurtiaceæ;* of Bartling, a division of the *Flacourtianeæ*, and of Bentham and Hooker and others, a tribe of the *Bixineæ* or *Bixaceæ.* The *Flacourtiaceæ* of Dumortier are the *Flacourtiaceæ;* the *Flacurtianæ*, or *Flacurtianeæ*, of Richard are a family of the *Exorhizæ*, corresponding to the *Flacourtianeæ* of De Candolle; and the *Flacurtieæ* of Reichenbach are the *Flacourtieæ.* [B, 42, 121, 170 (*a*, 24).]—**F. cataphracta.** A species found in India. The bitter and astringent leaves and young shoots are given in diarrhœa, dysentery, fevers, and sometimes in phthisis. The bark in infusion is employed as a remedy for hoarseness. The fruit is eaten. [B, 19, 172 (*a*, 24).]—**F. inermis.** A species found growing in Asia, having edible fruit. [B, 121 (*a*, 24).]—**F. Ramontchi.** The Mauritius plum; a species similar in its properties to *F. sapida.* [B, 121, 172 (*a*, 24).]—**F. rhamnoides.** A species found growing at the Cape of Good Hope, with elliptical leaves, small, axillary flowers, and ovate red berries. [B, 214 (*a*, 24).]—**F. sapida.** An East Indian species the fruit of which is eaten but is not very palatable. Its thorns are used to open the pustules of small-pox on the ninth or tenth day. [B, 172 (*a*, 24).]—**F. sepiaria.** A very common species found in the East Indies, where the leaves and roots are given in infusion for snake bites, and the bark, fried in oil, is used externally in rheumatism. On the Malabar coast the bark is rubbed with oil, and used as a liniment in gout. The fruits are edible. [B, 19, 172 (*a*, 24).]

FLAG, n. Fla^{2}g. 1. The genus *Iris*, especially *Iris pseudacorus.* 2. The leaves of *Typha latifolia.* [A, 505 (a, 21) ; B, 19, 275 (a, 24).]—(**American**) **blue f.** The *Iris versicolor.* [B, 275 (a, 24).]—**Corn-f.** The genus *Gladiolus.* [B, 19, 34 (a, 24).]—**Crimson f.** The *Schizostylis coccinea.* [B, 275 (a, 24).]—**Dwarf-f.** The *Iris pumila* ; also *Iris verna.* [B, 275 (a, 24).]—**Myrtle-f.** The *Acorus calamus.* [A, 505 (a, 21).]—**Pyrenean f.** The *Iris xiphioides.* [B, 275 (a, 24).]—**Slender (American) blue f.** The *Iris virginica.* [B, 275 (a, 24).]—**Sweet f.** The *Acorus calamus.* [B, 5, 19, 275 (a, 24).] See CALAMUS.—**Virginian f.-flower.** The *Vexillaria virginica.* [B, 275 (a, 24).]—**Water-f.** The *Iris pseudacorus.* [A, 505 (a, 21).]—**White f.** The *Iris florentina.* [B, 77 (a, 24).]—**Yellow (water-) f.** The *Iris pseudacorus.* [A, 505 (a, 21).]

FLAGELLAIRE (Fr.), adj. Fla^3-zhe^{2}l-a^{2}r. Resembling a whip ; as a n., see FLAGELLARIA. [L, 41 (a, 24).]—**F. de l'Inde.** See FLAGELLARIA *indica.*

FLAGELLANT, n. Fla^{2}j'e^{2}l-a^{2}nt. From *flagellare*, to scourge. Fr., *f.* Ger., *Geisseler.* A maniac given to scourging himself. [A, 301.]

FLAGELLARIA (Lat.), n. f. Fla^{2}j(fla^{3}g)-e^{2}l-la(la^3)'ri^2-a^3. From *flagellare*, to scourge. Of Lindley, a small genus of the *Flagellarieæ.* The *Flagellariaceæ* of Dumortier are a family of the *Liliarieæ*, consisting of *Flagellarieæ* and *Methonieceæ.* The *Flagellarieæ* of Dumortier are a tribe of the *Flagellariaceæ* ; of Endlicher, a family related to the *Juncaceæ* ; of Reichenbach, a subdivision (of Meissner, a suborder, of Steudel, a family) of the *Junceæ*, consisting, for all the authors, of the genus *Flagellaria.* [B, 42, 170, 173 (a, 24).]—**F. filum.** See CHORDA *filum.*—**F. indica.** Fr., *flagellaire de l'Inde.* A species having edible roots.

FLAGELLATE, FLAGELLATED, adj's. Fla^{2}j'e^{2}l-at, -e^{2}d. Lat., *flagellatus* (from *flagellare*, to scourge). Fr., *flagellé.* Provided with a flagellum. Of plants, producing slender runners. The *Flagellata* (Fr., *flagellées* ; Ger., *Geisslinge*) comprise the *Lissoflagellata, Choanoflagellata, Dinoflagellata*, and *Rhynchoflagellata.* [L, 121.]

FLAGELLATION, n. Fla^{2}j-e^{2}l-a'shu^{3}n. Gr., μαστίγωσις. Lat., *flagellatio* (from *flagellare*, to scourge). Fr., *f.* Ger., *Geisselung.* The process of scourging ; used formerly to improve the nutrition and as a local stimulant or counter-irritant, and recently recommended by I. E. Taylor to check post-partum hæmorrhage, the hypogastrium being scourged with a damp towel.

FLAGELLIFERUS (Lat.), adj. Fla^{2}j(fla^{3}g)-e^{2}l-li^{2}f'e^{2}r-u^{3}s(u^{4}s). From *flagellum*, a whip, and *ferre*, to bear. Fr., *flagellifère.* Ger., *geisseltragend, ausläufertreibend.* See FLAGELLATE.

FLAGELLIFORM, adj. Fla-je^{2}l'i^2-fo^{2}rm. Lat., *flagelliformis, flagellaceus* (from *flagellum*, a whip, and *forma*, form). Fr., *flagelliforme.* Ger., *ausläuferartig, peitschenartig.* Long and tapering, like the thong of a whip. [B, 1, 19, 121, 123 (a, 24).]

FLAGELLULA (Lat.), n. f. Fla^{2}j(fla^{3}g)-e^{2}l'lu^{3}l(u^{4}l)-a^3. Dim. of *flagellum*, a whip. One of the spores of certain of the *Protozoa*, provided with vibratile processes extending from their bodies ; so called on account of its resemblance to the *Flagellata.* [L, 121.]

FLAGELLUM (Lat.), n. n. Fla^{2}j(fla^{3}g)-e^{2}l'lu^{3}m(lu^{4}m). From *flagellare*, to scourge. Fr., *f.*, *coulant, fléau* (4th def.). Ger., *Ausläufer.* Syn.: *claveola* (4th def.). 1. A whip-like, protoplasmic process attached to some cells and serving as an organ of locomotion ; especially a long vibratile filament found in the *Flagellata*, which serves as an organ of locomotion. 2. A twig or small branch ; also a runner like that of the strawberry. 3. A broad membranous plate attached to the coxopodite of the first maxillipede of the *Crustacea* ; regarded as a metamorphosed podobranchia. 4. The terminal and usually larger portion of the antennæ of *Coleoptera* and *Hymenoptera.* [B, 19, 77, 121, 291 (a, 24) ; L, 147, 168, 196.]

FLAGEOLET (Fr.), n. Fla^3-zhe^2-o-la. The *Phaseolus sphæricus.* [B, 173 (a, 24).]

FLAGGAN, n. Fla^{2}g'a^{2}n. The *Iris pseudacorus.* [A, 505 (a, 21).]

FLAGRUM (Lat.), n. n. Flag(fla^{3}g)'ru^{3}m(ru^{4}m). Fr., *f.* See FLAGELLUM (4th def.).

FLAMBE (Fr.), n. Fla^{3}n^{2}b. The *Iris germanica.* [B, 173 (a, 24).]—**Fausse f., F. bâtarde, F. d'eau, F. des marais.** The *Iris pseudo-acorus.* [B, 121, 173 (a, 24).]—**Petite f.** The *Gladiolus communis.* [B, 173 (a, 24).]

FLAMBÉ (Fr.), adj. Fla^{3}n^2-ba. See FLAMMEOUS.

FLAMBOISE (Fr.), n. Fla^{3}n^2-bwa^{3}z. The *Ignis silvaticus.*

FLAMBOISIER (Fr.), n. Fla^{3}n^2-bwa^{3}z-e-a. The *Rubus idæus.* [B, 173 (a, 24).]

FLAMBOYANT (Fr.), n. Fla^{3}n^2-bwa^3-ya^{3}n^2. The *Amyris silvatica.* [B, 121 (a, 24).]

FLAME, n. Flam. Gr., φλέγμα, φλόξ. Lat., *flamma* (from *flammare*, to burn). Fr., *flamme.* Ger., *Flamme.* It., *fiamma.* Sp., *flama, llama.* A common phenomenon of rapid combustion, due to the giving off of gases and particles of solid matter heated to such a degree as to become luminous.—**F.-flower.** The genus *Tritoma.* [B, 275 (a, 24).]—**F.-manometer.** An instrument devised by Koenig for comparing the notes and methods of vibration of organ pipes or other vibrating mechanisms by means of the fluctuations which they produce upon a f. connected with them. [B.]—**Manometric f's.** The f's of a f.-manometer. [B.]—**Musical f.** A f., whether inclosed in a tube or naked, which limits a musical tone. [B.]—**Sensitive f.** A f. which is caused to fluctuate by the impact of sonorous vibrations. [B.]—**Vital f.** Lat., *flamma vitalis* (seu *cordis*). Fr., *flamme vitale.* Ger., *Lebenswärme, Lebenskraft.* An old name for the principle of life. [A, 322.]

FLAMINGO, n. Fla-mi^{2}n^2'go. The *Phœnicopterus antiquorum.* [B.]

FLAMMA (Lat.), n. f. Fla^{2}m(fla^{3}m)'a^3. See FLAME.—**F. cordis, F. vitalis.** See *Vital* FLAME.—**F. volans.** See ERYTHEMA *volaticum.*

FLAMME (Fr., Ger.), n. Fla^{3}m, fla^{3}m'me^2. 1. See FLAME. 2. (Fr.). The *Iris germanica.* [B, 173 (a, 24).] 3 (Fr.). See FLEAM.—**F'nblume** (Ger.). The genus *Phlox.* [B, 121 (a, 24).]—**F'nscheu** (Ger.). See PHOTOPHOBIA.—**F'nsehen** (Ger.). See PHOTOPSIA.—**F. nue** (Fr.). The *Colchicum autumnale.* [B, 121 (a, 24).]—**Petite f.** (Fr.). The *Ranunculus declinatus.* [B, 173 (a, 24).]

FLAMMEOUS, adj. Fla^{2}m'e-u^{3}s. Lat., *flammeus.* Fr., *flambé.* Ger., *flammigt.* 1. Fiery, flaming. 2. Flame-colored. [A, 318 ; a, 24.]

FLAMMETTE (Fr.), n. Fla^{3}m-e^{2}t. 1. See FLEAM. 2. The *Ranunculus declinatus.* [B, 121, 173 (a, 24) ; L, 41.]

FLAMMICEPS (Lat.), adj. Fla^{2}m(fla^{3}m)'i^2-se^{2}ps(ke^{2}ps). Gen., *-cip'itis.* From *flamma*, a flame, and *caput*, the head. Fr., *f.* Ger., *rothköpfig.* Having a red head. [L, 180.]

FLAMMIGT (Ger.), adj. Fla^{3}m'mi^{2}gt. See FLAMMEOUS.

FLAMMULA (Lat.), n. f. Fla^{2}m(fla^{3}m)'mu^{2}l(mu^{4}l)-a^3. Dim. of *flamma*, a flame. Fr., *flammule.* Ger., *Flämmchen.* 1. A little flame. 2. See AGARICUS, subgenus 22. 3. Of De Candolle, a section of the genus *Clematis.* [B, 121 (a, 24).]—**Extractum flammulæ Jovis** [Fuld. Disp., 1791, Genev. Ph., 1780, Russ. Ph., 1803]. Fr., *extrait aqueux de clématite.* 1. The evaporated juice of *Clematis erecta.* 2. Of the Würzb. Ph., 1796, a preparation made by digesting for 3 days at a moderate temperature 1 part each of *Clematis erecta* and alcohol in 8 parts of water, expressing and decanting, distilling off the alcohol, and evaporating the residue to the required consistence. [B, 97, 119 (a, 14).]—**F. cordis.** See *Vital* FLAME.—**F. Jovis.** The *Clematis erecta.* [B, 46, 88 (a, 14).]—**F. major.** The *Ranunculus lingua.* [B, 180 (a, 24).]—**F. minor.** The *Ranunculus f.* [B, 180 (a, 24).]—**F. sæpium foliis integris.** The *Clematis vitalba.* [B, 200, 211.]—**F. vitalis.** See *Vital* FLAME.—**Herba flammulæ.** The herb of *Ranunculus f.* [B, 180 (a, 24).]—**Infusum flammulæ Jovis** [Dutch Ph., 1805, Niemann's Notes, Frankf. Disp., 1791, Würzb. Ph., 1796]. Fr., *infusion* (ou *hydrolé*) *de clématite.* A preparation made by macerating 3 or 4 parts of *Clematis erecta* in 16 of boiling water, and straining ; employed in secondary syphilis. [B, 119 (a, 21).]

FLAMY, n. Flam'i^2. The *Viola tricolor.* [A, 505 (a, 21).]

FLANK, n. Fla^{2}n^{2}k. Probably from *flaccus*, flabby. Gr., λαγών. Latin, *ilium, latus.* Fr., *flanc.* Ger., *Flanke, Seite.* It., *fianco.* Sp., *ijar, ijada.* The lateral part of the trunk between the lower ribs and the pelvis. [A, 301.]

FLANNEL, n. Fla^{2}n'e^{2}l. Lat., *lana texta.* Fr., *flanelle.* Ger., *Flanell.* It., *flanella.* Sp., *franela.* 1. A soft and loosely woven variety of woolen cloth. 2. The leaves of *Verbascum thapsus.* [A, 505 (a, 21).]—**Adam's f.** 1. The *Verbascum thapsus.* 2. The *Dipsacus silvestris.* [A, 505 (a, 21).]—**Canton f., Cotton f.** A variety of thick cotton cloth so woven as to be fluffy on one side.—**F.-flower, F.-jacket, F.-plant.** See *F.* (2d def.).—**Our Lord's** (or **Saviour's**) **f.** The *Echium vulgare.* [A, 505 (a, 21).]—**Poorman's-f.** See *F.* (2d def.).

FLAP, n. Fla^{2}p. Lat., *panniculus, pars pendula.* Fr., *lambeau, lèvre.* Ger., *Lappen.* A more or less sheet-like pendulous mass of tissue detached in great part from the adjacent tissue ; in the pl., *f's*, the *Agaricus arvensis* and the *Peziza cochleata.* [A, 505 (a, 21).]—**Amputation f.** A f. made by the incision through the soft parts in amputating. [B.]—**Anaplastic f.** Fr., *lambeau anaplastique.* A skin f. made to assist in the restoration of a neighboring part. [a, 34.]—**Autoplastic f.** Fr., *lambeau autoplastique.* A f. that is made to replace a destroyed part. [a, 34.]—**Corneal f.** A f. consisting of the cornea, made in the course of a cataract extraction. [B.]—**Cutaneous f.** A f. that includes only the skin and fascia. [a, 34.]—**F. amputation, F. extraction, F. operation.** See under AMPUTATING, EXTRACTION, and OPERATION.—**F.-splitting.** Splitting, with the knife, the margin of a fistula all round so as to form f's that may be brought together and sutured. [Colles, "Dubl. Jour. of Med. Sci.," May, 1861 (a, 34).]—**Periosteal f.** An amputation f. consisting of periosteum, as in subperiosteal amputations.—**Rectangular f.** A f. of rectangular shape, which is made by cutting parallel to the long axis of a limb. [B.]—**Skin f.** See *Cutaneous f.*—**Solid f.** An amputation f. consisting of both skin and muscle. [B.]—**Tegmentary f.** See *Cutaneous f.*

FLAPPER-BAGS, n. Fla^{2}p'u^{5}r-ba^{2}gz. The *Arctium lappa.* [A, 505 (a, 21).]

FLÄSCH (Ger.), n. Flash. A place in the canton of Grisons, Switzerland, where there is a gaseous alkaline spring. [L, 49, 135 (a, 14).]

FLASCHE (Ger.), n. Fla^{3}sh'e^2. See FLASK and BOTTLE.—**Abziehf'.** A cucurbit. [A, 315.]—**F'nbouillon.** Of Uffelmann, a sort of bouillon ; made by heating upon a water-bath a stoppered flask containing cut-up beef or veal, to which no water has been added. [B, 270.]—**F'nförmig.** See AMPULLATE.—**F'nkautschuk.** Crude caoutchouc occurring under the form of differently shaped hollow bodies. [B, 270.]—**F'nzug.** See ACHSELZUG.

FLASCHENBAUM (Ger.), n. Fla^{3}sh'e^{2}n-ba^3-u^{4}m. The genus *Anona.* [B, 180 (a, 24).]—**Dorniger F.** The *Anona spinescens.* [L, 80.]—**Dreilappiger F.** The *Anona triloba.* [L, 80.]—**Schuppiger F.** The *Anona squamosa.* [L, 80.]—**Stacheliger F., Weichstacheliger F.** The *Anona muricata.* [B, 180 (a, 24) ; L, 180.]

FLASK, n. Fla^{3}sk. Fr., *flacon.* Ger., *Flasche.* It., *fiasco.* Sp., *frasco.* A small bottle, especially one that is larger about the middle than at the bottom.—**Culture f's.** Sterilized f's used in bacteriological research for the reception of culture liquids, etc. [L, 164 (a, 27).]—**Pasteur's f.** A glass f. the neck of which is drawn out into a long, variously bent tube used for the reception of culture

fluids in the study of microbes. [B.]—**Specific-gravity f.** A f. for determining the specific gravity of liquids. The f., which is of known weight capacity, is filled with the liquid to be examined and weighed. The ascertained weight, less the weight of the f., gives the weight of a known volume of the liquid, and hence gives the specific gravity. [B.]—**Sterilized f.** A glass f. used in bacteriological research, with its neck drawn out so as to form a long capillary tube which is bent in various directions, and exhausted of air by the application of heat. [*a*, 27.]

FLAT-FOOT, n. Fla^{2}t'fu^{4}t. Lat., *pes planus.* Fr., *pied plat.* Ger., *Plattfuss.* A spurious valgus in which there is a depression of the inner half of the plantar arch without eversion of the sole. It may be due to dèfective osseous development, to the weight of the child's body in walking, flattening the arch, or to rheumatism or gout. [*a*, 34.]

FLATTERFÜSSIG (Ger.), adj. Fla^{3}t'te^{2}r-fu^{6}s-si^{2}g. See CHEIROPTEROUS.

FLAT-TOPS, n. Fla^{2}t'to^{2}ps. The *Vernonia noveboracensis.* [B, 275 (*a*, 24).]

FLATUEUX (Fr.), adj. Fla^3-tu^6-u^8. See FLATULENT (2d def.).

FLATULENCE, n. Fla^{2}t'u^{2}l-e^{2}ns. Gr., πνευμάτωσις. Lat., *flatulentia* (from *flatus* [*q. v.*]). Fr., *f.* Ger., *Blähung, Blähsucht, Flatulenz.* The state of being flatulent.—**Convulsive f.** F. associated with respiratory difficulty and loss of consciousness. [*a*, 34.]—**F. acide** (Fr.). See PYROSIS.—**F. hypochondriaque** (Fr.). Lat., *flatulentia hysterica.* F. occurring in hysterical persons; sometimes simulating, by distending the intestines, abdominal tumors. [*a*, 34.]—**F. lochiale** (Fr.). Lat., *flatulentia lochialis.* F. in lying-in women. [*a*, 34.]

FLATULENT, adj. Fla^{2}t'u^{2}l-e^{2}nt. Gr., ἐρυγματώδης. Lat., *flatulentus* (1st def.), *inflans* (2d def.). Fr., *f.*, *flatueux* (2d def.). Ger., *blähend, blähsüchtig.* 1. Affected with or subject to accumulation of gas in the alimentary canal. 2. Tending to cause such a condition (said of food).

FLATUOSITY, n. Fla^{2}t-u^2-o^{2}s'i^{2}t-i^2. Fr., *flatuosité.* See FLATULENCE.

FLATUS (Lat.), n. m. Fla(fla^3)'tu^{2}s(tu^{4}s). Gen., *-tus.* From *flare*, to blow. Gr., πνεῦμα. Ger., *Blähung, Wind.* Gas within the body, especially in the alimentary canal.—**F. furiosus.** See AMBULO.—**F. spinæ.** See SPINA *ventosa.*—**F. vaginalis.** Gas in the vagina. [A, 326 (*a*, 21).]

FLAUM (Ger.), n. Fla^3'u^{4}m. See LANUGO.

FLAVEDO (Lat.), n. f. Fla(fla^3)-ve(wa)'do. Gen., *-ed'inis.* From *flavere*, to be yellow. 1. Yellowness. [A, 322.] 2. A yellow fruit rind, especially the yellow outer rind of oranges and lemons. 3. A disease in plants in which the green parts assume a yellow color. [B, 19 (*a*, 24).]—**F. a sugillatione.** See SUGILLATION.—**F. icteritia.** The yellow coloration caused by jaundice. [G, 11.]—**F. nativa.** The normal yellow complexion of certain races of Africa. [G, 11.]

FLAVEQUISETIN, n. Fla^{2}v-e^{2}k''wi^2-se'ti^{2}n. From *flavus*, yellow, and *equisetum.* Fr., *flavéquisétine.* A crystalline coloring matter obtained from *Equisetum fluviatile.* It dyes cotton yellow. [B, 46 (*a*, 14); B, 270.]

FLAVER, n. The *Avena fatua.* [B, 275 (*a*, 24).]

FLAVERIA (Lat.), n. f. Fla(fla^3)-ve(wa)'ri^2-a^3. Fr., *flavérie.* A genus of composite herbs of the *Helenioideæ.* The *Flaverieæ* are a subtribe of composite plants, of the *Senecionideæ* (Lessing and others), or of the *Calendulariæ* (Reichenbach), or of the *Helenioideæ* (Bentham and Hooker). [B, 42, 170 (*a*, 24).]—**F. angustifolia, F. chilensis.** Fr., *flavérie à feuilles étroites.* A species found in Chili, where it is used as a vermifuge. [B, 173 (*a*, 24).]—**F. contrayerba, F. contrayerva.** Fr., *flavérie contrayerba.* A species found in Peru; used as a remedy in snake-bites. [B, 121, 173 (*a*, 24).]—**F. dauda.** A species found in Victoria, Chili; used like *F. angustifolia.* ["Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]—**F. peruviana.** The *F. contrayerba.* [B, 173 (*a*, 24).]

FLAVÉRIE (Fr.), n. Fla^3-va-re. See FLAVERIA.—**F. à feuilles étroites.** See FLAVERIA *angustifolia.*

FLAVESCENT, adj. Fla-ve^{2}s'e^{2}nt. Lat., *flavescens, flavidus, flavus, flaveus* (from *flavere*, to be golden yellow). Fr., *jaune un peu pale, jaunâtre, f.* Ger., *hellgelb.* Of a pure, pale-yellow color. [B, 19 (*a*, 24).]

FLAVESCIN, n. Fla-ve^{2}s'i^{2}n. A transparent, light-brown substance, obtained from the distillation of oak, and forming with the alkalies yellow compounds, which are decolorized by the action of acids. [Lux, "Drugg. Circ. and Chem. Gaz.," March, 1881 (B); "Proc. of the Am. Pharm. Assoc.," xxix (*a*, 14).]

FLAVENS (Lat.), **FLAVIDUS** (Lat.), adj's. Fla(fla^3)'ve^{2}nz-(wans), -vi^{2}d(wi^{2}d)-u^{3}s(u^{4}s). See FLAVESCENT.

FLAVIN, n. Flav'i^{2}n. An extract containing quercetin and quercitron, obtained from quercitron-bark. [B, 270.]

FLAVINE, n. Flav'en. Diphenylurea. [B.]

FLAVOPHENINE, n. Fla^{2}v-o-fe^{2}n'en. Fr., *flavophénine.* Ger., *Flavophenin.* Syn.: *chrysamine.* A yellow coloring matter, $C_{26}H_{18}N_4O_6 = [C_6H_4 - N : N - C_6H_2(OH) - CO.OH]_2$. [B, 270.]

FLAVOPURPURIN, n. Flav-o-pu^{6}rp'u^2-ri^{2}n. From *flavus*, yellow, and *purpura*, the purple-fish. A substance, $C_{14}H_8O_5 = C_{14}H_5(OH)_3$, or trioxyanthraquinone, prepared from anthraflavic acid. It occurs in golden, acicular crystals, isomeric with (and closely resembling) anthrapurpurin and with purpurin. [B, 2.]

FLAVOR, n. Flav'o^{2}r. Fr., *arome, saveur.* Ger., *Wohlgeruch, Wohlgeschmack.* 1. That quality of anything which affects the smell or taste. [L, 56.] 2. A preparation for imparting such a quality.—**Curaçoa f.** A preparation containing 4 parts of compound tincture of curaçoa, 8 of tincture of fresh orange-peel, 6 of orange-flower water, 27 of syrup, 28 of alcohol, and 12 of water. ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]

FLAVOVIRENS (Lat.), adj. Fla(fla^3)-vo(wo^3)-vir(wer)'e^{2}nz-(ans). From *flavus*, yellow, and *virere*, to be green. Of a yellowish-green color. [L.]

FLAVOUS, adj. Flav'u^{3}s. Lat., *flavus.* Ger., *hellgelb.* Light-yellow or ochre-yellow. [B, 123 (*a*, 24).]

FLAW-FLOWER, n. Fla^4'flu^5-u^4-u^{5}r. The *Anemone pulsatilla.* [B, 275 (*a*, 24).]

FLAX, n. Fla^{2}x. A.-S., *fleax.* Gr., λίνον. Lat., *linum.* Fr., *lin* [Fr. Cod.]. Ger., *Flachs, Lein.* It., Sp., *lino.* 1. A plant of the genus *Linum.* 2. See *F.-fibre.*—**American bog-f.** The *Linum striatum.* [B, 275 (*a*, 24).]—**American false f.** The *Camelina sativa.* [B, 275 (*a*, 24).]—**Bright-blue perennial f.** The *Linum provinciale.* [B, 275 (*a*, 24).]—**Common f.** The *Linum usitatissimum.* [B, 275 (*a*, 24).]—**Crimean f.** The *Linum tauricum.* [B, 275 (*a*, 24).]—**Dwarf f.** The *Linum catharticum.* [A, 505 (*a*, 21).]—**East Indian f.** The *Linum trigynum.* [B, 275 (*a*, 24).]—**Evergreen f.** The *Linum arboreum.* [B, 275 (*a*, 24).]—**Fairy-f.** The *Linum catharticum.* [A, 505 (*a*, 21).]—**False f.** In America, the genus *Camelina.* [B, 19, 34 (*a*, 24).]—**F. family.** The *Linaceæ.* [*a*, 24.]—**F.-fibre.** The fibre obtained from the rind and inner portion of the stalks of *Linum usitatissimum* and several other species of *Linum*; used in making linen, lint, etc. [B, 77 (*a*, 21).]—**F.-lily.** See the major list.—**F.-plant seeds.** The seeds of *Linum usitatissimum.* [A, 479 (*a*, 21).]—**F'seed.** See the major list.—**F.-star.** See ASTEROLINUM *stellatum.*—**F.-tail.** The *Typha latifolia.* [B, 275 (*a*, 24).]—**F'weed.** 1. The *Sisymbrium Sophia.* 2. The *Linaria vulgaris.* [B, 5, 180, 275 (*a*, 24).]—**F'worts.** The *Linaceæ.* [B, 19, 34 (*a*, 24).]—**Large yellow-flowered American f.** The *Linum sulcatum.* [B, 275 (*a*, 24).]—**Larger blue f. of North America.** The *Iris versicolor.* [B, 275 (*a*, 24).]—**Mountain f.** 1. The *Linum catharticum.* 2. The *Erythræa centaurium.* [A, 505 (*a*, 21).] 3. See ASBESTOS.—**Native f. of New Zealand.** The *Phormium tenax* and the *Phormium Colensoi.* [B, 275 (*a*, 24).]—**Orange-flowered f.** The *Linum Macræi* (seu *Chamissonis*). [B, 275 (*a*, 24).]—**Pale-flowered f.** The *Linum angustifolium.* [B, 275 (*a*, 24).]—**Purging f.** The *Linum catharticum.* [A, 505 (*a*, 21).]—**Spurge-f.** See the major list.—**Toad-f.** See the major list.—**Virginian yellow-flowered f.** The *Linum virginianum.* [B, 275 (*a*, 24).]—**White-flowered f.** The *Linum monogynum.* [B, 275 (*a*, 24).]—**White-flowered dwarf f.** The *Linum alpinum.* [B, 275 (*a*, 24).]—**Wild dwarf f.** The *Linum catharticum silvestre.* [*a*, 24.]—**Wild f.** 1. The *Linaria vulgaris.* 2. The *Cuscuta epilinum.* [A, 505 (*a*, 21).]—**Winter-flowering f.** The *Linum trigynum.* [B, 275 (*a*, 24).]

FLAX-LILY, n. Fla^{2}x'li^{2}l-i^2. The *Phormium tenax.* [B, 275 (*a*, 24).]—**Australian f.-l.** The genus *Dianella.* [B, 275 (*a*, 24).]—**Smaller f.-l.** The *Phormium Colensoi.* [B, 275 (*a*, 24).]

FLAXSEED, n. Fla^{2}x'sed. Lat., *linum* [U. S. Ph.], *lini semina* [Br. Ph.], *semen lini* [Ger. Ph.]. Fr., *grains* (ou *semence*) *de lin* (1st def.). Ger., *Leinsamen* (1st def.), *Flachssamen* (1st def.). It., *semi de lino* (1st def.). Sp., *linaza* (1st def.). 1. The seed of *Linum usitatissimum*; linseed. 2. The genus *Radiola* and the *Radiola millegrana.* [B, 5, 18, 19, 275 (*a*, 24).]—**Compound infusion of f.** See *Infusum* LINI.—**F. meal.** See LINI *farina.*—**F. oil.** See *Oleum* LINI.—**F.-oil cake.** See *Placenta seminis* LINI.—**F. poultice.** See *Cataplasma* LINI.—**F. tea.** See *Infusum* LINI.—**Ground f.** See LINI *farina.*—**Oil of f.** See *Oleum* LINI.

FLEA, n. Fle. A.-S., *fleá.* Gr., ψύλλα. Lat., *pulex.* Fr., *puce.* Ger., *Floh.* It., *pulce.* Sp., *pulga.* See PULEX *irritans.*—**Common f.** The *Pulex irritans.* [B.]—**F'bane.** See the major list.—**F'bites.** 1. Red spots caused by the bite of a f. [*a*, 34.] 2. The *Lychnis diurna.* [A, 505 (*a*, 21).]—**F.-seed.** The seed of *Plantago psyllium.* [B, 275 (*a*, 24).]—**F.-weed.** The *Galium verum.* [A, 505 (*a*, 21).]—**F'wort.** See FLEABANE (3d, 4th, and 5th def's).—**Sand-f.** Ger., *Sandfloh.* Sp., *nigua.* The *Sarcopsylla penetrans.* [B.]

FLEABANE, n. Fle'ban. Fr., *herbe aux puces* [Fr. Cod.] (4th def.). 1. The genus *Erigeron* and the *Erigeron acris.* 2. The genus *Conyza.* 3. The *Inula pulicaria.* 4. The *Plantago psyllium.* 5. The *Pulicaria vulgaris* and the *Pulicaria dysenterica.* [A, 505 (*a*, 21); B, 19, 121, 275 (*a*, 24).]—**African f.** The genus *Tarchonanthus.* [B, 19, 275 (*a*, 24).]—**American f.** The *Erigeron philadelphicus.* [B, 275 (*a*, 24).]—**Australian f.** The *Erigeron mucronatus.* [B, 275 (*a*, 24).]—**Blue-flowered f.** The *Erigeron acris.* [A, 505 (*a*, 21).]—**California f.** The *Conyza salicifolia.* ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]—**Canada f.** The *Erigeron canadensis.* [B, 5, 121 (*a*, 24).]—**Common f.** See *F.* (5th def.).—**Daisy f.** The *Erigeron annuus* and the *Erigeron strigosus.* [B, 121, 275 (*a*, 24).]—**F. powder.** The powdered dried flowers of *Pyrethrum carneum*, *Pyrethrum roseum*, and *Pyrethrum purpureum.* [B, 185 (*a*, 24).]—**Georgian f.** The *Inula glandulosa.* [B, 275 (*a*, 24).]—**Glutinous f.** The *Jasonia glutinosa.* [B, 275 (*a*, 24).]—**Larger f.** The *Conyza squarrosa.* [*a*, 24.]—**Marsh f.** The genus *Pluchea.* [B, 19, 34, 275 (*a*, 24).]—**Middle-sized f.** The *Pulicaria dysenterica.* [*a*, 24.]—**Mountain f.** The *Erigeron alpinus* (seu *uniflorus*). [B, 275 (*a*, 24).]—**Oil-of-Canada f.** Oil of erigeron. [B.]—**Pyrenean f.** The *Inula montana.* [B, 275 (*a*, 24).]—**Saint Helena f.** The *Conyza rugosa.* [B, 275 (*a*, 24).]—**Salt-marsh f.** The *Pluchea camphorata.* [B, 275 (*a*, 24).]—**Showy f.** The *Erigeron speciosus* (*Stenactis speciosa*). [B, 275 (*a*, 24).]—**Shrubby African f.** The *Tarchonanthus camphoratus.* [B, 275 (*a*, 24).]—**Skevish f.** The *Erigeron heterophyllus.* [*a*, 24.]—**Small f.** The *Pulicaria vulgaris*, also the *Erigeron pusillus* (a variety of the *Erigeron canadensis*). [A, 511 (*a*, 24).]—**West Indian f.** The *Vernonia arborescens.* [B, 275 (*a*, 24).]—**White f.** The *Inula candida.* [B, 275 (*a*, 24).]

FLEAM, n. Flem. Dutch, *flym.* Lat., *phlebotomum.* Fr., *flamme, flammette.* Ger., *Lasseisen, Fliete.* 1. A spring-lancet used for venesection. 2. Of the veterinarians, a phlebotome shaped like a gum-lancet. [A, 301.]

FLÉAU (Fr.), n. Fla-o. From *flagellum*, a whip. 1. A plague. 2. The genus *Phleum*. 3. See FLAGELLUM (5th def.).

FLECHA DE AGUA [Mex. Ph.] (Sp.), n. Fla'cha^3 da a^{3}g'wa^3. The *Sagittaria sagittifolia*. [A, 447 (α, 21).]

FLÈCHE (Fr.), n. Fle^{2}sh. A dart or arrow.—**F's caustiques.** See *Caustic* DARTS.—**F. d'eau.** The *Sagittaria aquatica*. [B, 173 (α, 24).]—**F. rouge.** A red variety of *Hygrophorus conicus*. [B, 121 (α, 24).]

FLÉCHIÈRE (Fr.), n. Fla-she-e^{2}r. The genus *Sagittaria*. [B, 173 (α, 24).]—**F. aquatique, Petite f.** The *Sagittaria aquatica*. [B, 173 (α, 24).]

FLÉCHISSEUR (Fr.), n. Fla-shi^{2}s-su^{5}r. See FLEXOR.—**F. court du gros orteil.** See FLEXOR *pollicis pedis brevis*.—**F. court du petit doigt.** See FLEXOR *digiti minimi manus brevis*.—**F. court du petit orteil.** See FLEXOR *digiti pedis brevis*.—**F. court du pouce.** See FLEXOR *pollicis manus brevis*.—**F. de la cuisse.** See *Biceps* FLEXOR *cruris*.—**F. des doigts profonde.** See FLEXOR *digitorum manus profundus*.—**F. des doigts superficiel.** See FLEXOR *digitorum manus sublimis*.—**F. du coccyx.** The curvator coccygis muscle. [L, 7 (α, 29).]—**F. du cubitus.** See FLEXOR *carpi ulnaris*.—**F. du radius.** See FLEXOR *carpi radialis*.—**F. externe du métacarpe.** See EPICONDYLO-SUPRACARPEUS.—**F. grand commun des orteils.** See FLEXOR *digitorum pedis longus*.—**F. intra-utérin.** See *Uterine* ELEVATOR.—**F. long commun des orteils.** The flexor digitorum pedis longus. [L, 32, 43.]—**F. long du cou sous-dorso atloïdien.** See DORSO-ATLOIDEUS.—**F. long du gros orteil.** The flexor hallucis longus. [L, 42, 43.]—**F. long du pouce.** The flexor pollicis manus longus. [L, 32, 43.]—**F. oblique du métacarpe.** See *Epitrochleo-supercarpeus*.—**F. perforé.** The flexor digitorum manus sublimis. [L, 35 (α, 29).]—**F. profond des phalanges.** See FLEXOR *digitorum manus profundus*.—**F. propre du pouce.** The flexor longus pollicis manus. [α, 29.]—**F. sublime (ou superficiel) des doigts.** See FLEXOR *digitorum manus sublimis*.—**F. tibial.** See FLEXOR *digitorum pedis longus*.

FLECHO D'AIGO, n. In Provence, the *Sagittaria aquatica*. [B, 121 (α, 24).]

FLECHSE (Ger.), n. Fle^{2}ch^2'ze^2. See TENDON.—**F'nähnlich, F'nartig.** Tendon-like, tendinous. [A, 521.]—**F'nbein.** A sesamoid bone. [L, 80.]—**F'nhaut.** See APONEUROSIS.—**F'nscheide.** The sheath of a tendon. [L, 135, p. 297.]

FLECHSIG (Ger.), adj. Fle^{2}ch^{2}z'i^{2}g. See APONEUROTIC and TENDINOUS.

FLECHTE (Ger.), n. Fle^{2}ch^{2}t'e^2. 1. Tetter; a popular term for various common eruptions; in the pl., *F'n*, eczema. [G.] 2. A lichen. [B.]—**Borkenartige F.** Incrusted herpes. [L, 43, 80.]—**Bösartige F.** See LUPUS.—**Einfache F.** Ordinary herpes. [L, 80.]—**Eiterige F.** Ulcerative herpes. [L, 43.]—**Feuchte F.** Humid herpes. [L, 80.]—**F'nausschläge.** Herpetic eruptions, [A, 521.]—**F'nbitter.** Cetraric acid. [B, 270.]—**F'nbläschen.** A herpetic vesicle. [A, 521.]—**F'nbräune.** See *Herpetic* ANGINA (1st def.).—**F'nbrod.** Iceland-moss bread. [A, 521.]—**F'ngrün.** Thallochlor. [B, 270.]—**F'nkoralle.** See the major list.—**F'nsalbe.** An ointment used for eczema, etc.; especially the unguentum zinci oxidi, unguentum picis liquidæ, etc. [B, 270.]—**F'nsäure.** Any acid obtained from lichens, *e. g.*, licanoric acid, evernic acid. [B, 270.]—**F'nseife.** See SAPO *piceus*.—**F'nstärke.** See LICHENIN.—**Fressende F.** Lupus exedens. [G.]—**Frieselartige F.** Purulent herpes. [L, 43.]—**Irländische F.** Irish moss. [α, 24.]—**Isländische F.** Iceland moss (the *Cetraria islandica*). [B, 180 (α, 24).]—**Juckende F.** Prurigo. [A, 521.]—**Kahlmachende F.** Trichophytosis decalvans. [A, 521.]—**Kleienartige F.** Furfuraceous herpes. [L, 80.]—**Mehlige F.** Furfuraceous herpes. [L, 43.]—**Nässende F.** Eczema.—**Scheerende F.** Ringworm of the scalp. [G.]—**Trockene F.** Psoriasis. [G.]

FLECHTENKORALLE (Ger.), n. Fle^{2}ch^{2}t'e^{2}n-ko^{2}r-a^{3}l-le^2. The genus *Corallina*.—**Officinale F.** See CORALLINA *officinalis*.

FLECHTWEIDE (Ger.), n. Fle^{2}ch^{2}t'vid-e^2. The *Salix viminalis*. [B, 180 (α, 24).]

FLECK (Ger.), n. Fle^{2}k. 1. A spot; a macula. 2. See NÆVUS.—**Blaue F'en.** See ECCHYMOSIS.—**Blinder F.** See *Optic* DISC.—**Embryonalf'.** See *Embryonic* AREA.—**Feuerf'.** See MACULA.—**Feuerf'en.** Rötheln, rubeola. [D.]—**Fieberf'en.** An eruption in a fever. [L, 80.]—**F'blume.** See the major list.—**F'enaussatz.** Macular leprosy. [A, 521.]—**F'enausschlag.** A macular eruption. [A, 521.]—**F'enbildung.** The formation of maculæ. [A, 521.]—**F'enkraut.** See the major list.—**F'enmal.** See NÆVUS *pigmentosus*.—**F'ensehen.** The subjective sensation of scotomata or of muscæ volitantes. [A, 521.]—**F'fieber.** See *Typhus* FEVER.—**F'ig.** Spotted; macular.—**F'sucht.** See SPILOSIS.—**F'typhus.** See *Typhus* FEVER.—**Gelber F.** See MACULA *lutea*.—**Keimf'.** See *Germinal* SPOT.—**Pupillenf'.** A round, movable, black spot observed in the pupil of the eye in the *Limulus polyphemus*. ["Arch. f. Anat. u. Phys.," 1855, p. 431 (α, 29).]—**Schorfartige F'en.** Macular leprosy. [L, 80.]—**Schwarzer F.** See MELASMA.—**Siebf'.** See MACULA *cribrosa*.—**Stirnf'.** A small, white spot found upon the forehead of the *Rana temporaria*. ["Arch. f. Anat. u. Phys.," 1865, p. 52 (α, 29).]—**Wagner'scher F.** See *Germinal* SPOT.—**Weisser F. der Nägel.** The lunula of the nails. [L, 80.]

FLECKBLUME (Ger.), n. Fle^{2}k'blum-e^2. See SPILANTHES.—**Falsche F.** The *Spilanthes pseudo-acmella*. [B, 180 (α, 24); L, 77.]—**Gemüsef'.** The *Spilanthes oleracea*. [L, 80.]—**Kressenartige F.** The *Spilanthes oleracea*. [B, 180 (α, 24).]—**Wahre F.** The *Spilanthes acmella*. [B, 180 (α, 24).]—**Weisse F.** The *Spilanthes alba*. [B, 180 (α, 24).]

FLECKEN (Ger.), n. Fle^{2}k'e^{2}n. See FLECK.—**Gehörf'.** See OTOLITH.

FLECKENKRAUT (Ger.), n. Fle^{2}k'e^{2}n-kra^3-u^{4}t. See SCUTELLARIA *galericulata*.—**Geiskleef'.** The *Galega officinalis*. [B, 180 (α, 24).]

FLECKSTORCHSCHNABEL (Ger.), n. Fle^{2}k'storch^2-shna^{3}b-e^{2}l. See GERANIUM *maculatum*.—**Flüssiges F'extrakt.** See *Extractum* GERANII *fluidum*.

FLECTENS (Lat.), adj. Fle^{2}k'te^{2}nz(tans). From *flectere*, to bend. Effecting flexion; as a n., a flexor muscle.—**Carpum flectentium interior.** The flexor carpi ulnaris. [α, 29.]—**F. par lumborum.** See QUADRATUS *lumborum*.—**Primus cubitum f.** See *Biceps* FLEXOR *cubiti*.—**Secundus cubitum f.** See BRACHIALIS *anticus*.

FLECTION, n. Fle^{2}k'shu^{3}n. See FLEXION.

FLECTOR (Lat.), n. m. Fle^{2}k'to^{2}r. Gen., *-o'ris*. See FLEXOR.

FLEDERFLÜGELFÖRMIG (Ger.), adj. Flad'e^{2}r-flu^{6}g-e^{2}l-fu^{5}rm-i^{2}g. Bat-wing-shaped. [L, 43.]

FLEDERMAUS (Ger.), n. Flad'e^{2}r-ma^3-u^{4}s. The bat; in the pl., *Fledermäuse*, the *Cheiroptera*. [L.]—**F'flügel.** See ALÆ *vespertilionis*.

FLEECE, n. Fles. Ger., *Vliess*. Of Stilling, the periphery of the corpus dentatum cerebelli, so called from its wooly aspect. [I, 99.]

FLEEDOD, FLEENURT, n's. Fle'do^{2}d, -nu^{5}rt. The *Senecio jacobœa*. [A, 505 (α, 21).]

FLEISCH (Ger.), n. Flish. See FLESH.—**F'ansatz.** See HYPERSARCOSIS.—**F'ansetzend.** Tending to produce corpulence. [A. 521.]—**F'auswuchs.** See CARNOSITY and CONDYLOMA.—**F'bauch.** The fleshy portion of a muscle, in contradistinction from the tendinous portion. ["Arch. f. Anat. u. Phys.," 1878 (Anat.), p. 441 (α, 29).]—**F'beschau.** Meat-inspection. [α, 14.]—**F'bildung.** See CARNIFICATION and INCARNATION.—**F'blume.** See the major list.—**F'bruch.** See the major list.—**F'brühe.** Meat-broth. [A, 521.]—**F'conserven.** Preserved meats. [A, 319 (α, 21).]—**F'controle.** Meat-inspection by government or municipal employees. [L, 57 (α, 14).]—**F'drüschen.** See CARUNCLE.—**F'ern.** Fleshy.—**F'erzeugend.** See SARCOTIC.—**F'essend.** Carnivorous. [L, 80.]—**F'extract.** See BEEF-*extract* and OSMAZOME.—**F'fressend.** See CARNIVOROUS.—**F'gallerte.** Meat-jelly. [A, 521.]—**F'gewächs.** See SARCOMA.—**F'gräten.** Osseous formations in muscular tissue. [α, 29.]—**F'icht, F'ig.** Fleshy, sarcous. [A, 521.]—**F'kamm.** See CARUNCLE.—**F'klystiere.** Nutrient enemata of meat-extract or broth. [L, 57 (α, 14).]—**F'kohle.** See *Animal* CHARCOAL.—**F'krone.** See the major list.—**F'lauch.** See ALLIUM *porrum*.—**F'lehre.** See SARCOLOGY.—**F'leim, F'leimgummi.** The gum of *Penœa sarcocolla*. [B, 180 (α, 24).] Cf. SARCOCOLLA.—**F'los.** Emaciated. [L, 80.]—**F'losigkeit.** See EMACIATION. [L, 80.]—**F'machend.** Flesh-forming. [A, 521.]—**F'mangel.** See ASARCIA.—**F'massen.** See *Sarcous* ELEMENTS.—**F'milchsäure.** Sarcolactic acid. [B, 270.] See LACTIC ACID.—**F'nabelgewächs.** See SARCOMPHALON.—**F'prismen.** See *Sarcous* ELEMENTS.—**F'quetschung.** See SARCOTHLASMA.—**F'saft.** Meat-juice. [α, 21.]—**F'säure.** Sarcolactic acid. [K.]—**F'schwamm.** The *Fistulina hepatica*. [B, 180 (α, 24).]—**F'stoff.** See CREATIN.—**F'suppe.** Meat-juice. [L, 80.]—**F'thee.** Beef-tea.—**F'theilchen.** See *Sarcous* ELEMENTS.—**F'überfluss.** Corpulence. [L, 80.]—**F'verbindung, F'vereinigung.** See SYSSARCOSIS.—**F'vergiftung.** Poisoning by ptomaine from meat. [α, 34.]—**F'verknöcherung.** See SARCOSTOSIS.—**F'werdung.** See CARNIFICATION.—**F'wucherung.** The formation of exuberant granulations. [L, 80.]—**Liebig'sche F'brühe, Liebig's F'extract.** See BEEF-*extract*.—**Mäusliches F., Muskelf'.** Muscle. [L, 80.]—**Schwammichtes F., Schwammiges F., Wildes F.** Exuberant granulations. [L, 80.] See HYPERSARCOMA and FUNGOSITY.—**Zahnf'.** The gum of a tooth.

FLEISCHBLUME (Ger.), n. Flish'blum-e^2. The genus *Sarcochilos*. [B, 180 (α, 24).]—**Abgebissene F.** The *Sarcochilos præmorsum*. [B, 180 (α, 24).]

FLEISCHBRUCH (Ger.), n. Flish'bruch^2. See SARCOCELE.—**Bösartiger F.** See SCIRRHOCELE.

FLEISCHKRONE (Ger.), n. Flish'kron-e^2. The genus *Sarcostemma*. [B, 180 (α, 24).]—**Meergrüne F.** The *Sarcostemma glaucum*. [B, 180 (α, 24).]—**Windende F.** The *Sarcostemma viminale*. [B, 180 (α, 24).]

FLEMA SALADA (Sp.), n. Fla'ma^3 sa^{3}l-a^3'da^3. Lit., salty phlegm; in the north of Spain, an epidemic disease formerly supposed to be pellagra, but having the features of acrodynia, and now attributed to eating diseased grain. [Costallat (A, 301); L, 88.]

FLEMEN (Lat.), n. n. Flem(fle^{2}m)'e^{2}n. Gen., *flem'inis*. From φλέγμα, a burning. 1. A swelling (Gr., κέδμα τοῦ ποδός) of the foot due to over-exertion. Cf. CEDMA. 2. Of F. Caper, sanguineous congestion of the lower limbs. 3. Of Keuchenius, a callous furrow of the hand or foot. [A, 325.]

FLENNEN (Ger.), n. Fle^{2}n'ne^{2}n. See LACRYMATION.

FLÉOLE (Fr.), n. Fla-ol. The genus *Phleum*. [B, 121 (α, 24).]—**F. allongée.** The *Phleum pratense*, var. *elongatum*. [B, 173 (α, 24).]—**F. des Alpes.** The *Phleum alpinum*. [A, 385.]—**F. des prés.** The *Phleum prateuse*. [B, 173 (α, 24).]—**F. noueuse.** The *Phleum pratense*, var. *nodosum*. [B, 173 (α, 29).]

FLERECIN, FLERESIN, n's. Of Blancardus, the gout. [L, 94.]

FLÉRINS-SAINT-ANDRÉ (Fr.), n. Fla-ra^{2}n^2-sa^{2}n^{2}t-a^{3}n^2-dra. A place in the department of the Hautes-Alpes, France, where there is a sulphurous spring. [A, 385.]

FLESH, n. Fle^{2}sh. A.-S., *flæsc*. Gr., σάρξ. Lat., *caro*. Fr., *chair*. Ger., *Fleisch*. It., Sp., *carne*. Of the animal organism, the bulky soft parts, especially the muscular tissue; of plants, fruits, etc., the soft parts. [B. 19 (α, 24).]—**Extract of f.** See *Extract of* MEAT.—**F.-and-blood.** The *Potentilla tormentilla*. [A,

505 (*a*, 21).]—**F.-juice.** See MEAT-*juice.*—**Goose-f.** See CUTIS *anserina.*—**Proud f.** A popular term for exuberant granulations in a wound or ulcer.

FLESHY, adj. Fle^{2}sh'i^2. Gr., σαρκώδης. Lat., *carnosus.* Fr., *charnu.* Ger., *fleischig.* 1. Well-nourished, plump. 2. Of a muscle, consisting wholly or largely of muscular fibres, not tendinous. 3. Of plant-organs, thick and succulent. [B, 1, 123 (*a*, 24).]

FLETSCHEN (Ger.), n. Fle^{2}t'she^{2}n. A grating or gnashing of the teeth. [A, 521; L, 80.]

FLETUS (Lat.), n. m. Flet(flat)'u^{3}s(u^{4}s). Gen., *flet'us.* See LACRYMATION.

FLEUNEUNETTE (Fr.), n. Flu^8-nu^5-ne^{2}t. The *Ruscus aculeatus.* [B, 121 (*a*, 24).]

FLEUR (Fr.), n. Flu^{8}r. 1. See FLOWER. 2. In the pl., *f's*, the menses. [L, 41.]—**Fausse f.** Of Vaillant, a flower of which the generative organs are not surrounded by petals. [A, 4.]—**F. admirable.** The *Mirabilis jalapa.* [B, 121 (*a*, 24).]—**F. aiglantine.** The *Aquilegia alpina.* [B, 121, 173 (*a*, 24).]—**F. ambrevale.** The *Polygala vulgaris.* [B, 121, 173 (*a*, 24).]—**F's ammoniacales cuivreuses.** Ammonium and copper chloride. [L, 105 (*a*, 14).]—**F's ammoniacales hématisées** (ou **martiales**). Ammonium and iron chloride obtained by sublimation. [L, 105 (*a*, 14).]—**F. aux dames.** The *Anemone pulsatilla.* [B. 121, 173 (*a*, 24).]—**F's béchiques.** In pharmacy, the flowers of *Borrago officinalis, Anchusa officinalis, Papaver rhœas, Viola odorata*, etc. [B, 88 (*a*, 14).]—**F's blanches.** An old term for leucorrhœa. [A, 44.]—**F's carminatives.** In pharmacy, the flowers of *Matricaria chamomilla, Pyrethrum (Matricaria) parthenium, Melilothus officinalis*, etc. [B, 88 (*a*, 14).]—**F. complète.** See *Complete* FLOWER.—**F's cordiales.** In pharmacy, the flowers of sage, thyme, wild thyme, marjoram, lavender, rosemary. [B, 88 (*a*, 14).]—**F. d'amour.** The *Delphinium consolida.* [B, 121 (*a*, 24).]—**F. d'araignée.** The *Nigella damascena.* [B, 121 (*a*, 24).]—**F. d'Asie.** Native sodium carbonate. [L, 41, 105 (*a*, 14).]—**F. de bouillon blanc.** The flowers of the *Verbascum thapsus.* [A, 319 (*a*, 21).]—**F. de cannelle.** The buds of *Cinnamomum cassia.* [B, 173 (*a*, 24).]—**F. de chair.** The *Melampyrum arvense*, the *Lychnis flos cucculi*, and the *Trifolium incarnatum.* [A, 385.]—**F. de Constantinople.** The *Lychnis chalcedonica.* [B, 121 (*a*, 24).]—**F. de coucou.** The *Narcissus pseudo-narcissus*, the *Primula officinalis*, and the *Lychnis flos cuculi.* [B, 19, 173 (*a*, 24).]—**F. de crapaud.** The *Stapelia variegata.* [B, 19 (*a*, 24).]—**F. de douze heures.** The *Ornithogalium umbellatum.* [B, 121 (*a*, 24).]—**F. de feu.** The *Euphorbia punicea.* [B. 121 (*a*, 24).]—**F. de jalousie.** The *Amarantus albus.* [B, 121 (*a*, 24).]—**F. de Jupiter.** The *Lychnis flos Jovis.* [B, 19 (*a*, 24).]—**F. de kali.** See *F. de Turquie.*—**F. de la passion.** The *Passiflora cœrulea.* [B, 121 (*a*, 24).]—**F. de la Saint-Jean.** The *Rubia vera.* [B, 121 (*a*, 24).]—**F. de la Trinité.** The *Viola tricolor.* [B, 121 (*a*, 24).]—**F. de lis.** The *Lilium candidum*, the *Phalangium liliago*, and the *Iris germanica.* [B, 19, 173 (*a*, 24).]—**F. de luce.** The *Iris germanica.* [B, 185 (*a*, 24).]—**F. de midi.** The *Mesembryanthemum postmeridianum.* [A, 385.]—**F. de miel.** The *Melianthus major.* [B, 19 (*a*, 24).]—**F. de mollet.** The *Pæonia officinalis.* [B. 121 (*a*, 24).]—**F. de muscade.** The aril of *Myristica aromatica.* [B, 173 (*a*, 24).]—**F. de Noël.** The *Helleborus grandiflorus.* [B, 173 (*a*, 24).]—**F. de paille.** The *Helichrysum bracteatum.* [B, 121 (*a*, 24).]—**F. de paon.** The *Cæsalpinia pulcherrima.* [B, 121 (*a*, 24).]—**F. de Pâques.** The *Bellis perennis* and the *Anemone pulsatilla.* [B, 121 (*a*, 24).]—**F. de Paradis.** The *Cæsalpinia pulcherrima.* [B, 121 (*a*, 24).]—**F. de printemps.** The *Primula officinalis.* [B, 173 (*a*, 24).]—**F. de quatre heures.** The *Convolvulus mechoacanha* and the *Mirabilis jalapa.* [B, 121 (*a*, 24).]—**F. de Sainte-Catherine.** The *Nigella arvensis.* [B, 173 (*a*, 24).]—**F. de Saint-Jacques.** The *Senecio elegans.* [B, 121 (*a*, 24).]—**F. de Saint-Jean.** The *Artemisia vulgaris.* [B, 121 (*a*, 24).]—**F. de Saint-Joseph.** The *Nerium oleander.* [B, 121 (*a*, 24).]—**F. de Saint-Martin.** See ALSTRŒMERIA *pelegrina.*—**F. de sang.** The *Tropæolum majus.* [B. 121 (*a*, 24).]—**F. des dames.** The *Heliotropium peruvianum.* [B, 19 (*a*, 24).]—**F's des femmes.** An old term for the menstrual blood. [A, 44.]—**F. des morts.** The *Tagetes erecta.* [A, 385.]—**F. de soleil.** The *Nostoc commune* and the *Cistus helianthemum.* [B, 88 (*a*, 14); 121 (*a*, 24).]—**F. des teinturiers.** The *Genista tinctoria.* [B, 121 (*a*, 24).]—**F. des veuves.** The *Scabiosa atropurpurea.* [B, 19 (*a*, 24).]—**F. de terre.** The *Nostoc commune.* [B, 121 (*a*, 29).]—**F. de tous les mois.** See CALENDULA *officinalis.*—**F. de Turquie.** The flowers and dried leaves of *Aizoon canariense.* [D, 92.]—**F. de veuve.** The *Scabiosa atropurpurea.* [B, 121 (*a*, 24).]—**F. de Zacharie.** The *Centaurea cyanus.* [B, 121 (*a*, 24).]—**F. d'hiver.** The *Helleborus hyemalis.*—**F. d'or et d'argent.** The *Lonicera confusa.* [B, 19 (*a*, 24).]—**F. du ciel.** The *Nostoc commune.* [B, 173 (*a*, 24).]—**F. du diable.** The *Iris susiana.* [B, 19 (*a*, 24).]—**F. du grand seigneur.** The *Centaurea amberboi.* [B, 121 (*a*, 24).]—**F. d'une heure.** The *Hibiscus vesicarius*, and other species of *Hibiscus.* [B, 19 (*a*, 24).]—**F. d'un jour.** The *Tradescantia virginica.* [B. 121 (*a*, 24).]—**F. du Parnasse.** The *Parnassia palustris.* [B, 121 (*a*, 24).]—**F. du Péron.** The *Cereus flagelliform.* [B, 121 (*a*, 24).]—**F. du Saint-Esprit.** In Guatemala, the *Peristeria elata.* [B, 121 (*a*, 24).]—**F. du tan.** The *Fuligo varians.* [B, 121 (*a*, 24).]—**F. du vent.** The *Anemone pulsatilla.* [B, 173 (*a*, 24).]—**F. du vin.** See WINE-*flowers.*—**F. effleurée.** See *Fausse f.*—**F. en casque.** The *Aconitum napellus.* [B, 19, 121 (*a*, 24).]—**F. en feuille.** The *Salvia horminum.* [A, 385.]—**F. en ombelle composé.** See *Compound umbellate* FLOWER.—**F. épanouie.** See *Expanded* FLOWER.—**F. feuille.** The *Salvia horminum.* [B, 121 (*a*, 24).]—**F. hépatique.** The *Parnassia palustris.* [A, 385.]—**F. nue.** A flower destitute of bracts, involucre, etc. [B, 1 (*a*, 24).]—**F's pectorales** [Fr. Cod.]. See *Species* FLORUM *pectoralium*, under FLOS.—**F. pleurétique.** The *Papaver rhœas.* [A, 385.]—**F. royale.** See DELPHINIUM *Ajacis.*—**F. sanguine.** The *Tropæolum majus.* [B, 173.]—**Passe-f.** See ANEMONE *pulsatilla.*—**Tisane de f's pectorales** [Fr. Cod.]. A preparation made by infusing 1 part of *species florum pectoralium* in 200 parts of boiling distilled water, and straining. [B, 113 (*a*, 14).]—**Vraie f.** Of Vaillant, a flower provided with petals. [A, 4.]

FLEURAISON (Fr.), n. Flu^5-re^2-zo^{2}n^2. See INFLORATION.

FLEURON (Fr.), n. Flu^5-ro^{2}n^2. The flower-head of a composite plant when the florets are regular. [B, 1 (*a*, 24).]

FLEWORT, n. Fle'wu^{6}rt. The *Ippia minor.* [A, 505 (*a*, 21).]

FLEXIBILITAS (Lat.), n. f. Fle^{2}x-i^2-bi^{2}l'i^2-ta^{2}s(ta^{3}s). Gen., *-ta'tis.* See FLEXIBILITY.—**F. cerea.** Ger., *wächserne Biegsamkeit.* Wax-like flexibility; a condition observed in catalepsy, in which the limbs may be placed by an experimenter in any possible attitude without any perceptible resistance, and maintain that attitude for a long time.

FLEXIBILITY, n. Fle^{2}x-i^2-bi^{2}l'i^2-ti^2. Lat., *flexibilitas* (from *flectere*, to bend). Fr., *flexibilité.* Ger., *Biegsamkeit.* It., *flessibilità.* Sp., *flexibilidad.* The property of being flexible. [C.]—**Waxen f.** See FLEXIBILITAS *cerea.*

FLEXIBLE, adj. Fle^{2}x'i^2-b'l. Lat., *flexibilis.* Fr., *f.* Ger., *biegsam.* Easily bent. [*a*, 24.]

FLEXICAULIS (Lat.), adj. Fle^{2}x-i^2-ka^{4}l'(ka^3'u^{4}l)-i^{2}s. From *flectere*, to bend, and *caulis*, a stem. Fr., *flexicaule.* Ger., *biegstämmig.* Having a flexible stem. [L, 41.]

FLEXICOSTATE, adj. Fle^{2}x-i^2-co^{2}st'at. From *flectere*, to bend, and *costa*, a rib. Having bent or curved ribs. [L, 56.]

FLEXIFOLIUS (Lat.), adj. Fle^{2}x-i^2-fol(fo^{2}l)'i^2-u^{3}s(u^{4}s). From *flectere*, to bend, and *folium*, a leaf. Fr., *flexifolie.* Ger., *biegblättrig.* Having flexible leaves. [L.]

FLEXILE, adj. Fle^{2}x'i^{2}l. Lat., *flexilis.* See FLEXIBLE.

FLEXION, n. Fle^{2}k'shu^{3}n. Lat., *flexio* (from *flectere*, to bend). Fr., *f.* Ger., *F.*, *Beugung.* 1. A bending; also the state of being bent: the opposite of extension. 2. In the lobster, etc., the movement which increases the ventral curvature. [L.]—**Dorsal f.** Ger., *Ueberstreckung.* The bending backward of the hand at the wrist joint so as to form an angle between the dorsal surfaces of the hand and forearm. [L, 31 (*a*, 29).]—**F. angulaire de la colonne vertébrale** (Fr.). See *Angular* CURVATURE *of the spine.*—**F. latérale de la colonne vertébrale** (Fr.). See *Lateral* CURVATURE *of the spine.*—**F. of the fœtal head.** Ger., *Heruntersteigen des Schädels.* A forward inclination of the head by which it is approximated to the sternum.—**F. permanente des doigts** (Fr.). See *Dupuytren's (finger)* CONTRACTION.—**F'sebene** (Ger.). A ginglymoid joint. [*a*, 29.]—**Forced f., Forcible f.** Fr., *f. forcée.* Ger., *forcirte F.* Extreme f. of a limb at a joint for the purpose of checking the flow of blood through its arteries (to restrain hæmorrhage or to promote coagulation in an aneurysm), to stretch a nerve on the extensor aspect, or to break up false ankylosis. [*a*, 34.]

FLEXOR (Lat.), n. m. Fle^{2}x'o^{2}r. Gen., *-o'ris.* From *flectere*, to bend. Fr., *fléchisseur.* Ger., *Beuger, Beugemuskel.* It., *flessore.* Sp., *f.* A muscle that by its contraction produces flexion. [C.]—**Accessory f. of the foot.** See ACCESSORIUS *flexoris longi digitorum pedis.*—**Biceps f. brachii** (seu **cubiti**). Ger., *zweiköpfiger Armmuskel, Beuger des Vorderarmes.* The large muscle which occupies the anterior surface of the arm. It arises by two tendons, the one (the short, or inner, head) from the apex of the coracoid process of the scapula, and the other (the long, or outer, head) from the margin of the glenoid cavity of the scapula and the glenoid ligament, passing through the joint inclosed in a sheath of synovial membrane, and perforating the capsular ligament to descend in the bicipital groove. The two muscular prolongations of the tendons unite about the middle of the arm to form a fleshy fusiform mass, which terminates above the elbow in a flat tendon, which is inserted into the posterior portion of the tuberosity of the radius. Opposite the elbow a flat fibrous process is given off, which unites with the fascia of the forearm. By some anatomists it is regarded as being made up of four distinct muscles—the coraco-radialis, the coraco-ulnaris, the gleno-radialis, and the gleno-ulnaris. [L.]—**Biceps f. cruris.** Fr., *fléchisseur de la cuisse.* The f. of the knee which has for its origin two heads, one of which, the long head, arises from the upper part of the ischial tuberosity, and the other, or short head, from the linea aspera and upper portion of the external supracondylar line. It terminates in a tendon which is inserted into the outer side of the head of the fibula and the outer tuberosity of the tibia. [L.]—**Deep f. of the phalanges.** See TIBIO-PHALANGEUS.—**External f. of the metacarpus.** See EPICONDYLO-SUPRACARPEUS.—**F. accessorius.** See ACCESSORIUS *flexoris longi digitorum pedis.*—**F. accessorius a cauda ad tibiam tendens.** A muscle of some of the lower animals arising from the transverse processes of the anterior caudal vertebræ and inserted into the tibia. [L.]—**F. accessorius digitorum longus.** See *F. digitorum pedis longus accessoria.*—**F. accessorius digitorum pedis.** See ACCESSORIUS *flexoris longi digitorum pedis.*—**F. accessorius longus.** See *F. digitorum pedis longus accessorius.*—**F. accessorius pedis.** See ACCESSORIUS *flexoris longi digitorum pedis.*—**F. accessorius plantæ.** See *F. accessorius digitorum pedis.*—**F. antibrachii radialis.** See *Biceps f. cubiti.*—**F. antibrachii ulnaris.** The brachialis anticus muscle. [*a*, 29.]—**F. brachii.** See CORACO-RADIALIS.—**F. brachii longus.** The long f. of the fore leg in the horse, corresponding to the biceps f. cubiti in man. [L, 13 (*a*, 29).]—**F. brevis capitis.** See ATLOIDO-SUBOCCIPITALIS.—**F. brevis digitorum, F. brevis digitorum pedis, F. brevis digitorum pedis perforatus.** See *F. digitorum pedis brevis.*—**F. brevis digiti quinti.** See *F. digiti minimi manus brevis.*—**F. brevis hallucis.** See *F. hallucis brevis.*—**F. brevis minimi digiti accessorius.** An anomalous muscle lying beneath the f. digiti minimi brevis. [L, 332.]—**F. brevis minimi digiti manus.** See *F. digiti minimi manus brevis.*—**F. brevis minimi digiti pedis.** See *F. digiti minimi pedis brevis.*—**F. brevis pollicis manus.** See *F. pollicis longus.*—**F. brevis pollicis pedis.** See *F. hallucis brevis.*—**F. capitis.** The

rectus capitis anticus major. [L, 94 (*a*, 29).]—**F. capitis brevis.** See Atloido-suboccipitalis.—**F. capitis parvus.** See Atloido-styloideus.—**F. carpi exterior.** See *F. carpi radialis.*—**F. carpi interior.** See *F. carpi ulnaris.*—**F. carpi radialis.** Ger., *innerer Speichenmuskel, Speichenbeuger der Hand.* A spindle-shaped muscle which arises from the inner condyle of the humerus, the antibrachial fascia, and the intermuscular septa between it and the pronator radii teres, the palmaris longus, and the f. digitorum sublimis. A little below the middle of the forearm it ends in a flat tendon, which passes through a separate compartment in the anterior annular ligament of the wrist to be inserted into the base of the metacarpal bone of the index-finger, and occasionally into that of the middle finger. It flexes the wrist and assists in pronation of the hand. [L, 31, 142, 172, 332.]—**F. carpi radialis brevis, F. carpi radialis profundus.** An anomalous muscle arising from the radius between the insertion of the pronator radii teres and the supinator longus muscles and inserted into the trapezium. [L, 332.]—**F. carpi ulnaris.** Ger., *innerer Ellenbogenmuskel, innerer Ellenbogenbeuger.* The innermost f. of the superficial muscles of the forearm. It arises by two heads, the one from the inner condyle of the humerus, the other from the inner margin of the olecranon; from the upper two thirds of the posterior surface of the ulna, by means of a dense aponeurosis, and from the intermuscular septum, between it and the f. digitorum sublimis. The two heads are separated by a tendinous arch, beneath which are the ulnar nerve and the posterior ulnar recurrent artery. Upon the lower third of its anterior surface the muscular fibres are inserted into its tendon, which is inserted into the pisiform bone, the anterior annular ligament, and the base of the metacarpal bone of the little finger. The ulnar artery is situated upon the outer side of the tendon in the lower two thirds of the forearm. It flexes the wrist and aids in its adduction. [L, 31, 142, 172, 332.]—**F. carpi ulnaris brevis.** An anomalous muscle arising from the ulna and inserted into the uncinate bone. [L, 332.]—**F. cruris biceps, F. cruris externus, F. cruris fibularis.** See *Biceps f. cruris.*—**F. cubiti.** See *Biceps f. cubiti.*—**F. digiti minimi accessorius.** An anomalous muscle which arises from the lower surface of the tendon of the f. digitorum pedis longus and is inserted into the little toe. [L, 332.]—**F. digiti minimi brevis.** See *F. digiti minimi manus brevis.*—**F. digiti minimi manus brevis.** Fr., *fléchisseur court du petit doigt.* Ger., *kurzer Beuger des kleinen Fingers.* A small muscle which arises from the processus hamatus of the unciform bone and the front of the anterior annular ligament of the wrist, and inserted into the base of the first phalanx of the little finger, in common with the tendon of the abductor minimi digiti. Between it and this muscle are found the deep palmar branches of the ulnar nerve and artery. It flexes and abducts the first phalanx of the little finger. [L, 31, 142, 332.]—**F. digiti minimi pedis accessorius.** An occasional slip from the lower surface of the tendon of the f. digitorum pedis longus, behind its joint of division, inserted into the little toe, at which point it is perforated by the tendon of the f. digitorum brevis. [*a*, 29.]—**F. digiti minimi pedis brevis.** Fr., *fléchisseur court du petit orteil.* Ger., *kurzer Beuger der kleinen Zehe.* 1. A small muscle which arises from the base of the metatarsal bone of the little toe, the plantar tarso-calcaneal ligament, and the sheath of the peroneus longus, and is inserted by a tendon into the base of the first phalanx of the little toe of which it is a f. 2. The preceding muscle and the opponens digiti minimi regarded as one, each considered, respectively, as its outer and inner heads. [L, 31, 142, 332.]—**F. digiti parvus minimi.** See *F. digiti minimi manus brevis.*—**F. digiti secundi pedis proprius.** Of Bahnsen, a muscular slip arising from the back of the tibia and inserted into the terminal phalanx of the second toe. [L, 142 (*a*, 29).]—**F. digiti secundi proprius.** An anomalous muscle formed by the separation from the f. digitorum pedis longus of the portion connected with the tendon of the second toe. [L, 332.]—**F. digitorum.** See *F. digitorum pedis longus.*—**Flexores digitorum brevis, Flexores digitorum interossei.** The interossei muscles. [*a*, 29.]—**F. digitorum fibularis.** See *F. hallucis longus.*—**F. digitorum manus communis profundus.** See *F. digitorum manus profundus.*—**F. digitorum manus communis sublimis.** See *F. digitorum manus sublimis.*—**F. digitorum manus perforans.** See *F. digitorum manus profundus.*—**F. digitorum manus perforatus.** See *F. digitorum manus sublimis.*—**F. digitorum manus profundus.** Fr., *fléchisseur profond des doigts.* Ger., *tiefer Fingerbeuger.* A thick muscle lying beneath the f. carpi ulnaris and the f. digitorum sublimis muscles. It arises from the coronoid process of the ulna, the upper two thirds or three fourths of the inner and anterior surface of the ulna, the interosseous membrane, and the aponeurosis of origin of the f. carpi ulnaris. It divides into four bellies which shortly become tendinous; the tendons pass through the same compartment of the anterior annular ligament of the wrist in company with and beneath those of the f. digitorum sublimis. Opposite the first phalanges the tendons perforate those of the f. digitorum sublimis and are inserted into the bases of the last phalanges of the fingers. It flexes the distal phalanges of the fingers. [L, 31, 142, 172, 332.]—**F. digitorum manus profundus accessorius.** An occasional muscle which arises from the radius and joins one or more of the tendons of the f. digitorum profundus. [*a*, 29.]—**F. digitorum manus sublimis.** Fr., *fléchisseur superficiel des doigts.* Ger., *oberflächlicher Fingerbeuger, durchbohrter Fingerbeuger.* A broad, flat muscle situated in the middle of the forearm beneath the f. carpi ulnaris, f. carpi radialis, and the f. palmaris longus and pronator radii teres. It arises by three heads, the one from the internal condyle of the humerus, the internal lateral ligament, and the adjacent intermuscular septa; the second arises from the inner margin of the coronoid process of the ulna; and the third from the oblique line of the radius above the pronator radii teres. By some authorities the radial origin is regarded as one head, and the others as a second. About the middle of the forearm it divides into four tendons which are arranged in pairs, the most anterior going to the middle and ring fingers, and the posterior to the index and little fingers. They pass through the same compartment of the anterior annular ligament of the wrist, with and above the tendons of the f. digitorum manus profundus. Upon the palm of the hand they diverge to pass to their appropriate insertions, each being contained together with the corresponding tendon of the f. digitorum profundus in a fibrous sheath. Opposite the first phalanges each divides into two parts, which embrace the corresponding tendon of the f. digitorum profundus and unite posterior to it. Shortly after their union they again separate and are inserted on each side into the margins of the second phalanges. It is a f. of the second phalanges. [L, 31, 142, 172, 332.]—**F. digitorum pedis brevis, F. digitorum pedis communis brevis.** Fr., *fléchisseur court des orteils.* Ger., *kurzer Zehenbeuger.* A flat, thin muscle of the sole of the foot lying immediately beneath the plantar fascia. It arises from the inner tuberosity of the os calcis, the deep surface of the plantar fascia, and the septa between it and the adjacent muscles. About opposite the middle of the sole of the foot it divides into four bellies which shortly become tendinous. Opposite the middle of the first phalanges each tendon is pierced by the tendon of the f. digitorum pedis longus going to the same toe; it then divides into two slips, which are inserted into the sides of the second phalanges of the four smaller toes. It is a f. of the second phalanges of the toe. [L, 31, 142, 172, 332.]—**F. digitorum pedis communis longus, F. digitorum pedis longus.** Fr., *fléchisseur tibial, fléchisseur long des orteils.* Ger., *langer gemeinschaftlicher Zehenbeuger.* A f. muscle of the toes and an extensor of the foot upon the leg. It arises from the middle two fourths of the posterior surface of the tibia internal to the tibial origin of the tibialis posticus and from the septum between it and the last muscle, becoming tendinous at the lower part of the leg. Its tendon passes behind the internal malleolus in common with that of the tibialis posticus and crosses the sole of the foot in a forward and outward direction, to divide into four tendons which pierce those of the f. digitorum brevis and are inserted into the bases of the distal phalanges of the four smaller toes. [L, 31, 142, 172, 332.]—**F. digitorum pedis longus accessorius.** An anomalous muscle of the foot which may arise from any portion of the lower part of the leg and is inserted into the tendons of the f. digitorum pedis longus or in common with them. [L, 332.]—**F. digitorum pedis perforans.** See *F. digitorum pedis communis longus.*—**F. digitorum pedis perforatus.** See *F. digitorum pedis brevis.*—**F. digitorum pedis profundus.** See *F. digitorum pedis longus.*—**F. digitorum pedis sublimis.** See *F. digitorum pedis brevis.*—**F. digitorum perforatus.** See *F. digitorum manus sublimis.*—**F. digitorum profundus accessorius.** An anomalous offshoot from the muscular portion of the f. digitorum manus profundus which sends a tendon or tendons inserted into one or more of the fingers. [L, 31, 332.]—**F. digitorum superficialis.** See *F. digitorum manus sublimis.*—**F. digitorum tibialis.** See *F. digitorum pedis longus.*—**F. femoris.** See *Biceps f. cruris.*—**F. femoris magnus.** See Iliacus.—**F. hallucis.** See *F. hallucis longus.*—**F. hallucis brevis.** Fr., *fléchisseur court du gros orteil.* Ger., *kurzer Beuger der grossen Zehe.* A f. muscle of the great toe situated between the adductor and abductor hallucis muscles. It arises from the inner border of the cuboid bone, the external cuneiform bone, the plantar tarso-calcanean ligament and the tendon of the tibialis posticus muscle, and is inserted by two tendons into the inner and outer sides of the base of the first phalanx of the great toe, being blended with the insertions of the adductor and abductor hallucis respectively. By some authorities the outer portion of the muscle is regarded as a portion of the abductor hallucis, the name being restricted to the inner head. [L, 31, 142, 172, 332.]—**F. hallucis longus.** Fr., *fléchisseur long du gros orteil.* Ger., *langer Beuger der grossen Zehe.* A long muscle which arises from the lower two thirds of the posterior surface and lateral angle of the fibula, from the septum between it and the peronei muscles, from the fascia covering the tibialis posticus muscle, and the lower part of the interosseous membrane. Its fibres extend downward and backward and terminate in a tendon which passes through a groove upon the posterior surface of the tibia external to the one occupied by the tibialis posticus and f. digitorum pedis longus, out upon the sole of the foot to the interval between the two portions of the f. hallucis brevis, between which it passes, to be inserted into the base of the distal phalanx of the great toe. In the sole of the foot it gives off a tendon to the f. digitorum pedis longus. It flexes the distal phalanx of the great toe and extends the foot upon the leg. [L, 31, 142, 172, 332.]—**F. internodii primi digitorum.** See Lumbricalis *manus.*—**F. internodii primi pollicis manus.** Of Douglas, the opponens pollicis. Ger., *kurzer Daumenbeuger*. 1. A two-headed muscle of the ball of the thumb. Its superficial head arises from the outer two thirds of the annular ligament and the trapezium, the deep head from the trapezium, the trapezoid, cuneiform, and uncinate bones, and the first and second metacarpal bones. The two portions unite, after allowing the tendon of the f. pollicis longus to pass between them, into one which again divides into two, which are inserted one on either side of the base of the first phalanx of the thumb, blending, respectively, with the adductor and abductor pollicis. 2. By some authorities the term is restricted to the two small slips on each side of the tendon of the f. pollicis longus, the more internal and external being regarded, respectively, as portions of the adductor and abductor pollicis. [L, 31, 144, 172, 332.]—**F. pollicis longissimus** [Cowper], **F. pollicis longus, F. pollicis manus longus.** Fr., *fléchisseur long du pouce*. Ger., *langer Daumenbeuger*. A deeply seated muscle in the anterior part of the forearm. It arises from the anterior surface of the radius between the oblique line and the attachment of the pronator quadratus, from the adjacent part of the interosseous membrane and occasionally from the base of the coronoid process of the ulna, and terminates in a round tendon which passes beneath the annular ligament and through the palm of the hand between the two heads of the f. brevis pollicis, to be inserted into the terminal phalanx of the thumb. [L, 142, 172 (*a*, 29).]—**F. pollicis pedis brevis.** See *F. hallucis brevis*.—**F. pollicis pedis longus.** See *F. hallucis longus*.—**F. primi et secundi pollicis.** See *F. pollicis brevis*.—**F. primi internodii.** See OPPONENS *pollicis*.—**F. primi internodii digitorum pedis.** See LUMBRICALIS *pedis*.—**F. primi internodii minimi digiti.** See OPPONENS *minimi digiti*.—**F. primus secundi internodii pollicis.** See ADDUCTOR *pollicis manus*.—**F. profundus digitorum.** See *F. digitorum manus profundus*.—**F. profundus perforans.** See *F. digitorum manus profundus*.—**F. radialis.** See *F. carpi radialis*.—**F. radii.** See *Biceps f. cubiti*.—**F. secundi internodii.** See *F. pollicis brevis*.—**F. secundi internodii digitorum manus.** See *F. digitorum manus sublimis*.—**F. secundi internodii digitorum pedis.** See *F. digitorum pedis brevis*.—**F. sublimis digitorum manus.** See *F. digitorum manus sublimis*.—**F. sublimis digitorum pedis.** See *F. digitorum pedis brevis*.—**F. superficialis.** See EPITROCHLEO-PHALANGEUS.—**F. tarsi** [E. [*a*, 34.]—**F. sigmoidea.** See *Sigmoid* FLEXURE *of the colon*.—**Flexuræ transversæ.** Of Purkinje, the transverse arches formed by the rows of papillæ on the pulps of the fingers. [L, 7 (*a*, 29).]

FLEXURE, n. Fle^{2}x'u^{2}r. Lat., *flexura, flexio* (from *flectere*, to bend). Fr., *f.* Ger., *Krümmung*. It., *flessura*. Sp., *flexión*. A bending, a curve.—**Anterior f. of the corpus callosum.** See GENU *of the corpus callosum*.—**Basi-cranial f.** The forward f. of the embryo at the base of the skull.—**Caudal f.** The forward f. of the embryo at the caudal portion.—**Cephalic f's, Cranial f's, Encephalic f's.** Lat., *flexuræ* (seu *flexiones*) *cephalicæ*. Fr., *f's craniennes*. Ger., *Kopfkrümmungen, Hirnkrümmungen*. Certain f's of the cranial portion of the embryo which take place at an early period of development, the earliest and most important of which is the one that occurs at the anterior extremity of the notochord, at which place the medullary tube, and especially the substance forming the wall of the cranium, undergo a decided bending forward, so as to cause a marked projection of the thickened cranial base posteriorly. To this mesencephalic f. alone is the name *cranial* applied by H. F. Osborn. [A. 5; I, 98.]—**Diencephalic f.** Of Wilder, the change in the level of the encephalic segments by which in man, other mammals, birds, and reptiles, the mesal division of the prosencephalic cavity comes to lie dorsad of the diencephalic cavity, instead of cephalad of it, and on nearly the same plane as in the *Amphibia* and fishes. [I, 98.]—**Hæmal f.** In the *Branchiogasteropoda*, a f. of the alimentary canal away from the neural face of the body. [B, 100 (*a*, 29).]—**Hepatic f. of the colon.** Lat., *flexura coli dextra* (seu *hepatica*, seu *prima*). An abrupt bend in the ascending colon, situated at the under surface of the liver, on the right of the gall-bladder, where it passes inward and to the left, to become the transverse colon. [A, 478 (*a*, 17).]—**Neck f.** Of H. F. Osborn, the angle between the spinal cord and the oblongata, strongly marked at certain stages of development, but nearly obliterated in the adult. [I, 98.]—**Neural f.** In the *Cephalopoda* and *Pteropoda*, a f. of the alimentary canal toward the neural face of the body. [B, 100 (*a*, 29).]—**Pons f.** Of H. F. Osborn, the sharp ventral angle in the embryo corresponding nearly with the caudal margin of the pons. [I, 98.]—**Posterior f. of the corpus callosum.** See SPLENIUM.—**Principal cephalic f.** A decided angular flexion of the cranial cavity of the embryo in a ventral, or downward, direction in the region of the midbrain and sella turcica; the cranial f. of H. F. Osborn. [A. 5.]—**Sigmoid f. of the colon.** Lat., *flexura* (*coli*) *sigmoidea* (seu *iliaca*), *curvatura sigmoidea*. Fr., *S iliâque*. An S-shaped f. of the colon (the curve passing at first upward, then vertically downward, and to one or the other side) situated in the left iliac fossa. It begins at the termination of the descending colon, at the margin of the crest of the ilium, and ends at the beginning of the rectum, opposite the left sacro-iliac synchondrosis.—**Splenic f. of the descending colon.** Lat., *flexura coli lienalis* (seu *secunda*, seu *sinistra*). An abrupt bend connecting the transverse with the descending colon, and situated beneath the lower end of the spleen. [A, 478 (*a*, 17).]—**Suprasternal f.** A f. in the colon of a horse which rests upon the abdominal prolongation of the sternum. [L, 13 (*a*, 29).]

FLEXUS (Lat.), adj. Fle^{2}x'u^{3}s(u^{4}s). Fr., *fléchi*. Bent. [*a*, 24.]

FLIEDER (Ger.), n. Fled'e^{2}r. The *Sambucus nigra*. [B, 180 (*a*, 24).]—**Blauer F.** The *Syringa vulgaris*. [B, 180 (*a*, 24).]—**F'npfeffer.** See PIPER *longum*.—**F'npflaster.** See *Emplastrum* CANTHARIDIS.—**F'npilz.** See AGARICUS *muscarius*.—**F'npulver.** Metallic arsenic. [A, 319 (B).]—**F'nschwamm.** See AGARICUS *muscarius*.—**F'nstein, F'ntod.** Arsenic; because used as a fly-poison. [B, 180.]—**F'nwulst.** See AGARICUS *muscarius*.—**Gewitterf'.** See ANTHOMYIA *meteorica*.—**Grauer F'nschwamm.** See AGARICUS *rubescens*.—**Grubenf'.** See ANTHOMYIA *cuniculina*.—**Spanische F.** See CANTHARIS (2d def.).—**Spanischef'n-papier.** See *Charta* CANTHARIDIS.

FLIEGEND (Ger.), adj. Fleg'e^{2}nd. See VOLATILE and EPHEMERAL.

FLIEHKRAFT (Ger.), n. Fle'kra^{3}ft. Centrifugal force. [B.]

FLIESSBLATTERN (Ger.), n. Fles'bla^{3}t-te^{2}rn. Confluent small-pox. [A, 521.]

FLIESSEN (Ger.), n. Fles'se^{2}n. A flow. [L, 80.]

FLIETE (Ger.), n. Flet'e^2. See FLEAM.

FLIGGERS, n. Fli^{2}g'u^{5}rz. Probably the *Iris pseudacorus*. [A, 505 (*a*, 21).]

FLIMMER (Ger.), n. Fli^{2}m'me^{2}r. A glittering; in comp., ciliary or ciliated.

FLINSBERG, n. A place in Silesia, near Bohemia, where there are gaseous and ferruginous springs. [L, 105, 135 (*a*, 14).]

FLINT'S SPRINGS, n. Fli^{2}nts spri^{2}n^{2}z. Mineral springs situated at Three Rivers, St. Joseph County, Michigan. [A, 363 (*a*, 21).]

FLIX, n. Fli^{2}x. 1. A flux; dysentery. [L, 56.] 2. The *Linum usitatissimum*. [A, 505 (*a*, 21).]—**Bloody f'wort.** The *Filago minima*. [L, 73.]—**F'weed.** The *Sisymbrium Sophia*. [B, 275 (*a*, 24).]

FLOATING, adj. Flot'i^{2}n^2. Lat., *fluctuans*. Fr., *flottant*. Lying free; unattached or loosely connected. See *F.* RIBS, *F.* KIDNEY, etc.

FLOCCILLATION, FLOCCITATION, n's. Flo^{2}k-si^{2}l-a'-shu^{3}n, -si^{2}t-a'shu^{3}n. Lat., *floccilatio, floccitatio* (from *floccus*, a flock of wool), *floccilegium*. See CARPHOLOGY.

FLOCCOSE, adj. Flo^{2}k'kos. Lat., *floccosus*. Fr., *floconneux*. Ger., *flockig*. Woolly, covered with tufts of hairs. [B, 1, 123 (*a*, 24).]

FLOCCULAR, adj. Flo^{2}k'ku^{2}l-a^{3}r. 1. See FLOCCULENT. 2. Pertaining to the flocculus of the cerebellum.

FLOCCULENCE, n. Flo^{2}k'ku^{2}l-e^{2}ns. The state of being flocculent.

FLOCCULENT, FLOCCULOSE, adj's. Flo^{2}k'ku^{2}l-e^{2}nt, -os. From *floccus*, a flock of wool. Fr., *cotonneux*. Ger., *flockig*. 1. Consisting of or containing flocculi; flaky. 2. Pertaining to or resembling the floccus of unfledged birds. [L, 343; α, 17.]

FLOCCULUS (Lat.), n. m. Flo^{2}k'ku^{2}l(ku^{4}l)-u^{3}s(u^{4}s). From *floccus*, a flock of wool. Fr., *flocon, touffe* (ou *lobule, du pneumogastrique*) (2d def.). Ger., *Flöckchen*. 1. A little floccus. 2. A small foliated mass attached to the middle peduncle and perhaps representing the relatively larger appendicular lobe of the cerebellum in the lower mammals; it varies in the number of lobules and folia; its dorsal aspect forms the floor of the lateral recess of the fourth ventricle. [I, 15, 98.]—**F. cerebelli.** See *F.* (2d def.).—**Associated f.** Lat., *f. secundarius*. Ger., *Nebenflöckchen*. Of Henle, a smaller foliated lobule dorso-cephalad of the f.; the paraf' of Wilder. [I, 6, 98.]—**F. secundarius, F. succenturiatus.** See *Associated f.*

FLOCCUS (Lat.), n. m. Flo^{2}k'ku^{3}s(ku^{4}s). Gr., κροκίς, κροκύς. Fr., *flocon*. Ger., *Flocke*. Lit., a lock of wool. 1. A tuft of filaments. Cf. VILLUS. 2. The fine, downy plumage of a newly hatched bird. [L, 343.] 3. See FLOCCULUS (2d def.). 4. In the pl., *flocci*, the hypha. [B, 121 (α, 21).]—**F. laminosus.** The flocculus (2d def.); so called from its division into laminæ. [I, 3 (K).]—**Flocci volitantes.** See MUSCÆ *volitantes*.—**Floccorum venatio.** See CARPHOLOGY.

FLOCK, n. Flo^{2}k. From *floccus*, a flock of wool. A flocculent collection of matter.

FLOCKE (Ger.), n. Flo^{3}k'e^2. See FLOCCUS.—**F. des kleinen Gehirns, F. des Kleinhirns.** See FLOCCULUS (2d def.).—**F'nblume.** See the major list.—**F'nlesen.** See CARPHOLOGY.—**F'nsehen.** The condition of seeing muscæ volitantes. [A, 521.]—**F'nstiel.** See FLOCCULUS (2d def.).—**F'nstreuling.** The genus *Lycoperdon*. [B, 180 (α, 24).]—**Gemeiner F'nstreuling.** The *Lycoperdon bovista*. [B, 180 (α, 24).]—**Kleine F.** See FLOCCULUS.

FLOCKENBLUME (Ger.), n. Flo^{3}k'e^{2}n-blum-e^2. The genus *Centaurea*. [B, 180 (α, 24).]—**Blaue F.** The *Centaurea cyanus*. [B, 180 (α, 24).]—**Gemeine F.** The *Centaurea jacea*. [B, 180 (α, 35).]—**Grosse F.** The *Centaurea centaurium*. [B, 180 (α, 24).]—**Schwarze F.** See CENTAUREA *jacea*.

FLOCKIG (Ger.), adj. Flo^{3}k'i^{2}g. See FLOCCOSE.

FLOCON (Fr.), n. Flo-ko^{2}n^2. See FLOCCUS and FLOCCULUS.

FLOCONNEUX (Fr.), adj. Flo-ko^{2}n-nu^5. See FLOCCOSE.

FLOGGING, n. Flo^{2}g'i^{2}n^2. See FLAGELLATION.

FLOH (Ger.), n. Flo. See PULEX.—**F'biss.** A flea-bite.—**F'kraut.** See the major list.—**F'samen.** The seed of *Plantago arenaria*. [B, 180 (α, 24).]—**F'stich.** A flea-bite.—**F'sucht.** See PULICATIO.

FLOHKRAUT (Ger.), n. Flo'kra^3-u^{4}t. The *Mentha pulegium* and the *Plantago psyllium*. [B, 180 (α, 24).]—**Ampferblätteriges F.** The *Polygonum lapathifolium*. [L, 80.]—**Blaues F.** The *Erigeron acris*. [B, 180 (α, 24).]—**Brennendes F.** The *Polygonum hydropiper*. [B, 180 (α, 24).]—**F'samen.** The seed of *Plantago arenaria*. [B, 180 (α, 24).]—**Gemeines F.** The *Pulicaria vulgaris*. [B, 180 (α, 24).]—**Grosses F.** The *Conyza squarrosa*. [B, 180 (α, 24).]—**Immergrünes F.** The *Plantago cynops*. [B, 180 (α, 24).]—**Mildes F.** The *Polygonum persicaria*. [L, 80.]—**Ruhrwidriges F.** The *Pulicaria dysenterica*. [B, 180 (α, 24).]—**Wellenblätteriges F.** The *Pulicaria undulata*. [B, 180 (α, 24).]—**Wohlriechendes F.** The *Pulicaria odora*. [B, 180 (α, 24).]

FLOODING, n. Flu^{3}d'i^{2}n^2. Fr., *ménorrhagie*. Ger., *Mutterblutfluss*. Profuse uterine hæmorrhage.

FLOOR, n. Flor. A.-S., *flôr*. Gr., πέδον. Lat., *solum*. Fr., *plancher*. Ger., *Boden, Grund*. The lower wall of a cavity, as of the bladder, the pelvis, the orbit, etc.

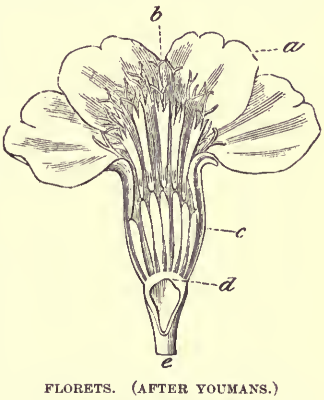
FLOQUET (Fr.), n. Flo-ka. The *Silene inflata* and the *Lychnis alba*. [B, 121, 173 (α, 24).]

FLOR (Sp.), n. Flor. See FLOWER and FLOS.—**F. de aroma.** The *Acacia farnesiana*. [B, 19 (α, 24).]—**F. de corpus (Christi).** An unclassified herb found in the province of San Luis, Argentine Republic; employed as a vulnerary. ["Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]—**F. de cera.** In Caracas, the *Sperlingia carnea*. [B, 121 (α, 24).]—**F. de encino de Puebla** [Mex. Ph.]. The male flowers of the genus *Quercus*, popularly supposed to be antispasmodic. [A, 447 (α, 21).]—**F. de fuego** [Mex. Ph.]. The *Euphorbia pulcherrima*. [A, 447 (α, 21).]—**F. de gallinazo.** In Peru, the *Pleroma sarmentosa*. [B, 121 (α, 24).]—**F. de Guillermo.** In Caracas, the *Ipomœa quamoclit*. [B, 121 (α, 24).]—**F. de Jesús.** The *Lælia acuminata*. [B, 19 (α, 24).]—**F. de la campaña.** The tops of *Cobæa scandens*. [A, 447 (α, 21).]—**F. de la noche.** An unclassified medicinal herb found in the province of Catamarca, Argentine Republic. The fragrant flowers are used for perfumery. ["Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]—**F. del camarón** [Mex. Ph.]. The *Poinciana pulcherrima*. [A, 447 (α, 21).]—**F. del chupamirto** [Mex. Ph.]. The *Hoitzia coccinea*. [A, 447 (α, 21).]—**F. del clavo** [Mex. Ph.]. The *Juliana caryophyllata*. [A, 447 (α, 21).]—**F. del corazón** [Mex. Ph.]. The *Magnolia mexicana*. [A, 447 (α, 21).]—**F. del cuervo** [Mex. Ph.]. The *Plumiera alba* and the *Plumiera rubra*. [A, 447 (α, 21).]—**F. del Espíritu-Santo.** In Panama, the *Peristeria elata*. [B, 121 (α, 24).]—**F. de luna.** In Caracas, the *Datura suaveolens*. [B, 121 (α, 24).]—**F. del látigo** [Mex. Ph.]. See CEREUS *flagelliformis*.—**F. del muerto** [Mex. Ph.]. The *Tagetes erecta*. [A, 447 (α, 21).]—**F. del paraíso.** In Caracas, the *Alpinia nutans*. [B, 121 (α, 24).]—**F. del tigre** [Mex. Ph.]. The *Tigridia pavonia*. [A, 447 (α, 21).]—**F. de mácias** [Mex. Ph.]. Mace. [A, 447 (α, 21).]—**F. de Mayo** [Mex. Ph.]. The *Plumiera rubra*. [A, 447 (α, 21).]—**F. de muertos** [Mex. Ph.]. See BLETTIA *campanulata* (in Supplement).—**F. de nieve** [Mex. Ph.]. The snow-flower of Mexico. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601.] See GENTIANA *calyculata*.—**F. de noche-buena** [Mex. Ph.], **F. de Pascua** [Mex. Ph.]. The *Euphorbia pulcherrima*. [A, 447 (α, 21).]—**F. de perdiz.** In Valparaiso, the *Tropæolum brachyceras*. [B, 121 (α, 24).]—**F'es de piedra.** The genus *Hoya*. [B, 121 (α, 24).]—**F. de piedra** [Mex. Ph.]. The *Lycopodium nidiforme*. [A, 447 (α, 21).]—**F. de San Juan.** See BOUVARDIA *longiflora* (in Supplement).—**F. de Santiago** [Mex. Ph.]. See SPREKELIA *formosissima*.—**F. de Santo Domingo** [Mex. Ph.]. See GENTIANA *calyculata*.—**F. de vinagre** [Mex. Ph.]. The *Saccharomyces mycoderma*. [A, 447 (α, 21).]—**F. de Yucatán** [Mex. Ph.]. The *Plumiera rubra*. [A, 447 (α, 21).]

FLORA (Lat.), n. f. Flo'ra^3. Fr., *flore*. Ger., *F.* Lit., the goddess of flowers (from *flos*, a flower); the botany of a given geographical division. [B, 121, 128 (α, 24); α, 27.]—**F. medica.** Fr., *flore médicale*. A f. restricted to medicinal plants.

FLORAISON (Fr.), n. Flo-re^2-zo^{2}n^2. See INFLORESCENCE.

FLORAL, adj. Flo'ra^{2}l. Gr., ἀνθώδης. Lat., *floralis* (from *flos*, a flower). Fr., *f.* Ger., *zur Blüthe gehörig, blüthenständig*. Pertaining to a flower. [B, 1 (α, 24).]



FLORAMOR, FLORIMER, n's. The *Amarantus caudatus* and the *Amarantus tricolor*. [B, 275 (α, 24).]

FLORENS (Lat.), adj. Flo're^{2}nz(rans). From *florere*, to bloom. 1. Blooming. 2. Adolescent.

FLORENTINE, adj. Flo^{2}r'e^{2}nt-en. Lat., *florentinus*. Fr., *florentin*. 1. Indigenous to the neighborhood of Florence. 2. Imported from Florence.

FLORESCENCE, n. Flo-re^{2}s'e^{2}ns. Lat., *florescentia* (from *florescere*, to begin to blossom). Fr., *fleuraison, floraison*. Ger., *Floreszenz, Blüthezeit*. See INFLORESCENCE.

FLORET, n. Flor'e^{2}t. Lat., *flosculus* (dim. of *flos*, a flower). Fr., *florette, fleuron*. Ger., *Blümchen, Blüthchen*. One of the small flowers on the receptacle of heads of flowers, as in the *Compositæ*. [B, 19, 77 (α, 24).]—**Disc-f's.** The f's occupying the centre of the head of a composite flower. [B, 19 (α, 24).]—**Involucre f's.** The f's encircling the disc. [B, 19 (α, 24).]—**Ray f's.** The f's occupying the circumference of the head of a composite flower. [B, 19 (α, 24).]—**Syngenesious f's.** The f's of a composite flower. [α, 24.]

FLORETS. (AFTER YOUMANS.)
a, the ray florets; *b*, the disc florets; *c*, the involucre; *d*, the receptacle; *e*, the peduncle.

FLORIBUND, adj. Flo^{2}r'i^2-bu^{3}nd. Lat., *floribundus* (from *florere*, to bloom). Fr., *floribond*. Ger., *vollblüthig, vielblüthig*. Having the flowers very numerous. The *Floribundi* of Linnæus are the 7th order of his calycinal method (*Methodus calycina*), comprising *Elæagnus, Isnarda*, etc. [B, 121, 170 (α, 24).]

FLORICOLUS (Lat.), adj. Flor-i^{2}k'ol(o^{2}l)-u^{3}s(u^{4}s). From *flos*, a flower, and *colere*, to dwell in. Fr., *floricole*. Ger., *blumenbewohnend*. Of insects, living on flowers. [L, 41.]

FLORICUERNO [Mex. Ph.] (Sp.), n. Flo-re-kwe^{2}r'no. The *Cereus flagelliformis*. [A, 447 (α, 21).]

FLORID, adj. Flo^{2}r'i^{2}d. Lat., *floridus* (from *flos*, a flower). Fr., *floride*. Ger., *blühend*. 1. In botany, abounding in flowers. 2. Reddish in color. The *Florideæ* (Fr., *floridées*; Ger., *Florideen*) are: *a*. The *Floridæ*; the rhodosperms; a large group of red or violet-colored *Algæ*, popularly known as sea-mosses; of Lamouroux, an order of the *Thalassiophyti non articulati*; of Reichenbach, a family of the *Ascophyceæ*; of Schulz, a family of the *Parenchymaphyllospori*; and of Sachs and others, a division of the *Carposporeæ*. *b*. Of Wood, a cohort of monocotyledons consisting of the *Alismaceæ, Hydrocharidaceæ*, and other orders, with the flowers usually perfect, the perianth 3-parted and consisting of 2 segments, of which the outer often, and sometimes both, are green. The *Floridei* of Bory are an order of the *Hydrophyti*, comprising the *Gigartineæ, Halymenieæ, Delesseriæ*, and *Ulvaceæ*. The *Floridoites* of Sternberg are a suborder of fossil plants of the *Algacites*, including the *Rhodomelites, Chondrites*, etc. [B, 19, 34, 77, 121, 170, 291 (α, 24).]

FLORIDCINA [Mex. Ph.] (Sp.), n. Flo-red-the'na^3. Phloridzin. [A, 447 (α, 21).]

FLORIFEROUS, adj. Flor-i^{2}f'e^{2}r-u^{3}s. Lat., *florifer* (from *flos*, a flower, and *ferre*, to bear). Fr., *florifère*. Ger., *blüthentragend*. Flower-bearing; having an abundant inflorescence. [B, 19, 121, 123 (α, 24).]

FLORIFICATION, n. Flo^{2}r-i^2-fi^2-ka'shu^{3}n. From *flos*, a flower, and *facere*, to make. See EFFLORESCENCE (3d def.).

FLORIFORM, adj. Flo'ri^2-fo^{2}rm. Lat., *floriformis* (from *flos*, a flower, and *forma*, form). Fr., *floriforme*. Ger., *blumenförmig*. Flower-shaped.

FLORIGER (Lat.), adj. Flor'i^2-ju^{5}r(ge^{2}r). See FLORIFEROUS.

FLORIGRAPHIA (Lat.), n. f. Flo^{2}r(flor)-i^2-gra^{2}f(gra^{3}f)'i^2-a^3. From *flos*, a flower, and γράφειν, to write. See ANTHOLOGY.

FLORINS-SAINT-ANDRÉ (Fr.), n. Flo-ra^{2}n^2-sa^{2}n^{2}t-a^{3}n^2-dra. A place in the department of the Hautes-Alpes, France, where there is a gaseous and weakly sulphurous spring. [L, 49, 87 (α, 14).]

FLORIPAROUS, adj. Flo^{2}r-i^{2}p'a^{2}r-u^{3}s. Lat., *floriparus* (from *flos*, a flower, and *parere*, to bring forth). Fr., *floripare*. Ger., *blüthenhervorbringend*. Producing flowers (said of a bud which contains only the flower). [B, 1 (*a*, 24).]

FLORIPONDIO (Sp.), n. Flor-e-pon'de-o. See DATURA *sanguinea* and DATURA *suaveolens*.

FLORITIO (Lat.), n. f. Flor-i^{2}sh(i^{2}t)'i^2-o. Gen., *-tion'is*. From *florere*, to blossom. 1. A blossom; a flowering. 2. The full development of an eruption. [G.] See STADIUM *floritionis*.

FLORULA (Lat.), n. f. Flor'u^{2}l(u^{4}l)-a^3. From *flos*, a flower. Fr., *florule*. See FLORET.

FLORULENT, adj. Flo^{2}r'u^{2}l-e^{2}nt. See FLORIBUND.

FLOS (Lat.), n. m. Flo^{2}s(flos). Gen., *flor'is*. 1. A flower. 2. In chemistry, a term for various pulverulent substances obtained by sublimation. [B.]—**Farnesianus solis f.** The *Helianthus tuberosus*. [B, 59.]—**Florum fasciculus.** The *Polyporus frondosus*. [B, 121 (*a*, 24).]—**F. abortiens.** An abortive flower. See under ABORTIVE. [*a*, 24.]—**Flores accipitrini.** The bloom of *Hieracium pilosella*. [B, 180 (*a*, 24).]—**Flores africani.** The flowers of *Tagetes patula*. [B, 180 (*a*, 24).]—**F. amoris.** The *Delphinium consolida* and the *Amarantus albus*. [B, 173 (*a*, 24).]—**Flores apostematici.** The flowers of *Scabiosa arvensis*. [B, 180 (*a*, 24).]—**F. arborum** [Lœsel]. The *Polyporus sulphureus*. [B, 121 (*a*, 24).]—**F. barbatus.** A flower having long and weak hairs on some of its organs. [*a*, 24.]—**F. capitatus.** A term for many flowers connected on the summits of the foot-stalks so as to form a head. [L, 97.]—**F. cardinalis.** The *Ipomœa quamoclit* and the *Lobelia cardinalis*. [B, 19, 121 (*a*, 24).]—**F. clitorius.** The genus *Clitoria*. [B, 121 (*a*, 24).]—**F. constantinopolitanus.** The *Lychnis chalcedonica*. [A, 505 (*a*, 21).]—**F. cuculi.** The cuckoo flower. [*a*, 24.]—**F. Februarii.** A flower blooming in the month of February in a certain locality. [*a*, 24.]—**F. fœmineus.** A pistillate flower. [*a*, 24.]—**Flores fugæ-dæmonum.** The flowers of *Hypericum perforatum*. [B, 180 (*a*, 24).]—**F. globosus.** The *Gomphrena globosa*. [B, 19 (*a*, 24).]—**Flores immortales.** The flowers of *Helichrysum arenarium*. [B, 180 (*a*, 24).]—**Flores intense rubrarum (seu optimarum).** The rose-leaves of *Rosa gallica*. [B, 180 (*a*, 24).]—**F. Jovis.** The *Lychnis f. Jovis*. [B, 19 (*a*, 24).]—**Flores Jovis.** Dioxide of tin obtained as a fine powder by the combustion of the metal. [B, 3.]—**Flores keyri.** The flowers of *Cheiranthus cheiri*. [B, 180 (*a*, 24).]—**Flos lactis.** See CREAM.—**Flores linguæ bovis.** The flowers of *Anchusa officinalis*. [B, 180 (*a*, 24).]—**Flores martiales.** See IRON *and ammonium chloride*.—**F. masculus.** A staminate flower. [*a*, 24.]—**Flores muliebres.** An old term for the menses.—**Flores oculi Christi.** The flowers of *Hieracium pilosella*. [B, 180 (*a*, 24).]—**Flores paralyseos.** The flowers of *Primula*. [B, 270.]—**F. passionis.** The *Passiflora cœrulea* and other species of *Passiflora*. [B, 19 (*a*, 24).]—**Flores perforati.** The flowers of *Hypericum perforatum*. [B, 180 (*a*, 24).]—**F. plenus.** A double flower in which the petals are abnormally increased. [B, 1 (*a*, 24).]—**Flores Rivini.** The flowers of *Antennaria dioica*. [B, 180 (*a*, 24).]—**F. solis.** The *Helianthus annuus* and the *Helianthemum vulgare*. [B, 19 (*a*, 24).]—**F. solis pyramidalis.** The *Helianthus tuberosus*. [B, 59.]—**F. stamineus.** A staminate flower. [B, 1, 229 (*a*, 24).]—**Flores sternutatorii.** The flowers of *Convallaria majalis*. [B, 180 (*a*, 24).]—**F. sterilis.** A flower destitute of pistils or of stamens. [B, 1 (*a*, 24).]—**F. Trinitatis.** The *Viola tricolor*. [B, 173 (*a*, 24).]—**F. virginalis, F. virginitatis.** See HYMEN.—**Infusum florum cordialium.** Sp., *infusion de flores cordiales* [Sp. Ph.]. An infusion made with 5 parts of species cordiales and 345 of boiling water. [B, 95.]—**Infusum florum pectoralium.** See *Tisane de* FLEURS *pectorales*.—**Species florum pectoralium.** Fr., *espèces pectorales avec les fleurs, fleurs pectorales*. Syn.: *species pectorales* [Fr. Cod.]. A mixture of equal parts of the flowers of *Verbascum thapsus, Papaver rhœas, Althæa officinalis, Malva silvestris, Antennaria dioica, Tussilago farfara*, and *Viola odorata*. [B, 113 (*a*, 14).]—**Tisane florum pectoralium.** See *Tisane de* FLEURS *pectorales*.

FLOSCULE, n. Flo^{2}s'ku^{2}l. Lat., *flosculus, floscellus* (dim. of *flos*, a flower). Fr., *f*. See FLORET.

FLOSCULOSE, FLOSCULOUS, adj's. Flo^{2}s'ku^{2}l-os, -u^{3}s. Lat., *flosculosus* (from *flosculus*, a floret). Fr., *flosculeux*. Composed of florets (said of the calathidium of the *Compositæ*). The *Flosculosæ* (*Flosculosi*; Fr., *flosculeuses*) of Tournefort are a class of the *Compositæ* so characterized. [B, 1, 121, 170 (*a*, 24).]

FLOSCULUS (Lat.), n. Flo^{2}s(flos)'ku^{2}l(ku^{4}l)-u^{3}s(u^{4}s). Dim. of *flos*, a flower. See FLORET.

FLOSS, n. Flo^{2}s. 1. Silk that has not been twisted; of a plant, a collection of downy filaments. 2. The *Phalaris arundinacea*. [A, 505 (*a*, 21).]

FLÖSSCHEN (Ger.), n. Flu^{8}s'ch^{2}e^{2}n. A fin.—**Bauchf'.** See *Ventral* FIN.

FLOSS-DOCKEN, n. Flo^{2}s'do^{2}k-e^{2}n. The *Digitalis purpurea*. [A, 505 (*a*, 21).]

FLOSSE (Ger.), n. Flos'e^2. See FIN.—**Afterf'.** See *Anal* FIN.—**Bauchf'.** See *Ventral* FIN.—**Brustf'.** See *Pectoral* FIN.—**Rückenf'.** See *Dorsal* FIN.—**Schwanzf'.** See *Caudal* FIN.—**Steissf'.** See *Anal* FIN.

FLOSSIFICATION, n. Flo^{2}s-i^2-fi^2-ka'shu^{3}n. From *flos*, a flower, and *facere*, to make. See INFLORESCENCE.

FLOSS-SEAVE, n. Flo^{2}s'sev. The genus *Eriophorum*. [A, 505 (*a*, 21).]

FLOTOVIA (Lat.), n. f. Flo-to'vi^2(wi^2)-a^3. A genus of the *Compositæ*.—**F. diacanthoides.** A species found in southern Chili, where it is called *palo mato* or *fallu*. A decoction of the bark is employed as an antispasmodic. ["Proc. of the Am. Pharm. Assoc.," xvi (*a*, 14).]

FLOTTANT (Fr.), adj. Flot-ta^{3}n^2. See FLOATING.

FLÖTZ (Ger.), n. Flu^{5}ts. See STRATUM.

FLOUNDER, n. Flu^5'u^{4}nd-u^{5}r. The *Pleuronectes flesus*. [B.]

FLOUR, n. Flu^5'u^{4}r. Gr., ἄλφιτον, κρίμνον. Lat., *farina* (from *far*, a sort of grain). Fr., *farine*. Ger., *Mehl*. It., *farina*. Sp., *harina*. A fine powder, especially of a cereal grain.—**Baked f.** Lat., *farina tosta, farina tritici tosta*. A preparation made by baking wheat f. in a slack oven until it acquires a pale-buff hue; used as food for infants troubled with diarrhœa. [B, 199 (*a*, 21).]—**Boiled f.** Lat., *farina preparata, triticina*. A preparation made by tying fine f. up in a linen cloth as tightly as possible, and, after dipping frequently in cold water, dredging over the outside of the cloth with f. until a crust is formed around it to prevent the water from soaking into it, boiling for a long time, and, when cold, dividing into small, oblong pieces. For use it should be reduced to powder and prepared like arrow-root. [B, 199 (*a*, 21).]—**Cold-blast extra f.** A trade name for a kind of f. made from choice wheat by peculiar processes which lessen the normal proportion of starch and increase the percentage of gluten; said to contain an amount of phosphates greater than that of the best commercial f. [*a*, 21.]—**Poison f.** Ger., *Giftmehl*. Crude arsenic.—**Special diabetic f.** A trade name for a f. left after washing out most of the starch from peeled wheat f.; used in diabetes. [*a*, 21.]

FLOURENSIA (Lat.), n. f. Flur-a^{3}ns'i^2-a^3. 1. Of Cambessi. the genus *Thylacospermum*. 2. Of De Candolle, a genus of resiniferous composite plants, by some authors referred to the genus *Helianthus*. [B, 19, 42, 121 (*a*, 24).]—**F. cernua, F. laurifolia.** Of De Candolle, species found in and near New Mexico. [B, 42 (*a*, 24).]—**F. thurifera.** The *tlalpopolotl* of the Mex. Ph.; a species found in Chili, where it is also called *maravilla* (or *matavilla*) *del campo*. The root is pectoral and vulnerary, and the resin is used as a substitute for frankincense. [B, 19 (*a*, 24); J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122 (*a*, 17).]

FLOUVE (Fr.), n. Fluv. See ANTHOXANTHUM.—**F. des bressants.** See ANTHOXANTHUM *odoratum*.—**F. naine.** A variety of *Anthoxanthum odoratum*. [B, 121, 173 (*a*, 24).]—**F. odorante.** See ANTHOXANTHUM *odoratum*.—**F. sous-rameuse, F. velue.** Varieties of *Anthoxanthum odoratum*. [B, 121, 173 (*a*, 24).]

FLOW, n. Flo. Gr., ῥεῦμα, ἀποῤῥοιή. Lat., *fluxus*. Fr., *écoulement*. Ger., *Fluss, Ausfluss*. It., *flusso*. Sp., *flujo*. Motion of a liquid (as of the blood in the vessels or away from the body), a free discharge of liquid, also the liquid so discharged.—**Menstrual f.** Fr., *flux menstruel, flux, écoulement cataménial, menstrues, règles, mois, époques, hémorrhagie* (ou *perte*, ou *évacuation*) *menstruelle, éruption des règles*. Ger., *Menstruolfluss, Menstruolblutung*. Sp., *flujo menstrual* (ó *menstruo*). A menstrual discharge of blood.

FLOW, v. intr. Flo. Gr., ῥεῖν, φλύειν. Lat., *fluere*. Fr., *couler*. Ger., *fliessen*. It., *scorrere, scolare*. Sp., *correr, fluir*. 1. To move as a whole in a given direction (said of liquids). 2. To be affected with uterine hæmorrhage.

FLOWER, n. Flu^5'u^4-u^{5}r. Gr., ἄνθος. Lat., *flos*. Fr., *fleur*. Ger., *Blüthe*. It., *fiore*. Sp., *flor*. 1. The assemblage of reproductive organs in a plant, of which the stamens, or pistils, or both, form an essential part, together with the protective envelopes, including the calyx and corolla. Besides the varieties defined below, f's are spoken of as abortive, acyclic, anemophilous, anisomerous, apetalous, asymmetrical, autogamous, axiliary, barren, cleistogamous, composite, compound, cyclic, diclinous, dimerous, diœcious, double, entomophilous, eucyclic, female, hermaphrodite, hemicyclic, heteromerous, imperfect, incomplete, irregular, isomerous, male, monoclinous, monosymmetrical, naked, neutral, pentamerous, perfect, perianthous, pistillate, polygamous, polysymmetrical, regular, spiral, staminate, sterile, symmetrical, terminal, tetramerous, trimerous, unisexual, etc. (See under those words.) [B, 1, 19 (*a*, 24).] 2. In the pl., *f's*, a fine powder obtained by sublimation. [B.] 3. In the pl., *f's* (perhaps a corruption of Fr. *flueurs*), the menstrual flow.—**Collinson's f.** The *Collinsonia canadensis*. [B, 275 (*a*, 24).]—**Complete f.** Fr., *fleur complète*. A f. having calyx, corolla, stamens, and pistil. 2. According to some botanists, a f. having calyx and corolla even though unisexual. [B, 1 (*a*, 24).]—**Compound umbellate f.** Fr., *fleur en ombelle composée*. A f. having umbels or umbellets in an umbel as in most of the *Umbelliferæ*. [B, 1, 77 (*a*, 24).]—**Constantinople f.** The *Lychnis chalcedonica*. [A, 505 (*a*, 21).]—**David's f.** The *Chrysanthemum indicum*. [B, 172 (*a*, 24).]—**Day-f.** The genus *Commelyna* and the *Commelyna virginica*. [B, 19, 275 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxxix, p. 441 (*a*, 21).]—**Double f.** See FLOS *plenus*.—**Equinoctial f's.** Lat., *flores æquinoxiales*. Fr., *fleurs équinoxiales*. Ger., *Aequinoctialblumen*. F's that open and close at stated hours. [B, 1 (*a*, 24).]—**Expanded f.** Fr., *fleur épanouie*. A f. in which the petals are perfectly developed or expanded. [B, 1 (*a*, 24).]—**F.-de-luce.** See the major list.—**F.-fence.** See the major list.—**F.-of-a-day.** The *Tradescentia virginica*. [B, 275 (*a*, 24).]—**F.-of-an-hour.** The *Hibiscus* (*Ketmia*) *trionum*. [B, 275 (*a*, 24).]—**F. of Bristow, F. of Constantinople.** The *Lychnis chalcedonica*. [A, 505 (*a*, 21).]—**F. of Crete.** The *Mesembryanthemum tripolium*. [B, 19 (*a*, 24).]—**F. of the axe.** The *Lobelia urens*. [A, 505 (*a*, 21).]—**F.-of-the-dead.** The *Oncidium tigrimum*. [B, 275 (*a*, 24).]—**F.-of-Tigris.** The *Tigridia pavonia*. [B, 278 (*a*, 24).]—**F's of wine.** The *Saccharomyces mycoderma*. [B, 291 (*a*, 24).]—**F.-pride.** The *Cæsalpinia pulcherrima*. [B, 282.]—**Frog-f.** The genus *Ranunculus*. [B, 275 (*a*, 24).]—**Gentle f.** The *Amarantus caudatus* and the *Amarantus tricolor*. [B, 275 (*a*, 24).]—**Gipsy f.** 1. The *Cynoglossum officinale*. 2. The *Scabiosa arvensis*. [A, 505 (*a*, 21).]—**Mountain-globe f.** The *Trollius europæus*. [*a*, 24.]—**Passion-f.** See the major list.—**Quinine f.** See SABBATIA *Elliottii*.—**Tiger-f.** See TIGRIDIA *pavonia*.—**Trumpet-f.** See TECOMA *radicans*.—**Venus's f.-basket.** The *Begonia speciosa*. [*a*, 24.]—**Wall-f.** See CHEIRANTHUS *cheiri*.—**White-f's.** See LEUCORRHŒA.—**Wine-f's.** See WINE-*f's*.

FLOWER-DE-LUCE, n. Flu^5'u^4-u^{5}r-d'-lu^{2}s. Fr., *fleur-de-lis.* The genus *Iris.* [B, 275 (α, 24).—**Yellow-f.-d.-l.** The *Iris pseudacorus.* [B, 275 (α, 24).]

FLOWERET, n. Flu^5'u^4-u^{5}r-e^{2}t. See FLORET.

FLOWER-FENCE, n. Flu^5'u^4-u^{5}r-fe^{2}ns. In India, the *Cæsalpinia pulcherrima.* [B, 185, 275 (α, 24).]—**Bastard f.-f.** The genus *Adenanthera.* [B, 19 (α, 24).]

FLOWERING, adj. Fln^5'u^4-u^{5}r-i^{2}n^2. See PHANEROGAMOUS.

FLOWK-WORT, n. Flu^5'u^{4}k-wu^{5}rkt. The *Hydrocotyle vulgaris.* [B, 275 (α, 27).]

FLOX, n. Flo^{2}x. From φλόξ, a flame. 1. An old English name for hæmorrhagic small-pox. [D, 52.] 2. See FLAX.—**Mountain f.** See *Mountain*-FLAX.

FLUATE, n. Flu^2'at. A fluoride. [B.]

FLUAVIL, n. Flu^2'a^2-vi^{2}l. Fr., *fluavile.* Of Payen, a yellow, amorphous oxygenation product, $C_{20}H_{32}O_2$, obtained, along with alban, from gutta-percha by boiling the latter with absolute alcohol. ["Ind. Med. Gaz.," Dec., 1885, p. 388 (B).]—**Madar f.** A substance obtained from the juice of madar (*Calotropis gigantea*), resembling f. in physical properties but not in chemical composition. ["Ind. Med. Gaz.," Dec., 1885, p. 388 (B).]

FLUCHTFÜSSIG (Ger.), adj. Fluch^{2}t'fu^{6}s-si^{2}g. See CURSORIPES.

FLÜCHTIG (Ger.), adj. Flu^{6}ch^{2}t'i^{2}g. See VOLATILE.

FLÜCHTIGKEIT (Ger.), n. Flu^{6}ch^{2}t'i^{2}g-kit. See VOLATILITY.

FLUCTICULI (Lat.), n. n. pl. Flu^{3}k(flu^{4}k)-ti^{2}k'u^2.u^4)-li(le). Ger., *Wellen.* Of Bergmann, the fine undulations in the surface of the lateral wall of the third ventricle just ventrad of the anterior commissure. [I, 30.]

FLUCTUATE, v. intr. Flu^{3}kt'u^2-at. Lat., *fluctuare* (from *fluctus*, a wave). Fr., *fluctuer.* Ger., *schwanken.* 1. To move in waves. 2. To vary between certain limits. 3. To communicate to an examiner the sensation of fluctuation.

FLUCTUATIO (Lat.), n. f. Flu^{3}k(flu^{4}k)-tu^2(tu^4)-a(a^3)'shi^2(ti^2)-o. Gen., *-o'nis.* See FLUCTUATION.—**F. aurium.** See TINNITUS *aurium.*

FLUCTUATION, n. Flu^{3}kt'u^2-a-shu^{3}n. Lat., *fluctuatio* (from *fluctuare*, to move in the manner of waves). Fr., *f.*, *ondulation.* Ger., *Schwanken, Schwankung.* 1. The act or process of fluctuating. 2. A wave-like movement communicated to a pent-up liquid by tapping upon some point of the parts overlying it, felt in the form of an impulse by the fingers held lightly against another point.—**False f.** Fr., *fausse f.* Undulation obtained by palpation in certain tumors, such as lipomata, in which the contents are found to be but partially fluid when an incision is made. [α, 34.]—**F. by succussion.** The undulation of fluid obtained by shaking the body. [α, 34].—**Gastric f.** Undulation of fluid in the stomach. [α, 34.]—**Pericardial f.** The motion of fluid in the pericardial sac. [α, 34.]—**Pleural f.** The oscillation of pleural fluid felt on palpating an intercostal space. [α, 34.]—**Rhonchal f.** A fremitus produced by respiration where there are cavernous rhonchi. [α, 34.]—**Simple f.** The undulation of an inclosed fluid appreciated by placing a finger against one side of the swelling or cavity and pressing upon the opposite side for a moment with another finger. [α, 34.]—**Thoracic f.** See *Pleural f.*—**Visible f.** F. perceptible to sight, as in ascites. [α, 34.]

FLÜE (Ger.), n. Flu^5'e^2. A place in the Canton of Soleure, Switzerland, where there is a chalybeate spring containing calcium sulphate. [L, 49, 135 (α, 14).]

FLUELLEN, FLUELLIN, n's. Flu^2-e^{2}l'e^{2}n, -i^{2}n. The *Veronica officinalis.* [B, 275 (α, 24).]—**Female f.** The *Veronica chamœdrys.* [B, 275 (α, 24).]—**Male f.** The *Linaria spuria.* [B, 275 (α, 24).]—**Sharp-pointed f.** The *Antirrhinum* (*Linaria*) *elatine.* [α, 24.]—**Smallest f.** The *Antirrhinum minus.* [α, 24.]

FLUEUR (Fr.), n. Flu^6-u^{5}r. See FLOW.—**F's blanches.** Leucorrhœa. [A, 250 (α, 21).]

FLUFFWEED, n. Flu^{3}f'wed. The *Verbascum thapsus.* [A, 505 (α, 21).]

FLUG (Ger.), n. Flug. 1. See FLIGHT. 2. See LICHEN (2d def.).—**F'beulen.** Urticaria porcellana. [L, 80.]—**F'brand.** The *Ustilago carbo.* [A, 396 (α, 21).]—**F'federn.** Quill feathers. [L.]—**Tropischer F.** See LICHEN *tropicus.*

FLUGACURU, n. See BERNE (2d def.).

FLUGBRAND (Ger.), n. Flug'bra^{3}nd. See USTILAGO.

FLÜGEL (Ger.), n. Flu^{6}g'e^{2}l. A wing. [A, 450 (α, 17).]—**Aeusserer F.** See *External pterygoid* MUSCLE.—**Aeusserst kurzer F.** See ALA *perquam brevissima.*—**Aeusserst langer F.** See ALA *longissima.*—**Fast langer F.** See ALA *sublonga.*—**Fledermausf'.** See ALÆ *vespertilionis.*—**Flossenf'.** See *Caudal* FIN.—**F'ähnlich, F'artig.** Wing-like, pterygoid.—**F'decke.** See ELYTRON (1st def.).—**F'deckenstoff.** See CHITIN.—**F. der Brücke.** See ALA *pontis.*—**F. der Nase.** See ALÆ *narium.*—**F. des Centralläppchens.** 1. See ALÆ *processus vermiformis lobuli centralis.* 2. See ALA *uvulæ.*—**F. des Keilbeins.** See ALÆ *ossis sphenoidalis.*—**F. des Nasencheidewandknorpels.** See ALÆ *septi cartilagineæ narium.*—**F. des Sphenoidalknochens.** See ALÆ *ossis sphenoidalis.*—**F'eichel.** See the major list.—**F'farren.** The *Pteris aquilina.* [L, 80, 88, 135 (α, 14).]—**F'fell.** See PTERYGIUM.—**F'förmig.** See ALAR (1st, 2d, and 3d def's) and ALIFORM.—**F'frucht.** See the major list.—**F'ig.** See ALATUS.—**F'kern.** See FLÜGELSAMEN.—**F'los.** See APTEROUS.—**F'samen.** See the major list.—**F'scheidenapparat.** See ELYTROPTERYGOÏDE.—**F'schnecke.** See the major list.—**Gaumenf'.** See *Pterygoid* PLATES and *Pterygoid* PROCESS.—**Grauer F.** See ALA *pontis.*—**Grosser F. des Keilbeins.** See ALÆ *magnæ ossis sphenoidalis.*—**Grosser F. des kleinen Hirns.** The hemispheres of the cerebellum. [I, 3 (K).]—**Innerrer F.** See *Internal pterygoid* MUSCLE.—**Keilbeinsf'.** See ALÆ *ossis sphenoidalis.*—**Kleiner F. des Keilbeins.** See ALÆ *parvæ Ingrassiæ.*—**Kleiner F. des kleinen Hirns.** See *Vermiform* PROCESS.—**Kreuzbeinf'.** See ALÆ *of the sacrum.*—**Kurzdeckf'.** Short elytra. [L, 353.]—**Kurzer F.** See ALA *brevis.*—**Langer F.** See ALA *longa.*—**Lungenf'.** See ALÆ *pulmonum.*—**Nasenf'.** See ALÆ *narium.*—**Obere F. des Keilbeines.** See ALÆ *parvæ Ingrassiæ.*—**Pterygoidalf'.** The pterygoid processes of the sphenoid bone. [L.]—**Sehr langer F.** See ALA *perlonga.*—**Schläfenf', Temporalf'.** See ALÆ *magnæ ossis sphenoidei.*

FLÜGELEICHEL (Ger.), n. Flu^{6}g'e^{2}l-ich^2-e^{2}l. See DRYOBALANOPS.—**Kampherhaltige F.** The *Dryobalanops camphora.* [B, 180 (α, 24).]

FLÜGELFRUCHT (Ger.), n. Flu^{6}g'e^{2}l-fruch^{2}t. The genus *Pterocarpus.* [B, 180 (α, 24).]—**Amerikanische F.** The *Pterocarpus draco.* [L, 80.]—**Ausgerandete F.** The *Pterocarpus marsupium.* [B, 180 (α, 24).]—**Dunkelrothe F.** The *Pterocarpus santalinus.* [B, 180 (α, 24).]—**Gelbe F.** The *Pterocarpus flavus.* [B, 180 (α, 24).]—**Indische F.** The *Pterocarpus indicus.* [B. 180 (α, 24).]—**Rothsaftige F.** The *Pterocarpus draco.* [B, 180 (α, 24).]—**Senegalische F.** The *Pterocarpus senegalensis.* [B, 180 (α, 24).]

FLÜGELSAMEN (Ger.), n. Flu^{6}g'e^{2}l-za^{3}m-e^{2}n. The genus *Pterospermum.* [B, 180 (α, 24).]—**Ahornblättriger F.** The *Pterospermum acerifolium.* [B, 180 (α, 24).]—**Heyne's F.** The *Pterospermum heyneanum.* [B. 180 (α, 24).]—**Kahlwerdender F.** The *Pterospermum glabescens.* [B, 180 (α, 24).]—**Korkeichenblättriger F.** The *Pterospermum suberifolium.* [B, 180 (α, 24).]

FLÜGELSCHNECKE (Ger.), n. Flu^{6}g'e^{2}l-shne^{2}k-e^2. The genus *Strombus*; in the pl., see STROMBIDÆ. [B, 180.]—**Fleckige F., Gefleckte F.** The *Strombus lentiginosus.* [B, 180 ; L, 80.]

FLUGFEUER (Ger.), n. Flug'foi-e^{2}r. See STROPHULUS *volaticus*, LICHEN *agrius*, and ERYSIPELAS.

FLUGGEA (Lat.), n. f. Flug'e^2-a^3. Fr., *f.* 1. Of Willdenow, a genus of euphorbiaceous shrubs, by some made a section of *Securinega.* 2. Of L. C. Richard, the genus *Ophiopogon.* [B, 42, 121 (α, 24).]—**F. abyssinica.** A species found in eastern tropical Africa. The berries are edible. [B, 19 (α, 24).]—**F. japonica.** The *Ophiopogon japonicus.* [B, 173 (α, 24).]—**F. leucopyrus.** Fr., *f. à flamme blanche.* A species found in the East Indies, where the root is employed as an astringent. The fruit is eaten. [B, 173 (α, 24).]—**F. virosus.** Of Roxburgh, a species the bark of which is highly astringent, and is said to be used as a fish poison. [B, 19 (α, 24).]

FLUGHAFER (Ger.), n. Flug'ha^{2}f-e^{2}r. See AVENA *fatua.*

FLUGHAUT (Ger.), n. Flug'ha^3-u^{4}t. See PATAGIUM.

FLUID, adj. and n. Flu^2'i^{2}d. Lat., *fluidus* (adj.), *fluidum* (n. [from *fluere*, to flow]). Fr., *fluide.* Ger., *flüssig* (adj.), *Flüssigkeit* (n.). It., Sp., *fluido.* Having the property of fluidity ; as a n., a body whose molecules move easily among themselves, and change their relative positions without loss of cohesion (*q. v.*) or mutual attraction and repulsion, so that the mass immediately takes the form of a vessel containing it. [B, 21 (α, 27).]—**Aeriform f.** See GAS.—**Albuminous f.** An old term for the serum of the blood. [L, 84.]—**Allantoic f.** See under ALLANTOIC.—**Amniotic f.** See *Liquor* AMNII.—**Aqueous f.** See *Aqueous* HUMOR.—**Burnett's disinfecting f.** See *Burnett's* DISINFECTANT.—**Cellular f's.** Fr., *fluides cellulaires.* Ger., *Flüssigkeiten des Zellengewebes.* Of Bichat, the lymph and fat of connective tissue. [J, 146.]—**Cerebro-spinal f.** Lat., *fluidum cerebro-spinale, liquor cerebro-spinalis.* Fr., *liquide céphalo-rhachidien* (ou *cérébro-spinal*), *liquide arachnoïdien.* Ger., *Cerebrospinal-Flüssigkeit.* The liquid in the subarachnoid space and in the cœles or ventricles and central canal of the central nervous system. In man there is direct communication for this liquid between the subarachnoid space and the cerebral ventricles through the foramen of Magendie, and in all the higher animals the fluid extends out with the cranial and spinal nerves in the sheaths of the nerves. It is a form of lymph, and in all animals communicates with the lymphatic system more or less directly. In man the normal amount is supposed to be from 60 to 100 c. c., and probably serves to preserve the cerebral pressure under varying conditions of blood-pressure in the brain. Its specific gravity is about 1·005 ; it does not coagulate spontaneously, as a rule, nor upon the addition of fibrin ferment, hence it is supposed not to contain fibrinogen. It becomes opalescent but does not coagulate by heat. According to Turner, it contains a body which, like glucose, reduces cupric oxide. The composition of the fluid obtained at the second puncture in a case of spina bifida was, according to Hoppe-Seyler, as follows: Water, 986·88 ; solids, 13·12 ; albumin, 2·64 ; extractives, 2·83 ; inorganic salts, soluble in water, 7·52 ; inorganic salts, insoluble, 1·15. [Turner, "Proc. of the Royal Soc.," vii, 1854, 1855, p. 89 (J, 55, 57, 99, 190).]—**Chylaqueous f.** A f. consisting partly of water and partly of chyle, found in the body-cavity of many invertebrate animals (*e. g.*, in annelids, echinoderms, and rotifers). [L, 121.]—**Cœlian f.** The cerebro-spinal f. in the central canal of the spinal cord and the ventricles of the brain. [J, 55.]—**Cœlomic f.** The f. or lymph in the cœlomic or pleuro-peritoneal space. [J, 97.]—**Cohn's f.** A solution of 0·5 gramme each of potassium phosphate, crystallized magnesium sulphate, and tribasic calcium phosphate, and 1 gramme of ammonium tartrate, in 100 c. c. of distilled water. [A, 510.]—**Colostric f.** See COLOSTRUM.—**Condy's f.** See *Condy's* DISINFECTANT.—**Cotunnius's f.** See PERILYMPH.—**Darby's prophylactic f.** A solution of potassium hypochlorite similar to the liquor sodii chlorati of the Br. Ph. [Proctor, "Proc. of the Am. Pharm. Assoc.," xvii (α, 14).]—**Electric f.** Lat., *fluidum electricum.* Fr., *fluide électrique.* See under ELECTRICITY.—**Enteric f.** See *Enteric* JUICE.—**Exudation f.** See *Coagulable* LYMPH.—**F. of Cotunnius.** See PERILYMPH.—**Formative f.** See CYTOBLASTEMA.—**Galvanic f.** Lat., *fluidum galvanicum.* Fr., *fluide galvanique.* See under ELECTRICITY.—**Impon-**

derable f., Interstellar f. See ETHER (2d def.).—**Intestinal f.** See *Enteric* JUICE.—**Intracellular f.** See CELL-*f.*—**Labyrinthine f.** Fr., *fluide du labyrinthe.* Ger., *Labyrinthwasser.* See PERILYMPH.—**Lacteal f.** Any white fluid of the body (*e. g.*, the milk, the secretion of the prostate and thymus glands, or the chyle). [L, 84.]—**Ledoyen's disinfecting f.** See *Ledoyen's* DISINFECTANT.—**Lymphatic f.** See LYMPH.—**Magnetic f.** Lat., *fluidum magneticum.* Fr., *fluide magnétique.* A supposititious imponderable f. by whose agency the phenomena of magnetism manifest themselves. [*a*, 27.]—**Müller's f.** A solution of 1 part of sodium sulphate and 2 parts of potassium bichromate in 100 of distilled water; used in hardening objects for examination under the microscope. [*a*, 21.]—**Nervous f.** Lat., *fluidum nerveum.* Fr., *fluide nerveux.* Ger., *Nervenfluidum.* The supposed f. which circulates throughout the nervous system, and is concerned in motion and sensation. It is entirely hypothetical. [K.]—**Nuclear f.** See ACHROMATIN.—**Nutritive f.** See BLOOD, LYMPH, and CHYLE.—**Oleous f.** The oily element of adipose tissue. [L, 84.]—**Ovarian f.** The liquid contained in an ovarian cystoma.—**Parenchymatous f.** See *Tissue* LYMPH.—**Pasteur's f.** A culture solution of 1 gramme of ammonium tartrate and 10 grammes of sugar candy in 100 c. c. of distilled water, the ash of 1 gramme of yeast being added. [A, 510.]—**Periaxial f.** Ger., *periaxiale Flüssigkeit.* Of Klebs, the f. immediately surrounding the axis-cylinder of nerve-fibres. [J, 21.]—**Respiratory f.** See BLOOD and LYMPH.—**Scarpa's f.** See ENDOLYMPH.—**Seminal f., Spermatic f.** See SEMEN.—**Stagnant f.** In the body, a f., partially or wholly excrementitious, which remains stationary for a time in a hollow viscus. [L, 84.]—**Subarachnoid f.** See *Cerebro-spinal f.*—**Transudative f.** The lymph which is derived from the blood-vessels. [J, 124.]—**Universal f.** See ETHER (2d def.).

FLUIDIFIANT, adj. Flu^2-i^{2}d-i^{2}f'i^2-a^{2}nt. Fr., *f.*, *fluidificateur.* 1. Causing liquefaction. 2. Producing an eschar which is soft and moist (said of alkaline caustics, in contradistinction to acids, which are said to be coagulant). [Tripier (*a*, 18).]

FLUIDIFICATION, n. Flu^2-i^{2}d'i^2-fi^2-ka-shu^{3}n. From *fluidus*, flowing, and *facere*, to make. Fr., *f.* Ger., *Verflüssigung.* The reduction of a substance to a state of fluidity. [L, 43.]

FLUIDITY, n. Flu^2-i^{2}d'i^2-ti^2. Lat., *fluiditas.* Fr., *fluidité.* Ger., *Fluidität.* A fluid condition. [*a*, 27.]

FLUIDOUNCE, n. Flu^2-i^{2}d-u^3'u^{4}ns. From *fluidus*, flowing, and *uncia*, an ounce. Fr., *fluidonce.* A measure equal approximately to the bulk of an ounce of water. The f. of the United States contains 1·8047 cu. in., and corresponds to the bulk of 455·69 grains of water. The English f. is the bulk of 1 av. oz. (437·5 grains of water). [B, 81.]

FLUIDRACHM, n. Flu^2-i^2-dra^{2}m'. Lat., *fluidrachma* (from *fluidus*, flowing, and δραχμή, a drachm). Fr., *fluidrachme.* A measure equal to the bulk of a drachm of water. The f. of the United States is 0·2256 cu. in., or the bulk of 56·96 grains of water; the English f. is the bulk of 54·7 grains of water. [B, 81.]

FLUIDUM (Lat.), n. n. Flu^2(flu)'i^{2}d-u^{3}m(u^{4}m). See FLUID.—**Ernährungsf'** (Ger.). A nutritive fluid.—**F. cerebrospinale.** See *Cerebro-spinal* FLUID.—**Fluida majoris usus.** Lit., fluids of greater utility; a term among the ancients for the air, the blood, the animal spirit (see SPIRIT), and nerve-juice. [Lancisius (H, 13).]—**F. nerveum.** See *Nervous* FLUID.

FLUIDUNCIA (Lat.), n. f. Flu^2(flu)-i^{2}d-u^{3}n(u^{4}n^2)'si^2(ki^2)-a^3. See FLUIDOUNCE.

FLUIGRAMME (Fr.), n. Flu^6-e-gra^{3}m. A cubic centimetre.

FLUITANS (Lat.), adj. Flu^2(flu^4)'i^2-ta^{2}nz(ta^{3}ns). From *fluitare*, to float. Fr., *flottant.* Ger., *fluthend, schwimmend.* Floating either at the surface or beneath it (said of certain marine *Algæ*). [B, 1, 19, 121 (*a*, 24).]

FLUKE, n. Flu^{2}k. 1. One of the points of a whale's tail. 2. See DISTOMA.—**F.-worm, Liver-f.** See DISTOMA *hepaticum.*

FLUMATIQUE (Fr.), n. Flu^6-ma^3-tek. The *Geum urbanum.* [B, 121, 173 (*a*, 24).]

FLUMEN (Lat.), n. n. Flu^2(flu)'me^{2}n. Gen., *flu'minis.* 1. A flow. [A, 318.] 2. Of Duret, the principal fissures of the brain. [*a*, 29.]—**F. dysentericum.** A copious dysenteric discharge. [*a*, 31.]—**Flumina rolandiana.** The fissure of Rolando. [Duret (*a*, 29).]—**Flumina sylviana.** The fissure of Sylvius. [Duret (*a*, 29).]

FLUOBENZENE, n. Flu^2-o-be^{2}n'zen. Ger., *Fluobenzol.* A crystalline substance, C_6H_5F, compounded of benzene and fluorine. [B, 158.]

FLUOBENZOIC ACID, n. Flu^2-o-be^{2}n-zo'i^{2}k. Fr., *acide fluobenzoïque.* A monobasic acid, $C_7H_5FlO_2$, forming colorless, prismatic crystals, and much resembling benzoic acid. [B, 2.]

FLUOBORATE, n. Flu^2-o-bor'at. Fr., *f.* Ger., *flussboraxsaures Salz.* A salt of fluoboric acid. [L, 27.]

FLUOBORIC ACID, n. Flu^2-o-bor'i^{2}k. Fr., *acide fluoborhydrique.* Ger., *Fluorwasserstoffboraxsäure.* A monobasic acid, HBF_4, obtained in aqueous solution. [B, 3.]

FLUOBORIDE, n. Flu^2-o-bor'id. Fr., *fluoborure.* A salt of fluoboric acid. [B.]

FLUOCHROMATE, n. Flu^2-o-krom'at. A salt of fluochromic acid. [B.]

FLUOCHROMIC ACID, n. Flu^2-o-krom'i^{2}k. 1. A monobasic acid, HCrOF, formed by replacing a molecule of hydroxyl in chromic acid by an atom of fluorine. It is known only through its derivatives, the fluochromates. 2. Of Unverderben, a volatile compound obtained as a fuming gas (which is condensed by cold to a blood-red liquid) by distilling a mixture of an anhydrous chromate and calcium fluoride, with fuming sulphuric acid. Its exact composition is undetermined. [B; B, 241 (*a*, 27).]

FLUOHYDRIC ACID, n. Flu^2-o-hi'dri^{2}k. See HYDROFLUORIC ACID.

FLUOR (Lat.), n. m. Flu^2(flu^4)'o^{2}r. Gen., *-o'ris.* From *fluere*, to flow. Fr., *flueur* (1st def.), *fluide* (2d def.), *f.* (3d def.). Ger., *Fluss* (1st def.), *Flüssigkeit* (2d def.), *F.* (3d def.). 1. A flow. 2. A liquid. 3. See FLUORINE.—**Fluores acidi.** Liquid acids. [B, 99.]—**F. albus (anterior, seu benignus).** Leucorrhœa. [Juncker (A, 42).]—**F. albus intestinorum.** See *Cœliac* FLUX.—**F. albus malignus.** Gonorrhœa in women. [*a*, 34.]—**F. albus posterior.** Ger., *Afterfluss.* A muco-purulent discharge from the anus. [A, 326 (*a*, 21).]—**F'anthene.** A compound, $C_{16}H_{10}$, obtained from coal-tar. [B, 270 (*a*, 27).]—**F'calcium** (Ger.). See CALCIUM *fluoride.*—**F'kalium** (Ger.). Potassium fluoride. [B, 270.]—**F'kiesel** (Ger.). Silicon fluoride. [B, 270.]—**F'natrium** (Ger.). Sodium fluoride. [B, 270.]—**F. metricalis.** Uterine leucorrhœa. [*a*, 34.]—**F. mineralis.** See *F.-spar.*—**F. muliebris.** Leucorrhœa. [A, 42.]—**F. muliebris gallicus.** Gonorrhœa in women. [*a*, 34.]—**F. muliebris non-gallicus.** Leucorrhœa. [*a*, 34.]—**F. regeneratus.** See *F.-spar.*—**F. sanguinis pulmonum.** See BRONCHORRHAGIA and HÆMOPTYSIS.—**F. sanguinis vesicæ.** See CYSTORRHAGIA.—**F'säure** (Ger.). See FLUORIC ACID.—**F.-spar, F. spathosus.** Fr., *chaux fluatée.* Ger., *Flussspath, spathiger Fluss.* Nearly pure calcium fluoride, so called from being used in fluxing ores.—**F. uterinus.** Uterine leucorrhœa.—**F'wasserstoff** (Ger.), **F'wasserstoffsäure** (Ger.). Hydrofluoric acid. [B.]

FLUORATUM (Lat.), n. n. Flu^2(flu^4)-o^{2}r-at(a^{3}t)'u^{3}m(u^{4}m). See FLUORIDE.—**F. calcareum.** See CALCIUM *fluoride.*

FLUORATUS (Lat.), adj. Flu^2(flu^4)-o^{2}r-at(a^{3}t)'u^{3}s(u^{4}s). Fr., *fluoré.* Combined with, or containing, fluorine. [B.] See CALX *fluorata.*

FLUORENE, n. Flu^2'o^{2}r-en. From *fluor*, a flowing. Fr., *fluorène.* Ger., *Fluoren.* Orthodiphenylenemethane, $C_{13}H_{10} = C_6H_4 - CH_2 - C_6H_4$, obtained from coal-tar and the tar-oils. It forms colorles , fluorescent laminæ, melting at 112° to 113° C., and boiling at 234° to 235° C. [B, 2; B, 270 (*a*, 27); "Proc. of the Am. Pharm. Assoc.," xxii (*a*, 14).]—**F. alcohol.** Diphenylene carbinol. [B, 270 (*a*, 27).]

FLUORENIC ACID, n. Flu^2-o^{2}r-e^{2}n'i^{2}k. Ger., *Fluorensäure.* A monobasic, crystalline acid, $C_6H_4 - CH_2 - C_6H_3 - CO.OH$, derived from fluorene. [B, 270.]

FLUORESCEIN, n. Flu^2-o^{2}r-e^{2}s'se-i^{2}n. Fr., *fluorescéine.* Ger., *F.* Resorcinphthalein. [B, 7 (*a*, 27).]

FLUORESCENCE, n. Flu^2-o^{2}r-e^{2}s'e^{2}ns. Fr., *f.* Ger., *Fluorescenz.* The property possessed by some transparent bodies of giving surface reflections of light differing in color from that of their own mass; a phenomenon due to the fact that the light which falls upon the substance is transformed into rays of a greater wave-length. This change affects not only the visible rays, but also the invisible rays beyond the violet end of the spectrum, which are thus transformed into visible rays. F. is produced by concentrating light strongly upon the substance or by the action of heat and electricity. It persists some time after the producing cause is withdrawn (see PHOSPHORESCENCE). An analogous phenomenon to f., by which, however, rays of greater wave-length (ultra-red rays) are transformed into those of less wave-length (visible rays within the red), is *calorescence* (*q. v.*). [B, 21, 270.]

FLUORESCENT, adj. Flu^2-o^{2}r-e^{2}s'e^{2}nt. From *fluor*, a flowing. Fr., *f.* Ger., *fluorescirend.* Having the property of fluorescence. [*a*, 27.]

FLUORESCIN, n. Flu^2-o^{2}r-e^{2}s'i^{2}n. Fr., *fluorescine.* Ger., *F.* A reduction product of fluorescein; a colorless acid, $C_{20}H_{14}O_5$, which forms a varnish soluble in ether. [B, 4 (*a*, 27).]

FLUORESCOPE, n. Flu^2-o^{2}r'e^{2}s-kop. Ger., *Fluoreskop.* Of Kerner, an instrument for determining the presence of quinine in the urine by observing the fluorescence produced by this substance in solution. [B, 270.]

FLUORHYDRIC, adj. Flu^2-or-hid'ri^{2}k. See HYDROFLUORIC.

FLUORIC ACID, n. Flu^2-o^{2}r'i^{2}k. Lat., *acidum fluoricum.* Fr., *acide fluorique.* Ger., *Fluorsäure, Spathsäure.* Hydrofluoric acid in aqueous solution. [A, 385 (*a*, 27).]

FLUORIDE, n. Flu^2'o^{2}r-i^{2}d(id). Lat., *fluoratum* (from *fluor*, a flowing), *fluoruretum, fluoridum.* Fr., *fluorure, fluorhydrate.* Ger., *Fluorür, Fluorid.* It., Sp., *fluoruro.* A compound of fluorine with an element or radicle. [B.]

FLUORINE, n. Flu^2'o^{2}r-en. Lat., *fluorinum* (from *fluor*, a flowing), *fluorum.* Fr., *fluore.* Ger., *Fluor.* A non-metallic element which has never been perfectly isolated, but is conjectured to be a colorless gas. It occurs in nature in composition in the form of fluor-spar and other minerals, and in minute quantities in the bones, blood, brain, and enamel of the teeth. It was formerly supposed to occur in the free state in the fluor-spar of Wösendorf, but this is now known to be untrue. F. combines with hydrogen to form hydrofluoric acid, and unites directly with many other elements to form a series of compounds called fluorides. In composition it is univalent, replacing one atom of hydrogen. Atomic weight, 19·1; symbol, F. Its existence was first demonstrated by Ampère in 1810. [B, 3, 270; J. Lucas, "Lancet," May 22, 1886; "N. Y. Med. Jour.," June 12, 1886, p. 678; "Proc. of the Am. Pharm. Assoc.," xxx (*a*, 14).]

FLUORÜR (Ger.), **FLUORURE** (Fr.), n's. Flu-or-u^{6}r', -u^{6}r. See FLUORIDE.

FLUORURET, n. Flu^2-o^{2}r'u^2-re^{2}t. See FLUORIDE.

FLUOSEL (Fr.), n. Flu^6-o-se^{2}l. An oxygen salt in which a part of the oxygen has been replaced by fluorine. [*a*, 27.]

FLUOSILICATE, n. Flu^2-o-si^{2}l'i^2-kat. Fr., *f.* A silico-fluoride. [B.]

FLUOSILICIC, adj. Flu^2-o-si^{2}l-i^{2}s'i^{2}k. Fr., *fluosilicié, fluosilicique.* Containing both fluorine and silicon in combination. [*a*, 27.]—**F. acid.** Hydrofluosilicic acid. [*a*, 27.]

FLURREN (Ger.), n. pl. Flur're^{2}n. The *Orobanchaceæ*. [B.]

FLUSH, n. Flu^{3}sh. Gr., ἐρυθρότης. Lat., *rubescentia*, *rubor*. Fr., *rougeur*. Ger., *Erröthung*. A reddening of the surface, a state of temporary redness. [L, 107.]—**Hectic f.** The congestion of the capillaries, due to vaso-motor paresis, that is seen in a protracted disease, such as consumption. [a, 34.]

FLUSS (Ger.), n. Flus. See FLOW, RHEUM, CATARRH, FLUX, and FLUOR-*spar*.—**Afterf'.** See PROCTORRHŒA.—**Blutf'.** See HÆMORRHAGE.—**F'artig.** Catarrhal, rheumatic. [L, 80.]—**F'bad.** A river bath. [B.]—**F'barbe.** See CYPRINUS *barbus*.—**F'boraxsäure.** Fluoboric acid. [A, 324.]—**F'blumen.** The flowers of the *Lavandula stœchas*. [B, 270.]—**F'erde.** Earthy fluor-spar. [B, 180 (a, 24).]—**F'fieber.** Any fever supposed to be due to vitiation of the humors or to "rheum"; rheumatic fever, influenza. [B, 131.]—**F'galle.** A vessicnon; a sort of swelling on a horse's leg. [B, 131.]—**F'geist.** Aqua ammoniæ. [B, 270.]—**F'harz.** See ANIME.—**F'kieselsäure.** Hydrofluosilicic acid. [B, 131.]—**F'körner.** The seeds of the peony (*Pæonia*). [B, 270.]—**F'mittel.** 1. In chemistry and mineralogy, a flux. [a, 14.] 2. An anticatarrhal remedy. [B, 131.]—**F'papier.** See CHARTA *picea*.—**F'pflanze.** An aquatic plant. [B, 131.]—**F'pflaster.** See *Emplastrum* PICIS and *Emplastrum* CANTHARIDUM *perpetuum*.—**F'pulver.** 1. (Chem.) a powder used as a flux. 2. (Pharm.) an anticatarrhal powder; especially the pulvis purificans. [B, 131, 270.]—**F'räucherung.** See SPECIES *ad sufficiendum*.—**F'säure.** See HYDROFLUORIC ACID.—**F'schachtelhalm.** The *Equisetum fluviatile*. [B, 131.]—**F'spath.** See FLUOR-*spar*.—**F'spathsauer.** Hydrofluoric, fluoric. [B, 131.]—**F'spathsäure.** See HYDROFLUORIC ACID.—**F'spiritus.** Liquid opodeldoc. [B, 270.] See *Linimentum* SAPONIS.—**F'stoff.** Rheum, morbid humor. [B, 131.]—**Gallenflüsse.** See CHOLERA.—**Gebärmutterf'.** See METRORRHŒA.—**Grauer F.** See *Gray* FLUX.—**Monatsblutf'.** See MENSTRUATION.—**Salzf'.** See FLUXUS *salinus*.—**Samenf'.** See SPERMATORRHŒA.—**Schwarzer F.** See *Black* FLUX.—**Spathiger F.** See FLUOR-*spar*.—**Weiblicher F.** See MENSTRUATION.—**Weisser chylöser F.** See CHYLOLEUCORRHŒA.—**Weisser F.** 1. See LEUCORRHŒA. 2. See *White* FLUX.

FLÜSSIG (Ger.), adj. Flu^{6}s'i^{2}g. Fluid, liquid. [a, 30.]—**Afterf'.** See HÆMORRHOIDAL.—**F'keit.** See the major list.—**F'werdend.** See COLLIQUESCENS.

FLÜSSIGKEIT (Ger.), n. Flu^{6}s'si^{2}g-kit. See FLUID and FLUIDITY.—**Allantoïsche F., Allantoïsf'.** See ALLANTOIC *fluid*.—**Ammoniakf'.** See under AMMONIAK.—**Amnionf', Amniosf'.** See *Liquor* AMNII.—**Augenf'.** The humors of the eyeball. [J, 57.]—**Aushauchende F.** Respiratory exhalation. [a, 34.]—**Bauchf'.** The lymph or serous fluids of the abdomen, or, in general, of the entire cœlome. ["Arch. f. Anat. u. Phys.," 1853, p. 443 (J).]—**Bildungsf'.** See BLASTEMA and CYTOBLASTEMA.—**Blastemf'.** See BLASTEMA.—**Cadet's rauchende F.** See ALKARSINE.—**Cerebrospinalf'.** See *Cerebro-spinal* FLUID.—**Chylusf'.** See CHYLE.—**Dotterf'.** The clear and more fluid portion of an ovum as distinguished from the fat-globules and other nutritive particles. ["Arch. f. Anat. u. Phys.," 1846, p. 207 (J).]—**Ernährungsf'.** The blood of invertebrates and the blood, but especially the lymph and chyle, of vertebrates. ["Arch. f. Anat. u. Phys.," 1853, Bericht Reichert, p. 22; 1856, p. 239 (J).]—**Gallenf'.** See BILE. ["Arch. f. Anat. u. Phys.," 1845, Bericht Siebold, p. 28 (J).]—**Gehirnf'.** See *Cerebro-spinal* FLUID.—**Gehirnrückenmarkf'.** The cerebro-spinal fluid.—**Gewebsf'en.** See *Tissue* LYMPH.—**Gläserne F., Glasf'.** See *Vitreous* HUMOR.—**Herzbeutelf'.** The pericardial fluid.—**Holländische F.** See ETHYLENE *dichloride*.—**Intercellularf'.** See LYMPH.—**Kernf'.** The hyaline and more fluid portion of a cell nucleus. ["Arch. f. Anat. u. Phys.," 1863, p. 243 (J).]—**Krebsf'.** See CANCER *juice*.—**Labarraque'sche F.** See *Liquor* SODÆ *chloratæ*.—**Leibesf', Leibeshöhlenf'.** The lymph or serous fluid in the cœlome or pleuroperitoneal spaces. ["Arch. f. Anat. u. Phys.," 1851, p. 368.]—**Morgagni'sche F.** See AQUA *Morgagni*.—**Müller'sche F.** See *Müller's* FLUID.—**Muskelf'.** See *Muscle* PLASMA.—**Mutterf'.** See *Mother*-LIQUOR.—**Nährf'.** 1. See *Ernährungsf'*. 2. A nutritive fluid (such as bouillon) suitable for the cultivation of micro-organisms. [J, 57, 137.]—**Nervenf'.** See *Nervous* FLUID.—**Samenf'.** See SEMEN.—**Spinalf'.** See *Cerebro-spinal* FLUID.—**Verdauungsf'.** See *Digestive* FLUID.—**Zellenf'.** The more fluid portion of a cell-body. ["Arch. f. Anat. u. Phys.," 1857, p. 513 (J).]—**Zeugungsf'.** See SEMEN.

FLÛTE DE BERGER (Fr.), n. Flu^{6}t-d'-be^{2}r-zha. See DAMASONIUM *stellatum*.

FLUTEAU (Fr.), n. Flu^6-to. The *Alisma plantago* and the *Butomus umbellatus*. [B, 121 (a, 24).]—**F. à feuilles étroites.** The *Alisma graminifolia*. [B, 173 (a, 24).]—**F. étoilé.** The *Damasonium stellatum*. [B, 173 (a, 24).]—**F. plantaginé.** The *Alisma plantago*. [B, 173 (a, 24).]—**F. renonculier.** The *Alisma* (*Echinodorus*) *ranunculoides*.

FLUTEN, n. In Provence, the *Alisma plantago*. [B, 121 (a, 24).]

FLUVIALIS (Lat.), adj. Flu^2(flu)-vi^2(wi^2)-al(a^{3}l)-i^{2}s. From *fluvius*, a river. Fr., *fluvial*. Pertaining to a river. As a n., in the m. pl., *Fluviales*, of Ventenat, an order of monocotyledonous aquatic plants now referred to the *Naiadaceæ*. [B, 19, 170 (a, 24).]

FLUVIATILE, adj. Flu^2'vi^2-at-i^{2}l. Lat., *fluvialis*, *fluviatilis* (from *fluvius*, a river). Fr., *f.* Ger., *flussbewohnend*. Growing in running water. The *Fluviatiles* of Gray are a family of endogenous phanerogams. [B, 1, 121, 123, 170 (a, 24).]

FLUX, n. Flu^{3}x. Lat., *fluxus* (from *fluere*, to flow). Fr., *f.*, *fondant* (2d def.). Ger., *Fluss*. It., *flusso*. Sp., *flujo*, *fluxo*. 1. An old term for a profuse morbid flow or discharge. [D.] 2. An easily fusible substance which, added to an infusible substance or one difficult of fusion, renders it easy of fusion. [A, 301.]—**Bilious f.** See *Bilious* DIARRHŒA.—**Black f.** Ger., *schwarzer Fluss*. A f. (2d def.) characterized by its strong reducing action, made of 1 part of nitre and 3 parts of crude potassium tartrate. These, when deflagrated together, form potassium carbonate and charcoal. [B, 270.]—**Bloody f.** See DYSENTERY.—**Bronchial f.** See BRONCHORRHŒA.—**Cardiac f.** Watery diarrhœa occurring in cases of heart disease. [a, 34.]—**F. catarrhaux** (Fr.). Of Vogel, a division of diseases in which discharges of mucus occur, as in coryza and diarrhœa. [a, 34.]—**Catamenial f.** Fr., *f. cataménial*. The menstrual flow. [A, 385.]—**Chemical f.** See *F.* (2d def.).—**Cœliac f.** Lat., *fluxus chylosus*. 1. An old term for chronic dysentery. [D, 48.] 2. See *Chylous* DIARRHŒA and CHYLORRHŒA (2d def.).—**Cornish refining f.** See *White f.*—**Crude f.** Fr., *fondant cru*. The black f. before it is deflagrated. [B, 199.]—**Deflagrating f.** Of Bloxam, a f. for such substances as are soluble in water and in acids; composed of 1 part of charcoal and 6 parts of potassium nitrate. ["Proc. of the Am. Pharm. Assoc.," xiv (a, 27).]—**F. bilieux** (Fr.). See *Bilious* DIARRHŒA.—**F. blanc** (Fr.). See *White f.*—**F. de salive.** Ptyalism. [a, 34.]—**F. de sang** (Fr.). See DYSENTERY.—**F. de sang du ventre.** Diarrhœa. [a, 34.]—**F. de sperme** (Fr.). See SPERMATORRHŒA.—**F. de ventre** (Fr.). See DIARRHŒA.—**F. d'urine** (Fr.). Enuresis. [a, 34.]—**F. fondant** (Fr.). See *F.* (2d def.).—**F. hémorrhagiques** (Fr.). Of Vogel, a division of diseases in which discharges of blood occur, as in hæmoptysis, hæmatemesis, etc. [a, 34.]—**F. of the belly.** See DIARRHŒA.—**F.-root.** The *Asclepias decumbens*. [a, 24.]—**F. séreux.** See EPHIDROSIS.—**F.-weed.** The *Sisymbrium sophia*. [B, 275 (a, 24).]—**Gastric f.** See GASTRORRHŒA.—**Gray f.** Ger., *grauer Fluss*. A f. (2d def.) made of 3 parts of potassium tartrate and 2 of nitre. [B, 270.]—**Hæmorrhoidal f.** Fr., *f. hémorrhoïdal*. The flow of blood induced by hæmorrhoids. [A, 385.]—**Hepatic f.** See HEPATORRHŒA.—**Menstrual f.** Fr., *f. menstruel*. The menses. [A, 385.]—**Mucous f.** Fr., *f. muqueux*. Diarrhœa with abundant mucous discharges. [A, 385.]—**Palpebral f.** Fr., *f. palpébral*. Ger., *Augenlidfluss*. An old term for the sebaceous discharge from inflamed Meibomian glands. [F.]—**Passive f.** A watery diarrhœa apparently independent of any organic disease. [a, 34.]—**Saline f.** See FLUXUS *salinus*.—**Sebaceous f.** Lat., *fluxus sebaceus*. See SEBORRHŒA.—**White f.** Ger., *weisser Fluss*. A f. (2d def.) made of 1 or 2 parts of nitre and 1 part of potassium tartrate. [B, 270.]

FLUXIO (Lat.), n. f. Flu^{3}x(flu^{4}x)'i^2-o. Gen., *-o'nis*. See FLUXION.—**F. alba.** An old term for leucorrhœa. [A, 42.]—**F. arthritica.** An accumulation of fluid in a joint. [a, 34.]—**F. lunaris.** The menstrual flow. [a, 34.]—**F. matricis, F. vulvæ.** See LEUCORRHŒA.

FLUXION, n. Flu^{3}x'yu^{3}n. Gr., ῥύσις. Lat., *fluxio*. Fr., *f.* Ger., *Fluss*. It., *flussione*. Sp., *fluxión*. 1. A determination of blood to a part; active congestion. [A, 326 (a, 21); A, 365 (D).] 2. Of the French, a popular term for the engorgement of the gums and adjacent parts consequent on dental inflammation. [A, 301.]—**F. dentaire** (Fr.). See *F.* (2d def.).—**F. de poitrine** (Fr.). Pneumonia. [A, 385.]—**F. des gencives** (Fr.). See *F.* (2d def.).—**F. hémorrhoidale** (Fr.). See *Hæmorrhoidal* FLUX.—**F. pulmonaire** (Fr.). Pulmonary congestion. [A, 301.]—**F. rhumatismale.** An attack of rheumatic or gouty inflammation of a joint. [A, 385.]

FLUXUS (Lat.), n. m. Flu^{3}x(flu^{4}x)'u^{3}s(u^{4}s). Gen., *flux'us*. See FLUX and FLOW.—**F. albus.** See *White* FLUX.—**F. alvinus.** See DIARRHŒA.—**F. capillorum.** See ALOPECIA.—**F. chylosus, F. cœliacus.** See *Cœliac* FLUX.—**F. cœliacus per renes.** See CHYLURIA.—**F. colliquativus.** See *Colliquative* DIARRHŒA.—**F. cruentus, F. dysentericus.** See DYSENTERY.—**F. hepaticus.** See HEPATORRHŒA.—**F. lientericus.** See *Lienteric* DIARRHŒA.—**F. lunaris.** The menstrual flow.—**F. matricis.** An old term for leucorrhœa. [A, 42.]—**F. menstrualis.** The menstrual flow.—**F. muliebris.** An old term for leucorrhœa. [A, 42.]—**F. pilorum.** See ALOPECIA.—**F. salinus.** Ger., *Salzfluss*. Salt rheum (moist eczema). [Kaposi (A, 319).]—**F. salivæ.** See SALIVATION.—**F. sebaceus.** See SEBORRHŒA.—**F. splenicus.** Fr., *flux splénique*. A puro-sanguinolent intestinal discharge occurring in persons with hypertrophied spleens. [Frank, 1842 (a, 34).]—**F. venereus.** See GONORRHŒA.—**F. ventriculi.** See GASTRORRHŒA.

FLY, n. Fli. Gr., μυῖα. Lat., *musca*. Fr., *mouche*. Ger., *Fliege*. An insect belonging to or resembling the genus *Musca*.—**Berna f.** See TRYPETA.—**Black f.** The *Simulium molestum*. [L.]—**Blue-bottle f.** See MUSCA *cæsar*.—**Buffalo f.** A species of *Simulium*, injurious by its bites to cattle and horses in the West. [L, 196.]—**Cerate of Spanish flies.** See *Ceratum* CANTHARIDIS.—**Chinese blistering flies.** Two species of f., the *Mylabris cichorei* and the *Mylabris phalerata*, found in eastern and southern Asia. As imported, they occur as a blackish-gray powder; used as a vesicant. [B, 81 (a, 14).] See also *Telini f.*—**Flesh f.** See SARCOPHAGA *carnaria*.—**F.-bane.** 1. The *Silene anglica* and the *Silene virginica*. 2. The *Agaricus muscarius*. [A, 505 (a, 21); B, 275 (a, 24).]—**F.-blow.** The egg of a f. [L, 56.]—**F'dod.** The *Senecio jacobœa*. [A, 505 (a, 21).]—**F.-flowers.** 1. All species of *Orchis* except *Orchis mascula*. 2. The *Prunella vulgaris*. [A, 505 (a, 21).]—**F.-plant.** In California, the *Mimulus glutinosus*. ["Proc. of the Am. Pharm. Assoc.," xxvii (a, 14).]—**F.-poison.** The genus *Amianthium*, especially the *Amianthium muscætoxicum*. [B, 19, 342, 275 (a, 24).]—**F.-powder.** The gray pulverulent deposit (arsenic suboxide, or a mixture of metallic arsenic and arsenic trioxide) formed upon metallic arsenic when it is exposed to the air. [B, 37.]—**F.-trap.** See SARRACENIA and APOCYNUM *androsæmifolium*.—**F.-wort.** The genus *Myanthus* (*Catasetum*). ["Indian Med. Gaz.," Oct., 1885, p. 320.]—**Tincture of Spanish flies.** See *Tinctura* CANTHARIDIS.—**Venus's f.-trap.** The *Dionæa muscipula*. [B, 19, 275 (a, 24).]—**Warega f.** A species of *Musca* found in Brazil which deposits its eggs beneath the skin of man and animals, causing painful swellings. [L, 196.]

FNEMP (Jap.), n. The *Citrus aurantium*. [B, 88 (a, 14).]

FOAL-FOOT, FOAL'S-FOOT. Fol'fu^{4}t, foiz'fu^{4}t. 1. The *Tussilago farfara*. 2. The *Ranunculus ficaria*. 3. The *Asarum europæum*. 4. The *Nepeta glechoma*. [A, 505 (a, 21).]—**Sea f.-f.** The *Convolvulus soldanella*. [B, 275 (a, 24).]

FOCAL, adj. Fo'ka^{3}l. From *focus*, a fire-place. Pertaining to a focus. [L, 56.]

FOCHA, n. Of Avicenna, an aromatic and aphrodisiac drink. [L, 94.]

FOCILE (Lat.), n. n. Fos(fo^{2}k)'i^{3}l-e(a). Gen., *-is*. From *focillare*, to revive. Fr., *f.* An old term for any bone of the forearm or the leg. [A, 325; L, 31.]—**F. inferius.** See *F. majus cruris*.—**F. majus.** See Ulna.—**F. majus cruris.** See Tibia.—**F. minus.** See Radius.—**F. minus cruris.** See Fibula.—**Grand f.** (Fr.). See *F. majus*.—**Petit f.** (Fr.). See *F. minus*.

FOCUS (Lat.), n. m. Fok'u^{3}s(u^{4}s). Gr., ἑστία. Fr., *f.*, *foyer*. Ger., *F.*, *Brennpunkt* (1st def.). It., *fuoco*. Sp., *foco*. 1. The point at which rays (especially of light) are collected or converged by a lens or mirror. When used without qualification, the principal f. (*q. v.*) is always meant. 2. A central point, or point of departure; a nucleus; a point at which a process is manifested in great intensity. [D; F.]—**Acoustic f.** The point of meeting of sound waves reflected from a concave surface with reference to the ear. [F.]—**Anterior f.** Fr., *foyer antérieur*. Ger., *vorderer Brennpunkt*. That point in front of a system of refracting surfaces at which parallel rays impinging upon this system from behind are united; the anterior principal f. of a compound dioptric system. [B.]—**Anterior f. of the eye.** Fr., *foyer antérieur de l'œil*. Ger., *vorderer Brennpunkt des Auges*. That point in front of the eye at which rays coming from the retina and parallel in the vitreous humor are united. [B.]—**Anterior principal f.** See *Anterior f.*—**Apoplectic f.** Lat., *f. apoplecticus*. The cavity resulting from a hæmorrhage into the brain or its membranes after the absorption of the blood.—**Apparent f.** Ger., *scheinbarer Brennpunkt*. See *Virtual f.*—**Calorific f.** The point at which rays of heat (the red and ultra-red rays of the spectrum) are collected by a lens or mirror. [B.]—**Chemical f.** The point at which the luminous rays of greatest chemical intensity (*i. e.*, the violet rays) are brought together by a simple lens. [J. C. Draper (B).]—**Conjugate foci.** Fr., *foyers conjugués*. Ger., *conjugirte* (oder *zusammengehörige*) *Brennpunkte*. Two points of such a position that light-rays, heat-rays, or sonorous vibrations emanating from one are collected by a mirror or lens at the other. Conjugate foci are mutually convertible, *i. e.*, either one may be taken as the point of emanation of the rays or vibrations, and also as the point of collection of the latter. [B.]—**Depth of f.** The distance through which an image formed at the f. of a lens may be shifted without materially impairing the definition of the image. [B.]—**First f.** See *Anterior f.*—**F. apoplecticus.** See *Apoplectic f.*—**F. of a lens, F. of a mirror.** See *Principal f.*—**F. of a prism.** The point to which all the rays emanating from one point of an object are projected by a prism. In general, the distance of this f. from the prism is different from that of the object, but in the position of minimum deviation of the prism it is the same. [B.]—**F. of the eye.** Fr., *foyer de l'œil*. Ger., *Brennpunkt des Auges*. See *Anterior f. of the eye* and *Posterior f. of the eye*.—**Hæmorrhagic f.** Ger., *hämorrhagischer F.* A blood-slough; a large effusion of blood, accompanied by destruction of tissue. To be distinguished clinically from *apoplexy* (*q. v.*). [D, 3.]—**Imaginary f., Negative f.** See *Virtual f.*—**Posterior f.** Fr., *foyer postérieur*. Ger., *hinterer Brennpunkt*. That point posterior to a system of refracting surfaces at which rays impinging in a parallel direction upon the anterior surface of the system are united. [B.]—**Posterior f. of the eye.** Fr., *foyer postérieur de l'œil*. Ger., *hinterer Brennpunkt des Auges*. See *Principal f. of the eye*.—**Posterior principal f.** See *Posterior f.*—**Primary f., Principal f.** Fr., *foyer principal*. Ger., *Hauptbrennpunkt*. The point at which parallel rays falling on a lens or mirror are collected, or toward which they tend to converge. In the case of a spherical mirror the principal f. is at a distance of one half the radius of curvature from the centre of the mirror; in the case of a spherical lens it is situated at the centre of curvature. The principal f. of a concave lens or of a convex mirror is virtual; of a convex lens or concave mirror, real. According to the laws of conjugate foci (see *Conjugate f.*), rays emanating from the principal f. are reflected or refracted in parallel directions. [B.]—**Principal f. of the eye, Principal posterior f.** Fr., *foyer principal de l'œil*. Ger., *Hauptbrennpunkt des Auges*. That point posterior to the dioptric media of the eye at which rays impinging upon the cornea in a direction parallel to the optic axis are united. In emmetropic eyes the principal f. is upon the retina; in myopic eyes, in front of it; in hypermetropic eyes, behind it. [B.]—**Prismatic f.** See *F. of a prism*.—**Real f.** Fr., *foyer réel*. Ger., *reeller* (oder *nahrer*) *Brennpunkt*. A point in front of a mirror or behind a lens at which rays made convergent by reflection or refraction meet. [B.]—**Second f.** See *Posterior f.*—**Sonorous f.** The point at which vibrations of sound are collected by a mirror or by a lens composed of such material as to refract them. [B.]—**Thermal f.** See *Calorific f.*—**Virtual f.** Fr., *foyer virtuel*. Ger., *virtueller Brennpunkt*. A point behind a mirror or in front of a lens at which rays made divergent by reflection or refraction would meet if prolonged. [B.]—**Visual f.** The point at which the rays of the greatest luminous intensity (*i. e.*, the yellow rays) are brought together by a single lens. [Draper (B).]

FOCUS, v. tr. Fo'ku^{3}s. Ger., *fokusiren*. To adjust a lens or mirror in such a way that the image produced at its focus is brought to the place most suitable for distinct vision. [B.]

FODINA (Lat.), n. f. Fod(fo^{3}d)-in(en)'a^3. From *fodere*, to dig. The labyrinth of the internal ear. [L, 349.]

FODOR MENTA (Mal.), n. The *Mentha crispa*. [B, 88 (a, 14).]

FŒCUNDATIO (Lat.), n. f. Fe(fo^2-e^2)-ku^{3}nd(ku^{4}nd)-a(a^3)'shi^2. (ti^2)-o. Gen., *-o'nis*. See Fecundation.

FŒDIA (Lat.), n. Fe^{2}d(fo^2-e^{2}d)'e-a(a^3). See Fedia.

FOE-LIN (Chin.), n. See Fo-lim.

FOEMINELL (Ger.), n. Fu^6-me^{2}n-e^{2}l'. Spanish saffron, especially that collected from the pale part of the stigmas. [B, 180 (a, 24).]

FŒMINEUS (Lat.), adj. Fe^{2}m(fo^2-e^{2}m)-i^{2}n'e^2-u^{3}s(u^{4}s). See Female and Femineous.

FŒMINIFLORUS (Lat.), adj. Fe^{2}m(fo^2-e^{2}m)-i^{2}n-i^2-flo'ru^{3}s-(ru^{4}s). From *fœmina*, a female, and *flos*, a flower. Fr., *féminiflore*. Ger., *weibblumig*. Composed of female flowers (said of a disc). [L, 180.]

FŒNICULA (Lat.), n. n. pl. Fe^{2}n(fo^2-e^{2}n)-i^{2}k'u^{2}l(u^{4}l)-a^3. From *fœniculum*, fennel. Of Adanson, a section of the *Umbelliferæ*. [B, 121, 170 (a, 24).]

FŒNICULACEOUS, FŒNICULATE, adj's. Fe^{2}n-i^{2}k-u^{2}l-a'shu^{3}s, -i^{2}k'u^{2}l-at. Resembling or consisting of fennel. [a, 34.]

FŒNICULIFOLIUS (Lat.), adj. Fe^{2}n(fo^2-e^{2}n)-i^{2}k-u^{2}l(u^{4}l)-i^2-fol(fo^{3}l)'i^2-u^{3}s(u^{4}s). From *fœniculum*, fennel, and *folium*, a leaf. Having leaves like those of fennel. [B.]

FŒNICULUM (Lat.), n. n. Fe^{2}n(fo^2-e^{2}n)-i^{2}k'u^{2}l(u^{4}l)-u^{3}m(u^{4}m). From *fœnum*, fenugreek. Fr., *fenouil*. Ger., *Fenchel*. It., *finocchio*. Sp., *hinojo*. 1. Of Adanson, a genus of umbelliferous herbs; of Bentham and Hooker, a genus of the *Seselineæ*. 2. Of the U. S. Ph., fennel (the fruit of *F. vulgare*). [B, 5, 42 (a, 24).]—**Ætheroleum fœniculi** [Dan. Ph., Norw. Ph., Swed. Ph.]. See *Oil of* fennel.—**Aqua fœniculi** [U. S. Ph., Br. Ph., Ger. Ph.]. Fr., *eau distillée de fenouil* [Fr. Cod.]. Ger., *Fenchelwasser*. Sp., *agua de hinojo* [Sp. Ph.]. A preparation made by dissolving 2 parts of oil of fennel in 1,000 parts of water [U. S. Ph.]; or by distilling one part of fennel fruit with 20 parts of water until the distillate equals 10 parts [Br. Ph.] (or 4 parts [Fr. Cod.]) or 30 parts [Gr. Ph.]. Similar preparations are official in all the pharamacopœias. [B.]—**Aqua fœniculi extemporanea** [Finn. Milit. Ph.]. A solution of 2 drops of oil of fennel in 100 grammes of water. [B, 95.]—**Cortex radicis fœniculi.** Sp., *hinojo* (*corteza de la raiz*) [Sp. Ph.]. The root-bark of *F. vulgare*. [B, 95.]—**Essentia fœniculi** [Belg. Ph.]. See *Oil of* fennel.—**Fœniculi fructus** [Br. Ph.], **Fœniculi semen** [Gr. Ph.]. See *F.* (2d def.).—**F. alpinum.** See Meum *athamanticum*.—**F. aquaticum.** Fr., *fenouil de l'eau*. Ger., *Wasserfenchel*. The *Œnanthe phellandrium*. [B, 180 (a, 24).]—**F. asininum.** See *F. piperitum*.—**F. caballinum.** See *F. aquaticum*.—**F. capense.** A species growing in South Africa, similar to the common fennel. Its root, known as fennel-wort or fennel-root (Dutch, *Fenchelwortel*, *Fenchelwursel*), is used as food at the Cape of Good Hope. [B, 180 (a, 24).]—**F. capillaceum.** Of Gilibert, the *F. vulgare* (*Anethum f.*). [B, 18 (a, 24).]—**F. creticum, F. dulce.** Sweet fennel; a variety of the common fennel cultivated in Italy as a garden vegetable, and having properties similar to those of *F. vulgare* (of which, according to some, it is a variety), except that its young shoots or turiones are sweeter and edible. The fruits, *semen fœniculi cretici* (seu *dulcis*, seu *romani*), are sweeter and milder than common fennel. [B, 5, 180 (a, 24).]—**F. erraticum.** The *Peucedanum silaus*. [L, 116.]—**F. germanicum.** See *F. vulgare*.—**F. lusitanicum.** The *Sison ammi*. [B, 180.]—**F. marinum.** Fr., *fenouil marin*. Ger., *Meerfenchel*. The *Crithmum maritimum*. [B, 180 (a, 24).]—**F. moscoviticum.** The *Illicium anisatum*. [B, 180 (a, 24).]—**F. officinale.** See *F. vulgare*.—**F. orientale.** See Cuminum *cyminum*.—**F. panmorium.** Ger., *indischer Fenchel*. A species indigenous to the East Indies, where it is cultivated. Its fruits taste and smell like common fennel, and are used in like manner. [B, 180 (a, 24); "Proc. of the Am. Pharm. Assoc.," xxiv (a, 14).]—**F. pipe-**

Fœniculum vulgare. [A, 327.]

ritum. Ger., *pfefferartiger Fenchel*. It., *finocchio d'asino*. A species found in Sardinia, Sicily, and Portugal. Its fruits have an aromatic, peppery taste. [B, 180 (a, 24).]—**F. porcinum.** Fr., *fenouil de porc*. Ger., *Saufenchel*. The *Peucedanum officinale*. [B, 173, 180 (a, 24).]—**F. romanum.** See *F. dulce*.—**F. sativum.** The *F. dulce* (a var. of *F. vulgare*). [a, 24.]—**F. silvestre.** The

Seseli tortuosum. [L, 116.]—**F. sinense.** Fr., *badiane.* Ger., *Sternanis.* The *Illicium anisatum.* [L, 116.]—**F. stellatum.** See *F. moscoviticum.*—**F. tortuosum.** Fr., *fenouil tortueux, fenouil tortu.* The *Seseli tortuosum.* [B, 121, 173 (α, 24).]—**F. ursinum.** The *Meum athamanticum.* [B, 180 (α, 24).]—**F. vulgare.** Fr., *fenouil commun, fenouil doux, anis de France, anis de Paris.* Ger., *gebräuchlicher* (oder *gemeiner*) *Fenchel.* Common fennel, the source of the fennel-seed (or fruits) of the pharmacopœias; a species indigenous to Europe, and also abundant in Asia, extending perhaps as far as China. The fruits were used in ancient times. They are aromatic and carminative, and are much used as a corrigent, especially with senna and rhubarb. In infusion they are employed as an enema for the expulsion of flatus in infants, and they yield as a galactagogue an oil, *oleum fœniculi.* The root, *radix fœniculi,* was once official but is inferior in medicinal virtue to the seed. [B, 5, 173, 180 (α, 24); "Proc. of the Am. Pharm. Assoc.," x (α, 14).]—**Fructus fœniculi** [Ger. Ph.]. See *F.* (2d def.).—**Gummi-resina fœniculi.** Sp., *hinojo, producto gomo-resinoso.* A gum-resin that exudes spontaneously from *F. vulgare.* [B, 95.]—**Lignum fœniculi.** The wood of *Sassafras officinale.* [B, 180 (α, 24).]—**Oleum fœniculi** [U. S. Ph., Ger. Ph., Aust. Ph., Hung. Ph., Swiss Ph., Finn. Ph., Netherl. Ph., Gr. Ph.]. See *Oil of* FENNEL. [B.]—**Semen fœniculi.** The fruit of *F. vulgare.* [B, 205 (α, 21).]—**Syrupus fœniculi** [Ger. Ph., 1st ed.]. Syn.: *sirupus feniculi* [Russ. Ph.]. A syrup made by mixing a filtered decoction of fruit of *F. vulgare* with sugar, 18 parts of the syrup representing 2 (or 3 [Russ. Ph.]) of the fennel fruit. [B, 95.]—**Syrupus fœniculi compositus** [Belg. Ph.]. A syrup made by macerating 1 part each of the roots of *Apium graveolens, Asparagus officinalis, F. vulgare, Petroselinum vulgare,* and *Ruscus aculeatus* in 12 parts of dilute acetic acid and 25 of distilled water, filtering, and adding to every 6 parts of the filtrate 13 parts of sugar and 1 part of aqua apii. [B, 95.]—**Tinctura fœniculi composita** [Swiss Ph.]. Syn.: *essentia ophthalmica.* Ger., *Rommershausen.* A preparation made by digesting 100 parts of the fruit of *F. vulgare* with 500 of dilute alcohol and, after straining, adding 1 part of oil of fennel. [B, 95.]

FŒNUGREEK, n. Fe^{2}n'u^2-grek. See FŒNUM *græcum.*

FŒNUM (Lat.), n. n. Fe^{2}n'(fo^2'e^{2}n)-u^{3}m(u^{4}m). From φύειν, to produce. 1. Hay. 2. See *F. græcum.*—**Emplastrum de fœnu græco** [Palat. Disp., 1764]. Fr., *emplâtre de mucilage.* Syn.: *emplastrum de mucilaginibus.* A plaster containing fenugreek and linseed mucilages, turpentine, gum ammoniac, various herbs, etc. [L, 85.]—**F. camelorum.** The *Andropogon schœnanthus.* [L, 135 (α, 14).]—**Fœni græci semen** [Gr. Ph.]. See *Semen fœni græci.*—**F. græcum.** The genus *Trigonella.* [B, 121 (α, 24).]—**F. græcum officinale.** The *Trigonella f. græcum.* [B, 173 (α, 24).]—**Semen fœni græci** [Belg. Ph., Dan. Ph., Swiss Ph.]. The seed of *Trigonella f. græcum.* [B.]—**Unguentum fœni græci compositum** [Belg. Ph.]. A preparation made of 22 parts of curcuma rhizome, 22 of fenugreek, 91 of rosin, 182 of yellow wax, and 727 of olive-oil. [B, 95.] Cf. UNGUENTUM *flavum.*

FŒTABULUM (Lat.), n. n. Fe^{2}t(fo^2-e^{2}t)-a^{2}b(a^{3}b)'u^{2}l(u^{4}l)-u^{3}m-(u^{4}m). From *fœtere,* to have an ill smell. An old name for an encysted abscess. [A, 325.]

FŒTAL, adj. Fet'a^{2}l. Lat., *fœtalis.* Fr., *f.* Ger., *fötal.* It., *fetale.* Sp., *fetal.* Pertaining to or in the state of a fœtus.

FŒTATION, n. Fe-ta'shu^{3}n. Lat., *fœtatio.* See GESTATION.

FŒTEO-MENORRHŒA, n. Fet(fo^2-e^{2}t)-e^2-o(o^3)-me^{2}n-o^{2}r-re'(ro^2'e^2)-a^3. Fœtor of the menstrual discharge. [α, 34.]

FŒTICIDE, n. Fet'i^2-sid. From *fœtus* (*q. v.*), and *cœdere,* to kill. Fr., *f.* See *Criminal* ABORTION.

FŒTID, adj. Fe^{2}t'i^{2}d. Gr., δυσώδης. Lat., *fœtidus.* Fr., *fétide.* Ger., *stinkend.* Having a foul odor. [B, 117; D.]

FŒTIDIA (Lat.), n. f. Fe^{2}t(fo^2-e^{2}t)-i^{2}d'i^2-a^3. Stinkwood; of Commerson, a genus of myrtaceous trees found in the Mascarine Islands. [B, 19, 42 (α, 24).]—**F. borbonica, F. mauritiana.** Fr., *f. de Bourbon, bois puant.* A Mauritius species having a bitter and astringent bark. [B, 19, 173 (α, 24).]

FŒTIFEROUS, adj. Fet-i^{2}f'e^{3}r-u^{3}s. From *fœtus* (*q. v.*), and *ferre,* to carry. Pregnant.

FŒTOR (Lat.), n. m. Fet'(fo^2'e^{2}t)-o^{2}r. Gen., *-o'ris.* Fr., *f., fœtidité.* Ger., *Gestank, übler Geruch.* A fœtid odor. [D.]—**F. alarum.** F. of the arm-pits.—**F. oris.** F. of the breath.

FŒTUS (Lat.), n. m. Fet'(fo^2'e^{2}t)-u^{3}s(u^{4}s). Gen., *fœt'us.* From *fere,* to bring forth. Gr., ἔμβρυον. Fr., *f.* Ger., *Fötus, Frucht, Leibesfrucht.* It., Sp., *feto.* An animal organism so far advanced in its development as to show its main future characteristics plainly, but not yet existing independently of the maternal organism. In the human subject the term is commonly applied to the embryo only after the third month of its development. [A, 15.]—**Abdominal f.** Lat., *f. ventralis.* The f. of an abdominal gestation.—**Alligator f.** See *Harlequin f.*—**Fxtra-uterine f.** The f. of an extra-uterine gestation.—**F. à cheval sur son cordon** (Fr.). A condition in which the fœtus bestrides the umbilical cord.—**F. aplati** (Fr.). See *F. compressus.*—**F. compressus.** Fr., *f. de papier* (ou *aplati,* ou *momifié aplati*). A f. which, having died at an early stage of gestation, has undergone mummification and been compressed into the form of a sheet by the growth of a twin.—**F. conduplicatus.** Fr., *enfant plié en deux.* A doubling of the body of the f. upon itself during its expulsion in a case of transverse presentation.—**F. de papier** (Fr.). See *F. compressus.*—**F. inclusus, F. in fœtu.** A form of double monstrosity in which one f. ceases to be developed, and its remains are wholly or partially buried within the substance of the other f.—**F. (momifié) aplati** (Fr.). See *F. compressus.*—**F. ovaricus, F. ovarius.** See *Ovarian f.*—**F. papyraceus.** See *F. compressus.*—**F. pseudencéphalien** (Fr.). A pseudencephalus. [α, 34.]—**F. sanguinolentus.** Of Martin and Ruge, a macerated f.; so called from its reddish-brown color. [A, 15.]—**F. septimestris.** A seven months' f. [α, 34.]—**F. sireniformis.** A f. with fusion of the lower extremities. [α, 34.]—**F. tubarius.** See *Tubal f.*—**F. ventralis.** See *Abdominal f.*—**F. vitalis.** See *Viable f.*—**F. vivus sed non vitalis.** See *Non-viable f.*—**F. zephyrius.** A mole. [α, 34.]—**Harlequin f.** A f. affected with diffuse keratosis. [J. B. Sutton, "Lancet," March 13, 1886, p. 491.]—**Hemiteratic f.** See HÆMITERATA.—**Hermaphroditic f.** See HERMAPHRODITISM.—**Heterotaxic f.** See HETEROTAXIS.—**Included f.** See *F. inclusus.*—**Monstrous f.** Fr., *f. monstrueux.* A fœtal monstrosity. [α, 34.]—**Mummified f.** Fr., *f. momifié.* Ger., *mumificirter Fötus.* See *F. compressus.*—**Non-viable f.** Lat., *f. vivus sed non vitalis.* Ger., *lebensunfähige Frucht.* A f. that has not reached a stage of development at which it is capable of surviving apart from the maternal organism.—**Ovarian f.** Lat., *f. ovaricus.* The f. of an ovarian gestation.—**Secondary f.** See *F. compressus.*—**Tubal f.** Lat., *f. tubarius.* The f. of a tubal gestation.—**Viable f.** Lat., *f. vitalis.* Ger., *lebensfähige Frucht.* A f. far enough advanced in development to be capable of survival apart from the maternal organism. See VIABILITY.

FOG, n. Fo^{2}g. In the north of England, moss; also the second crop of grass. [B, 275 (α, 24).]—**F.-fruit.** The *Lippia* (*Zapania*) *lanceolata.* [B, 19, 275 (α, 24).]—**Yorkshire f.** The *Holcus lanatus.* [B, 275 (α, 24).]

FOHANIN, n. The herb of *Santolina fragrantissima.* [B, 180 (α, 24).]

FÖHRE (Ger.), n. Fu^{5}r'e^2. The *Pinus silvestris.* [B, 180 (α, 24).]

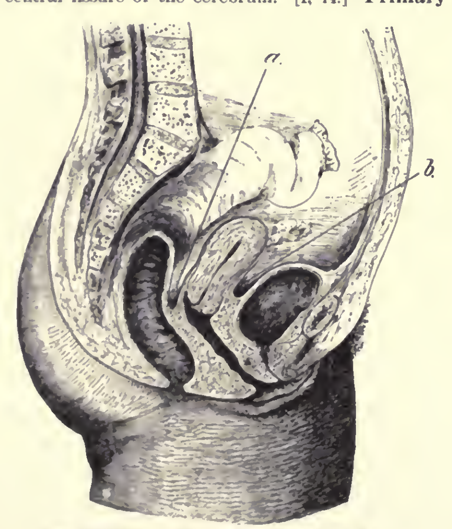
FOIE (Fr.), n. Fwa^3. See LIVER.—**F. alcoolique.** Cirrhosis of the liver caused by alcohol. [α, 34.]—**F. amyloïde.** Amyloid degeneration of the liver. [L, 49.]—**F. botryoïde.** Chronic hepatic cirrhosis. [α, 34.]—**F. cardiaque.** Disease of the liver due to disease of the heart. [Huchard, "Union méd.," April 21, 1883, p. 669 (D).]—**F. chaud.** A supposed disease accompanied by bulimia. [L, 41.]—**F. de bœuf.** In northern and central France, the *Fistulina hepatica.* [B, 105, 121 (α, 24).]—**F. des buveurs de gin.** Gin-drinkers' liver; cirrhosis of the liver. [D, 72.]—**F.-douvé.** The rot in sheep. [L.]—**F. ficelé.** Lit., tied-up liver; a liver marked by deep, linear depressions, as if thrown into furrows by constricting cords, where bands of cicatricial tissue replace its proper substance; a result of cirrhosis. ["Bull. de la soc. anat.," June 28, 1889 (α, 18).]—**F. gras.** Fatty degeneration of the liver. [L, 49.]—**F. muscade, F. noix de muscade.** See *Nutmeg* LIVER.—**Huile de f. de morue.** See COD-LIVER OIL.—**Lavage du f.** The injection of water into the veins of the liver after its removal from the body, in order to eliminate all sugar from its vessels. [K, 31.]

FOIL, n. Foil. From *folium,* a leaf. Fr., *feuille.* Ger., *Blättchen, Folie.* It., *foglia.* Sp., *hoja.* A very thin and flexible sheet of metal. [B.]

FOILE-FOOT, n. Foil'fu^{4}t. See FOAL-FOOT.

FOIN (Fr.), n. Fwa^{2}n^2. From *fœnum,* hay. Hay; grass suitable for provender. [B, 121 (α, 24).]—**F. blanc.** The *Agrostis stolonifera,* var. *alba.* [B, 173 (α, 24).]—**F. capillaire.** The *Agrostis capillaris.* [B, 121, 173 (α, 24).]—**F. de Bourgogne.** The *Medicago sativa* and the *Onobrychus sativa.* [B, 121, 173 (α, 24).]—**F. de mouton.** The *Holcus lanatus.* [B, 1, 121 (α, 24).]—**F. dur.** The *Anthoxanthum odoratum* and the *Hypericum perforatum.* [B, 121, 173 (α, 24).]—**F. du Thibet.** The *Prangus pabularia.* [B, 121 (α, 24).]—**F. français.** The genus *Medicago.* [B, 121 (α, 24).]—**F. grec.** The *Trigonella fœnum græcum.* [B. 173 (α, 24).]—**F. rampant.** The *Agrostis stolonifera.* [B, 121, 173 (α, 24).]—**F. rouge.** The *Agrostis rubra.* [B, 121, 173 (α, 24).]

FOIRANDE (Fr.), **FOIRELLE** (Fr.), **FOIROLE** (Fr.), **FOIROUDE** (Fr.), n's. Fwa^3-ra^{3}nd, -rel, -rol, -rud. The *Mercurialis annua.* [B, 121, 173 (α, 24).]



FOISEN (Ger.), n. Foiz'e^{2}n. The *Rumex alpinus.* [B, 180 (α, 24).]

FOIST, n. Foist. The *Lycoperdon bovista.* [A, 505 (α, 21).]

FOLD, n. Fold. Gr., πλέκος. Lat., *plica.* Fr., *pli, repli.* Ger., *Falte.* It., *piega.* Sp., *pliegue.* A doubling of anything upon itself.—**Amniotic f.** Ger., *Amnionfalte.* A folded edge of the double amniotic membrane, where it rises over and finally incloses the embryo. [A, 5.] See *Cephalic f., Lateral f.,* and *Caudal f.*—**Anterior amniotic f., Anterior f. of the blastoderm.** See *Cephalic f.*—**Antorbital f.** See *Anterior orbital* CONVOLUTION.—**Arytæno-epiglottic** (or **-epiglottidean**) **f's.** Two f's of mucous membrane which inclose a few ligamentous and muscular fibres and the arytænoid cartilages, extending from the tops of the latter and of the cornicula laryngis to the lateral margins of the epiglottis. [C.]—**Basirrhinal f.** See *Basirrhinal* GYRUS.—**Callosal f.** See *Callosal* GYRUS.—**Caudal f.** Fr., *repli caudal.* Ger., *Schwanzfalte.* That f. of the blastoderm which incloses the caudal and primitive cloacal parts of the alimentary canal of the embryo. [A, 5.]—**Cephalic f.** Fr., *repli céphalique.* Ger., *Kopffalte.* A f. of all the layers of the blastoderm, including also a part of the alimentary canal and the rudimentary heart. It passes ventrad and caudad on each side. [A, 5.]—**Cerebral f's.** The convolutions of the cerebrum. [α, 29.]—**Chorioidal f.** See *Chorioidal* FISSURE.—**Ectofrontal f.** Of Owen, an ill-defined region between his ectofrontal fissure and the orbital fissure. [I, 14.]—**Ectorbital f.** See *Posterior orbital* CONVOLUTION.—**Ectorrhinal f.** Of Owen, the area just laterad of the olfactory fissure. [I, 14 (K).]—**Entolambdoidal f.** Of Owen, the area of the cuneus between the occipital and superseptal fissures. [I, 14.]—**Entorbital f.** Fr., *pli orbital interne.* See *Internal orbital* CONVOLUTION.—**Entorrhinal f.** Fr., *partie antérieure du grand marginal.* See GYRUS *rectus.*—**Entosylvian f.** See INSULA.—**Exoccipital f.** The tip of the occipital lobe. [I, 14.]—**Falcial f.** Fr., *partie antérieure du grand marginal.* The portion of the callosal gyrus that lies ventrad of the genu of the callosum. [I. 14.]—**F's of Douglas.** See *Recto-uterine*

O, no; O^2, not; O^3, whole; Th, thin; Th^2, the; U, like oo in too; U^2, blue; U^3, lull; U^4, full; U^5, urn; U^6, like ü (German).

f's.—**F's of the amnion.** Fr., *replis de l'amnios, capuchons de l'amnios.* Ger., *Amnionsfalten.* See *Cephalic f., Lateral f.,* and *Caudal f.*—**F's of the axilla.** The anterior and posterior walls of the axilla.—**F's of the broad ligament.** Fr., *ailerons du ligament large.* The layers of the broad ligament of the uterus.—**F. of the buttock.** The cutaneous f. marking the junction of the buttock with the thigh.—**F. of the groin.** Fr., *pli de l'aine.* The cutaneous f. marking the junction of the thigh with the trunk in front.—**F's of the rectum.** F's of a semilunar form in the mucous membrane of the rectum. They are usually three in number, one near the commencement of the rectum on the right side, another opposite the middle of the sacrum extending inward from the left side, and the largest and most constant one opposite the base of the bladder, running backward from the fore part of the rectum. A fourth is sometimes present half an inch above the anus on the back of the rectum. They are about half an inch wide and overlap each other where the organ is empty. [L, 42, 172 (a, 29).]—**Frontal f.** See *Ascending frontal* CONVOLUTION.—**Genital f's.** The two f.-like structures of the embryo which are converted into the lateral halves of the scrotum or into the labia pudendi majora. [A, 16.]—**Genito-enteric f.** Lat., *plica genito-enterica.* An anomalous f. of the peritonæum extending between the broad ligament and the base of the mesentery of the sigmoid flexure of the colon. [L, 31.]—**Glosso-epiglottic f's.** Three f's in the mucosa of the tongue which extend from the base of the tongue to the epiglottis. [C.]—**Gluteal f.** See *F. of the buttock.*—**Head f.** See *Cephalic f.*—**Hippocampal f.** See *Hippocampal* GYRUS.—**Hypoblastic f.** A fold in the hypoblast, especially the dorsally extending f. which comes in contact with the rudiment of the central nervous system and ultimately gives rise to the notochord. ["Quart. Jour. of Micr. Sci.," xxix, p. 297 (J).]—**Intestinal f. (of the blastoderm).** See SPLANCHNOPLEURE.—**Lambdoidal f.** Of Owen, the occipital portion of the paroccipital gyrus. [I, 14.]—**Lateral amniotic f.** The f's of somatopleure rising on the sides of the embryo, and, with the cephalic and caudal amniotic f's, finally forming the complete amniotic sac. [J, 55, 188.]—**Marginal f.** See *Marginal* GYRUS.—**Medial f.** See *Postcentral* GYRUS.—**Medilateral f.** The parietal portion of the paroccipital gyrus. [I, 14.]—**Medullary f's.** See *Medullary* RIDGES.—**Mesenteric f's.** In the *Actinozoa*, vertical partitions that divide the gastro-vascular cavity into a number of compartments. [L, 353.]—**Midfrontal f.** See *Medifrontal* GYRUS.—**Midoccipital f.** See *Superior occipital* CONVOLUTION.—**Midorbital f.** Fr., *pli orbital moyen.* Ger., *mittlere Orbital-* (oder *Augenhöhlen-*) *falte.* Of Owen, a narrow area on the orbital surface of the frontal lobe, between his midorbital and ectorbital fissures. [I, 14.]—**Occipital f.** See *Superior occipital* CONVOLUTION.—**Opercular f.** See *Branchiostegal* MEMBRANE.—**Posterior amniotic f.** Ger., *hintere Amnionsfalte.* The f. of the somatopleure rising at the caudal end of the embryo and with the lateral and cephalic amniotic f's finally completely inclosing the embryo in the amniotic sac. [J, 55, 123, 191.]—**Posthippocampal f.** See *Subcalcarine* GYRUS.—**Postmarginal f.** See PRÆCUNEUS.—**Postoccipital f.** See *Inferior occipital* CONVOLUTION.—**Postorbital f.** Fr., *pli orbital postérieur.* Ger., *hintere Orbitalfalte.* Of Owen, the area of the orbital surface of the frontal lobe which intervenes between the basisylvian and orbital fissures. [I, 14.]—**Postseptal f.** Of Owen, the narrow strip on the mesal surface of the occipital lobe just caudad of the postseptal fissure. [I, 14.]—**Postsylvian f.** See *Medifrontal* GYRUS.—**Prefrontal f.** Of Owen, that part of the superfrontal gyrus which forms the frontal extremity of the cerebrum. [I, 14.]—**Presylvian f.** Of Owen, an ill-defined area at the ventral end of the central fissure of the cerebrum. [I, 14.]—**Primary f.** A

THE UTERINE FOLDS OF THE PERITONÆUM.
a, the recto-vaginal fold; *b*, the vesico-uterine fold.

cerebral convolution formed by primary fissures. [L, 14 (a, 29).]—**Recto-uterine f's.** Lat., *plicæ recto-uterinæ* (seu *utero-rectales,* seu *semilunares Douglasii*), *ligamenta recto-uterina* (seu *utero-rectalia*), *retractores uteri* [Luschka]. Fr., *plis de Douglas.* Ger., *Douglas'sche Falten.* Syn.: *f's of Douglas, utero-sacral ligaments.* Two folds of peritonæum, one on each side, containing muscular tissue derived from the uterus, passing from the upper part of the cervix uteri to the neighborhood of the second sacral vertebra, and inclosing the rectum between them. [A, 22.]—**Recto-vaginal f.** See POUCH *of Douglas.*—**Recto-vesical f.** A f. formed by the peritonæum as it passes from the anterior wall of the rectum to the posterior wall of the bladder. [a, 29.]—**Secondary f.** Of Owen, see *Secondary* CONVOLUTION.—**Septal f.** Of Owen, the area of the cuneus which lies between his posthippocampal (calcarine) and septal fissures. [I, 14.]—**Subfalcial f.** Of Owen, the mesal surface of his ectorrhinal f. (*gyrus rectus*). [I, 14.]—**Subfrontal f.** See *Subfrontal* GYRUS.—**Suboccipital f.** See *Inferior occipital* CONVOLUTION.—**Subseptal f.** See *Subcollateral* GYRUS.—**Supercallosal f.** Of Owen, so much of the mesal aspect of the cerebrum as is bounded by the supercallosal and lateral fissures, excluding his marginal f. which is the dorsal part of the paracentral gyrus. [I, 14.]—**Superfrontal f.** See *Superfrontal* GYRUS.—**Superseptal f.** Of Owen, a portion of the cuneus between his septal and superseptal fissures. [I, 14.]—**Supersylvian f.** See *Angular* GYRUS.—**Suroccipital f.** Fr., *pli occipital moyen, second pli de passage externe.* Of Owen, a small annectant convolution lying posterior to the superior occipital. [I, 14 (K).]—**Sylvian f.** Fr., *circonvolution d'enceinte de la scissure de Sylvius, pli pariétal ascendant.* See *Supertemporal* GYRUS.—**Tail f.** See *Caudal f.*—**Tentorial f.** Fr., *pli temporal inférieur.* See *Middle occipito-temporal* CONVOLUTION.—**Umbilical f. of the blastoderm.** The umbilical constriction; a folding in of the blastoderm along the sides of the axile embryo, continuous with the cephalic f. above and the caudal below. [A, 5.]—**Vesico-uterine f's.** Lat., *plicæ vesico-uterinæ.* Fr., *replis vésico-utérins.* Two antero-posterior f's, one on each side, containing a few contractile fibres derived from the muscular tissue of the uterus, extending from that organ to the bladder. [A, 23.]—**Vestigial f. of the pericardium.** Of Marshall, a small f. of the serous membrane of the pericardium lying in front of the root of the left lung, marking the course of the left duct of Cuvier in the fœtus. [A, 5.]—**Visceral f's.** Thick f's in the throat of the embryo separated by the visceral or branchial clefts. [L, 201 (a, 29).]

FOLE-FOOT, n. Fol'fu⁴t. See FOAL-FOOT.

FOLESFOTH, n. Folz'fo²t. The *Nepeta glechoma.* [A, 505 (a, 21).]

FOLETTE (Fr.), n. Fo-le²t. 1. The *Atriplex hortensis.* [B, 121 (a, 24).] 2. A popular term for influenza. [A, 518.]

FOLGEERSCHEINUNG (Ger.), n. Fol'ge²-e²r-shin-u²n². See SEQUELA.

FOLGEND (Ger.), adj. Folg'e²nd. Consecutive. [L, 43.]

FOLHADEIRO (Port.), n. Fol-ya³-da'e-ro. In Madeira, the *Clethra arborea.* [B, 121 (a, 24).]

FOLIA (Lat.), n. n., pl. of *folium* (*q. v.*). Fol(fo²l)'i²-a³.

FOLIACEOUS, adj. Fol-i²-a'shu³s. Gr., φυλλώδης. Lat., *foliaceus* (from *folium*, a leaf). Fr., *foliacé.* Ger., *blattartig.* It., *fogliaceo.* Sp., *foliáceo.* Leafy; having the appearance, consistence, or color of a leaf. [B, 1, 123 (a, 24).]

FOLIAGE, n. Fol'i²-e²j. From *folium*, a leaf. Fr., *feuillage.* Ger., *Laubwerk.* The leaves of a plant considered collectively. [B, 116 (a, 24).]

FOLIAL, FOLIAR, adj's. Fol'i²-a²l, -a³r. Lat., *foliaris* (from *folium*, a leaf). Fr., *foliaire, folial.* Ger., *blattständig.* Consisting of or pertaining to a leaf or leaves. [B, 1, 121, 123 (a, 24).]

FOLIATE, FOLIATED, adj's. Fol'i²-at. Lat., *foliatus* (from *folium*, a leaf). Fr., *foliaté, feuillé.* Ger., *beblättert* (1st def.), *blättrig* (2d def.). 1. Clothed with leaves. [B, 1, 19, 123 (a, 24).] 2. Made up of leaf-like layers.

FOLIATION, n. Fol-i²-a'shu³n. Lat., *foliatio* (from *folium*, a leaf). Fr., *feuillaison, f.* Ger., *Belaubung.* It., *fogliame.* Sp., *foliación.* The act of leafing. [B, 1, 19, 123 (a, 24).]

FOLIE (Fr.), n. Fo-le. Insanity.—**F. acquise.** Insanity, occurring in the course of life, that has been preceded by a reasonable state of intelligence. [Voisin (a, 29).]—**F. à deux.** See *Communicated* INSANITY.—**F. à double forme** [Baillarger]. See *Circular* INSANITY.—**F. à formes alternes.** See *F. circulaire.*—**F. alcoolique.** See *Alcoholic* INSANITY.—**F. alléguée.** Delirium and hallucination from alcoholic intoxication. [a, 34.]—**F. alternante.** Of Falret, circular insanity in which the duration of each period is very brief. [a, 34.]—**F. ambitieuse.** Paranoia. [a, 34.]—**F. à quatre.** See DÉLIRE *à quatre.*—**F. à trois.** See DÉLIRE *à trois.*—**F. avec conscience.** That form of insanity in which the patent reflects upon his sensorial and psychical abnormities, and analyzes them, recognizing that they are abnormal. [Marandon de Montyel, "Arch. de neurol.," Sept., 1882, p. 1888.]—**F. brightique.** Of Dieulafoy, a mental disturbance due to uræmia, particularly when such disturbance is the chief or only noticeable symptom. ["Rev. méd. franç. et étrang.," July 18, 1885, p. 112.]—**F. cardiaque.** See *F. du cœur.*—**F. choréique.** Insanity in which there is incoherent delirium with maniacal excitement, and chorea. A second form, described by Marce, begins with hallucinations of sight, with extreme agitation, and an eventual condition simulating the delirum of fever. In a third form there are lypemania and delirium of persecution, with chorea. [a, 34.]—**F. circulaire.** See *Circular* INSANITY.—**F. communiquée.** See *Communicated* INSANITY.—**F. congénitale.** See *Congenital* INSANITY.—**F. congestive.** Of Baillarger, insanity due to encephalic congestion. [A, 301; L, 49.]—**F. convulsive.** See *F. choréique.*—**F. démonomaniaque.** See DÆMONOMANIA.—**F. de l'adolescence, F. de la puberté.** See INSANITY *of pubescence.*—**F. dépressive.** See LYPEMANIA.—**F. des actes.** See *Reasoning* MANIA.—**F. des Chinois.** See RADIX *soulin.*—**F. des dégénérés.** See *Hereditary* INSANITY.—**F. des femmes enceintes.** See *F. gravidique.*—**F. des femmes en couches.**

See *Puerperal* INSANITY.—**F. des grandeurs.** See DELIRIUM *grandiosum.*—**F. des ivrognes.** See DELIRIUM *tremens.*—**F. des nourrices.** See INSANITY *of lactation.*—**F. des nouvelles accouchées.** See *Puerperal* INSANITY.—**F. des persécutions.** Insanity in which there is the delusion of being persecuted. [a, 34.]—**F. diathésique.** Insanity caused by cerebral arterial congestion, with exudation or nuclear proliferation, in the dartrous, gouty, or rheumatic diathesis. [a, 34.]—**F. d'opposition.** A variety of insanity in which the patient obstinately refuses to do anything that he is asked to do. [Guislain, quoted by Cotard, "Arch. de neurol.," Sept., 1882, p. 152.]—**F. du cœur.** Insanity occurring in persons affected with heart disease. [a, 34.]—**F. du doute.** Ger., *Zweifelsucht.* Insanity, usually of a neurasthenic type, characterized by an inordinate desire to argue, speculate, and question upon ordinary matters, especially the personal concerns of the patient. [A, 326 (a, 21); D.]—**F. du doute avec délire du toucher.** Of Le Grand du Saulle, a form of *f. du doute* in which there are also tactile illusions. [D, 36.]—**F. du jeune age.** Insanity of children due to masturbation, intestinal worms, cranial trauma, terror, toxic agents, or imitation. [a, 34.]—**F. du suicide.** See *Suicidal* INSANITY.—**F. du toucher.** Of Falret, insanity in which there is fear of contact with external objects. [a, 34.]—**F. émotive.** See *Emotional* INSANITY. [a, 34.]—**F. épidémique.** See *Communicated* INSANITY.—**F. épileptique.** See *Epileptic* INSANITY.—**F. essentielle.** See *Idiopathic* INSANITY.—**F. extatique.** See ECSTASY.—**F. externe.** Any form of insanity in which the morbid mental manifestations are expansive, as in paranoia, and not concentrated in the person affected, as in lypemania. [a, 34.]—**F. gémellaire.** See INSANITY *of twins.*—**F. génitale.** Insanity due to genital irritation. [a, 34.]—**F. gravidique.** That form of puerperal insanity which comes on during pregnancy. [A, 15.]—**F. haschischique.** Insanity produced by the use of hasheesh. [Voisin (a, 18).]—**F. homicide.** See *Homicidal* INSANITY.—**F. hypochondriaque.** See *Hypochondriacal* INSANITY.—**F. hystérico-réligieuse.** See *Epidemic* CHOREA.—**F. hystérique.** See *Hysterical* INSANITY.—**F. idiopathique.** See *Idiopathic* INSANITY.—**F. imposée.** A division of *f. à deux* in which one insane person imposes his insane conceptions on another person morally and intellectually feebler than himself. [a, 34.]—**F. impulsive.** See *Emotional* INSANITY.—**F. inflammatoire.** See *F. congestive.*—**F. instantanée.** See *F. transitoire.*—**F. instinctive.** See *Hereditary* INSANITY.—**F. intermittente.** See *Periodical* INSANITY.—**F. lucide.** See *Reasoning* MANIA.—**F. lypémaniaque.** See LYPEMANIA.—**F. menstruelle.** See *Menstrual* INSANITY.—**F. morale.** See *Moral* INSANITY.—**F. morphologique.** See *Congenital* INSANITY.—**F. musculaire.** See INSANITY *of the muscles.*—**F. native.** Insanity in which the intellectual troubles appear at an early age, especially in consequence of hereditary insanity. [Voisin (a, 34).]—**F. neuropathique.** Of Ball, f. secondaire. [a, 34.]—**F. nicotinique.** Mania from the excessive use of tobacco. [Voisin (a, 18).]—**F. paludéenne.** Of Erhardt, insanity ascribed to malarial poisoning. [a, 34.]—**F. paralytique.** The general paralysis of the insane. [D.]—**F. paralytique circulaire à double phase.** See *Circular* INSANITY.—**F. par athérome.** An insanity from anæmia in consequence of an atheromatous condition of the blood-vessels. [a, 34.]—**F. par imitation.** See *Communicated* INSANITY.—**F. par intoxication.** See *Toxic* INSANITY.—**F. parturéale.** Of Voisin, puerperal insanity. [a, 34.]—**F. passagère.** Transitory insanity; of Krafft-Ebing, a generic term for somnambulism, alcoholic or narcotic intoxication, lypemania, and puerperal mania. [a, 34.]—**F. pénitentiaire.** Insanity caused by isolated confinement in a penitentiary. [a, 34.]—**F. périodique.** See *Menstrual* INSANITY.—**F. post-connubiale.** Mania from excitement attending loss of virginity; it occurs in young married women immediately after their marriage. A similar form is observed after rape. [a, 34.]—**F. primitive.** See *Idiopathic* INSANITY.—**F. pubérale.** See INSANITY *of pubescence.*—**F. puerpérale.** See *Puerperal* INSANITY.—**F. raisonnante.** See *Reasoning* MANIA.—**F. religieuse.** Religious insanity, including theomania and dæmonomania. [a, 34.]—**F. rhumatismale.** Lypemania and hypochondriasis, with or without hallucinations, occurring in a patient suffering with acute articular rheumatism. [a, 34.]—**F. saturnine.** Mania, first described by Stoll, occurring in persons poisoned by lead. [a, 34.]—**F. secondaire.** Insanity following a disease affecting the nervous system, such as epilepsy, hysteria, typhoid fever, etc. [a, 34.]—**F. sensorielle.** Insanity following hyperæsthesia or irritation of the sensory nerves; the form may be either hypochondriacal, maniacal, or hallucinatory. [a, 34.]—**F. simple.** Simple insanity. [a, 34.]—**F. simulée.** See *Feigned* INSANITY.—**F. simultanée.** A division of *f. à deux* in which two cases of insanity occur at the same time in the same family. ["Jour. of Nerv. and Ment. Dis." (a, 34).]—**F. sympathique.** See *Sympathetic* INSANITY.—**F. systématique (ou systématisée).** See PARANOIA.—**F. toxique.** See *Toxic* INSANITY.—**F. transitoire au moment de l'accouchement.** A form of maniacal delirium, of brief duration, sometimes seen in women at the time that the child's head is expelled; supposed to be due to the intensity of the pain.—**F. utérine.** 1. Insanity dependent on uterine disease. [A, 385.] 2. See NYMPHOMANIA.—**F. vaniteuse** [Arnold]. See AMENOMANIA.—**F. vésanique.** See *Idiopathic* INSANITY.

FOLIÉ (Fr.), adj. Fo-le-a. See FOLIACEOUS.

FOLIICOLUS (Lat.), adj. Fol(fo^{2}l)-i^2-i^{2}k'ol(o^{2}l)-u^{3}s(u^{4}s). From *folium*, a leaf, and *colere*, to inhabit. Fr., *folliicole.* Ger., *blattbewohnend.* Of insects, living on leaves. [L, 180.]

FOLIIFEROUS, adj. Fol-i^2-i^{2}f'e^{2}r-u^{3}s. Lat., *foliiferus* (from *folium*, a leaf, and *ferre*, to bear). Fr., *foliifère.* Ger., *blättertragend.* Bearing or producing leaves only (said of buds). [B, 1, 19, 123 (a, 24).]

FOLIIFORMIS (Lat.), adj. Fol(fo^{2}l)-i^2-i^2-fo^{2}rm'i^{2}s. From *folium*, a leaf, and *forma*, figure. Fr., *foliiforme.* Ger., *blattförmig.* Having the figure of a leaf. [L, 43.]

FOLIIPAROUS, adj. Fol-i^2-i^{2}p'a^{3}r-u^{3}s. Lat., *foliiparus.* Fr., *foliipare.* See FOLIIFEROUS.

FO-LIM (Chin.), n. The *Polyporus tuberaster.* [B, 121 (a, 24).]

FOLIOLA (Lat.), n. f. Fol(fo^{2}l)-i(i^2)'ol(o^{2}l)-a^3. See FOLIOLE.

FOLIOLAR, adj. Fol'i^2-ol-a^{3}r. Lat., *foliolaris.* Fr., *foliolaire.* Of or pertaining to folioles or leaflets at the base. See STIPEL. [B, 1 (a, 24).]

FOLIOLATE, adj. Fo'li^2-o-lat. Lat., *foliolatus.* Fr., *foliolé.* Ger., *blättrig.* Having folioles or leaflets (see BIFOLIOLATE and TRIFOLIOLATE). [B, 1, 123 (a, 24).]

FOLIOLE, n. Fol'i^2-ol. Lat., *foliola, foliolum* (from *folium*, a leaf). Fr., *f.* Ger., *Blättchen.* 1. A leaflet; one of the divisions of a compound leaf. 2. A sepal, petal, etc. [B, 1, 19, 123 (a, 24).]—**F's of the cerebellum.** The subdivisions of the convolutions of the cerebellum in the form of leaves. [L, 55 (a, 29).]—**F's of the diaphragm.** The leaflets of the central tendon of the diaphragm. [L, 55 (a, 29).]

FOLIOLEL, n. Fo'li^2-o-le^{2}l. Lat., *foliolellum* (dim. of *folium*, a leaf). A leaf smaller than a foliole, *i. e.*, a stipule. [a, 24.]

FOLIOLELLULE, n. Fo-li^2-o-le^{2}l'u^{2}l. Lat., *foliolellulum.* A leaf smaller than a foliolel, *i. e.*, a stipel. [a, 24.]

FOLIOLELLUM (Lat.), n. n. Fol(fo^{2}l)-i^2-ol(o^{2}l)-e^{2}l'u^{3}m(u^{4}m). See FOLIOLEL.

FOLIOLIFEROUS, adj. Fo-li^2-o-li^{2}f'e^{2}r-u^{3}s. Lat., *folioliferus* (from *folium*, a leaf, and *ferre*, to bear). Ger., *blättchentragend.* Bearing folioles or leaflets. [a, 24.]

FOLIOLOSE, adj. Fol'i^2-o-los. Lat., *foliolosus.* Bearing numerous leaflets. [a, 24.]

FOLIONEANUS (Lat.), n. m. Fol(fo^{2}l)-i^2-on-e^2-an(a^{3}n)'u^{3}s(u^{4}s). Fr., *folionéen.* Of Mirbel, the spine at the end of a foliole (as in *Chamærops humilis*). [B, 1 (a, 24).]

FOLIOSE, adj. Fol'i^2-os. Lat., *foliosus* (from *folium*, a leaf). Fr., *feuillé.* Ger., *blattreich.* Leafy, abounding in leaves. The *Foliosæ* of Reichenbach were a series (subsequently a formation) of the *Venosæ*, consisting of the *Aristolochieæ*, *Euphorbiaceæ*, *Laurineæ*, and *Nyctagineæ.* [B, 1, 123, 170 (a, 24).]

FOLIUM (Lat.), n. n. Fol(fo^{2}l)'i^2-u^{3}m(u^{4}m). Gr., *φύλλον.* Fr., *feuille.* Ger., *Blatt.* It., *foglia.* Sp., *hoja.* 1. A leaf or sheet. 2. An old name for the philosopher's stone. 3. The anterior fontanelle. 4. Of Arnoldus de Villanova, the relaxed uvula. [A, 325.] 5. Of Wilder, a lamina of the cerebellum. [I, 98.]—**F. accessorium.** Of Swartz, the amphigastrium (stipules) of the *Hepaticæ.* [B, 198.]—**Folia alexandrina.** See SENNA *alexandrina.*—**F. cacuminis (cerebelli).** A small lamina at the posterior extremity of the superior vermiform process. [I, 6 (K).]—**F. carpicum.** See CARPEL.—**F. centrale (cerebelli).** The central lobe of the cerebellum. [K.]—**Folia cerebelli.** See LAMINÆ *of the cerebellum.*—**Folia filii ante patrem.** The leaves of *Tussilago farfara.* [B, 180 (a, 24).]—**Folia indica.** See *Folia* MALABATHRI.—**Folia involventia.** Fr., *feuilles en berceau.* The three folioles of a compound leaf, which at night fold together and envelop the flower. [B, 1 (a, 24).—**Folia malabarica.** See *Folia* MALABATHRI.—**Folia of the cerebellar lobes.** See *Folia cerebelli.*—**Folia orientalia.** Senna-leaves. [B, 180 (a, 24).]—**Folia quercina.** The leaves of *Quercus robur.* [B, 180 (a, 24).]—**F. supralunare (cerebelli).** See *Anterior crescentic* LOBE *of the cerebellum.*

FOLLET (Fr.), adj. Fo^{2}l-la. Fugacious; of hair, lanuginous. [A, 301, 385.]

FOLLETTE (Fr.), n. Fo^{2}l-le^{2}t. 1. An epidermic catarrh or bronchitis, frequently accompanied by pneumonia, which was at one time prevalent in Europe. [L, 41.] 2. See FOLETTE (2d def.).

FOLLICARIUM (Lat.), n. n. Fo^{2}l-li^2-ka(ka^3)'ri^2-u^{3}m(u^{4}m). Fr., *follicaire.* A fruit composed of two distinct follicles. [A, 385.]

FOLLICETUM (Lat.), n. n. Fo^{2}l-i^2-set(kat)'u^{3}m(u^{4}m). Of Dumortier, see FOLLICULODIUM. [Gray (a, 24).]

FOLLICLE, n. Fo^{2}l'i^2-k'l. Gr., *φυσημάτιον.* Lat., *folliculus* (dim. of *follis*, a pair of bellows). Fr., *follicule.* Ger., *Follikel* (1st def.), *Balg* (1st def.), *Schlauch* (1st def.), *Balgfrucht* (2d def.), *Balgkarpell* (2d def.). 1. A simple sacciform crypt or gland. [A, 301.] 2. A dry monocarpellary, unilocular, many-seeded fruit, dehiscing usually by the ventral suture. [B, 77 (a, 24).]—**Aggregate f's.** Lat., *folliculi aggregati.* See *Aggregate* GLANDS.—**Agminate f's, Agminated f's.** Lat., *folliculi agminati.* See *Agminated* GLANDS.—**Ciliary f's.** See *Meibomian* GLANDS.—**Closed f's.** Fr., *follicules clos.* The solitary and agminated glands of the small intestine. [a, 29.]—**Dental f.** Lat., *folliculus dentium.* Fr., *follicule dentaire.* Ger., *Zahnsäckchen.* 1. The connective tissue, blood, and lymph-vessels which surround and form a kind of sac for a developing tooth. 2. An embryonic tooth, with all its parts. [J, 30, 33, 35.]—**Double f's.** See BIFOLLICULUS.—**Feather-f.** A small closed f. derived from the derma, from which a bird's feather is developed. It consists of two layers separated from each other by fine granular matter, the most external consisting of several layers of nucleated epithelial cells and the inner of a gelatinous substance. [L, 121, 221.]—**F. of De Graaf.** See *Graafian* VESICLE.—**F's of Lieberkühn.** See CRYPTS *of Lieberkühn.*—**F's of Littre.** See GLANDS *of Littre.*—**F's of Peyer.** See *Peyer's* GLANDS.—**Gastric f's.** See *Gastric* GLANDS.—**Glandular f's of the urethra.** Clusters of minute f's opening on the free surface of the mucous membrane of the urethra or into the sinuses of Morgagni. [a, 29.]—**Glomerular f's.** Fr., *follicules enroulés.* F's the ducts of which follow a spiral course. [L, 55 (a, 29).]—**Graafian f.** See *Graafian* VESICLE.—**Hair-f.** Lat., *folliculus pili.* Fr., *follicule pileux.* Ger., *Haarfollikel, Haarbalg, Haartasche.* A recess or cavity in the skin which contains the root or implanted part of a hair. In the case of coarse hairs it extends through all the layers of the skin into the subcutaneous tis-

sue. [J. 30, 32.]—**Lieberkühnian f's, Lieberkühn's f's.** See CRYPTS *of Lieberkühn.*—**Lymphatic f's, Lymph f's.** See *Lymphatic* GLANDS.—**Malpighian f's.** See *Malpighian* CORPUSCLES (1st and 2d def's).—**Mucous f's.** Small glands which secrete mucus, situated in mucous membranes. [*a*, 29.]—**Nabothian f's.** Lat., *ovula Nabothi.* Fr., *glandes de Naboth.* Pathological vesicles of various sizes, but visible to the naked eye, imbedded in the mucous membrane of the canal of the cervix uteri, perhaps arising from closed and distended follicles. [A, 23.]—**Nail f.** The fold of the matrix which embraces the root of the nail. [*a*, 29.]—**Ovarian f.** See *Graafian* VESICLE.—**Palpebral f's.** See *Meibomian* GLANDS.—**Peyerian f's, Peyer's f's.** See *Peyer's* GLANDS.—**Secreting f.** A f. producing a distinct fluid, such as a gastric f. as distinguished from one giving rise to some structures, such as the dental or hair f. [G.]—**Sebaceous f's.** See *Sebaceous* GLANDS.—**Simple f.** The solitary glands of the small intestine. [*a*, 29.]—**Solitary f's.** See *Solitary* GLANDS.—**Splenic f's.** See *Malpighian* CORPUSCLES (3d def.).—**Sudoriparous f's.** See *Sudoriparous* GLANDS.—**Synovial f.** See BURSA *mucosa.*—**Tooth-f.** See *Dental f.*

FOLLICULAR, adj. Fo^{2}l-i^{2}k'u^{2}-la^{3}r. Lat., *follicularis, folliculosus.* Fr., *folliculaire, folliculeux.* Ger., *folliculär.* Pertaining to follicles or their contents. [J.] Cf. ADENOID

FOLLICULATE, FOLLICULATED, adj's. Fo^{2}l-i^{2}k'u^{2}-lat, -e^{2}d. Possessing follicles. [J.]

FOLLICULE (Fr.), n. Fo-le-ku^{6}l. See FOLLICLE.—**F's agminés.** See *Agminate* GLANDS.—**F's d'Alep.** See *F's de Tripoli.*—**F. de de Graaf.** See *Graafian* VESICLE.—**F's de la palte, F's de Moka, F's de sené de Syrie, F's de Tripoli.** The seeds of *Cassia acutifolia.* [B, 173 (*a*, 24).]—**F's droits.** Follicles the ducts of which pursue a direct course. [*a*, 29.]—**F's du canal auditif externes.** The small glands in the skin of the external auditory canal which secrete the cerumen. [F.]—**F's gastriques.** See GASTRIC *glands.*—**F. pileux.** See *Hair*-FOLLICLE.—**F. plumeux.** See *Feather*-FOLLICLE.—**F's préuréthraux.** Skene's glands.—**F's muqueux.** See *Mucous* GLANDS.—**F's sébaeés.** See *Sebaceous* GLANDS.

FOLLICULIFORM, adj. Fo^{2}l-i-ku^{2}l'i^{2}-fo^{2}rm. Lat., *folliculiformis* (from *folliculus.* a small bag, and *forma.* form). Fr., *folliculiforme.* Ger., *balgfruchtförmig.* Pod-shaped (said of capsules when formed of a single valve). [B, 1 (*a*, 24).]

FOLLICULITIS (Lat.), n. f. Fol(fo^{2}l)-i^{2}k-u^{2}l(u^{4}l)-i(e)'ti^{2}s. Gen., *-it'idos* (*-is*). From *folliculus,* a small bag (see also *-itis**). Fr., *folliculite.* Ger., *Follikelentzündung.* Inflammation of a follicle or of the follicles of a part.—**Chancrous f.** Fr., *folliculite chancreuse.* Infection of the mouth of a follicle by syphilitic virus, with submucous inflammation and suppuration. [*a*, 34.]—**F. abscedens infantum.** The follicular furunculosis of children. [A, 326 (*a*, 21).]—**F. barbæ** [Köbner]. See SYCOSIS.—**F. blennorrhagica.** Ger., *blennorrhagische Follikelentzündung.* An extension of gonorrhœal inflammation from the mucous membrane of the urethra to the cavities of the follicles of Morgagni ; it is characterized by a persistent gleety discharge and occasional suppuration of the follicles. [*a*, 34.]—**F. decalvans, F. epilatoria.** Fr., *folliculite décalvante* (ou *épilante*), *alopécie innominée* [Besnier], *acné décalvante* [Lailler]. An inflammatory disease of the hair-follicles attended with destruction of the hairs and atrophy or cicatrization of the skin. Brocq describes four forms: 1. *Pseudo-pelade,* in which the inflammation is very slight, the hairs are easily pulled out, and the skin becomes atrophic. 2. The *folliculite des régions velues* of Quinquaud, in which little pustules form at the bases of the hairs, which are destroyed, and the skin becomes atrophic. The disease occurs in patches. According to Quinquaud, it is due to the presence of micrococci in both the follicles and the blood-vessels of the affected parts. Lailler calls this form *acné décalvante.* 3. The *sycosis lupoïde* of Brocq ; a form similar to the second, but severer, with more pustulation and cicatrization. 4. The dermatitis papillaris capillitii of Kaposi. [Quinquaud, "Bull. de la soc. méd. des hôp.," Aug., 1888, cited in "Ann. de derm. et de syph.," ix, 1888, p. 656 (G) ; "Ann. de derm et de syph.," x, 1889, pp. 99, 467 (G).]—**F. epilatoria.** See *F.*—**F. of the beard.** See SYCOSIS.—**F. sebacea.** Acne. [G.]—**Syphilitic f.** Inflammation of mucous follicles caused by syphilitic infection ; the symptoms are the same as those of ordinary f. [*a*, 34.]—**Vulvar f.** Fr., *folliculite vulvaire* [Huguier]. An inflammation of the sebaceous glands of the vulva occurring during pregnancy, apparently in consequence of venous stasis, characterized by granular elevations of the enlarged follicles. There are itching, burning, and a thin muco-purulent discharge. [*a*, 34.]—**Urethral f.** Fr., *folliculite uréthrale.* A rare affection caused by an inflammation of the follicles of Morgagni, in consequence of urethral irritation from sexual or local excitement. The follicles enlarge, and a thin muco-purulent discharge occurs. [*a*, 34.]

FOLLICULODIUM (Lat.), n. n. Fol(fo^{2}l)-i^{2}k-u^{2}(u)-lod'i^{2}-u^{3}m-(u^{4}m). From *folliculus,* a little bag. Fr., *folliculode.* Ger., *Balgkapselkranz.* Syn.: *follicetum.* Of Agardh, a fruit composed of many follicles. [L, 116.]

FOLLICULOSIS (Lat.), n. f. Fol(fo^{2}l)-i^{2}k-u^{2}l(u^{4}l)-o'si^{2}s. Gen., *-os'eos* (*-is*). A follicular disease. [G.]

FOLLICULOUS, adj. Fo^{2}l-i^{2}k'u^{2}-lu^{3}s. Lat., *folliculosus.* Fr., *folliculeux.* See FOLLICULAR.

FOLLICULUS (Lat.), n. n. Fol(fo^{2}l)-li^{2}k'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). See FOLLICLE ; of Monti, the terminal appendage to the leaves of the genus *Aldrovandia.* [B, 121 (*a*, 21).]—**Folliculi aeris.** See *Air*-CELLS.—**Folliculi aggregati.** See *Aggregate* GLANDS.—**Folliculi agminati.** See *Agminated* GLANDS.—**F. bombycis.** A cocoon. [L, 180.]—**Folliculi ciliares.** A term sometimes used to designate the Meibomian ducts or glands in the eyelids. [F.]—**F. dentis.** See *Dental* FOLLICLE.—**F. fellis.** The gall-bladder. [L, 43.]—**F. graafianus, F. Graafii, F. ovarius.** See *Graafian* VESICLE.—**Folliculi mucosi.** See *Mucous* FOLLICLES.—**F. pili.** See *Hair*-FOLLICLE.—**Folliculi sanguinis.** See BLOOD-CORPUSCLES.—**Folliculi sebacei.** See *Sebaceous* GLANDS.—**Folliculi sennæ.** The pods of *Senna alexandrina* and other species of *Senna.* [B, 180 (*a*, 24).]—**F. serici.** See *F. bombycis.* [B, 180 (*a*, 24).]—**Folliculi solitarii (seu sporades).** See *Peyer's* GLANDS.

FOLLIKEL (Ger.), n. Fo^{2}l'li^{2}k-e^{2}l. A follicle.—**Byssusf'.** See *Byssus* GLAND.—**Eistockf', Eierstocks-F., Eif'.** See *Graafian* VESICLE.—**Geschlechtsdrüsenf'n.** Follicles of the sexual glands, especially of the tubular ovary of many invertebrates. ["Arch. f. Anat. u. Phys.," 1837, p. 171 (J).]—**Graaf'sche F.** See *Graafian* VESICLE.—**Haarf'.** See *Hair*-FOLLICLE.—**Malpighi'sche F.** See *Malpighian* CORPUSCLE.—**Ovarial F.** See *Graafian* VESICLE.—**Peyer'sche F'n.** See *Peyer's* GLANDS.—**Pigmentf'.** A pigment-producing follicle. [*a*, 29.]—**Schleimf'.** See *Mucous* GLAND.—**Solitärstehende Lymphf'n.** See *Solitary* GLANDS.

FOLLIS (Lat.), n. m. Fo^{2}l'li^{2}s. Gen., *foll'is.* A bag. [A, 325.]

FOMENT (Ger.), n. Fo-me^{2}nt'. See FOMENTATION.

FOMENTARIUM (Lat.), n. n. Fo-me^{2}nt-a(a^{3})'ri^{2}-u^{3}m(u^{4}m). From *fomentare,* to foment. A tribe of the *Lycoperdaceæ,* the species of which furnish a kind of amadou. [B, 121 (*a*, 24).]

FOMENTATIO (Lat.), n. f. Fo-me^{2}n-ta(ta^{3})'shi^{2}(ti^{2})-o. Gen., *-on'is.* See FOMENTATION.—**F. aromatica.** See FOMENTATION *aromatique.*—**F. emolliens.** See FOTUS *emolliens.*—**F. frigida** [Russ. Ph.]. See FOTUS *refrigerans Schmuckeri.*

FOMENTATION, n. Fo-me^{2}n-ta'shu^{3}n. Lat., *fomentatio* (from *fomentare,* to foment), *fomentum, fotus* (2d def.) (from *fovere,* to keep warm). Fr., *f.* Ger., *F., Umschlag, Bähungsmittel* (2d def.). 1. The application of a liquid, usually warmed, to the surface of the body, either on sponges or on cloths. 2. A liquid designed for application in this way. [B.]—**Common f.** See FOMENTUM *discutiens.*—**Dry f.** Fr., *f. sèche.* See FOMENTUM *siccum.*—**F. anthelminthique** (Fr.). A preparation made by heating 4 parts each of aloes and colocynth and 15 each of garlic, santonica, tops of absinthium, savine, and tansy, with 2,000 parts of water. [B, 93 (*a*, 14).]—**F. antinévralgique de Trousseau** (Fr.). A 1-to-100 aqueous solution of potassium cyanide. [L, 41 (*a*, 14).]—**F. antiseptique** (Fr.). A mixture of 1,000 parts of decoction of yellow cinchona, 15 of tincture of cinchona, and 8 of camphor dissolved in alcohol. [L, 41 (*a*, 14).]—**F. aromatique** [Fr. Cod.] (Fr.). Lat., *fotus aromaticus.* 1. Of the Fr. Cod., an infusion of species aromaticæ. 2. An infusion of equal parts of absinthium, laurel, and rosemary leaves. [B, 93, 113 (*a*, 14).]—**F. astringente** (Fr.). 1. Of the Dutch Ph. (Niemann's Notes), a solution of 1 part of camphor, 4 parts of sugar, and 8 of iron sulphate in 384 parts of water. [B, 119 (*a*, 14).] 2. Of the Hamb. Ph., 1804, see LOTIO *saturnina.*—**F. astringente alunée** [Dan. Mil. Ph., 1808] (Fr.). A preparation made by boiling 16 parts of oak-bark in 288 of water until reduced to one half, expressing, and adding 3 parts of alum. [B, 119 (*a*, 14).]—**F. calmante** [Dutch Ph., Niemann's Notes, 1812] (Fr.). A mixture of 1 part of tincture of opium and 2 parts of oil of amber. [B, 119 (*a*, 14).]—**F. carminative** [Dan. Mil. Ph., 1808, Palat. Disp., 1764]. 1. An infusion of *species vulnerariæ* [Dan. Mil. Ph.]. 2. An infusion of *species carminativæ,* containing cumin, caraway, and fennel seeds, and a little alcohol [Palat. Disp., 1764]. [B, 119 (*a*, 14).]—**F. contre la gangrène** (Fr.). See LIQUOR *ad gangrœnam.*—**F. discussive** (Fr.). See FOTUS *discutiens.*—**F. diurétique** [Palat. Disp., 1764] (Fr.). 1. A preparation made by boiling 12 parts of species diureticæ in 144 of water until reduced to 96, and dissolving in the liquid 1 part of ammonium chloride and 3 parts of common soap [Palat. Disp., 1764]. 2. A preparation made by boiling 12 parts of parietaria in 200 of water, and adding 3 parts of tincture of squills. [B, 93, 119 (*a*, 14).]—**F. émolliente** [Fr. Cod.] (Fr.). See FOTUS *emolliens.*—**F. emménagogue** (Fr.). See FOTUS *emmenagogus.*—**F. excitante** (Fr.). See *Stimulant f.*—**F. humide** (Fr.). A moist f. [L, 41 (*a*, 14).]—**F's huileuses** (Fr.). Compresses moistened with olive-oil, oil of sweet almonds, etc. [L, 49 (*a*, 14).]—**F. mercurielle** (Fr.). A weak solution of corrosive sublimate perfumed with oil of lavender. [L, 4 (*a*, 14).]—**F. narcotique** (Fr.). See FOTUS *narcoticus.*—**F. nitrique.** See FOTUS *nitricum.*—**F. réfrigérante de Schmucker.** See FOTUS *refrigerans Schmuckeri.*—**F. résolutive** (Fr.). 1. Of the Disp. fuld., 1791, a mixture of 1 part of sulphuric acid, 3 parts of diluted alcohol, and 24 of solution of subacetate of lead. 2. Of the Fr. Cod., 1832, an infusion of 12 grammes of the flowers of *Sambucus nigra* in 1 litre of boiling water. 3. A term for numerous fluid preparations having ammonium chloride as a base. [B, 119 (*a*, 14); L.]—**F. résolutive de Trampel** [Dutch Ph., 1811, Niemann's Notes] (Fr.). A preparation made by boiling 1 part of bryonia-root in 48 parts of water, straining, and adding to the product an equal quantity of vinegar and as much sodium chloride as will dissolve. [B, 119 (*a*, 14).]—**F. sèche** (Fr.). See FOMENTUM *siccum.*—**F. sinapisée** (Fr.). An infusion of 1 part of powdered mustard-seed in 4 parts of warm water. [L, 41 (*a*, 14).]—**F. vinaigrée** (Fr.). A solution of 250 grammes of vinegar in 1 litre of cold water. [L, 41 (*a*, 14).]—**F. vineuse** (Fr.). A solution of 125 grammes of white honey in 1 litre of red wine. [L, 41, 49 (*a*, 14).]—**Stimulant f.** Fr., *f. excitante.* A mixture of 75 parts of spirit of camphor (containing 3 parts of camphor dissolved in 72 of brandy) and 45 of vinegar. [Sp. Ph., 1798 (B, 97, 119).]

FOMENTUM (Lat.), n. n. Fo-me^{2}nt'u^{3}m(u^{4}m). See FOMENTATION.—**F. commune, F. discutiens.** Syn.: *liquor discutiens.* A preparation of the old pharmacopœias, containing vinegar, alcohol, camphor, and honey. [B, 97 (*a*, 14).] Cf. FOTUS *refrigerans Schmuckeri.*—**F. emolliens.** See FOTUS *emolliens.*—**F. nitricum.** Fr., *fomentation nitrique.* A solution of 1 part of nitric acid in 96 parts of distilled water ; used in the treatment of putrid ulcers and scabies. [B, 119 (*a*, 14).]—**F. Schmuckeri.** See FOTUS *refrigerans Schmuckeri.*—**F. siccum.** A solid medicinal substance designed for external application ; usually inclosed in a sacculus. [B, 270.] Cf. SACCULUS *medicatus.*

FOMES (Lat.), n. m. Fom′ez(as). Gen., *fom′itis.* From *fovere*, to keep warm. Gr., *ἔναυσμα, ζώπυρον.* Fr., *foyer d'infection.* Ger., *Heerd.* Lit., fuel; any inanimate substance (*e. g.*, clothing or an article of merchandise) to which contagious or infectious matter has adhered. Generally used in the pl., *fomites.* [D, 5.]—**F. morbi.** The exciting cause of disease. [*a*, 34.]—**F. ventriculi.** Hypochondriasis of nervous irritability due to dyspepsia. [*a*, 34.]

FONCAUDE (Fr.), n. Fo^{2}n^2-kod. A place in the department of Hérault, France, where there is a gaseous spring containing calcium carbonate and sodium chloride. [L, 41, 105 (*a*, 14).]

FONCIRQUE (Fr.), n. Fo^{2}n^2-serk. A place in the department of Ariége, France, where is an alkaline and ferruginous spring. [L, 41, 49, 87 (*a*, 14).]

FONCTION (Fr.), n. Fo^{2}n^{2}k-se-o^{2}n^2. See FUNCTION.

FONCTIONNALITÉ (Fr.), n. Fo^{2}n^{2}k-se-o^{2}n-na^3-le-ta. Functional activity. [A, 385.]

FONCTIONNEL (Fr.), adj. Fo^{2}n^{2}k-se-o^{2}n-ne^{2}l. See FUNCTIONAL.

FONCTIONNEMENT (Fr.), n. Fo^{2}n^{2}k-se-on-ma^{3}n^2. Functional action. [A, 385.]

FOND (Fr.), n. Fo^{2}n^2. See FUNDUS.

FONDAMENTAL (Fr.), adj. Fo^{2}n-da^3-ma^{3}n^2-ta^{3}l. See FUNDAMENTAL.

FONDANT (Fr.), adj. and n. Fo^{2}n^2-da^{3}n^2. 1. Of remedies, having the supposed property of removing obstructions by the liquefaction of inspissated or coagulated fluids. 2. See FLUX (2d def.). 3. In veterinary medicine, alterative. [L, 41, 43 (*a*, 14).]—**F's arsénicaux.** In veterinary medicine, alteratives containing arsenious acid. [L, 41 (*a*, 14).]—**F. de Rotrou.** Antimonium diaphoreticum non ablutum. [B, 119.]—**F. de Ruhland.** Nitrum antimoniatum. [B, 119.]—**F's iodurés.** In veterinary medicine, alteratives containing iodine. [L, 41 (*a*, 14).]—**F's mercurieux.** In veterinary medicine, alteratives containing mercury. [L, 41 (*a*, 14).]

FONDEMENT (Fr.), n. Fo^{2}n^{2}d-ma^{3}n^2. See ANUS—**F. clos.** See *Imperforate* ANUS.

FONFRÈDE (Fr.), n. Fo^{2}n^2-fre^{2}d. A place in the department of Lot-et-Garonne, France, where there is a gaseous and slightly chalybeate spring, containing also magnesium and calcium bicarbonates. [L, 49, 87 (*a*, 14)].

FONGA (It.), n. Fo^{2}n^2′ga^3. A place in Tuscany where there is an alkaline spring. [L, 49.]

FONGICOLE (Fr.), adj. Fo^{2}n^2-zhe-kol. See FUNGICOLOUS.

FONGIFORME (Fr.), adj. Fo^{2}n^2-zhe-form. See FUNGIFORM.

FONGINE (Fr.), n. Fo^{2}n^2-zhen. See FUNGIN.

FONGIQUE (Fr.), adj. Fo^{2}n^2-zhek. Of or pertaining to *Fungi*, fungic. [B, 121.]

FONGIVORE (Fr.), adj. Fo^{2}n^2-zhe-vor. See FUNGIVOROUS; as a n., in the pl., *f's*, a group of the *Coleoptera* so characterized. [L, 41, 203.]

FONGOÏDE (Fr.), adj. Fo^{2}n^2-go-ed. See MYCOID.

FONGOSITÉ (Fr.), n. Fo^{2}n^2-go-se-ta. See FUNGOSITY.

FONGUEUX (Fr.), adj. Fo^{2}n^2-gu^5. See FUNGOUS.

FONGUS (Fr.), n. Fo^{2}n^2-gu^{6}s. See *Fungus.*—**F. articulaire.** See *Fungous* ARTHRITIS.—**F. de la dure-mère.** A tumor, generally cancerous, more rarely sarcomatous, developed in the dura, particularly in the external layers, often very voluminous, perforating the bone of the cranium, and manifesting itself on the exterior in the form of a fungus. [L, 49 (*a*, 21).]—**F. de l'ombilic.** See *Fungous* EXCRESCENCE *of the umbilicus.*—**F. hématode, F. médullaire.** See FUNGUS *hœmatodes.*

FONS (Lat.), n. m. Fo^{2}nz(fo^{2}ns). Gen., *font′is.* Gr., *χεῦμα, πηγή.* Fr., *source.* Ger., *Quell.* A fountain, spring, well, or source.—**F. lacrimarum.** The inner canthus of the eye. [F.]—**F. chirurgicus.** A stock of surgical supplies. [A, 325.]—**F. chymiæ.** An old name for mercury. [A, 325.]—**F. diæteticus.** A stock of nutritive supplies. [A, 325.]—**F. medicatus.** A medicinal spring. [A, 316.]—**F. pharmaceuticus.** A stock of drugs. [A, 325.]—**F. philosophorum.** Of the alchemists, a water-bath. [Ruland, Johnson (A, 325).]—**F. pulsans, F. pulsatilis.** The anterior fontanelle. [A, 325.]—**F. salutaris.** See *F. medicatus.*—**Fontes signorum.** An old term for the data on which the signs of health and of disease were founded. [A, 325.]—**F. soteris, F. soteros.** See *F. medicatus.*—**F. vitalis.** See *Respiratory* CENTRE.

FONSANCHE (Fr.), n. Fo^{2}n-sa^{3}n^{2}sh. A place in the department of Gard, France, where there is a feebly sulphurous spring. [A, 518.]

FONTAINE (Fr.), n. Fo^{2}n^2-te^{2}n. From *fons*, a spring. 1. A fountain. 2. An old term for the anterior fontanelle, together with the frontal suture; so called, says Mauriceau, because it is the softest and most moist part, and is the last to dry and solidify. [A, 44.] 3. An issue. 4. A cautery. [A, 301.]—**F.-Bonneleau.** A place in the department of the Oise, France, where there is an alkaline spring. [A, 385.]—**F. de la tête.** See *F.* (2d def.).—**F. de Médicis.** See DENIS-SUR-LOIRE.—**F. des oiseaux.** The *Dipsacus fullonum.* [B, 121, 173 (*a*, 24).]—**F. intermittente.** A spring that ceases to flow at certain times. [A, 301.]—**F.-sous-Cateau.** See *F.-Bonneleau.*

FONTAINEA (Lat.), n. f. Fo^{2}n-tan′e^2-a^3. Of Heckel, a genus of the *Euphorbiaceæ.* [B, 46 (*a*, 14); B. 245.]—**F. Pancheri.** A small tree found only in New Caledonia. The seeds contain a drastic purgative oil, without emetic properties; used externally as a vesicant. [B, 46 (*a*, 14).]

FONTALE ACETOSUM [Paracelsus] (Lat.), n. n. Fo^{2}nt-a(a^3)′-le(la) a^{2}s(a^{3}k)-e^{2}t(at)-os′u^{3}m(u^{4}m). See ACIDULÆ.

FONTANEL, n. Fo^{2}nt-a^{3}n-e^{2}l. See FONTANELLE.

FONTANELL (Ger.), n. Fon-ta^3-ne^{2}l. See FONTANELLE and ISSUE.

FONTANELLE, n. Fo^{2}n-ta^3-ne^{2}l′. Lat., *fontanella* (from *fons*, a fountain). Fr., *f.* Ger., *F.*, *Fontanell.* It., *fontanella.* Sp., *fontanela.* 1. A membranous interspace between the bones of the fœtal skull at a point where three or more bones meet. [A, 22.] 2. See ISSUE.—**Anterior f.** Lat., *fonticulus anterior* (seu *major*, seu *quadrangularis*, seu *frontalis*). Fr., *grande f.*, *f. antérieure* (ou *bregmatique*, ou *fronto-pariétale*). Ger., *vierseitige* (oder *vordere*, oder *grosse*) *F.*, *Medianf'.* Sp., *fontanela mayor.* Syn.: *great* (or *large*) *f.*, *bregmatic space*, *bregma.* The lozenge-shaped f. situated at the junction of the two parietal with the two frontal bones.—**Anterior lateral f.** See *Sphenoidal f.*—**Anterior median f., Bregmatic f.** See *Anterior f.*—**Dreieckige F.** (Ger.), **Dreiseitige F.** (Ger.). See *Posterior f.*—**F. bregmatique** (Fr.). See *Anterior f.*—**F. cérébelleuse** (Fr.). An abnormal f. in the squamous portion of the occipital bone. [*a*, 29.]——**F. de Casser.** See *Mastoid f.*—**F. fronto-pariétale** (Fr.). See *Anterior f.*—**F. médiane antérieure** (Fr.). See *Anterior f.*—**F. médiane postérieure** (Fr.). See *Posterior f.*—**F. naso-frontale** (Fr.). An abnormal f. at the junction of the nasal and frontal bones. ["Rev. d'anthropol.," 1872, p. 528 (*a*, 29).]—**F. occipito-pariétale** (Fr.). See *Posterior f.*—**F. of Casserius, F. postéro-latérale** (Fr.). See *Mastoid f.*—**F. pulsatile** (Fr.), **Great f., Grosse f.** (Ger.). See *Anterior f.*—**F. sagittale.** An abnormal f. in the course of the sagittal suture. [*a*, 29.]—**Hintere F.** (Ger.). See *Posterior f.*—**Hintere Seitenf'** (Ger.). See *Mastoid f.*—**Hinterhauptf'** (Ger.). See *Posterior f.*—**Keilbeinf'** (Ger.). See *Sphenoidal f.*—**Kleine F.** See *Posterior f.*—**Lateral f's.** Fr., *f's latérales*, *f's de Casser.* Ger., *Seitenfontanellen.* Ordinarily, the mastoid f's; also the sphenoidal f's. [L.]—**Mastoid f.** Lat., *fonticulus mastoideus* (seu *lateralis Casseri* [seu *posterior*]). Fr., *f. postéro-latérale* (ou *de Casser*). Ger., *Warzenf'*, *hintere Seitenf'*, *Casser'sche F.* The f. at the point of union of the occipital, temporal, and parietal bones. [L, 31, 332.]—**Median f's.** The anterior and posterior f's. [L, 31.]—**Median occipital f.** In certain birds, a membranous space over the foramen magnum. [L, 121.]—**Occipital f.** See *Posterior f.*—**Petite f.** (Fr.). See *Posterior f.*—**Posterior base-cranial f.** In comparative embryology, a space between anterior extremities of the parachordal cartilages. [L, 121.]—**Posterior f.** Lat., *fonticulus posterior* (seu *occipitalis*, seu *minor*, seu *triangularis*). Fr., *petite f.*, *f. postérieure* (ou *occipitale*, ou *occipito-pariétale*). Ger., *hintere* (oder *kleine*) *F.*, *Hinterhauptf'.* Sp., *fontanela menor.* Syn.: *small f.* The triangular f. situated at the junction of the occipital with the two parietal bones.—**Posterior lateral f.** See *Mastoid f.*—**Posterior median f.** See *Posterior f.*—**Pulsatile f.** See *Anterior f.*—**Seitenf'n.** See *Lateral f's.*—**Sincipital f.** See *Anterior f.*—**Small f.** See *Posterior f.*—**Sphenoidal f.** Lat., *fonticulus sphenoidalis* (seu *lateralis anterior*). Ger., *Keilbeinf'*, *vordere Seitenf'.* The f. at the junction of the parietal. temporal, sphenoid, and frontal bones. [L, 332.]—**Stirnf'** (Ger.). See *Anterior f.*—**Supra-orbital f.** In comparative embryology, a heart-shaped membranous f. between the tegmen cranii and the occipital cartilage. [L, 202.]—**Vierseitige F.** (Ger.), **Vordere F.** (Ger.), **Vordere Medianf'** (Ger.). See *Anterior f.*—**Vordere Seitenf'** (Ger.). See *Sphenoidal f.*—**Warzenf'** (Ger.). See *Mastoid f.*

FONTANES (Fr.), n. Fo^{2}n^2-ta^{3}n. A place in the department of Cantal, France, where there is a gaseous and slightly ferruginous spring. [L, 49, 87 (*a*, 14).]

FONT-CAOUADA (Fr.), n. Fo^{2}n^2-ka^3-u-a^3-da^3. See FONCAUDE.

FONTE (Fr.), n. Fo^{3}nt. 1. See COLLIQUATION. 2. Cast-iron. [A, 385.]—**F. blanche.** Homogeneous, hard, crystalline, brittle cast-iron, made by rapidly cooling the iron when in a state of fusion. [L, 49 (*a*, 21).]—**F. d'humeurs.** See COLLIQUATION.—**F. grise.** Cast-iron more tenacious and having a softer texture than *f. blanche.* [L, 49 (*a*, 21).]—**F. purulente.** A breaking down into pus. [A, 385.]—**F. truitée.** A variety of cast-iron between the *f. blanche* and the *f. grise.* [L, 49 (*a*, 21).]

FONTENELLE (Fr.), n. Fo^{2}n^{2}t-e^2-ne^{2}l. A place in the department of Vendée, France. where there is a ferruginous and slightly gaseous spring. [L, 49, 87 (*a*, 14).]

FONTENELLES (Fr.), n. Fo^{2}n^{2}t-e^2-ne^{2}l. A place in the department of Vienne, France, where there is a spring containing calcium sulphide. [A, 385.]

FONTES (Lat.), n. m., pl. of *fons* (*q. v.*). Fo^{2}nt′ez(as).

FONTICULUS (Lat.), n. m. Fo^{2}n-ti^{2}k′u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Dim. of *fons*, a fountain. Fr., *fonticule.* See FONTANELLE.—**F. anterior.** See *Anterior* FONTANELLE.—**F. Casserii.** See *Mastoid* FONTANELLE.—**F. frontalis.** See *Anterior* FONTANELLE.—**Fonticuli laterales.** See *Lateral* FONTANELLES.—**F. lateralis anterior.** See *Sphenoidal* FONTANELLE.—**F. lateralis Casserii (seu posterior).** See *Mastoid* FONTANELLE.—**F. major.** See *Anterior* FONTANELLE.—**F. mastoideus.** See *Mastoid* FONTANELLE.—**F. minor, F. occipitalis, F. posterior.** See *Posterior* FONTANELLE.—**F. quadrangularis.** See *Anterior* FONTANELLE.—**F. sphenoidalis.** See *Sphenoïdal* FONTANELLE.—**F. superior anterior.** See *Anterior* FONTANELLE. **F. superior posterior, F. triangularis.** See *Posterior* FONTANELLE.

FONTINALIS (Lat.), adj. and n. f. Fo^{2}n-ti^{2}n-al(a^{3}l)′i^{2}s. From *fons*, a fountain. Fr., *fontinal* (adj.), *fontinale* (n.). Ger., *quellenbewohnend* (adj.), *Quellmoos* (n). 1. (adj.) furnished by a fountain (said of water). 2. (adj.) growing near springs. 3. (n.) of Linnæus, a genus of aquatic mosses, of the *Bryaceæ*, found in the cold and temperate zones; of Müller, a section of the genus *Pilotrichum* and the genus *Octodiceras.* The *Fontinalaceæ*, *Fontinaleæ*, *Fontinalei*, or *Fontinaloideæ* are a family or group of mosses comprising *F.* and *Dichelyma.* [B, 19. 121, 170 (*a*, 24).]—**F. antipyretica, F. triangularis, F. trifaria.** Fr., *fontinale antipyrétique.* Ger.,

gemeines Quellmoos. A species found in Europe; used in baths for fever. [B, 173, 180 (α, 24).]

FŌNUGRĀK (Ger.), n. Fu^{3}n-u-gre^{2}k'. The *Trigonella fœnum græcum*. [B, 180 (α, 24).]—**Wildes F.** The *Astragalus glycyphyllus*. [L, 43.]

FOOD, n. Fud. A.-S., *foda*. See ALIMENT.—**Biedert's f. for infants.** Ger., *Biedert'sches Rahmgemenge*. A f. consisting of ⅛ litre of sweet cream, ⅜ litre of boiled water, and 15 grammes of sugar of milk, containing 1 per cent. of casein, 2·4 per cent. of butter, and 3·6 per cent. of sugar of milk; used for diluting the milk given to infants. [A, 61.]—**Accessory f.** A f. employed in small quantities to supply an element or elements of nutriment wanting in the f. chiefly relied upon. [α, 29.]—**Azotized f.** See *Nitrogenous f.*—**Brain f.** A f. supposed to be specially nourishing to the brain. Such f's include fish and various preparations rich in nitrogenous elements or in phosphorus.—**Carnrick's soluble f.** A prepared f. composed of 45 per cent. of the solid constituents of milk (the casein being partially digested with fresh pancreatin), 45 of wheat, the starch converted into soluble dextrin, and 10 of milk-sugar. In some cases a small amount of fat is added; said to be the only artificial f. which will thoroughly nourish a child without the addition of cow's milk. ["Sanitarian," Aug., 1888, pp. 126, 130 (α, 21).]—**Chemical f.** [Parrish]. See *Syrupus* PHOSPHATUM *compositus* (under PHOSPHAS).—**Combustible f.** See *Non-nitrogenous f.*—**Diabetic f.** A f. destitute of sugar. See ALMOND *bread*.—**Diuretic f.** A f. that increases the elimination of urine. A proprietary article so named is made from wheat-gluten, sunflower-seed, pumpkin-seed, watermelon-seed, and other seeds. [α, 21.]—**Dynamogenous f.** A f. which generates power. [α, 29.]—**Gelatinous f.** F. of which gelatin is the principal constituent. [α, 29.]—**Flesh-forming f.** A f. the elements of which are caused to unite into new combinations to form muscular tissue. [B, 191 (α, 29).]—**Gerber's f.** A milk f. resembling Nestlé's f. ["Sanitarian," Aug., 1888, p. 126 (α, 21).]—**Health f.** A trade name for any special f. supposed to be exceptionally easy of digestion or assimilation or to supply special wants in the nutrition of the body.—**Heat-producing f.** See *Non-nitrogenous f.*—**Inorganic f.** Any inorganic substance used for the nutriment of the body. [α, 29.]—**Kinesogenous f.** A f. which generates motion. [α, 29.]—**Kormann's f.** A food for nurslings and rhachitic infants, consisting of wheat-flour, condensed milk, salt, and malted barley. ["Gazz. degli ospit.," May 17, 1882, p. 319.]—**Liebig's f. for infants.** Ger., *Liebig'sche Kindernahrung*. A preparation made by thoroughly mixing 45 parts each of wheat-flour and malt-meal with 1 part of potassium, bicarbonate, and in this state sold as Liebig's dry food or Liebig's powders; for making the semi-liquid food 90 parts of water and 450 of milk deprived of cream are added, heating the liquid over a slow fire till thickening, and after 5 minutes heating again to ebullition, and straining with expression. [B, 92 (α, 14).]—**Löflund's f. for infants.** Ger., *Löflund'sche Kindernahrung*. A powdered malt extract possibly containing sugar of milk. [α, 21.]—**Mellin's f.** A prepared f. consisting of a soluble, dry extract from wheat and malt, free from starch, cane-sugar, husks, indigestible inert matter, and animal germs. It contains a large amount of albuminoids and soluble phosphates and is said to be alkaline in reaction. When used, cream may be added. ["Sanitarian," Aug., 1888, p. 128 (α, 21).]—**Mixed f.** F. containing both nitrogenous and non-nitrogenous elements. [α, 29.]—**Murdock's liquid f.** A proprietary f. said to be an extract of beef, mutton, and fruits, and to contain 12·50 per cent. of albumen. [α, 21.]—**Muscle f.** A f. which produces muscular tissue; according to Liebig's theory, nitrogenous f. [B.]—**Neave's f.** A farinaceous proprietary f. for infants and invalids; to be dissolved in milk and water. [α, 21.]—**Nestlé's f. for infants.** See FARINE *lactée*.—**Nitrogenous f.** F. containing nitrogen, such as the proteids. According to Liebig's theory, the function of nitrogenous f. is to build up the tissue, hence it was called plastic f. [B; α, 29.]—**Non-azotized f., Non-nitrogenous f.** Fats and carbohydrates. According to Liebig's theory, the function of non-nitrogenous f. is to produce heat, and to be used up in respiration, being either oxidized immediately or stored up as fat and glycogen to be used up subsequently. [B; α, 29.]—**Œttli's milk f.** An English proprietary preparation, said to contain 9 per cent. of protein substances, with nearly 6 per cent. of ready-formed fat, mostly in the form of butter-fat; also sugar, soluble albuminoid matters, and cooked starchy matters. ["Brit. Med. Jour.," Apr. 22, 1882.]—**Organic f.** Any organic substance used for the nutriment of the body. [α, 29.]—**Peptonized f.** A f. in which the albuminoids are digested by pepsin. [L.]—**Plastic f.** See *Nitrogenous f.*—**Respiratory f's.** See *Non-nitrogenous f.*—**Ridge's f.** A f. prepared from the best flour and thoroughly cooked so that a large part of the starch is changed into dextrin. ["Sanitarian," Aug., 1888, p. 131 (α, 21).]—**Thermogenous f.** See *Non-nitrogenous f.*

FOOL-SOLA (Beng.), n. The *Æschynomene aspera*. [B, 172 (α, 24).]

FOOSHOOK (Ar.), n. See AMMONIACUM (1st def.).

FOOT, n. Fu^{4}t. A.-S., *fōt*. Gr., πούς. Lat., *pes*. Fr., *pied*. Ger., *Fuss*. It., *piede*. Sp., *pié*. 1. In human anatomy, that portion of the lower extremity beyond the ankle. 2. In general, that portion of the limbs of a vertebrate which rests upon the ground and supports its weight; correctly speaking, it should be restricted to the pelvic extremity, the other being the manus or hand. 3. In insects, the tarsus. 4. In the *Crustacea*, an appendage having natatory or ambulatory functions; in molluscs, the structure which subserves locomotion. [L.]—**Ambulacral feet.** See *Ambulacral* TUBES.—**Branchial f.** A locomotive appendage of a crustacean, provided with filaments which have a respiratory function. [L, 121.]—**Flat-f.** See the major list.—**F.-halt.** A disease of sheep which is caused by the presence of a worm between the hoofs. [L, 56.]—**F.-lock.** See FETLOCK.—**F. of the corona radiata.** The place where the converging fibres of the corona radiata become parallel. [α, 29.]—**F. of the peduncle.** Lat., *pes pedunculi*. See CRUS *cerebri*.—**F.-rot.** An ulcer in the feet of sheep. [L, 56.]—**Fungous f.** See *Madura f.*—**Griffon's f.** A cannula containing tenacula for removing uterine moles. [α, 34.]—**Jaw-f.** See MAXILLIPED.—**Madura f.** Fr., *pied du Madure* (ou *de Madura*). Ger., *Madurafuss*. A slow and gradual increase in the volume of the f., in consequence of a fibro-fatty hypertrophy and degeneration of the bones, with cutaneous sinuses forming in all directions. There is a seropurulent discharge containing white, pink, yellow, or black granules, like fish-roe. Microscopically, the black granules contain a fungus (*Chionyphe Carteri*). The f. slowly becomes disorganized, the bones disappear or remain as shells, the arch of the foot is lost, the muscles and tendons undergo fatty degeneration, and exhaustive suppuration or gangrene may terminate the life of the patient. The disease is endemic in hot climates, and usually occurs after puberty, and there seems to be a causal relation between the fungus and the disease. [α, 34.]—**Maxilla f.** See MAXILLIPED.—**Morand's f.** A f. with eight toes. ["Un. méd. et sci. du Nord-Est;" "Province méd.," Oct. 6, 1888, p. 577.]—**Protoplasmic f.** Ger., *Protoplasmafuss*. 1. Of Pflüger, a form of medullated nerve termination in the salivary glands, in which the nerve undergoes frequent division, enlarges, and contains a considerable amount of finely granular protoplasm and many nuclei. [J, 35 (K).] 2. The end of a cylindrical epithelial cell resting on the basement membrane. [J, 67.]—**Splay f.** See TALIPES *valgus*.—**Tabetic f.** Fr., *pied tabétique*. 1. Of Charcot, an affection of the f. commencing in the pre-ataxic stage of tabes, with heaviness, numbness, and formication in the affected member; in from six weeks to two months there is swelling on the dorsum of the f. from hypertrophy of the head of the astragalus, scaphoid, cuneiform and metatarsal bones; the internal border of the f. is thickened, but the skin is unchanged. Osteophytes are formed on the internal border of the bones of the tarso-metatarsal articulation. There may be elevation of temperature, trophic troubles, and absorption of the phalanges. 2. Of Joffroy, an exaggerated extension of the f. noticed in the commencement of tabes when the patient is lying down; as the tabes progresses, the contraction of the tendo Achillis may produce a talipes equinus. [α, 34.]—**Tube-feet.** See *Ambulacral* TUBES.

FOOTLING, adj. Fu^{4}t'li^{2}n^{2}. Of a foot or the feet (said of a presentation of the fœtus in parturition).

FORAMEN (Lat.), n. n. For(fo^{2}r)-a(a^{3})'me^{2}n. Gen., *-am'inis*. From *forare*, to bore. Gr., τρῆμα, ὀπή. Fr., *f.*, *trou*, *fovée*. Ger., *F.*, *Loch*, *Oeffnung*. It., *forame*. Sp., *agujero*. 1. An opening, a perforation, a pit. 2. In botany, the orifice in the coats of the ovule through which the pollen-tube penetrates; also the corresponding part in the seed. 3. See CANAL. [B, 1, 77, 123, 291 (α, 24).]—**Anterior condylar f., Anterior condyloid f.** Lat., *f. condyloideum anterius*. A f. to the front and to the inner side of each occipital condyle, passing downward, outward, and forward through the basilar process and transmitting the hypoglossal nerve. [A, 478 (α, 17).]—**Anterior ethmoidal f., Anterior internal orbital f.** Lat., *f. ethmoideum anterius*. Ger., *vorderes Siebbeinloch*. See *Anterior ethmoidal* CANAL.—**Anterior palatine f.** Lat., *f. palatinum anterius*. See *Incisor* CANAL (1st and 2d def's).—**Anterior sacral foramina.** Lat., *foramina sacralia anteriora*. Fr., *trous sacrés antérieurs*. Ger., *vordere Heiligbeinlöcher*. Foramina on the anterior surface of the sacrum, four on each side, which connect with the sacral canal, and transmit the anterior branches of the sacral nerves. [L, 142, 322.]—**Aortic f.** Lat., *f. aorticum*. Ger., *Aortenschlitz*. The opening in the diaphragm which transmits the aorta. [L, 332.]—**Bichat's f.** See *F. Bichatii*.—**Botallo's f.** See *F. of Botallo*.—**Carotic f.** The inferior aperture of the carotid canal. [L.]—**Cervical f.** See *Vertebrarterial foramina*.—**Costo-transverse f.** Lat., *f. costo-transversarium*. The space between the transverse process of a vertebra and the neck of its corresponding rib. [L, 31.]—**Dental f.** See *Inferior dental f.*—**Ethmoidal foramina.** Lat., *foramina ethmoidea* (seu *ethmoidalia*). See *Anterior ethmoidal* CANAL and *Posterior ethmoidal* CANAL.—**External carotid f.** Lat., *f. caroticum externum*. The external aperture of the carotid canal. [L, 332.]—**F. acusticum.** The meatus auditorius internus. [L, 173 (α, 29).]—**F. alveolare anterius, F. alveolare inferius.** See *Inferior dental f.*—**Foramina alveolaria posteriora (ossis maxillæ).** See *Posterior dental* CANALS.—**F. amplum pelveos.** Of Bartholin, the obturator f. [Hyrtl (α, 29).]—**F. anonymum Ferreini.** The hiatus Falloppii. [L, 115 (α, 29).]—**F. anterius canalis cruro-poplitei.** An aperture in the upper part of the tibio-fibular interosseus membrane which gives passage to the anterior tibial vessels. ["Arch. f. Anat. u. Phys.," 1877 (Anat.), p. 401, 1878 (Anat.), p. 456 (α, 29).]—**F. aorticum.** See *Aortic f.*—**F. aquæductus Falloppii.** See AQUEDUCT *of Falloppii*.—**F. arachnoideum.** See *F. of Magendie*.—**F. atrioventriculare commune.** An auriculo-ventricular opening common to both auricles and ventricles found in the hearts of some of the lower animals. ["Arch. f. mikr. Anat.," 33 Bd., p. 362, 372 (α, 29).]—**F. auditorium externum.** See *External auditory* CANAL.—**F. auditorium internum.** See *Internal auditory* CANAL.—**F. Bichatii.** A supposed communication between the subarachnoid space and the cavity of the third ventricle. Its existence is denied by Schwalbe. [I, 17 (K).]—**Foramina cæca of Vicq d'Azyr.** See *F. cæcum anticum* and *F. cæcum posticum*.—**F. cæcum.** Fr., *trou borgne*. Ger., *vorderes blindes Loch*. A crypt-like depression.—**F. cæcum anterius.** Syn.: *prepontine fossa*. The depression at the cephalic margin of the pons. [I, 6.]—**F. cæcum de la langue** (Fr.), **F. cæcum linguæ** (seu **Meibomii**, seu **Morgagni**). See *F. cæcum of the tongue*.—**F. cæcum of the frontal bone.** Lat., *f. cæcum ossis frontalis*. A small f. situated at the base of the frontal crest of the front bone. [L, 142.]—**F. cæcum of the medulla oblongata.** See *F. cæcum anterius*.—**F. cæcum of the pharynx.** Fr., *f. cæcum du pharynx*. A depression in the mucosa of the posterior wall of the pharynx, in the median line, a little below the level of the orifices of the Eustachian tubes; replaced by

the orifice of the bursa of the pharynx when that structure is present. [A, 385.]—**F. cæcum of the retina.** See Fovea *centralis.*—**F. cæcum of the superior maxillary bone.** Lat., *f. cœcum ossis maxillaris superioris.* See *Incisor f.* (1st def.).—**F. cæcum of the tongue.** Lat., *f. cœcum linguæ* (seu *Meibomii*), *f. Meibomii, f. Morgagni.* A small cul-de-sac about an inch from the base of the dorsum of the tongue. at the posterior termination of the median rhaphe, into which a number of small glands open. [L, 142, 332.]—**F. cæcum ossis frontalis (seu frontis).** See *F. cœcum of the frontal bone.*—**F. cæcum ossis maxillaris superioris.** See *Incisor f.* (1st def.).—**F. cæcum posterius (seu posticum).** Of Vicq d'Azyr, a depression just below the pons Varolii, in which the anterior median fissure of the spinal cord terminates. [I, 6 (K).]—**F. cæcum retro-anale.** See Foveola *coccygea.*—**F. carotico-clinoideum.** An occasional f. formed by the union of the apices of the anterior and middle clinoid processes of the sphenoid bone. [L, 332.]—**F. carotico-tympanicum.** See Canalis *carotico-tympanicus.*—**F. caroticum externum.** See *External carotid f.*—**F. caroticum internum.** See *Internal carotid f.*—**F. cavernosum (ossis sphenoidalis)** [Krause]. A small passage in the sphenoid bone through which the median vertebral vein communicates with the cavernous sinus. ["Arch. f. Anat. u. Phys.," 1870, p. 440 (α, 29).]—**F. central de la rétine** (Fr.), **F. centrale.** See Fovea *centralis.*—**F. centrale cochleæ.** See *F. cochleæ centrale.*—**F. centrale of Soemmerring, F. centrale retinæ** (seu **Soemmerringii**). See *F. retinæ centrale.*—**F. clinoideo-caroticum.** See *F. carotico-clinoideum.*—**F. cochleæ centrale.** The largest of several openings in the base of the modiolus. [L, 332.]—**F. conarii.** Of Wilder, the orifice of the conarial recess.—**Foramina condyloidea accessoria.** Small foramina near the anterior condylar f. [L, 332.]—**Foramina condyloidea posteriora.** See *Posterior condylar foramina.*—**F. condyloideum anterius.** See *Anterior condylar f.*—**Foramina conjugationis.** Fr., *trous de conjugaison.* The intervertebral foramina. [L, 55 (α, 29).]—**F. costo-transversarium.** See *Costo-transverse f.*—**Foramina cribrosa (ossis cribrosi).** Small openings in the lamina cribrosa of the ethmoid bone which transmit the filament of the olfactory nerves. [L, 115.]—**F. dextrum (diaphragmatos).** See *F. quadratum.*—**Foramina diploica.** Small openings in the inner plate of the cranial bones leading from the cranial cavity into the diploe. [L, 115 (α, 29).]—**F. Duverneyi.** See *F. of Winslow.*—**Foramina emissaria.** Foramina in the skull transmitting the emissary veins. [L, 115.]—**F. epiploicum.** See *F. of Winslow.*—**F. ethmoidale anticum.** See *Anterior ethmoidal* canal.—**F. ethmoidale posticum.** See *Posterior ethmoidal* canal.—**Foramina ethmoidalia (seu ethmoidea).** See *Anterior ethmoidal* canal and *Posterior ethmoidal* canal.—**F. ethmoideum anterius.** See *Anterior ethmoidal* canal.—**F. ethmoideum posterius (seu posticum).** See *Posterior ethmoidal* canal.—**F. frontale.** See *Supra-orbital* canal.—**F. glandulosum Morgagni.** See *F. cæcum of the tongue.*—**F. incisivum.** See *Incisor f.*—**F. infra-maxillare.** The inferior dental canal. ["Arch. f. Anat. u. Phys.," 1873, p. 349 (α, 29).]—**F. infra-orbitale, F. infra-orbitarium.** See *Infra-orbital f.*—**F. infra-pubianum.** See *Obturator f.*—**F. infundibuli.** See Lyra.—**F. interclinoïdeum.** A canal formed by an anomalous process connecting the middle and posterior clinoid processes of the sphenoid bone. [L, 332.]—**F. interclinoïdeum commune.** A canal formed by an anomalous process extending between the anterior and posterior and middle clinoid processes of the sphenoid bone. [L, 332.]—**F. intermaxillare.** See *Incisor f.*—**F. intervertebrale posterius.** Ger., *Zwischenwirbelspalte.* The space between the articular processes of the vertebræ except the first cervical. [L, 31.]—**Foramina intervertebralia.** See *Intervertebral* foramina.—**F. ischiadicum majus.** See *Great sacro-sciatic f.*—**F. ischiadicum medium.** An open space left between an anomalous and the normal sacro-spinal ligament. [L, 332.]—**F. ischiadicum minus.** See *Small sacro-sciatic f.*—**F. ischiopubicum.** See *Obturator f.*—**F. jugulare.** See *F. lacerum posterius.*—**F. jugulare spurium.** An anomalous opening in the squamous portion of the temporal bone, which transmits a vessel uniting the external jugular vein with an intracranial vessel. [L, 31.]—**F. lacerum.** Fr., *trou déchiré.* Ger., *zerrissenes Loch.* A ragged hole.—**F. lacerum anterius (baseos cranii).** Fr., *trou déchiré antérieur.* Ger., *vorderes zerrissenes Loch.* See *Sphenoidal* fissure.—**F. lacerum inferius.** The sphenomaxillary fissure.—**F. lacerum jugulare.** See *F. lacerum posterius.*—**F. lacerum medium.** An irregular aperture between the apex of the petrous portion of the temporal bone and the body and great wing of the sphenoid. In the recent state it is closed below by a mass of fibrous tissue. The carotid canal opens on its external wall, the vidian canal anteriorly. By the inner part the carotid artery enters the cranial cavity and through the external, the large superficial petrosal nerve coming from the vidian, reaches the hiatus Falloppii. [L, 142, 172 (α, 29).]—**F. lacerum orbitale.** The sphenoidal fissure. [L.]—**F. lacerum posterius.** Fr., *trou déchiré postérieur.* Ger., *Drosseladerloch, Drosselloch.* The space formed by the jugular notches of the occipital and temporal bones. It is divided into two portions, sometimes separated by a spiculum of bone, the one roundish, situated externally and posteriorly, and transmitting the jugular vein; the other narrow, anterior, and internal, and serving as an exit for the 9th, 10, and 11th cranial nerves, and for the inferior petrosal sinus. [L, 31, 142, 332.]—**F. lacerum superius.** See *Sphenoidal* fissure.—**F. Magendii.** See *F. of Magendie.*—**F. magnum ischii.** The obturator f. [α, 29.]—**F. magnum (occipitale, seu occipitis).** Ger., *Hinterhauptsloch.* A large oval aperture, centrally placed, in the lower and anterior part of the occipital bone. It transmits the spinal cord and its membranes, the spinal accessory nerves, and the vertebral arteries. [A, 478 (α, 17).]—**F. mandibulare.** See *Inferior dental f.*—**F. mandibulare anterius.** See *Mental f.*—**F. mandibulare posterius.** See *Inferior dental f.*—**F. mastoideum.** See *Mastoid f.*—**F. mastoideum posterius.** See *Mastoid f.*—**F. maxillare anterius.** See *Mental f.*—**F. maxillare inferius, F. maxillare posterius.** See *Inferior dental f.*—**Foramina maxillaria superiora.** See *Posterior dental* canals.—**F. medullæ spinalis.** See *Vertebral f.*—**F. medullare.** See *Nutrient f.*—**F. medullare columnæ vertebralis.** See *Vertebral f.*—**F. Meibomii.** See *F. cœcum of the tongue.*—**F. meningeum.** An anomalous opening in the squamous portion of the temporal bone for the transmission of a branch of the middle meningeal artery. [L, 332.]—**F. mentale.** See *Mental f.*—**F. Monroi (anterius), F. monroianum.** See *F. of Monro.*—**F. Monroi primitivum.** The primitive f. which connects the third with the lateral ventricle of the brain. [I, 68 (K).]—**F. Morgagni.** See *F. cœcum of the tongue.*—**Foramina nasalia.** Small canals which perforate the nasal bone. [L, 332.]—**Foramina nutrientia (seu nutritia) ossium.** See *Nutrient f.*—**F. nutritium ossis femorii.** The aperture near the upper part of the linea aspera of the femur which transmits its nutrient artery. [L, 115.]—**F. nutritium ossis humeri.** The aperture slightly below the middle of the shaft of the os humeri which transmits its nutrient artery. [L, 115.]—**F. nutritium radii.** The aperture on the anterior surface of the radius for its nutrient artery. [L, 115.]—**F. nutritium ulnæ.** The aperture on the anterior surface of the ulna for its nutrient artery. [L, 115.]—**F. obturator, F. obturatorium, F. obturatum.** See *Obturator f.*—**F. occipitale (magnum).** See *F. magnum.*—**F. occipitale superius.** See *Superior occipital f.*—**F. oculi.** The pupil. [L, 349.]—**F. œsophageum.** Ger., *Speiseröhrenöffnung, Speiseröhrenschlitz.* The aperture in the diaphragm which transmits the œsophagus. [L, 175.]—**F. of Bichat.** See *F. Bichatii.*—**F. of Botallo.** The opening which establishes communication between the two auricles of the heart in the fœtus. [L.]—**F. of Magendie.** Lat., *f. Magendii.* Fr., *f. de Magendie.* Ger., *F. von Magendie.* A small opening through the layer of pia mater which forms a portion of the roof of the fourth ventricle. [I. 29 (K).]—**F. of Monro.** Lat., *f. monroianum, f. Monroi anterius.* Fr., *f. de Monro.* Ger., *F. von Monro, Monroïsches F.* An opening behind the anterior pillars of the fornix, through which the lateral ventricles of the brain communicate with the third ventricle. [I, 2 (K).]—**F. of Rivini.** Lat., *f. rivinianum, f. Rivinii, f. Rivini.* An opening in the tympanum the existence of which is disputed. [L, 31.]—**Foramina of Scarpa.** Lat., *foramina Scarpæ.* Bony canals opening into the incisor canal and transmitting the naso-palatine nerves. [L, 142.]—**F. of Soemmerring.** See Fovea *centralis.*—**F. of Stenson.** See *Incisor* canal (2d def.).—**F. of Tarinus.** The hiatus Falloppii. [L, 115 (α, 29).]—**F. of Winslow.** Lat., *f. Winslovii, f. omenti minoris.* Ger., *Winslow'sches Loch.* An aperture formed by the folds of the peritonæum, and establishing communication between the greater and lesser cavities of the peritonæum. It is situated between the liver and the stomach and is bounded in front by the portal vein, hepatic artery, and duct, behind by the inferior vena cava, below by the hepatic artery, and above by the liver. [L, 31, 142, 172.]—**F. omenti majoris** [Huschke]. The communication between the cavities of the greater and lesser omentum. [L, 31.]—**F. omenti minoris.** See *F. of Winslow.*—**F. oodes.** See *Obturator f.*—**F. opticum chorioideæ.** The hole in the chorioid through which the optic nerve-fibres pass to their expansion in the retina. [F.]—**F. opticum scleroticæ.** The space left in the sclerotic for the passage of the optic nerve. [L, 332.]—**F. orbitarium internum.** Fr., *trou orbitaire interne.* Ger., *inneres Orbitalf'.* See *Anterior ethmoidal* canal.—**F. orbitarium superius.** See *Supra-orbital f.*—**F. ossis pubis.** See *Obturator f.*—**F. ovale.** Ger., *eirundes* (oder *eiförmiges*) *Loch.* 1. An ovoid aperture near the posterior margin of the great wing of the sphenoid bone, which transmits the inferior maxillary division of the trigeminal nerve. 2. See *F. of Botallo.* 3. See *Obturator f.*—**F. ovale cordis.** See *F. of Botallo.*—**F. ovale coxæ.** See *Obturator f.*—**F. ovale of the heart.** See *F. of Botallo.*—**F. ovale of the hip bone.** See *Obturator f.*—**F. ovale of the sphenoid bone.** See *F. ovale* (1st def.).—**F. ovale ossis pelveos.** See *Obturator f.*—**F. ovale ossis sphenoidalis (seu sphenoidei).** See *F. ovale* (1st def.).—**Foramina Pacchionii.** The depressions on the inner surface of the skull for the Pacchionian bodies. [L, 115.]—**Foramina palatina posteriora.** See *Posterior palatine foramina.*—**F. palatinum anterius.** See *Incisor* canal (1st def.).—**F. palatinum posterius magnum.** The posterior palatine canal. [L.]—**Foramina papillaria.** Ger., *Harnporen.* The opening of the uriniferous tubules upon the apices of the pyramids of Malpighi. [L, 332.]—**F. parietale.** See *Parietal f.*—**F. pneumaticum.** See *Pneumatic f.*—**F. profundum.** See Iter *ad infundibulum.*—**F. pro sinu petroso inferiore** [Theile]. An anomalous, roundish opening formed by adjacent portions of the petrous portion of the temporal bone and the occipital bone, which transmits the inferior petrosal sinus. [L, 31, 332.]—**F. pterygo-palatinum.** See *Pterygo-palatine f.*—**F. quadratum, F. quadrilaterum.** The aperture in the diaphragm for the passage of the inferior vena cava. [L, 31.]—**Foramina repugnatoria.** Apertures of cutaneous glands secreting a defensive corrosive fluid, situated in rows on each side of the back of the *Cheilognatha.* [L, 353.]—**F. retinæ centrale.** See Fovea *centralis.*—**F. Rivini, F. Rivinianum, F. Rivinii.** See *F. of Rivini.*—**F. rotundum.** Fr., *trou rond.* Ger., *rundes Loch.* A roundish opening in the great wing of the sphenoid bone, which transmits the superior maxillary division of the fifth nerve. [L, 31.]—**Foramina sacralia anteriora.** See *Anterior sacral foramina.*—**Foramina sacralia posteriora.** See *Posterior sacral foramina.*—**F. saphenæ.** See *Saphenous* opening.—**F. scapulare.** The suprascapular notch when it is converted into a f. by a ligamentous or osseous structure. [L, 332.]—**Foramina Scarpæ.** See *Foramina of Scarpa.*—**F. scleroticæ anticum.** The opening in the sclerotic which is filled in by the cornea. [L, 31.]—**F. scleroticæ posticum.** See *F. opticum scleroticæ.*—**F. sinistrum inferius diaphragmatos.** See *Aortic f.*—**F. sinistrum superius diaphragmatos.** See *F. œsophageum.*—**F. Soemmerringi.** See Fovea *centralis.*—**F.**

spheno-frontale. Of Spöndli, an opening found in the cartilaginous basis of the skull between the labyrinths of the ethmoid and the alæ parvæ of the sphenoid and the anterior sphenoid. [H.]—**F. sphenoidale anterius.** A rare anomalous opening in the pterygoid process of the sphenoid bone which transmits the internal maxillary artery. [L, 332.]—**F. sphenopalatinum.** See *Spheno-palatine f.*—**F. spheno-spinosum.** See *F. spinosum.*—**F. spinale.** See *Vertebral f.*—**F. spinosum.** Ger., *Dornenloch.* A small f. piercing the great wing of the sphenoid bone near its posterior angle. It transmits the middle meningeal artery. [L, 115.]—**F. Stenonis, F. Stensoni.** See *F. of Stenson.*—**F. sternal.** A f. found occasionally near the inferior termination of the sternum. [C.]—**F. stylomastoideum.** See *Stylo-mastoid f.*—**F. supra-orbitale, F. supra-orbitarium.** See *Supra-orbital f.*—**F. suturæ petro-basilaris anomalum** [W. Gruber]. See *F. pro sinu petroso inferiori.*—**F. Tarini.** See *F. of Tarini.*—**Foramina Thebesii.** Small depressions in the inner surface of the heart, especially in the right ventricle, some of which are cul-de-sacs, while others are the mouths of the venæ minimæ cordis. [L, 31, 144, 334.]—**F. thyreoideum.** See *Obturator f.*—**Foramina transversaria accessoria.** Anomalous foramina in the transverse processes of the cervical vertebræ which transmit an anomalous and accessory vertebral artery. [L, 332.]—**F. transversarium.** See *Vertebrarterial f.*—**F. venæ cavæ.** See *F. quadratum.*—**F. venæ saphenæ.** See *Saphenous* OPENING.—**F. venosum.** See *F. quadratum.*—**F. vertebrale.** Ger., *Rückenmarksloch.* See *Vertebral f.*—**F. vomeris** [Tourtual]. Ger., *Pflugscharloch.* The posterior aperture of the canalis vomeris. [L. 31.]—**F. Winslowii.** See *F. of Winslow.*—**F. zygomatico-faciale.** The aperture of the malar canal on the facial surface of the malar bone. [L, 31.]—**F. zygomaticum temporale.** See *F. zygomatico-temporale.*—**F. zygomatico-temporale.** The external aperture of the malar canal on the temporal surface of the malar bone. [L, 332.]—**F. zygomaticum anterius** (seu **externum**, seu **faciale**). See *F. zygomatico-faciale.*—**F. zygomaticum internum** (seu **posterius**, seu **superius**, seu **temporale**). See *F. zygomatico-temporale.*—**Frontal f.** Lat., *f. frontale.* The supra-orbital notch (*q. v.*) when it is converted into a canal by an overlying process of bone. [L, 332.]—**Fronto-ethmoid f.** Fr., *trou-ethmoïdal* [Chaussier]. The f. cæcum in the suture between the frontal and ethmoid bones. [L, 55 (*a*, 29).]—**Great sacro-sciatic f.** Lat., *f. ischiadicum majus.* The oval space between the lesser sacro-sciatic ligament and the innominate bone. It transmits the pyriformis muscle, and the gluteal, sciatic, and pudic vessels and nerves. [C, 3; L.]—**Incisive f., Incisor f.** Lat., *f. incisivum.* Ger., *vorderes Gaumenloch, Zwischenkieferloch.* 1. The oval aperture of the incisor canal. [L.] 2. See *Incisor canal* (1st and 2d def's).—**Inferior dental f.** Lat., *f. mandibulare* (seu *maxillare*) *posterius, f. alveolare inferius.* The external aperture of the inferior dental canal. [L.]—**Infra-orbital f.** Lat., *f. infraorbitale.* Ger., *Unteraugenhöhlenloch.* The external aperture of the infra-orbital canal. [L, 115.]—**Internal carotid f.** Lat., *f. caroticum internum.* The internal aperture of the carotid canal. [L, 332.]—**Intervertebral foramina.** Lat., *foramina intervertebralia.* Ger., *Zwischenwirbellöcher.* The aperture formed by the notches opposite to each other in the laminæ of adjacent vertebræ, which transmit the spinal nerves and blood-vessels. [L, 31, 142, 332.]—**Jugular f.** See *F. lacerum posterius.*—**Mastoid f.** Fr., *trou mastoïdien.* Ger., *Warzenloch.* A small f. situated behind the mastoid process, which gives passage to a small artery of the dura mater, as well as to a vein which opens into the lateral sinus. [F.]—**Medullary f.** See *Nutrient f.*—**Mental f.** Lat., *f. mentale, f. mandibulare* (seu *maxillare*) *anterius.* Ger., *Kinnloch.* A f. in the inferior maxilla external to the incisor fossa, midway between the upper and lower border of the bone, and under the interval between the two bicuspid teeth. It transmits the mental nerve and vessels. [C.]—**Monro's f.** See *F. of Monro.*—**Nutrient f., Nutritionsf.** (Ger.). Lat., *f. nutriens* (seu *nutritium ossium*). Ger., *Ernährungsloch.* The canal communicating between the medullary cavity of a bone and its exterior surface, and transmitting the nutrient vessels. [L.]—**Obturator f.** Lat., *f. obturatorium, f. oodes, f. ovale coxæ* (seu *ossis pelvis*). Fr., *fosse obturatrice, trou souspubien* (ou *obturateur*). Ger., *Hüftbeinloch, Verstopfungsloch.* The large ovoid opening in the innominate bone, internal and inferior to the acetabulum. It is closed in by a fibrous membrane, except near its outer and upper edge, where an aperture is left for the passage of the obturator vessels and nerves. [L, 31, 142, 332.]—**Occipital f.** See *F. magnum.*—**Optic f.** Lat., *f. opticum.* Fr., *f.* (ou *trou*) *optique.* Ger., *optisches Loch, optische Höhle* (oder *Lücke*). The hole at the apex of the orbit, the anterior termination of the optic groove, for the passage, from the cavity of the skull into the orbit, of the optic nerve and ophthalmic artery. It lies in the sphenoid bone just beneath the lesser wing. [F.]—**Oval f. of the sphenoid bone.** See *F. ovale.*—**Palato-maxillary f.** See *Palato-maxillary* CANAL.—**Parietal f.** Lat., *f. parietale.* Fr., *trou pariétal.* Ger., *Scheitelbeinloch.* A f. of varying size, and not always constant, near the posterior superior angle of the parietal bone, which contains an emissary vein of the superior longitudinal sinus. [L, 31, 142, 332.]—**Pneumatic f.** Lat., *f. pneumaticum.* A large aperture near one end of the long pneumatic bones of birds, communicating with the interior, allowing the entrance of air. [L, 107.]—**Posterior condylar foramina.** Lat., *foramina condyloidea posteriora.* Foramina behind the condyles of the occipital bones, giving passage to veins, and opening externally into the occipital fossa. [L, 142, 332.]—**Posterior ethmoidal f.** Lat., *f. ethmoidale* (seu *ethmoideum*) *posticum.* Ger., *hinteres Siebbeinloch.* See *Posterior ethmoidal* CANAL.—**Posterior palatine foramina.** Lat., *foramina palatina posteriora.* The external apertures of the palato-maxillary and pterygo-palatine canals. [L, 332.]—**Posterior sacral foramina.** Lat., *foramina sacralia posteriora.* Fr., *trous sacrés postérieurs.* The openings (four on each side) on the posterior surface of the sacrum, external to the articular processes which transmit the posterior branches of the sacral nerves. [L, 31, 142, 332.]—**Postglenal f., Postglenoid f.** In comparative anatomy, an opening immediately posterior to the root of the zygoma. [L, 153.]—**Postpalatine foramina.** See *Posterior palatine foramina.*—**Pre-acetabular f.** In the *Cheiroptera*, an opening included by a process extending from the iliopectineal eminence to the anterior extremity of the ilium. [L, 121, 153.]—**Pterygo-palatine f.** Lat., *f. pterygo-palatinum.* The external aperture of the pterygo-palatine canal. [L, 332.]—**Sacral anterior foramina.** See *Anterior sacral foramina.*—**Sacral foramina.** Lat., *foramina sacralia.* Ger., *Kreuzbeinlöcher.* See *Anterior sacral foramina* and *Posterior sacral foramina.*—**Small sacro-sciatic f.** Lat., *f. ischiadicum minus.* The space included between the greater and lesser sacro-sciatic ligaments and the portion of the innominate bone between the spine and tuberosity of the ischium. It transmits the internal obturator muscle, and the pudic vessels and nerve. [L, 142, 332.]—**Spheno-palatine f.** Lat., *f. sphenopalatinum.* Ger., *Flügelgaumenloch.* The space included between the sphenoidal and orbital processes of the palate and the sphenoidal spongy bone. It opens into the nasal cavity, and transmits branches from Meckel's ganglion and the nasal branch of the internal maxillary artery. [L, 31, 142, 332.]—**Spinal f.** See *Vertebral f.*—**Stylo-mastoid f.** Lat., *f. stylomastoideum.* Ger., *Griffelzitzenloch.* A f. between the styloid and mastoid processes of the temporal bone, constituting the external aperture of the aqueduct of Falloppius. [L, 31, 142, 332.]—**Suborbital f.** Fr., *trou sous-orbitaire.* Ger., *Infraorbitalf'.* The orifice at the anterior end of the infra-orbital canal, transmitting the infra-orbital artery and nerve. [F.]—**Subsacral foramina.** See *Anterior sacral foramina.*—**Supersacral f.** See *Posterior sacral foramina.*—**Supra-orbital f.** Lat., *f. supraorbitarium.* Fr., *f.* (ou *trou*) *orbitaire supérieur.* Ger., *oberes Orbitalf'.* A notch in the superior orbital margin, at the junction of the middle with the inner third, sometimes converted into a f. by a bony process, or a ligamentous band. It is the orifice of a groove in the upper wall of the orbit, which transmits the supra-orbital artery, veins, and nerve. [F.]—**Supratrochlear f.** A f. which sometimes perforates the thin plate of bone between the olecranon and the coronoid fossa of the humerus. [C, 3.]—**Thyreoid f.** Lat., *f. thyreoideum.* 1. A f. in the ala of the thyreoid cartilage, more or less completely covered by perichondrium. [L.] 2. See *Obturator f.*—**Trachelian f.** See *Vertebrarterial f.*—**Vertebral f.** Lat., *f. vertebrale, f. medullæ spinalis, f. medullare columnæ vertebralis.* Ger., *Wirbelloch.* The space included between the body and arch of a vertebra, which transmits the spinal cord and appendages. [L, 31, 332.]—**Vertebrarterial foramina.** The foramina in the transverse processes of the cervical vertebræ which transmit the vertebral artery and vein. [L, 142.]

FORAMINATED, adj. Fo^{2}r-a^{2}m'i^{2}n-at-e^{2}d. Lat., *foriminatus* (from *foramen*, an opening). Fr., *foraminé.* Ger., *löcherig.* Having small perforations. [L.]

FORAMINIFERA (Lat.), n. n. pl. Fo^{2}r-a^{2}m(a^{3}m)-i^{2}n-i^{2}f'e^{2}r-a^{3}. From *foramen*, an opening, and *ferre*, to bear. An order of the *Protozoa*, having the testa usually of calcium carbonate, generally perforated by numerous foramina for the protrusion of the pseudopodia, comprising (Carpenter) the *Imperforata* and *Perforata*; or (Schultze) the *Helicoidea, Rhabdoidea*, and *Soroidea*; or (D'Orbigny) the *Monostega, Stichostega, Helicostega, Entomostega, Enallostega*, and *Agathistega.* [L, 147.]—**Nautiloid f.** The *Helicostega.* [L, 147.]

FORAMINIFEROUS, adj. For-a^{2}m-i^{2}n-i^{2}f'e^{2}r-u^{3}s. From *foramen*, an opening, and *ferre*, to bear. Containing *foramina.* [L, 147.]

FORAMINOUS, adj. Fo^{2}r-a^{2}m-i^{2}n-u^{3}s. See FORAMINATED.

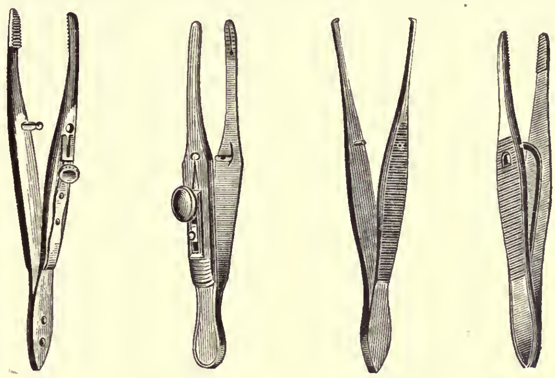
FORAMINULATE, FORAMINULOSE, FORAMINULOUS, adj's. Fo^{2}r-a^{2}m-i^{2}n'u^{2}l-at, -os, -u^{3}s. Lat., *foraminulatus, foraminulosus, foraminulentus.* Fr., *foraminuleux.* Ger., *feinlöcherig.* Provided with foraminula. [B, 123 (*a*, 24).]

FORAMINULUM (Lat.), n. n. Fo^{2}r-a^{2}m(a^{3}m)-i^{2}n'u^{2}l(u^{4}l)-u^{3}m(u^{4}m). Dim. of *foramen*, an opening. Fr., *foraminule.* Ger., *Löchelchen.* A minute foramen. [B, 121 (*a*, 24).]—**F. carotico-tympanicum.** See CANALIS *carotico-tympanicus.*

FORATIO (Lat.), n. f. For(fo^{2}r)-a(a^{3})'shi^{2}(ti^{2})-o. Gen., -o'*nis.* From *forare*, to pierce. See PERFORATION.

FORBACH (Ger.), n. For'ba^{3}ch^{2}. A place in Alsace, Germany, where there is a gaseous saline and sulphurous spring. [A, 363 (*a*, 21); L, 49, 87 (*a*, 14).]

FORBETE, n. For'bet. The *Scabiosa succisa.* [A, 505 (*a*, 21).]



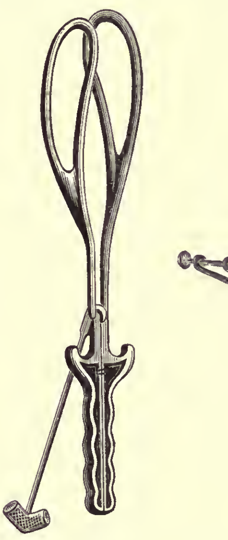
FORCE, n. Fors. Gr., σθένος, δύναμις, κάτος. Lat., *vis.* Fr., *f.* Ger., *Kraft.* It., *forza.* Sp., *fuerza.* 1. Capability of action. 2. Any cause that induces, hinders, or modifies action, movement, growth, etc. 3. Violence.—**Absolute f.** Ger., *absolute Kraft.* The f. of a muscular contraction referred to units of diameter of the muscle. [K, 35.]—**Accelerating f.** Fr., *f. accélératrice.* A f. which, acting upon a moving body, produces an acceleration of its motion; in particular, a f. of such degree as to produce upon the unit of mass a definite acceleration of velocity in the unit of time. The accelerating f. is measured by the acceleration of velocity thus produced. Any f. which acts continuously (as distinguished from an impulsive f.) is an accelerating f. [B, 7, 21.]—**Active f.** See *Kinetic* ENERGY.—**Adhesive f.** See ADHESION.—**Assimilative f.** The power by means of which an organism maintains the process of assimilation. [*a*, 29.]—**Atomic f.** See AFFINITY (1st def.).—**Attractive f.** See ATTRACTION.—**Capillary f.** See *Capillary* ATTRACTION and *Capillary* REPULSION.—**Catabiotic f.** See *F. homœoplastique.*—**Catalytic f.** See CATALYSIS.—**Cell f.** The power of development inherent in a cell. [*a*, 29.]—**Centrifugal f.** Fr., *f. centrifuge.* Ger., *Centrifugalkraft, Tangentialkraft, Seitenkraft.* That f. which impels a body moving in a curve to fly off from the axis of motion in a direction tangential to its path. [B, 21 (*a*, 27).]—**Centripetal f.** Fr., *f. centripète.*

Ger., *Centripetalkraft.* That f. which impels a body toward a given central point, especially that f. which keeps a revolving body in its orbit and resists the action of the centrifugal f. [Fisher (*a*, 27).]—**Chemical f.** See AFFINITY.—**Coercitive f., Coercive f.** A f. resident in magnetic bodies, which offers resistance to their magnetization when they are unmagnetized, and to their demagnetization when they are magnetized. [B, 21.]—**Cohesive f.** See COHESION.—**Conservation of f.** See CONSERVATION *of energy.*—**Continuously acting f.** See *Accelerating f.*—**Contractile f.** The f. by means of which muscle-tissue shortens. [*a*, 29.]—**Dynamic f.** See *Kinetic* ENERGY.—**Elastic f.** See ELASTICITY.—**Elastic f. of gases.** See *Expansive f. of gases.*—**Electric f.** See ELECTRICITY.—**Electro-motive f.** Fr., *f. électromotive.* Ger., *elektromotorische Kraft.* That property of electricity that enables it to produce mechanical effects. [*a*, 27.]—**Endosmotic f.** The f. of endosmosis.—**Epipolic f.** The f. of epipolasis.—**Excito-motive f.** Fr., *f. excito-motrice volitionnelle.* The power of the will to produce muscular action. [A, 29.]—**Expansive f.** The f. by which expansion is produced. [B.]—**Expansive f. of gases.** The f. by which gases tend constantly to expand; consisting in a f. of repulsion existing between the gaseous molecules. [B.]—**Expellent f., Expulsive f.** Lat., *vis expultrix.* Fr., *f. expulsatrice.* Ger., *Austreibungskraft.* The f. by which a hollow organ acts to expel its contents.—**F. de situation fixe** (Fr.). Of Barthez, a tendency, often observed in catalepsy, to great fixedness of the members in certain positions, so that a member returns to its former position when displaced. It is quite independent of pathological contraction of the tissues. [Grasset (*a*, 18).]—**F. homœoplastique** (Fr.). Of Dubrenil, the power by means of which living tissues removed from one organism may unite with and form part of another organism, as in the case of a graft. [L, 88 (*a*, 29).]—**F. médicatrice** (Fr.). See VIS *medicatrix.*—**F. nerveuse excito-motrice** (Fr.). A nervous f. producing muscular action. [*a*, 29.] Cf. *Excito-motive f.*—**F. nerveuse réflexe** (Fr.). See *Reflex* ACTION.—**F. neurique rayonnante** (Fr.). A radiating nervous f. [D.]—**F. of crystallization.** See ATTRACTION *of crystallization.*—**Formative f.** See *Plastic f.*—**Germ f.** The power of development or reproduction seated in a germ. [*a*, 29.]—**Impulsive f., Instantaneous f.** A f. which acts upon a body for a moment only, but which imparts to it a sensible velocity or change of velocity. [B, 21.]—**Kinetic f.** See *Kinetic* ENERGY.—**Latent f.** See *Latent* ENERGY.—**Living f.** Lat., *vis viva.* Fr., *f. vivante.* Ger., *lebendige Kraft.* The capacity for work contained in a moving body; measured by one half the product of its mass by the square of its velocity. [B].—**Magnetic f.** The f. of magnetism.—**Mass f.** Ger., *Massenkraft.* The f. which acts upon bodies in mass; especially gravitation and electrical and magnetic attraction and repulsion. [B.]—**Mechanical f.** A f. which produces mechanical effects only. The chief mechanical f's are gravitation, adhesion, cohesion (of which capillary f. and elasticity are special forms), and the centrifugal f. [B.]—**Medicative f.** See VIS *medicatrix.*—**Metabolic f.** The f. of metabolism.—**Molar f.** See *Mass f.*—**Molecular f's.** Fr., *f's moléculaires.* Ger., *Molekularkräfte.* The f's governing the relations of molecules; *i. e.*, adhesion, cohesion, and the f's which produce the undulating molecular movements resulting in the phenomena of heat, light, and sound. [B.]—**Motive f., Moving f.** A f. that produces motion.—**Muscular f.** The f. of muscular contraction.—**Nutritive f.** See *Plastic f.*—**Osmotic f.** The f. of osmosis.—**Passive f.** See *Potential* ENERGY.—**Plastic f.** Lat., *nisus formativus.* Fr., *f. plastique.* Ger., *Bildungskraft.* It., *forza plastica.* Sp., *fuerza plástica.* The f. supposed to direct the nutrition of living bodies; the power of an organism to form its own tissues. [K.]—**Polar f.** The f. by which the poles of two magnets attract or repel each other. [B.]—**Portative f.** The capacity for sustaining weights, resident in a magnet. [B.]—**Potential f.** See *Potential* ENERGY.—**Psychic f.** A f. by which the mind of one person is thought to influence the mind of another person, or even inanimate objects, without the intervention of the bodily functions. [B.] See TELEPATHY and *Thought*-TRANSFER.—**Repulsive f.** See REPULSION.—**Resultant f.** A f. which represents the sum of the action (both in respect to intensity and direction) of two or more other f's. [B.]—**Static f.** See *Potential* ENERGY.—**Twisting f.** See TORSION.—**Vegetative f.** Fr., *f. végétative.* Ger., *vegetative Kraft.* The energy exhibited by plants in their various processes of growth and movement. [B, 229 (*a*, 24).]

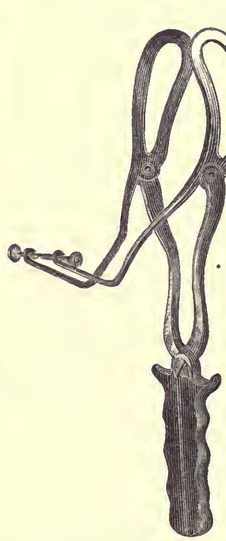
FORCED, adj. Forst. Fr., *forcé.* Ger., *forcirt.* Accomplished, hastened, or intensified by force.

FORCE-DELIVERED, adj. Fors'de-li²v-u⁵rd. Delivered forcibly. [A, 66.]

FORCEPS (Lat.), n. m. and f. Fo²r'se²ps(keps). Gen., *for'cipis;* pl., *-es.* From *formum*, anything hot, and *capere*, to seize. Gr., *πυράγρα.* Fr., *f.* Ger., *Zange.* It., *forcipe.* Sp., *f.* 1. Any instrument for seizing an object; originally a pair of tongs. Used as an English word, it is always singular unless more than one instrument is meant; hence it is proper to say *a f.* (not *a pair of f.*). 2. Of Reil (of Burdach, *forcipes*), certain bundles of fibres extending from the splenium backward into the occipital lobes. [I, 6 (K).] 3. In entomology, an appendage or a mandible in the form of a pair of pinchers.—**Aide-f.** (Fr.). See the major list.—**Alligator (-jaw) f.** A delicate f., straight or curved, with wide-opening jaws, for use in narrow canals. [E.]—**Angular f.** A f. bent at an angle, for introduction into fistulæ, etc. [*a*, 34.]—**Anteligature f.** A spring, cross-action f. for closing an artery. [*a*, 34.]—**Anterior f. of the corpus callosum.** See *F. minor corporis callosi.*—**Artery f.** A spring-catch or slide-catch spring f., or single-jointed pinion-catch f. for holding an artery. [*a*, 34.]—**Audibert's obstetrical f.** A f. having long oval handles with obstetrical data engraved on their inner faces. [*a*, 34.]—**Auricular f.** An instrument with long, thin blades terminating in a small ring and attached to the handles at an obtuse angle. It is used for removing small foreign bodies from the auditory canal. [F.]—**Axial polypus f.** A bent-handled f. having long blades that open widely with but moderate expansion of the handles. [*a*, 34.]—**Axis-traction f.** Fr., *f. à traction axiale, f. à traction dans l'axe.* Ger., *Axentractionszange.* An obstetrical f. so fashioned as to cause the traction exerted with it



a *b* *c* *d*



ARTERY FORCEPS.

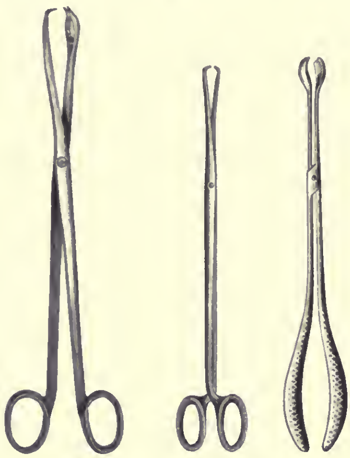
a, Fricke's; *b*, Langenbeck's; *c*, Mouse-tooth; *d*, plain spring catch.

to coincide with the axis of the parturient canal. [A, 22.]—**Beaumer's obstetrical f.** A modification of Chamberlen's f., curved

AXIS-TRACTION FORCEPS.

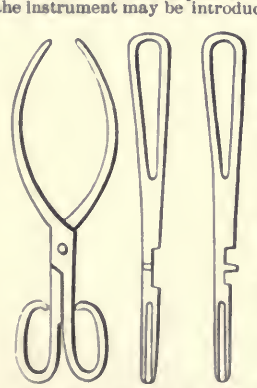
BREUSS'S AXIS-TRACTION FORCEPS.

on the flat so that one blade is concave and the other convex. [*a*, 34.]—**Bedford's obstetric f.** A short-handled, movable-jointed f., having long, curved, fenestrated blades. [*a*, 34.]—**Bent iris f.** The ordinary iris f. with curved ends to the blades. [F.]—**Bodenhamer's curvilinear f.** A curved f. for facilitating the ligation of hæmorrhoids. [E.]—**Bone-cutting f.** A f. having strong



BONE FORCEPS.

handles, and short jaws that are beveled to a cutting edge. [a, 34.] —**Bone f.** Ger., *Knochenzange.* 1. See *Bone-cutting f.*, *Bone-gnawing f.*, and *Bone-holding f.* 2. An old obstetrical instrument employed by Stein and Boër as a craniotomy f. [A, 85.]—**Bone-gnawing f.** A double-jointed f. with short, concave blades that have sharpened edges. [a, 34.]—**Bone-holding f.** A f. having long, strong handles, and short, straight, or curved jaws serrated on their internal faces; for holding a bone that is to be sawed through. [a, 34.]—**Bow f.** A f. with handles terminating in rings like those of scissors. [a, 34.]—**Breech f.** Ger., *Steisszange.* An obstetrical f. adapted to application to the breech. —**Brillenf** (Ger.). See *Spectacle f.*—**Brünninghausen's f.** An obstetrical f. with a lock like that of von Siebold's, except that the pivot was replaced by a flat-headed pin. [A, 15.]—**Budd's placenta f.** A long, slender, single-jointed f. with blades fenestrated and expanded at the end, the expansions being concave on their internal surface. [a, 34.]—**Bulldog f.** A spring, sliding-catch f., with concave, expanded, fenestrated extremities and at the tips fine teeth. [a, 34.]—**Bullet f.** Fr., *tire-balle.* A single-jointed



BULL-DOG FORCEPS.

BULLET-EXTRACTING FORCEPS.

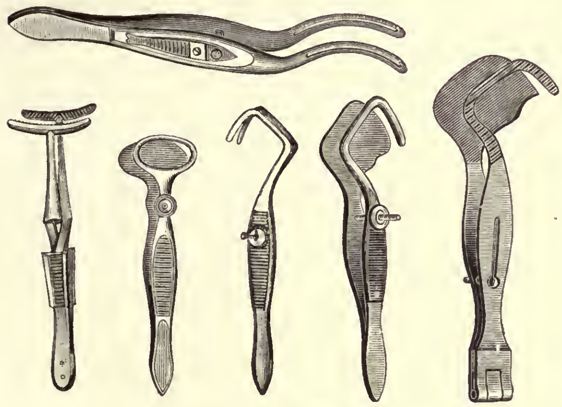
f. with long delicate blades, the tips being expanded and concave on their internal face to correspond to the spherical shape of a bullet; or the tips are hooked so that they may be forced into the bullet. [a, 34.]—**Bumstead's ear f.** A spring f. with secondary blades set at right angles; one of these blades is a rod terminating in double spring-blades with expanded oval extremities; the second blade, by the compression of the f., acts as a sliding compressor for the double spring blades. [a, 34.]—**Burge's throat f.** A single-jointed, scissor-handled f., with the shaft turned at right angles shortly beyond the handles; the blades are slender, moderately curved toward the extremity, and roughened on their internal face. [a, 34.]—**Buttles's speculum uterine f.** A spring, sliding-catch, long, mouse-tooth f. [a, 34.]—**Campbell's f.** An obstetrical f. furnished with a sliding lock, so that the relative length of the two blades can be altered. [A, 15.]—**Cannula-f.** Fr., *f. à canule.* Ger., *Cannula-F.*, *Röhrenf'.* It., *forcipe a canula.* A f. used to remove shreds of opaque capsule or of false membrane from the pupillary space. A single handle may be fitted with blades of different lengths and different widths of opening, some with lateral and some with terminal teeth. By pressing the trigger on the handle, the cannula is pushed forward, the blades are closed, and the instrument may be introduced through a very small puncture in the cornea. When the pressure on the trigger is relaxed, the cannula recedes and the blades expand, to be again closed on anything which is presented to their grasp. [F.]—**Catch f.** A f. that closes with a catch in the handles. [E, 4.]—**Chamberlen's f.** The original obstetrical f. invented by Hugh Chamberlen; a short instrument with only the cephalic curve. —**Charrière's traction-and-lever f.** A strong f. with blades like a fork. A strap of soft leather is stretched between the prongs of each fork, enabling them to keep a strong but painless hold upon the phalanx which is seized; used for traction in dislocations of the phalanges. [E.]—**Chassagny's f.** Fr., *f. de Chassagny à tractions soutenues.* An axis-traction obstetrical f., the blades of which are straight, except for a slight curve near the tip, and which do not lock, but are held apart for the purpose of allowing the elongation of the fœtal head; provided with concealed hooks which may be made to grasp the head after craniotomy, and with an apparatus for making continuous traction. [A, 15.]—**Cilia f., Ciliary f.** Fr., *f. ciliaire.* Ger., *Ciliarf'.*

CHAMBERLEN'S FORCEPS.

A stout epilation f. with the opposing smooth or roughened surfaces accurately fitted; used to extract individual cilia. [F.]—**Circumcision f.** A f. for clamping the prepuce and serving as a guide to the line of incision in the operation of circumcision. [a, 34.]—**Clamp f.** A spring f. with sliding-catch and long, slender blades, the inner surface of one blade having numerous pivots

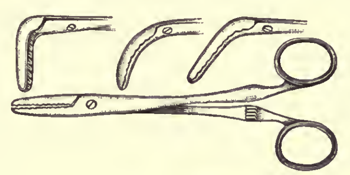
CRANIOTOMY FORCEPS.

that fit into cavities on the opposite blade. [a, 34.]—**Clay's ovariotomy-clamp f.** A strong wooden-handled f. with blades armed on their inner surface with thick plates of ivory, for compressing the pedicle in ovariotomy. [a, 34.]—**Cleborn's artery f.** A double spring f., with a spring-catch at either end, one end being used for holding an artery, the other for a needle. [a, 34.]—**Clitoridectomy f.** A tenaculum-pointed f. for holding the clitoris in clitoridectomy. [a, 34.]—**Condensing f.** A form of dental f. used in filling teeth. [a, 34.]—**Conjunctival f.** Any f. used in seizing and lifting up a fold of conjunctiva. [F.]—**Corey's ovum placenta f.** A long, slender, single-jointed f., the blades having broad, expanded, fenestrated ends that are concave on their internal surfaces. [a, 34.] —**Coxeter's artery f.** An artery f. without a spring, like an ordinary dissecting f. [E.]—**Coxeter's f.** 1. A dissecting f. with the blades decidedly bellied at the point where the finger and thumb rest, so that light pressure brings the points together firmly. [a, 37.] 2. A f. consisting of a scoop for one blade and a sharp rod for the other, the latter intended to pierce a bullet and hold it in the grasp of the former. [E, 4.]—**Crocodile f.** See *Alligator f.*—**Craniotomy f.** Fr., *tire-tête, f.* (ou *pince*) *à craniotomie.* Ger., *Excerebrationspincette*, *Knochenzange*, *Kopfzieher.* A long f. having blades shaped in various fashions, used to remove the fœtal skull after perforation. [a, 34.]—**Cross-action f., Cross-spring f.** A small artery f. with handles which cross each other. [E, 4.]—

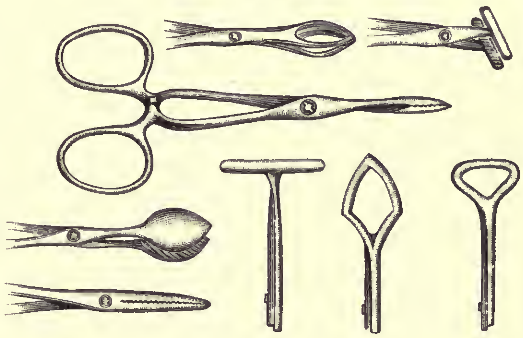


DENTAL FORCEPS.

Cusco's throat f. A single-jointed f. with decidedly curved jaws, one blade moving a short secondary blade; the extremities of the blades are ovoid, fenestrated, and roughened on their internal surface. [a, 34.]—**Cusco's tongue-holding f.** A f. with two expanded blades at right angles with the handles, one blade fitting under the tongue and split for the frenum, the other fitting over the tongue and fenestrated. [E.]—**Cutting f.** Ger., *Schneidezange.* A f. for cutting; of Ritgen, an instrument for dividing the fœtal head to facilitate delivery. ["Monatsschr. f. Geburtsh.," vi, p. 6; A, 20.]—**Dental f.** A double-jointed f. having long handles of various curves, and short jaws either straight or set at various angles. They are made of particular shapes for different teeth in the upper and lower jaw. [a, 34.]—**Depilating f.** A f. for removing hairs. [E.]—**Desmarre's entropium f.** A spring f. with the extremity of one blade ovoid and flattened, the other blade being fenestrated and corresponding in shape to the opposite blade. [a, 34.]—**Dilating f.** A f. with long, slender blades for dilating the cervix uteri. [a, 34.]—**Dislocation f.** A f. having a U-shaped extremity carrying a piece of webbing, for seizing the last phalanx in reducing a dislocation of a finger or toe. [a, 34.]—**Dissecting f.** Fr., *pince à dissection.* A spring f. having blades roughened externally to allow a firm hold, the internal surface of the extremities being serrated to retain tissue; it may have a spring-catch in the blades. [a, 34.] —**Dobell's tongue-holding f.** A thumb f. with a sliding catch and widely expanded, roughened blades, for holding the tongue. [E.]—**Doppelte Hakenf'** (Ger.). See *Reisinger's double-hook f.* — **Double-curved f.** See *Long f.* — **Dressing f.** A scissor-handled f. serrated on the internal face of the extremities of its blades, for removing dressings from wounds. [a, 34.]—**Durham's laryngeal f.** A flexible cannula containing two short blades that open when protruded. [a, 34.]—**Dynamometric obstetrical f.**



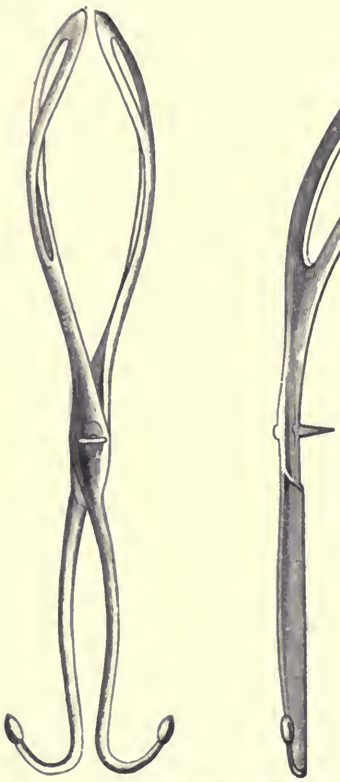
DEPILATING FORCEPS.



An obstetrical f. with a dynamometer attached, for measuring the tractile or compressive force exerted.—**Ear f.** Fr., *f. d'oreille.* Ger., *Ohrpincette, Ohrenzange.* An instrument of metal, usually steel, with long, slender blades and a spring back or handle, used for removing scales of epidermis, membraniform strings, or other foreign bodies from the external auditory canal. The blades may be straight or bent, crossed or uncrossed, and their extremities may be straight and provided with teeth or spoon-shaped and grooved on their inner surfaces. [F.]—**Elliot's obstetric f.** A long-handled, movable-jointed f., having moderately long, fenestrated, curved blades, also a screw mechanism for adjusting the degree to which the handles can be approximated. [α, 34.]—**Emmet's curette f.** A long, single-jointed f., the extremities of the blades being fenestrated and the internal faces being shaped like a curette. [α, 34.]—**Endolaryngeal f.** A curved or angular f. for removing intralaryngeal growths. [α, 34.]—**Enterotomy f.** A long f. having broad, expanded blades, for holding the intestine during enterotomy. [α, 34.]—**Entropion f.** A f. with curved, broad blades,

ENTROPION FORCEPS.

by which the skin parallel to the edge of the lid is seized and raised in the operation of excising a piece of the skin of the lids in the operation for the relief of entropion. [F.]—**Epilation f.** See *Depilating f.*—**Excerebration f.** Ger., *Excerebrationspincette.* Of Boër, a f. for removing the separate bones of the skull in craniotomy.—**Farabeuf's f.** A grasping f. with strong teeth all along the inner surface of each blade. [E, 4.]—**Fauvel's throat f.** A slender, single-jointed, scissor-handled f. with blades curved in the arc of a circle; the extremities of the blades are ovoid, concave on their internal face, and roughened. [α, 34.]—**Fenestrated f.** Fr., *f. fenêtré.* A f. with a fenestra in each blade.—**Ferguson's lion-jaw bone f.** A very heavy f. with a double row of teeth on each blade, for holding bone. [E, 4.]—**Fenestrated artery f.** A slide or spring-catch spring f., the tips being expanded and fenestrated and having mouse-teeth. [α, 34.]—**Ferguson's sequestrum f.** A long-handled, metal, double-jointed f., with conical jaws serrated internally, set at an angle. [α, 34.]—**Fixation f.** Fr., *f. à fixation.* Ger., *F. zum Fixiren, Fixirf*, *Fixationspincette.* It., *forcipe di fissazione.* Sp., *f. de fijación.* A conjunctival f. having a flat, blunt extremity when closed, and one blade with two small teeth, which are received between three corresponding teeth in the other blade. [F.]—**F. à canule** (Fr.). See *Cannula-f.*—**F. à craniotomie** (Fr.). See *Craniotomy f.*—**F. à crémaillère.** Of Guyon, a small, elastic, weak f., resembling the obstetrical f. in its general shape, for seizing the remains of the fœtal head after the base of the skull has been broken up. [A, 15.]—**F. à double crochet de Reisinger** (Fr.). See *Reisinger's double-hook f.*—**F. à fixation** (Fr.). See *Fixation f.*—**F. à lunettes** (Fr.). See *Spectacle f.*—**F. anterior corporis callosi.** Ger., *vordere Zange.* See *F. minor corporis callosi.*—**F. à traction axiale** (Fr.), **F. à traction dans l'axe** (Fr.). See *Axis-traction f.*—**F. brisé de Pajot** (Fr.). See *Pajot's f.* (2d def.).—**F. céphalotribe** (Fr.). Of Baudelocque, an instrument for performing the operation of cephalotripsy.—**F. ciliaire** (Fr.). See *Ciliary f.*—**F. classique** (Fr.). See *French f.*—**F. corporis callosi.** See *F.* (2d def.).—**F. corporis callosi anterior.** See *F. minor corporis callosi.*—**F. corporis callosi major.** See *F. major corporis callosi.*—**F. corporis callosi minor.** See *F. minor corporis callosi.*—**F. corporis callosi posterior.** See *F. major corporis callosi.*—**F. crenata.** Ger., *Kornzange.* An assayer's tongs. [A, 326 (α, 21).]—**F. deceptoria.** See Bistouri *caché.*—**F. de Chassagny à tractions soutenues** (Fr.). See *Chassagny's f.*—**F. de l'iris** (Fr.). See *Iris f.*—**F. dentaria.** 1. A dental f. 2. A toothed f. recommended by Aetius and Avicenna for the extraction of the fœtus by the breech. [α, 20.]—**F. de polype** (Fr.). See *Polypus f.*—**F. d'oreille** (Fr.). See *Ear f.*—**F. d'oreille fenêtré de Guye** (Fr.). See *Guye's fenestrated ear f.*—**F. longa et tersa.** Of Rueff, a long pair of pinchers, not unlike a rather broad-bladed lithotomy f.; used for grasping and extracting the fœtus after the operation of embryulcia. [A. R. Simpson, "Brit. Med. Jour.," Dec. 13, 1884, p. 1178.]—**F. lyonnais** (Fr.). An obstetrical f. with blades that articulate only at the proximal end of the handles and do not cross each other, but are provided with a fenestra at the usual situation of the joint, for the insertion of a fillet. [A, 15.]—**F. major corporis callosi.** Fr., *f. majeur.* Ger., *grössere Zange.* A band of white matter extending from the splenium of the corpus callosum backward to the occipital lobe, and appearing in the posterior horn of the lateral ventricle. [I, 23 (K).]—**F. minor corporis callosi.** Fr., *f. mineur.* Ger., *kleinere Zange.* Of Arnold, certain nerve-fibres which radiate from the corpus callosum into the hemispheres. [I, 6 (K).]—**F. obstetrica.** See *Obstetrical f.*—**F. perforateur** (Fr.). See *Perforating f.*—**F.-saw, F.-scie** (Fr.). See Forceps-saw.—**F. souple à tractions indépendantes** (Fr.). One of Poullet's terms for his new *sériceps* (*q. v.*).—**F. zum Fixiren** (Ger.). See *Fixation f.*—**Forcipressure f.** See *Hæmostatic f.*—**French f.** Fr., *f. classique.* An old term for the long obstetrical f. used in France, distinguished chiefly by the pelvic curve which was given to the instrument by Levret. [A, 29.]—**Galvanic f.** An obstetrical f. with the blades made of different metals, with the idea of exciting the uterus to increased contraction by galvanic action. [A, 43.]—**Gouge f.** A cutting f. having gouge-shaped blades that approximate on their sharpened edges. [α, 34.]—**Gross's bullet f.** A bullet f. with one blade hooked, and the other fenestrated and toothed. [E.]—**Gross's nasal polypus f.** A single-jointed scissor-handled f. with long, slender blades, curving slightly at their extremities; the latter are flattened, fenestrated, and grooved on their inner face. [α, 34.]—**Gross's sequestrum f.** A double-jointed f., with long, straight, or curved jaws. [α, 34.]—**Gross's tracheal f.** A scissor-handled f. made of ductile metal, that may be bent into any shape. [α, 34.]—**Guye's fenestrated ear f.** Fr., *f. d'oreille fenêtré de Guye.* Ger., *Guye's gefensterte Ohrpincette.* An instrument of metal with fenestrated blades; used formerly for removing foreign bodies from the ear. [F.]—**Hæmostatic f.** A f. having notched handles that

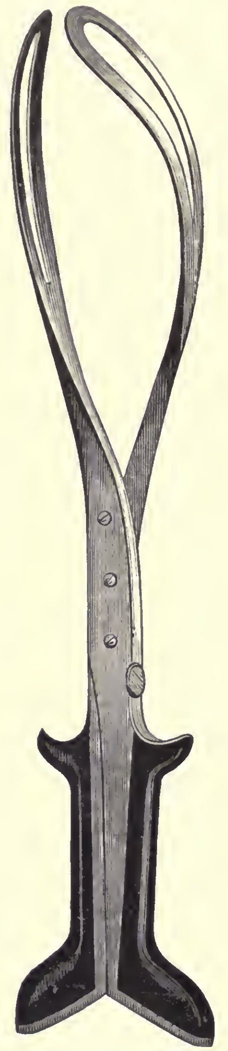


HÆMOSTATIC FORCEPS.

catch on one another, and the blades expanded at the extremities and serrated on their internal faces; used for clamping arteries. [α, 34.]—**Hartmann's f.** An axis-traction obstetrical f. invented by Hartmann, in 1870, in which backward pressure is made as the instrument rises over the vulva. [A, 15.]—**Hermann's f.** An axis-traction obstetrical f., invented by Hermann, of Berne, about 1844. [A, 15.]—**Hewson's torsion f.** An artery f. and a curved dressing f. connected with each other at the middle by a rivet passing through both. [E.]—**Hinton's (angular) polypus f., Hinton's ear f.** Fr., *f. de polype.* Ger., *Polypenzange, Polypenpincette.* An angular, curved f. with jointed angular blades and spoon-ends, for the removal of polypi from the middle ear and external auditory canal. [F.]—**Hoffman's gouge f.** A heavy bone f. the large blade of which is rectangular and open, the smaller blade fitting completely within it when the handles are closed. [E.]—**Hook-f.** Ger., *Hakenzange.* Of Davis, a craniotomy f. consisting of two hooks articulated like an obstetrical f. [A, 61.]—**Hubert's f.** An axis-traction obstetrical f. invented by Hubert, of Louvain, in 1860; consisting at first of a long, hook-like backward prolongation of each handle; afterward modified by the omission of the hooks and the substitution of a long steel bar to be caught between the handles. [A, 15.]—**Hutchison's hare-lip f.** A thumb f. with a screw for closing and opening, and blades bent at a right angle to the shaft, which is also bent at a right angle. The blades are expanded, and shaped like the arm-piece of a crutch. [E.]—**Intracisor f.** A form of f. devised to supersede the ligature. [D.]—**Iridectomy f., Iris f.** Fr., *f. de l'iris.* Ger., *Irisf.* A very delicate f., with the blades sometimes straight, sometimes curved near their extremities to form a right or obtuse angle with the rest of the instrument, so that it can be introduced through an incision at any part of the corneal margin. The little teeth are not terminal but lateral, and on the convex side of the curve, so that the iris tends to rise between the blades when they are separated. [F.]—**Isaac's bone-cutting f.** A large double-jointed f., the blades being long and having cutting edges, shaped like a bayonet. [α, 34.]—**Knapp's entropion f.** A spring f., fastened by a screw-

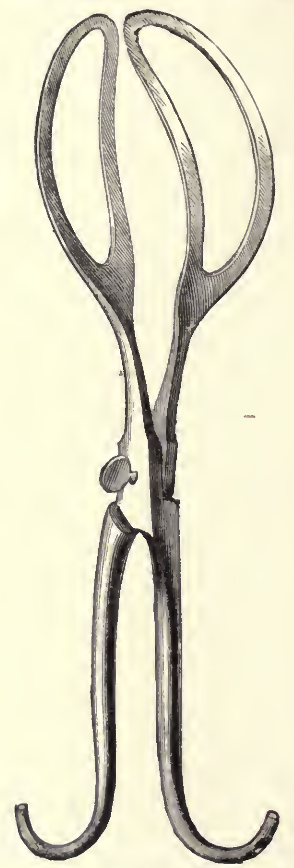
IRIS FORCEPS.

nut, the extremities of the f. being curved; one blade is flattened into a semi-oval, while the other is curved to correspond in contour to the opposite blade. The f. is made for either the right or left eyelid. [a, 34.]—**Langenbeck's artery f.** A f. with wider and heavier ends than those of the American pattern, and a sliding catch. [E.]—**Lever-ring f.** Of Toynbee, an instrument for the removal of aural polypi. In the interior of a tube is a delicate steel rod the end of which is split into two portions, each having a small oval ring at its extremity. These rings (the inner surfaces of which are slightly serrated) are separated from each other when the lever is not pressed; but as soon as it is pressed, the rings are brought into contact. The instrument is introduced into the meatus with the rings apart, which having been made to inclose the polypus between them, the lever is pressed down and the polypus seized and drawn out. [F.]—**Levret's f.** See *French f.* and *Long f.*—**Liston's artery f.** A f. with very fine points and a spring-catch. [E.]—**Lithotomy f.** Fr., *f. à lithotomie.* Ger., *Blasensteinzange*,



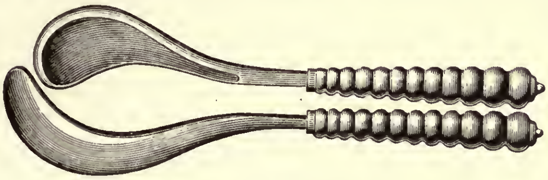
LEVRET'S FORCEPS.

Blasensteinzängelchen. A strong f. for seizing and removing vesical calculi in the operation of lithotomy. [E.]—**Living f.** Of Aitken, an obstetrical f. invented by him in 1784, the chief feature of which consisted in the addition of a screw between the handles, to prevent undue compression of the child's head. [A, 82.]—**Long f.** Fr., *f. classique.* Ger., *grosse Zange.* Syn.: *double-curved f.*, *French f.* That form of the obstetrical f. in which the blades are long and have a pelvic curve, fitting the instrument for use when the fœtal head is situated high in the pelvis. Essentially the same instrument was invented by Levret in 1747, and by Smellie in 1752. [A, 15, 22.]—**Loomis's placenta f.** A single-jointed f. having long blades, expanded and fenestrated at their ends, and concave on their internal surfaces. [a, 34.]—**Löwenberg's post-nasal f.** A



ASSALINI'S FORCEPS.

f. with long, slender, downward-curved handles, and short upward-curved blades. The extremities of the latter are concave on their internal faces, with sharpened edges. [a, 34.]—**Liler's polypus f.** A single-jointed, scissor-handled f. with a hinge-jointed catch on the handles. The blades are narrow, curved, and expanded into broad fenestrated tips. [a, 34.]—**Mackenzie's punch-f.** A bent-handled f. having slender blades with a projecting punch at the extremity of one blade that fits into a fenestra in the opposite blade. [a, 34.]—**Mattei's f.** An obstetrical f. with a movable lock so constructed that the blades need not be inserted to the same depth, nor be exactly opposite or even parallel. [A, 15.]—**Mathieu's ear f.** A long spring f. with a sliding catch; the extremities of the blades are oval, concave on their inner face, and serrated about the margin. [a, 34.]—**Mathieu's throat f.** A long, curved, slender, scissor-handled f. having a pivoted bar near the handles, a double joint near the jaws, and one jaw mobile; the jaws are long, concave on their inner face, and serrated along the edges. [a, 34.]—**McFerran's f.** An obstetrical f. in which the blades are hinged at their junction with the shafts so as to allow of axis-traction. [a, 34.]—**McLane's obstetrical f.** A wooden-handled f. in which the blades are broad, concave on their internal face, and without fenestræ. [a, 34.]—**McClintock's polypus f.** A movable-jointed, scissor-handled f. having long, slender handles and blades; the ends of the

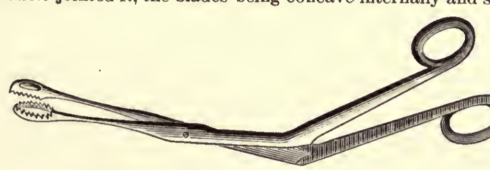


TAYLOR'S NARROW-BLADED FORCEPS.

HODGE'S FORCEPS.

blades are expanded into round, flat plates. [a, 34.] — **Meigs's craniotomy f.** A double-jointed f. having long handles and short, angular jaws, that are grooved transversely on their internal surface. [a, 34.]—**Meunier's f.** A cross-spring f. with slender blades curved toward the extremity, near which the blades cross; the extremities are flattened and concave on their internal face. [a, 34.]—**Microscope f.** A delicate f., either curved or straight, for handling cover-glasses or microscopic objects. [J.]—**Midwifery f.** See *Obstetrical f.*—**Milne's artery compression f.** A serre-fine bent at a right angle. [E.]—**Moralès's f.** 1. An obstetrical f. designed to prevent injury of the perinæum. 2. An axis-traction obstetrical f. acting as such by reason of its shape, and not by any mechanical addition. [A, 15.]—**Noeggerath's f.** A single-jointed, scissor-handled f. with a grooved catch on the handles. The blades are long, curved, and roughened to seize hold of the vaginal walls. [a, 34.]—**Nägele's f.** An obstetrical f. like Brünninghausen's essentially, but with a wing-like projection of the handles at their junction with the shanks. [A, 15.]—**Nélaton's ovarian-cyst f.** A long f. having circular expanded tips, dentated on their internal faces; used for holding the cyst after it has been opened. [a, 34.]—**North's ear f.** A double-jointed, scissor-handled f. with curved blades, one of which is concave at the extremity and containing a perforation to receive a tooth set in the opposite blade. [a, 34.]—**Nott's uterine tenaculum f.** A spring

cross-action f. in which the tips of the blades form hooks. [a, 34.] —**Nunneley's clip f.** A self-closing f. for holding bleeding vessels. [E, 4.]—**Obstetric f., Obstetrical f.** Lat., *f. obstetricia.* Fr., *f. obstétrical, tire-tête.* Ger., *Geburtszange, Kopfzange, Kopfzieher.* A f. for extracting the fœtus (generally by the head) during parturition. See *Short f., Long f., Axis-traction f.*, etc.—**Œsophageal f.** A single- or double-jointed f. with a long shaft and quite long blades; the latter may work on cross-pivots, the extremities being roughened or fenestrated. [a, 34.]—**Ovum-f.** Ger., *Abortuszange.* A f. for removing the ovum, or retained portions thereof, from the uterus in cases of abortion.—**Pajot's f.** 1. A short obstetrical f. with the pelvic curve. 2. A long obstetrical f., not materially different from Levret's, except that the blades were jointed, making the instrument more portable. [A, 15.]—**Palfyn's f.** An obstetrical f. invented by Palfyn, of Gand, about 1713, con-

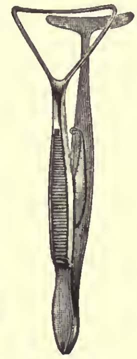


PALFYN'S FORCEPS.

sisting of two highly curved blades, which were not fenestrated and did not articulate with each other. [A, 15.]—**Perforating f.** An instrument invented by the brothers Lollini, of Bologna, for the extraction of the fœtus after craniotomy. It is a strong f. with a movable perforator attached to it. After the vault of the cranium has been opened the perforator is brought to bear upon the base, boring into it in several places and so weakening it as to enable the f. to crush it. [A, 85.]—**Petit's f.** An obstetrical f. with a contrivance between the handles for limiting the compression of the fœtal head. [A, 15.]—**Phimosis f.** A f. for holding the prepuce in the operation for phimosis. [E.]—**Placenta f.** A f. having

PLACENTAL FORCEPS.

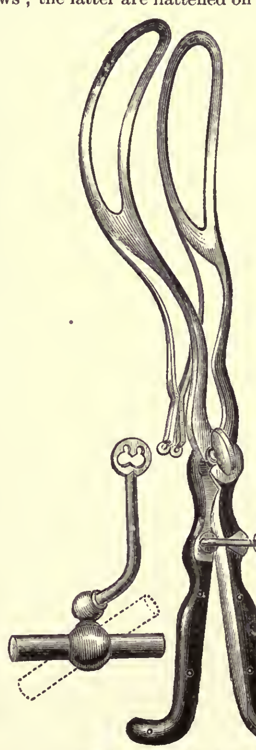
blades slightly expanded at the extremity, and concave on the internal face, for removing portions of the adherent placenta. [a, 34.] —**Politzer's ear f.** A spring f. with angular, fine blades that are ovoid at their extremity, concave on their inner face, with serrated edges. [a, 24.]—**Politzer's f.** A spring f. with blades set at an angle to the shaft, the extremities of the blades being fine and roughened to hold eyelets introduced into perforations of the membrana tympani. [a, 34.]—**Polypus f.** A single-jointed, ring-handled f. having long, slender blades that terminate in ovoid ends flattened on the internal surface. [a, 34.]—**Polypus dressing f.** A single-jointed, scissor-handled f. with ovoid tips roughened on their internal face. [a, 34.]—**Posterior f. of the corpus callosum.** See *F. major corporis callosi.*—**Rau's f.** See *Spectacle f.*—**Reisinger's double-hook f.** Fr., *f. à double crochet de Reisinger.* Ger., *Reisinger'sche F. mit doppelten Haken, doppelte Hakenf'.* An instrument devised for detachment of the iris from natural or acquired adhesions. Each branch of the f. has a hook upon its end, which, being turned in the same direction, acts as one hook when the blades are closed. [F.]—**Robinson's f.** A single-jointed, scissor-handled f. with a grooved catch on the handles; and long, slender, moderately curved blades, the inner face of each concave toward the extremity and the edge serrated. [a, 34.]—**Röhrenf'** (Ger.). See *Cannula-f.*—**Satterlee's bone-cutting f.** A double-jointed f., the blades being concave internally and sharp-



NASAL POLYPUS FORCEPS.

ened at their free extremities. [a, 34.]—**Saw-f.** See FORCEPS-SAW. —**Self-closing artery f.** A spring f. with the blades crossed so that compression of the spring opens the blades. [a, 34.]—**Serre-fine f.** See SERRE-FINE.—**Seyfert's bone f.** Ger., *Seyfert'sche Knochenzange.* A f. for making traction on the bony structures of the fœtus after craniotomy, decapitation, or embryulcia.—**Short f.** Ger., *kleine Zange.* Syn.: *single-curved f.* That variety of the obstetrical f. in which, the instrument being short, the blades have only the cephalic curve. [A, 22.]—**Shoulder entropion f.** A spring f., one for each eye, with a screw and nut in the middle to keep the blades compressed. The lower blade is thin, broad, and curved, so as to fit the inner surface of the lid, and may be made of steel, rubber, shell, or bone. The upper blade is a slender wire rim forming three sides of a square with rounded angles adapted to the outer edge of the under blade. Used in the opera-

tion for entroplon. [F.]—**Shrimpton's f.** A strong f. for bending Smith's anterior splint while *in situ*, to adapt it to the limb. [E.]—**Siebold's f.** See *Von Siebold's f.*—**Simpson's obstetrical f.** A short-handled f., with long or short curved, fenestrated blades. [a, 34.]—**Simrock's nasal polypus f.** A single-jointed, scissor-handled f. with the handles angled and the blades thin and expanded at the extremities; the latter are fenestrated and the edges sharply serrated. [a, 34.] —**Sims's caustic f.** A long spring f. with slender blades that expand at the end into a narrow, concave holder for caustic. [a, 34.] — **Single-curved f.** See *Short f.*—**Slide-catch entropion f.** A spring f. with the extremities of the blades fenestrated, curved, and roughened on the internal face; the f. is kept closed by a slide catch. [a, 34.]—**Slide f.** A f. which closes with a sliding catch in the handles. [E. 4.]—**Smellie's f.** 1. A short obstetrical f. with a lock. 2. A long obstetrical f. not materially different from Levret's f. (*q. v.*) except in the lock. — **Smith's hæmorrhoid clamp-f.** A scissor-handled f. having broad, flat blades. The internal face on one side is concave and on the other



POST-NASAL FORCEPS.

TRICHIASIS FORCEPS.

convex and serrated. Ivory plates are riveted to the blades to prevent burning of the skin when the cautery is used. The f. is compressed by a nut and screw on the handles. [a, 34.]—**Smith's hare-lip f.** A thumb f. with a sliding catch and nearly semicircular blades. [E.]—**Snellen's clamp f.** A f. for holding the lid in the operation for entropion.—**Spectacle f.** Fr., *f. à lunettes.* Ger., *Brillenf'.* Of Rau, an instrument for retaining the Eustachian catheter in place. It consists of a spectacle-frame with a f. attached which may be fastened in any position desired by means of a screw and slide. [F, 38.]—**Speculum f.** A long, straight or curved f. to be used with a speculum. [a, 34.]—**Spring f.** A f. formed of two flattened or concave blades riveted together at one end, the blades being always separated unless caught by a catch or other compressing agent. [a, 34.]—**Stage f.** A f. on a pivot with a spring or screw to close it, attached to the stage of a microscope to hold delicate objects while they are being observed. [J.]—**Stimson's needle-holder and cutting f.** A double-jointed f. with long, curved handles and short jaws; the latter are flattened on their internal face to hold a needle, and have a short knife-edge inserted for cutting. [a, 34.] —**Stoltz's f.** An obstetrical f. with large fenestræ and with hinged lateral projections at the junction of the handles with the shanks, to be grasped in making traction. [A, 15.] — **Strabismus f.** An instrument used for picking up the tendon of one of the ocular muscles and putting it on the stretch previous to division of the tendon with scissors in the operation for the cure of squint. It is of various shapes. [F.]—**Straight midwifery** (or **obstetrical**) **f.** See *Short f.*—**Tarnier's f.** An axis-traction obstetrical f. invented (in more than thirty different patterns) by Tarnier, of Paris, between 1877 and 1879. [A, 15.]—**Tarsitani's f.** An obstetrical f. with a pivot-back so constructed (the pivot playing back and forth) that the second blade introduced may be placed either above or below the first one. [A, 15.]—**Teevan's lithotomy f.** A long lithotomy f. with fenestrated blades. [E.]—**Tenaculum f.** See VOLSELLA.—**Thenance's f.** See *F. lyonnais.*—**Thomas's craniotomy f.** A single-jointed f. having long, firm metallic handles, and short, curved blades the inner surfaces of which are grooved transversely; there are three sharp-pointed teeth on one blade fitting into excavations on the opposite blade. [a, 34.]—**Thomas's uterine dressing f.** A spring, sliding-catch, long mouse-tooth f. [a, 34.]—**Thompson's urethral f.** A long, slender, scissor-handled, single-jointed f. with the tips of the blades expanded and roughened on their internal faces. [a, 34.] — **Thompson's**

TARNIER'S MODIFIED FORCEPS.

vesical f. A long, slender, scissor-handled, single-jointed f. with narrow expanded blades, roughened on their internal face. [*a*, 34.]—**Toe-nail extracting f.** A narrow-jawed, double-jointed f. for extracting toe-nails. [*a*, 34.]—**Tongue f.** A f. in which the blades terminate in fenestrated oval or circular extremities; used for seizing the tongue. [*a*, 34.]—**Tooth f.** See *Dental f.*—**Torsion f.** A f. in which the extremities of the blades are slightly expanded and serrated on their internal faces so as to firmly hold an artery for torsion. [*a*, 34.]—**Toynbee's ear f.** A double-jointed, scissor-handled f. with blades at a right angle to the shaft. [*a*, 34.]—**Tracheal f.** A long, slender f. having the blades curved at various angles to facilitate its introduction within the trachea. [*a*, 34.]—**Trélat's f.** A slender and yielding obstetrical f. with handles like those of a tooth f., perforated near their proximal end for the insertion of a peg for making traction. [A, 15.]—**Trephining f.** A f. in which the extremities of the blades have a circular outline (used to remove the button of bone removed by a trephine). [*a*, 34.]—**Twisting f.** A long spring, sliding-catch f., the tips of the blade being expanded and grooved on their internal faces, for holding a wire ligature while twisting it. [*a*, 34.]—**Tympanum f.** An instrument sometimes employed for the introduction of pellets or rolls of cotton into the tympanic cavity. It is a delicate instrument with a spring f. at one end and a probe at the other. [F.]—**Valette's f.** An obstetrical f. like the *f. lyonnais*, except that the handles are joined by means of a bayonet catch. [A, 15.]—**Van Buren's f.** A double-jointed f. with angular, conical jaws. [*a*, 34.]—**Vesical f.** A f. having long, slender blades with the extremities shaped in different fashions, for removing calculi or tumors from the bladder. [*a*, 34.]—**Volsella f.** See VOLSELLA.—**Von Siebold's f.** An obstetrical f. in which the lock was a modification of that of Levret's, the slot being placed at the side, so that the pivot entered it on simply approximating the blades. [A, 15.]—**Von Tröltsch's ear f.** A single jointed f. with scissor-handles, the extremities of the blades being oval and serrated; the handle is straight or may have a bayonet curve. [*a*, 34.]—**Vulsella f.** See VOLSELLA.—**Walton's iris f.** A fenestrated cross-spring f. with fine, thin blades toothed at their extremities. [*a*, 34.]—**Wells's artery pressure-f.** A scissor-handled f. having catches on the handles, the blades thin and serrated on the internal faces of their extremities. [*a*, 34.]—**Wells's pedicle f.** A f. for seizing the pedicle in ovariotomy. [*a*, 34.]—**Whitehead's seizing f.** A crossed spring f., one blade being curved toward the extremity and terminating in two sharp points; the second blade is truncated, and on a pivot at its extremity is a blade, fastened by a screw to the first blade, the extremity being pointed and coaptating with the points of the first blade. [*a*, 34.]—**Wilde's cannulated f.** A small spring f. set in a cannula, worked by a ratchet in the handle of the cannula. [*a*, 34.]—**Wilde's ear f.** A spring f. with tapering blades set at an angle to the handle. [*a*, 34.]

FORCEPS-SAW, n. Fo^{2}r-se^{2}ps-sa-^{4}. Fr., *f.-scie.* Ger., *Zangensäge.* Of Van Huevel, an instrument for sawing through the fœtal head to facilitate delivery. It consists of a combination of the obstetrical forceps with a chain-saw. [A, 20.]

FORCERAL (Fr.), n. Fors-ra^{3}l. A place in the department of the Pyrénées-Orientales, France, where there is a gaseous, ferruginous spring. [L, 49, 87 (*a*, 14).]

FORCHIN (Fr.), n. For-sha^{2}n^2. The *Boletus edulis.* [B, 121, 173 (*a*, 24).]

FORCIBLE, adj. Fors'i^2-b'l. 1. Powerful. 2. See FORCED.

FORCIPAL, adj. Fo^{2}r'si^{2}p-a^{2}l. From *forceps* (*q. v.*). Pertaining to a forceps.

FORCIPATE, FORCIPATED, adj's. Fo^{2}rs'i^{2}p-at, -at-e^{2}d. Lat., *forcipatus* (from *forceps*). Ger., *zangenförmig.* Forceps-shaped. [B, 19, 123 (*a*, 24).]

FORCIPRESSURE, n. Fors'i^2-pre^{2}s-su^{2}r. From *forceps* (*q. v.*), and *pressura*, pressure. Fr., *f.* Of Desault, Assalini, and others, a method of arresting hæmorrhage by applying a spring forceps to the divided vessel and allowing it to remain in place for a number of hours. [A, 385; L, 49, 87 (*a*, 14).]

FORCIPULA (Lat.), n. f. For(fo^{2}r)-si^{2}p(ki^{2}p)'u^{2}l(u^{4}l)-a^3. Dim. of *forceps.* Fr., *forcipule.* Ger., *Zänglein.* A little forceps. [A, 322.]

FORCIPULÉ (Fr.), adj. For-se-pu^6-la. Furnished with forcipulæ; as a n., in the pl., *f'es*, a group of the *Arachnida* so characterized. [L, 41.]

FORDEL-SQUARE, n. Ford''e^{2}l-skwa^{2}r'. A place in the County of Fife, Scotland, where there is a mineral spring. [A, 316.]

FÖRDERUNGSMITTEL (Ger.), n. Fu^{6}rd'e^{2}r-un^{2}z-mi^{2}t-te^{2}l. An adjuvant. [A, 521.]

FORDONGIANO (It.), n. Fo^{2}r-do^{2}n-ja^{3}n'o. A place near the Cape of Cagliari, Sardinia, where there is a hot spring containing calcium sulphate. [B, 132 (*a*, 14); L, 49.]

FOREARM, n. For'a^{3}rm. Lat., *antibrachium.* Fr., *avant-bras.* Ger., *Vorderarm.* That portion of the upper or pectoral limb that extends from the elbow to the wrist.

FORE-BIT, FORE-BITTEN MORE, n's. For'bi^{2}t, -e^{2}n mor. The *Scabiosa succisa.* [B, 275 (*a*, 24).]

FOREBRAIN, n. For'bran. Ger., *Vorderhirn.* See PROSENCEPHALON.

FORE-FINGER, n. For'fi^{2}n^2-gu^{6}r. See under FINGER.

FOREFOOT, n. For'fu^{4}t. The foot (hand) of a forelimb.

FORE-FRONT, n. For'fru^{2}nt. See FOREHEAD.

FOREGUT, n. For'gu^{2}t. Ger., *Vorderdarm.* The anterior portion of the primitive alimentary canal of the embryo, comprising the rudiments of the pharynx, the œsophagus, the stomach, and the duodenum. [A, 5.]

FOREHEAD, n. Fo^{2}r'e^{2}d. Gr., μέτωπον, ὀφρύς. Lat., *frons.* Fr., *front.* Ger., *Stirn.* It., *fronte.* Sp., *frente.* The fore part of the head, extending from the line of the hair to the level of the top of the orbit (in birds, from the vertex to the base of the bill). [L, 343.]

FOREIGN, adj. Fo^{2}r'e^{2}n. Gr., ἀλλότριος. Lat., *alienus.* Fr., *étranger.* Ger., *fremd.* 1. Existing in or brought from another country, not native. 2. Lodged in a part, but derived from some other part or from without the organism (see *F.* BODY).

FORELIMB, n. For'li^{2}m. The upper or pectoral limb of an animal.

FOREMILK, n. For'mi^{2}lk. See COLOSTRUM.

FORENECK, n. For'ne^{2}k. In ornithology, the whole front of the collum, from chin to breast; the whole throat. [L, 343.]

FORENSIC, adj. Fo-re^{2}n'zi^{2}k. Lat., *forensis* (from *forum*, a market place). Fr., *légal.* Ger., *forensisch.* Pertaining to judicial inquiries (see *F.* ANALYSIS, *F.* MEDICINE, etc.).

FORESKIN, n. For'ski^{2}n. See PREPUCE.

FORET (Fr.), n. Fo-ra. From *forare*, to pierce. A surgical perforator. [L, 87 (*a*, 14).]

FORETYPE, n. For'tip. See ARCHETYPE.

FORFEX (Lat.), n. f. Fo^{2}r'fe^{2}x. Gen., *forf'icis.* From *forus*, what is out of doors, and *facere*, to make. Gr., ψαλίς. 1. A pair of scissors. 2. A forceps. [A, 318.]

FORFICATE, adj. Fo^{2}r'fi^2-kat. From *forfex*, a pair of scissors. Deeply forked. [L, 341 (*a*, 27).]

FORFICIROSTRE (Fr.), adj. For-fe-se-ro^{2}s-tr'. For deriv., see FORFEX and ROSTRUM. Having a scissor-shaped beak. [A, 385.]

FORFICULA (Lat.), n. f. Fo^{2}r-fi^{2}k'u^{2}l(u^{4}l)-a^3. Dim. of *forfex.* Fr., *forficule.* A genus of the *Forficulariæ*, having 15 jointed antennæ. [L, 354.] The *Forficulariæ* (Fr., *forficulides*) of Latreille are a family of the *Orthoptera*, distinguished by their narrow and flattened bodies and short wing-covers. The *Forficularidæ* are the same. [Packard (*a*, 27).]—**F. auricularis.** Fr., *perce-oreille.* Ger., *Ohrwurm*, *Oehrling.* The ear-wig, a small insect which lives on the leaves of fruits and flowers, and has a tendency to fly into the ear. [F.]

FORGES (Fr.), n. Forzh. A place in the department of the Loire-Inférieure, France, where there is a weakly chalybeate spring. [L, 49, 87, 105 (*a*, 14); J. Larouvière, "Union méd.," June 8, 1886, p. 943.]

FORGES-LES-BAINS (Fr.), n. Forzh-la-ba^{2}n^2. A place in the department of the Seine-et-Oise, France, where there are gaseous springs, and a hospital having baths for scrofulous children. [L, 49, 87 (*a*, 14).]

FORGES-LES-EAUX (Fr.), n. Forzh-lazh-o. A place in the department of the Seine-Inférieure, France, where there are gaseous and ferruginous springs containing a little crenic acid. [L, 49, 87, 105, 135 (*a*, 14).]

FORGES-SUR-BRIIS (Fr.), n. Forzh-su^{6}r-bre-e. See FORGES-LES-BAINS.

FORGET-ME-NOT, n. Fo^{2}r-ge^{2}t'me-no^{2}t. 1. The *Veronica chamædrys.* 2. The genus *Myosotis*, especially the *Myosotis palustris* and *Myosotis arvensis.* 3. The *Ajuga chamæpitys.* [A, 505 (*a*, 21); B, 19, 275 (*a*, 24).]—**American f.-m.-n.** The *Myosotis verna.* [B, 275 (*a*, 24).]—**Antarctic f.-m.-n., Chatham Island f.-m.-n.** The *Myosotidium nobile.* [B, 19, 275 (*a*, 24).]—**Indian f.-m.-n.** The *Ipomœa quamoclit.* [B, 275 (*a*, 24).]—**Rock f.-m.-n.** The *Omphalodes Luciliæ.* [B, 275 (*a*, 24).]

FORK, v. intr. Fo^{2}rk. See BIFURCATE (v. intr.).

FORK, n. Fo^{2}rk. Gr., δίκρανον. Lat., *furca.* Fr., *fourche*, *fourchette.* Ger., *Gabel.* 1. See BIFURCATION. 2. An instrument having two slender, slightly divergent blades.—**F's-and-knives.** The *Lycopodium clavatum.* [A, 505 (*a*, 21).]—**F. for sutures.** Two short, blunt prongs on a steel shaft, to hold wire in suturing. [*a*, 34.]—**Stimson's f. for fracture of the patella.** A f. having two prongs an inch long bent on the flat at an angle of 45° with a shaft three inches long. On the shaft, at the base of the prongs, is a ring for attaching an India-rubber cord; another ring at the base of the shaft is for a bandage around the thigh. [Stimson, "N. Y. Med. Jour.," Jan. 3, 1885, p. 23 (*a*, 34).]—**Tuning f.** An instrument, usually of steel, consisting of a heavy two-pronged f. which, when made to vibrate, emits a musical note of a definite pitch. It is used in the diagnosis of ear diseases in testing the bone-conduction of sounds, for which purpose the tuning f. is placed upon any desired part of the head and set in vibration, when, if sounds are conducted to the internal ear through the cranial bones, the note emitted will be audible, and will be the louder and longer the more perfect the bone-conduction is. The fact that any given tuning f. will always when set in motion give the same number of vibrations in a second renders it useful as a means of measuring minute intervals of time. For this purpose the f. is placed in contact with a revolving blackened cylinder on which its vibrations are traced, or it is made to carry a mirror the light reflected from which renders the excursions of the f. visible. Blake's tuning f. has a rubber-tipped hammer attached to the end of an elastic rod which is fastened to one arm of the f. This arrangement, by fixing the distance through which the hammer falls, renders it possible to produce a note of uniform intensity. Tuning f's for diagnostic purposes often have sliding clamps placed upon one or both arms, which have the effect of diminishing the over-tones, and also permit the pitch of the tone emitted to be altered. [B.]

FORKED, adj. Fo^{2}rk'e^{2}d. See BIFID.

FORM, n. Fo^{2}rm. Gr., μορφή. Lat., *forma.* Fr., *forme.* Ger., *F.*, *Gestalt.* The outward appearance of an organ or part, as distinguished from the material of which it is composed. [B, 1, 123

(α, 24).]—**Aggregationsf'** (Ger.). See AGGREGAT*zustand.*—**F'-beständigkeit** (Ger.). The persistence of the same f. in different generations of the *Schizomycetes.* [A, 396 (α, 21).]—**F'bestandtheil** (Ger.). A morphological element.—**F'element** (Ger.), **F'-elementartheil** (Ger.). See CELL and *Anatomical* ELEMENT.—**F'enlehre** (Ger.). See MORPHOLOGY.—**F'los** (Ger.). See AMORPHOUS.

FORMAL, n. Fo^{2}rm'a^{2}l. Ger., *F.* Methylal, methylene dimethylate, $CH_2.(O.CH_3)_2$, a colorless liquid obtained by the incomplete oxidation of methyl alcohol. [B, 5.]

FORMALDEHYDE, n. Fo^{2}rm-a^{2}l'de-hid. Ger., *Formaldehyd.* See FORMIC *aldehyde.*

FORMAMIDE, n. Fo^{2}rm'a^{2}m-i^{2}d(id). Fr., *f.* Ger., *Formamid.* Amide of formyl, (NH_2.CHO,), or ammonia in which the radicle of formic acid replaces an atom of hydrogen; a colorless liquid boiling at 195° C. [B, 4.]

FORMANILIDE, n. Fo^{2}rm-a^{2}n'i^{2}l-i^{2}d(id). A substance, C_6H_5N.(CHO).H = C_7H_7NO, forming colorless, acicular crystals. [B, 4.]

FORMATE, n. Fo^{2}rm'at. Lat., *formias.* Fr., *f.* Ger., *Formiat. ameisensaures Salz.* A salt of formic acid. The f's have in general the formula $(CHO_2)_nR$, where R is a radicle of the quantivalence *n.* In addition there is a series of salts called the *orthof's,* of the general constitution $CH \equiv (OR)_3$, where R is a univalent radicle. [B.]

FORMATIO (Lat.), n. f. Fo^{2}rm-a(a^3)'shi^2(ti^2)-o. Gen., *formatio'nis.* From *forma,* form. A formation; of Reichenbach, a division of plants intermediate between an order and a family. [B, 170.]—**F. granulosa.** See MEMBRANA *granulosa.*—**F. reticularis.** See *Reticular* FORMATION.—**F. reticularis alba.** Ger., *weisse reticülare Substanz.* A tract of white nerve-substance, poor in ganglion cells, situated in the medulla oblongata between the roots of the hypoglossal nerves. [I, 17 (K).]—**F. reticularis gangliosa** (seu **grisea**). A tract of gray matter, rich in multipolar ganglion-cells, which is traversed by numerous capillary vessels. It is situated in the anterior portion of the medulla oblongata in close proximity to the decussation of the pyramids. [I, 17 (K).]

FORMATION, n. Fo^{2}rm-a'shu^{3}n. Gr., πλάσις, μόρφωσις. Lat., *formatio* (from *formare,* to form). Fr., *f.* Ger., *F., Gestaltung, Bildung.* 1. The process by which anything is formed. 2. The thing formed.—**Ammonshornf'** (Ger.). 1. See *F. of the cornu ammonis.* 2. See HIPPOCAMPUS *major.*—**Cell f.** Fr., *f. cellulaire.* Ger., *Zellenf'.* 1. See CELL-*genesis.* 2. A tissue or mass composed of cells. ["Arch. f. path. Anat. u. Phys. u. f. klin. Med.," 185 (J).]—**Claustral f., Claustrum f.** Ger., *Vormauerf', Spindelzellenf'.* Of Meynert, the fifth layer of the cerebral cortex, from its containing so many fusiform cells similar to those in the claustrum. [J, 35.]—**F. endogène** (Fr.). See *Endogenous* REPRODUCTION.—**F. of the cornu Ammonis.** Ger., *Ammonshornf'.* 1. Of Meynert, the cerebral cortex of the cornu Ammonis, in which the nerve-cells are almost exclusively of the large pyramidal form. 2. The third stratum of the five-strata type of the cerebral cortex, as it is likewise characterized by the large pyramidal nerve-cells. [J, 30, 35.]—**Granular f.** See *Granule-like f.*—**Granule f.** See *Granule-*MASSES.—**Granule-like f.** Ger., *körnerartige F.* Of Meynert, the thin layer of small, irregular, closely packed ganglion-cells forming the fourth stratum in the five-strata type of the cerebral cortex. [J, 32, 35.]—**New f.** See NEOPLASM.—**Reticular f.** Lat., *formatio reticularis.* Fr., *f. reticulée.* Ger., *Reticulärf.* The dorsal portion of the medulla oblongata, below the nuclei of the tenth and twelfth cranial nerves, so called from its microscopic appearance, due to the interlacing of numerous transverse and longitudinal white nerve-fibres, among which are scattered nerve-cells. [I, 1 (K).]—**Spindle-cell f., Spindelzellenf'** (Ger.), **Vormauerf'** (Ger.). See *Claustral f.*

FORMATIVE, adj. Fo^{2}rm'a-ti^{2}v. Gr., πλαστικός. Lat., *formativus.* Fr., *formateur.* Ger., *bildend.* Pertaining to or taking part in a process of formation.

FORME (Fr.), n. Form. See FORM and RING-BONE.

FORMED, adj. Fo^{2}rmd. Lat., *formatus.* Fr., *formé.* Fully differentiated. See *F.* MATERIAL.

FORMEL (Ger.), n. Form'e^{2}l. See FORMULA.—**Arzneif'.** See PRESCRIPTION.—**Blüthenf'.** See *Floral* FORMULA.—**Constitutionsf'.** See *Constitutional* FORMULA.—**Einfache F.** See *Simple* FORMULA.—**Reactionsf'.** See *Decomposition* FORMULA.—**Strukturf'.** See *Constitutional* FORMULA.—**Umsetzungsf'.** See *Decomposition* FORMULA.—**Zahnf'.** See *Dental* FORMULA.—**Zusammengesetzte F.** See *Composite* FORMULA.

FORMEND (Ger.), adj. Fo^{2}rm'e^{2}nd. See FORMATIVE and PLASTIC.

FORMENE, n. Fo^{2}rm'en. Fr., *formène.* See METHANE.

FORMÈNE (Fr.), n. For-me^{2}n. See METHANE.—**F. trichloré.** Chloroform. [B.]

FORMENTONE (It.), n. Fo^{2}r-me^{2}n-to'na. The *Polygonum fagopyrum.* [B, 121 (α, 24).]

FORMIATE, n. Fo^{2}rm'i^2-at. See FORMATE.

FORMIC, adj. Fo^{2}rm'i^{2}k. From *formica,* an ant. Fr., *formique.* Ger., *Ameisen-.* 1. Belonging to or derived from an ant. 2. Related or pertaining to f. acid. [B.]—**F. acid.** Lat., *acidum formicum* (seu *formicicum* [Ger. Ph.]). Fr., *acide formique* (ou *hydrocarbonique*). Ger., *Ameisensäure, Formylsäure.* A substitution compound of methyl alcohol, a colorless, mobile liquid, $HCHO_2$, or HCO.OH, boiling at 99° C., solidifying at 8·5° C., and having a penetrating odor. It occurs in nature in the venom of ants, in some species of caterpillars, and in various prickly plants, such as nettles, etc. It is also derived from the decomposition of a variety of vegetable matters, and may be prepared artificially by decomposing tartaric acid, or by heating oxalic acid and glycerin. It acts as a monobasic acid, forming a series of salts called formates or formiates. It has been used as an antiseptic. [B, 4; Schulz, "Dtsch. med. Wchnschr."; "Ctrlbl. f. klin. Med."; "N. Y. Med. Jour.," Dec. 5, 1885, p. 648.]—**F. aldehyde.** Syn.: *methylene oxide* (or *aldehyde*), *aldehyde of formic acid.* An oxide, CH_2O, of methylene, bearing the same relation to methyl alcohol and formic acid that ordinary aldehyde does to ethyl alcohol and acetic acid. It is known only in the gaseous state, or in solution in water. It is prepared by decomposing methyl alcohol by the action of incandescent heat, and is said by Reinke ["Bericht d. deutsch. Chem. Gesellsch.," xiv, p. 2145] to occur in the distillate of the parts of plants which contain chlorophyll. The gas has an irritant odor. On evaporation of the solution it forms a polymeric modification, *paramethyl aldehyde,* trimethene oxide paraformaldehyde, $C_3H_6O_3$, occurring as a solid mass devoid of odor, and subliming at 100° C. [B, 2.]—**F. ether.** Fr., *éther formique.* Ger., *Ameisenäther, Ameisensäure-Aether.* See ETHYL *formate* and ETHYL *orthoformate.*

FORMICA (Lat.), n. f. Fo^{2}rm'i^{2}k-a^3. Gr., μύρμηξ. Fr., *fourmi.* Ger., *Ameise.* It., *f.* Sp., *hormiga.* 1. The ant, a genus of the *Formicidæ.* [L.] 2. A term sometimes applied to a variety of wart (the *verruca gregalis* of Sauvages) the excision of which is followed by a sensation like that produced by ants. [G.] Cf. MYRMECIA. 3. Of Paracelsus, herpes miliaris. [H.]—**Alcohol formicarum destillatum.** See *Spiritus formicarum.*—**Aqua formicarum** [Brunsw. Ph., 1777, Disp. fuld., 1791]. Fr., *eau* (ou *hydrolat*) *de fourmis.* A preparation made by exhausting any quantity of red ants with boiling water, filtering, distilling off three fourths, and preserving the residue. [B, 119 (α, 14).]—**F. ambulatoria.** Of Celsus, see ECZEMA *impetiginosum.*—**F. corrosiva.** The herpes esthiomenos and herpes phlyctænodes of Galen. [G.]—**F. fuliginosa** [Latreille]. Ger., *rabenschwarze* (*russschwarze*) *Ameise.* The wood-ant; a species which bores the trunks of trees, often reducing the latter to a paper-like mass. This species contains a good deal of acid and has a strong odor. [B, 180.]—**F. miliaris.** See HERPES *miliaris* (1st def.).—**F. nigra.** A species described by Linnæus and Latreille, the existence of which is very doubtful. [B, 180.]—**F. rufa.** Fr., *fourmi rousse.* Ger., *Hügelameise, Klammer-* (oder *rothbraune,* oder *rothe*) *Ameise.* The red ant, furnishing formic acid and oil of ants. [L.]—**Oleum formicarum.** Fr., *huile de fourmis.* Ger., *Ameisenöl.* An old preparation made by macerating red ants in bitter-almond oil, or digesting them in olive-oil with gentle heat. [B, 48, 97, 119 (α, 14).] See also *Ethereal, Fatty,* and *Volatile oil of* ANTS.—**Spiritus formicarum** [Ger. Ph., Gr. Ph., Swiss Ph., Russ. Ph.]. A preparation made by macerating 1 part of red ants in 2 parts of alcohol, and distilling 1 part; or 1 part each of ants, alcohol, and water, and distilling 1 part [Russ. Ph.]; or 1 part of ants and 2 parts each of alcohol and water, and distilling 2 parts [Gr. Ph.]; or 2 parts of ants and 3 parts each of alcohol and water, and distilling 4 parts [Swiss Ph., Ger. Ph., 1st ed.]; or by dissolving 4 parts of formic acid in 70 of alcohol and 26 of water [Ger. Ph.]. [B, 95, 97, 119 (α, 14).]—**Tinctura formicarum** [Ger. Ph., 1st ed., Russ. Ph.]. Fr., *alcoolé* (*teinture*) *de fourmis.* A tincture made by digesting or macerating 2 parts of red ants in 3 of alcohol. [B, 95.]

FORMICANT, adj. Fo^{2}rm'i^2-ka^{2}nt. From *formica,* an ant. Gr., μυρμηκώδης. Fr., *f.* Ger., *kriebelnd.* Of the pulse, small, weak, and frequent, producing a tingling sensation under the finger. [L, 41.]

FORMICARIUS (Lat.), adj. Fo^{2}rm-i^2-ka(ka^3)'ri^2-u^{3}s(u^{4}s). From *formica,* an ant. Fr., *formicaire.* Resembling ants. [L, 41.]

FORMICATE, adj. Fo^{2}rm'i^2-kat. From *formica,* an ant. Resembling an ant. [L, 56.]

FORMICATION, n. Fo^{2}rm'i^2-ka-shu^{3}n. Lat., *formicatio* (from *formica* an ant). Fr., *f. fourmillement.* Ger., *F., Kribbeln, Ameisenkriechen.* It., *formicazione, formicolio.* Sp., *hormigueo.* A form of paræsthesia rising in part from pressure upon the sensory nerves, and in part from vascular spasm in the extremities; characterized by a sensation as of insects or worms crawling over the skin. [A, 326 (α, 21); D.]

FORMICIC, adj. Fo^{2}rm-i^{2}s'i^{2}k. See FORMIC.

FORMICIVOROUS, adj. Fo^{2}rm-i^2-si^{2}v'o-ru^{3}s. From *formica,* an ant, and *vorare,* to devour. Fr., *formicivore.* Ger., *ameisenfressend.* Living upon ants; the *Formicivoræ* are a tribe of the *Muscicapidæ* so characterized. [L, 41.]

FORMIFACTION, n. Fo^{2}rm-i^2-fa^{2}k'shu^{3}n. Lat., *formificatio* (from *forma,* form, and *facere,* to make). The conversion into a definite condition. [L, 14.]

FORMILUM (Lat.), n. n. Fo^{2}rm'i^{2}l-u^{3}m(u^{4}m). See FORMYL.

FORMIQUE (Fr.), adj. For-mek. See FORMIC.

FORMIX (Lat.), n. m. Fo^{2}rm'i^{2}x. Gen., *form'icis.* An old term for lupus. [A, 325.]

FORMOBENZOILIC ACID, n. Fo^{2}rm''o-be^{2}nz-o-i^{2}l'i^{2}k. Fr., *acide formo-benzoïlique.* A solid, white, crystalline substance, $C_8H_8O_3$ = CHO.C_7H_6.OH, soluble in water, in alcohol, and in ether, formed by the action of nascent formic acid on extract of bitter almonds.

FORMOBROMIDE [Berzelius], n. Fo^{2}rm''o-brom'i^{2}d(id). See BROMOFORM.

FORMOCHLORIDE [Berzelius], n. Fo^{2}rm''o-klor'i^{2}d(id). See CHLOROFORM.

FORMOGUANAMINE, n. Fo^{2}rm''o-gwa^{2}n'a^{2}m-en. See GUANAMINE.

FORMOIODIDE [Berzelius], n. Fo^{2}rm''o-i'od-i^{2}d(id). See IODOFORM.

FORMOMETHYLAL, n. Fo^{2}rm''o-me^{2}th'i^{2}l-a^{2}l. Fr., *formométhylal.* An ethereal oil, C_3H_8O, obtained by distilling a mixture

of methyl alcohol, sulphuric acid, and manganese peroxide. According to Malagnt, it is a mixture of methyl formate and methylal. It mixes readily with water, and has anæsthetic properties. [L, 87 (*a*, 14).]

FORMONAPHTHALIDE (Fr.), n. For-mo-na[2]p-ta[3]-led. See FORMAMIDE.

FORMONITRILE, n. Fo[2]rm''o-ni'tri[2]l. Ger., *Formonitril*. See HYDROCYANIC ACID.

FORMOXYL, n. Fo[2]rm-o[2]x'i[2]l. Ger., *F.* See FORMYL (1st def.). [B.]—**F. hydrate.** Ger., *F'hydrat.* See FORMIC ACID.

FORMULA (Lat.), n. f. Fo[2]rm'u[3]l(u[4])-a[3]. Dim. of *forma*. Fr., *formule*. Ger., *Formel*. It., *formola*. Sp., *fórmula*. 1. In chemistry, an expression by symbols of the elementary constitution of the molecule of a substance. It consists essentially of letters, each denoting one atom of one of the elementary substances, with figures appended denoting the number of atoms present. Collections of atoms which constitute a group by themselves (radicle) are often separated by periods or parentheses from the rest of the f.; and in this case figures prefixed or appended to the parenthesis or placed before an expression contained within periods, are understood to apply to all the symbols embraced by the parenthesis or periods. In all other cases, a figure prefixed to a symbolical expression for a molecule is understood, like a coefficient in an algebraical f., to be a multiplier of all the symbols which follow until a + or − sign is reached. The sign of addition (+) is used in chemical formulæ to show that the substances whose symbols it connects are placed together under such circumstances as to produce a chemical reaction; and the sign of subtraction (−) denotes that a chemical reaction is produced by the removal from one substance of the atoms which, if combined, would be designated by the symbols following the (−) sign. [B.] 2. A prescription. 3. An enumeration of the ingredients of a pharmaceutical preparation, with precise directions for making it. 4. In general, a set form for recording observations, etc.—**Abbreviated f.** In chemistry, a number of expressions for the more frequently recurring molecules, abbreviated so as to do away with the necessity of parentheses in uniting chemical equations. The most frequent abbreviations are: Am (ammonium), NH_4; $\overline{A}$, the acetic-acid radicle, $(C_2H_3O_2)$: $\overline{Cfg}$, the acid radicle of hydroferrocyanic acid and hydroferricyanic acid, $= Fe(C_3N_3)_2$; Cy, cyanogen, CN; Ho for hydroxyl, HO [although by some this symbol has been appropriated for H_2O when it signifies a molecule of water of crystallization]; $\overline{O}$ for the oxalic-acid radicle, $''C_2O_4$; and $\overline{T}$, the tartaric-acid radicle, $''C_4H_4O_6$. [Clowes (B).] In some systems of notation other abbreviated symbols are employed. Thus an initial letter designative of an element with dots placed above it denotes that element combined with as many equivalents of oxygen as there are dots, $\dddot{S}O = SO_3$; if commas are superimposed, the symbol designates an element combined with sulphur, $\ddot{F}e = FeS_2$. If a dash is drawn through the letter designative of the element, the equivalents of the latter are represented thus: Ꞙe $= Fe_2O_3$. A + sign superimposed designates a base or alkaloid, thus $\overset{+}{M}$ = morphine; while a − sign placed above an initial letter denotes an acid; thus $\overline{A}$, acetic acid, $\overline{C}$, citric acid. But this latter sign is usually employed, as above mentioned, to denote the acid radicle and not the acid itself. [B.]—**Binary f.** See *Dualistic f.*—**Brenner's f.** The expression of a relation observed in the healthy ear when a galvanic current is passed through it, consisting in the fact that a certain tone is heard at the cathode on closure, which becomes feebler at the anode on closing the current. [Landois (K).]—**Chemical f.** See *F.* (1st def.).—**Constitutional f.** Fr., *formule de constitution*. Ger., *Constitutionsformel*. In chemistry, a rational f. which expresses by chemical symbols the order of arrangement and method of interconnection of the atoms which go to make up a molecule. A complete constitutional f., expressive of the relations of all the atoms in a molecule, is called a *structural f.* [B.]—**Decomposition f.** Ger., *Umsetzungsformel*, *Reactionsformel*. A rational f. in which the symbols expressive of the constitution of a molecule are so arranged as to represent the way in which the molecule decomposes when taking part in a chemical reaction. The same molecule may, therefore, have different decomposition formulæ, according to the different ways in which it splits upon being subjected to the action of various chemical reagents. Thus of ethyl alcohol the decomposition f. may be C_2H_5.O.H, $C_2H_4O.H_2$, and C_2H_5.OH. [B, 4.]—**Dental f.** Fr., *formule dentaire*. Ger., *Zahnformel*. A f. used to indicate the arrangement and number of teeth. That of the adult dentition of man is: incisor, $\frac{2-2}{2-2}$; canine, $\frac{2-2}{2-2}$; premolar, $\frac{2-2}{2-2}$; molar, $\frac{3-3}{3-3}$ (*i. e.*, $\frac{2-2}{2-2}$ = two incisor teeth on each side of the middle line in the upper and lower jaws). [L, 147.]—**Dualistic f.** Fr., *formule dualistique*. A chemical f. showing the composition of salts according to the dualistic hypothesis. Thus the dualistic f. for potassium sulphate is $K_2O.SO_3$, expressive of the hypothesis that this salt is made up of potassic oxide combined with sulphuric anhydride (the sulphuric acid of the old nomenclature). The dualistic formulæ are still retained in some pharmacopœias, and in others, *e. g.*, the Fr. Codex, are given as alternates to the more modern unitary formulæ adopted in the U. S. Ph., the Fr. Codex, the Ger. Ph., and other recent formularies. [B.]—**Electrical f.** An abbreviated expression which represents by means of symbols the reactions of muscles and nerves to electrical stimuli. Thus CaCCl, denoting the clonic contraction occurring at the cathode on the closure of the electric circuit, is an example of such a f. [B.]—**Empirical f.** Fr., *formule brute* (ou *empirique*). Ger., *empirische Formel*. A f. which expresses the simplest possible combination of atoms that would represent the percentage composition of the substance. [B.]—**Extemporaneous f.** A f. (2d def.) composed on the spur of the moment. [*a*, 21.]—**Fechner's f.** See *F. of difference*, *F. of measurement*, and *Fundamental f.* (2d def.).—**Floral f.** Ger., *Blüthenformel*. A f. composed of letters, figures, and signs for expressing the plan and symmetry of the flower, *e. g.*, $S_5P_5St_5C_5$, in which S stands for sepals, P for petals, St for stamens, and C for carpels, and the figures for the number of parts of the several whorls, signifies a perfect flower with pentamerous symmetry and isomerous whorls. [B, 77 (*a*, 24).]—**F. magistralis.** See *Magistal* PRESCRIPTION.—**F. medica.** See PRESCRIPTION.—**F. of constitution.** See *Constitutional f.*—**F. of difference.** Of Fechner, a f. expressing the difference in magnitude of two sensations, S and S′, produced, respectively, by two stimuli, T and T′. The f. is $S-S' = C(\log.T - \log T')$, where C is a constant. [Ladd (B).]—**F. officinalis.** See *Official f.*—**F. of measurement.** Of Fechner, a f. expressive of the magnitude of sensation S, produced by a stimulus T, which differs from a second stimulus T_0 by an increment which corresponds to a just observable increase of sensation ΔS, T_0 itself being a stimulus which is just below that adequate to produce any sensation at all. The f. is $S = C \log.\frac{T}{T_0} = C(\log.T - \log T_0)$, where C is a constant. This f. is only a special case of the f. of difference. [Ladd (B).]—**Fundamental f.** 1. An elementary f. from which other formulæ are derived. [*a*, 21.] 2. Of Fechner, a f. expressive of the so-called psycho-physical law (*q. v.*). It is $S = C \log T$, where S is the magnitude of sensation produced, C is a constant, and T the magnitude of the stimulus producing the sensation. [Ladd (B); J, 124, 184, 176.]—**General f.** A chemical f. expressive of the constitution of a series of related bodies, and containing one or more letters which, like the symbols for unknown quantities in an algebraic f., are capable of indefinite replacement. Thus the f. $Cn - H - 2n + 2$ is the general f. of the paraffins, n being capable of replacement by any whole number, and $R''SO_4$ is the general f. for the normal sulphates, R'' being capable of replacement by any bivalent radicle. [B.]—**Glyptic f.** A geometrical representation intended to display the spatial interrelations existing between the atoms forming a molecule. [B, 3.]—**Graphic f.** Fr., *formule graphique*. Ger., *graphische Formel*. A structural f. in which the symbols denoting the elements are so connected by lines or other conventional signs as to afford graphically a representation of the mode in which the atoms constituting a molecule are connected, the combining power of each, and the degree to which the combining power is satisfied. Thus the graphic f. of potassium cyanide is $K - C \equiv N$; which shows that carbon (C) is quadrivalent (denoted by the four lines in connection with it); that it is connected by three bonds of union with nitrogen (N), which is trivalent, and by one bond with potassium (K), which is univalent; and that, therefore, all the combining capacities are satisfied, and the molecule is saturated (denoted by the absence of free bonds). [B.]—**Irrational f.** See *Empirical f.*—**Magistral f.** See *Magistral* PRESCRIPTION.—**Medical f.** See PRESCRIPTION.—**Molecular f.** In chemistry, an expression which represents the ultimate atomic composition of a molecule (*i. e.*, the kind and number of atoms which it contains) without indicating the way in which these atoms are connected or the manner in which they are arranged. The molecular f. is always somewhat multiple of the empirical f. [B.]—**Normal acoustic f.** See *Brenner's f.*—**Official f.** A f. (3d def.) given in a pharmacopœia or some other official publication.—**Officinal f.** A pharmaceutical f. which, although not official, is commonly followed by pharmacists.—**Pharmaceutical f.** See *F.* (3d def.).—**Rameau's cardiac f.** Fr., *formule* (*cardiaque*) *de Rameau*. A f. assumed to show the relation between the number of cardiac pulsations in two persons: $n\sqrt[4]{d} = n'\sqrt[4]{d'}$, in which n = the number of pulsations in a given individual; d = his height; n' = the number of pulsations in the second individual; and d' his height. [A, 321 (*a*, 18).]—**Rational f.** Fr., *formule rationnelle*. Ger., *rationelle Formel*. A chemical f. in which the symbols are so arranged as to express the relations to one another of the separate atoms of which the molecule is made up, either as regards the order and mode of interconnection of the atoms in the molecule (*constitutional f.*), or as regards the different methods into which they arrange themselves when the molecule suffers decomposition (*decomposition f.*). [B.]—**Reaction f.** Ger., *Reactionsformel*. See *Decomposition f.*—**Structural f.** Ger., *Strukturformel*. See *Constitutional f.*—**Typical f.** A chemical f. which is so arranged as to exhibit the type upon which the substance is supposed to be built, *e. g.*, $\left.\begin{matrix}K\\H\end{matrix}\right\}O$, or H—O—K, is the typical f. of potassium hydrate, indicating its formation upon the type of water, $\left.\begin{matrix}H\\H\end{matrix}\right\}O$, or H—O—H. [B, 9.]—**Unitary f.** Fr., *formule unitaire*. A chemical f. expressive of the constitution of a salt according to the hypothesis that each molecule is a unit, built up by the successive aggregation of its constituent atoms, and not formed by the coalescence of an acid and base. Thus the unitary f. of potassium sulphate is K_2SO_4, indicative of the fact that the salt is made up by the aggregation of two atoms of potassium, one atom of sulphur, and four atoms of oxygen. Used in opposition to dualistic f. [B.]—**Vertebral f.** A f. used to indicate the number and position of the vertebræ. That of man would be C. 7 : d. 12 : l. 5 : s. 5 : c. 5, denoting, respectively, the cervical, dorsal, lumbar, sacral, and coccygeal (in the lower vertebrates, caudal) vertebræ. [L.]

FORMULARY, n. Fo[2]rm'u[3]l-a-ri[2]. From *formula*, a rule. Fr., *formulaire*. Ger., *Formular*. It., Sp., *formulario*. A collection of formulæ.

FORMULE (Fr.), n. For-mu[6]l. See FORMULA.—**F. brute.** See *Empirical* FORMULA.—**F. de constitution.** See *Constitutional* FORMULA.

FORMYL, n. Fo[2]rm'i[2]l. Lat., *formylum* (from *formica*, the ant, and ὕλη, matter). Fr., *formyle*. Ger., *F.*, *Formoxyl* (1st def.). It., *formile*. 1. The radicle, CHO, of formic acid; also called formoxyl. 2. The trivalent radicle CH‴. [B.]—**F. aldehyde.** See

FORMIC *aldehyde*.—**F'amide.** See FORMAMIDE.—**F. chloride.** See CHLOROFORM.—**F'diamine.** Ger., *F'diamin*. A base, CH_4N_2= CH.NH.NH_2, occurring only in combination with acids, the acid radicle replacing the hydrogen in its molecular formula. [B.]—**F. dichloroiodide.** Ger., *F'dichlorjodür*. See DICHLORIODOFORM. —**F. ethylate.** See ETHYL *orthoformate*.—**F'imidamide.** See *F'diamine*.—**F. perchloride.** See CHLOROFORM.—**F'säure** (Ger.). See FORMIC ACID.—**F. sulphide.** See SULPHOFORM.—**F'superchlorid** (Ger.). See CHLOROFORM.—**F. tribromide.** Ger., *F'tribromür*. See BROMOFORM.—**F. trichloride.** Ger., *F'trichlorür*. See CHLOROFORM.—**F'triethylether.** Ger., *F'triäthyläther*. See ETHYL *orthoformate*.—**F. triiodide.** Ger., *F'trijodür*. See IODOFORM.

FORMYLENE, n. Fo²rm'i²l-en. See FORMYL (2d def.).

FORMYLIAC, n. Fo²rm-i²l'i²-a²k. A base, N.(CH)H_2, obtained, along with acetyliac and propyliac by Cloëz by the action of ammonia or ethylene bromide. [B, 3 (*a*, 27).]

FORMYLIC ACID, n. Fo²rm-i²l'i²k. Fr., *acide formylique*. See FORMIC *acid*.

FORMYSULFIDE (Fr.), n. For-me-su⁶l-fed. See SULPHOFORM.

FORMYLUM (Lat.), n. n. Fo²rm'i²l(u⁶l)-u³m(u⁴m). See FORMYL. —**F. chloratum.** See CHLOROFORM.—**F. iodatum, F. jodatum.** See IODOFORM.—**F. perchloratum, F. trichloratum.** See CHLOROFORM.

FORNAX (Lat.), n. f. Fo²rn'a²x(a³x). Gen., *-na'cis*. A furnace, stove, or oven. [A, 318.]

FORNICAL, adj. Fo²rn'i²-ka²l. Of or pertaining to the fornix, as the f. fusion. [I, 98.]

FORNICATE, adj. Fo²rn'i²-kat. Lat., *fornicatus* (from *fornix*, a vault). Fr., *voûté*. Ger., *gewölbt*. Vaulted. See GYRUS *fornicatus*.

FORNICOLUMN. See FORNIX *ascendens*.

FORNIX (Lat.), n. m. Fo²r'ni²x. Gen., *for'nicis*. Fr., *voûte*. Ger., *F.*, *Gewölbe*, *Bogen*, *Decklappe* (2d def.), *Hohlschuppe* (2d def.). It., *fornice*. Sp., *f*. Lit., a vault or arch. 1. An arched body or surface; a concavity or cul-de-sac. 2. One of the small arched scales in the orifice of some flowers. [B, 19, 121, 123 (*a*, 24); G; K.] 3. See *F. cerebri*.—**F. ascendens.** The columna fornicis, or ascending root of the f. arising in the corpus albicans and passing dorsocephalad in the wall of the third ventricle. [J, 73.]—**F. centralis, F. cerebri.** Fr., *voûte à trois piliers*, *trigone cérébral*. Ger., *Gewölbe*, *Bogen*. It., *volta*. An arched, triangular lamina lying between the corpus callosum and the thalami, being separated from the latter by the velum interpositum. It consists of a body formed by the union of two symmetrical halves, and anterior and posterior crura (see *Anterior* and *Posterior* PILLARS *of the f.*). The apex of the triangle is anterior, and connected with the septum lucidum, while the base is continuous with the splenium of the corpus callosum; its edges touch the lateral chorioid plexuses. [I, 2, 15 (K).]—**F. conjunctivæ.** The cul-de-sac at the point where the bulbar conjunctiva is reflected upon the lid. [L, 294.]—**F. cranii.** Ger., *Schädelgewölbe*. The vault of the skull, situated between the curved lines on the temporal bones, the upper margins of the orbits, and the superior curved lines on the occipital bone. [L, 332.]—**F. descendens.** See BUNDLE *of Vicq d'Azyr*.—**F. of the vagina.** Lat., *f. vaginæ*. Ger., *Scheidegewölbe*. See VAULT *of the vagina*.—**F. periphericus** [Arnold]. See GYRUS *fornicatus*. —**F'system** [Schwalbe] (Ger.). See *F. cerebri*.—**F. tricuspidalis.** See *F. cerebri*.—**F. vaginæ.** See VAULT *of the vagina*.—**Fornices vasculosi renum.** Arches formed at the bases of the pyramids of Malpighi by the anastomoses of the minute branches of the renal artery. From them vessels are given off that supply the cortical substance of the kidney, the Malpighian corpuscles, and the capillary plexuses around the uriniferous tubules. [A, 478 (*a*, 17).]—**F. verus.** Of Vieussens, the corpus callosum. [I, 3 (K).]

FORPEX (Lat.), n. f. Fo²r'pe²x. Gen., *for'picis*. See FORFEX.

FORPHYRA (Lat.), n. f. Fo²r'fi²r(fu⁶r)-a³. A genus of *Algæ*. —**F. vulgaris.** A marine species, a sea-weed, called *laver* on the Pacific coast; used by the Indians as food, and also exported to China. ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]

FORSKAHLEA (Lat.), n. f. Fors-ka³l'e²-a³. From *Forsköl*, the botanist. Written also *Forskælea*, *Forskalea*, *Forskæhlia*, *Forskolea*, *Forskohlea*, and *Forskolia*. A genus of urticaceous plants found in various parts of Africa, the Mediterranean region, Arabia, and India. [B, 19, 121, 173 (*a*, 24).]—**F. angustifolia.** Fr., *f. à feuilles étroites*. A Canary Islands species, employed as a sudorific. [B, 19, 121, 173 (*a*, 24).]

FORSTERONIA (Lat.), n. Fo²rst-e²r-on'i²-a³. Named after *T. F. Forster*, an English botanist. A genus of apocynaceous, twining shrubs. [B, 34 (*a*, 24).]—**F. difformis.** A North American species with opposite lanceolate leaves, small straw-colored flowers, and a yellow calyx; found growing in damp and swampy ground from Virginia to Florida. It is odorless and innoxious. Bentham and Hooker refer it to the genus *Secondatia*. [B, 34, 42 (*a*, 24).]

FORSYTHIA (Lat.), n. f. Fo²r-sith'i²-a. Of Vahl, a genus of the *Oleaceæ*. [B, 34, 121 (*a*, 24).]—**F. suspensa.** A species found in China and Japan, where the fruit is used as an antispasmodic and sedative. It contains a glucoside, $C_{26}H_{32}O_{11}$, resembling philyrin, and employed as a febrifuge. ["Proc. of the Am. Pharm. Assoc.," xxiv, xxv (*a*, 14).]

FORTIFYING, adj. Fo²rt'i²-fi-i²n². Fr., *fortifiant* (from *fortis*, strong, and *facere*, to make). See CORROBORANT and TONIC.

FORTIOR (Lat.), adj. Fo²r'shi²(ti²)-o²r. Comp. of *fortis*. Stronger (see ÆTHER *f.*, etc.).

FORTIROSTRIS (Lat.), adj. For-ti²-ro²s(ros)'tri²s. From *fortis*, strong, and *rostrum*, a beak. Fr., *fortirostre*. Ger., *starkschnabelig*. Having a strong beak. [L, 41.]

FORT-JEAN (Fr.), n. For-zhe²-a³n². The *Tamus communis*. [B, 121, 173 (*a*, 24).]

FORTKRIECHEN (Ger.), n. Fort'krech²-e²n. A burrowing, as of pus. [A, 57.]

FORTLAUFEND (Ger.), adj. Fort-la³'u⁴f-e²nd. See CONTINUED.

FORTPFLANZUNG (Ger.), n. Fort'pfla³nts-un². See REPRODUCTION and PROPAGATION.—**Endogenöse F.** See *Endogenous* REPRODUCTION.—**F'sfähig.** Capable of transmission, reproduction, dissemination, etc.—**F'sgeschwindigkeit.** Rapidity of transmission. [B.]—**F'strieb.** The reproductive impulse. [K.]—**F'swerkzeug.** The reproductive apparatus.—**Nahrhafte F.** See *Nutritive* REPRODUCTION.

FORTRAITURE (Fr.), n. For-tre²-tu⁶r. 1. Hysteralgia. [L, 41.] 2. Of the veterinarians, the fatigue of a horse from over-driving, formerly considered as a disease. [A, 301.]

FORTSATZ (Ger.), n. Fort'za³ts. See PROCESS and APOPHYSIS. —**Alveolarf'.** See *Alveolar* PROCESS.—**Augenbrauenf'.** See *Superciliary* RIDGE.—**Augenhöhlenf'.** See *Orbital* PROCESS.—**Brustförmiger F.** See *Mastoid* PROCESS.—**Ciliarfortsätze.** See *Ciliary* PROCESSES.—**Deiter'scher F.** See *Axis-cylinder* PROCESS.—**Degenförmiger F.** See *Xiphoid* PROCESS.—**Dornf'.** See *Spinous* PROCESS.—**Drosself'.** See *Jugular* PROCESS.—**Ellenbogenf'.** See OLECRANON.—**Flügelartiger F.** See *Pterygoid* PROCESS.—**Flügelartige (oder Flügelförmige) Fortsätze, Flügelfortsätze.** The pterygoid processes of the sphenoid bone. [L, 80, 304.]—**F'los.** See APOLAR.—**Ganglienzellenf'.** A pole or process of a nerve-cell. [J.]—**Gaumenflügelf'.** The pterygoid process. [L, 80.]—**Gaumenf'.** See *Palatine* PROCESS.—**Gelenkf'.** An articular process. [L, 31.]—**Gelenkknopff'.** See CONDYLE.—**Grätenförmiger F.** A spinous process. [L, 80.]—**Griffelf'.** See *Styloid* PROCESS.—**Haarige Fortsätze.** See *Ciliary* PROCESSES.—**Hakenf'.** 1. A hook-shaped process. 2. See OLECRANON. [L.]—**Jochf'.** See *Zygomatic* PROCESS.—**Kegelförmiger F.** See *Conoid* PROCESS.—**Knopfförmiger F.** See *Condyloid* PROCESS.—**Kranzförmiger F.** See *Coronoid* PROCESS and TENTORIUM *cerebelli*.—**Neckel'scher F.** See CARTILAGE *of Meckel*.—**Nasenf'.** See *Nasal* PROCESS.—**Nasengaumenf'.** The nasal process of the palate bone. [L.]—**Oberkieferf' (vom Jochbein).** The maxillary process of the malar bone. [L.]—**Oberkieferalveolarf'.** An alveolar process of the superior maxilla.—**Ohrförmige Fortsätze.** The ear-shaped lateral extension of the fourth ventricle in embryos; the embryonic lateral recess. [I.]—**Pyramidenf'.** 1. A pyramidal process, such as that of the palate bone. 2. Pyramids of Ferrein. ["Arch. f. Anat. u. Phys.," 1844, p. 454 (L).]—**Querf'.** A transverse process. [L, 31.]—**Rabenschnabelförmiger F.** See *Coracoid* PROCESS.—**Rippenartiger F.** A transverse process (of a vertebra). [L, 31.]—**Schiefer F.** An oblique process (of a vertebra). [L, 115.]—**Schildknorpelf'.** A process of the thyreoid cartilage.—**Schläfenfortsatz.** The temporal process of the palate bone. [L.]—**Schräger F.** See *Schiefer F.*—**Schwertförmiger F., Schwertf'.** See *Xiphoid* PROCESS.—**Sichelf'.** See *Falciform* PROCESS.—**Sprungbeinf'.** See SUSTENTACULUM *tali*.—**Stachelf'.** See *Spinous* PROCESS.—**Stimmbandf'.** See PROCESSUS *vocalis*.—**Stirnf'.** See *Frontal* PROCESS.—**Subgerminale Fortsätze.** See *Subgerminal* PROCESSES.—**Synovialf'.** See PROCESSUS *synovialis*.—**Ungenannter F.** See PROCESSUS *anonymus*. —**Verästelte Fortsätze.** See *Protoplasmic* PROCESSES.—**Warzenf'.** See *Mastoid* PROCESS.—**Wurmf'.** See APPENDIX *cœci*.—**Zahnf'.** See *Odontoid* PROCESS.—**Zahnfächerf', Zahnhöhlenf', Zahnzellenf'.** An alveolar process of the superior or inferior maxillæ. [L.]—**Zellenf'.** An outgrowth from a cell.—**Zitzenförmiger F., Zitzenf'.** See PROCESSUS *mamillaris*.

FORTSETZEND (Ger.), adj. Fort'ze²ts-e²nd. Continuous. [L, 80.]

FORTSETZUNG (Ger.), n. Fort-ze²ts'un². A continuation, prosecution, or extension. [L, 46 (*a*, 21).]

FORTTREIBER (Ger.), n. Fort'trib-e²r. See DETRUSOR.—**F. des Harns.** See DETRUSOR *urinæ*.

FORTUNA (Sp.), n. For-tu'na³. A place in the province of Murcia, Spain, where there are thermal springs. [A, 319 (*a*, 21).]

FORTUNE-TELLER, n. Fo²r'tu²n-te²l-u⁵r. The *Leontodon taraxacum*. [A, 505 (*a*, 21).]

FORTY-KNOT, n. Fo²r'ti²-no²t. See ACHYRANTHES *repens*.

FORTYOGO, n. A place in Transylvania where there is a gaseous and sulphurous spring. [L, 49.]

FOSRESINIC ACID, n. Fo²s-re²-zi²n'i²k. Fr., *acide fosrésinique*. Of W. Bastick, a pale-yellow, pulverulent, amorphous acid obtained by treating a fossil resin with nitric acid. [*a*, 27.]

FOSSA (Lat.), n. f. Fo²s'sa³. From *fodere*, to dig. Gr., σκάμμα, τάφρος. Fr., *fosse*. Ger., *Grube*, *Rinne*. It., *f*. Sp., *fosa*. A pit or excavation that is widest at its mouth.—**Acetabular f.** See *F. acetabuli*.—**Amygdaloid f.** The recess or excavation between the anterior and posterior pillars of the fauces which contains the tonsil. [L.]—**Anconeal f.** See *Olecranon f.*—**Anterior f. of the skull.** Lat., *f. cranii anterior*. Ger., *vordere Schädelgrube*. One of the three fossæ on the internal surface of the skull. It is formed by the orbital plates of the frontal bones, the cribriform plate of the ethmoid, and the small wing and part of the body of the sphenoid bone. It supports the frontal lobes of the brain. [C.] —**Axillary f.** Lat., *f. axillaris*. Fr., *fosse axillaire*. See AXILLA (1st def.).—**Buccal f.** Fr., *fosse buccale*. A f. in the embryo which is bounded by the superior and inferior branches of the facial arches, and terminates in a cul-de-sac which does not connect with the intestinal canal. [L, 158 (*a*, 29).]—**Canine f.** Lat.,

f. canina. Fr., *fosse canine.* A f. on the facial surface of the superior maxilla between the canine and malar processes. [C.] —**Cerebellar f.** See *Inferior occipital f.*—**Cerebral f.** See *Superior occipital f.*—**Coronal f.** See *Anterior f. of the skull.* —**Coronoid f.** Lat., *f. coronoidea.* A small f. at the inferior end of the anterior surface of the humerus, which receives the coronoid process of the ulna when the arm is flexed. [C, 3.]—**Costal fossæ.** Lat., *fossæ costales.* The facets on the bodies of the vertebræ for articulation with the heads of the ribs. [L.] —**Digastric f.** Lat., *f. digastrica.* A deep f. on the inner side of the mastoid process of the temporal bone, from which the digastric muscle arises. [C.]—**Digital f. of the femur.** See *Trochanteric f.*—**Duodeno-jejunal f.** Lat., *f. duodeno-jejunalis* [Huschke]. Ger., *Duodenaltasche.* A pouch of the mesentery close to the union of the duodenum and jejunum and on its right side, which often forms the sack of an internal hernia. [L, 31, 332.] —**Epencephalic f.** In compative anatomy, a depression upon the internal surface of the skull for the reception of the epencephalon. [L, 14.]—**External iliac f.** Lat., *f. iliaca externa.* Fr., *fosse iliaque externe.* Ger., *äussere Darmbeingrube.* The depression on the outer surface of the innominate bone from which the gluteal muscles arise. [L.]—**F. acetabuli.** The depression in the centre of the acetabulum. [L, 31, 115.]—**F. Amyntæ.** Gr., Ἀμύντου χάραξ. Fr., *fosse d'Amyntas.* An ancient crossed bandage for the nose, invented by Amyntas of Rhodes. [A, 301.]—**F. anonyma.** See *F. anthelicis.*—**F. anterior major (humeri).** See *Coronoid f.*—**F. anterior minima (humeri).** A slight depression upon the anterior surface of the humerus into which the head of the radius enters when the arm is flexed. [L, 31.]—**F. anthelicis.** Fr., *fosse de l'anthélix.* Ger., *Grube der Anthelix.* The depression at the upper and anterior end of the anthelix, between its crura. [F.]—**F. arcuata.** See *F. subarcuata.*—**F. articularis maxillæ inferioris (seu ossis temporalis).** See *Glenoid f.*—**F. axillaris.** See AXILLA (1st. def.).—**F. basilaris.** Fr., *fosse basilaire.* The depression occupying the superior surface of the basilar process of the occipital bone. [L, 55 (*a*, 29).]—**F. bulbi urethræ.** See SINUS *bulbi.*—**F. cæca.** See FORAMEN *cæcum.*—**F. cæcalis.** A pouch upon the surface of the right ilio-psoas muscle formed by a fold of the peritonæum and extending to the apex of the cæcum. [L, 31, 332.]—**F. canina.** See *Canine f.*—**F. capitis (femoris).** The depression in the head of the femur in which the ligamentum teres is attached. [L, 31.]—**F. capituli radii** [O. Fischer]. See *F. anterior minima humeri.*—**F. carotidea.** See *Superior carotid* TRIANGLE.—**F. cerebelli.** See *Inferior occipital f.*—**F. cerebelli superior.** See *Peduncular* SULCUS.—**F. cerebrales.** Fr., *fosses cérébrales.* Ger., *Schädelgruben.* See *Anterior*, *Middle*, and *Posterior fossæ of the skull.*—**F. cerebralis anterior.** See *Anterior f. of the skull.*—**F. cerebralis media.** See *Middle f. of the skull.*—**F. cerebralis posterior.** See *Posterior f. of the skull.*—**F. cerebri (posterior).** See *Superior occipital f.*—**F. cochleæ.** See *F. cochlearis.*—**F. cochleariformis.** See CANALIS *pro tensore tympani.*—**F. cochlearis.** A slight excavation in the petrous portion of the temporal bone in which the basis modioli rests. [L, 31, 332.]—**F. conchæ.** See FISSURA *anthelicis.*—**Fossæ condyloideæ.** Depressions behind the condyloid processes of the occipital bone into which the posterior condylar canals open. [L, 31.] —**F. coronalis.** See *Anterior f. of the skull.*—**F. coronoidea.** See *Coronoid f.*—**Fossæ costales.** See *Costal fossæ.*—**F. costalis inferior.** See *Inferior costal f.*—**F. costalis superior.** See *Superior costal f.*—**Fossæ costotransversariæ.** Depressions on each side, usually three in number, upon the posterior surface of the three upper segments of the sacrum. [L, 332.]—**F. cotyloidea.** See ACETABULUM.—**F. cranii anterior.** See *Anterior f. of the skull.*—**F. cranii media.** See *Middle f. of the skull.*—**F. cranii posterior.** See *Posterior f. of the skull.*—**F. cruris helicis, F. crurum anthelicis inferior.** See *F. anthelicis.*—**F. crurum anthelicis superior.** A depression on the dorsum of the auricle of the ear which corresponds to the upper crus of the anthelix. [L, 7 (*a*, 29).]—**F. cubiti.** Ger., *Ellenbogengrube.* The depression in the arm on the palmar side of the elbow joint. [L, 332.]—**F. cystica, F. cystidis felleæ.** See FISSURE *for the gall-bladder.*—**F. de Sylvius** (Fr.). See FISSURE *of Sylvius.*—**F. digastrica.** See *Digastric f.*—**F. Douglasii.** See *Douglas's* POUCH.—**F. ductus venosi.** See FISSURE *for the ductus venosus.*—**F. duodeno-jejunalis.** See *Duodeno-jejunal f.*—**F. elliptica.** See RECESSUS *ellipticus.*—**F. eminentiæ olivaris.** See *Subolivary f.* —**F. glandulæ lacrimalis, F. glandularis.** See *Lacrymal f.* —**F. glenoidalis, F. glenoidea.** See *Glenoid f.*—**F. glosso-epiglottica.** A slight excavation upon the tongue, between the folds of the epiglottis where they are strongly marked. [L, 332.]—**F. helicis.** See *Scaphoid f.*—**F. hemielliptica, F. hemisphærica.** See RECESSUS *ellipticus.*—**Fossæ hepatis.** The fissures of the liver. [L.]—**F. hepatis longitudinalis dextra anterior.** See FISSURE *for the gall-bladder.*—**F. hepatis longitudinalis dextra posterior.** See FISSURE *for the vena cava.*—**F. hepatis longitudinalis sinistra.** The left longitudinal fissure of the liver. [L, 7.]—**F. hepatis longitudinalis sinistra anterior.** See *Umbilical* FISSURE.—**F. hepatis longitudinalis sinistra posterior.** See FISSURE *of the ductus venosus.*—**F. hepatis transversa.** See *Transverse* FISSURE *of the liver.*—**F. hyaloidea.** See *Lenticular f.*—**F. hypophyseos.** See *Pituitary f.*—**F. ileo-cæcalis.** See *F. subcæcalis.*—**F. ileocæcalis anterior.** An anomalous pouch of the peritonæum upon the upper margin of the ileo-cæcal valve. It is bounded behind by the ileum, in front by the plica ileo-cæcalis anterior, on the right by the cæcum, while on the left and above it is open. [L, 332.]—**F. ileo-cæcalis inferior.** See *F. subcæcalis.*—**F. ileo-cæcalis superior.** See *F. ileo-cæcalis anterior.*—**F. iliaca externa.** See *External iliac f.*—**F. iliaca interna.** See *Internal iliac f.*—**F. iliaco-subfascialis.** A pouch, formed by the turning in of the tendinous insertion of the psoas minor muscle, lined with peritonæum and in some instances containing a portion of the descending colon. [L, 31, 332.] —**F. ilio-pectinea.** See *Scarpa's* TRIANGLE.—**F. incisiva.** See *Incisor f.*—**F. incudis.** A depression in the posterior wall of the upper part of the tympanic cavity which receives the short process of the incus. [L, 117 (*a*, 29).]—**F. inferior cartilaginis arytænoideæ.** See *F. obliqua.*—**F. infraclavicularis.** See *Infraclavicular f.*—**F. infraspinata.** See *Infraspinous f.*—**F. infratemporalis.** See *Zygomatic f.*—**F. inguinalis interna peritonæi.** See *Internal inguinal* POUCH.—**F. inguinalis lateralis peritonæi.** See *External inguinal* POUCH.—**F. inguinalis media (seu medialis) peritonæi.** See *Internal inguinal* POUCH.—**F. inguinalis peritonæi, F. inguinalis peritonæi externa.** See *External inguinal* POUCH.—**F. inguinalis peritonæi interna.** See *Internal inguinal* POUCH.—**F. innominata.** Fr., *fosse innominée.* Ger., *ungenannte Grube.* See *Scaphoid f.*—**F. intercondylica.** See *Intercondylar f.*—**F. intercondyloidea (femoris) anterior.** Syn.: *sinus condylorum anterior.* A slight depression upon the anterior surface of the femur just above the articular surface. [L, 115.]—**F. intercondyloidea (femoris) posterior.** A deep depression upon the posterior surface of the femur separating the condyles. [L, 115.]—**F. intercondyloidea tibiæ anterior.** A depression upon the upper extremity of the tibia in front of the crucial spine. [L, 31, 332.]—**F. intercondyloidea tibiæ posterior.** A depression upon the upper surface of the tibia behind the crucial spine. [L, 31, 332.]—**F. intercrualis.** See *Intercrural* SPACE.—**F. intersigmoidea** [Treitz]. An anomalous pouch in the mesentery of the sigmoid flexure of the colon, forming in one case the sack of an internal hernia. [L, 31, 332.]—**F. interpeduncularis.** See *Intercrural* SPACE.—**F. ischio-rectalis.** See *Ischio-rectal f.*—**F. jugularis.** See *Suprasternal f.*—**F. jugularis colli.** See *F. jugularis superior.*—**F. jugularis inferior.** The depression immediately below either clavicle. [L, 349.]—**F. jugularis superior.** The depression immediately above either clavicle. [L, 349.]—**F. jugularis thoracis.** See *F. jugularis inferior.*—**F. lacrimalis.** See *Lacrymal f.*—**F. laryngo-pharyngea.** A depression, one on each side, external to the arytæno-epiglottic fold. [L, 31, 332.]—**F. lenticularis.** See *Lenticular f.*—**F. ligamenti venosi.** See FISSURE *of the ductus venosus.*—**F. longitudinalis anterior dextra hepatica.** See FISSURE *for the gall-bladder.*—**F. longitudinalis anterior sinistra hepatica.** See *Umbilical* FISSURE.—**F. longitudinalis dextra.** Ger., *rechte Sagittalfurche.* The fissure for the vena cava and that for the gall-bladder, regarded as one continuous f. [L, 332.]—**F. longitudinalis dextra anterior.** See FISSURE *for the gall-bladder.*—**F. longitudinalis dextra hepatica.** See *F. longitudinalis dextra.*—**F. longitudinalis dextra posterior (hepatica).** See FISSURE *for the vena cava.*—**F. longitudinalis sinistra (hepatica).** See *Longitudinal* FISSURE *of the liver.*—**F. longitudinalis sinistra posterior hepatica.** See FISSURE *of the ductus venosus.*—**F. magna.** See *F. navicularis* (1st def.).—**F. magna muliebris.** The pudendum muliebre. [L, 84 (*a*, 29).]—**F. mandibularis.** See *F. articularis maxillæ inferioris.*—**F. mastoidea.** See *Mastoid f.*—**F. maxillaris.** See *Canine f.*—**F. maxima.** See *Olecranon f.*—**F. mediana.** Of Gordon, the posterior part of the vallecula. [I, 3 (K).] Cf. *F. spinalis.*—**F. medullæ oblongatæ.** See CLIVUS *Blumenbachii.*—**Fossæ mentales (mandibulæ). F. mentalis.** See *Mental f.*—**F. Mohrenheimii.** See *Infraclavicular f.*—**F. Morgagni.** See *F. navicularis urethræ.* [L, 115.]—**F. muscularis major.** A depression on the inner wall of the tympanum above the promontory, in which the tensor tympani muscle arises. ["Arch. f. Anat. u. Phys.," 1870, p. 448 (*a*, 29).]—**F. mylohyoidea** [M. J. Weber]. A shallow depression, one on each side, close to the internal mental spine in which the anterior extremity of the sublingual gland rests. [L, 31.]—**F. navicularis.** Fr., *fosse naviculaire.* Ger., *kahnförmige Grube.* 1. A depression of the soft parts at the posterior extremity of the vulva, between the posterior commissure and the orifice of the vagina; so called from its fancied resemblance to the cavity of a boat. 2. See *Scaphoid f.* and cf. *Navicular f.*—**F. navicularis auriculæ (seu auris).** See *F. anthelicis.*—**F. navicularis frenuli labiorum.** See *F. navicularis* (1st def.).—**F. navicularis laryngea (seu laryngis)** [Betz]. See *F. laryngo-pharyngea.*—**F. navicularis Morgagni (seu urethræ).** The dilated portion of the urethra, $\frac{1}{3}$ to $\frac{1}{4}$ inch in length, situated in the glans penis. [C.]—**F. navicularis vestibuli vaginæ (seu vulvæ).** See *F. navicularis* (1st def.).—**F. obliqua** [Tourtual]. A shallow depression in the triangular space beneath the inferior spine of the arytænoid cartilage. [L, 31.]—**F. occipitalis inferior.** See *Inferior occipital f.*—**F. occipitalis mediana.** A f. rarely observed in the median portion of the occipital bone. ["Rev. d'anthropol.," 1872, p. 366 (*a*, 29).]—**F. occipitalis superior.** See *Superior occipital f.*—**F. oculi.** Fr., *fosse oculaire.* Ger., *Augengrube.* See ORBIT.—**F. of Rosenmüller.** See RECESSUS *pharyngeus.*—**F. of Sylvius.** Lat., *f. Sylvia.* Fr., *fosse de Sylvius.* See FISSURE *of Sylvius.*—**F. of the anthelix.** See *F. anthelicis.*—**F. of the circumvallate papillæ of the tongue.** A depression in the mucous membrane of the tongue, which surrounds the papillæ. [C.]—**F. of the fourth ventricle.** See *Superior* FOVEA and *Inferior* FOVEA.—**F. of the gall-bladder.** See FISSURE *for the gall-bladder.*—**F. of the helix.** Lat., *f. helicis.* See *Scaphoid f.*—**Fossæ of the nose.** See *Nasal* CAVITIES.—**F. of the vena cava.** See FISSURE *for the vena cava.*—**F. olecranii.** See *Olecranon f.*—**F. orbicularis.** See RECESSUS *ellipticus* and RECESSUS *hemisphæricus.*—**F. ossis maxillæ.** See *Canine f.*—**F. ovalis.** See RECESSUS *ellipticus.*—**F. ovalis (atrium cordis, seu septi atriorum).** Fr., *fosse ovale (du cœur).* Ger., *eiförmige Grube.* See FOVEA *of the right auricle of the heart.*—**F. ovalis auris.** See RECESSUS *ellipticus.*—**F. ovarii (peritonæi).** A shallow depression just below the brim of the pelvis for the reception of the ovary. [L, 332.]—**F. palatina.** A depression in the palatine process of the superior maxilla at the mouth of the anterior palatine canal. [*a*, 29.]—**F. paracæcalis.** A rare pouch of the peritonæum behind and to one side of the cæcum. [L, 332.]—**F. pararectalis.** See *F. paruterina.*—**F. paravesicalis.** A pouch of the peritonæum in front of the broad ligament of the uterus. [L, 332.]—**F. parietalis.** See *Parietal f.*

—**F. paruterina.** The space between the posterior surface of the broad ligament of the uterus and the surface of the true pelvis. [L, 332.]—**F. patellæ, F. patellaris.** See *F. intercondyloidea anterior.*—**F. patellaris.** See *Lenticular f.*—**F. peduncularis.** See *Peduncular* SULCUS.—**F. perinæi.** See *Ischio-rectal f.*—**F. petrosa.** See Fossula *petrosa.*—**F. phrenico-hepatica.** A pouch of the peritonæum between the left lateral ligament of the liver and the end of the left lobe. [L, 332.]—**F. pituitaria.** See *Pituitary f.*—**F. poplitea.** See *Popliteal f.* and *F. intercondyloidea (femoris) posterior.*—**F. posterior (humeri).** See *Olecranon f.*—**F. posterior cubitus.** See *Olecranon f.*—**F. præauricularis.** Syn.: *sulcus præauricularis.* A depression occasionally found, especially in Javanese women, in front of the sacro-iliac articulation, indicating the position of the anterior sacro-iliac articulation. [L, 332.]—**F. processus coronoidei (humeri).** See *F. anterior minor humeri.*—**F. pro ductu venoso.** See Fissure *for the ductus venosus.*—**F. pro glandula pituitaria.** See Sella *turcica.*—**F. pro ligamento terete.** See *F. acetabuli.*—**F. pro medulla oblongata.** See *Basilar* GROOVE.—**F. pro vena cava.** See Fissure *for the vena cava.*—**F. pterygoidea.** See *Pterygoid f.*—**F. pterygomaxillaris, F. pterygopalatina.** See *Spheno-maxillary f.*—**F. pubovesicalis.** The space between the levatores vesicæ, the pubes, and anterior surface of the urinary bladder. [L, 332.]—**F. recto-uterina.** See Pouch *of Douglas.*—**F. rhomboidalis, F. rhomboidea.** See *Fourth* VENTRICLE.—**F. Rolandi.** See *Central* FISSURE.—**F. Rosenmuelleri.** See Recessus *pharyngeus.*—**F. rotunda.** See Recessus *hemisphæricus.*—**F. sacci lacrimalis.** See *Lacrymal f.*—**F. sagittalis dextra.** See *Right longitudinal* FISSURE *of the liver.*—**F. sagittalis sinistra.** See *Left longitudinal* FISSURE *of the liver.*—**F. scaphoidea.** See *Scaphoid f.*——**F. sellæ turcicæ.** See *Pituitary f.*—**F. semi-elliptica.** See Recessus *ellipticus.*—**F. semilunaris.** A transverse depression at the anterior part of the superior vermiform process. [I, 3 (K).]—**F. semilunaris major (ulnæ).** See *Great sigmoid* CAVITY.—**F. semilunaris minor (ulnæ).** See *Lesser sigmoid* CAVITY.—**F. semiovalis.** See Recessus *ellipticus.*—**F. sigmoidea cubitus, F. sigmoidea major.** See *Great sigmoid* CAVITY.—**F. sigmoidea minor.** See *Lesser sigmoid* CAVITY.—**F. sigmoidea ossis temporalis.** A depression upon the inner surface of the mastoid portion of the temporal bone in which the mastoid foramina open. [L, 115.]—**F. sinistra anterior.** See *Umbilical* FISSURE *of the liver.*—**F. sinistra posterior.** See Fissure *for the ductus venosus.*—**F. sphenomaxillaris, F. sphenopalatina.** See *Spheno-maxillary f.*—**F. spinalis.** Of Gordon, the anterior portion of the vallecula. [I, 3 (K).] Cf. *F. mediana.*—**F. stylo-tympano-mastoidea.** See *Glenoid f.*—**F. subarcuata.** Of von Tröltsch, a deep depression found under the eminentia arcuata, and produced in the embryonic cartilago petrosa by the upper semicircular canal. It runs through the whole bony pars petrosa, and opens behind the concha of the ear with a large opening on the outer surface of what afterward becomes the mastoid process. [H.]—**F. subauricularis.** The depression immediately beneath the external ear. [L, 34 (*a*, 29).]—**F. subcæcalis** [Treitz]. A pouch of the peritonæum between the lower end of the ileum, the cæcum, and the vermiform appendix. [L, 31, 332.]—**F. subinguinalis.** See *Scarpa's* TRIANGLE.—**F. subrotunda.** See Recessus *hemisphæricus.*—**F. subscapularis.** See *Subscapular f.*—**F. sulciformis.** See Fossula *sulciformis.*—**F. superior cartilaginis arytænoideæ.** See *F. anthelicis.*—**F. superior cerebelli.** The fissure which separates the anterior and posterior lobes of the cerebellum. [L, 31 (*a*, 29).]—**F. supraclavicularis, F. supraclavicularis major.** See *Posterior triangular* SPACE.—**F. supraclavicularis minor.** The space between the sternal and clavicular origins of the sterno-cleido-mastoid muscle. [L, 31.]—**F. supracondyloidea (femoris).** A depression upon the posterior surface of the femur just above the internal condyle and a little to the middle line of the bone. [L, 31.]—**F. suprascapularis.** See *Supraspinous f.*—**F. suprasphenoidalis** [Chaussier]. Sylvii.** See Fissure *of Sylvius.*—**F. temporalis, F. temporum.** See *Temporal f.*—**F. tensoris palati.** The depression in which the tensor palati arises. [L, 7 (*a*, 29).]—**F. tonsillaris.** See *Amygdaloid f.*—**F. tragica.** See Incisura *trago-helicina.*—**F. transversa hepatica.** See *Transverse* FISSURE *of the liver.*—**Fossæ transversales.** Ger., *Querfortssatzpfannen.* The depressions upon the transverse processes of the dorsal vertebræ for articulation with the tubercles on the ribs. [L, 31.]—**F. triangularis (auriculæ).** See *F. anthelicis.*—**F. triangularis (cartilaginis arytænoidei).** Of Tourtual, a deep depression in the quadrangular space between the superior and inferior spines of the arytænoid cartilage. [L, 31.]—**F. triangularis colli.** See *Superior carotid* TRIANGLE.—**F. triangularis medullæ oblongatæ.** See *Rhomboid f.*—**F. triquetra.** See *F. anthelicis.*—**F. trochanterica.** See *Trochanteric f.*—**F. trochlearis.** See *Trochlear f.*—**F. tubæ Eustachii.** An inconstant depression in the pterygoid process which receives the cartilaginous edge of the Eustachian tube. [L. 7 (*a*, 29).]—**F. umbilicalis, F. umbilicalis hepatis.** See *Umbilical* FISSURE.—**F. uterorectalis.** See Pouch *of Douglas.*—**F. utero-vesicalis.** See *Vesico-uterine f.*—**F. venæ cavæ.** See Fissure *for the vena cava.*—**F. vesicæ felleæ, F. vesicalis, F. vesiculæ felleæ.** See Fissure *for the gall-bladder.*—**F. vesicorectalis.** See *Recto-vesical f.*—**Glenoid f.** Lat., *f. glenoidalis, f. glenoidea.* Fr., *fosse glénoïdale.* A f. on the temporal bone, between the two roots of the zygoma, for articulation with the head of the inferior maxilla. [C.]—**Guttural f.** Lat., *f. gutturalis.* Fr., *fosse gutturale.* Ger., *Schlundgrube.* 1. The central portion of the middle division of the external base of the skull. [C.] 2. See Fovea *pharyngis.*—**Hyaloid f.** Lat., *f. hyaloidea.* Fr., *fosse hyaloïde.* Ger., *glasähnliche Grube.* See *Lenticular f.*—**Iliac fossæ.** See *External iliac f.* and *Internal iliac f.*—**Ilio-pectineal f.** Lat., *f. ilio-pectinea.* Fr., *fosse ilio-pectinée.* See *Scarpa's* TRIANGLE.—**Incisor f. of the inferior maxilla.** A shallow depression on the outer surface of the inferior maxilla below the incisor teeth. [C.]—**Incisor f. of the superior maxilla.** See *Myrtiform f.*—**Inferior costal f.** Lat., *f. costalis inferior.* The facet on the lower portion of the body of a vertebra for articulation with a rib. [L, 332.]—**Inferior occipital f.** Lat., *f. occipitalis inferior.* The broad, shallow depression on the central aspect of the occipital bone which lodges either lateral lobe of the cerebellum. [I.]—**Infraclavicular f.** Lat., *f. infraclavicularis.* Ger., *Unterschlüsselbeingrube.* A flattened, triangular depression just beneath the clavicle, between it and the mamma. [C, 3 ; L, 332.]—**Infraspinous f.** Lat., *f. infraspinata.* Ger., *Untergrätengrube.* The posterior surface of the scapula below its spine. [L.]—**Infratemporal f.** See *Zygomatic f.*—**Intercondylar f., Intercondyloid f.** Lat., *f. intercondylica, f. intercondyloidea.* See *F. intercondyloidea (femoris) anterior, F. intercondyloidea (femoris) posterior, F. intercondyloidea (tibiæ) anterior,* and *F. intercondyloidea (tibiæ) posterior.*—**Internal iliac f.** Lat., *f. iliaca interna.* Fr., *fosse iliaque interne.* Ger., *innere Darmbeingrube.* The anterior portion of the internal surface of the ilium occupied largely by the iliacus muscle. [L, 31, 142, 332.]—**Ischio-rectal f.** Lat., *f. ischio-rectalis.* Fr., *fosse ischio-rectale, creux ischio-rectal.* Ger., *Mittelfleischgrube.* The space between the obturator fascia, glutæus maximus muscle and the great sacro-sciatic ligament, and the recto-vesical fascia. [L.]—**Jugular f.** Lat., *f. jugularis.* Fr., *fosse jugulaire.* Ger., *Drosseladergrube.* A deep, smooth depression in the petrous portion of the temporal bone, anterior to the jugular facet. It forms with the jugular notch of the occipital bone the jugular foramen. [C.]—**Lacrymal f.** Lat., *f. glandulæ* (seu *sacci*) *lacrimalis, f. glandularis.* Fr., *fosse lachrymale.* Ger., *Lachrymalgrube, Thränengrube.* A slight depression in the upper and outer part of the root of the orbit, just beneath and behind the superior orbital margin, in which lies the lacrymal gland. [F.]—**Lenticular f.** Lat., *f. lenticularis.* Fr., *fosse lenticulaire.* Ger., *Linsengrube.* An indentation or depression in the anterior surface of the vitreous formed by the membrana hyaloidea, for the reception of the crystalline lens. [F.]—**Mastoid F.** Lat., *f. mastoidea.* Fr., *gouttière mastoïdienne.* Ger., *Warzenrinne.* A depression on the inner surface of the mastoid process of the temporal bone, which forms part of the lateral sinus. [F.]—**Maxillary f.** Lat., *f. maxillaris. f. ossis maxillæ.* Fr., *fosse maxillaire.* See *Canine f.*—**Mental fossæ.** Lat., *fossæ mentales.* Two flat depressions, one on each side, of the mental protuberance of the mandible. [L, 31.]—**Middle f. of the skull.** Lat., *f. cranii media.* Fr., *fosse médiane du crâne.* Ger., *mittlere Schädelgrube.* One of the three fossæ into which the internal base of the skull is divided. It is on a lower level than the anterior, and presents a mesal and two lateral parts. The mesal part is small, being formed by the olivary eminence and pituitary f. (sella turcica) of the sphenoid, and limited behind by the dorsum sellæ. The lateral part on each side is formed by the great wing of the sphenoid, and the squamous portion and the anterior surface of the petrous portion of the temporal bones. It lodges the temporal lobes of the brain. [C, 3.]—**Mohrenheim's f.** See *Infraclavicular f.*—**Morgagni's f.** See *F. navicularis urethræ.*—**Myrtiform f.** A slight depression in the facial surface of the superior maxilla, just to the inner side of the canine eminence. [C.]—**Nasal fossæ.** See *Nasal* CAVITIES.—**Navicular f.** A slight depression at the base of the internal pterygoid plate of the sphenoid bone. [C.] Cf. *F. navicularis.*—**Olecranon f.** Lat., *f. olecranii.* A large, deep pit in the humerus above the trochlea which receives the olecranon process of the ulna. [C, 3.]—**Pacchionian fossæ.** The depressions upon the inner surface of the skull in which the Pacchionian bodies are lodged. [L.]—**Parietal f.** Lat., *f. parietalis.* Fr., *fosse pariétale.* The most concave part of the inner surface of the parietal bone, opposite the parietal eminence. [C.]—**Perineal f.** Lat., *f. perinæi.* Fr., *fosse périnéale.* See *Ischio-rectal f.*—**Pituitary f.** Lat., *f. pituitaria.* Fr., *fosse pituitaire.* See Sella *turcica.*—**Popliteal f.** Lat., *f. poplitea.* Ger., *Kniekehle.* The depression behind the knee lying between the hamstring tendons above and the heads of the gastrocnemius below.—**Portal f.** See *Portal* FISSURE.—**Posterior f. of the skull.** Lat., *f. cranii posterior.* Ger., *hintere Schädelgrube.* The depression of the base of the skull extending between the dorsum sellæ in front and the occipital protuberance behind, which lodges the cerebellum and medulla oblongata. [L, 332.]—**Prepontine f.** See Foramen *cæcum anterius.*—**Pterygoid f.** Lat., *f. pterygoidea.* Fr., *fosse ptérygoïdienne.* The cavity bounded by the pterygoid plates of the sphenoid bone. [C.]—**Pterygo-maxillary f., Pterygo-palatine f.** See *Spheno-maxillary f.*—**Recto-vesical f.** Lat., *f. rectovesicalis.* Fr., *cul-de-sac recto-vésical.* Ger., *Mastdarmblasengrube.* See Pouch *of Douglas.*—**Scaphoid f.** Lat., *f. helicis, f. scaphoidea, f. innominata.* Fr., *fosse scaphoïde.* Ger., *kahnförmige* (oder *schifförmige*) *Grube.* 1. The narrow, curved depression in the cartilage of the auricle, between the helix and the anthelix. 2. A small, oval, shallow depression at the base of the internal pterygoid plate, from which the tensor palati arises. [A, 478 (*a*, 17) ; F.]—**Spheno-maxillary f., Spheno-palatine f.** Lat., *f. sphenomaxillaris.* Fr., *fosse sphéno-maxillaire.* Ger., *Sphenomaxillargrube, Kiefer-Keilbeingrube.* The space which lies in the angle between the pterygo-maxillary and the spheno-maxillary fissures. [C, 3.]—**Subclavicular f.** See *Infraclavicular f.*—**Subolivary f.** Fr., *fosse* (ou *fossette*) *sous-olivaire* (ou *de l'éminence olivaire*, ou *de Vicq d'Azyr*). A small groove below the olivary body. [I, 42 (K).]—**Suborbital f., Suborbitar f.** See *Canine f.*—**Subscapular f.** Lat., *f. subscapularis.* Fr., *fosse sous-scapulaire.* Ger., *Unterschulterblattgrube.* The concave portion of the costal surface of the scapula occupied by the subscapular muscle. [L, 332.]—**Subpyramidal f.** Fr., *fossette sous-pyramidale.* A depression just below the pyramid and behind the fenestra rotunda of the middle ear. [L, 35 (*a*, 29).]—**Superior costal f.** Lat., *f. costalis superior.* The facet for articulation with a rib on the upper portion of the body of a vertebra. [L, 332.]—**Superior**

occipital f. Lat., *f. occipitalis superior.* A depression in the superior part of the interior of the occipital bone. It lodges the occipital end of the cerebrum. [C.]—**Supraclavicular f.** Lat., *f. supraclavicularis.* Ger., *Oberschlüsselbeingrube.* A f. just above the clavicle, between the sterno-cleido-mastoid and trapezius muscles. [C, 3.]—**Supraspinous f.** Lat., *f. supraspinata.* Ger., *Obergrätengrube.* That portion of the dorsal surface of the scapular superior to the spine. [L, 332.]—**Suprasternal f.** Lat., *f. suprasternalis.* Ger., *Kehlgrube.* The space included between the ventral margins of the sterno-cleido-mastoid muscles, the interscapular ligament, the lower margin of the mandible, and lines extending between the angles of the jaw and the mastoid processes of the temporal bones. [L, 332.]—**Temporal f.** Lat., *f. temporalis, f. temporis.* Fr., *fosse temporale.* Ger., *Schläfengrube.* The f. occupied by the temporal muscle. The squamous part of the temporal and the parietal, frontal, sphenoid, and malar bones take part in its formation. [C, 3.]—**Triangular f.** See FISSURE *of Sylvius.*—**Trochanteric f.** Lat., *f. trochanterica.* A f. in the femur behind its neck for the insertion of the obturator externus muscle. [C, 3.]—**Trochlear f.** A small depression in the frontal bone, beneath the internal angular process. It affords attachment to the pulley of the superior oblique muscle. [C.]—**Tympanico-stylo-mastoid f.** Fr., *fosse tympanico-stylo-mastoïdienne.* A very small f. situated behind the glenoid f., bounded in front by the tympanic tubercle, behind by the mastoid process, and internally by the styloid process; said to be larger in women than in men. [Thiem and Guérin, cited in "Gaz. hebd. de méd. et de chir.," March 22, 1889, and "N. Y. Med. Jour.," June 8, 1888, p. 632.]—**Urachal f.** See *Prevesical* SPACE.—**Vesico-uterine f.** Fr., *cul-de-sac vésico-utérin.* Ger., *Blasengebärmuttergrube.* The space between the posterior surface of the uterus and the rectum. [L, 332.]—**Zygomatic f.** Lat., *f. zygomatica.* Syn.: *f. infratemporalis.* Fr., *fosse zygomatique, fosse malaire.* Ger., *Jochbeingrube.* An irregular hollow in the side of the skull, covered in part by the ramus of the lower jaw. Its wall is formed internally by the external pterygoid plate, superiorly by the lower part of the great wing of the sphenoid and by a small part of the squamous portion of the temporal bone, anteriorly by the zygomatic surface of the maxilla, and inferiorly by the external pterygoid plate and the mandible. [C, 3.]

FOSSE, n. Fo^{2}s. Fr., *f.* See FOSSA.—**F. acoustique inférieure.** See FOVEA *acustica inferior.* [I, 195.]—**F. cotyloïdienne** (Fr.). See ACETABULUM (3d def.).—**F. de la base du septum lucidum** (Fr.). See *Fifth* VENTRICLE.—**F. de l'anthélix** (Fr.). See FOSSA *anthelicis.*—**F. de l'éminence olivaire.** See *Subolivary* FOSSA.—**F. de Malacarne** (Fr.). A small depression which separates the olivary body from the lateral column. [I, 35 (K).]—**F. des corps olivaires** (Fr.). A slight groove which separates the olivary bodies from the pons. [I, 18 (K).]—**F. des nerfs oculo-musculaires** (Fr.). The small depression on the surface of the crus cerebri, which lodges the motor oculi. [I, 18 (K).]—**F. de Sylvius.** See FISSURE *of Sylvius.*—**F. glénoïdale de l'omoplate** (Fr.). See *Glenoid* CAVITY.—**F. hyaloïde** (Fr.). See *Lenticular* FOSSA.—**F. malaire** (Fr.). See *Zygomatic* FOSSA.—**F. médiane** (Fr.). See *Median* FISSURE.—**F's nasales** (Fr.). See *Nasal* CAVITIES.—**F. postérieure de la commissure molle.** See FOVEA *posterior commissuræ mollis.*—**F. turcique** (Fr.). See SELLA *turcica.*

FOSSETTE (Fr.), n. Fo^{2}s-se^{2}t. See DIMPLE, FOSSA, FOSSULA, FOVEA, FOVEOLA, and SCROBICULUS.—**F. angulaire du quatrième ventricule** [Chaussier]. See CALAMUS *scriptorius.*—**F. antérieure du sinus rhomboïdal.** See *Superior* FOVEA.—**F. cystique.** The fissure for the gall-bladder. [L, 88 (*a*, 29).]—**F. de la cornée.** See FOSSULA *of the cornea.*—**F. de la fenêtre ovale.** See FOSSULA *fenestræ ovalis.*—**F. des joues.** A dimple on the human cheek. [L, 43.]—**F. du cœur.** See SCROBICULUS *cordis.*—**F. du menton.** The dimple of the chin. [L, 43.]—**F. duodéno-jéjunale.** See *Duodeno-jejunal* FOSSA.—**F. elliptique.** See RECESSUS *ellipticus.*—**F. gutturale.** See *Guttural* FOSSA and FOVEA *laryngis.*—**F. hemisphérique.** See RECESSUS *hemisphæricus.*—**F. hyaline.** See *Lenticular* FOSSA.—**F. inférieure.** See *Inferior* FOVEA.—**F. inguinale externe.** See FOVEA *inguinalis externa.*—**F. inguinale interne.** See *Internal inguinal* POUCH.—**F. lacrymale.** See *Lacrymal* FOSSA.—**F. latérale du bulbe.** See *Lateral* FISSURE *of the medulla oblongata.*—**F. lenticulaire.** See *Lenticular* FOSSA.—**F. orbiculaire.** See RECESSUS *hemisphæricus.*—**F. postérieure.** See *Inferior* FOVEA.—**F. sacculiforme de l'oreille interne.** A depression in the wall of the vestibule of the ear for the reception of the saccule. [L, 158 (*a*, 29).]—**F. scaphoïde.** See *Scaphoid* FOSSA.—**F. semi-ovoïde.** See RECESSUS *ellipticus.*—**F. sous-olivaire.** See *Subolivary* FOSSA.—**F. sus-olivaire.** See SULCUS *cæcus.*—**F. vésico-pubienne.** See *Prevesical* SPACE.

FOSSIL, adj. Fo^{2}s'i^{2}l. Lat., *fossilis* (from *fodere,* to dig). Fr., *fossile.* Ger., *f.* It., *fossile.* Sp., *fósil.* Dug out of the earth; petrified. [L, 343.]

FOSSILIFICATION (Fr.), n. Fos-se-le-fe-ka^{3}-se-o^{2}n^{2}. See FOSSILIZATION.

FOSSILIN, n. Fo^{2}s'i^{2}l-in. See VASELIN.

FOSSILIZATION, n. Fo^{2}s-i^{2}l-i^{2}-za'shu^{3}n. Fr., *fossilisation.* Conversion into a fossil state. [*a*, 27.]

FOSSILIZED, adj. Fo^{2}s'i^{2}l-izd. See FOSSIL.

FOSSIPES (Lat.), adj. Fo^{2}s'i^{2}-pez(pas). From *fossa,* a ditch, and *pes,* the foot. Fr., *fossipède.* Ger., *grubenfüssig.* See FOSSORIAL.

FOSSORIAL, adj. Fo^{2}s-so'ri^{2}-a^{2}l. From *fossor,* a digger. Fr., *fouisseur, fossoyeur* (2d def.). 1. Adapted for digging. 2. Having the habit of digging; as a n., a burrowing animal. The *Fossores* are a group of the *Hymenoptera,* in which the basal joint of the posterior tarsi is not enlarged and the bodies are hairless. [L, 56, 292, 343.] The *Fossoria* are a class of the *Hymenoptera,* remarkable for the manner in which they capture their prey, which they frequently do not kill, but simply paralyze by stinging in the ventral nerve-cord or in the thoracic ganglia. [L, 353 (*a*, 27).]

FOSSULA (Lat.), n. f. Fo^{2}s'su^{2}(su^{4})-la^{3}. Dim. of *fossa* (*q. v.*). Fr., *fossette.* Ger., *Grübchen.* A little fossa. [L, 121.]—**F. cochleæ, F. cochlearis.** See FOSSA *cochlearis.*—**F. corneæ.** See *F. of the cornea.*—**Fossæ costales.** See *Costal* FOSSÆ.—**F. fenestræ ovalis.** Fr., *fossette de la fenêtre ovale.* Ger., *Grübchen des ovalen Fensters.* A depression in the inner wall of the tympanum above the promontory, in which is situated the oval window for the reception of the foot-plate of the stapes. [F, 33.]—**F. fenestræ rotundæ.** A funnel-shaped depression on the inner wall of the tympanum, having the fenestra rotunda at its bottom. [L, 35, 332 (*a*, 29).]—**F. inferior.** A depression at the bottom of the internal auditory meatus below the crista falciformis. It presents in its anterior part the lamina cribrosa anterior inferior, and posteriorly the foramen singulare. [*a*, 29.]—**F. mentalis.** See *Mental* FOSSA.—**F. of the cornea.** Lat., *f. corneæ.* Fr., *fossette de la cornée.* Ger., *Hornhautgrübchen.* A deep ulcer of the cornea with a clear base in process of healing. [F.]—**Fossulæ olfactoriæ.** See FORAMINA *cribrosa.*—**F. petrosa (ossis temporis).** A slight depression upon the temporal bone in which is situated the inferior aperture of the tympanic canal. [L, 31.]—**F. sulciformis.** A slight furrow on the posterior border of the hemi-elliptical fossa which leads from the inner opening of the aquæductus vestibuli directly toward the crista vestibuli. [L, 31 (*a*, 29).]—**F. superior.** A depression in the petrous portion of the temporal bone in which is situated the internal aperture of the aqueduct of Falloppius. [L.]—**F. trochlearis.** See FOVEA *trochlearis.*—**F. velaris.** See *Auditory* DEPRESSION.

FOSSULATE, adj. Fo^{2}s'u^{2}l-at. From *fossula,* a little ditch. See FOVEOLATE.

FÖTAL (Ger.), adj. Fu^{5}t-a^{3}l'. See FŒTAL.

FOTO, n. In Japan, the *Vitis vinifera.* [B, 121 (*a*, 24).]

FOTSIMIVADIKA, n. In Madagascar, the *Pipturus integrifolius.* [B, 121 (*a*, 24).]

FOTTERWORT, n. Fo^{2}t'u^{5}r-wu^{5}rt. The *Helleborus fœtidus.* [B, 92 (*a*, 14).]

FOTUS [Fr. Cod.] (Lat.), n. m. Fo'tu^{3}s(tu^{4}s). From *fovere,* to warm. See FOMENTATION.—**F. ad pustulas in cute favendas.** A solution of 2 parts of nitric acid and 3 of hydrochloric acid in 60 of water. [B, 97 (*a*, 14).]—**F. adstringens.** See *Decoctum corticis* QUERCUS *cum alumine.*—**F. anodynus.** See *Decoctum* VERBASCI *anodynum.*—**F. antiphlogisticus Schmuckeri.** See *F. refrigerans Schmuckeri.*—**F. antisepticus.** See *Decoctum corticis* QUERCUS *cum aceto.*—**F. aromaticus** [Fr. Cod.]. See FOMENTATION *aromatique.*—**F. discutiens** [Dan. Mil. Ph., 1808, Lip. Ph., 1794, Pruss. Mil. Ph., 1823, Würzb. Ph., 1815]. Fr., *fomentation discussive.* See FOMENTUM *discutiens.*—**F. emmenagogus.** Fr., *fomentation emménagogue.* A preparation made by boiling 1 part of species pro fotu emmenagogo in 8 parts of water until reduced to 5, and adding 1 part of brandy. [B, 119 (*a*, 14).]—**F. emolliens** [Belg. Ph., 1st ed., Fr. Cod.]. Fr., *fomentation émolliente.* Sp., *fomentación* [Sp. Ph.] (*ó fomento* [Mex. Ph.]) *emoliente.* A preparation made by boiling species emollientes 7 parts [Belg. Ph.] (or 10 parts [Fr. Cod.]) with enough water to make 200 parts, or by boiling 1 part each of leaves of *Malva* and *Althæa* in enough water to make 40 parts [Sp. Ph.]. [B, 95.]—**F. frigidus.** See FOMENTUM *discutiens.*—**F. frigidus Schmuckeri.** See *F. refrigerans Schmuckeri.*—**F. narcoticus.** Fr., *fomentation narcotique.* Sp., *fomento narcótico* [Sp. Ph.]. An infusion of 50 parts of species narcoticæ and 2 to 4 of extract of opium in 500 of boiling water. [L, 41, 49 (*a*, 14)].—**F. refrigerans, F. refrigerans et deprimens.** See FOMENTUM *discutiens.*—**F. refrigerans Schmuckeri** [Austr. Ph., 1820, Dutch Ph., 1811, Niemann's Notes, Disp. fuld., 1791, Hamb. Ph., 1804, Hannov. Ph., 1819, Hess. Ph., 1806]. Fr., *fomentation réfrigérante.* Syn.: *fomentum Schmuckeri, fomentatio frigida* [Russ. Ph.]. A preparation made by dissolving 1 part each of potassium nitrate and ammonium chloride in 48 parts of water, and adding 4 parts [Austr. Ph., Dutch Ph., Disp. fuld., Hess. Ph.], or 12 parts [Russ. Ph., Hamb. Ph., Hannov. Ph.], of vinegar; applied on contusions and ecchymoses. [B, 119 (*a*, 14).]—**Species pro fotu emmenagogo.** See under SPECIES.

FÖTUS (Ger.), n. Fu^{5}t'us. See FŒTUS.

FOU (Fr.), adj. Fu. See INSANE.

FOUASSE À L'ÂNE (Fr.), n. Fu-a^{3}s-a^{3}-la^{3}n. The *Eryngium campestre.* [B, 121, 173 (*a*, 24).]

FOUASSIER (Fr.), n. Fu-a^{3}s-se-a. The *Malva silvestris.* [B, 121, 173 (*a*, 24).]

FOUDROYANT (Fr.), adj. Fud-rwa^{3}-ya^{3}n^{2}. See FULMINANT.

FOUÊNE (Fr.), **FOUESNE** (Fr.), n's. Fu-e^{2}n, -an. The fruit of *Fagus silvestris.* [B, 121, 173 (*a*, 24).]

FOUET (Fr.), n. Fu-a. From *fustis,* a cudgel. See FLAGELLUM.—**F. de l'aile.** The exterior articulation of a bird's wing. [L, 41.]—**F. de Neptune.** A popular name for several species of *Fucus* and *Laminaria.* [A, 526.]

FOUETOUTRAC, FOUETRAC, n's. Fu-e^{2}-tu-tra^{3}k, -e^{2}-tra^{3}k. The *Laminaria leptopoda.* [B, 121 (*a*, 24).]

FOUETTAGE (Fr.), n. Fu-e^{2}t-ta^{3}zh. Of the veterinarians, a mode of castration by ligation of the scrotum above the testicles, followed on the third day by abscission below the ligature. [A, 301.]

FOUGEIROUX, n. In Provence, the *Arum italicum.* [B, 121 (*a*, 24).]

FOUGÈRE (Fr.), n. Fu-zhe^{2}r. See FILIX and FILICES.—**Extrait éthéré (ou oléo-résineux) de f. mâle** [Fr. Cod.]. See

Oleo-resina ASPIDII.—**F. à l'aigle.** The *Pteris aquilina.* [B, 121, 173 (a, 24).]—**F. aquatique.** The *Osmunda regalis.* [B, 121, 173 (a, 24).]—**F. commune.** The *Pteris aquilina.* [B, 19, 173 (a, 24).]—**F. femelle.** The *Asplenium filix fœmina* and the *Pteris aquilina.* [B, 19, 121, 173 (a, 24).]—**F. fleurie.** The *Osmunda regalis.* [B, 19, 121 (a, 24).]—**F. impériale.** The *Pteris aquilina.* [B, 121, 173 (a, 24).]—**F. mâle.** The *Aspidium filix mas.* [B, 113, 173.]—**F. musquée.** The *Myrrhis odorata* and the *Scandix odorata.* [B, 19, 121, 173 (a, 24).]—**F. odorante.** The *Ophioglossum scandens.* [B, 121, 173 (a, 24).]—**F. royale.** The *Osmunda regalis.* [B, 121, 173 (a, 24).]—**Huile de f. mâle.** See *Oleum* FILICIS *maris* and *Oleo-resina* ASPIDII.—**Poudre de f. mâle** [Fr. Cod.]. Aspidium (*q. v.*, 2d def.) dried, powdered, and passed through a No. 80 sieve. [B, 113 (a, 14).]

FOUGEROLLE (Fr.), n. Fuzh'rol. The *Polyypodium vulgare.* [B, 173 (a, 24).]

FOUGES (Fr.), n. Fuzh. The genus *Boletus.* [B, 121 (a, 24).]

FOUILLOUX (Fr.), n. Fu-el-yu. A place in the department of Cantal, France, where there is a gaseous and weakly ferruginous spring. [L, 49, 87 (a, 14).]

FOUISSEUR (Fr.), adj. Fu-es-su^{5}r. From *fossor*, a digger. See FOSSORIAL (2d def.); as a n., a rooting animal. [L, 41.]

FOUITO-DIEU, n. In Provence, the *Carlina corymbosa.* [B, 121 (a, 24).]

FOUITO-PASTRÉ, n. In Languedoc, the genus *Ilex.* [B, 121 (a, 24).]

FOUL, adj. Fu^5'u^{4}l. A.-S., *fûl.* Gr., *αἰσχρός*, *μιαρός.* Lat., *fœdus.* Fr., *sale.* Ger., *faul.* Filthy.—**F. brood.** See the major list. —**F. in the foot.** The foot-rot of horned cattle. [a, 27.]

FOULAGE (Fr.), n. Fu-la^{3}zh. Massage by pressure. [A, 385.]

FOULBROOD, n. Fu^5'u^{4}l-brud. Ger., *Faulbrut.* A virulent epizootic disease of bees, especially affecting the larvæ, which degenerate into a fœtid and stringy, yellowish-black material at the bottom of the cell, the "foulbroody matter." It also affects the working bees and the ovaries of the queen bee. It is common in Europe, but very rare in the United States. It is said to be produced by the *Bacillus alvei* (*q. v.*). [W. W. Cheyne, "Brit. Med. Jour.," Oct. 10, 1885, p. 697 (a, 17); M. Louise Thomas (a, 27).]

FOULBROODY, adj. Fu^5'u^{4}l-brud-i^2. Pertaining to foulbrood.

FOULÉ (Fr.), adj. Fu-la. Sprained. [A, 385.]

FOULER (Fr.), v. tr. Fu-la. To press, crush, trample upon. [a, 21.]—**Se f. le nerf du bras.** A provincial expression meaning to be affected with aï (*q. v.*). [Larger, "Rev. de chir.," May, 1882, p. 399.]

FOULOIR (Fr.), n. Fu-lwa^{3}r. An instrument for filling teeth. [L, 41.]

FOULQUE (Fr.), n. Fulk. See RÂLE.

FOULSAPATE, n. In the Mauritius, the *Hibiscus rosa sinensis.* [B, 121 (a, 24).]

FOULURE (Fr.), n. Fu-lu^{6}r. A sprain. [A, 385.]

FOUNAGI DE DISETO, n. In Provence, the *Spergula arvensis.* [B, 121 (a, 24).]

FOUNDER, v. tr. Fu^5'u^{4}nd-u^{5}r. From *fundus*, the bottom of anything. To subject an animal, especially a horse, to strain, excessive feeding, drinking too much water when over-heated, etc., causing an inflammation of the sensitive portions of the foot, the laminæ, etc. [D; L.]

FOUNDER, n. Fu^5'u^{4}nd-u^{5}r. Fr., *fourbure.* Ger., *Rehe.* The condition of a foundered animal.

FOUNDERED, adj. Fu^5'u^{4}nd-u^{5}rd. Fr., *fourbu.* Ger., *rehe, steif.* Injured by foundering. [D.]

FOUNDERING, n. Fu^5'u^{4}nd-u^{5}r-i^{2}n^2. See FOUNDER, n.

FOUNTAIN, n. Fu^5'u^{4}nt-e^{2}n. Lat., *fons.* Fr., *fontaine.* Ger., *Quell.* A stream of water pouring forth from the earth.—**F.-plant.** The *Amarantus salicifolius.* [B, 275 (a, 24).]—**F.-tree.** The *Cedrus deodara.* [B, 275 (a, 24).]

FOUQUIERA (Lat.), n. f. Fu-ki^2-a'ra^3. A genus of the *Tamariscineæ*, tribe *Fouquiereæ.* The *Fouquieraceæ* (Fr., *fouquiéracées*) of De Candolle are an order of the *Calycifloræ* (of Lindley, of the *Euphorbiales*) of Meissner, a suborder of the *Tamariscineæ*; of Endlicher, a family of the *Parietales.* The *Fouquiereæ* of Reichenbach are a division of the *Loasaceæ*; of others, a tribe of the *Tamariscineæ.* The *Fouquieriaceæ* of Dumortier are a family of the *Ericarieæ.* [B, 44, 121, 170 (a, 24).]—**F. splendens.** California candle-wood; found also in Mexico. The bark furnishes Ocotilla wax. [B, 5, 275 (a, 24).]

FOURAS (Fr.), n. Fu-ra^3. A sea-bathing resort on the southwestern coast of France. [a, 319 (a, 21).]

FOURBATURE (Fr.), **FOURBISSURE** (Fr.), n's. Fur-ba^3-tu^{6}r, -bes-su^{6}r. See FOUNDER, n.

FOURBU (Fr.), adj. Fur-bu^6. See FOUNDERED.

FOURBURE (Fr.), n. Fur-bu^{6}r. See FOUNDER, n.

FOURCHE (Fr.), n. Fursh. From *furca*, a two-pronged fork. 1. A fork-like instrument for compressing the ranine artery. [A, 301.] 2. A mass of elastic subcorneous tissue in the interspace between the inflected parts of the wall of the hoof in the horse. [L, 14 (a, 29).]—**F. ferrée.** The *Centaurea nigra.* [B, 173 (a, 24).]

FOURCHET (Fr.), n. Fur-sha. Inflammation of the interdigital canal in the sheep. [A, 301.]

FOURCHETTE (Fr.), n. Fur-she^{2}t. A fork or a fork-like instrument or structure; of the vulva, a delicate transverse band of mucous membrane that stretches across its cleft, behind the ostium vaginæ, when the labia majora are drawn apart; of the sternum, its semilunar notch, also the notch of the ensiform cartilage when it is cleft; of a horse's foot, the frog; in birds, the second clavicle, or fork-bone. [A, 385; L, 43.]

FOURCHON (Fr.), n. Fur-sho^{2}n^2. A prong of a fork. [A, 385.]

FOURCHU (Fr.), adj. Fur-shu^6. Forked. [B, 1 (a, 24).]

FOURDINIER (Fr.), n. Fur-de-ne-a. The *Prunus spinosa.* [B, 121, 173 (a, 24).]

FOURDRAINE (Fr.), n. Fur-dre^{2}n. The fruit of *Prunus spinosa.* [B, 121, 173 (a, 24).]

FOURGON (Fr.), n. Fur-go^{2}n^2. The *Ruscus aculeatus.* [B, 121, 173 (a, 24).]

FOURMEN, n. In Languedoc, the genus *Triticum.* [B, 121 (a, 24).]

FOURMI (Fr.), n. Fur-me. From *formica*, an ant. The ant. —**Acide de f's.** See FORMIC *acid.*—**Alcoolat de f's.** See *Spiritus* FORMICARUM.—**Alcoolat de f's composé.** See AQUA *magnanimitatis.*—**Alcoolé de f's.** See *Tinctura* FORMICARUM.—**Esprit de f's.** See *Spiritus* FORMICARUM.

FOURMILIÈRE (Fr.), n. Fur-me-le-e^{2}r. Lit., an ant-hill; a diseased state of the foot in foundered horses, characterized by inflammation at the junction of the skin with the hoof. [A, 301, 385, 526.]

FOURMILLEMENT (Fr.), n. Fur-mel-y'-ma^{3}n^2. See FORMICATION.

FOURNA, n. In Madagascar, the balsam of *Calophyllum inophyllum.* [B, 46, 88 (a, 14).]

FOURNEAU (Fr.), n. Fur-no. From *furnus*, an oven. A furnace or other heating apparatus. [a, 30.]—**F. catholique.** An old form of chemical furnace. [L, 41.]—**F. de coupelle.** A cupel furnace. [L, 43.]—**F. de fusion.** A smelting furnace. [L, 43.]—**F. de réverbère.** A reverberatory furnace. [L, 43.]—**F. des paresseux.** See ATHANOR.—**F. évaporatoire.** An evaporating furnace. [L, 43.]

FOUR-O'CLOCK, n. For'o-klo^{2}k. The *Mirabilis jalapa*; in the pl. *f.-o'c's*, the *Nyctaginaceæ.* [B, 34, 121 (a, 24).]—**F.-o'c. flower.** The *Mirabilis dichotoma.* [B, 275 (a, 24).]

FOUROUCHE (Fr.), n. Fu-rush. The *Trifolium incarnatum.* [B, 19 (a, 24); L, 41 (a, 21).]

FOURRAGE (Fr.), n. Fur-ra^{3}zh. Forage.—**F. de disette.** The *Spergula arvensis.* [B, 121, 173 (a, 24).]

FOURREAU (Fr.), n. Fur-ro. The cutaneous sheath of the penis in quadrupeds; the prepuce. [A, 385.]

FOUSEL, n. Fu'se^{2}l. See FUSEL.

FOUTEAU (Fr.), n. Fu-to. The genus *Fagus.* [B, 121, 173 (a, 24).]

FOUTERLO, n. In Provence, the *Aristolochia clematitis.* [B, 121 (a, 24).]

FOVEA (Lat.), n. f. Fo(fo^2)'ve^2(we^2)-a^3. From *fodere*, to dig. Gr., *βόθρος.* Fr., *fovée, fovéole, fossette.* Ger., *Grube, Grübchen.* It., *fossetta.* Sp., *hoyuelo.* 1. A dimple, a slight depression or pit. See FOSSA. 2. The depression on the face of the sheathing basal part of a leaf, in which the sporangeium rests. [B, 77, 291 (a, 24).] 3. An old term for the vulva, also for the space between the mammary glands. 4. Of J. C. Claudinus, a form of vapor bath or sweating apparatus for the lower limbs. [A, 325.]—**Anterior f.** See *Superior f.*—**F. acetabuli.** See FOSSA *acetabuli.*—**F. acustica inferior.** Fr., *fossette acoustique inférieure.* The interval between the pons and the olive and pyramid, in which lie the filaments of the auditory nerve. [I, 39.]—**F. anterior.** See *Superior f.*—**Foveæ anteriores fossæ rhomboidalis.** Two slight depressions on the anterior wall of the fourth ventricle of the brain. [L, 7 (a, 29).]—**F. anterior major humeri.** See FOSSA *anterior major humeri.*—**F. anterior minor humeri.** See FOSSA *anterior minor humeri.*—**Foveæ articulares laterales.** Depressions upon the under surface of the transverse processes of the third to the sixth cervical vertebræ into which elevations (the eminentiæ costariæ) upon the adjacent vertebræ fit. [L, 332.]—**Foveæ articulares transversales.** See *Costal* FOSSÆ.—**F. articularis condyli.** A shallow triangular depression on the posterior surface of the condyle of the inferior maxilla. ["Arch. f. Anat. u. Phys.," 1865, p. 722 (a, 29).]—**F. aspera.** A depression on the sphenoid bone between the posterior border of the inner wing of the pterygoid process and the vaginal process. [L, 34 (a, 29).]—**F. axillaris.** See AXILLA (1st def.).—**F. bursæ pharyngeæ** [Tourtual]. A depression on the ventral surface of the basi-occipital bone in front of the pharyngeal tubercle. [L, 31.]—**F. calcanei.** See SULCUS *calcaneus.*—**F. canina.** See *Canine* FOSSA.—**F. capitis femoris.** See FOSSA *capitis femoris.*—**F. capituli radii.** See FOSSA *anterior minor humeri.*—**F. cardiaca.** Ger., *vordere Darmpforte* (1st def.). 1. An opening between the mesogaster and prosogaster. [Kölliker (H).] 2. See SCROBICULUS *cordis.*—**F. carotidea.** See *Superior carotid* TRIANGLE.—**F. centralis laryngis** [Merkel]. A slight depression upon the ventral surface of the larynx at the basal end of the epiglottis. [L, 31.]—**F. centralis retinæ.** A small red disc in the centre of the macula lutea on the fundus of the eye, the centre of which often appears as a whitish, round, or hook-shaped spot. The red color is due to the blood of the chorioid. It is a circumscribed depression in the retina, at the bottom of which the retina is much thinner than upon the immediately adjoining portions of the yellow spot. [F.]—**F. cochleæ.** See FOSSA *cochlearis.* —**F. commissuræ mollis posterior.** A slight depression in the third ventricle of the brain just behind the commissura mollis. [L, 7 (a, 29).]—**F. coronoidea.** See FOSSA *anterior major humeri.*— **Foveæ costales.** See *Costal* FOSSÆ.—**F. cotyloidea.** A depression at the bottom of the acetabulum for the attachment of the round ligament. [L, 7 (a, 29).]—**F. cribrosa inferior et pos-**

terior. The posterior portion of the fossula inferior which presents the opening of the passage of the ramus ampullæ posterioris of the auditory nerve. [*a*, 29.]—**F. cruralis (peritonæi).** A depression in or slight pouch of the peritonæum over Gimbernat's ligament and the crural ring. [L, 332.]—**F. cubitalis, F. cubiti.** See FOSSA *cubiti.*—**F. digitata.** See *Posterior* HORN *of the lateral ventricle.*—**F. elliptica.** See RECESSUS *ellipticus.*—**F. glandulæ lacrimalis.** See *Lacrymal* FOSSA.—**F. glenoidea ossis temporalis.** See *Glenoid* FOSSA.—**F. glenoidea scapulæ.** See *Glenoid* CAVITY.—**F. hemielliptica.** See RECESSUS *ellipticus.*—**F. hemisphærica.** See RECESSUS *hemisphæricus.*—**F. hyaloidea.** See *Lenticular* FOSSA.—**F. iliaca.** See FOSSA *iliaca.*—**F. inferior.** See *Inferior f.*—**F. infraclavicularis.** See *Infraclavicular* FOSSA.—**F. inguinalis externa.** See *External inguinal* POUCH.—**F. inguinalis interna, F. inguinalis media.** See *Internal inguinal* POUCH.—**F. inguinalis lateralis.** See *External inguinal* POUCH.—**F. interclavicularis.** See *Interclavicular* NOTCH.—**F. jugularis.** See *Suprasternal* FOSSA.—**F. lacrimalis.** Fr., *fovée lacrymate.* See *Lacrymal* FOSSA.—**Fossæ laminæ cartilaginis cricoideæ.** The depressions on each side of the ridge in the middle line of the anterior surface of the cricoid cartilage. [L, 31.]—**F. lenticularis.** See *Lenticular* FOSSA.—**F. malleoli lateralis.** A slight depression upon the distal end of the fibula just in front of the groove for the peroneal tendons. [L, 332.]—**F. maxillaris.** See *Canine* FOSSA.—**Foveæ medullæ oblongatæ transversa externa.** A fissure running transversely across the medulla oblongata below the pons. [L, 7 (*a*, 29).]—**Foveæ medullæ spinalis transversa interna anterior.** See FORAMEN *cæcum.*—**F. Mohrenheimii.** See *Infraclavicular* FOSSA.—**F. navicularis.** See FOSSA *navicularis.*—**F. nervi olfactorii.** A depression on the surface of the anterior lobe of the brain in which the optic nerve lies. [L, 7 (*a*, 29).]—**F. nuchæ.** Ger., *Genickgrube.* A slight mesal depression which begins just below the external occipital protuberance, and descends over the ligamentum nuchæ between the prominences formed by the complexus and trapezius muscles of the two sides. [L, 34, 142 (*a*, 29).]—**F. oblonga.** The lower facet on the anterior surface of the arytænoid cartilage. [L, 115 (*a*, 29).]—**F. oculi.** See ORBIT.—**F. of the right auricle of the heart.** Lat., *f. ovalis cordis.* An oval depression at the lower part of the septum auriculorum and to the left of the orifice of the inferior vena cava. It represents the foramen ovale of the fœtal heart. [A, 478 (*a*, 17); C.]—**F. olecranii.** See *Olecranon* FOSSA.—**F. ovalis (cordis).** See *F. of the right auricle of the heart.*—**F. ovalis fasciæ latæ.** See *Saphenous* OPENING.—**F. ovalis vestibuli.** See RECESSUS *ellipticus.*—**F. palatina.** See FOSSA *palatina.*—**F. parva maxillæ inferioris.** See *Mental* FOSSA.—**F. patellaris (oculi).** See *Lenticular* FOSSA.—**F. pharyngis.** Fr., *fosse* (ou *fossette*) *gutturale.* Ger., *Schlundgrube.* A depression at the opening of the Eustachian tube into the pharynx. [A, 385.]—**F. posterior.** See *Olecranon* FOSSA.—**F. posterior commissuræ mollis.** A depression sometimes observed on the posterior aspect of the middle commissure of the brain. [I, 39.]—**F. posterior sinus rhomboidei.** See *Inferior f.*—**F. processus condyloidei.** A shallow excavation upon the anterior surface of the neck of the condyloid process of the mandible. [L, 332.]—**F. quarti ventriculi anterior.** See *Superior f.*—**F. quarti ventriculi posterior.** See *Inferior f.*—**F. quarti ventriculi superior.** See *Superior f.*—**F. retinæ (centralis).** See *F. centralis retinæ.*—**F. retromaxillaris.** A depression in the retromaxillary cavity for the reception of the parotid gland. [L, 34 (*a*, 29).]—**F. rhomboidalis, F. rhomboidea.** See *Fourth* VENTRICLE.—**F. rotunda (vestibuli).** See RECESSUS *hemisphæricus.*—**F. semi-elliptica.** See RECESSUS *ellipticus.*—**F. subscapularis.** See *Subscapular* FOSSA.—**F. sulciformis.** See FOSSULA *sulciformis.*—**F. superior.** See *Superior f.*—**F. supraclavicularis.** See *Supraclavicular* FOSSA.—**F. supratrochlearis anterior.** See FOSSA *anterior major humeri.*—**F. supratrochlearis posterior.** See *Olecranon* FOSSA.—**F. triquetra auriculæ.** See FOSSA *anthelicis.*—**Foveæ transverso-costariæ.** See FOSSÆ *costo-transversariæ.*—**F. trochlearis.** See *Trochlear* FOSSA.—**F. ventriculi quarti.** See *Fourth* VENTRICLE.—**F. ventriculi quarti inferior.** See *Inferior f.*—**Inferior f., Posterior f.** Lat., *f. inferior* (seu *posterior*). Fr., *fossette inférieure* (ou *postérieure*). A small depression in the floor of the fourth ventricle, near its apex, at either side of the mesal groove. [I, 29 (K).]—**Post-occipital f.** Of Wilder, a depression at the occipital end of the cerebrum corresponding with the longitudinal sinus. [I, 15, 98.]—**Pre-occipital f.** Of Wilder, a depression on the ventral margin of the cerebrum corresponding with the petrous portion of the temporal bone. [I, 98.]—**Superior f.** Lat., *f. fossette supérieure* (ou *antérieure*) *du sinus rhomboidal.* A depression in either lateral half of the floor of the fourth ventricle, at its upper part. [I, 29 (K).]—**Terete f.** See *Inferior f.*

FOVEATE, adj. Fo′ve-at. From *fovea*, a small pit. Pitted.

FOVEOLA (Lat.), n. f. Fo(fo^2)-ve(we^2)′ol(o^{2}l)-a^2. Dim. of *fovea.* Gr., *βοθρίον.* 1. A little fovea. 2. Of Laurentinus, the anterior fontanelle. [L, 349.] 3. A small depression in the leaves of some acotyledons, lying above the fovea, and separated from it by a saddle-like ridge. [B, 77 (*a*, 21).]—**F. capitis femoris.** See FOVEA *capitis femoris.*—**F. coccygea.** Fr., *dépression coccygienne, fistule lombo-sacrée congénitale.* Ger., *Steissbeinhautgrube.* Syn.: *pilo-nidal sinus, congenital lumbo-sacral* (or *inferior paravertebral*) *fistula, foramen cæcum retro-anale.* Of Ecker, a little depression, or pit, sometimes found at a point about half or two thirds of an inch behind the anus, and just at the apex of the coccyx, due to a defect of development. It sometimes resembles a fistula in appearance. It occurs more commonly in women than in men. [O. Madelung, "Ctrlbl. f. Chir.," 1885, No. 44, p. 761; "Rev. des sci. méd.," Apr., 1886, p. 409; L, 332.]—**Foveolæ howshipianæ, Foveolæ of bone.** Small, shallow pits which are excavated by the osteoclasts of Kölliker (*q. v.*) in that part of a bone which is undergoing resorption. [C.]—**Foveolæ of the kidney, Foveolæ papillarum renalium.** Depressions in the ends of the renal papillæ, into each of which several uriniferous tubules empty. [A, 478 (*a*, 17); C.]—**F. radialis.** Fr., *tabatière anatomique.* The "anatomist's snuff-box;" a hollow formed on the radial border of the wrist between the tendons of the extensors of the thumb when those muscles are contracted. [A, 301, 527.]—**F. retinæ.** A very small, dark spot in the f. centralis retinæ where the hexagonal pigment shows, owing to the thinness of the retina at this point. [F.]—**F. retro-analis.** See *F. coccygea.*—**F. triangularis seriata.** Of Bergman, the triangular recess between the columns of the fornix just dorsad of the anterior commissure. [I, 30, 98.]—**F. ventriculi quarti.** See *Fourth* VENTRICLE.

FOVEOLATE, FOVEOLATED, adj's. Fo-ve′o-lat, -e^{2}d. Lat., *foveolatus.* Fr., *fovéolé.* Ger., *kleingrubig.* Marked with foveolæ. [*a*, 27.]

FOVEOLE, n. Fo′ve-ol. See FOVEOLA.

FOVINIER (Fr.), n. Fo-ve-ne-a. The genus *Fagus.* [B, 121 (*a*, 24).]

FOW, n. Fu^5′u^4. The *Sempervivum tectorum.* [A, 505 (*a*, 21).]

FOWLER'S SERVICE, n. Fu^5′u^{4}l-u^{5}rz-su^{5}rv″i^{2}s. The *Pyrus aucuparia.* [A, 505 (*a*, 21).]

FOWL-FOOT, n. Fu^5′u^{4}l-fu^{4}t. The *Ornithopus perpusillus.* [A, 505 (*a*, 21).]

FOWS, n. Fu^5′u^{4}z. See FOW.

FOX, n. Fo^{2}x. See CANIS *vulpes.*—**Blue f'glove.** The *Campanula trachelium.* [B, 275 (*a*, 24).]—**Common f'glove.** The *Digitalis purpurea.* [B, 275 (*a*, 24).]—**Downy false f'glove.** The *Gerardia flava.* [B, 275 (*a*, 24).]—**False f'glove.** The genera *Gerardia* and *Dasystoma.* [B, 275 (*a*, 24).]—**Fern-leaved f'glove.** The *Gerardia pedicularia.* [B, 275 (*a*, 24).]—**F'bane.** The *Aconitum vulparia.* [B, 19, 275 (*a*, 24).]—**F.-chop.** The *Mesembryanthemum vulpinum.* [B, 275 (*a*, 24).]—**F. docken.** The *Digitalis purpurea.* [A, 505 (*a*, 21).]—**F. feet.** The *Lycopodium selago.* [A, 505 (*a*, 21).]—**F. fingers.** The *Digitalis purpurea.* [A, 505 (*a*, 21).]—**F'glove.** 1. The *Digitalis purpurea.* 2. The *Verbascum thapsus.* 3. The genus *Phytolacca.* [A, 505 (*a*, 21); B, 282 (*a*, 24).]—**F's-brush.** The *Centranthus ruber.* [A, 505 (*a*, 21).]—**F's-claws.** The *Lycopodium clavatum.* [A, 505 (*a*, 21).]—**F's-foot.** The *Dactylis glomerata.* [A, 505 (*a*, 21).]—**F'stones.** The *Orchis mascula.* [A, 505 (*a*, 21).]—**F.-tail.** 1. The *Lycopodium clavatum.* 2. The *Lagurus ovatus.* [A, 505 (*a*, 21); B, 275 (*a*, 24).]—**Great yellow f'glove.** The *Digitalis ambigua.* [B, 275 (*a*, 24).]—**Ladies' f'glove.** The *Verbascum thapsus.* [B, 275 (*a*, 24).]—**Mullein-f'glove.** The *Digitalis thapsi* and the *Seymeria macrophylla.* [B, 275 (*a*, 24).]—**Sierra Morena f'glove.** The *Digitalis mariana.* [B, 275 (*a*, 24).]—**Smooth false f'glove.** The *Gerardia quercifolia.* [B, 275 (*a*, 24).]—**West Indian f'glove.** The genus *Phytolacca.* [B, 275 (*a*, 24).]—**White f'glove.** The *Campanula trachelium.* [A, 505 (*a*, 21).]—**Willow-leaved f'glove.** The *Digitalis obscura.* [B, 275 (*a*, 24).]—**Woolly-f'glove.** The *Digitalis lanata.* [B, 275 (*a*, 24).]

FOX-SPRINGS, n. Fo^{2}x′spri^{2}n^{2}z. A place in Fleming County, Kentucky, where there are sulphurous and chalybeate springs. [A, 363 (*a*, 21).]

FOXTER LEAVES, n. Fo^{2}x′tu^{5}r levz. The *Digitalis purpurea.* [A, 505 (*a*, 21).]

FOYARD (Fr.), n. Fwa^3-ya^{3}r. The *Fagus silvatica.* [B, 173 (*a*, 24).]

FOYE (Fr.), n. Fwa^3-y′. An old form of *foie.* [A, 44.]—**F. utérin.** Lit., the uterine liver; a term formerly applied by some to the placenta. [A, 44.]

FOYER (Fr.), n. Fwa^3-ya. See FOCUS.

FRACES (Lat.), n. f. pl. Fra(fra^3)′sez(kas). Gr., *τρύγες, στέμφυλα τῶν ἐλαιῶν.* The lees of olive-oil. [A, 318, 325.]

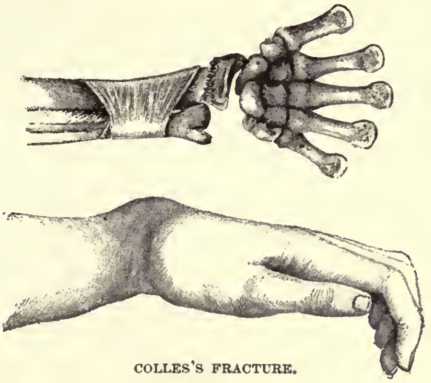
FRACID, adj. Fra^{2}s′i^{2}d. Lat., *fracidus.* Of a pasty nature, between fleshy and pulpy. [B, 19 (*a*, 24).]

FRACTICOLLIS (Lat.), adj. Fra^{2}k(fra^{3}k)-ti^2-ko^{2}l′li^{2}s. From *frangere*, to break, and *collum*, the neck. Fr., *fracticolle.* Ger., *gebrochenhalsig.* Having a deep indentation in the neck (said of insects). [L, 41.]

FRACTICORNIS (Lat.), adj. Fra^{2}k(fra^{3}k)-ti^2-ko^{2}rn′i^{2}s. From *frangere*, to break, and *cornu*, a horn. Fr., *fracticorne.* Ger., *gebrochenhörnig.* Having the antennæ apparently broken. [L, 41.]

FRACTIONAL, adj. Fra^{2}k′shu^{2}n-a^{2}l. Fr., *fractionné.* Divided (said of doses). Cf. *F.* DISTILLATION.

FRACTIONNEMENT (Fr.), n. Fra^{3}k-se-on-ma^{3}n^2. See SEGMENTATION and MORCELLEMENT.



FRACTIPES (Lat.), adj. Fra^{2}k(fra^{3}k)′ti^2-pez(pas). From *frangere*, to break, and *pes*, the foot. Fr., *fractipède.* Ger., *gebrochenfüssig.* Having claws apparently broken. [L, 41.]

FRACTUR (Ger.), n. Fra^{3}k′tur′. See FRACTURE.—**Querf'.** A transverse fracture.—**Rissf'.** A fracture by muscular action. "Fortschr. d. Med.," Aug., 1888, p. 600 (*a*, 34).]—**Schrägf'.** See *Oblique* FRACTURE.

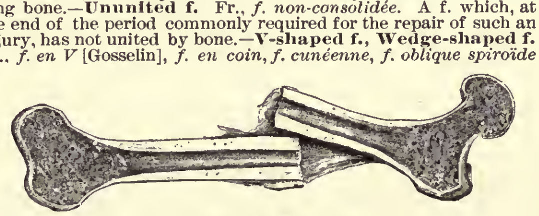
FRACTURA (Lat.), n. f. Fra^{2}k(fra^{3}k)-tu^2(tu)′ra^3. See FRACTURE.—**F. assularis, F. comminutiva.** See *Comminuted* FRACTURE.—**F. complicata.** See *Complicated* FRACTURE.—**F. imperfecta.** See *Incomplete* FRACTURE.—**F. multiplex.** See *Multiple* FRACTURE.—**F. partialis.** See *Incomplete* FRACTURE.—**F. penetrativa, F. perforans.** See *Perforating* FRACTURE.—**F. simplex.** See *Simple* FRACTURE.

FRACTURE, n. Fra^{2}k′tu^{2}r. Gr., *ῥῆγμα, κλάσεις, ἄγμα.* Lat., *fractura* (from *frangere*, to break). Fr., *f.* Ger., *Knochenbruch, Beinbruch.* It., *frattura.* Sp., *fractura.* 1. A breaking. 2. A surface made by breaking an object. 3. A solution of the continuity of an object, especially a bone.—**Barton's f.** A f. of the

lower end of the radius, involving the articular surface. [E.]—**Bent f.** See *Green-stick f.*—**Button-hole f.** See *Perforating f.*—**Camerated f.** See CAMAROMA.—**Capillary f.** Fr., *f. capillaire.* See *Linear f.*—**Colles's f.** An oblique f. of the distal end of the radius with dorsal displacement of the lower fragment. [E.]—**Comminuted f.** Lat., *fractura comminutiva.* Fr., *f. comminutive.* A f. in which the bone is broken into several small fragments. [E.]—**Complete f.** Lat., *fractura completa.* Fr., *f. complète.* A f. extending quite through the bone.—**Complicated f.** Lat., *fractura complicata.* Fr., *f. compliquée.* 1. A f. combined with some other injury (*e. g.*, rupture of a vessel or dislocation at a joint). [E.] 2. A compound f. [A, 326 (α, 21).]—**Composite f.** Fr., *f. composée.* See *Multiple f.*—**Compound f.** Fr., *f. compliquée de plaie.* Ger., *offener Knochenbruch.* A f. which communicates with the air by means of a wound of the soft parts. [E.]—**Cuneated f., Cuneiform f.** See *V-shaped f.*—**Dentate f.** A f. in which the ends of each fragment are irregularly toothed and so interlocked that displacement does not occur. [α, 34.]—**Depressed f.** A f. (generally of the skull) in which a fragment is driven below the surrounding surface. [E.]—**Direct f.** Fr., *f. directe.* A f. at the very point of contact with the object that produces the injury.—**Double f.** F. in two places in the same bone.—**Dupuytren's f.** F. of the lower end of the fibula with outward and backward dislocation of the foot. [α, 34.]—**Epiphyseal f.** See DIASTASIS.—**Extracapsular f.** Fr., *f. extracapsulaire.* A f. of the neck of the femur or humerus outside the capsular ligament. [E.]—**Fissured f.** 1. See *Linear f.* 2. Any f. with fissuring of one or more fragments.—**F.-bed.** See under BED.—**F.-box.** A box for holding a fractured leg in position. It consists of four pieces—a floor, two sides, each attached to the floor by hinges, and a foot-piece, also attached to the floor by hinges, so that the box may be thrown open on both sides and at the end. The leg is placed in the box, after suitably protecting it with cushions, and the box is closed with cords or bandages. [E.]—**F. compliquée de plaie** (Fr.). See *Compound f.* (1st def.).—**F. composée** (Fr.). See *Multiple f.*—**F. cunéenne** (Fr.). See *V-shaped f.*—**F. en bec de flûte** (Fr.). An oblique f. of a long bone. [A, 385.]—**F. en coin** (Fr.). See *V-shaped f.*—**F. en rave** (Fr.). See *Transverse f.*—**F. en V** (Fr.). See *V-shaped f.*—**F. esquilleuse** (Fr.). See *Splintered f.*—**F. non-consolidée** (Fr.). See *Ununited f.*—**F. oblique spiroïde** (Fr.). See *V-shaped f.*—**F. par contre-coup** (Fr.). See *Indirect f.* and CONTRE-COUP.—**F. par enfoncement** (Fr.). See *Impacted f.*—**F. par irradiation** (Fr.). See *Stellate f.*—**F's par résonnance** (Fr.). See CONTRE-COUP.—**F. sous-trochléenne** (Fr.). A f. in which an intra-articular splinter of the neck of the trochlea is separated from the rest of the bone. [α, 34.]—**F. sous-trochantérienne** (Fr.). A f. of the femur below the lesser trochanter. [α, 34.]—**F. spiroïde** (Fr.). See *Helicoid f.* [L, 88.]—**F. trochléenne externe** (Fr.). A f. of the external portion of the trochlea. [α, 34.]—**F. trochléenne interne** (Fr.). A f. separating the internal portion of the trochlea from the olecranon fossa. [α, 34.]—**Gosselin's f.** A V-shaped f. of the lower end of the tibia extending into the ankle-joint. [α, 34.]—**Greenstick f.** A f. in which a long bone is bent, but not broken through, although it may be splintered on the convexity.—**Gunshot f.** A f. produced by a gunshot wound.—**Hair f.** See *Linear f.*—**Helicoid f.** A f. of spiral form resulting from twisting of the long bones. [α, 34.]—**Hickory-stick f.** See *Green-stick f.*—**Impacted f.** Fr., *f. par enfoncement.* A f. in which one end of a broken bone is driven into and fixed in the other. [E.]—**Imperfect f.** See *Incomplete f.*—**Incised f.** A f. produced by a cutting instrument, such as a sabre. [α, 34.]—**Incomplete f.** Lat., *fractura imperfecta.* Fr., *f. incomplète.* A f. in which the bone is not broken completely through. [E.]—**Indirect f.** A f. at some other point than that of actual contact with the object that causes the injury.—**Intertrochlear f.** Fr., *f. intertrochléenne.* A rare vertical f. through the trochlea. [α, 34.]—**Intra-articular f.** Fr., *f. intra-articulaire.* A f. extending into a joint.—**Intracapsular f.** Fr., *f. intra-capsulaire.* A f. of the neck of the femur or humerus within the capsular ligament. [E.]—**Intrauterine f.** Fr., *f. intra-utérine.* A f. occurring in the fœtus. [L, 88.]—**Linear f.** Fr., *f. linéaire.* A f. resembling a line, without separation of the fragments. [E.]—**Longitudinal f.** Fr., *f. longitudinale.* A f. parallel with the long axis of a bone. [E.]—**Multiple f.** Lat., *fractura multiplex.* Fr., *f. multiple.* Ger., *mehrfacher Knochenbruch.* F. of a bone in more than one place, or of two or more bones. [E.]—**Oblique f.** Lat., *fractura obliqua.* Fr., *f. oblique.* Ger., *Schrägfractur.* A f. of a long bone running obliquely through it.—**Oblique spiroid f.** Fr., *f. oblique spiroïde* [Gerdy]. See *V-shaped f.*—**Open f.** See *Compound f.*—**Partial f.** See *Incomplete f.*—**Penetrating f., Perforating f.** Lat., *fractura penetrativa* (seu *perforans*). Fr., *f. pénétrative, f. perforante.* Ger., *Perforationsfractur.* Perforation of a bone, as by a bullet.—**Pott's f.** A f. of the lower end of the fibula with dislocation of the foot outward. [E.]—**Punctured f.** A traumatic perforation of a bone. [α, 34.]—**Radish f.** Fr., *f. en rave.* See *Transverse f.*—**Resecting f.** A f. in which the traumatic cause carries away a portion of a long bone. [α, 34.]—**Secondary f.** Fr., *f. secondaire.* A f. consecutive to some other lesion of the bone. [E.]—**Shepherd's f. of the astragalus.** A f. of the outer projecting edge of the groove on the astragalus for the tendon of the flexor longus pollicis, probably produced by a twisting of the foot outward while in a position of extreme flexion at the ankle joint. [α, 34.]—**Silverfork f.** See *Colles's f.*—**Simple f.** Lat., *fractura simplex.* Fr., *f. simple.* Ger., *einfacher Knochenbruch.* 1. A f. that does not communicate with the exterior of the body. 2. A f. uncomplicated with serious injury of adjacent parts, and not presenting any features of special difficulty in its treatment.—**Spiral f.** See *Helicoid f.*—**Splintered f.** Fr., *f. esquilleuse.* 1. A comminuted f. with splintering. 2. Separation of a splinter of bone, as by a sabre-stroke, without f. of the whole thickness of the bone. [E.]—**Spontaneous f.** Fr., *f. spontanée.* F. occurring not as the result of a degree of violence ordinarily required to produce such an injury, but from trivial violence, in consequence of a diseased state of the bone.—**Sprain-f.** A f. in which a small portion of bone is pulled away by strain upon the ligaments attached to it. [E, 4.]—**Starred f., Stellate f.** Fr., *f. par irradiation.* A f. in which several fissures radiate from a single point. [E.]—**Subcutaneous f.** See *Simple f.* (1st def.).—**Torsion f.** See *Helicoid f.*—**Transverse f.** Fr., *f. en rave* (ou *transversale*). Ger., *Querbruch.* A f. directly across the shaft of a long bone.—**Ununited f.** Fr., *f. non-consolidée.* A f. which, at the end of the period commonly required for the repair of such an injury, has not united by bone.—**V-shaped f., Wedge-shaped f.** Fr., *f. en V* [Gosselin], *f. en coin, f. cunéenne, f. oblique spiroïde* [Gerdy]. A f., generally at the articular end of a long bone, in which the line of f. has the shape of a V, with or without its point being prolonged by a fissure leading into the joint. [A, 385; E.]—**Willow f.** See *Green-stick f.*

COLLES'S FRACTURE.

A COMPOUND FRACTURE.



A GREEN-STICK FRACTURE.

A LINEAR FRACTURE.

POTT'S FRACTURE.

A TRANSVERSE FRACTURE.

FRADES (Sp.), n. Fra^{3}'de^{2}s. A township in the province of Salamanca, Spain, where there are warm springs and a bathing establishment. [L, 30 (α, 14).]

FRÆNATORES (Lat.), n. m. pl. Fre^{2}n(fra^3-e^{2}n)-a^{3}t(a^{3}t)-o'rez-(ras). See FRENATORES.

FRÆNULUM (Lat.), n. n. Fre^{2}n'(fra^3'e^{2}n)-u^{2}l(u^{4}l)-u^{3}m(u^{4}m). See FRENULUM.

FRÆNUM (Lat.), n. n. Fren'(fra^3'e^{2}n)-u^{3}m(u^{4}m). See FRENUM.

FRAGA (Lat.), n. n. pl. Fra(fra^3)'ga^3. 1. Strawberries. See FRAGUM. 2. Condylomata acuminata. [G.] 3. Plants of the genus *Potentilla*. [B, 121 (a, 24).]

FRAGARIA (Lat.), n. f. Fra(fra^3)-ga(ga^3)'ri^2-a^3. From *fraga*, strawberries. Fr., *fraisier, fraison*. Ger., *Erdbeere*. It., *fragola*. Sp., *fresa*. 1. The strawberry-plant; a genus of the *Rosaceæ*, tribe *Potentilleæ*. The *Fragariaceæ* (the *Dryadeæ* of Ventenat) are: Of Richard, a family of the *Potentilleæ;* of Dumortier, a tribe of the *Rosaceæ*. The *Fragarideæ* of Wood are a tribe of the *Rosaceæ*, suborder *Rosideæ*. The *Fragarieæ* (Fr., *fragariées;* Ger., *Fragarieen*) of Torrey and Gray, Endlicher, and Jussieu are a tribe or subtribe of the *Dryadeæ*. [B, 19, 34, 42, 77, 121, 170, 173, 180 (a, 24).] 2. Of the pharmacists, the *F. vesca;* of the Belg. Ph., its root. [B, 95 (a, 14).]—**Decoctum fragariæ** [Belg. Ph.]. A preparation made by macerating 1 part of the root of *F. vesca* for one hour in water sufficient to give 20 parts of decoction, boiling it for a quarter of an hour, and straining with gentle expression. [B, 95 (a, 14).]—**F. alpina.** Fr., *fraisier des Alpes* (ou *de tous les mois*). Ger., *Monatserdbeere*. A wild species found in Alpine Europe. [B, 173 (a, 24).]—**F. ananassa.** Fr., *fraisier ananas*. Ger., *Ananas-Erdbeere*. A species indigenous to Surinam; supposed by some to be the source of the *F. grandiflora*. [B, 19, 173, 180 (a, 24).]—**F. anserina.** The *Potentilla anserina*. [B, 173 (a, 24).]—**F. chiloensis.** Fr., *fraisier du Chilé*. Ger., *Chili-Erdbeere*. One of the parent species from which the strawberry is derived. It is found wild in the Island of Chiloe, and along the west coast of South and Central America to North America. [B, 19, 77, 173, 180 (a, 24).]—**F. collina.** Fr., *craquelin*. Ger., *Hügel-Erdbeere, harte* (oder *Knack-*) *Erdbeere, Knackelbeere*. Green-pine strawberry. A wild species found in Germany and Switzerland, sometimes cultivated. [B, 180, 275 (a, 24).]—**F. efflagellis.** Fr., *fraisier sans coureur* (ou *buisson*). Ger., *gemeine Erdbeere ohne Ausläufer*. A cultivated variety of *F. vesca*. [B, 173, 180 (a, 24).]—**F. elatior.** Fr., *fraisier capiton*. Ger., *hochstengelige* (oder *grosse Wald-*, oder *Garten-*, oder *Zimmt-*) *Erdbeere*. One of the parent stocks of the cultivated strawberry, furnishing the *hautbois;* found wild in Europe, in woods and Alpine regions. [B, 77, 173, 180, 275 (a, 24).]—**F. grandiflora.** Ger., *grossblumige Erdbeere*. The old pine (or Carolina) strawberry, a species found in the Carolinas, but by some considered indigenous to Surinam and identical with *F. ananassa*. It is one of the parent stocks of our present varieties of the plant. Its fruit is solid, heavy, and juicy. [B, 19, 180 (a, 24).]—**F. indica.** Fr., *fraisier* (ou *fraison*) *des Indes*. A species supposed to be indigenous to the East Indies, but now naturalized everywhere. It is found in the southern United States from Charleston to Florida. The large, crimson, oval fruit is quite ornamental, but insipid. The root and leaves have been used as an astringent and diuretic. [B, 34, 173, 275 (a, 24).]—**F. monophylla.** Fr., *fraisier à une feuille* (ou *de Versailles*). Ger., *einblättrige gemeine Erdbeere*. A variety of *F. vesca*. [B, 173, 180 (a, 24).]—**F. moschata.** See *F. elatior*.—**F. nigra.** Fr., *fraisier noire*. A variety of *F. vesca*. [B, 175 (a, 24).]—**F. nuda.** See *F. efflagellis*.—**F. pentaphylla.** The *Tormentilla reptans*. [B, 173 (a, 24).]—**F. rupestris.** The *Potentilla fragarioides*. [B, 173 (a, 24).]—**F. scabra.** See *F. elatior*.—**F. semperflorens.** See *F. alpina*.—**F. silvestris.** See *F. vesca*.—**F. sterilis.** The *Potentilla fragariastrum*. [B, 64 (a, 24).]—**F. tormentilla.** The *Tormentilla erecta*. [B, 180 (a, 24).]—**F. unifolia.** See *F. monophylla*.—**F. vesca.** Fr., *fraisier des bois*. Ger., *Walderdbeere, wilde* (oder *gemeine*) *Erdbeere*. Alpine, wood, or English strawberry, the

FRAGARIA VESCA. [A, 327.]

common strawberry-plant; a species found in Great Britain and the United States, and one of the parent stocks of the cultivated varieties. Its fruit (*fraga, fructus fragariæ*) attains a large size under cultivation and, together with the leaves (*herba fragariæ*), has been employed in medicine. [B, 19, 34, 173, 180 (a, 24).]—**F. vesca, var. semperflorens.** See *F. alpina*.—**F. vesca, var. pratensis.** The *F. elatior*. [B, 180 (a, 24).]—**F. virginiana.** Fr., *fraisier de Virginie*. Ger., *Scharlach-* (oder *kahle Garten-*, oder *virginische*) *Erdbeere*. The scarlet or Virginia strawberry; a species indigenous to the United States and British America, introduced at an early date (1629) into Europe, and one of the parent stocks of the strawberries now cultivated. Its fruit is highly fragrant, though more acid than that of other species. [B, 19, 34, 173, 180, 275 (a, 24).]—**F. viridis.** Fr., *fraisier vert*. A rather rare European species, one of the original sources of the cultivated varieties. It has a solid and juicy fruit, with a pineapple flavor. [B, 19, 173 (a, 24).]—**F. vulgaris.** See *F. vesca*.—**Fructus fragariæ.** Fr., *fraises*. Ger., *Erdbeeren*. Strawberries (the fruit of *F. vesca*, and other species of *F.*). [B, 180 (a, 24).]—**Herba fragariæ.** The leaves of *F. vesca*. [B, 180 (a, 24).]—**Infusum fragariæ.** See *Infusion de* FRAISIER and *Tisane de* FRAISIER.—**Ptisana fragariæ.** See *Tisane de* FRAISIER.—**Radix fragariæ (vulgaris), Rhizoma fragariæ** [Belg. Ph.]. Fr., *fraisier* (*rhizome*) [Fr. Cod.]. Sp., *fresa* (*rizoma*) [Sp. Ph.]. The root of *F. vesca*, formerly used as an astringent. [B, 180 (a, 24).]—**Rob fragariæ.** See *Rob* FRAGORUM (under FRAGUM).—**Syrupus fragariæ.** See *Syrupus* FRAGORUM (under FRAGUM).—**Tisana fragariæ.** See *Tisane de* FRAISIER.

FRAGESUCHT (Ger.), **FRAGEZWANG** (Ger.), n's. Fra^{3}g'-e^2-zuch^{2}t, -tswa^{3}n^2. See FOLIE *du doute*.

FRAGHAN, n. The *Vaccinium myrtillus*. [B, 275 (a, 24).]

FRAGIFERUS (Lat.), adj. Fra^{2}j(fra^{3}g)-i^{2}f'e^{2}r-u^{3}s(u^{4}s). From *fraga*, strawberries, and *ferre*, to bear. Fr., *fragifère*. Ger., *erdbeerentragend*. Bearing a fruit like the strawberry. [L, 41.]

FRAGIFORMIS (Lat.), adj. Fraj(fra^{3}g)-i^2-fo^{2}rm'i^{2}s. From *fraga*, strawberries, and *forma*, form. Fr., *fragiforme*. Ger., *erdbeerenförmig*. Strawberry-shaped. [L, 41.]

FRAGILE, adj. Fra^{2}j'i^{2}l. Gr., εὔθραυστος. Lat., *fragilis* (from *frangere*, to break). Fr., *f.* Ger., *zerbrechlich, brüchig*. It., *f.* Sp., *fragil*. Frail, brittle. [B, 1, 123 (a, 24).]

FRAGILITAS (Lat.), n. f. Fra^{2}j(fra^{3}g)-i^{2}l'i^2-ta^{3}s(ta^{3}s). Gen., *-tat'is*. From *fragilis*, fragile. Fr., *fragilité*. See FRAGILITY.—**F. crinium.** A disease of the hair in which the shaft becomes extremely brittle; often accompanied by trichorrhexis nodosa and distrix, and sometimes by splitting of the hair within the hair-follicle, beginning at the bulb. [Duhring (G, 63).]—**F. ossium.** Fr., *fragilité des os*. Unnatural brittleness of the bones.

FRAGILITY, n. Fra^{2}j-i^{2}l'i^{2}t-i^2. Gr., κραυρότης. Lat., *fragilitas*. Fr., *fragilité*. Ger., *Zerbrechlichkeit*. The state of being fragile.

FRAGMENT, n. Fra^{2}g'me^{2}nt. Gr., θραῦσμα. Lat., *fragmen, fragmentum* (from *frangere*, to break). Fr., *f.* Ger., *Bruchstück, F.* It., *frammento*. Sp., *fragmento*. A portion broken off.

FRAGMENTATION, n. Fra^{2}g-me^{2}n-ta'shu^{3}n. From *fragmen*, a fracture. Fr., *f.* Ger., *Fragmentirung, Zerstückelung*. Division into fragments or separate parts: (1) Of Van Beneden, direct cell division; (2) of Flemming, disintegration of the nucleus; (3) division of the nucleus by a kind of budding in which irregular portions appear as if nipped off, either without caryocinetic phenomena (direct f.) or with caryocinetic phenomena (indirect f.). There is no regular arrangement of the chromatic threads and no equatorial plate formed. F. is especially common in pathological new formations. [Virchow, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," xiv (1858); "Arch. f. mikr. Anat.," xxxii, p. 43; "Quart. Jour. of Micr. Sci.," xxx, p. 196 (J, 64).]—**Direct f., Indirect f.** Ger., *directe* (und *indirecte*) *Fragmentirung*. See under *F.* (3d def.).

FRAGMENTED, adj. Fra^{2}g'me^{2}nt-e^{2}d. From *fragmen*, a fracture. Consisting of or converted into fragments. [L, 121.]

FRAGMENTIRUNG (Ger.), n. Fra^{3}g-me^{2}nt-er'un^2. See FRAGMENTATION.

FRAGO, n. In Provence, the genus *Potentilla*. [B, 121 (a, 24).]

FRAGON (Fr.), n. Fra^3-go^{2}n^2. The genus *Ruscus*. [B, 121 (a, 24).]—**F. à feuilles nues.** The *Ruscus hypophyllum*. [A, 385.]—**F. à foliole.** The *Ruscus hypoglossum*. [B, 173 (a, 24).]—**F. à larges feuilles.** The *Ruscus aculeatus*, var. *latifolius*. [B, 173 (a, 24).]—**F. épineux, F. piquant.** The *Ruscus aculeatus*. [B, 173 (a, 24).]

FRAGOSA (Lat.), n. f. Fra^{2}g(fra^{3}g)-o'sa^3. See AZORELLA.

FRAGOUSTA, n. In Languedoc, the *Rubus idæus*. [B, 121 (a, 24).]

FRAGRANT, adj. Fra'gra^{2}nt. Lat., *fragrans* (from *fragrare*, to emit a smell). Fr., *odorant*. Ger., *wohlriechend*. It., Sp., *fragrante*. Odoriferous, sweet-smelling. [B, 1, 123 (a, 24).]

FRAGUM (Lat.), n. n. Fra(fra^3)'gu^{3}m(gu^{4}m). The strawberry; in pharmacy, the fruit of *Fragaria vesca*. [B, 180 (a, 24).]—**Aqua fragorum** [Bruns. Ph., 1791, Ferr. Ph., 1832, Palat. Disp., 1764, Russ. Ph., 1803, Sax. Ph., 1820]. Fr., *eau* (ou *hydrolat*) *de fraises*. A preparation made by macerating for 12 hours 4 parts of bruised strawberries in 10 of water, and distilling off 6 parts [Russ. Ph., 1803]. The other pharmacopœias differ slightly in the proportions ordered. [B, 97, 119 (a, 14).]—**Baccæ** (seu **Fructus**) **fragorum.** Strawberries (the fruit of *Fragaria vesca*). [B, 119, 180 (a, 24).]—**Rob fragorum** [Sp. Ph., 1798]. Fr., *rob de fraises*. A preparation made by boiling 1 part each of strawberry-juice and water with 2 parts of sugar to the consistence of a jelly and straining. [B, 97, 119 (a, 14).]—**Succus fragorum** [Fr. Cod., 1818]. Fr., *suc de fraises*. A preparation made by bruising ripe strawberries with the hands, leaving the mass in repose in a cool place till a limpid, supernatant liquor appears, and straining with gentle expression. [B, 97 (a, 14).]—**Syrupus fragorum** [Bruns. Ph., 1779, Palat. Disp., 1764, Würtemb. Ph., 1798]. Fr., *sirop de fraises*. Sp., *jarabe de fresa* [Sp. Ph.]. A preparation made by boiling together 5 parts of depurated strawberry-juice and 8 of white sugar; or 1,000 parts of

sugar dissolved in 345 of water, with the addition of 520 of strawberries [Sp. Ph.]. [B, 95, 97, 119 (a, 14).]

FRAI (Fr.), n. Fre^2. 1. See SPAWN. 2. In Provence, the genus *Fraxinus*. [B, 121 (a, 24).]

FRAILES (Sp.), n. Fra^3'e-las. A place in Spain where there are springs containing magnesium sulphate. [A, 385.]

FRAIS (Ger.), n. Fra^3'es. A convulsion. [a, 30.]—**Stille F.** See ECLAMPSIA *infantum*.

FRAISE (Fr.), n. Fre^{2}z. From *fraga*, strawberries. 1. The strawberry (fruit of *Fragaria vesca*). 2. A syphilitic growth which in form resembles the strawberry. 3. See BUR (4th and 5th def's). [L, 41, 87 (a, 14).]—**Arbre aux f's.** The *Arbutus unedo*. [B, 121 (a, 24).]—**Eau de f's.** See *Aqua* FRAGORUM (under FRAGUM).—**Essence de f.** An essence obtained by distilling choice strawberries; used in flavoring creams, ices, etc. [L, 41, 77 (a, 21).]—**F. de veau.** See BUR (4th def.).—**Hydrolat de f's.** See *Aqua* FRAGORUM (under FRAGUM).—**Rob de f's.** See *Rob* FRAGORUM (under FRAGUM).—**Sirop de f's.** See *Syrupus* FRAGORUM (under FRAGUM).—**Suc de f's.** See *Succus* FRAGORUM (under FRAGUM).

FRAISIER (Fr.), n. Fre^2-ze-a. See FRAGARIA.—**F. ananas.** See FRAGARIA *ananassa*.—**F. à une feuille.** See FRAGARIA *monophylla*.—**F. buisson.** See FRAGARIA *efflagellis*.—**F. capiton.** See FRAGARIA *elatior*.—**F. des Alpes.** See FRAGARIA *alpina*.—**F. des bois.** See FRAGARIA *vesca* and FRAGARIA *rusca*.—**F. des Indes.** See FRAGARIA *indica*.—**F. des quatre saisons.** A variety of the *Fragaria vesca*. [B, 121 (a, 24).] Cf. FRAGARIA *semperflorens*.—**F. de tous les mois.** See FRAGARIA *alpina*.—**F. de Versailles.** See FRAGARIA *monophylla*.—**F. de Virginie.** See FRAGARIA *virginiana*.—**F. du Chilé.** See FRAGARIA *chiloensis*.—**F. en arbre.** See ARBUTUS *unedo* and *Benthamia fragifera*.—**F. noir.** See FRAGARIA *nigra*.—**F. sans coureur.** See FRAGARIA *efflagellis*.—**F. vert.** See FRAGARIA *viridis*.—**Infusion de f.** [Fr. Cod., 1837]. A preparation made by infusing 3 parts of licorice-root and 8 of strawberry-root in 250 of boiling water. [B, 119 (a, 14).]—**Tisane de f.** [Fr. Cod.]. Lat., *ptisana fragariæ*. A preparation made by infusing 1 part of strawberry-root, in small pieces, in 50 parts of boiling water. [B, 113 (a, 14).]

FRAISSINETO, n. In Provence, the *Poterium magnolii*. [B, 121 (a, 24).]

FRAISSO, n. In Provence, the genus *Fraximus*. [B, 121 (a, 24).]

FRAKTUR (Ger.), n. Fra^{3}k-tur'. See FRACTUR and FRACTURE.

FRAMBŒSIA (Lat.), n. f. Fra^{2}m(fra^{3}m)-be^{2}z'(bo^2'e^{2}s)-i^2-a^3. Fr., *framboisie* (from *framboise*, the raspberry). Ger., *Frambösie*, *Himbeerwarzensucht*. 1. An old term for papillary, corneous growths, such as occur in sycosis, lupus, many forms of syphilis, exuberant granulations, etc. It is now used only for *F. tropica* and *F. non-syphilitica*. [A, 326 (a, 21).] 2. Pian, epian, yaws; a chronic, contagious disease, endemic on the west coast of Africa, in India, in the Indian Archipelago, and in the West Indies. The disease begins, after a period of incubation of from three to six months, with fever and an eruption of the skin, which appears in the form of little red spots or papules, showing a yellowish point in the centre. The papules gradually increase in size, become surrounded with red areolæ, and are sensitive or painful. Some of them soon disappear, while others continue to grow, both in circumference and in elevation, till they assume a protuberant fungus-like shape (commonly compared to a raspberry) covered with a yellow, loosely adherent crust, and sometimes attended with ulceration. The largest tubercles (sometimes one or two inches in diameter) occur on the lips, pudendum, perinæum, and toes, and around the anus. [Charlouis (G, 17, 69); "Vierteljhrsch. f. Derm. u. Syph.," 1881, p. 431, 466; "Ctrlbl. f. klin. Med.," Nov. 12, 1887, p. 865.] See YAWS and cf. SIBBENS and DERMATITIS *papillaris capillitii*.—**F. americana.** See *F.* (2d def.)—**F. guineensis.** The form of f. (*q. v.*, 2d def.) occurring on the coast of Guinea; yaws. [G.]—**F. illyrica.** See SCHERLIEVO.—**F. non-syphilitica.** Syn.: *dermatitis papillomatosa capillitii* [Kaposi]. A form of f. observed in Europe, characterized by the formation of large or small, furrowed, and lobulated tumors, having a thick epidermis, and situated in the hairy parts of the back of the head and on the borders of the nape of the neck. [A, 326 (a, 21).]—**F. scotica.** See SIBBENS.—**F. syphilitica.** See PEMPHIGUS *foliaceus vegetans*.—**F. tropica.** The endemic f. of the tropics. [G.]

FRAMBŒSIFORME (Fr.), n. Fra^{3}n^2-ba-ze-form. Frambœsia-like. [A, 385.]

FRAMBOISE (Fr.), n. Fra^{3}n^2-bwa^{3}z. The raspberry (the fruit of *Rubus idæus*). [B, 121 (a, 24).]—**Alcoolat de f's.** A preparation made by macerating for 24 hours 3 parts of raspberries in 1 part of 70-per-cent. alcohol, and distilling off 1 part. [B, 92, 119 (a, 14).]—**Eau de f.** See *Aqua* RUBI *idæi*.—**Gelée de f's.** See *Jalea de* FRAMBUESAS.—**Limonade à la f.** [Fr. Cod.]. A preparation made [Fr. Cod.] by adding 1 part of the *sirop de f.* to 9 parts of distilled water. [B.]—**Rob de f's.** See *Rob* RUBI *idæi*.—**Sirop de f.** [Fr. Cod.]. 1. A syrup made of filtered raspberry-juice and enough sugar to give it a density of 1·33 when cold. [B, 46, 113 (a, 14).] 2. Of the older Ph's, see *Syrupus* RUBI *idæi*.—**Vinaigre de f's.** See *Acetum* RUBI *idæi*.

FRAMBOISÉ (Fr.), adj. Fra^{3}n^2-bwa^3-za. Raspberry-like. [A, 385.]

FRAMBOISIER (Fr.), n. Fra^{3}n^2-bwa^3-ze-a. The *Rubus idæus*. [B, 121, 173 (a, 24).]—**F. du Canada.** The *Rubus odoratus*. [B, 173 (a, 24).]

FRAMBOYS, n. Fra^{2}m'boiz. The *Rubus idæus*. [A, 505 (a, 21).]—**F.-berries.** The fruit of *Rubus idæus*. [A, 505 (a, 21).]

FRAMBUESA (Sp.), n. Fra^{3}m-bu-a'sa^3. See FRAMBOISE.—**Jalea de f's** [Sp. Ph., 1798]. Fr., *gelée de framboises*. A preparation made by boiling 1 part of strained raspberry-juice and 2 parts of syrup made from white sugar to the consistence of a jelly. [B, 119 (a, 14).]

FRAMEWORK, n. Fram'wu^{5}rk. Lat., *structura*. Fr., *charpente*. Ger., *Fachwerk*. It., *armatura*. Sp., *obra de marco*, *armazón*. The fundamental, sustaining portion of a structure. Cf. STROMA.—**Horny f.** Ger., *Hornspongiosa*, *Horngerüst*. The closely meshed network of horny matter forming the ground-substance of the brain and spinal cord, and especially of the cerebral cortex and substantia gelatinosa. [J, 10, 30 (K).]

FRANC (Fr.), n. Fra^{3}n^{2}k. A plant grown from seed of its own species, and not grafted. If it presents all the characteristics of its species, it is called *bien f.*; if it is produced from the buds or branches of a grafted stock, it is termed *f. de pied*. [B, 105, 121 (a, 24).]

FRANCHE-MULE (Fr.), n. Fra^{3}n^{2}ch-mu^{6}l. See ABOMASUM.

FRANCHIPANIER (Fr.), n. Fra^{3}n^2-she-pa^3-ne-a. See FRANGIPANIER.

FRANCISCA (Lat.), **FRANCISCEA** (Lat.), n's. f. Fra^{2}n-(fra^{3}n^2)-si^{2}s(ki^{2}s)'ka^3, -ke^2-a^3. From *Franciscus*, a proper name. Fr., *f.* The genus *Brunfelsia*. The *Franciscea* of G. Don are a tribe of the *Solanaceæ*, comprising *Brunfelsia*, etc. [B, 42, 170 (a, 24).]—**F. uniflora.** Fr., *f. uniflore*. See BRUNFELSIA *uniflora*.

FRANCISCEINE, n. Fra^{2}n-si^{2}s'se^2-en. An alkaloid, probably identical with manacine, found in the root of *Franciscea* (*Brunfelsia*) *uniflora*; said to be decidedly purgative, diuretic, and emmenagogue. [B, 270 (a, 27); "Lancet," Apr. 10, 1886; "Brit. and Colon. Druggist"; "N. Y. Med. Jour.," June 26, 1886, p. 734.]

FRANCOA (Lat.), n. f. Fra^{2}n^2(fra^{3}n^2)-ko'a^3. Of Cavanilles, a genus of the *Saxifrageæ*; of Bentham and Hooker, a genus of the *Francoeæ*. The *Francoaceæ* (*Francoeæ* [Bentham and Hooker]; Fr., *francoées*) of Jussieu are the francoads, a family of plants indigenous to Chili; of Lindley, an order of the *Ericales*; and of Spach and others, a tribe of the *Saxifrageæ*. [B, 19, 42, 121, 170 (a, 24).]—**F. appendiculata.** Fr., *f. à feuilles de laiteron*. A species found in Chili. The astringent juice is applied to hæmorrhoids; the roots, boiled with *Aristotelia macqui*, furnish a black dye; and the juice is used as an ink. [B, 42, 173 (a, 24).]—**F. sonchifolia.** A species the juice of which is sedative and is applied to hæmorrhoids; probably identical with the *F. appendiculata*. [B, 19, 42, 121, 173 (a, 24).]

FRANCŒURIA [Cassini] (Lat.), n. f. Fra^{3}n^2-ku^{5}r'i^2-a^3. The genus *Pulicaria*. [B, 42, 121 (a, 24).]—**F. crispa.** The *Pulicaria crispa*. [B, 42, 173 (a, 24).]

FRANCOLIN (Fr.), n. Fra^{3}n^2-ko-la^{2}n^2. See ATTAGAS.

FRANCORMIER (Fr.), n. Fra^{3}n^2-kor-me-a. The *Agrimonia eupatoria*. [B, 121, 173 (a, 24).]

FRANC-PICARD (Fr.), n. Fra^{3}n^{2}k-pe-ka^{3}r. The *Populus alba*, var. *grisea*. [B, 173 (a, 24).]

FRANGE (Fr.), n. Fra^{3}n^{2}zh. See FIMBRIA.

FRANGÉ (Fr.), adj. Fra^{3}n^2-zha. See FIMBRIATED.

FRANGIPANIER (Fr.), n. Fra^{3}n^2-zhe-pa^3-ne-a. The genus *Plumiera*. [B, 121 (a, 24).]—**F. blanc.** See PLUMIERA *alba*.—**F. de deux couleurs.** The *Plumiera bicolor*. [B, 173 (a, 24).]—**F. drastique.** The *Plumiera drastica*. [B, 173 (a, 24).]—**F. obtuse.** The *Plumiera obtusa* (*nivea*). [B, 173 (a, 24).]—**F. phagédénique.** The *Plumiera phagedænica*. [B, 173 (a, 24).]—**F. rouge.** See PLUMIERA *rubra*.

FRANGULA (Lat.), n. f. Fra^{2}n^2(fra^{3}n^2)'gu^{2}l(gu^{4}l)-a^3. Fr., *bourdaine* (2d def.), *bourgène* (2d def.). Ger., *Faulbaumrinde* (2d def.). 1. Of Tournefort, the genus *Rhamnus*. The *Frangulaceæ* (Fr., *frangulacées*) of De Candolle are the *Rhamneæ* of Bentham and Hooker. The *Franguleæ* (Fr., *frangulées*) are a tribe of the *Rhamneæ*. 2. Of the U. S. Ph. and Netherl. Ph., the bark of *Rhamnus f.* [B, 1, 5, 42, 121, 170 (a, 24).]—**Baccæ frangulæ.** The fruits of *Rhamnus f.* [B, 180 (a, 24).]—**Cortex frangulæ** [Ger. Ph., Dan. Ph., Norw. Ph., Swed. Ph., Russ. Ph., Finn. Ph.]. See *F.* (2d def.).—**Decoctum frangulæ compositum** [Finn. Ph.]. A decoction made by boiling 3 parts of contused bark of the *Rhamnus f.* with 96 of water until reduced to 48 parts, adding 1 part each of bitter-orange-peel and caraway, continuing the digestion at a moderate heat for 2 hours, and straining. [B, 95 (a, 14).]—**Decoctum frangulæ concentratum.** An aqueous decoction of the bark of *Rhamnus f.*, containing cognac or tincture of bitter-orange peel. [B, 270 (a, 24).]—**Extractum frangulæ** [Netherl. Ph., Russ. Ph., Swed. Ph.]. See *Extractum* RHAMNI *frangulæ*.—**Extractum frangulæ fluidum** [U. S. Ph.]. Fr., *extrait liquide d'écorce de bourdaine*. Ger., *flüssiges Faulbaumrindenextrakt*. Syn.: *extractum rhamni frangulæ liquidum* [Br. Ph.]. A preparation made by moistening 100 grammes of powdered f. (2d def.) with 35 of a mixture of 1 part of alcohol and 2 parts of water, macerating for 48 hours in the percolator, and exhausting with the mixture of alcohol and water. The first 90 c. c. are reserved, and the rest is evaporated to a soft extract, then dissolved in the reserved portion, and sufficient diluted alcohol added to make 100 c. c. of liquid extract. [B, 5, 81, 95 (a, 14).]—**F. alnus.** The *Rhamnus f.* [B, 173 (a, 24).]—**F. bark.** See *F.* (2d def.).—**F. californica.** See RHAMNUS *californica*.—**F. caroliniana.** See RHAMNUS *carolinianus*.—**F. purshiana.** See RHAMNUS *purshiana*.—**F. saxatilis.** The *Rhamnus saxatilis*. [B, 173 (a, 24).]—**F. sempervirens.** The *Maurocenia capensis*. [B, 263.]—**F. vulgaris.** The *Rhamnus f.*—**Syrupus frangulæ** [Netherl. Ph.]. A syrup made by boiling 1 part of cortex frangulæ with water to form 3 parts of decoction, to which are added 6 of sugar. [B, 95.]

FRANGULIC ACID, n. Fra^{2}n^2-gu^{2}l'i^{2}k. Fr., *acide frangulique*. Ger., *Frangulinsäure*. One of the isomeric varieties of dihydroxyanthraquinone, and so isomeric with alizarin. [B, 4.]

FRANGULIN, n. Fra2n2'gu3l-i2n. Fr., *franguline*. Ger., *F.* It., *frangolina*. A glucoside, $C_{20}H_{20}O_{10}$, isolated from the bark of *Rhamnus frangula*. [B, 4 (a, 27).]

FRANGULINIC ACID, n. Fra2n3-gu3l-i2n'i2k. See FRANGULIC ACID.

FRANKE, n. Fra2n2k. The *Spergula arvensis*. [A, 505 (a, 21).]

FRANKENIA (Lat.), n. f. Fra2n2k(fra3n2k)-en(an)'i2-a3. Fr., *frankénie, franquène*. Sea-heath; a Linnæan genus of herbs or undershrubs of the *Frankeniaceæ*. The *Fraukeniaceæ*, or *Frankenieæ*, are: Of De Candolle and others, an order of the *Thalamifloræ*; of Reichenbach, a division of the *Cistineæ*; of Dumortier, a family of the *Resedarieæ*; of Bartling, an order of the *Guttiferæ*; of Link, an order of the *Anastemones*; of Lindley, an order of the *Violales*; of Endlicher, an order of the *Parietales*; of Brongniart, a family of the *Violineæ*; and of Bentham and Hooker, an order of the *Carophyllinæ*. [B, 1, 19, 42, 121, 170 (a, 24).]—**F. grandifolia.** A Californian species, found in the sands about San Francisco. It is said to be aromatic. [Römer and Schultes (a, 24).]—**F. ramiflora.** Fr., *f. à fleurs rameuses*. A species found on the Isle of St. Martha. All parts, especially the berries, are poisonous. [B, 173 (a, 24).]

FRANKFORT-ON-THE-MAIN, n. Fra2n2k'fort-o2n-the-ma3'en. Fr., *Francfort-sur-Main*. Ger., *Frankfurt am Main*. A city in the province of Hesse-Nassau, Prussia, where there is a saline and slightly sulphurous spring. [L, 30, 135 (a, 14).]

FRANKINCENSE, n. Fra2n2k'i2n-se2ns. Lat., *thus*. Fr., *encens* [Fr. Cod.]. Ger., *Weihrauch*. It., *incenso*. Sp., *incienso*. See OLIBANUM.—**African f., Arabian f.** See OLIBANUM.—**Common f.** Lat., *thus americanum* [Br. Ph.]. The concrete turpentine of *Pinus tæda* and *Pinus palustris*, scraped from the trunk of the trees. [B, 5 (a, 24).]—**Confection of f.** See *Confectio de* THURE (under THUS).—**Indian f.** A soft, odoriferous resin obtained from *Boswellia thurifera*, the *salai* tree of India, which is particularly abundant on the trap hills of the Dekhan and Satpoora range. It is used in India as incense, but is not the olibanum of commerce. [A, 264 (a, 21).]—**Pine f.** See *Common f.*—**Rosemary f.** The *Cachrys libanotis*. [B, 275 (a, 24).]—**Sierra Leone f.** The gum-resin of *Daniellia thurifera*. [B, 185 (a, 24).]—**True f.** See OLIBANUM.

FRANKLINIC, adj. Fra2n2k-li2n'i2k. Of electricity, statical.

FRANKLINISM, n. Fra2n2k'li2n-i2z'm. Named for Benjamin Franklin. See *Static* ELECTRICITY.

FRANKLINIZATION, n. Fra2n2k-li2n-i2-za'shu3n. Fr., *franklinisation*. The use of statical electricity for medical purposes; especially the act of charging an organism with static electricity. [A, 326 (a, 21).]

FRANSE (Ger.), n. Fra3ns'e2. See FIMBRIA.

FRANZBAD (Ger.), n. Fra3nts'ba3d. See FRANZENSBAD.

FRANZBRANNTWEIN (Ger.), n. Fra3nts'bra3nt-vin. French brandy. [A, 521.]

FRANZENSBAD (Ger.), **FRANZENSBRUNN** (Ger.), **FRANZENSBRUNNEN** (Ger.). n's. Fra3nts'e2ns-ba3d, -brun, -brun-e2n. A place in Bohemia where there are alkaline, saline, and chalybeate springs, also mud baths. [A, 319, 363 (a, 21).]

FRANZOSEN (Ger.), n. pl. Fra3nts'oz-e2n. An old term for syphilis. [G.]

FRAPPEMENT (Fr.), n. Fra3p-ma3n2. A form of massage in which taps are administered. [A, 385.]

FRAS (Fr.), n. Fra3. The musculo-cutaneous fold of the flank in a quadruped. [A, 385.]

FRASERA (Lat.), n. f. Fraz'u6r-a3. Named for John Fraser, an American cultivator of exotics. Fr., *frasère*. 1. A genus of North American gentianaceous herbs of the *Swertieæ*. 2. American calumba; of the U. S. Ph., 1870, the root of *F. Walteri*. [B, 5, 34 42 (a, 24).]—**F. carolinensis** (seu **caroliniana**). See *F. Walteri*.—**F. verticillata, F. Walteri.** Fr., *frasère de Walter, colombo d'Amérique* (ou *de Mariette*), *faux colombo*. American calumba, a species growing in the western and southern United States, especially in Arkansas and Missouri. The dried root (American gentian, or false calumba) is bitterish and sweetish, has tonic properties, and is sometimes used as a substitute for calumba. The fresh root is said to be emetic and cathartic. [B, 5, 173, 180 (a, 24).]

FRATER (Fr.), n. Fra3-te2r. 1. An orderly in a military hospital. 2. A medical practitioner of low degree. [A, 523.]

FRATERNITAS (Lat.), **FRATRATIO** (Lat.), n's f. Fra2t-(fra3t)-u6rn(e2rn)'i2t-a2s(a3s), -ra(ra3)'shi2(ti2)-o. Gen., *-tat'is, -o'nis*. From *frater*, a brother. See ADELPHIXIA.

FRATT (Ger.), n. Fra3t. See FRET.—**Afterf'.** Intertrigo about the anus. [G.]—**F'sein.** A chafed condition. [A, 521.]

FRATTA (It.), n. Fra3t'ta3. A place in the province of Forli, Italy, where there is a saline spring containing sodium, magnesium, and calcium sulphates. [A, 319 (a, 21).]

FRAU (Ger.), n. Fra3-u4. A woman. [a, 30.]—**F'enärztlich.** Gynæcological.—**F'enbiss.** The *Teucrium chamædrys*, the *Veronica chamædrys*, and the *Veronica officinalis*. [B, 180 (a, 24).]—**F'enblatt.** See *Herba* BALSAMITÆ.—**F'enblume.** The *Anagallis arvensis*. [B, 48 (a, 14).]—**F'endistel.** The *Silybum marianum*. [B, 180 (a, 24).]—**F'eneis.** Foliated gypsum. [B, 180 (a, 24).]—**F'enhaar.** See the major list.—**F'enheil.** The *Hesperis matronalis*. [B, 180 (a, 24).]—**F'enkrieg.** The *Echium vulgare*. [B, 180 (a, 24).]—**F'enmantel.** See the major list.—**F'enschuh.** See CYPRIPEDIUM *calceolus*.—**F'enschuhkraut.** The herb of *Fumaria officinalis*. [B, 180 (a, 24).]—**F'enwurz.** The *Caulophyllum thalictroides*. [B, 270.]—**F'enzeit.** The menses. [L, 46 (a, 14).]—**F'enzimmer.** Literally, a woman's room (*i. e.*, a lying-in chamber). The puerperal period.

FRAUENHAAR (Ger.), n. Fra3'u4-e2n-ha3r. Maiden-hair, especially the *Adiantum capillus Veneris*. [B, 20, 180 (a, 24).]—**Canadisches** (oder **Fussförmiges**) **F.** See ADIANTUM *pedatum*.—**F'krautfarn.** The *Adiantum capillus Veneris*. [B, 92 (a, 14).]—**F'streiffarn.** See ASPLENIUM *adiantum nigrum*.—**Fussförmiges F.** See ADIANTUM *pedatum*.—**Goldenes F.** The *Polytrichum commune*. [B, 180 (a, 24).]—**Rothes F.** The herb of *Asplenium trichomanes*. [B, 180 (a, 24).]—**Schwarzes F.** The frond of *Asplenium adiantum nigrum*. [B, 180 (a, 24).]—**Weisses F.** The *Aspidium rhæticum* and the frond of *Asplenium ruta muraria*. [B, 180 (a, 24).]

FRAUENMANTEL (Ger.), n. Fra3'u4-e2n-ma3nt-e2l. See ALCHEMILLA.—**Alpenf'.** See ALCHEMILLA *alpinus*.—**F'kraut, Gemeiner F.** See ALCHEMILLA *vulgaris*.

FRAXETIN, n. Fra2x'e2t-i2n. A crystalline substance, $C_{10}H_8O_5$ [Salm-Horstmar], or $C_{15}H_{12}O_8$ [Rochleder], formed along with sugar by the decomposition of fraxin. [B, 270.]

FRAXIN, n. Fra2x'i2n. Fr., *fraxine*. Ger., *F.* A crystalline glucoside. $C_{16}H_{18}O_{10}$ [Beilstein], or $C_{27}H_{30}O_{17}$ [Rochleder], found in the bark of various species of *Fraxinus* and *Æsculus*. [A, 518; B, 270 (a, 27).]

FRAXINELL, n. Fra2x-i2n-e2l'. The *Polygonatum multiflorum*. [B, 275 (a, 24).]

FRAXINELLA (Lat.), n. f. Fra2x(fra3x)-i2n-e2l'la3. Dim. of *fraxinus*. Fr., *fraxinelle*. 1. Of Tournefort, the genus *Dictamnus*. The *Fraxinellæ* are a family of the *Rutaceæ*. 2. The *Dictamnus f.* [B, 19, 121, 170, 275 (a, 24).]—**F. alba, F. dictamnus, F. pumila, White-flowered f.** The *Dictamnus albus*. [B, 173, 180 (a, 24).]

FRAXINELLE (Fr.), n. Fra3x-e-ne2l. 1. See FRAXINELLA. 2. Of the Fr. Cod., the *Dictamnus albus*. [a, 24.]—**F. cultivée.** The *Dictamnus albus*. [B, 173 (a, 24).]—**F. pourprée.** See DICTAMNUS *purpureus*.

FRAXININ, n. Fra2x'i2n-i2n. Fr., *fraxinine*. Ger., *F.* A bitter, crystalline principle, $C_{42}H_{23}O_{27}$, found in the bark of *Fraxinus excelsior*, and soluble in water and in alcohol, less soluble in ether. [L, 30, 56 (a, 14); "Proc. of the Am. Pharm. Assoc.," ix (a, 14).]

FRAXINITE, n. Fra2x'i2n-it. Of Monchon, an extract-like substance derived from the leaves of the *Fraxinus excelsior* said to be purgative. [B, 81 (a, 21).]

FRAXINUS (Lat.), n. f. Fra2x(fra3x)'i2n-u3s(u4s). Fr., *frêne, fresne*. Ger., *Esche*. It., *frassino*. Sp., *fresno*. 1. The ash; of Linnæus, a genus of the *Oleaceæ*, tribe *Fraxineæ*. The *Fraxineæ* (Fr., *fraxinées*), or *Fraxinieæ*, are a group of oleaceous trees or shrubs; of Gray, a family of the *Corollifloræ*; of Reichenbach, a division of the *Sapoteæ*, and subsequently a subdivision of the *Styraceæ*; of Endlicher, a suborder, and of Meissner and others a tribe, of the *Oleaceæ*, including *F.*, etc. 2. The inner bark of *F. excelsior*, formerly used in malarial fevers. [B, 117.]—**Extractum fraxini americanæ.** An alcoholic extract of the bark of *F. americana*. [B, 81 (a, 21).]—**Extractum fraxini americanæ fluidum.** Of Edwards, a blackish-red extract made by exhausting *F. americana* with a menstruum of alcohol containing 20 per cent. of glycerin. [B, 81 (a, 21).]—**Folia fraxini.** The leaves of the *F. excelsior* (the *frêne* of the Fr. Cod.). [B, 95.]—**F. acuminata.** 1. The white ash of Michigan; a species found in North America; used like *F. excelsior*. 2. Of Wood, the *F. americana*. [B, 34, 180 (a, 24).]—**F. americana.** Fr., *frêne d'Amérique* (ou *blanc*). The white ash; a North American species resembling in properties and uses the *F. excelsior*. The bark is also used in dysmenorrhœa. [B, 5, 34, 180 (a, 24).]—**F. apetala.** See *F. excelsior*.—**F. argentea.** Fr., *frêne argenté*. A variety of the *F. excelsior*. [B, 173 (a, 24).]—**F. atrovirens.** The *F. excelsior*, var. *crispa*. [B, 180 (a, 24).]—**F. aurea.** Fr., *frêne doré*. A variety of *F. excelsior*. [B, 173 (a, 24).]—**F. caroliniana.** See *F. juglandifolia*.—**F. chinensis.** The wax-tree of China; a species cultivated for the China wax, or *pela* (*q. v.*) furnished by an insect (coccus) infesting this tree. [B, 5 (a, 24).]—**F. crispa.** Ger., *krause Esche*. A variety of *F. excelsior*.—**F. discolor.** The *F. americana*. [a, 24.]—**F. europæa, F. excelsa, F. excelsior.** Fr., *frêne* [Fr. Cod.], *frêne commun* (ou *élevé*), *gayac des Allemands, grand frêne*. Ger., *gemeine* (oder *hohe*) *Esche, Wundholzbaum*. The European ash; a species indigenous to the greater part of Europe, the north of Africa, and some parts of Asia. The bark, *cortex fraxini* (seu *fraxini excelsioris*. seu *linguæ avis*), is bitter and astringent, and was formerly used in intermittent fevers under the name of German cinchona (*deutsche China*), and also in dropsy and as a vermifuge. It yields *fraxin* (*q. v.*). The leaves, *folia fraxini*, have been used in snake-bites, and in scrofulous, rheumatic, and gouty affections. The wood, *lignum fraxini* (seu *guajaci Germanorum*), yields an acid, known in Sweden as *sarnetärva*, and used as a sudorific. The fruits, *semen fraxini* (seu *linguæ avis*), were formerly official in Europe as a vermifuge, and for nephritic disorders and incipient dropsy. [B, 5, 19, 173, 180 (a, 24).]—**F. florifera.** See *F. ornus*.—**F. halepensis.** The *Pinus halepensis*. [B, 77 (a, 24).]—**F. heterophylla.** The diverse-leaved ash, a variety of *F. excelsior*. [B, 19, 180 (a, 24).]—**F. horizontalis.** Fr., *frêne horizontal*. A variety of the *F. excelsior*. [B, 173 (a, 24).]—**F. juglandifolia.** Fr., *frêne à feuilles de noyer*. The green ash; a species found in North America. The bark and fruit are used as a diuretic and in syphilis. [B, 34, 173, 180 (a, 24).]—**F. latifolia.** Fr., *frêne à larges feuilles*. A variety of *F. ornus*. [B, 173 (a, 24).]—**F. lentiscifolia.** Fr., *frêne à feuilles de lentisque*. An Eastern species. [B, 173 (a, 24).]—**F. macedonica.** Of Theophrastus, the *F excelsior*. [a, 24.]—**F. mannifera.** See *F. rotundifolia*.—**F. microphylla.** The *F. lentiscifolia*. [B, 173 (a, 24).]—**F. monophylla.** Fr., *frêne à une feuille*. A variety of *F. excel-*

sior. [B, 180 (α, 24).]—**F. nigra.** Of Duroi, see *F. pubescens;* of Marshall, see *F. sambucifolia.*—**F. oregonensis.** A Californian species. ["Proc. of the Am. Pharm. Assoc.," xix (α, 14).]—**F. ornus.** Fr., *frêne à fleurs* (ou *à la manne*), *orne, ornier.* Ger.,

FRAXINUS ORNUS. [A, 327.]

Manna-Esche, europäische Blumenesche. The flowering or manna ash; a species found in southern and middle Europe. It is the chief source of manna. [B, 5, 18, 173, 180 (α, 24).]—**F. paniculata.** Of Miller, the *F. ornus.* [B, 173, 180 (α, 24).]—**F. parvifolia.** See *F. lentiscifolia.*—**F. pendula.** Fr., *frêne pleureur.* The weeping ash; a variety of *F. excelsior.* [B, 34, 180 (α, 24).]—**F. pennsylvanica.** See *F. pubescens.*—**F. platycarpa.** A species found in wet woods from Virginia to Florida and Louisiana. [B, 34 (α, 24).]—**F. polygamia.** The common ash of Michigan. ["Proc. of the Am. Pharm. Assoc.," vii (α, 14).]—**F. pubescens.** Fr., *frêne pubescent* (ou *rouge*). The red ash; a species smaller than the white ash, found in swampy or low grounds in Canada and the United States, and common in Pennsylvania and Virginia. [B, 34, 173 (α, 24).]—**F. quadrangulata.** Fr., *frêne quadrangulaire* (ou *bleu*). The blue ash; a tall species found in rich woods from Ohio to Tennessee and Iowa. [B, 34, 173 (α, 24).]—**F. rotundifolia.** Fr., *frêne à feuilles rondes, frêne à la manne.* The round-leaved manna ash; a species found in Sicily, Calabria, and Apulia. It supplies part of the manna of commerce. [B, 5, 173, 180 (α, 24).]—**F. sambucifolia.** Fr., *frêne noir* (ou *à feuilles de sureau*). The black ash, water ash; a species found in moist soils in the northern United States and in Canada. [B, 34, 173 (α, 24).]—**F. silvestris.** The *Sorbus aucuparia.* [B, 180 (α, 24).]—**F. simplicifolia.** A variety of *F. excelsior.* [B, 180 (α, 24).]—**F. subintegerrima, F. subserrata.** Fr., *frêne sous-denté.* A variety of *F. juglandifolia.* [B, 173 (α, 24).]—**F. tamariscifolia.** See *F. lentiscifolia.*—**F. tetragona.** See *F. quadrangulata.*—**F. Theophrasti.** Fr., *frêne de Théophraste* (ou *de Montpellier*, ou *à petites feuilles*). A variety of *F. ornus.* [B, 173 (α, 24).]—**F. tomentosa.** See *F. pubescens.*—**F. verrucosa.** Fr., *frêne verruqueux.* A variety of *F. excelsior.* [B, 173 (α, 24).]—**F. viridis.** See *F. juglandifolia.*—**Interior cortex fraxini.** The inner bark of *F. excelsior.*—**Lignum fraxini.** The wood of *F. excelsior.* [B, 180 (α, 24).]—**Semen fraxini.** The fruits of *F. excelsior.* [B, 180 (α, 24).]—**Succus fraxini orni.** Manna. [B, 180 (α, 24).]—**Vinum fraxini americanæ.** A preparation made by exhausting 4 oz. (troy) of the bark of *F. americana* with sherry wine. [B, 81 (α, 21).]

FRAYSSINETA, n. In Languedoc, the *Sanguisorba officinalis.* [B, 121 (α, 24).]

FRAZERA (Lat.), n. f. Fraz′u^{5}r-a^3. See FRASERA.

FRECKLE, n. Fre^{2}k′l. O. E., *frecken, freken.* Fr., *rousseur.* Ger., *Fleck, Sprosse.* It., *lentiggine, efelide.* Sp., *peca.* An efflorescence of lentigo (*q. v.*). [G.]—**Sun f.** See LENTIGO.

FREE, adj. Fre. Gr., ἐλεύθερος. Lat., *liber.* Fr., *libre.* Ger., *frei, unverbunden.* It., Sp., *libre.* Exposed, external, not adherent to another organ or body. [B, 1, 19, 123 (α, 24).]

FREE-MARTIN, n. Fre′ma^{3}r-ti^{2}n. In Scotland, a barren or hermaphrodite twin of the bovine species, the other twin being a perfect male. [A, 69.]

FREE-STONE, n. Fre′ston. A fruit whose pulp parts freely from the stone. [B, 275 (α, 24).]

FREEZING, adj. Frez′i^{2}n^2. Gr., χειμιῶν. Lat., *gelans.* Fr., *gelant.* Ger., *frierend.* Producing congelation (1st def.); as a n., see CONGELATION (1st def.).

FREGOSA (Sp.), n. Fra-go′sa^3. In Mexico, the *Capraria biflora.* [B, 121 (α, 24).]

FREI (Ger.), adj. Fri. See FREE.—**F'füssig.** See ELEUTHEROPODOUS.—**F'willig.** Voluntary, spontaneous.—**F'wurzelig.** See EXORHIZAL.

FREIBERG (Ger.), n. Fri′be^{2}rg. See LAUCHSTAEDT.

FREIENWALDE (Ger.), n. Fri′e^{2}n-va^{3}ld-e^2. A place in Prussia, where there are gaseous and ferruginous springs. [A, 319 (α, 21).]

FREIERSBACH (Ger.), n. Fri′e^{2}rz-ba^{3}ch^2. A place in the district of the Middle Rhine, Baden, Germany, where there are gaseous and chalybeate springs. [A, 319 (α, 21).]

FREIN (Fr.), n. Fra^{2}n^2. See FOURCHETTE, FRENUM, and FRENULUM.—**F. de la langue.** See FRENUM *of the tongue.*—**F. de la valvule de Vieussens.** See FRENULUM (2d def.).—**F. de la verge.** See FRENUM *glandis.*—**F's des lèvres.** See FRENULUM *labii inferioris* and FRENULUM *labii superioris.*—**F. du clitoris.** See FRENUM *clitoridis.*—**F's du conarium.** See HABENA.—**F's du corps pinéale.** See HABENA.—**F. du prépuce.** See FRENUM *glandis.*

FREISAM (Ger.), n. Fri′za^{3}m. See CRUSTA *lactea.*—**F'kraut.** The *Viola tricolor.* [B, 180 (α, 24).]

FREMD (Ger.), adj. Fre^{2}md. See FOREIGN.—**F'artig.** Heterogeneous. [A, 521.]—**F'bildung.** A heterogeneous formation. [A, 521.]

FRÉMISSEMENT (Fr.), n. Fra-mes-ma^{3}n^2. See FREMITUS, VIBRATION, THRILL, PURR, and TREMOR.—**F. artério-veineux.** See *Arterio-venous* MURMUR.—**F. cataire.** See *Purring* THRILL.—**F's fibrillaires.** See *Fibrillary* CONTRACTIONS.—**F. hydatique.** See *Hydatid* THRILL.—**F. vibratoire.** See *Aortic* THRILL.

FREMITUS (Lat.), n. m. Fre^{2}m′i^{2}t-u^{3}s(u^{4}s). Gen., *frem′itus.* Fr., *frémissement.* Ger., *Knirschen, Schüttern.* In physical diagnosis, the sensation appreciated through the hand when placed over a part that is in vibration. [D.]—**Aneurysmal f.** An aneurysmal thrill. [α, 34.]—**Bronchial f.** A vibration caused by a bronchial râle and transmitted to the chest-walls. [D, 47.]—**Cavernous f.** The vibration of fluid in a pulmonary cavity, which is appreciable upon the chest-wall. [D, 47.]—**Endocardial f.** The endocardial thrill. [α, 34.]—**F. dentium.** Ger., *Zähneknirschen.* A gnashing of the teeth. [A, 326 (α, 21).]—**F. felinus.** Fr., *frémissement cataire.* See *Purring* THRILL.—**Friction f.** A form of f. which is appreciated when two surfaces slightly roughened glide over each other (*e. g.*, when the two pleural surfaces glide over each other in the beginning of a pleuritis). [D, 1.]—**Hepatic f., Hydatid f.** See *Hydatid* THRILL.—**Pectoral f.** Lat., *f. pectoralis.* A f. appreciated in the region of the chest. [D, 67.]—**Pericardial f.** Pericardial thrill. [α, 34.]—**Pleural f.** A pleural friction-sound which may be appreciated upon the chest-wall. [D, 47.]—**Respiratory f.** A f. caused by an obstruction in air passages (*e. g.*, by laryngeal stenosis). [D, 69.]—**Rhonchal f.** F. produced by a rhonchus. [D, 1.] See *Bronchial f.*—**Vocal f.** The sensation of vibration which is communicated to the hand when it is placed upon the chest of a person who is talking. It varies in intensity with the elasticity of the lung tissue and the pressure of the air in the bronchial tubes and air-vesicles. The resistance within and without the lung is also a determining element as to its force. The increase of vocal f. is a sign of thickening of the lung-tissue (as in phthisis and pneumonia), while its diminution or cessation is a sign of pleuritic exudations. [A, 326 (α, 21); D.]

FREMONTIA (Lat.), n. f. Fre-mo^{2}nt′i^2-a^3. Of Torrey, a genus of malvaceous shrubs; of Hooker, a genus of the *Bombaceæ.* The *Fremontieæ* of Torrey are the *Cheirostemoneæ.* [B, 42 (α, 24).]—**F. californica.** The California slippery elm. The bark is said to have the same properties and uses as that of *Ulmus fulva.* [B, 5, 42 (α, 24).]

FRENANS (Lat.), adj. Fren(fran)′a^{2}nz(a^{3}ns). From *frenare,* to curb. Checking, restraining; of Fernelius, controlling turbulent humors. [A, 325.]

FRENATOR (Lat.), n. m. Fre^{2}n(fran)-a(a^3)′to^{2}r. Gen., *o′ris.* From *frenare,* to curb. Fr., *frénateur.* That which curbs, checks, or inhibits; of Dupré, any one of the muscles that move the head on the atlas and axis. [A, 325, 518.]

FRENCH LICK SPRINGS, n. Fre^{2}nch li^{2}k. A place in Orange County, Indiana, where there are springs containing magnesium and calcium carbonates, sodium chloride, and sodium, magnesium, and calcium sulphates. [A, 363 (α, 21).]

FRENCH-POCKES, n. Fre^{2}nch-po^{2}x′. The *Guaiacum officinale.* [B, 121 (α, 24).]

FRENCH-WEED, n. Fre^{2}n^{2}ch′wed. The *Commelina cayennensis.* [B, 275, 282 (α, 24).]

FRÊNE (Fr.), n. Fre^{2}n. The genus *Fraxinus,* especially the *Fraxinus excelsior.* [B.]—**F. à feuilles de lentisque.** See FRAXINUS *lentiscifolia.*—**F. à feuilles de noyer.** See FRAXINUS *juglandifolia.*—**F. à feuilles de sureau.** See FRAXINUS *sambucifolia.*—**F. à feuilles rondes.** See FRAXINUS *rotundifolia.*—**F. à fleurs.** See FRAXINUS *ornus.*—**F. à la manne.** See FRAXINUS *ornus* and FRAXINUS *rotundifolia.*—**F. à larges feuilles.** See FRAXINUS *latifolia.*—**F. amer.** The *Quassia excelsa.* [B, 173 (α, 24).]—**F. à petites feuilles.** See FRAXINUS *Theophrasti.*—**F. argenté.** See FRAXINUS *argentea.*—**F. à une feuille.** See FRAXINUS *monophylla.*—**F. blanc.** See FRAXINUS *americana.*—**F. bleu.** See FRAXINUS *quadrangulata.*—**F. commun.** See FRAXINUS *excelsior.*—**F. d'Amérique.** See FRAXINUS *americana.*—**F. de Montpellier, F. de Theophraste.** See FRAXINUS *Theophrasti.*—**F. doré.** See FRAXINUS *aurea.*—**F. élevé.** See FRAXINUS *excelsior.*—**F. épineux.** The *Xanthoxylon fraxineum.* [B, 121, 173 (α, 24).]—**F. horizontal.** See FRAXINUS *horizontalis.*—**F. noir.** See FRAXINUS *sambucifolia.*—**F. pleureur.** See FRAXINUS *pendula.*—**F. pubescent.** See FRAXINUS *pubescens.*—**F. quadrangulaire.** See FRAXINUS *quadrangulata.*—**F. rouge.** See FRAXINUS *pubescens.*—**F. sous-denté.** See FRAXINUS *subintegerrima.*—**F. verruqueux.** See FRAXINUS *verrucosa.*—**Grand f.** See FRAXINUS *excelsior.*

FRENELA (Lat.), n. f. Fre^{2}n-e(a)′la^3. The genus *Hexaclinis.* [B. 42; Eichler (B, 245).]

FRÉNELLE (Fr.), n. Fra-ne^{2}l. The *Heracleum sphondylium.* [B, 121, 173 (α, 24).]

FRENETIC, adj. Fre^{2}n-e^{2}t′i^{2}k. See PHRENETIC.

FRENGA, n. In Servia, a disease of the same character as scherlievo. [G.]

FRENULE, n. Fre^{2}n'u^{2}l. See Frenulum.

FRENULUM (Lat.), n. n. Fre^{2}n(fran)'u^{2}l(u^{4}l)-u^{3}m(u^{4}m). Dim. of *frenum* (*q. v.*). Fr., *f.*, *frein* (1st def.), *freins de la valvule de Vieussens* (2d def.). Ger., *Bändchen*. 1. A little bridle-like restraining band or fold. 2. A small ridge on the dorsal surface of the valvula of Vieussens, connected superiorly, on each side, with the corpora quadrigemina. [I, 3 (K).]—**Frenula ary-epiglottica** (seu **arytæno-epiglottica**). The arytæno-epiglottidean folds. [L, 332.]—**F. cerebri.** See *F.* (2d def.).—**F. clitoridis.** See Frenum *clitoridis*.—**F. de la glande pinéale** (Fr.). See Habena.—**F. epiglottidis.** See Frenum *of the epiglottis*.—**F. glandis.** See Frenum *glandis*.—**F. glandis clitoridis.** See Frenum *clitoridis*.—**F. glandis clitoridis dextrum.** The right half of the frenum clitoridis. [L, 115.]—**F. glandis clitoridis sinistrum.** The left half of the frenum clitoridis. [L, 115.]—**F. labii inferioris.** Fr., *frein de la lèvre inférieure*. The fold of mucous membrane that attaches the lower lip to the gum in the median line.—**F. labii superioris.** Fr., *frein de la lèvre supérieure*. A similar, but longer, fold for the upper lip.—**Frenula labiorum oris.** See *F. labii inferioris* and *F. labii superioris*.—**F. labiorum pudendi.** Fr., *frein des lèvres vulvaires*. Ger., *Schamlippenbändchen*. The fourchette of the vulva.—**F. linguæ.** See Frenum *of the tongue*.—**F. linguæ posterioris** (seu **posterius**). See Frenum *of the epiglottis*.—**F. lingulæ.** See *F.* (2d def.).—**F. novum membranæ corneæ oculi ad instar pellucidum.** Of Tarin, the tænia semicircularis. [I.]—**F. novum pellucidum.** Of Vicq d'Azyr, the tænia corporis striati. [I, 3 (K).]—**F. novum Tarini.** See *F. novum membranæ corneæ oculi ad instar pellucidum*.—**Frenula of the lip.** See *F. labiorum oris*.—**Frenula of the tongue.** See *Glosso-epiglottic* folds.—**F. of Vieussens's valve.** See *F.* (2d def.).—**F. præputii.** See Frenum *glandis*.—**F. pudendi.** See *F. labiorum pudendi*.—**F. Tarini.** See *F. novum membranæ corneæ oculi ad instar pellucidum*.—**Frenula valvulæ.** See *F.* (2d def.).—**Frenula valvulæ coli.** See Frena *of the ileo-cæcal valve*.—**F. veli medullaris.** See *F.* 2d def.).—**F. vulvæ.** See *F. labiorum pudendi*.—**Glosso-epiglottic frenula.** See *Glosso-epiglottic* folds.

FRENUM (Lat.), n. n. Fre(fra)'nu^{3}m(nu^{4}m). Gr., χαλινός. Fr., *frein*. Ger., *Band, Bändchen, Zaum*. It., *frenulo*. Sp., *frenillo*. A bridle-like fold connecting parts and restricting their separation.—**F. clitoridis.** Fr., *frein du clitoris*. Ger., *Kitzlerbändchen*. A string-like structure formed by the convergence of the two labia minora at the lower border of the two layers forming the præputium clitoridis; inserted along the lower portion of the clitoris as far forward as the border of the glans.—**F. epiglottidis.** See *F. of the epiglottis*.—**F. glandis.** Fr., *frein du prépuce* (*ou de la verge*). Ger., *Vorhautbändchen, Eichelbändchen*. The median folds which connect the lower surface of the glans penis with the skin of the body of the organ. [L.]—**F. labii inferioris.** See Frenulum *labii inferioris*.—**F. labii superioris.** See Frenulum *labii superioris*.—**F. linguæ.** See *F. of the tongue*.—**F. linguæ posterioris** (seu **posterius**). See *F. of the epiglottis*.—**F. of the clitoris.** See *F. clitoridis*.—**F. of the epiglottis.** Lat., *f. epiglottidis*. The largest of the three glosso-epiglottic folds which pass from the base of the tongue to the epiglottis. [C.]—**Frena of the ileo-cæcal valve.** Lat., *frenula valvulæ coli*. The ridges upon the ental surface of the colon formed by the coalescence of the two folds which form the ileo-cæcal valve. [L.]—**Frena of the lips.** See Frenulum *labii inferioris* and Frenulum *labii superioris*.—**F. of the tongue.** Lat., *f. linguæ*. Fr., *frein de la langue*. Ger., *Zungenbändchen*. A fold in the median line of the mucous membrane of the lower side of the tongue which attaches it to the gum. [C.]—**Frena oris.** See Frenula *labiorum oris*.—**F. præputii.** See *F. glandis*.

FRENZY, n. Fre^{2}n'zi^2. Gr., φρένησις. Lat., *phrenesis*. Fr., *phrénésie*. Ger., *Wahnsinn*. It., *frenesia*. Sp., *frenesí*. 1. Furious mental agitation. 2. See Phrenitis.—**Melancholic f.** Lat., *raptus melancholicus*. The acute stage or paroxysm of melancholia. It differs from maniacal fury chiefly in that the delirium is never expansive, and the acts of violence are apt to be directed toward the patient himself. [D, 36.]—**Transitory f.** A condition in which there is impaired consciousness, with which is associated either intense maniacal fury or confused hallucinatory delirium. [D, 36.]

FREQUENCY, n. Fre'kwe^{2}n-si^2. Lat., *frequentia* (from *frequens*, assembled in great numbers). Fr., *fréquence*. Ger., *Frequenz*. It., *frequenza, frequenzia*. Sp., *frecuencia*. 1. The degree of rapidity with which an occurrence is repeated. 2. The state of recurring in rapid succession. As applied to the pulse and the breathing, f. is rapid recurrence as distinguished from quickness of each individual pulsation or breath.

FREQUENT, adj. Fre'kwe^{2}nt. Gr., συχνός. Lat., *frequens*. Fr., *fréquent*. Ger., *häufig, öfter wiederholend*. Recurring rapidly.

FREQUENTATIVE, adj. Fre-kwe^{2}nt'a-ti^{2}v. Lat., *frequentativus* (from *frequentare*, to visit frequently). See Frequent.

FRESA [Mex. Ph.] (Sp.), n. Fra'sa^3. The *Fragaria vesca*. [A, 447 (*a*, 21).]

FRESH, adj. Fre^{2}sh. Lat., *recens, integer, novitius*. Fr., *frais*. Ger., *frisch*. 1. Recent, newly made, newly gathered. 2. Vigorous, not fatigued. 3. Not salted.

FRESNILLO (Sp.), n. Fre^{2}s-nel'yo. The *Dictamnus albus*. [B, 92 (*a*, 14).]

FRESNO (Sp.), n. Fre^{2}s'no. 1. See Fraxinus. 2. Of the Mex. Ph., see Fraxinus *viridis*.

FRESSEN (Ger.), n. Fre^{2}s'se^{2}n. See Brosis and Corrosion.

FRESSEND (Ger.), adj. Fre^{2}s'se^{2}nd. See Corrosive and Phagedenic.

FRET, n. Fre^{2}t. From A.-S. *fretan*, to chafe. Ger., *Fratt*. 1. Chafing; intertrigo. 2. Tetter. [G.] See Herpes (1st def.).

FRÉTILLET (Fr.), n. Fra-tel-ya. In Burgundy, the *Mentha pulegium*. [B, 121, 173 (*a*, 24).]

FRETT (Ger.), **FRETTCHEN** (Ger.), n's. Fre^{2}t, fre^{2}t'ch^{2}e^{2}n. See Putorius *furo*.

FRETUM (Lat.), n. n. Fret(fre^{2}t)'u^{3}m(u^{4}m). 1. A channel. [A, 312 (*a*, 21).] 2. See Erigma.—**F. Halleri.** A constriction described by the older embryologists as marking the boundary between the aortic bulb of the embryo and the right ventricle of the heart. [A, 8; H.]—**F. oris.** Of N. Stenson, the isthmus of the fauces. [A, 500.]

FREYCINETIA (Lat.), n. f. Fra-se-na'shi^2(ti^2)-a^3. Fr., *freycinétie*. A genus constituting the *Freycinetieæ* of Brongniart (a family of pandanaceous trees), indigenous to the Indian Archipelago and New Zealand. [B, 19, 121, 170 (*a*, 24).]—**F. Banksii.** A New Zealand species with leaves 2 feet long and spikes 3 to 4 inches long. The fruit is an oblong green spadix. The bracts and young spikes make a sweet preserve, and the leaves are used for making baskets. [*a*, 24.]

FREYERSBACH (Ger.), n. Fri'e^{2}rs-ba^{3}ch^2. A place in the grand duchy of Baden where there is an effervescent chalybeate spring. [A, 518.]

FREY'S SODA SPRING, n. Friz-so''da^3-spri^{2}n^2. An alkaline spring situated on the Sacramento River. Siskiyou County, California, containing much free carbonic acid. [*a*, 14.]

FREZ, n. Fre^{2}z. The *Ulex europæus*. [A, 505 (*a*, 21).]

FRÉZIE, n. In Languedoc, the cherry-tree. [B, 121 (*a*, 24).]—**F. sauvage.** The *Potentilla reptans*. [B, 121 (*a*, 24).]

FREZIERA (Lat.), n. f. Fra-ze-a'ra^3. Fr., *frézière*. The typical genus of the *Freziereæ* (of De Candolle, a tribe of the *Ternstroemiaceæ*). [B, 1, 121 (*a*, 24).]—**F. theoïdes.** A common West Indian species with smooth leaves which are astringent and said to taste like tea. [B, 19 (*a*, 24).]

FRÉZILLON (Fr.), n. Fra-zel-yo^{2}n^2. The *Ligustrum vulgare*. [B, 121, 173 (*a*, 24).]

FRIABILITY, n. Fri-a^2-bi^{2}l'i^2-ti^2. From *friabilis*, easily broken. Fr., *friabilité*. Ger., *Zerreiblichkeit, Bröcklichkeit*. It., *friabilità*. Sp., *friabilidad*. The state of being friable.

FRIABLE, adj. Fri'a-b'l. Gr., ψαθυρός. Lat., *friabilis* (from *friare*, to break into small pieces). Fr., *f.* Ger., *zerreiblich*. Easily crumbled, or powdered. [*a*, 21.]

FRIAR'S-CAPS, n. Fri'a^{3}rz-ka^{2}ps. The *Aconitum napellus*. [B, 275 (*a*, 24).]

FRIAR'S-COWL, n. Fri'a^{3}rz-ka^3-u^{4}l. The *Arisarum vulgare* and the *Arum maculatum*. [B, 275 (*a*, 24).]

FRIAR'S-CROWN, n. Fri'a^{3}rz-kra^3-u^{4}n. The *Cnicus eriophorus*. [B, 275 (*a*, 24).]

FRIAR'S-ELBOW, n. Fri'a^{3}rz-e^{2}l-bo. The fruit of *Thevetia yccotli*. [B.]

FRICATIO (Lat.), n. f. Fri^{2}k-a(a^3)'shi^2(ti^2)-o. Gen., *-o'nis*. See Friction.

FRICATIVE, adj. Fri^{2}k'a^{2}t-i^{2}v. From *fricare*, to rub. Characterized by friction or a friction sound; as a n., a consonant sound, such as that of *f*, *v*, *s*, or *z*, made by the friction of the expired air against the teeth, the lips, etc. ["Prcc. of the Am. Philol. Assoc.," xv (*a*, 21).]

FRICATOR (Lat.), n. m. Fri^{2}k-a(a^3)'to^{2}r. Gen., *-tor'is*. From *fricare*, to rub. One who rubs. [A, 312 (*a*, 21).]

FRICATRIX (Lat.), n. f. Fri^{2}k-a(a^3)'tri^{2}x. Gen., *-at'ricis*. A female rubber. See Confricatrix.

FRICON (Fr.), n. Fre-ko^{2}n^2. The *Ruscus aculeatus*. [B, 121, 173 (*a*, 24).]

FRICTIO (Lat.), n. f. Fri^{2}k'-shi^2(ti^2)-o. Gen., *-o'nis*. See Friction.—**Frictiones apotherapeuticæ.** See Apotherapeia (2d def.).—**F. humida.** See *Moist* friction.—**F. sicca.** See *Dry* friction.

FRICTION, n. Fri^{2}k'shu^{3}n. Gr., τρῖψις. Lat., *fricatio, frictio* (from *fricare*, to rub). Fr., *frottement, f.* Ger., *Reibung*. It., *fregagione*. Sp., *fricción*. The act of rubbing while exerting more or less pressure. [B, 52 (*a*, 27).]—**Apotherapeutic f's.** Lat., *frictiones apotherapeutica*. See Apotherapeia (2d def.).—**Dry f.** Lat., *frictio sicca*. Fr., *f. sèche*. F. without the use of a liquid, as with the dry hand, a brush, etc. [A, 385.]—**F. excitante** (Fr.). F. with a stimulant (*e. g.*, hot vinegar, alcohol, brandy, etc.). [L, 41.]—**F. humide** (Fr.). See *Moist f.*—**F. sèche** (Fr.). See *Dry f.*—**F.-sound.** See the major list.—**F's stibiées** (Fr.). F's with an ointment generally composed of from 4 to 8 parts of tartar emetic and 30 of hog's lard; employed in tuberculous meningitis, in abdominal typhoid fever, also to soften pulmonary tubercles, to prevent hydrarthroses, etc. [L, 88 (*a*, 21).]—**F. vésicante** (Fr.). F. with a vesicatory unguent. [L, 41.]—**Ganglionic f.** Of Romanes, an interference in the interaction of nerve ganglia, producing mental distraction or inattentiveness. [*a*, 34.]—**Irritant f.** Fr., *f. irritante*. F. with an irritant. [L, 41.]—**Moist f.** Lat., *frictio humida*. Fr., *f. humide*. F. with a liquid or oily substance. [L, 41.]—**Purgative f.** Fr., *f. purgative*. The external application of a purgative (*e. g.*, croton-oil) by f. [L, 41.]

FRICTIONAL, adj. Fri^{2}k'shu^{3}n-a^{2}l. Pertaining to or caused by friction.

FRICTIONNER (Fr.), v. tr. Fri^{2}k-se-on-na. To rub, to apply (liniments, etc.) with friction.

FRICTION-SOUND, n. Fri^{2}k'shu^{3}n-su^6-u^{4}nd. Fr., *bruit de froissement*. The sound produced by the rubbing of two serous

surfaces together, caused by resistance to motion in consequence of inflammation. [a, 34.]—**Creaking f.-s.** The f.-s. of pleuritis. [a, 34.]—**Pericardial f.-s.** Fr., *frottement péricardique.* The f.-s. produced by pericarditis. [a, 34.]—**Peritoneal f.-s.** Fr., *frottement péritonéal.* The f.-s. produced by peritonitis. [a, 34.]—**Pleural f.-s.** Fr., *frottement pleurétique.* The f.-s. produced by pleuritis. [a, 34.]—**Pulsatile f.-s.** A f.-s. produced by cardiac pulsations. [a, 34.]—**Shoulder-blade f.-s.** A f.-s. produced by movements of the ribs and the scapula. [a, 34.]—**Shoulder-joint f.-s.** A f.-s. at the shoulder joint that is sometimes heard in the supraspinous fossa during respiration. [a, 34.]

FRICTRIX (Lat.), n. f. Fri^{2}k'tri^{2}x. Gen., *fric'tricis.* From *fricare,* to rub. See FRICATRIX and CONFRICATRIX.

FRIEDRICHSHALL (Ger.), n. Fred'ri^{2}ch^{2}s-ha^{3}l. A place in the duchy of Saxe-Meiningen, Germany, where there are purgative springs containing magnesium carbonate, sodium and magnesium chlorides and sulphates, etc. [A, 319, 363 (a, 21).]

FRIEDRICHSQUELLE (Ger.), n. Fred'ri^{2}ch^{2}s-kwe^{2}l-le^2. See under LANDECK.

FRIEDRICHSRODA (Ger.), n. Fred'ri^{2}ch^{2}s-rod-a^3. A town in the duchy of Gotha, Germany, where there is a hydro-therapeutic establishment with fir-needle baths. [L, 30, 37 (a, 14).]

FRIEDRICHSSALZ (Ger.), n. Fred'ri^{2}ch^{2}s-za^{3}ltz. Magnesium sulphate. [B, 270.]

FRIEDRICH-WILHELM-BAD (Ger.), n. Fred''ri^{2}ch^2-vi^{2}l'-he^{2}lm-ba^{3}d. A bathing establishment in Swinemünde, on the island of Usedorm, Pomerania, Prussia. [A, 319 (a, 21).]

FRIESEL (Ger.), n. Frez'e^{2}l. See MILIARIA.—**F'ähnlich, F'artig.** Miliary. [G.]—**Gichtf'.** See ARTHROPHLYSIS *cardiaca.*

FRIGAULE (Fr.), n. Fre-gol. The *Agaricus socialis.* [B, 121 (a, 24).]

FRIGEFACIENT, adj. Fri^{2}j-e-fa'shi^2-e^{2}nt. Lat., *frigefaciens* (from *frigus,* cold, and *facere,* to make). See REFRIGERANT.

FRIGENTO (It.), n. Fre-je^{2}n'to. A place in the province of Principato Ulteriore, Italy, where there is a highly sulphurous spring. [L, 30, 41 (a, 14).]

FRIGHT, n. Frit. Gr., φόβος. Lat., *pavor.* Fr., *peur.* Ger., *Furcht.* It., *timore, paura, tema.* Sp., *miedo, temor, recelo.* Nervous agitation with loss of mental balance, caused by sudden danger or fear. [D.]—**Precordial f.** The anxious precordial sensations immediately preceding an attack of melancholic frenzy; supposed to be due to some disturbance of the pneumogastric and sympathetic centres. [D, 36.]

FRIGID, adj. Fri^{2}j'i^{2}d. Gr., ψυχρός. Lat., *frigidus* (from *frigere,* to be cold). Fr., *frigide.* Ger., *frostig, kalt.* It., *frigido, freddo.* Sp., *frigido.* Cold, especially in a metaphorical sense. [a, 21.]

FRIGIDARIUM (Lat.), n. n. Fri^{2}j(fri^{2}g)-i^{2}d-a(a^3)'ri^2-u^{3}m(u^{4}m). From *frigidarius,* for cooling. See under *Roman* BATH.

FRIGIDITY, n. Fri^2-ji^{2}d'i^2-ti^2. Gr., ψυχρότης. Lat., *frigiditas.* Fr., *frigidité.* Ger., *Kälte.* It., *frigidità.* Sp., *frialdad.* 1. Coldness. 2. Apathy, want of sexual appetite or power.—**F. of the stomach.** Lat., *frigiditas stomachi.* Fr., *frigidité de l'estomac.* See ANOREXIA *exhaustorum.*

FRIGIDUS (Lat.), adj. Fri^{2}j(fri^{2}g)'i^{2}d-u^{3}s(u^{4}s). From *frigere,* to be cold. 1. See FRIGID. 2. Of plants, growing in the frigid regions of the globe. [B, 1 (a, 24).]

FRIGORIC, FRIGORIFACIENT, adj's. Fri^{2}g-o^{2}r'i^{2}k, -o^{2}r-i^2-fa'si^2-e^{2}nt. See FRIGORIFIC.

FRIGORIFIC, adj. Fri^{2}g-o^{2}r-i^{2}f'i^{2}k. Lat., *frigorificus* (from *frigus,* cold, and *facere,* to make). Fr., *frigorifique.* Ger., *kältend, Kälte erzeugend.* It., *frigorifico.* Sp., *frigorífico.* Having power to make cold, especially to cause freezing. [L, 107.]

FRIGORIGÉNINE (Fr.), n. Fre-go-re-zha-nen. Syn.: *algogénine.* Of Roussy, a soluble chemical compound prepared from fermented animal matter; said to have extraordinary antipyretic powers. ["N. Y. Med. Jour.," Apr. 20, 1889, p. 431.]

FRIGOULE, n. In Languedoc, the *Thymus vulgaris* and the *Agaricus socialis.* [B, 121, 173 (a, 24).]

FRIGUS (Lat.), n. n. Frig(fri^{2}g)'u^{3}s(u^{4}s). Gen., *fri'goris.* Gr., ῥῖγος. 1. Cold. 2. A chill or chilling.—**F. febrium.** Ger., *Fieberfrost.* The chill of a fever. [L, 80.]

FRIJOL, n. In Mexico and South America, the *Dolichos Jacquini.* [B, 121 (a, 24).]

FRIJOLILLO (Sp.), n. Fre-ho-lel'yo. In Cuba, the *Lonchocarpus latifolius.* [B, 121 (a, 24).]

FRIJOLITO (Sp.), n. Fre-ho-le'to. In Cuba, the *Dolichos lunatus.* [B, 121 (a, 24).]

FRIKTION (Ger.), n. Fri^{2}k-tse-on'. See FRICTION.

FRILEUX (Fr.), adj. Fre-lu^5. See CHILLY.

FRILURE (Fr.), n. Fre-lu^{6}r. See CHILBLAIN.

FRINA (Ar.), n. See *Aleppo* BOIL.

FRINGALE (Fr.), n. Fra^{2}n^2-ga^{3}l. See BULIMIA.

FRINGE, n. Fri^{2}nj. Lat., *fimbria.* Fr., *frange.* Ger., *Franse.* It., *frangia.* Sp., *franja.* 1. An irregular or filamentous border; a marginal membrane; a marginal row of feathers; in botany, a fimbria. [L, 343; a, 17; a, 24.]—**F.-flower, F.-tree.** See CHIONANTHUS *virginica.*—**F.-pod.** The *Thysanocarpus lacinatus.* [B, 275 (a, 24).]—**Haversian f's of a synovial membrane.** See *Synovial f's.*—**Mountain f.** The genus *Adlumia.* [B, 34 (a, 24).]—**Notched f.-flower.** The *Schizanthus retusus.* [B, 275 (a, 24).]—**Synovial f's.** Highly vascular f.-like processes projecting from a synovial membrane into the cavity of a joint. They consist of connective tissue covered with epithelium, and contain some fat-cells and sometimes isolated cartilage-cells. They were formerly regarded as glandular structures secreting the synovia. [L, 13, 47, 172.]—**Water-f.** The *Limnanthemum* (*Villarsia*) *nymphœoides.*

FRINGED, adj. Fri^{2}njd. See FIMBRIATE.

FRINGILLA (Lat.), n. f. Fri^{2}n(fri^{2}n^2)-ji^{2}l(gi^{2}l)'a^3. Fr., *fringille.* 1. Of the ancients, a small bird, perhaps the robin redbreast. [A, 312 (a, 21).] 2. The typical genus of the conirostrate *Passeres.* The fringillaceous birds (*Fringillidæ* [Fr., *fringillidées*]) are a family of the *Oscines,* having a short, conical beak, without a notch, but with a basal swelling. [A, 385; L, 221.]—**F. cœleps.** Ger., *Edelfink, Gartenfink, Buchfink.* A species the flesh of which was employed as a remedy against epilepsy. [B, 180.]—**F. canaria.** Ger., *Canarienvogel.* The canary; a species now usually referred to the genus *Canaria.* Formerly employed in epilepsy. [B, 180.]—**F. carduelis.** The finch. [B. 180.] See CARDUELIS.—**F. chloris.** See LOXIA *chloris.*—**F. citrinella.** The yellow finch. [B, 180.] See CITRINELLA.—**F. domestica.** The sparrow; the flesh was formerly used as an aphrodisiac and remedy for epilepsy; the excrement as a cosmetic, a laxative, and a remedy against falling out of the hair. [B, 180.]

FRISCHENTBUNDENE (Ger.), n. Fri^{2}sh'e^{2}nt-bund-e^{2}n-e^2. See PUERPERA.

FRISOL MENUDO (Sp.), n. Fre-sol'ma-nu'do. The *Phaseolus mungo.* [B, 121 (a, 24).]

FRISSON (Fr.), n. Fres-so^{2}n^2. From *frigere,* to be cold. See CHILL.

FRISSONNEMENT (Fr.), n. Fres-so^{2}n-ma^{3}n^2. See CUTIS *anserina.*

FRITILLAIRE (Fr.), n. Fre-tel-ye^{2}r. See FRITILLARIA.—**F. pintade.** See FRITILLARIA *meleagris.*

FRITILLARIA (Lat.), n. f. Fri^{2}t-i^{2}l-la(la^3)'ri^2-a^3. Fr., *fritillaire.* Ger., *Schachblume.* Of Tournefort, a genus of liliaceous herbs. [B, 34, 121 (a, 24).]—**F. (coronaria) imperialis.** Fr., *fritillaire* (ou *couronne*) *impérial, impériale.* Ger., *Kaiserkrone.* The crown imperial; a species found in Persia and cultivated in gardens. The bulb, *radix coronæ imperialis,* is very acrid and even poisonous, and is employed in France in the manufacture of starch. The nectar of the flower is said to be emetic. The plant yields an alkaloid termed *imperialine.* [B, 34, 173, 180 (a, 24); "Proc. of the Am. Pharm. Assoc.," xxi (a, 14); "Nouv. rem.," Feb. 8, 1889, p. 71.]—**F. lanceolata.** The *Lilium camscatcense.* [B, 173 (a, 24).]—**F. meleagris.** Fr., *fritillaire pintade, clochette, cocane, coccigrolle, damier, gorgonne, pique, tulipe des près.* Ger., *Kibitzei.* The checkered daffodil (tulip. or lily); a species having the same properties as *F. imperialis.* [B, 19, 173, 275 (a, 24).]—**F. Thunbergii.** A species growing in Japan, where it is known as *baimo.* The bulb, of about the size of a hazel-nut, is very rich in starch. [a, 24.]

FRITTE (Fr.), n. Fret. Slight calcination. [A, 385.]

FROCCUP, n. Fro^{2}k'ku^{3}p. The *Fritillaria meleagris.* [A, 505 (a, 21).]

FROG, n. Fro^{2}g. A.-S., *frogga* (1st def.). Gr., βάτραχος (1st def.). Lat., *rana* (1st def.). Fr., *grenouille* (1st def.), *fourchette* (2d def.). Ger., *Frosch* (1st def.), *Strahl* (2d def.). 1. An animal of the genus *Rana.* 2. A sort of horny bifurcation on the inferior surface of a horse's hoof. [A, 301.] 3. See APHTHÆ.—**American f.-bit.** The *Limnobium spongia.* [B, 275 (a, 24).]—**Eatable f., Edible f.** See RANA *esculenta.*—**F.-bit.** Fr., *grenouillette, morène.* The *Hydrocharis morsus ranæ.* [A. 505 (a, 21).]—**F.-cheese.** 1. The puff-ball (*Lycoperdon bovista*). 2. The *Malva silvestris.* 3. A term for various species of *Boletus* growing on decayed wood. [A, 505 (a, 21); B, 275 (a, 24).]—**F.-flower.** The genus *Ranunculus.* [B, 275 (a, 24).]—**F's-foot.** The genus *Lemna.* [A, 505 (a, 21).]—**F'sate, F.-seat.** A toadstool. [A, 505 (a, 21).]—**F.-spawn.** Fr., *frai de grenouille.* Ger., *Froschlaich.* The spawn of the f.; formerly used as a collyrium. [A, 518.]—**F.-stools.** See TOADSTOOLS.—**F.-tongue.** See RANULA.—**F'wort.** 1. The *Orchis mascula, Orchis morio,* and other species of *Orchis.* [A, 505 (a, 21).] 2. The *Ranunculus hederaceus.* [B, 275 (a, 24).]—**Galvanoscopic f.** See *Physiological* RHEOSCOPE.—**Gibbous f.** See RANA *esculenta.*—**Rheoscopic f.** See *Physiological* RHEOSCOPE.

FROHNLEITEN (Ger.), n. Fron'lit-e^{2}n. A place in Styria, Austria-Hungary, where there is a water-cure establishment. [A, 319 (a, 21).]

FROID (Fr.), adj. and n. Frwa^3. See COLD.

FROIDURE (Fr.), n. Frwa^3-du^{6}r. A chilling. [A, 518.]

FROISSEMENT (Fr.), n. Frwa^{3}s-ma^{3}n^2. From *frendere,* to gnash, to crush to pieces. 1. Friction; a râle, or friction sound. 2. A bruising. 3. In surgery, forcible compression of an artery. [L, 41 (a, 14).]—**Bruit de f., F. pulmonaire.** See FRICTION-SOUND.

FRÔLE (Fr.), n. Frol. The *Arbutus unedo.* [B, 121 (a, 24).]

FRÔLEMENT (Fr.), n. Frol-ma^{3}n^2. Slight friction, also the sound produced by it. [A, 385.]—**F. hydatique.** See *Hydatid* THRILL.—**F. péricardique.** A pericarditic friction-sound. [L, 41 (a, 14).]—**F. pleural.** A pleuritic friction-sound. [L, 88.]

FROMAGE (Fr.), n. Fro-ma^{3}zh. See CHEESE.

FROMAGEON (Fr.), n. Fro-ma^3-zho^{2}n^2. The *Malva silvestris.* [B, 121, 173 (a, 24).]

FROMAGER (Fr.), n. Fro-ma^3-zha. The genus *Bombax.* [B, 121 (a, 24).]—**F. ceiba.** See ERIODENDRON *anfractuosum.*—**F. cotonneux.** The *Bombax conyza.* [B, 173 (a, 24).]—**F. de Buonopozo.** The *Bombax buonopozense.* [B, 173 (a. 24).]—**F. de Malabar.** The *Bombax malabaricum.* [B, 173 (a. 24).]—**F. pentandre.** See ERIODENDRON *occidentale.*—**F. renflé.** The *Bombax ventricosum.* [B, 173 (a, 24).]

FROMAGÈRE (Fr.), n. Fro-ma^3-zhe^{3}r. The *Malva rotundifolia.* [B, 121 (*a*, 24).]

FROMENT (Fr.), n. Fro-ma^{3}n^2. See TRITICUM.—**Amidon de f.** Wheat starch. [B.]—**Farine de f.** Wheat flour. [*a*, 14.]—**F. barbu.** The *Hordeum zeocriton.* [B, 121, 173 (*a*, 24).]—**F. corné.** The *Triticum durum.* [B, 173 (*a*, 24).]—**F. cultivé.** The *Triticum sativum.* [B, 173 (*a*, 24).]—**F. de Pologne.** The *Triticum polonicum.* [B, 173 (*a*, 24).]—**F. des Indes.** The *Zea mais.* [B, 121, 173 (*a*, 24).]—**F. des vaches.** The *Melampyrum arvense.* [B, 173 (*a*, 24).]—**F. d'été.** The *Triticum æstivum.* [B, 173 (*a*, 24).]—**F. d'hiver.** The *Triticum hibernum.* [B, 173 (*a*, 24).]—**F. faux.** The *Avena elatior.* [B, 121, 173 (*a*, 24).]—**F. monocoque.** The *Triticum monococcum.* [B, 173 (*a*, 24).]—**F. rameux.** The *Triticum compositum.* [B, 173 (*a*, 24).]—**F. rampant.** The *Triticum repens.* [B, 173 (*a*, 24).]—**F. renflé.** The *Triticum turgidum.* [B, 173 (*a*, 24).]—**F. rouge.** The *Triticum spelta.* [B, 121, 173 (*a*, 24).]—**F. zéa.** The *Triticum zea.* [B, 173 (*a*, 24).]

FROMENTAL (Fr.), n. Fro-ma^{3}n^2-ta^{3}l. From *frumentum*, grain. The *Avena elatior.* [B, 121, 173 (*a*, 24).]—**F. d'Angleterre.** The *Lolium perenne.* [B, 121, 173 (*a*, 24).]—**Petit f.** See TRISETUM *flavescens.*

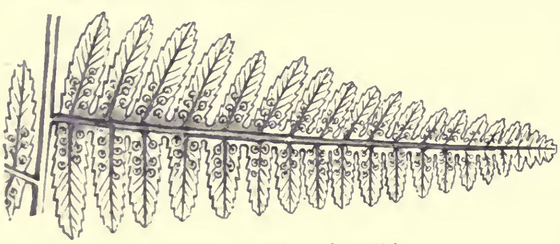
FROMENTAU (Fr.), n. Fro-ma^{3}n^2-to. The *Phalaris arundinacea.* [B, 173 (*a*, 24).]

FROMENTÉ (Fr.), adj. Fro-ma^{3}n^2-ta. Having the color of grains of wheat. [A, 385.]

FROMENTEAU (Fr.), n. Fro-ma^{3}n^2-to. An old name for the genus *Rubus.* [B, 121 (*a*, 24).]

FROMENTEL (Fr.), n. Fro-ma^{3}n^2-te^{2}l. See FROMENTAL.

FRONCE (Fr.), n. Fro^{2}n^{2}s. A furrow due to corrugation. [A, 385.]



FRONCÉ (Fr.), adj. Fro^{2}n^2-sa. Corrugated. [A, 385.]

FRONCEMENT (Fr.), n. Fro^{2}n^{2}s-ma^{3}n^2. See CORRUGATION.

FRONCIS (Fr.), n. Fro^{2}n^2-se. See FRONCE.

FRONCLE (Fr.), n. Fro^{2}n^{2}k'l. See FURUNCLE.

FROND, n. Fro^{2}nd. Gr., σφενδόνη. Lat., *frons.* Fr., *fronde.* Ger., *Laub, Wedel.* It., Sp., *fronda.* 1. A thallus, a combination of leaf and stem, as in many algals; also the leaf-bearing reproductive bodies, such as that of dorsiferous ferns. 2. Of Linnæus, a palm-leaf. [B, 1, 19, 123 (*a*, 24).]

A FROND (1ST DEF.). [A, 442.]

FRONDACÉ (Fr.), adj. Fro^{2}n^2-da^3-sa. Frond-like. [A, 385.]

FRONDAISON (Fr.), n. Fro^{2}n^2-de^2-zo^{2}n^2. From *frons*, a leafy branch. 1. The time of sprouting of leaves. 2. The entire leafage of a tree. [B, 38 (*a*, 14).]

FRONDATION, n. Fro^{2}n-da'shu^{3}n. Lat., *frondatio* (from *frons*, a branch). The pruning of trees. [*a*, 24.]

FRONDE (Fr.), n. Fro^{2}n^{2}d. 1. See FROND. 2. A four-tailed bandage. [A. 385.]—**F. du menton.** A four-tailed bandage for fracture of the jaw. [E.]

FRONDESCENCE, n. Fro^{2}n^2-de^{2}s'e^{2}ns. Lat., *frondescentia* (from *frondescere*, to become leafy). Fr., *frondescence, feuillaison.* Ger., *Belaubung.* See FOLIATION.

FRONDICOLE (Fr.), adj. Fro^{2}n^2'di^2-kol. From *frons*, a leafy branch, and *colere*, to inhabit. Growing upon leaves. [L, 41.]

FRONDICULÉ (Fr.), adj. Fro^{2}n^2-de-ku^6-la. From *frons*, a leafy branch. Branched; formed like the branch of a tree (said of zoophytes). [L, 41.]

FRONDIFEROUS, adj. Fro^{2}n-di^{2}f'e^{2}r-u^{3}s. From *frons*, a leafy branch, and *ferre*, to bear. Fr., *frondifère, frondipare.* 1. Leaf-bearing (said of full-grown ferns). [B, 121 (*a*, 24).] Cf. FRONDIPAROUS.

FRONDIFLORE (Fr.), adj. Fro^{2}n^2-de-flor. From *frons*, a leafy branch, and *flos*, a flower. Bearing, or seeming to bear, flowers upon the leaves. [B, 121 (*a*, 24).]

FRONDIFORM, adj. Fro^{2}n'di^2-fo^{2}rm. From *frons*, a leafy branch, and *forma*, form. Fr., *frondiforme.* Having the appearance of a leaf (said of zoophytes). [L, 41.]

FRONDIGEROUS, adj. From *frons*, a leafy branch, and *gerere*, to bear. See FRONDIFEROUS.

FRONDIPAROUS, adj. Fro^{2}n-di^{2}p'a^{3}r-u^{3}s. From *frons*, a leafy branch, and *parere*, to bring forth. Fr., *frondipare.* Producing leaves (said of fruit in which leaves are abnormally produced from the upper part). [B, 19, 77 (*a*, 24).]

FRONDOSE, FRONDOUS, adj's. Fro^{2}nd'os, -u^{3}s. Lat., *frondosus* (from *frons*, a leafy bough). Fr., *feuillé.* Ger., *laubartig.* It., Sp., *frondoso.* Thalloid; like a thallus; abounding in leaves. The *Frondosæ* are: Of Nees, a subtribe (of Endlicher, a tribe) of the *Jungermannieæ.* [B, 19, 170, 291 (*a*, 24).]

FRONDULA (Lat.), n. f. Fro^{2}nd'u^{2}l(u^{4}l)-a^3. Dim. of *frons*, a leafy bough. Fr., *frondule.* The assemblage of leaves in mosses. [B, 1, 121 (*a*, 24).]

FRONS (Lat.), n. f. Fro^{2}nz(fro^{2}ns). Gen., *frond'is* (1st def.), *front'is* (2d def.). 1. See FROND. 2. See FOREHEAD.—**F. quadrata.** The square and prominent forehead of rhachitic persons. [A, 326 (*a*, 21).]

FRONT, n. Fru^{3}nt. From *frons*, the forehead. Fr., *f.* Ger., *Stirn.* It., *fronte.* Sp., *frente.* The forehead.

FRONTAL, adj. Fru^{3}nt'a^{2}l. Lat., *frontalis* (from *frons*, the forehead). Fr., *f.* Ger., *f.* It., *frontale.* Sp., *f.* Pertaining to, or situated on, the forehead; as a n., see FRONTALE.

FRONTALE (Lat.), n., n. of adj. *frontalis.* Fro^{2}nt-a(a^3)'le(la). 1. (*Remedium* understood) a medicinal application for the forehead. 2. (*Os* understood) the frontal bone. [L, 87, 105 (*a*, 14).]

FRONTALIS (Lat.), adj. and n. Fro^{2}n-ta(ta^3)'li^{2}s. From *frons*, the forehead. Fr., *muscle frontal* (2d def.), *fronto-sourcillier* (2d def.). Ger., *Stirnmuskel* (2d def.). 1. (Adj.) see FRONTAL. 2. (N.) the frontal portion of the occipito-f. muscle. [L.]—**F. et occipitalis.** See OCCIPITO-F.

FRONTATED, adj. Fru^{3}nt'at-e^{2}d. Lat., *frontatus.* Broadened gradually and terminating in a right line instead of being cuspidated, or pointed (said of leaves). [*a*, 24.]

FRONTEN, adj. Fru^{3}nt'e^{2}n. Relating to, or connected with, the frontal aspect, or frontal bones. [L, 141.]

FRONTICORNIS (Lat.), adj. Fro^{2}n-ti^2-ko^{2}rn'i^{2}s. From *frons*, the forehead, and *cornu*, a horn. Fr., *fronticorne.* Ger., *stirnhörnig.* 1. Having horns upon the forehead. 2. Of fishes, having a sort of horn upon the back part of the head. [L, 41.]

FRONTIROSTRIS (Lat.), adj. Fro^{2}n-ti^2-ro^{2}s(ros)'tri^{2}s. From *frons*, the forehead, and *rostrum*, a beak. Fr., *frontirostre.* Ger., *stirnschnabelig.* Having the beak growing from the forehead; as a n. in the m. pl., *Frontirostres*, a family of the *Hemiptera* so characterized. [L, 41, 203.]

FRONTO-ALVEOLAR, adj. Fru^{3}nt''o-a^{2}l-ve'o-la^{3}r. Pertaining to, or connected with, the frontal and alveolar regions. [L.]

FRONTO-ANTERIOR (Lat.), adj. Fru^{3}n'to-a^{2}n-te'ri^2-o^{2}r. From *frons*, the forehead, and *anterior*, that is before. Fr., *fronto-antérieur.* See OCCIPITO-POSTERIOR.

FRONTO-AURICULAR, adj. Fru^{3}n''to-a^{4}r-i^{2}k'u^2-la^{3}r. From *frons*, the forehead, and *auris*, the ear. Pertaining to the forehead and to the external ear.

FRONTO-CEREBELLAR, adj. Fru^{3}nt''o-se^{2}r-e^2-be^{2}l'a^{3}r. Situated between the cerebellum and the cortex of the frontal region of the cerebrum (applied to fibre trails). [I.]

FRONTO-CONCHIEN (Fr.), adj. Fro^{2}n^2-to-ko^{2}n^2-she-a^{2}n^2. For deriv., see FRONS and CONCHA. See FRONTO-AURICULAR.

FRONTO-COTYLOID, adj. Fru^{3}nt-o-ko^{2}t'i^{2}l-oid. Having the forehead in relation with the acetabulum. See *F.-c.* PRESENTATION.

FRONTODYMIA (Lat.), n. f. Fro^{2}nt-o(o^3)-di^{2}m(du^{6}m)'i^2-a^3. From *frons*, the forehead, and δύμεναι, to mingle with. See CEPHALOPAGY.

FRONTO-ETHMOID, FRONTO-ETHMOIDAL, adj's. Fru^{3}n''to-e^{2}th'moid, -e^{2}th-moid'a^{2}l. From *frons*, the forehead, and ἠθμοειδής, like a sieve. Fr., *fronto-ethmoïdal.* Pertaining to the ethmoid and frontal bones. [L, 41.]

FRONTO-GLABELLAR, adj. Fru^{3}nt-o-gla^{2}b-e^{2}l'a^{3}r. Pertaining to the forehead and to the glabella. See *F.-g.* ANGLE.

FRONTO-GONIAL, adj. Fru^{3}nt''o-gon'i^2-a^{2}l. Pertaining to or connected with the gonia and the frontal region. [L.]

FRONTO-LABIALIS (Lat.), n. f. Fro^{2}n''to(to^3)-lab(la^{3}b)-i^2-al(a^{3}l)' i^{2}s. See SUPERNASO-LABIALIS.

FRONTO-LACRYMAL (Fr.), adj. Fro^{2}n^2-to-la^3-kre-ma^{3}l. From *frons*, the forehead, and *lacrima*, a tear. Belonging to the forehead and to the lacrymal bone. [L, 41.]

FRONTO-LATERAL, adj. Fru^{3}nt''o-la^{2}t'e^{2}r-a^{2}l. Pertaining to the front and to the sides. [*a*, 30.]

FRONTO-MALAR, adj. Fru^{3}n''to-ma'la^{3}r. From *frons*, the forehead, and *mala*, the cheek-bone. Pertaining to the frontal and to the malar bones.

FRONTO-MARGINAL, adj. Fru^{3}nt''o-ma^{3}rj'i^{2}n-a^{2}l. Situated between the frontal margin of the hemicerebrum and the calloso-marginal fissure (applied by Wilder to an inconstant fissure). [I, 98.]

FRONTO-MAXILLARY, adj. Fru^{3}n''to-ma^{2}x'i^{2}l-a-ri^2. For deriv., see FRONS and MAXILLA. Pertaining to the frontal and to the superior maxillary bones.

FRONTO-MENTAL, adj. Fru^{3}nt''o-me^{2}nt'a^{2}l. From *frons*, the forehead, and *mentum*, the chin. Fr., *fronto-mentonnier.* Extending from the top of the forehead to the point of the chin, or pertaining to those regions. [L, 41.] See *F.-m.* DIAMETER.

FRONTO-NASAL, adj. Fru^{3}n''to-na'sa^{2}l. From *frons*, the forehead, and *nasus*, the nose. Fr., *f.-n.* Pertaining to the frontal bone and to the nose; as a n., of Chaussier, the pyramidalis nasi muscle. [L.]

FRONTO-NASO-MAXILLARY, adj. Fru^{3}n''to-na'''so-ma^{2}x'-i^{2}l-a-ri^2. From *frons*, the forehead, *nasus*, the nose, and *maxilla*, the jaw-bone. Relating to the frontal, nasal, and maxillary bones. [L, 221.]

FRONTO-NUCHAL, adj. Fru^{3}n''to-nu^2'ka^{2}l. Pertaining to the forehead and to the nucha.

FRONTO-ORBITAL, adj. Fru^{3}nt''o-o^{2}rb'i^{2}t-a^{2}l. From *frons*, the forehead, and *orbita*, the orbit. Pertaining to the forehead and to the orbit.

FRONTO-PARIETAL, adj. Fru^{3}n''to-pa-ri'e-ta^{2}l. Lat., *frontoparietalis* (from *frons*, the forehead, and *paries*, a wall). Fr., *fronto-pariétal*. Pertaining to the frontal and to the parietal bones or regions.

FRONTO-POSTERIOR, adj. Fru^{3}nt''o-pos-te'ri^2-o^{2}r. Fr., *fronto-postérieur*. See Occipito-anterior.

FRONTO-SOURCILIER (Fr.), n. Fro^{2}n^2-to-sur-se-le-a. From *frons*, the forehead, and *cilium*, an eyelash. See Corrugator *supercilii* and Frontalis (2d def.).

FRONTO-SPHENOIDAL, adj. Fru^{3}nt''o-sfe-noid'a^{2}l. From *frons*, the forehead, and σφηνοειδής, wedge-shaped. Fr., *fronto-sphénoïdal*. Pertaining to the frontal and to the sphenoid bones.

FRONTO-TEMPORAL, adj. Fru^{3}nt''o-te^{2}mp'o^{2}r-a^{2}l. From *frons*, the forehead, and *tempora*, the temples. Fr., *f.-t.* Pertaining to the frontal and to the temporal bones.

FRONTO-ZYGOMATIC, adj. Fru^{3}nt''o-zi^{2}g-o-ma^{2}t'i^{2}k. Pertaining to the zygomatic and frontal regions. [L.]

FROSCH (Ger.), n. Frosh. See Frog (1st def.) and Ranula.—**F'ähnlich.** See Batrachoid.—**F'biss.** See the major list.—**F'brühe.** See *Jus* ranarum (under Rana).—**F'distel.** The *Silybum marianum.* [L, 80.]—**F'distelsamen.** The fruit of *Silybum marianum.* [B, 180 (α, 24).]—**F'eppig.** The *Ranunculus sceleratus.* [B, 180 (α, 24).]—**F'köpfig.** See Batrachocephalus.—**F'kraut.** See *Ranunculus aquaticus.* [B, 121 (α, 24).]—**F'laich.** See the major list.—**F'löffel.** See the major list.—**F'ölsäure.** See Batracholeic acid.—**F'pfeffer.** The *Ranunculus sceleratus.* [B, 180 (α, 24).]—**F'präparat.** Lit., frog-preparation. See *Physiological* rheoscope.—**Grüner F.** The *Rana esculenta.* [B, 180.]—**Stromprüfender F'schenkel.** Lit., current-testing frog's leg. [K.] See *Physiological* rheoscope.

FROSCHBISS (Ger.), n. Frosh'bi^{2}s. The genus *Hydrocharis.* [B, 180 (α, 24).]—**Gemeiner F.** The *Hydrocharis morsus ranæ.* [B, 180 (α, 24).]

FROSCHLAICH (Ger.), n. Frosh'la^3-ech^2. Frog's spawn. [B, 180.]—**F'pflaster.** See *Emplastrum de spermate* ranarum (under Rana).

FROSCHLÖFFEL (Ger.), n. Frosh'lu^{5}f-e^{2}l. The genus *Alisma.* [B, 121, 180 (α, 24).]—**F'artig.** See Alismaceous.—**F'pflanzen.** See Alismaceæ.—**Gemeiner F., Grosser F.** See Alisma *plantago.*

FRÖSCHLEIN (Ger.), n. Fru^{5}sh'lin. See Ranula.

FROST, n. Fro^{2}st. A.-S., *forst, f.* Gr., ῥῖγος. Lat., *gelu.* Fr., *gelée.* Ger., *F.* It., *gelo.* Sp., *helada.* 1. A feathery frozen deposit of atmospheric moisture. 2. A freezing temperature.—**F.-bearer.** See Cryophorus.—**F'bite.** See Congelatio (3d def.) and Congelation (2d def.).—**F.-blite.** The *Chenopodium album.* [B, 275 (α, 24).]—**F.-plant.** The *Helianthemum canadense.* [B, 34 (α, 24).]—**F.-weed.** The *Helianthemum canadense* and the *Erigeron philadelphicus.* [B, 275 (α, 24).]—**F.-wort.** The *Helianthemum canadense.* [B, 5 (α, 24).]

FROST (Ger.), n. Frost. 1. See Frost (Eng.). 2. See Chill.—**Fieberf'.** See Frigus *febrium.*—**F'anfall.** A chill, an attack of shivering. [A, 521.]—**F'ballen.** See Chilblain.—**F'beule.** See Chilblain.—**F'ig.** See Algid.—**F'schaden.** See Congelation (2d def.).—**F'schauder.** Horripilation. [L, 43.]—**Schüttelf'.** See Chill.

FRÖSTELN (Ger.), n. Fru^{3}st'e^{2}ln. See Chill and Rigor.

FRÖSTELND (Ger.), adj. Fru^{5}st'e^{2}lnd. See Chilly.

FROTH, n. Fro^{2}th. Gr., ἀφρός. Lat., *spuma.* Fr., *écume.* Ger., *Schaum.* It., *schiuma, spuma.* Sp., *espuma.* Foam ; a collection of fine bubbles.

FROTHY, adj. Fro^{2}th'i^2. Gr., ἀφρώδης. Lat., *spumosus.* Fr., *écumeux, mousseux.* Ger., *schäumig.* Consisting of, containing, or resembling froth.

FROTTEMENT (Fr.), n. Frot-ma^{3}n^2. See Friction and Friction-sound.

FROTTIRUNG (Ger.), n. Fro^{2}t-ter'un^2. See Friction.

FROTTOIR (Fr.), n. Fro^{3}t-wa^{3}r. An instrument for making friction. [A, 385.]

FROZEN, adj. Froz'n. Lat., *congelatus.* Fr., *gelé.* Ger., *gefrieren.* Solidified by cold.

FRUCHIÈRE (Fr.), n. Fru^6-she-e^{2}r. The *Pteris aquilina.* [B, 121 (α, 24).]

FRUCHT (Ger.), n. Fruch^{2}t. 1. See Fruit. 2. See Fœtus.—**Abgang der f.** See Abortion and Miscarriage.—**Becherf'.** See Calybio.—**Beerenf'.** A baccate fruit ; a berry. [α, 24.]—**Bläschenförmige F.** Of Reichert, the vesicular ovum.—**Blüthenf'.** See Amphanthium.—**Einfach pseudokarpische F.** See Diclesium.—**Falsche F.** See *Spurious* fruit.—**Falsches F'wasser.** See Allantoic *fluid.*—**F'abtreibend.** Abortifacient, ecbolic.—**F'abtreibungsmittel.** An abortifacient, especially with the idea of criminality.—**F'alter.** The age of a fœtus (*i. e.*, the degree of its development).—**F'anlage.** 1. The rudiment of a fœtus. 2. A fœtus. [A, 85.]—**F'artig.** See Fructuarius.—**F'äther.** A factitious chemical compound having an aroma like that of fruit, and used, instead of the latter, in aromatizing mixtures. [B, 270.]—**F. aus Indien.** The fruit of *Pimenta aromatica.* [B, 180 (α, 24).]—**F'bar.** See Fecund.—**F'barkeit.** See Fertility.—**F'bewegung.** See *Fœtal* movement.—**F'bildung.** See Fructification.—**F'blase.** See Bag *of waters.*—**F'blasensprung.** Rupture of the fœtal membranes. [A, 521.]—**F'blatt.** See Carpel and Folium *carpicum.*—**F'boden.** 1. In botany, the receptacle. 2. The part to which a fœtal sac is attached. [B, 123 (α. 24).]—**F'bodenfleischwulst.** See Sarcobasis.—**F'branntwein.** 1. Brandy distilled from fruits, such as cherries, peaches, etc. 2. See *Spiritus* frumenti.—**F'bringend.** See Carpotocos and Fructiferous.—**F'canal.** See Vagina.—**F'essenz.** See *F'äther.*—**F'essig.** 1. Vinegar made from fruits. 2. Vinegar containing fruit-juices. See *Acetum* rubi *idæi.* [B.] 3. See *Acetum* frumenti.—**F'fach.** A loculus or fruit-cell. [B, 123 (α, 24).]—**F'fleisch** (Ger.). See Sarcocarp.—**F'förmig.** See Fructiformis.—**F'fressend.** See Carpophagous and Frugivorous.—**F'gebärend.** 1. See Fructigenus. 2. See Fructiferous.—**F'gehäuse.** See Excipula.—**F'gelées.** Fruit jellies. [A, 319 (α, 21).]—**F'halter.** 1. A carpophore or a spermodium. [B, 123 (α, 24).] 2. See Uterus.—**F'haut.** See the major list.—**F'häutchen.** See Fruchthaut and Chorion.—**F'hof.** See the major list.—**F'hülle.** See Pericarp.—**F'hüllenhäutchen.** See Epicarp.—**F'hyphe.** A carpophore (*q. v.*, 2d def.) resembling an inverted hypha. [A, 396 (α, 21).]—**F'keim.** See Embryo.—**F'kern.** See Endogonium.—**F'knopfdecke.** See Epigone.—**F'knospe.** See Bud (1st def.).—**F'knoten.** The ovary. [B, 123 (α, 24).]—**F'knotenfach.** The cell of an ovary. [α, 24.]—**F'knotenhülle.** See Perigynium.—**F'knotenwulst.** See Gynobase.—**F'körper.** See Thalamium.—**F'kuchen.** See *Fœtal* placenta.—**F'lage.** The position of the fœtus in relation to the maternal structures. [A, 319 (α. 21).]—**F'lager.** See Apothecium.—**F'lehre.** See Carpology (2d def.).—**F'lese.** See Carpology (1st def.).—**F'los.** 1. Destitute of fruit. 2. Childless, barren.—**F'losigkeit.** See Sterility.—**F'mark.** See Pulp.—**F'nest.** The decidua. [A, 46.]—**F'oberhaut.** See Epicarp.—**F'presser.** See Embryothlasta.—**F'rinde.** See Epicarp.—**F'röhre.** See Pistil.—**F'saft.** See the major list.—**F'säule.** See Gynostemium.—**F'säure.** See Malic acid.—**F'schale.** See Pericarp.—**F'schleim, F'schmiere.** See Vernix *caseosa.*—**F'sporige.** See Carposporeæ.—**F'staub.** See Pollen.—**F'stein.** See Carpolith.—**F'stengel.** The pedicel of mosses. [L, 43.]—**F'stiel.** A fruit-stalk, peduncle. [L, 43, 80.]—**F'stoff.** See Embryotrophe.—**F'tragen.** See Fructification.—**F'tragend.** See Fructiferous.—**F'träger.** See Carpophore.—**F'treibend.** See Abortifacient.—**F'wasser.** See *Liquor* amnii.—**F'wolle.** See Pappus.—**F'zapfen.** See Strobile.—**F'zucker.** See Levulose.—**Gemeinf'.** See Cœnobium.—**Hängef'.** See Cremocarp.—**Leibesf'.** See Fœtus.

FRÜCHTCHEN (Ger.), n. Fru^{6}ch^{2}t'ch^{2}e^{2}n. See Carpel and Fructulus.

FRUCHTHAUT (Ger.), n. Fruch^{2}t'ha^3-u^{4}t. See Chorion.—**Aeussere F.** See Epicarp.

FRUCHTHOF (Ger.), n. Fruch^{2}t'hof. See *Embryonal* area—**Dunkler F.** See *Opaque* area.—**Durchsichtiger F., Heller F.** See *Transparent* area.

FRÜCHTIG (Ger.), adj. Fru^{6}ch^{2}t'i^{2}g. See Fructuarius and Fructiferous.

FRUCHTSAFT (Ger.), n. Fruch^{2}t'za^{3}ft. The juice of a fruit. [B.]—**Extracte aus** (oder **von**) **Fruchtsäften.** Extracts made by expressing or boiling juicy berries with hot water and, after adding sugar, evaporating the clarified juice to the consistence of an electuary or to that of honey. [Bernatzik (A. 319 [α, 21]).]

FRUCHTWASSER (Ger.), n. Fruch^{2}t'va^{3}s-e^{2}r. See *Liquor* amnii.—**Falsches F.** See Allantoic *fluid.*

FRUCTA (Port.), n. Fruk'ta^3. See Fruit.—**F. d'arara.** In Brazil, the *Johannesia princeps.* [B, 121 (α, 24).]—**F. de Arradiobo.** In Brazil, the *Cnidoscolus neglectus.* [B, 121 (α, 24).]—**F. de condessa.** In Brazil, the *Anona squamosa.* [B, 121 (α, 24).]—**F. de Pomba.** In Brazil, the *Erythroxylon anguifugum* and the *Erythroxylon tortuosum.* [B, 121 (α, 24).]—**F. do Pará.** In Brazil, the *Schmidelia edulis.* [B, 19, 121 (α, 24).]

FRUCTESCENCE, n. Fru^{3}k-te^{2}s'e^{2}ns. Lat., *fructescentia* (from *fructus*, fruit). Fr., *f.* The fruiting season ; the period of the year when fruits ripen. [L, 41, 56, 180.]

FRUCTICOLE (Fr.), adj. Fru^{6}k-te-kol. From *fructus*, a fruit, and *colere*, to inhabit. Parasitic on or in fruits. [A, 385.]

FRUCTICOSE, FRUCTICULOSE, adj's. Fru^{3}k'ti^2-kos, fru^{3}k-ti^{2}k'u^2-los. Lat., *fructiculosus* (from *fructus*, fruit). Producing abundant fruit. [L, 56.]

FRUCTIFEROUS, adj. Fru^{3}k-ti^{2}f'e^{2}r-u^{3}s. Lat., *fructifer* (from *fructus*, fruit, and *ferre*, to bear). Fr., *fructifère.* Ger., *fruchttragend, fruchtig.* Fruit-bearing. fertile. [B, 1, 123 (α, 24).]

FRUCTIFICATION, n. Fru^{3}k-ti^2-fi^2-ka'shu^{3}n. Lat., *fructificatio* (from *fructificare*, to bear fruit). Fr., *f.* Ger., *Befruchtung.* It., *fruttificazione.* Sp., *fructificación.* 1. The series of changes by which an ovule becomes developed into an independent being. 2. In botany, the production of fruits of any sort ; also the fruit itself (*e. g.*, in cryptogams). [B, 77, 291 (α, 24).]

FRUCTIFLORUS (Lat.), adj. Fru^{3}k(fru^{4}k)-ti^2-flor'u^{3}s(u^{4}s). From *fructus*, a fruit, and *flos*, a flower. Fr., *fructiflore.* Ger., *fruchtblüthig.* Of flowers, having inferior ovaries. The *Fructifloræ* are : 1. Of Gmelin, a class consisting of the *Caprifolieæ, Valerianeæ, Corneæ*, etc. 2. Of Fries, a class of monocotyledons consisting of the *Orchideæ, Narcisseæ, Naideæ*, etc. The *Fructifloria* of Dumortier is an order of the *Bitegmia*, including the *Musaceæ, Drymyrrhizeæ*, and *Orchideæ.* [B, 1, 121, 170 (α, 24).]

FRUCTIFORMIS (Lat.), adj. Fru^{3}k(fru^{4}k)-ti^2-fo^{2}rm'i^{2}s. From *fructus*, a fruit, and *forma*, form. Fr., *fructiforme.* Ger., *fruchtförmig.* Having the form or appearance of fruit. [B, 1 (α, 24).]

FRUCTIGENUS (Lat.), **FRUCTIGER** (Lat.), adj's. Fru^{3}k(fru^{4}k)-ti^{2}j(ti^{2}g)'e^{2}n-u^{3}s(u^{4}s), fru^{3}k(fru^{4}k)'ti^2-ju^{6}r(ge^{2}r). From *fructus*, a fruit, and γεννᾶν, to produce, or *gerere*, to bear. See Fructiferous.

FRUCTIPAROUS, adj. Fru^{3}k-ti^{2}p'a^{2}r-u^{3}s. From *fructus*, a fruit, and *parere*, to bring forth. See Fructiferous.

FRUCTIST, n. Fru^{3}k'ti^{2}st. Lat., *fructista* (from *fructus*, fruit). Fr., *fructiste.* A botanist who classifies plants with reference to the pericarp, the seed, or the receptacle. [L, 180.]

FRUCTO (Port.), n. Fruk'to. See FRUIT.

FRUCTOSE, n. Fru^{3}k'tos. A variety of sugar found in sweet fruits. [B.]

FRUCTUARIUS (Lat.), adj. Fru^{3}kt(fru^{4}kt)-u^2(u^4)-a(R^2)'ri^2-u^{3}s-(u^{4}s). From *fructus*, fruit. Fr., *fructuaire*. Ger., *früchtig*, *fruchtartig*. Pertaining to fruit. [L, 41, 180.]

FRUCTUATION, n. Fru^{3}k-tu^2-a'shu^{3}n. See FRUCTIFICATION.

FRUCTUEUX (Fr.), adj. Fru^{6}k-tu^6-u^6. From *fructus*, fruit. Fruitful. [L, 41.]

FRUCTULUS (Lat.), n. m. Fru^{3}kt(fru^{4}kt)'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Dim. of *fructus*. Fr., *fructule*. Ger., *Früchtchen*. One of the subdivisions of a composite fruit. [L, 41, 180.]

FRUCTUS (Lat.), n. m. Fru^{3}kt(fru^{4}kt)'u^{3}s(u^{4}s). Gen., *fruct'us*. See FRUIT.—**Decoctum fructuum pectoralium.** See *Ptisana de fructibus*.—**F. acido-dulces.** Subacid fruits. [a, 24.]—**F. canariensis.** Canary seed. [a, 24.]—**F. carminativi.** Fr., *fruits carminatives*. A mixture of equal weights of aniseed, coriander, fennel, and caraway. [L, 41 (a, 14).]—**F. exsuccus.** See *Dry* FRUIT.—**F. horæi.** Summer fruits. [a, 24.]—**F. immaturus.** 1. An unripe fruit. 2. See ABORTION (2d def.).—**F. pectorales** [Fr. Cod.]. Fr., *fruits pectoraux* [Fr. Cod.], *espèces pectorales avec les fruits* [Fr. Cod.]. Syn.: *species pectorales cum fructibus* [Ger. Ph.]. A mixture of equal parts of dried figs, dates, raisins, and jujubes. [L, 41 (a, 14).]—**F. umbilicatus.** A fruit with a depression in the centre or apex. [a, 24.]—**Ptisana de fructibus** [Fr. Cod.]. Fr., *tisane de fruits pectoraux*. Sp., *cocimiento de azufaifas pectoral*. Syn.: *decoctum fructuum pectoralium* [Sp. Ph.]. A preparation made by boiling 50 parts of *f. pectorales* in water sufficient to give 1,000 of liquid, and straining [Fr. Cod.], or 2 parts each of jujube berries, licorice-root, raisins, and leaves of *Adiantum capillus Veneris*, 4 of pearl barley, and 8 of figs in water sufficient to give 96 parts of liquid after straining [Sp. Ph.]. [B, 95, 113 (a, 14).]—**Species pectorales cum fructibus** [Ger. Ph.]. See *F. pectorales*.—**Tisana fructuum pectoralium.** See *Ptisana de fructibus*.

FRUGES (Lat.), n. f., pl. of *frux*. Fru^2(fru)'jez(gas). Fruits.

FRUGHANS, n. Fru^{4}g'a^{2}nz. The *Vaccinium myrtillus*. [A, 505 (a, 21).]

FRUGIFEROUS, adj. Fru^2-ji^{2}f'e^{2}r-u^{3}s. Fr., *frugifère*. See FRUCTIFEROUS.

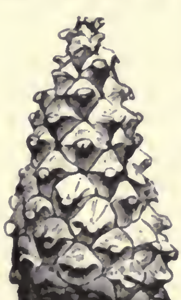
FRUGILEGUS (Lat.), adj. Fru^2(fru)-ji^2(gi^2)-leg(lag)'u^{3}s(u^{4}s). From *frux*, the produce of the fields, and *legere*, to gather. Fr., *frugilège*. Ger., *samenfressend* (2d def.). 1. Produced in the earth. 2. Living upon grains or seeds. [L, 41, 180.]

FRUGIVOROUS, adj. Fru^2-ji^{2}v'or-u^{3}s. From *frux*, the produce of the fields, and *vorare*, to devour. Fr., *frugivore*. Subsisting on fruits and seeds. The *Frugivori* (Fr., *frugivores*) of Vieillot and Bonaparte are a family of the *Passeres* so characterized. The *Frugivora* are a suborder of bats. [L, 180, 353.]

FRÜHBLUME (Ger.), n. Fru^6'blum-e^2. See ERANTHEMUM.

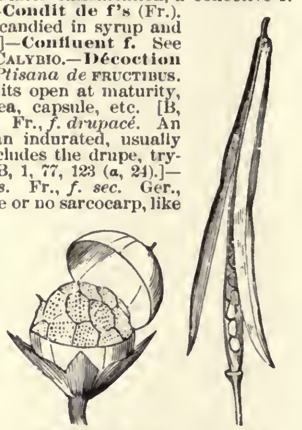
FRÜHGEBÄREN (Ger.), **FRÜHGEBURT** (Ger.), n's. Fru^6'-ge^2-bar-e^{2}n, -burt. See MISCARRIAGE and *Premature* DELIVERY.—**Künstliche Frühgeburt.** Induced premature labor.

FRÜHJAHRSCUR (Ger.), n. Fru^6'ya^{3}rs-kur. See FRÜHLINGSCUR.



FRÜHLINDE (Ger.), n. Fru^6'li^{2}nd-e^2. The *Tilia grandiflora*. [B, 121, 180 (a, 24).]

FRÜHLINGSCUR (Ger.), **FRÜHLINGSKRÄUTERCUR** (Ger.), n's. A cure conducted by the systematic administration of the fresh juices of herbs and roots during the season of spring; employed in habitual constipation and plethora. [B, 270.]



FRÜHREIFE (Ger.), n. Fru^6'rif-e^2. Precocious maturity.

FRÜHZEITIG (Ger.), adj. Fru^6'tsit-i^{2}g. Early, premature, untimely. [L, 46 (a, 21).]

FRUIT, n. Fru^{2}t. Gr., καρπός. Lat., *fructus*. Fr., *f*. Ger., *Frucht*. It., *frutto*. Sp., *fruto*, *fruta*. 1. Strictly, a botanical term for the ripened pistil or ovary with its seeds; often made to include other parts of the flower (*e. g.*, the bracts and envelopes, which are ultimately connected with the f.). 2. The parts changed by fertilization. [B, 1, 77, 123 (a, 24).]—**Accessory f's.** See ANTHOCARPOUS.—**Achænial f's.** Dry, indehiscent f's with one or few seeds, such as the achænium, utricle, samara, caryopsis, cypsela, and glans. [B, 77 (a, 24).]—**Acid f's.** F's abounding in acid; they are antiseptic, aperient, attenuant, diuretic, and refrigerant, but afford little nourishment, and are likely to produce diarrhœa and flatulence. [B, 199 (a, 21).]—**Aggregated f's.** Fr., *f's agrégés*. 1. Of De Candolle and others, see *Collective f's*. 2. Of Lindley and others, fruits in which a cluster of carpels, all produced from one flower, are crowded on the receptacle into one mass. [B, 1, 77, 123, 291 (a, 24).]—**Anthocarpous f's.** See ANTHOCARPOUS.—**Apiculate f's.** See APICULATE.—**Baccate f.** See BACCATE and BACCA.—**Bechic f's.** See FRUCTUS *pectorales*.—**Birostrate f.** Fr., *f. birostré*. Of Mirbel, a f. surmounted by two points in the form of a beak, rising from the base of the style, as in the *Gramineæ*. [B, 1 (a, 21).]—**Bread-f.** Fr., *f. au pain*. The fruit of *Artocarpus incisa*. [B, 33, 121, 180.]—**Capsulary f.** See CAPSULE.—**Carminative f's.** See FRUCTUS *carminativi*.—**Collective f.** A f. that is produced from a flower-cluster instead of a single flower (*e. g.*, sorosis, syconium, strobile, etc.). [B, 291 (a, 24).] Cf. *Compound f.* and *Multiple f.*—**Compound f.** Fr., *f. composé*. 1. Of Lindley, in his earlier classification, a f. produced from a compound ovary. 2. Of Baillon and others, following Lindley in his later classification, a collective f. [B, 1, 77, 104, 121, 291 (a, 24).]—**Condit de f's** (Fr.). Comfits consisting of fleshy f's candied in syrup and dried in an oven. [B, 92 (a, 14).]—**Confluent f.** See *Collective f.*—**Cupulate f.** See CALYBIO.—**Décoction de f's pectoraux** (Fr.). See *Ptisana de* FRUCTIBUS.—**Dehiscent f.** A f. which splits open at maturity, like the follicle, legume, cochlea, capsule, etc. [B, 104, 291 (a, 24).—**Drupaceous f.** Fr., *f. drupacé*. An indehiscent, succulent f. with an indurated, usually stony, endocarp. The term includes the drupe, tryma, pome, and nuculanium. [B, 1, 77, 123 (a, 24).]—**Dry f.** Lat., *fructus exsuccus*. Fr., *f. sec*. Ger., *saftlose Frucht*. A f. having little or no sarcocarp, like the achænial, capsulary, and schizocarpic f's. [B, 1, 77, 104, 123 (a, 24).]—**Espèces pectorales avec les f's** [Fr. Cod.] (Fr.). See FRUCTUS *pectorales*.—**False f.** Fr., *fausse f.* See PSEUDOCARP.—**Fleshy f.** Fr., *f. charnu*. A f. having the sarcocarp abundant. [A, 385.]—**Forbidden f.** Fr., *f. défendu*. The shaddock (the smallest variety of *Citrus pompelmos*). [B, 19, 180 (a, 24); Rice (a, 24).] — **F. au pain** (Fr.). See *Bread-f.*—**F's béchiques** (Fr.). See FRUCTUS *pectorales*.—**F.-bud.** A bud ultimately developing into a f. [L, 56.]—**F.-carrier.** See CARPOPHORE.—**F. charnu** (Fr.). See *Fleshy f.*—**F. composé** (Fr.). See *Compound f.*—**F. défendu** (Fr.). See *Forbidden f.*—**F. délicieux** (Fr.). The f. of *Citrus pompelmos decumanos*, var. *chadec minor*. [B, 121, 173 (a, 24).]—**F. de mer** (Fr.). See *Sea-f.*—**F's pectoraux** (Fr.). See FRUCTUS *pectorales*.—**Hydrolé de f's pectoraux** (Fr.). See *Ptisana de* FRUCTIBUS.—**Inferior f.** See INFERIOR.—**Key f.** A dry indehiscent f. growing single or in pairs. [a, 15.]—**Lomentaceous f.** See LOMENTACEOUS.—**Meat-f.** See *Bread-f.*—**Monocarpellary f.** A f. composed of a single carpel. [B.]—**Monogynœcial f's.** F's formed by the gynœcium of one flower, whether composed of one carpel (monocarpellary) or several carpels (polycarpellary), separate or coherent. [B, 77 (a, 24).]—**Multiple f.** Fr., *f. multiple*. 1. Of Baillon and others, following De Candolle, see *Aggregate f.* (2d def.). 2. Of Gray and others, following Lindley, see *Collective f.* [B, 1, 19, 104, 121, 123, 291 (a, 24).]—**Pectoral f's.** See FRUCTUS *pectorales*.—**Perfect f.** A f. in which there is no suppression of the parts which existed in the ovary. [a, 35.]—**Polycarpellary f.** A f. consisting of more than one carpel. [B.]—**Polygynœcial f.** See *Collective f.* — **Pseudocarpous f.** See PSEUDOCARP. — **Pseudo-syncarpous f.** See PSEUDO-SYNCARPOUS. — **Samara f.** See *Key f.*—**Schizocarpic f.** A dry f., breaking up into one-celled, indehiscent portions. It may be monocarpellary or polycarpellary. The term includes the lomentum, cremocarp, carcerulus, and samara. [B, 77, 291 (a, 24).]—**Sea-f.** Fr., *f. de mer*. A marine animal, other than a fish, that serves as food. [A, 385.] — **Seminoid f.** See SEMINOID. — **Simple f's.** Lat., *fructus simplices*. Fr., *f's simples*. In its strictest sense, f's produced by the ripening of a single pistil; in a wider sense, monogynœcial f's (*q. v.*). [B, 1, 77, 104, 121, 123, 291 (a, 24).]—**Spurious f.** Fr., *f. fausse*. Ger., *falsche Frucht*. See PSEUDOCARP.—**Starchy f's.** Grain. [B, 199 (a, 21).]—**Succulent f.** See SUCCULENT.—**Superior f.** See SUPERIOR.—**Sweet f's.** F's abounding in sugar; they are nutritious and laxative, but apt to disagree with delicate stomachs when taken in excess. [B, 199 (a, 21).]—**Synanthocarpous f.** See SYNANTHOCARPOUS.—**Syncarpous f.** See SYNCARPOUS.—**Tisane de f's pectoraux** [Fr. Cod.] (Fr.). See *Ptisana de* FRUCTIBUS (under FRUCTUS).

A COLLECTIVE FRUIT. [A, 442.]

A DEHISCENT FRUIT. [A, 442.]

A KEY FRUIT. [A, 442.]

FRUITPORT-WELL, n. Fru^{2}t'port-we^{2}l. A place in Ottawa County, Michigan, where there is a well the waters of which resemble those of Kreuznach, Prussia, containing sodium, calcium, and magnesium chlorides, sodium sulphate, silicates, etc. [A, 363 (a, 21).]

FRUMEN (Lat.), n. n. Fru^2(fru)'me^{2}n. Gen., *fru'minis*. From *frui*, to enjoy. An old name for the pharynx or the œsophagus. [A, 318.]

FRUMENTACEOUS, adj. Fru^2-me^{2}n-ta'shu^{3}s. Lat., *frumentaceus*, *frumentarius* (from *frumentum*, corn, grain). Fr., *frumentacé*, *frumentaire*. Ger., *getreideartig*, *getreideähnlich*. 1. Pertaining to or resembling grain. 2. Producing grain which yields flour. [B, 116, 180 (a, 14).] The *Frumentaceæ* of Dumortier are a subtribe of the *Triticeæ*. [B, 180 (a, 24).]

FRUMENTUM (Lat.), n. n. Fru^2(fru)-me^{2}nt'u^{3}m(u^{4}m). From *frui*, to enjoy. Corn, grain; in the pl., *frumenta*, the small seeds or grains of figs. [A, 312 (a, 21).]—**F. barbatum.** Fr., *froment barbu*. The *Hordeum zeocritum*. [B, 121, 173 (a, 24).]—**F. corniculatum.** Fr., *froment corné*. The *Triticum durum*. [B, 173

(a, 24).]—**F. indicum.** See *F. turcicum.*—**F. saracenicum.** See Buckwheat.—**F. turcicum.** Fr., *blé de Turquie.* The *Zea mais.* [B, 14, 173 (a, 24).]—**Furfur frumenti.** The bran of *Secale cereale.* [B, 180 (a, 24).]—**Spiritus frumenti** [U. S. Ph.], **Spiritus vinosus frumenti.** Ger., *Kornbranntwein.* Whisky. [B.]

FRUSH, n. Fru^{3}sh. See Frog (2d def.).

FRUSTE (Fr.), adj. Fru^{6}st. Abortive (in the sense of incomplete or anomalous).

FRUSTRANEOUS, adj. Fru^{3}s-tran'e-u^{3}s. Lat., *frustraneus* (from *frustra*, in vain). Fr., *frustrané.* Vain, useless, without effects (applied as a specific term by Linnæus to an order [*Polygamia*] of the *Syngenesiæ*, characterized by hermaphrodite flowers in the disc and neutral flowers at the circumference [which are rendered useless by the absence of stigmas]). [B, 1 (a, 24).]

FRUSTRATOIRE (Fr.), n. Fru^{6}s-tra^3-twa^{3}r. From *frustrare*, to deceive. A sweetened or aromatic drink given to aid a patient in enduring abstinence from food. [A, 301.]

FRUSTULATUS (Lat.), adj. Fru^{3}s(fru^{4}s)-tu^{2}l(tu^{4}l)-at(a^{3}t)'u^{3}s-(u^{4}s). From *frustulum*, a small piece. Fr., *frustulé.* See Frustulose.

FRUSTULE, n. Fru^{3}s'tu^{2}l. Lat., *frustulum* (from *frustum*, a piece). Fr., *f.* Ger., *Frustel.* A fragment; one of the joints or free segments into which diatoms separate. [B, 77, 121 (a, 24).—**Free f's.** Diatoms not united to others by a gelatinous chain or joint. [L, 193 (a, 24).]

FRUSTULOSE, adj. Fru^{3}s'tu^{2}l-os. Fr., *frustuleux.* From *frustulum*, a small piece. Fragmentary; consisting of small fragments. [B, 19 (a, 24).]

FRUSTULUM (Lat.), n. n. Fru^{3}st(fru^{4}st)-u^{2}l(u^{4}l)-u^{3}m(u^{4}m). See Frustule.

FRUTA (Sp.), n. Fru'ta^3. See Fruit.—**F. de burro.** On the Orinoco, the *Unona xylopioides.* [B, 121 (a, 24).]—**F. del machin.** The *Garcinia morella.* [B, 121 (a, 24).]—**F. estrellada.** The *Dillenia speciosa.* [B, 121 (a, 24).]

FRUTESCENCE, n. Fru^{2}t-e^{2}s'e^{2}ns. From *frutex*, a shrub. The state of being fruticose.

FRUTESCENT, adj. Fru^2-te^{2}s'e^{2}nt. See Fruticose.

FRUTEX (Lat.), n. m. Fru^2(fru)'te^{2}x. Gen., *fru'ticis.* Fr., *arbrisseau.* Ger., *Strauch.* A shrub. [B, 121 (a, 24).]—**F. baccifer brasiliensis.** See Caa-*ghiynvio.*—**F. pavoninus.** The *Cæsalpinia pulcherrima.* [B, 275 (a, 24).]—**F. terribilis.** An old term for the *Globularia alypum.* [B, 121 (a, 24).]

FRUTICANT, adj. Fru^2'ti^2-ka^{2}nt. From *fruticare*, to put forth shoots. Full of shoots (said of plants). [a, 24.]

FRUTICOSE, FRUTICOUS, adj's. Fru^2'ti^2-kos, -ku^{3}s. Lat., *fruticosus* (from *frutex*, a shrub). Fr., *frutiqueux.* Ger., *strauchartig.* It., Sp., *fruticoso.* Shrubby, frutescent (said of stems of bushes and of the branching thallus of some lichens). [B, 1, 123, 291 (a, 24).]

FRUTICULOSUS (Lat.), adj. Fru^{2}t(frut)-i^{2}k-u^{2}l(u^{4}l)-o'su^{3}s-(su^{4}s). From *frutex*, a shrub. Fr., *fruticuleux.* Ger., *kleinstrauchig.* Like a small shrub. [B, 123 (a, 24).]

FRUTICULUS (Lat.), n. m. Fru^{2}t(frut)-i^{2}k'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Dim. of *frutex*, a shrub. A small shrub. [B, 121, 123 (a, 24).]

FRUTIGERBAD (Ger.), n. Frut'i^2-ge^{2}r-ba^{3}d. A place near Frutigen, in the canton of Bern, Switzerland, 2,760 feet above the sea-level, where there are a sulphurous spring and a bathing establishment. [L, 135 (a, 14).]

FRUTILIER (Fr.), n. Fru^6-te-le-a. See Frutiller.

FRUTILLA (Sp.), n. Fru-tel'ya^3. A small fruit. [a, 14.]—**F. de Chile.** The *Fragaria chiloensis.* [B, 121 (a, 24).]—**F. de monte.** In Peru, the *Fragosa reniformis.* [B, 121 (a, 24).]—**F. de sabana.** In Cuba, the *Hiræa elliptica.* [B, 121 (a, 24).]

FRUTILLER (Fr.), **FRUTILLIER** (Fr.), n's. Fru^6-tel-ya, fru^6-tel-ye-a. The *Fragaria chiloensis.* [B, 121 (a, 24); L, 41.]

FRUTIQUEUX (Fr.), adj. Fru^6-te-ku^6. See Fruticose.

FRUTO (Sp.), n. Fru'to. See Fruit.—**Extractos de zumos de f's** [Mex. Ph.]. Syn.: *arropes.* Robs, prepared by evaporating fruit juices over a water-bath to the consistence of a thick syrup. [A, 447 (a, 14).]—**F's carminantes** [Mex. Ph.]. See Species *carminativæ.*—**F's pectorales** [Mex. Ph.]. See Fructus *pectorales.*

FRUTTO (It.), n. Frut'to. See Fruit.—**F. di Guinea.** The *Ravensara aromatica.* [B, 121 (a, 24).]

FRY, n. Fri. Fr., *frai.* Ger., *Laich.* 1. Very young fish. [L.] 2. See Spawn.

FU, n. An old name for various species of *Valeriana.* [B, 121 (a, 24).]

FUBA, n. An extremely fine, white flour made in Angola from soaked and dried manioc-root. ["Am. Jour. of Pharm.," July, 1890, p. 360.]

FUCACEÆ (Lat.), n. f. pl. Fu^2(fu)-ka(ka^3)'se^2(ke^2)-e(a^3-e^2). From *fucus*, a rock-lichen. Fr., *fucacées.* Ger., *Fukaceen, Tange.* Of Lamouroux, an order of the *Thalassiophyta*; of Leman, a section of *Algæ*; of Dumortier, a family of the *Ulvinia*, consisting of the genus *Fucus*; of Agardh, a division of the *Fucoideæ*; of Fries, an order of the *Hydrophyceæ*; of Bory, a family of *Fuci*; of Bastin, a division of the *Melanophyceæ* (or *Phæophyceæ*); and of Vines, the 5th order of the *Phæophyceæ.* They are dark olive-green *Algæ*, having a cartilaginous consistence, and adhering firmly to rocks, or floating free in ocean waters. Many species possess air-bladders. Some are alimentary and edible, and others are of medicinal or economic value. The *Fucarieæ* of Rafinesque are a division of *Algæ*, and of Dumortier an order of the *Coccosporæ*, comprising the *Fucineæ* and *Dictyotaceæ.* The *Fuceæ* (Fr., *fucées*) of Reichenbach are a division of the *Fucoideæ*; of Zanardini, a tribe of the *Endogymnosporeæ*, consisting of the genus *Fucus*; of Kützing, a family of the *Angeiospermeæ*; of Lindley, a suborder of the *Fucaceæ*, comprising the *Lemanidæ*, *Fucidæ*, and *Cystoseiridæ*, and of Rabenhorst, a subsection of the *Fucaceæ.* [B, 77, 121, 170, 291 (a, 24).]

FUCHOSO, n. In Japan, the *Cleome* (*Gynandropsis*) *viscida.* [B, 121 (a, 24).]

FUCHS (Ger.), n. Fuch^{2}s. See Canis *vulpes.*—**F'grind.** See Alopecia.—**F'hölchen.** The root of *Platanthera bifolia.* [B, 180 (a, 24).]—**F'krankheit, F'räude, F'übel.** See Alopecia.—**F'lunge, F'lungenpulver.** Dried and powdered fox's lung; an old remedy for phthisis. [B, 270.]—**F'schwanz.** See the major list.—**F'segge.** The *Carex vulpina.* [B, 121 (a, 24).]—**F'todsturmhut.** See Aconitum *lycoctonum.*—**F'wurzel.** See Aconitum *napellus.*

FUCHSIA (Lat.), n. f. Fuch^{2}s'i^2-a^3. Named for *Fuchs*, a German botanist. Commonly called in Eng. fu^{2}sh'i^2-a^3. Fr., *fuchsie.* Ger., *F.* Ear-ring flowers, lady's ear-drop. 1. A genus of the *Onagrarieæ.* 2. The genus *Schradera.* The *Fuchseæ* of Lindley are a tribe of the *Onagraceæ*, comprising *F.* and *Skimmera.* The *Fuchsiaceæ* of Dumortier are a tribe of the *Onagraceæ*, consisting of the genus *F.* The *Fuchsidiæ* are the same. The *Fuchsieæ* (Fr., *fuchsiées*) are: Of De Candolle, a tribe of the *Onagariæ*, consisting of the genus *F.*, to which Don added the genus *Gongylocarpus*; of Spach, a section of the *Onagreæ*; of Reichenbach and Endlicher, a subdivision or tribe of the *Œnothereæ*; of Meissner, a subtribe of the *Epilobiaceæ*, and of Linnæus, a division of the *Onagræ.* [B, 19, 42, 121, 170, 178 (a, 24).]—**Australian f.** The genus *Correa.* [B, 19, 275 (a 24).]—**Californian f.** The *Zauschneria californica.* [B, 275 (a, 24).]—**Edible-fruited f.** See *F. racemosa.*—**F. coccinea.** Fr., *fuchsie écarlate.* A species found in Chili and Peru. The twigs and leaves are used in decoction as a febrifuge and the bark is used in Santo Domingo as a tonic and febrifuge. [B, 170, 173, 180, 185 (a, 24).]—**F. corymbiflora.** A Mexican species. The fruit is edible. [B, 185 (a, 24).]—**F. denticulata** [Ruíz and Pavón]. A species growing in Peru with toothed leaves, purple calyx and berry, and scarlet petals. [a, 24.]—**F. excorticata.** A species growing in New Zealand; the *kotukutuku* of the Maoris. The bark is astringent. ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 14).]—**F. macrostemma.** A species found in Chili, resembling *F. coccinea* in properties and uses. [B, 180 (a, 24).]—**F. magellanica.** See *F. coccinea.*—**F. multiflora.** Fr., *fuchsie multiflore.* A South American species all parts of which are considered astringent. [B, 173 (a, 24).]—**F. racemosa.** Fr., *fuchsie racémeux.* A species found in the Antilles; used in scrofula, dyspepsia, and adynamic fevers. The fruit is edible. [B, 173, 180 (a, 24).]—**Fuegian f., Scarlet f.** See *F. coccinea.*

FUCHSIA COCCINEA. [A, 327.]

FUCHSIA CORYMBIFLORA. [A, 327.]

FUCHSIAMINE, n. Fuch^{2}s-i'a^{2}m-en. See Fuchsine.

FUCHSIN (Ger.), n. Fuch^{2}s-en'. See Fuchsine.—**Säuref'.** See *Acid* fuchsine.

FUCHSINE, n. Fuch^{2}s'en. Lat., *fuchsina.* Fr., *f.* Ger., *Fuchsin.* It., *fucsina.* Sp., *fuchsina.* A commercial name for any monacid salt of rosaniline, especially a mixture of rosaniline hydrochloride and pararosaniline hydrochloride. It is used in solution in various liquids as a dye for microscopical sections. Therapeuti-

cally, it has been employed in albuminuria, but its remedial value is uncertain. On account of its correcting defective color-sense when a color-blind person looks through a f.-solution, Delbeuf has suggested its use in such cases. [B, 244 (*a*, 27); *a*, 34.]—**Acid f.** Ger., *Säurefuchsin*. A coloring matter consisting of a mixture of rosanilinedisulphonic and rosanilinetrisulphonic acids. It has been used for coloring wines and is said to be innoxious. [B, 270.]—**English f.** Syn.: *roseine*. Rosaniline acetate, $C_{20}H_{19}N_3.C_2H_4O_2$. [B.]—**F. S.** See *Acid f.*—**German f.** Rosaniline hydrochloride, $C_{20}H_{19}N_3.HCl$. [B.]

FUCHSSCHWANZ (Ger.), n. Fuch^{2}s'shwa^{3}nts. See ALOPECURUS, and AMARANTUS *caudatus*.—**Ackerf.'** See ALOPECUROS *agrestis*.—**Blauer F.** The *Lythrum salicaria*. [B, 180 (*a*. 24).]—**F'ähnlich.** See ALLOPECUROID.—**F'gewächse.** See AMARANTACEÆ.—**F'klee.** The *Trifolium rubens*. [B, 121 (*a*, 24).]—**Wilder F.** See AMARANTUS *blitum*.

FUCICOLUS (Lat.), adj. Fu^{2}s(fuk)-i^{2}k'ol(o^{2}l)-u^{3}s(u^{4}s). From *fucus*, a rock-lichen, and *colere* to inhabit. Fr., *fucicole*. Living on *Fuci*. [L, 180.]

FUCIFORMIS (Lat.), adj. Fu^2(fu)-si(ki^2)-fo^{3}rm'i^{2}s. From *fucus*, a rock-lichen, and *forma*, form. Fr., *fuciforme*. Resembling the *Fuci*. [L, 180.]

FUCIN, n. Fu^2'si^{2}n. From *fucus*, a rock-lichen. Fr., *fucine*. A mucilaginous substance derived from plants of the genus *Fucus*. [A, 385.]

FUCIVOROUS, adj. Fu^2-si^{2}v'or-u^{3}s. From *fucus*, a rock-lichen, and *vorare*, to devour. Subsisting on sea-weed. [L, 56.]

FUCO (It., Sp.), n. Fu'ko. See FUCUS.—**F. avejigado** [Mex. Ph.] (Sp.). See FUCUS *vesiculosus*.

FUCODIUM (Lat.), n. n. Fu^2(fu)-kod'i^2-u^{3}m(u^{4}m). A genus of *Algæ*. [B.]—**F. nodosum.** Syn.: *Halidrys nodosa*. A species found in the North Atlantic Ocean from Norway to Spain, and on the American coast as far south as Brazil. [*a*, 24.]

FUCOID, FUCOIDAL, adj's. Fu^2'koid, fu^2-koid'a^{2}l. From φῦκος, a rock-lichen, and εἶδος, resemblance. Fr., *fucoïde*. Pertaining to, belonging to, or resembling the *Fuci*. [*a*, 24.]

FUCUS (Lat.), n. m. Fu^2(fu)'ku^{3}s(ku^{4}s). Gr., φῦκος. Fr., *f.*, *varech*. Ger., *Tang*. It., *fuco*. Sp., *fuco*, *sargazo*. Sea-weed. 1. Of Link, a family of *Algæ*. 2. Of Linnæus, a genus of the *Fucaceæ*, including all marine plants with a coriaceous, filiform, or flat, branching frond. It is now restricted to sea-weeds, having flat or compressed forked frond with sometimes air vessels and receptacles filled with mucus, traversed by a network of jointed filaments. 3. Of Ordanson, see ALOÆ. The *Fucidæ* of Lindley are a tribe of the *Fuceæ*. The *Fucinæ* of Reichenbach are a division of the *Fucoideæ*. The *Fucineæ* of Dumortier are a tribe of the *Fucarieæ*. The *Fucoideæ* (Fr., *fucoidées*; Ger., *Fukoideen*) are: Of K. A. Agardh, a large division of *Algæ*, comprising the *Chordarieæ*, *Laminarieæ*, and *Fucaceæ*, to which J. G. Agardh added the *Ectocarpeæ*, *Sphacelarieæ*, *Dictyoteæ*, and *Sporochnoideæ*. They are dark-spored *Algæ*, and are now included under the *Fucaceæ*, class *Phæophyceæ*. Cf. ANGEIOSPERMEÆ. The *Fucoidites* of Brongniart are a family or order of fossil *Algæ*. [B, 19, 77, 121, 170 (*a*, 24).]—**Bladder-f.** See *F. vesiculosus*.—**Cigares de f.** (Fr.). Cigars or cigarettes made of the leaves of certain *Algæ*, to which are sometimes added salvia and stramonium leaves; recommended for phthisis. [L, 77 (*a*, 14).]—**Cineres fuci vesiculosi.** See ÆTHIOPS *vegetabilis* (1st def.).—**Extractum fuci vesiculosi.** Fluid extract of sea-wrack; of Danney, a preparation made by digesting 15 parts of the dried and coarsely powdered wrack with 86 per cent. alcohol, and filtering with 54 per cent. alcohol, sufficient to obtain 16 parts of extract. ["Proc. of the Am. Pharm. Assoc.," xxi (*a*, 14).]—**F. à bractées** (Fr.). See *F. bracteatus*.—**F. abrotanifolius.** The *Cystoseira abrotanifolia*. [B, 180 (*a*, 24).]—**F. acicularis.** The *Sphærococcus acicularis*. [B, 180 (*a*, 24).]—**F. acinarius.** The *Sargassum vulgare*. [B, 173 (*a*, 24).]—**F. aculeatus.** The *Sporochnus aculeatus*. [B, 180 (*a*, 24).]—**F. à feuilles étroites** (Fr.). See *F. vesiculosus angustifolius*. [B, 173 (*a*, 24).]—**F. aigu** (Fr.). See *F. vesiculosus acutus*.—**F. albus.** The *Gigartina plicata*. [B, 173 (*a*, 24).]—**F. Amansii.** Fr., *f. de Madagascar*. A Madagascar species, considered edible, and used in the preparation of the so-called Chinese gelatin. [B, 173 (*a*, 24); "Proc. of the Am. Pharm. Assoc." (*a*, 14).]—**F. amylaceus.** The *Gracilaria lichenoides*. [B, 270.]—**F. arbor.** The *Laminaria conica*. [B, 173 (*a*, 24).]—**F. articulatus.** The *Chondria articulata*. [B, 180 (*a*, 24).]—**F. bacciferus.** See *F. natans* (1st def.).—**F. barbatus.** Fr., *f. barbu*. The *Cystoseira barbata*. [B, 180 (*a*, 24).]—**F. bath.** See *F.* BATH.—**F. bifurcatus.** The *Laminaria conica*. [B, 173 (*a*, 24).]—**F. bipinnatus.** The *Gelidium corneum*. [B, 173 (*a*, 24).]—**F. bracteatus.** Fr., *f. à bractées*. A species found in the East Indies, considered edible. [B, 173 (*a*, 24).]—**F. buccinalis.** The *Laminaria buccinalis*. [B, 173 (*a*, 24).]—**F. bullatus.** See *F. dulcis*.—**F. caragheen.** See CHONDRUS *crispus*.—**F. carnosus.** See *F. dulcis*.—**F. cartilagineus.** The *Plocamium coccineum*. [B, 173 (*a*, 24).]—**F. caulescens.** The *Halymenia ciliata*. [B, 173 (*a*, 24).]—**F. ceranoides.** Ger., *kornfrüchtiger Tang*. A species found in the northern seas of Europe and America. It furnishes a kelp containing sodium and iodine. [B. 180 (*a*, 24).]—**F. ceylanicus.** See *F. amylaceus*.—**F. ciliatus.** 1. Of Linnæus, the *Halymenia ciliata*. 2. Of Stackhouse, the *Gelidium corneum*. [B. 173 (*a*, 24).]—**F. clathrus.** Fr., *f. en lyre*. A species eaten in Asia. [B, 173 (*a*, 24).]—**F. coccineus.** The *Plocamium coccineum*. [B, 173 (*a*, 24).]—**F. confervoides.** The *Sphærococcus confervoides*. [B, 180 (*a*, 24).]—**F. contortus.** The *Desmaretia aculeata*. [B, 173 (*a*, 24).]—**F. coralloides.** Fr., *f. coralloïde*. An edible species found in India. [B, 173 (*a*, 24).]—**F. corneus.** The *Sphærococcus corneus*. [B, 180 (*a*, 24).]—**F. corniculatus.** The *Cystoseira ericoides*. [B, 173 (*a*, 24).]—**F. crispus.** See CHONDRUS *crispus*.—**F. dentatus.** The *Halymenia ciliata*. [B, 173 (*a*, 24).]—**F. dentelé** (Fr.). See *F. serratus*.—**F. denticulatus.** The *Gracilaria lichenoides*.—**F. des buveurs** (Fr.). See *F. potatorum*.—**F. dichotomus.** The *Halymenia ciliata*. [B, 173 (*a*, 24).]—**F. digitatus.** 1. Of Hudson, see *F. dulcis*. 2. Of Linnæus, see LAMINARIA *digitata*.—**F. dulcis.** Fr., *f. doux*. A species containing iodine; employed as a sudorific and febrifuge and as a remedy for obesity. In Ireland, Sweden, and Siberia it is eaten, and smoked like tobacco. [B, 173 (*a*, 24).]—**F. edulis.** The *Halymenia edulis*. [B, 180 (*a*, 24).]—**F. en forme de chausse-trape** (Fr.). See *F. denticulatus*.—**F. en lyre** (Fr.). See *F. clathrus*. [B, 173 (*a*, 24).]—**F. erica marina, F. ericoides.** The *Cystoseira ericoides*. [B, 173 (*a*, 24).]—**F. esculentus.** The *Laminaria esculenta*. [B, 173 (*a*, 24).]—**F. fascia.** The *Laminaria fascia*. [B, 180 (*a*, 24).]—**F. fasciola.** The *Zonaria fasciola*. [B, 180 (*a*, 24).]—**F. filipendula.** The *Halymenia palmata*. [B, 180 (*a*, 24).]—**F. filum.** The *Scytosiphon filum*. [B, 180 (*a*, 24).]—**F. fimbriatus.** The *Laminaria esculenta*. [B, 173 (*a*, 24).]—**F. fruticulosus.** The *Polysiphonia fruticulosa*. [B, 180 (*a*, 24).]—**F. gelatinosus.** The *Laurentia gelatinosa*. [B, 173 (*a*, 24).]—**F. gelatinus.** The *Sphærococcus gelatinus*. [B. 180 (*a*, 24).]—**F. gigartinus.** The *Sphærococcus gigartinus*. [B, 180 (*a*, 24).]—**F. glacialis.** The *Halymenia ciliata*. [B, 173 (*a*, 24).]—**F. helminthocortos.** See CONFERVA *helminthocorton*.—**F. hibernicus.** See CHONDRUS *crispus*.—**F. holosetaceus.** The *Halymenia ciliata*. [B, 173 (*a*, 24).]—**F. inflatus.** See *F. vesiculosus*.—**F. iodiferus.** A species found near the mouth of the Rio de la Plata. and employed for feeding llamas, the milk of which is said to cure phthisis. [B, 48 (*a*, 14).]—**F. irlandicus.** See CHONDRUS *crispus*.—**F. lactuca.** 1. See *F. dulcis*. 2. Of Necker, the *Ulva lactuca*. [B, 173 (*a*, 24).]—**F. lichenoides.** The *Gracilaria lichenoides*. [B, 270.]—**F. ligulatus.** The *Halymenia ciliata*. [B, 173 (*a*, 24).]—**F. luteus.** The *Laurentia gelatinosa*. [B, 173 (*a*, 24).]—**F. marinus.** See *F. vesiculosus*.—**F. maximus.** The *Laminaria buccinalis*. [B, 173 (*a*, 24).]—**F. membranaceus.** The *Haliseris polypodioides*. [B, 180 (*a*, 24).]—**F. membranifolius.** The *Sphærococcus membranifolius*. [B, 180 (*a*, 24).]—**F. muricatus.** See *F. denticulatus*.—**F. muscoides.** The *Desmaretia aculeata*. [B, 173 (*a*, 24).]—**F. natans.** 1. Of Linnæus, the *Sargassum bacciferum*. 2. Of Turner, the *Sargassum vulgare*. [B, 173, 180 (*a*, 24).]—**F. nodosus.** Ger., *knotiger* (oder *Knoten-*) *Tang*. The knotted wrack; a species found in the Atlantic, and especially the North and Baltic seas. It is used like the *F. ceranoides*. [B, 180 (*a*. 24).]—**F. obtusus.** See CHONDRIA *obtusa*.—**F. ovinus.** The *Halymenia palmata*. [B, 173 (*a*, 24).]—**F. palmatus.** 1. Of Linnæus, the *Halymenia palmata*. 2. Of Lightfoot, the *F. dulcis*. [B, 173, 180 (*a*, 24).]—**F. parvonia.** The *Zonaria parvonia*. [B, 180 (*a*, 24).]—**F. pinastroides.** The *Rhodomela pinastroides*. [B, 180 (*a*, 24).]—**F. pinnatifidus.** The *Odonthalia dentata*. [*a*, 24.]—**F. pinnatus.** The *Laminaria esculenta*. [B, 173 (*a*, 24).]—**F. plicatus.** The *Sphærococcus plicatus*. [B, 180 (*a*, 24).]—**F. plocamium.** The *Plocamium coccineum*. [B, 173 (*a*. 24).]—**F. polyschydes.** The *Laminaria conica*. [B, 173 (*a*, 24).]—**F. potatorum.** Fr., *f. des buveurs*. The *Laminaria potatorum*. [B, 173 (*a*, 24).]—**F. pumilus.** The *Gelidium corneum*. [B, 173 (*a*, 24).]—**F. purpureus.** The *Rytiphlœa tinctoria*. [B, 180 (*a*, 24).]—**F. rhizodes.** The *Sporochnus rhizodes*. [B, 180 (*a*, 24).]—**F. rubens.** The *Sphærococcus rubens*. [B, 180 (*a*, 24).]—**F. saccharinus.** The *Laminaria saccharina*. [B. 173 (*a*, 24).]—**F. salicifolius, F. sargasso.** The *Sargassum vulgare*. [B, 173 (*a*, 24).]—**F. sedoides.** The *Cystoseira sedoides*. [B, 173 (*a*, 24).]—**F. selaginoides.** The *Cystoseira ericodes*, var. *selaginoides*. [B, 173 (*a*, 24).]—**F. serratus.** Fr., *f. dentelé*. Ger., *gesägter Tang*. Crabby ore, cut-leaf, serrated wrack; a species found in the Atlantic. especially abundant in the North and Baltic seas; it yields kelp and possibly iodine,

FUCUS VESICULOSUS. [A, 327.]

and is applied to scrofulous swellings. [B, 173, 180, 185 (*a*, 24); J. Wheeler, "Proc. of the Am. Pharm. Assoc.," xxx (*a*, 14).]—**F. Sherardi.** The *F. vesiculosus*, var. *Sherardi*. [B, 173 (*a*, 24).]—**F. siliquosus.** The *Cystoseira siliquosa*. [B, 180 (*a*, 24).]—**F. spinosus.** 1. Of Linnæus, the *F. denticulatus*. 2. The *Laurentia gelatinosa*. [B, 173 (*a*, 24).]—**F. spinulosus strictus.** The *Laurentia gelatinosa*. [B, 173 (*a*, 24).]—**F. spiralis.** 1. The *F. vesiculosus*, var. *acutus*. 2. Of Linnæus, the *F. vesiculosus*, var. *spiralis*.

[B, 173 (α, 24).]—**F. squamarius.** The *Zonaria squamaria.* [B, 180 (α, 24).]—**F. striatus.** See *F. denticulatus.*—**F. subfuscus.** The *Rhodomela subfusca.* [B, 180 (α, 24).]—**F. tamariscifolius.** The *Cystoseira ericoides.* [B, 173, 180 (α, 24).]—**F. tenax.** The *Gracilaria tenax.* [B, 173 (α, 24).]—**F. tendo.** The *Chorda filum.* [B. 173 (α, 24).]—**F. teres, F. tetragonus.** The *Laminaria esculenta.* [B, 173 (α, 24).]—**F. tremella lactuca.** The *Ulva lactuca.* [B, 173 (α, 24).]—**F. tremella nostoc.** The *Nostoc commune.* [B, 173 (α, 24).]—**F. undulatus.** The *Sargassum vulgare.* [B, 173 (α, 24).]—**F. usneoides.** The *Desmaretia aculeata.* [B, 173 (α, 24).]—**F. vesicularis.** See *F. vesiculosus.*—**F. vésiculeux** [Fr. Cod.] (Fr.). See *F. vesiculosus.*—**F. vésiculeux à feuilles étroites** (Fr.). The *F. vesiculosus*, var. *angustifolius.* [B, 173 (α, 24).]—**F. vésiculeux aigu.** The *F. vesiculosus*, var. *acutus.* [B, 173 (α, 24).]—**F. vésiculeux de Shérard** (Fr.). The *F. vesiculosus*, var. *Sherardi.* [B, 173 (α, 24).]—**F. vésiculeux en spirale** (Fr.). The *F. vesiculosus*, var. *spiralis.* [B, 173 (α, 24).]—**F. vesiculosus.** Fr., *chêne marin, f.* (ou varec) *vésiculeux* [Fr. Cod.] *soude de varec.* Ger., *Blasentang, blasiger Tang, gemeiner Seetang, Meer- (oder See-) Eiche.* It., *quercia marina.* Sp., *eucina de mar* [Mex. Ph.]. Sea- (or bladder-) wrack, cut-leaf; a species found on the rocky shores of Europe and America, of peculiar odor and taste, and containing much iodine and sodium. In Scotland and France it is used for its kelp, as a manure, and as fodder for cattle. The charcoal (*Æthiops vegetabilis*) has been employed in goître, scrofula, and obesity. The whole plant is also given in decoction and extracts. [B, 5, 173, 180 (α, 24).]—**F. vesiculosus acutus.** Fr., *f. aigu.* A variety of the *F. vesiculosus.* [B, 173 (α, 24).]—**F. vesiculosus angustifolius (seu Sherardi, seu spiralis).** Fr., *f. à feuilles étroites, f. de Shérard, f. en spirale.* Varieties of *F. vesiculosus* having the same properties as the latter. [B, 173 (α, 24).]—**F. virgatus.** The *Desmaretia aculeata.* [B, 173 (α, 24).]—**Gelatina de fuco crispo** [Fr. Cod.]. See *Gelatina* CARRAGEEN.—**Knotted f.** See *F. nodosus.*—**Ptisana de fuco crispo** [Fr. Cod.]. See *Decoctum* CARRAGEEN.—**Sweet f.** See *F. dulcis.*

FUCUSAMIDE, n. Fu²-ku²s'a²m-i²d(id). A crystalline base, $(C_4H_3O.CH)_3N_2 = C_{15}H_{12}O_3N_2$, isomeric with furfuramide, and derived from fucosol. [B, 3.]

FUCUSINE, n. Fu²'ku²s-i²n. A crystalline base isomeric with fucusamide, and derived from the latter by boiling with caustic potash. [B, 3.]

FUCUSOIC ACID, n. Fu²-ku²-so'i²k. Syn.: *β-pyromucic acid.* A crystalline acid, $C_4H_3O—CO.OH = C_5H_4O_3$, isomeric with pyromucic acid. and derived from fucusol. [B, 3.]

FUCUSOL, n. Fu²'ku²-so²l. Ger., *Algenöl.* An oily liquid, $C_5H_4O_2$, isomeric with furfurol. and resembling the latter in many of its properties. obtained by distilling *Algæ* of the genus *Fucus*, peat-moss (*Sphagnum*), and lichens (*Usnea, Cetraria*), with sulphuric acid. [B, 3.]

FUEGO (Sp.), n. Fu-a'go. A place near Old Guatemala, Central America, at the base of a volcano of the same name, where there are hot sulphurous springs. [L, 41 (α, 14).]

FUEN-CALIENTE (Sp.), n. Fu-an"ka³l-e-an'ta. A place in the province of Ciudad-Real, Spain, where there is a thermal chalybeate spring containing argillaceous earth, calcium sulphate, and sodium chloride. [L, 49.]

FUEN SANTA (Sp.), n. Fu-an"sa³n'ta³. A place in the province of New Castile, Spain, where there are thermal mineral springs and a bathing establishment. [A, 319 (α, 21).]

FUENTE (Sp.), n. Fu-an'ta. The *Cissus smilacina.* [B, 121 (α, 24).]

FUENTE-ALAMO (Sp.), n. Fu-an"ta-a³l'a³-mo. A place in the province of Murcia, Spain, where there is a spring containing hydrogen sulphide and calcium sulphate. [L, 49.]

FUENTE DEL FRESNO (Sp.), n. Fu-an"ta-de²l-fre²s'no. A place in the province of Ciudad-Real, Spain, where there is a mineral spring. [A, 348 (α, 14).]

FUENTE OVEJUNA (Sp.), n. Fu-an"ta-o-va-hu'na³. A place in the province of Cordoba, Spain, where there are two chalybeate springs, called *Guadiato* and *Las Aguadas.* [L, 95 (α, 14).]

FUENTERRABÍA (Sp.), n. Fu-an-te²r-ra³-be'a³. A place in the province of Guipuzcoa, Spain, where there is a popular sea-bathing resort. [L, 30, 41, 49 (α, 14).]

FUET, n. Fu²'e²t. In Scotland, the *Sempervivum tectorum.* [B, 275 (α, 24).]

FUGACIOUS, adj. Fu²-ga'shu³s. Lat., *fugax* (from *fugere*, to flee). Fr., *fugace.* Ger., *vergänglich, flüchtig, verschwindend.* Lasting but a short time, transitory, ephemeral. [B, 1, 123, 291 (α, 24).]

FUGADÆMONUM (Lat.), n. f. Fu²(fu)"ga³-de²m(da³-e²m)-on-u³m(u⁴m). From *fuga*, flight, and *dœmon*, an evil spirit. An old term for the *Hypericum perforatum.* [B, 180 (α, 24).]

FUGAX (Lat.), adj. Fu²(fu)'ga²x(ga³x). Gen., *-a'cis.* See FUGACIOUS.

FUGE (Ger.), n. Fug'e². See ARTICULATION, COMMISSURE, JOINT, SUTURE, and SYMPHYSIS.—**Schamf'.** See SYMPHYSIS *pubis.*

FUGI-GEITO, n. In Japan, the *Amarantus paniculatus.* [B, 121 (α, 24).]

FUGI-KANSO, n. In Japan, the *Desmodium Oldhami.* [B, 121 (α, 24).]

FUGILE (Lat.), **FUGILATIVUM** (Lat.), **FUGILLA** (Lat.), n's f., n., and f. Fu²(fu)-ji(ge)'le(la), -ji²l(gel)-a²t(a³t)-i(e)'vu³m-(wu⁴m), -ji²l(gel)'la³. Old terms applied variously to cerumen, a wax-like substance in the urine, a glandular abscess, and a swelling of the parotid gland. [A, 325.]

FUGIRE-HIRURGAO, n. In Japan, the *Convolvulus pentapetaloides.* [B, 121 (α, 24).]

FUGITIVE, adj. Fu²'ji²-ti²v. Lat., *fugitivus* (from *fugere*, to flee). Fr., *fugitif.* See FUGACIOUS. The *fugitivus* of the old chemists was mercury. [A, 325.]

FUGOSA (Sp.), n. Fu-go'sa³. In the Antilles, the *Capraria biflora.*

FÜGUNG (Ger.), n. Fu⁶g'un². See ARTICULATION.—**Bandbeinf'.** See SYNDESMOSIS.—**Fleischbeinf'.** See SYSSARCOSIS.—**Gelenkf'.** See ARTICULATION (1st def.).—**Nagelf'.** See GOMPHOSIS.

FUH (Ar.), n. The *Rubia tinctorum.* [B, 92 (α, 14).]

FÜHLBAR (Ger.), adj. Fu⁶l'ba³r. See PALPABLE.

FÜHLEISEN (Ger.), n. Fu⁶l'iz-e²n. An exploring sound or probe. [A, 521.]

FÜHLEN (Ger.), n. A feeling, sensation. [L. 46 (α, 21).]

FÜHLER (Ger.), n. Fu⁶l'e²r. See ANTENNA.—**F'blätter.** Fan-shaped antennæ. [L, 353 (α, 27).]—**F'borsten.** See ANTENNA *filiformis.*—**F'cirrus.** A cirrus. [L.]—**F'fächer.** Fan-shaped antennæ. [L, 353 (α, 27).]—**F'kolben.** See ANTENNA *capitata.*—**Mundf'.** See *Maxillary* PALP.—**Stirnf'.** See ANTENNA.

FÜHLFADEN (Ger.), n. Fu⁶l'fa³d-e²n. See ANTENNA and TENTACLE.

FÜHLHORN (Ger.), n. Fu⁶l'horn. See ANTENNA.—**Borstenartiges F.** See ANTENNA *setacea.*—**Fadenförmiges F.** See ANTENNA *filiformis.*—**F'artig.** See ANTENNARY.—**F'förmig.** See ANTENNIFORM.—**F'ig.** See ANTENNATE.—**F'los.** See EXANTENNATUS.—**F'tragend.** See ANTENNIFEROUS.

FÜHLKRAUT (Ger.), n. Fu⁶l'kra³-u⁴t. See BIOPHYTUM.

FÜHLLOSIGKEIT (Ger.), n. Fu⁶l'los-i²g-kit. See APATHY.

FÜHLPFLANZE (Ger.), n. Fu⁶l'pfla³nts-e². The *Mimosa pudica.* [B, 180 (α, 24).]

FÜHLSPHÄRE (Ger.), n. Fu⁶l'sfar-e². Of Munk, the sensory area of the cerebral cortex. [Landois (K).]

FÜHLSPITZE (Ger.), n. Fu⁶l'spi²ts-e². See ANTENNA and ANTENNULA (1st def.).

FÜHLWÄRZCHEN (Ger.), n. Fu⁶l'varts-ch²e²n. A tactile papilla. [L, 80.]

FÜHRER (Ger.), n. Fu⁶r'e²r. See DIRECTOR (2d def.), DUCTOR, CONDUCTOR, and GUIDE.—**Nadelf'.** See ACUDUCTOR.

FUJI, n. In Japan, the *Petasites japonicus.* [B, 121 (α, 24).]—**F.-nadeshiko.** In Japan, the *Dianthus japonicus.* [B, 121 (α. 24).]

FUJLA (Ar.), n. The *Rhaphanus sativus.* [A, 479 (α, 21).]

FUKI, n. In Japan, the genus *Petasites.* [B, 121 (α, 24).]

FUKKISO, n. In Japan, the *Pachysandra terminalis.* [B, 121 (α, 24).]

FUKU, n. In Japan, the *Eulalia japonica.* ["Proc. of the Am. Pharm. Assoc.," xxviii (α, 14).]

FUKUJUSO, n. In Japan, the *Adonis apennina*, var. *davurica.* [B, 121 (α, 24).]

FUL (Ar.), n. See BEAN.

FULCIENS (Lat.), adj. Fu³l(fu⁴l)'si²(ki²)-e²nz(ans). From *fulcire*, to prop. Propping up, supporting (said of one organ placed beneath another). [B, 19 (α, 24).]

FULCRA (Lat.), n. n., pl. of *fulcrum.* Fu³l(fu⁴l)'kra³. 1. Scales or buds formed of dilated petioles; of Linnæus, any supporting appendage of a plant. [B, 121 (α, 24).] 2. The strong spines forming the front ray of the fins of the *Ganoidei*, regarded by some as characteristic of that order. [L.]

FULCRACEOUS, adj. Fu³l-kra'shu³s. Lat., *fulcraceus* (from *fulcire*, to prop). Fr., *fulcracé.* Ger., *gestützt.* Having fulcra. [B, 1, 121 (α, 24).]

FULCRATE, adj. Fu³l'krat. From *fulcire*, to prop. Fr., *fulcré.* 1. Propped (said of plants having supporting appendages, stipules, tendrils, etc.). 2. Descending to the earth (*e. g.*, a f. branch). [B, 19 (α, 24); L, 56 (α, 17).]

FULCRUM (Lat.), n. n. Fu³l(fu⁴l)'kru³m(kru⁴m). Fr., *fulcre, crampon, soutien.* Ger., *Stützpunkt.* 1. In mechanics, a point of support (*e. g.*, of a lever). 2. In botany and zoology, see FULCRA.

FULCULUM (Lat.), n. n. Fu³l(fu⁴l)'ku²l(ku⁴l)-u³m(u⁴m). A claw. [L, 353.]

FULFILI-SURKH (Pers.), n. The *Capsicum frutescens.* [B, 121 (α, 24).]

FULFUL (Ar.), n. The genus *Piper.* [B, 121 (α, 24).]

FULGORA (Lat.), n. f. Fu³l(ful)'go²r-a³. From *fulgur*, lightning. Fr., *fulgore.* A tropical genus of homopterous *Hemiptera.* [A, 385.] The *Fulgorellæ* (Fr., *fulgorellées*) of Latreille and Eichwald are a tribe of the *Cicadaria.* The *Fulgoridæ* (Fr., *fulgoroides, fulgores, fulgoriens;* Ger., *Leuchtzirpen*) are a family of insects of the *Homoptera-Cicadaria*, some of whose members (*e. g.*, *F. lanternaria*, or common lantern-fly) are falsely supposed to emit light from a lantern-shaped frontal process. The *Fulgoroides* are the same. [L, 41, 180, 292, 353 (α, 27).]

FULGUR (Lat.), n. n. Gen., *ful'guris.* Lightning. [A, 312 (α, 21).]

FULGURANT, FULGURATING, adj's. Fu³l'gu²r-a²nt, -at-i²n². Lat., *fulgurans* (from *fulgurare*, to lighten). Fr., *fulgurant.* Lightning-like in suddenness (said of the pains of locomotor ataxia). [A, 301.]

FULGURATION, n. Fu³l-gu²-ra'shu³n. Lat., *fulguratio* (from *fulgurare*, to lighten). Fr., *f.* Ger., *Wetterleuchten* (1st def.). 1. Lightning without thunder. 2. The occurrence of fulgurant pains.

FULICA (Lat.), n. f. Fu^{2}l(fu^{4}l)'i^2-ka^3. 1. The coot, a genus of the *Fulicinæ*, which are a subfamily of the *Rallidæ*. [A, 312 (a, 21); L, 353, 354 (a, 24).]—**F. atra.** Fr., *foulque*. Ger., *Blässhuhn*, *Wasserhuhn*. The bald coot; a species found in Europe. The heart was formerly supposed to be remedial in epilepsy, and the flesh in snake-bites. [L, 94.]—**F. chloropus, F. fusca.** See GALLINULA *chloropus*.

FULIGINE (Fr.), n. Fu^6-le-zhen. From *fuligo*, soot. Alcoholic extract of soot. [B, 46 (a, 14).]

FULIGINOSITY, n. Fu^2-li^{2}j-i^{2}n-o^{2}s'i^2-ti^2. From *fuligo*, soot. Fr., *fuliginosité*. See SORDES.

FULIGINOUS, adj. Fu^2-li^{2}j'i^2-nu^{2}s. Lat., *fuliginosus* (from *fuligo*, soot). Fr., *fuligineux*. Ger., *russig*. 1. Of the nature of soot. 2. Of a brownish, smoky- (or sooty-) brown color. [D; L, 343.]

FULIGO (Lat.), n. f. Fu^2(fu)-li(le)'go. Gen., *-lig'inis*. Gr., λιγνύς, ἄσβολος. Fr., *suie*. Ger., *Russ*. 1. Soot. 2. Sordes. 3. A genus of *Fungi*, of the *Myxomycetes* (or [Schroter] of the *Myxogasteres*, subclass *Physaraceæ*). The *Fuligineæ* (Fr., *fuliginées*) are: Of Brongniart, a tribe of the *Lycoperdaceæ*; of Link, a family of the *Fuligines*; and of Mathieu, a tribe of the *Gasteromycetes*. The *Fuligines* of Link are a division of *Fungi*. The *Fuliginoidei* of Fries are a section of the *Trichospermei*. [A, 326 (a, 21); B, 1, 121, 170, 180 (a, 24).]—**Clauder's tinctura fuliginis, Essentia fuliginis Clauderi.** See *Tinctura fuliginis alcalina*.—**Extractum fuliginis** [Hamb. Ph., 1804]. Fr., *extrait de suie*. A preparation made by boiling 1 part of soot in 8 parts of water, filtering, and evaporating to dryness. [B, 119 (a, 14).]—**F. dentium.** See SORDES.—**F. ligni.** The soot of wood.—**F. metallorum.** Of the alchemists, arsenic and mercury. [A, 325.]—**Fuligines sanguinis.** An old name for impurities in the blood. [A, 325.]—**F. splendens.** Fr., *crystal de suie*. Ger., *Glanzruss*. The fine, dark, shining variety of soot which forms in a dense layer on chimneys and hearth-stones where wood has been burned. It consists of finely divided carbon with tarry products, acetic acid, ammoniacal compounds, etc. [B, 7, 49.]—**F. vaporaria.** See AGARICUS *volvaceus*.—**F. varians.** Fr., *fleur du tan*. A species of *F.* (3d def.) found on oak-bark. [B, 121 (a, 24).]—**Liquor fuliginis alkalinus** [Swed Ph., Finn. Milit. Ph.]. A preparation made by macerating for three days [Finn. Milit. Ph.], or digesting for four days [Swed. Ph.], 10 parts of *F. splendens* and 25 [Finn. Milit. Ph.] or 30 [Swed. Ph.] of potassium carbonate in 175 [Finn. Milit. Ph.] or 200 [Swed. Ph.] parts of distilled water, filtering, and dissolving in the product 5 [Finn. Milit. Pn.] or 6 [Swed. Ph.] parts of ammonium chloride. [B, 95 (a, 14).]—**Liquor fuliginis fœtidus** [Finn. Milit. Ph., Swed. Ph.]. A preparation made by triturating 1 part of powdered asafœtida in 8½ [Finn. Milit. Ph.] or 9 parts [Swed. Ph.] of *liquor fuliginis alkalinus*, macerating for twenty-four hours in a closed vessel, and straining through a cloth. [B, 95 (a, 14).]—**Spiritus fuliginis.** Fr., *esprit de suie*. Pyroligneous acid obtained from soot; official in many of the older pharmacopœias. [B, 97, 119 (a, 14).]—**Tinctura fuliginis alcalina** (seu **Clauderi**). Fr., *essence* (ou *infusion*, ou *eau*) *de suie*, *essence de Clauder*. A preparation official in many of the older pharmacopœias, made, with slight variations, by dissolving 6 parts of potassium carbonate in 24 of water, and 1 part of ammonium chloride in 12 of water, filtering and mixing the two liquids, and adding 2 parts of powdered soot. [B, 97, 119 (a, 14).]—**Unguentum fuliginis** [Belg. Ph.]. An ointment made by digesting a mixture of 1 part of powdered soot, 1 part of water, and 4 parts of lard, straining, and, after removing the water, melting the strained product. [B, 95.]

FULIGOKALI (Lat.), n. n. Fu^2(fu)-li^2(le)-go^{2}k'a^{2}l(a^{3}l)-i(e). From *fuligo*, soot, and *kali*, potash. A preparation made by boiling 20 parts of caustic potash and 100 of powdered shining soot in water, diluting the solution when cold, filtering, and evaporating to dryness; used like anthrakokali. [B, 5, 125; "Proc. of the Am. Pharm. Assoc.," xxiii (a, 14).]—**Sulphurated f., Sulphurous f.** It., *f. solforato*. A mixture of 60 parts of f., 14 of caustic potash, and from 4 to 10 of sulphur; used in scrofula, gout, and chronic skin affections. [B, 46, 125 (a, 14).]

FULIX (Lat.), n. f. Fu^2(fu)'li^{2}x. Gen., *fu'licis*. See FULICA.

FULL, adj. Fu^{4}l. A.-S., *f.* Gr., πλέος, πλήρης, μεστός. Lat., *plenus*. Fr., *plein*. Ger., *voll*. Filled, containing as much as possible; of the pulse, voluminous; of a breath, deep; of an effect or condition, extreme.—**F.-blooded.** See PLETHORIC.

FULL, n. Fu^{4}l. The *Sempervivum tectorum*. [A, 505 (a, 21).]

FÜLLE (Ger.), n. Fu^{6}l'le^2. Repletion. [A, 523.]

FÜLLEN (Ger.), n. Fu^{6}l'le^{2}n. A filling (as of teeth). [A, 521.]

FÜLLHORN (Ger.), n. Fu^{6}l'horn. Of Bockdalek, the lateral recess of the fourth ventricle of the brain in the embryo. [H.]

FULLING, n. Fu^{4}l'i^{2}n. A variety of massage in which the muscles are compressed literally (and so thickened) between the hand of the masseur and the bone. [a, 34.]

FULLNESS, n. Fu^{4}l'ne^{2}s. 1. The state or condition of being full. [a, 21.] 2. Moderate swelling.

FULMAR OIL, n. Fu^{3}l'ma^{3}r oil. An oil obtained on the island of St. Kilda, off the northern coast of Great Britain, from a species of petrel, the fulmar petrel of Buffon (the *Procellaria glacialis* of Linnæus). The oil has a clear, reddish, cherry color, a powerful and peculiar odor, and the sp. gr. of 902. It seems to possess properties analogous to those of cod-liver oil, and, when treated with sulphuric acid, gives the same color reaction. ["Proc. of the Am. Pharm. Assoc.," xix (a, 14).]

FULMI-COTON (Fr.), n. Fu^{4}l-me-ko-to^{2}n^2. See PYROXYLIN.

FULMINANT, adj. Fu^{3}l'mi^{2}n-a^{2}nt. See FULMINATING.

FULMINATE, n. Fu^{3}l'mi^{2}n-at. Fr., *f.* Ger., *Fulminat*, *knallsaures Salz*. It., Sp., *fulminato*. A salt of the supposititious fulminic acid. The f's, $R''(C_2N_2O_2) = C(NO_2).R''.CN$, or nitro-acetonitriles of the bivalent radicle (R''), are highly explosive compounds. [B, 4.]

FULMINATING, adj. Fu^{3}l'mi^{2}n-at-i^{2}n^2. Lat., *fulminans* (from *fulminare*, to strike with lightning). Fr., *fulminant*. Ger., *knallend*. 1. Capable of detonation. 2. Of diseases, developing suddenly and running on very rapidly (usually in a few hours) to a fatal issue.

FULMINATION, n. Fu^{3}l-mi^{2}n-a'shu^{3}n. Lat., *fulminatio*. Fr., *f.* Ger., *Aufknallen*. See DETONATION.

FULMINIC ACID, n. Fu^{3}l-mi^{2}n'i^{2}k. Fr., *acide fulminique*. Ger., *Knallsäure*, *Fulminsäure*, *Paracyansäure*. Nitro-acetonitrile, a dibasic acid not yet isolated, $C_2H_2N_2O_2$, or, according to Kirchhoff, $C_2(NO_2)_2H_4(CH_2)$. [B, 4; "Proc. of the Am. Pharm. Assoc.," x (a, 14).]

FULMINOGEN, n. Fu^{3}l-mi^{2}n'o-je^{2}n. From *fulmen*, lightning, and γεννᾶν, to produce. Fr., *fulminogène*. It., *fulminogene*. Of Liebig, a hypothetical radicle, C_4N_2, containing the same elements as cyanogen. [L, 41, 44 (a, 14).]

FULMINOSE, n. Fu^{3}l'mi^{2}n-os. From *fulmen*, lightning. Fr., *f.* See *Parchment*-PAPER.

FULMINSÄURE (Ger.), n. Ful-men'zoir-e^2. See FULMINIC ACID.

FULMINURATE, n. Fu^{3}l-mi^{2}n'u^2-rat. Fr., *f.* Ger., *Fulminurat*. A salt of fulminuric acid. [B.]

FULMINURIC ACID, n. Fu^{3}l-mi^{2}n-u^2'ri^{2}k. Fr., *acide fulminurique*. Ger., *Fulminursäure*. A crystalline body, $C_3N_3H_3O_3$ (= possibly $C[NO_2]H[CO.NH_2].CN$), acting as a monobasic acid. [B, 4.]

FULVESCENT, adj. Fu^{3}l-ve^{2}s'e^{2}nt. Of a dull-yellow or tawny color. [a, 27.]

FULVIDO-ALBIDUS (Lat.), adj. Fu^{2}l(fu^{4}l)''vi^{2}d(wi^{2}d)-o(o^3)-a^{2}l(a^{3}l)'bi^{2}d-u^{3}s(u^{4}s). From *fulvus*, of a deep yellow, and *albus*, white. Yellowish-white. [a, 27.]

FULVO-FERRUGINOUS, adj. Fu^{3}l''vo-fe^{2}r-ru^{3}j'i^{2}n-u^{3}s. From *fulvus*, of a deep yellow, and *ferrum*, iron. Fr., *orange*, *roussâtre*. Of a dark yellowish-red color. [a, 27.]

FULVO-RUFESCENS (Lat.), adj. Fu^{3}l(fu^{4}l)''vo(wo)-ru^2(ru)-fe^{2}s'se^{2}nz(kans). From *fulvus*, of a deep yellow, and *rufescere*, to become reddish. Of a reddish-yellow color. [a, 27.]

FULVOUS, adj. Fu^{3}l'vu^{3}s. Lat., *fulvus*. Fr., *fauve*. Ger., *fahlgelb*, *falb*. It., *fulvo*. Sp., *bermejo*. Tawny- (or brownish-) yellow. [B, 123, 291 (a, 24).]

FULWA, FULWAL, FULWARAH, n's. See BASSIA *butyracea*.

FUMAGINE (Fr.), n. Fu^6-ma^3-zhen. A disease of plants supposed to be due to parasitic *Fungi*, especially of the genera *Pleospora* and *Fumago*. [B, 121 (a, 24).]

FUMAGO (Lat.), n. f. Fu^2(fu)-ma(ma^3)'go. Gen., *fuma'ginis*. From *fumus*, smoke. A genus of pyrenomycetous *Fungi* parasitic on plants. [A, 301, 518; B, 49.]—**F. salicina.** Of Tulasne, a species found upon willow, plum, oak, and beech trees. [B, 121 (a, 24).]

FUMALIS (Lat.), adj. Fu^2(fu)-mal(ma^{3}l)'i^{2}s. From *fumare*, to smoke. Smoking. See CANDELÆ *fumales*.

FUMANA (Lat.), n. f. Fu^2(fu)-man(ma^{3}n)'a^3. From *fumus*, smoke. A section of the genus *Helianthemum*. The *Fumanieæ* are a section of the *Cisteæ*. [B, 42, 121, 170 (a, 24); L, 41 (a, 21).]

FUMANS (Lat.), adj. Fu^2(fu)'ma^{2}nz(ma^{3}ns). From *fumare*, to smoke. See FUMING.

FUMARAMIDE, n. Fu^2-ma^{2}r'a^{2}m-i^{2}d(id). Fr., *f.* Ger., *Fumaramid*. An amide of fumaric acid, $C_2H_2\langle{CO.NH_2 \atop CO.NH_2} = C_4H_6O_2N_2$. [B, 4.]

FUMARATE, n. Fu^2'ma^{2}r-at. Fr., *f.* A salt of fumaric acid.

FUMARIA (Lat.), n. f. Fu^2(fu)-ma(ma^3)'ri^2-a^3. From *fumus*, smoke. Fr., *fumeterre*. Ger., *Erdrauch*. It., Sp., *f.* [Mex. Ph.]. 1. Fumitory; the typical genus of the *Fumarieæ*. The *Fumariaceæ* (Fr., *fumariacées*; Ger., *Fumariaceen*), or fumeworts, are: Of De Candolle, an order of thalamifloral dicotyledons; of Dumortier, a family of the *Thalamungulia*; of Agardh, an order of the *Brevistylæ*; of Reichenbach and others, a division of the *Papaveraceæ*. The *Fumarideæ* of Gray are a family of the *Thalamifloræ* corresponding to the *Fumariaceæ*. The *Fumarieæ* are: Of Dumortier and of Jussieu, a tribe or division of the *Fumariaceæ*; of others, practically the same as the *Fumariaceæ*. The *Fumarineæ* of Spach are a section of the *Fumariaceæ*. The *Fumarioideæ* are a suborder of the *Papaveraceæ*, corresponding to the *Fumariaceæ*. [B, 19, 34, 42, 120, 121, 170, 173, 180, 245 (a, 24).] 2. Of the pharmacopœias, see *F. officinalis*.—**Aqua fumariæ** [Brunsw. Ph., 1777; Palat. Disp., 1764; Sard. Ph., 1773]. Fr., *eau* (ou *hydrolat*) *de fumeterre*. A preparation made by macerating 1 part of crushed *F. officinalis* in 2 parts of water, and distilling off to one half. [B, 119 (a, 14).]—**Conserva fumariæ** [Sp. Ph., 1798; Sard. Ph., 1773]. Fr., *conserve de fumeterre*. A preparation made by crushing in a mortar six parts of fresh *F. officinalis* with one part of powdered sugar, and mixing the pulp with eighteen parts of sugar. [B, 119 (a, 14).]—**Extractum fumariæ** [Belg. Ph., Gr. Ph., Swiss Ph.]. Fr., *extrait de fumeterre* [Fr. Cod.]. Sp., *extracto de f.* [Sp. Ph.]. The fresh juice, or an infusion or decoction, of *F. officinalis*, filtered and evaporated to a thick (or soft [Fr. Cod.]) extract. [B, 95, 97, 119 (a, 14).]—**F. amarilla** (Sp.). The *Corydalis capnoides*. [B, 121 (a, 24).]—**F. bulbosa.** Fr., *fumeterre bulbeuse*. 1. Of Linnæus, var. α, the *Corydalis cava*; var. β, the *Corydalis fabacea*; var. γ, the *Corydalis solida*. 2. Of Retzius, the *Corydalis solida*. [B, 173, 180 (a, 24).]—**F. capreolata.** A species used

in southern France like *F. officinalis.* [α, 24.]—**F. cava.** The *Corydalis cava.* [B, 180 (α, 24).]—**F. claviculata.** The *Corydalis claviculata.* [B, 180 (α, 24).]—**F. fabacea.** See CORYDALIS *fabacea.* [B, 64 (α, 24).]—**F. Halleri.** The *Corydalis solida.* [B, 173, 180 (α, 24).]—**F. lutea.** The *Corydalis lutea.* [B, 173, 180 (α, 24).]—**F. major.** Probably the *Corydalis cava.* [α, 24.]—**F. media.** A variety of *F. officinalis.* [B, 180 (α, 24).]—**F. minor.** The *Corydalis solida.* [B, 173 (α, 24).]—**F. officinalis.** Fr., *fumeterre* [Fr. Cod.] (*officinale*), *fiel de terre, lait battu, pied de geline, pisse-sang.* Ger., *gemeiner Erdrauch, Erd-* (oder *Feld-*) *Raute, Taubenkropf.* The common fumitory, a small European species naturalized in the United States. It was formerly official in Europe as *herba fumariæ* (seu *fumariæ officinalis*, seu *fumi terræ*, seu *rutæ agrestis*, seu *rutæ silvestris*), and still occurs, in lists of French medicinal plants, as a depurative. The leaves yield by expression a juice having the medicinal properties of the plant. It is sedative, gently tonic and alterative, and in large doses laxative and diuretic; used in visceral obstructions, and in scorbutic and eruptive diseases. According to Hannon, its prolonged use diminishes plethora. It contains *fumarine* (*q. v.*). [B, 5, 19, 173, 180 (α, 24).]—**F. parviflora.** Fr., *fumeterre à petites fleurs.* Ger., *kleinblüthiger Erdrauch.* A species found in southern and western Europe, and acclimatized in the East Indies. It has properties similar to those of *F. officinalis.* Combined with black pepper, it is used in the East Indies for malarial fevers. It is also employed as an anthelminthic, and internally in skin diseases. [B, 172, 180 (α, 24).]—**F. solida.** Fr., *fumeterre bulbeuse.* The *Corydalis solida.* [B, 173, 180 (α, 24).]—**F. spicata.** Fr., *fumeterre à epis.* A species used in southern France like *F. officinalis.* [B, 173, 180 (α, 24).]—**F. tenuifolia.** See *F. parviflora.*—**F. Vaillantii.** Fr., *fumeterre de Vaillant.* Ger., *Vaillants Erdrauch.* A species resembling *F. officinalis* in habitat, appearance, and properties. [B, 173, 180 (α, 24).]—**Infusum fumariæ.** See *Tisane de* FUMETERRE.—**Spiritus fumariæ** [Brunsw. Ph., 1791; Palat. Disp., 1764]. Fr., *esprit de fumeterre.* A preparation made by macerating 6 parts of *F. officinalis* in 4 parts of diluted alcohol and 1 part of water, distilling 1½ part, and redistilling with fresh herbs. [B, 97, 119 (α, 14).]—**Succus fumariæ** [Hess. Ph., 1806, Sard. Ph., 1773], **Succus recens expressus fumariæ.** Fr., *suc* (ou *jus* [Fr. Cod.]) *de fumeterre.* Sp., *jugo de f.* [Sp. Ph., 1798]. The juice of *F. officinalis*, obtained by bruising the fresh herb, expressing, and clarifying by heat. [B, 97, 113 (α, 14).]—**Syrupus fumariæ.** Fr., *sirop de fumeterre* [Fr. Cod.]. Sp., *jarabe de f.* [Sp. Ph.]. 1. Of the Sp. Ph., and various old pharmacopœias, a preparation made, with slight variations, by boiling 345 parts of clarified juice of *F. officinalis* and 620 of white sugar to a proper consistence, and straining. 2. Of the Fr. Cod., 1884, an infusion of 1 part of dry *F. officinalis* in 15 parts of water, expressed, strained, and boiled, with a sufficiency of white sugar, to the proper consistence. [B, 97, 113, 119 (α, 14).]—**Tisana fumariæ.** See *Tisane de* FUMETERRE.

FUMARIC, adj. Fu^2-ma^{2}r'i^{2}k. From *fumaria*, fumatory. Belonging to, or derived from, the genus *Fumaria.* [B.]—**Dibromide of f. acid.** Ger., *Fumarsäuredibromür.* See DIBROMSUCCINIC ACID.—**F. acid.** Fr., *acide fumarique.* Ger., *Fumarsäure, Paramalealsäure.* A dibasic acid, $C_4H_4O_4 = C_2H_2\langle^{CO.OH}_{CO.OH}$, forming prismatic crystals, derived from *Fumaria officinalis, Cetraria islandica*, and several varieties of *Fungi.* [B, 4.]—**F. aldehyde.** An oxidation product of pyromucic acid, $C_4H_4O_3$. [B, 2 (α, 27).]—**F. series of organic acids.** Ger., *Fumarsäurereihe.* The organic acids having the general formula $C_nH_{2n-4}O_4$. [B, 2.]

FUMARIMIDE, n. Fu^{2}m-a^{2}r'i^{2}m-i^{2}d(id). From *fumaria*, fumitory. Fr., *f.* A substance, $(C_4H_2O_2)N_2H_2$, obtained by heating acid ammonium malate to 200° C. [L, 49 (α, 14).]

FUMARINE, n. Fu^{2}m'a^{2}r-en. From *fumaria*, fumitory. Fr., *f.* Ger., *Fumarin.* An alkaloid discovered by Peschier in *Fumaria officinalis*, crystallizing in hexaedral rhomboidal prisms, soluble in alcohol, in chloroform, in benzene, in carbon disulphide, and in ether. It is a powerful antiphlogistic. [B, 244 (α, 27); Hannon (B, 93).]

FUMARSÄURE (Ger.), n. Fu-ma^{3}r'zoir-e^2. See FUMARIC *acid.*—**F.-Aethylester.** See ETHYL *fumarate.*—**F'dibromür.** Dibromsuccinic acid. [B.]—**F'reihe.** See FUMARIC *series of organic acids.*

FUMARYL, n. Fu^{2}m'a^{2}r-i^{2}l. Fr., *fumaryle.* Ger., *F.* The dibasic radicle of fumaric acid, $C_2H_2\langle^{CO'}_{CO'}$. [B.]

FUME, n. Fu^{2}m. Lat., *fumus.* Fr., *fumée.* Ger., *Rauch.* It., *fumo.* Sp., *huma.* A smoke-like or odorous emanation.—**F. of the earth.** The *Fumaria officinalis.* [A, 505 (α, 21).]—**F'wort.** See the major list.

FUMETERRE (Fr.), n. Fu^{6}m-te^{2}r. See FUMARIA and FUMARIA *officinalis.*—**Conserve de f.** See *Conserva* FUMARIÆ.—**Eau de f.** See *Aqua* FUMARIÆ.—**Esprit de f.** See *Spiritus* FUMARIÆ.—**Extrait de f.** [Fr. Cod.]. See *Extractum* FUMARIÆ.—**Extrait de suc de f.** See *Extractum* FUMARIÆ (2d def.).—**F. à épis.** See FUMARIA *spicata.*—**F. à petites fleurs.** See FUMARIA *parviflora.*—**F. bulbeuse.** See CORYDALIS *solida.*—**F. de Vaillant.** See FUMARIA *Vaillantii.*—**F.-jaune.** See CORYDALIS *lutea.*—**Hydrolat de f.** See *Aqua* FUMARIÆ.—**Sirop de f.** [Fr. Cod.]. See *Syrupus* FUMARIÆ.—**Suc de f.** [Fr. Cod.]. See *Succus* FUMARIÆ.—**Tisane de f.** [Fr. Cod.]. A preparation made by infusing 1 part of dried *Fumaria officinalis* for half an hour in 100 parts of boiling water and straining. [B, 113 (α, 14).]

FUMEWORT, n. Fu^{2}m'wu^{5}rt. A name for several species of *Corydalis*; in the pl., *f's*, the *Fumariaceæ.* [B, 19 (α, 24).]—**Golden f.** The *Corydalis aurea.* [B, 275 (α, 24).]—**Great-flowered f.** The *Corydalis nobilis.* [B, 275 (α, 24).]—**Hollow-rooted f.** The *Corydalis cava.* [B, 275 (α, 24).]

FUMIFIER, n. Fum'i^2-fi-u^{5}r. A fumigating apparatus. [L.]

FUMIGATE, v. tr. Fu^{2}m'i^2-gat. Lat., *fumigare.* To subject to the action of fumes.

FUMIGATEUR (Fr.), n. Fu^6-me-ga-tu^{5}r. From *fumigare*, to smoke. 1. A person who gives fumigations. 2. Prepared paper or medicated leaves to be smoked in the form of cigars. [L, 41 (α, 21).]—**F. pectoral.** See CIGARETTES *antiasthmatiques.*

FUMIGATIO (Lat.), n. f. Fu^{2}m(fum)-i^2-ga(ga^3)'shi^2(ti^2)-o. Gen., *-o'nis.* From *fumigare*, to smoke. See FUMIGATION.—**F. antiloimica Gaubii.** Fr., *fumigation de Gaubius* (ou *désinfectante*, ou *antiloïmique*). Syn.: *solutio alexiteria gaubiana.* A fumigation made by mixing 2 parts each of potassium nitrate, common salt, sulphuric acid, and water, and 4 of vinegar. [B, 119 (α, 21).]—**F. chlorata** [Belg. Ph.]. See *F.* CHLORI.—**F. guytoniana, F. guytoniensis, F. muriatico-oxygenata.** See *F.* CHLORI.—**F. nitrica.** See *Species pro vaporibus* ACIDI NITRICI.—**F. oxymuriatica** [Gr. Ph.]. See *F.* CHLORI.—**F. smithiana.** See *Species pro vaporibus* ACIDI NITRICI.

FUMIGATION, n. Fu^{2}m-i^2-ga'shu^{3}n. Lat., *fumigatio* (from *fumigare*, to fumigate) *suffumigatio* (from *suffumigare*, to fumigate from below). Fr., *f.* Ger., *Beräuchern, Beräucherung, Räucherung.* It., *suffumigio, fumigazione.* Sp., *fumigación.* 1. The act or process of filling a closed space with gas or vapors, either with the purpose of destroying noxious products, or as a means of applying volatile medicines to the surface of the body. 2. A class of medicinal preparations to be used in fumigating. [B.]—**Chlorinic f.** See *Fumigatio* CHLORI and *Vapor* CHLORI.—**Dry f.** Fr., *f. sèche.* A f. consisting of the fumes of a medicinal substance unmixed with steam; obtained by burning such a substance on a hot platter in the f. box. [A, 364 (α, 21); L, 88 (α, 21).]—**Emollient f's.** Fr., *f's émollientes.* F's consisting of the vapor of a hot infusion of malvaceous plants. [L, 32 (α, 21).]—**Excitant f.** See *Stimulant f.*—**F. à vapeurs humides** (Fr.). See *Moist f's.*—**F's chlorées** (Fr.). See *Fumigatio* CHLORI.—**F. de Gaubius** (Fr.). See FUMIGATIO *antiloimica Gaubii.*—**F. de Guyton (-Morveau)** (Fr.). See *Fumigatio* CHLORI.—**F. désinfectante.** See *F. de Gaubius.*—**F. de Smith** (Fr.). See *Species pro vaporibus* ACIDI NITRICI.—**F's émollientes** (Fr.). See *Emollient f's.*—**F. guytonienne** (Fr.). See *Fumigatio* CHLORI.—**F. hygiénique.** See *Fumigatio* CHLORI.—**F. spermatique** (Fr.). A method adopted by Spallanzani of causing fecundation experimentally by exposing ova to the supposed aura seminalis. [A, 4.]—**Iodureted f.** A f. consisting of the vapor of iodine; sometimes employed in laryngeal and pulmonary affections. [B, 81 (α, 21).]—**Mercurial f.** Fr., *f. mercurielle, f. de cinabre.* A f. obtained by strewing powdered red sulphide of mercury upon hot coals; used in syphilis. [L, 41, 65 (α, 21).]—**Moist f's.** Fr., *f's à vapeur humides.* F's obtained by subjecting aromatic plants, resinous substances moistened with turpentine, an aqueous or alcoholic solution of a sulphurous, arsenical, iodureted, or mercurial compound, etc., to the action of jet of vapor so that the fumes of the substance are mixed with the latter. [L, 88 (α, 21).]—**Nitrous f.** A f. containing nitre. [L, 41 (α, 21).]—**Sulphurous f.** Fr., *f. sulfureuse.* A f. made by conducting to the affected parts the vapor produced by burning sulphur; employed in eczema, scabies, and other cutaneous diseases, and also for disinfecting purposes. [L, 32, 41, 88 (α, 21).]—**Terebinthinated f.** A f. consisting of turpentine vapor; formerly applied at a high temperature as a bath in chronic rheumatism. [B, 81 (α, 21).]

FUMIGATOR, FUMIGATORY, n's. Fu^{2}m'i^2-gat-o^{2}r, -o-ri^2. Lat., *fumigator, fumigatorium.* Fr., *fumigatoire.* An apparatus for fumigation.

FUMINELLA (Port.), n. Fu-me-ne^{2}l'la^3. A plant of Brazil the flowers of which are said to be used in adulterating saffron. Though resembling saffron in color, they are smaller and heavier and have a rusty tint. [B, 5 (α, 24).]

FUMING, adj. Fu^{2}m'i^{2}n^2. Lat., *fumans* (from *fumare*, to smoke). Fr., *fumant.* Ger., *rauchend.* Giving off fumes.

FUMITERRA (Lat.), n. f. Fu^{2}m(fum)-i^2-te^{2}r'ra^3. From *fumus*, smoke, and *terra*, earth. Fr., *fumeterre.* See FUMARIA *officinalis.*

FUMITORY, n. Fu^{2}m'i^2-to-ri^2. The genus *Fumaria*, especially the *Fumaria officinalis.* [B, 19, 34, 121 (α, 24).]—**Bulbous-rooted f.** See CORYDALIS *solida.*—**Climbing f.** See CORYDALIS *claviculata.*—**Climbing f. of North America.** The *Adlumia cirrhosa.* [B, 275 (α, 24).]—**Common f.** See FUMARIA *officinalis.*—**Conserve of f.** See *Conserva* FUMARIÆ.—**Extract of f.** See *Extractum* FUMARIÆ.—**Yellow f.** Fr., *fumeterre jaune.* See CORYDALIS *lutea.*

FUMO-BRAVO (Port.), n. Fu''mo-bra^3'vo. In Brazil, the *Ageratum conyzoides* and the *Elephantopus Martii.* [B, 121 (α, 24).]

FUMUS (Lat.), n. m. Fu^{2}m(fum)'u^{3}s(u^{4}s). Fr., *fumée.* Ger., *Rauch.* It., *fumo.* Sp., *humo.* Smoke.—**F. albus.** Of the alchemists, mercury. [A, 325.]—**F. citrinus, F. curinus.** Sulphur. [L, 105.]—**F. duplex.** Of the alchemists, sulphur and mercury. [A, 325.]—**F. rubeus.** Orpiment. [A, 325.]—**F. terræ.** See FUMARIA.—**F. virosus.** A volatile virus. [A, 325.]

FUNALIS (Lat.), adj. Fu^{2}n(fun)-al(a^{3}l)'i^{2}s. From *funis*, a rope. Formed of coarse cord-like fibres. [B, 19 (α, 24).]

FUNCHO (Port.), n. Fun'sho. See FŒNICULUM *vulgare.*

FUNCTIO (Lat.), n. f. Fu^{3}n^{2}k(fu^{4}n^{2}k)'shi^2(ti^2)-o. Gen., *-o'nis.* See FUNCTION.—**F. læsa.** Injured or impaired function. [D.]

FUNCTION, n. Fu^{3}n^{2}k'shu^{3}n. Gr., ἐνέργεια. Lat., *functio* (from *fungi*, to be busy). Fr., *fonction.* Ger., *F., Verrichtung.* It., *funzione.* Sp., *función.* The special act, work, or office, of any organ. [K.]—**Animal f's.** The f's of animal life.—**Correlative f's.** The f's by virtue of which one part of an organism exerts a direct influence on another part. [A, 12.]—**F'slehre** (Ger.). See

PHYSIOLOGY.—**F'sstörung** (Ger.). Disturbance of f., as by a morbid process or condition. [D.]—**F'sverminderung** (Ger.). Impairment of f.—**Sustentative f's.** The f's which maintain the material composition of an organism and the balance between waste and assimilation. [A, 12.]—**Vegetative f's.** The f's of vegetative life. —**Vital f's.** The f's essential to the continuance of life.

FUNCTIONAL, adj. Fu^{3}n^{2}k'shu^{3}n-a^{2}l. Lat., *functionalis* (from *functio*, a performing). Fr., *fonctionnel*. Ger., *functionell*. It., *funzionale*. Sp., *funcional*. Pertaining to function. [D.]

FUNDA (Lat.), n. f. Fu^{3}n(fu^{4}n)'da^3. Gr., σφενδόνη. Ger., *Kopfschleuder* (1st def.), *vierköpfige Binde* (2d def.). 1. An old device for extracting the head of the fœtus after its detachment from the trunk. 2. A four-tailed bandage. [A, 322.]—**F. Galeni, F. maxillæ, F. maxillaris.** Ger., *Kinnbackenschleuderbinde*. See *Four-tailed* BANDAGE.—**F. nasalis.** Ger., *Nasenschleuder*. A four-tailed bandage for the nose. [L, 135 (*a*, 14).]—**F. Retzii.** See LIGAMENTUM *fundiforme Retzii*.—**F. superficialis vesicæ** [Barkow]. The sling-like bundles of muscular fibres near the attachment of the urachus to the urinary bladder. [L, 31.]

FUNDAL, adj. Fu^{3}n'da^{2}l. Pertaining to the fundus of an organ (*e. g.*, the uterus).

FUNDALIA (Lat.), n. n. pl. Fu^{3}n(fu^{4}n)-dal(da^{3}l)'i^2-a^3. Of Lully, fæculæ. [A, 325.]

FUNDAMENT, n. Fu^{3}nd'a-me^{2}nt. Lat., *fundamentum* (from *fundare*, to lay the bottom). Fr., *fondament*. Ger., *Hintere, After*. See ANUS.

FUNDAMENTAL, adj. Fu^{3}n-da-me^{2}nt'a^{2}l. Lat., *fundamentalis*. Fr., *fondamental*. Ger., *wesentlich*. It., *fondamentale*. Sp., *f*. 1 Serving as a foundation. 2. Essential (said of the axis of a plant, and its appendages). [B, 19, 291 (*a*, 24).] See *F.* TISSUE and *F.* SPIRAL.

FUNDAMENTUM (Lat.), n. n. Fu^{3}n(fu^{4}n)-da^3-me^{2}nt'u^{3}m(u^{4}m). From *fundare*, to lay the bottom of. A foundation, groundwork, basis. [A, 312 (*a*, 21).]—**F. cellulare.** See STROMA.

FUNDI, n. See FUNDUNGI.

FUNDSCHEIN (Ger.), n. Fund'shin. Lat., *visum repertum*. A physician's certificate as to the cause of a death. [L, 80 (*a*, 14).]

FUNDUNGI, n. The *Paspalum exile*. [B, 121 (*a*, 24).]

FUNDUS (Lat.), n. m. Fu^{3}nd(fu^{4}nd)'u^{3}s(u^{4}s). Gr., πυθμήν, πύνδαξ. Fr., *fond*. Ger., *Grund*. The bottom of a hollow structure; that portion of its interior which is farthest from the point of observation or access.—**F. oculi.** Fr., *fond d l'œil*. Ger., *Augengrund, Augenhintergrund*. The bottom or background of the eye as seen with the ophthalmoscope. [F.]—**F. of a gland.** The bottom or that portion of the cavity of a gland most distant from its excretory duct. [L.]—**F. of the bladder.** See *F. vesicæ urinariæ*.—**F. of the eye.** See *F. oculi*.—**F. of the gall-bladder.** Lat., *f. vesicæ* (seu *vesiculæ felleæ*. The body of the gall-bladder. [C.]—**F. of the stomach.** Lat., *f. ventriculi*. The greater curvature of the stomach. [A, 325.]—**F. of the urinary bladder.** See *F. vesicæ urinariæ*.—**F. of the vagina.** See VAULT *of the vagina*.—**F. of the womb.** See *F. uteri*.—**F. sacci lacrimalis.** The upper end of the lacrymal sac. [F.]—**F. uteri.** Fr., *fond de l'utérus*. Ger., *Grund des Uterus, Uterusgrund*. That portion of the organ which is situated above the uterine orifices of the oviducts. —**F. vaginæ.** See VAULT *of the vagina*.—**F. ventriculi.** See *F. of the stomach*.—**F. vesicæ felleæ.** See *F. of the gall-bladder*.—**F. vesicæ of Vesalius.** See *Superior f. of the urinary bladder*. —**F. vesicæ seminalis.** The bottom of the upper portion of a vesicula seminalis. [L, 175.]—**F. vesicæ urinariæ.** See BASIS *vesicæ urinariæ*.—**F. vesiculæ felleæ.** See *F. of the gall-bladder*.—**Inferior f. of the urinary bladder.** See BASIS *vesicæ urinariæ*.—**Superior f. of the urinary bladder.** The superior ovoid portion of the bladder. [L, 142.]

FUNEBRALIS (Lat.), adj. Fu^{3}n(fun)-e(a)-bral(bra^{3}l)'i^{2}s. From *funus*, a funeral procession. Fr., *funèbre*. Of animals, having sombre colors. [L, 180.]

FÜNF (Ger.), adj. Fu^{4}nf. Five.—**F'blatt, F'blattkraut.** The *Potentilla reptans*. [B, 121, 180 (*a*, 24).]—**F'blättrig.** Five-leaved. [B.]—**F'blumenblättrig.** Pentapetalous. [L, 43.]—**F'blüthig.** Quinquefloral. [L, 43.]—**F'eckig.** Pentagonal. [L, 43.]—**F. fächerig.** Five-celled, quinquelocular. [B, 123 (*a*, 24).]—**F'fingerig.** Quinquedigitate. [L, 80.]—**F'fingerkraut.** The *Potentilla reptans*. [B, 121, 180 (*a*, 24).]—**F'jährig.** Quinquennial. [L, 80.]—**F'kelchblättrig.** Pentasepalous. [L, 43.]—**F'klappig.** Five-valved, quinquevalvis. [B, 123 (*a*, 24).]—**F'ling.** A quintuplet. [A, 521.]—**F'männig.** See PENTANDROUS.—**F'monatlich.** Quinquemestris. [L, 80.]—**F'mund.** See PENTASTOMA.—**F'nervig.** Five-nerved. [L, 43.]—**F'paarig.** Quinquejugal. [L, 43.]—**F'samig.** Pentaspermous. [L, 43.]—**F'schichtig.** See QUINCUNCIAL. —**F'stempelige.** See PENTAGYNIA.—**F'sternkraut.** The herb of *Fumaria officinalis*. [B, 180 (*a*, 24).]—**F'tägig.** Quintan. [L, 43.]—**F'tgebärende.** A quintipara.—**F'theilig.** With five divisions; five-parted. [*a*, 24.]—**F'weibig.** Pentagynous. [L, 80.]—**F'werthig.** Quinquivalent. [B.]—**F'werthigkeit.** Quinquivalence. [B.]—**F'winkilg.** Pentagonal. [L, 80.]

FUNGADÆ (Lat.), n. f. pl. Fu^{3}n^2(fu^{4}n^2)'ga^{2}d(ga^{3}d)-e(a^3-e^2). See FUNGOIDEÆ.

FUNGAGINA (It.), n. Fun^2-ga^3-je'na^3. The *Agaricus aggregatus*. [B, 121 (*a*, 24).]

FUNGAGNINO (It.), n. Fun^2-ga^{3}n-ye'no. The *Polyporus frondosus*. [B, 121 (*a*, 24).]

FUNGAL, adj. Fu^{3}n^2'ga^{2}l. Lat., *fungalis* (from *fungus*, a mushroom). Of or resembling the *Fungi*; as a n., in the pl., *f's* (Lat., *Fungales*), of Lindley, an alliance (the f. alliance) of the *Escurales*, comprising the *Fungi, Lichenes*, and *Algæ*; and subsequently an alliance of the *Thallogenæ*, consisting of the *Hymenomycetes, Gasteromycetes, Coniomycetes, Hyphomycetes*, and *Physomycetes*. [B, 19, 75, 121, 170 (*a*, 24).]

FUNGATE, n. Fu^{3}n^2'gat. Fr., *f*. A salt of fungic acid. [A, 385.]

FUNGATING, adj. Fu^{3}n^2'gat-i^{2}n^2. Assuming a fungous appearance (said of ulcers, etc.).

FUNGELLUS (Lat.), n. m. Fu^{3}n(fu^{4}n^2)-je^{2}l(ge^{2}l)'lu^{3}s(lu^{4}s). Dim. of *fungus*, a mushroom. A name given by classic authors to different *Fungi*, generally epiphytic. [B, 121 (*a*, 24).]

FUNG-HEANG (Chin.), n. A resinous tree found in China, probably the *Liquidambar formosana*. [B, 18 (*a*, 24).]

FUNGI (Lat.), n. m. pl. Fu^{3}n(fu^{4}n)'ji(ge). Fr., *fungacées, champignons*. Ger., *Pilze, Schwämme*. It., *funghi*. Sp., *hongos, setas*. Syn.: *Hysterophyta, Fungales*. A section of cryptogams closely related to the *Algæ*, from which they are chiefly distinguished by the absence of chlorophyll, which renders them dependent upon organic matter for their nutrition. They are accordingly saprophytes, living upon dead or decaying animal or vegetable matter, or parasites, subsisting on other living organisms, ectoparasites when growing on the surface, endoparasites when penetrating the interior. In the *F.* there is no distinction into axis, root, or appendages, the whole being merged into one mass, called a thallus, which is divided into two portions—the vegetative and the reproductive. The first, known as the mycelium, consists of slender, segmented or unsegmented, colorless filaments, called hyphæ, which in some *F.* possess lateral branches (haustoria), which serve to fix the plant as well as to extract nourishment. The only members which do not produce hyphæ are some of the lowest, and certain degenerative higher forms (*e. g.*, the yeast plant, in which the whole vegetative part consists of cells or chains of cells). The reproductive portion either is the terminal joint of a filament, when it is called a spore, or is lodged in a sac (*ascus*), when it is called a sporidium. In a large number of *F.* sexual reproduction is unknown. In some species (*e. g.*, *Mucor*) sexual reproduction takes place by conjugation, and in others by the production of oospores, the last being regarded by some authors as degenerate, parasitic, or saprophytic forms of *Algæ*. The *F.* produce asexually by means of conidia or gonidia. In some species, chiefly aquatic, these are motile spores provided with cilia, but in most they are non-motile, thick-walled cells, which eventually become separated from the parent hyphæ. The *F.* of Jussieu, 1728, included the *F.* and *Lichenes* of previous authors. The *F.* of Linnæus and others were an order including *Agaricus, Boletus, Peziza*, and other genera of the higher forms; of Link, an order of the *Anandræ*, including *Agaricus, Russula, Coprinus*, etc. The *F.* of Brongniart comprised the *Tremellineæ, F.* (*Helvellaceæ, Clavarieæ*, and *Agaricеæ*), and the *Clathraceæ*. In modern systems of classification they comprise the *Phycomycetes* (suborders, *Saprolegnieæ, Peronosporeæ, Mucorini*), *Hypodermiæ* (suborders, *Uredineæ, Ustilagineæ*), *Basidiomycetes* (suborders, *Tremellini, Hymenomycetes, Gasteromycetes*), *Ascomycetes* (suborders, *Discomycetes, Erysipheæ, Tuberaceæ, Pyrenomycetes*, and *Lichenes*), *Myxomycetes*, and *Schizomycetes* (see these words). Eichler divides the *F.* into the *Schizomycetes, Blastomycetes* (*Saccharomycetes*), *Myxomycetes, Phycomycetes*, and *Mycomycetes*. The *F.* of Schroter (1885) include the *Myxomycetes, Schizomycetes*, and *Eumycetes*, the latter including the *Chytridiei, Zygomycetes, Oomycetes, Ascomycetes, Uredinei, Auriculariei*, and *Basidiomycetes*, the last being subdivided into the *Tremellinei, Discyomycetes*, and *Eubasidiomycetes* (which last include the *Hymenomycetes, Phalloidei*, and *Gastromycetes*). In De Bary's classification the *Lichenes*, regarded by many as a distinct class, are placed as a suborder, and the *Schizomycetes* as an order of plants. The latter are considered by some as belonging to the animal kingdom, and by others as a suborder of the *Schizophyta* (*q. v.*). The *F.* have but little economic importance; a few are edible, most are poisonous, and few have a medicinal value. The lower forms have of late a scientific value as ætiological factors of disease. [B, 19, 77, 104, 121, 180, 185, 291 (*a*, 24).] See also under FUNGUS.

FUNGIACÉ (Fr.), adj. Fu^{3}n^2-zhe-a^3-sa. See FUNGOUS.

FUNGIATE, n. Fu^{3}n'ji^2-at. See FUNGATE.

FUNGIC, adj. Fu^{3}n'ji^{2}k. Pertaining to or derived from *Fungi*. [L, 56 (*a*, 17).]—**F. acid.** Fr., *acide fongique*. Ger., *Fungussäure*. An acid said to be found in certain *Fungi*. [B, 38.]

FUNGICOLUS (Lat.), adj. Fu^{3}n(fu^{4}n^2)-ji^{2}k(gi^{2}k)'o^{2}l-u^{3}s(u^{4}s). From *fungus* (*q. v.*), and *colere*, to inhabit. Fr., *fungicole*. Ger., *pilzwohnend*. Parasitic on or in *Fungi*.

FUNGIFORM, adj. Fu^{3}n'ji^2-fo^{2}rm. Lat., *fungiformis* (from *fungus*, a mushroom, and *forma*, form). Fr., *fongiforme, fungiforme*. Ger., *keulenförmig, pilzförmig*. Fungus-shaped, having the form of a mushroom. [J; L.]

FUNGILLIFORM, adj. Fu^{3}n-ji^{2}l'i^2-fo^{2}rm. From *fungillus*, a small epiphytic agaric, and *forma*, form. Shaped like a fungillus.

FUNGILLUS (Lat.), n. m. Fu^{3}n(fu^{4}n)-ji^{2}l(gi^{2}l)'lu^{3}s(lu^{4}s). Dim. of *fungus*. An epiphytic agaric of small size. [B, 121 (*a*, 24).]

FUNGIMORPHÆ (Lat.), n. f. pl. Fu^{3}n(fu^{4}n^2)-ji(gi^2)-mo^{2}rf'e-(a^3-e^2). From *fungus*, a mushroom, and μορφή, form. A family of the *Titanoideæ*. [B, 121 (*a*, 24).]

FUNGIN, n. Fu^{3}n'ji^{2}n. From *fungus*, a mushroom. Fr., *fongine*. Ger., *F., Schwammstoff*. The solid tissue which forms the basis of *Fungi*; now known to be a variety of cellulose. [B, 2.]

FUNGINÆ (Lat.), n. f. pl. Fu^{3}n(fu^{4}n^2)-jin(gen)'e(a^3-e^2). From *fungus*, a mushroom. 1. Of Agardh, a division of the *Confervoideæ*. 2. Of Leunis, an order of cellular crypotogams, comprising the *Hymenomycetes, Gasteromycetes, Hyphomycetes*, and *Coniomycetes*. The *Fungineæ* of Mathieu are a tribe of *Fungi*, including the *Helvellaceæ, Clavariеæ*, and *Agaricеæ*. [B, 170 (*a*, 24).]

FUNGIVOROUS, adj. Fu^{3}n-ji^{2}v′o^{2}r-u^{3}s. From *fungus*, a mushroom, and *vorare*, to devour. Fr., *fongivore.* Subsisting on *Fungi.* [α, 17.]

FUNGOBOLETUS (Lat.), n. m. Fu^{3}n(fu^{4}n^{2})-go(go^{3})-bol e(a)′-tu^{3}s(tu^{4}s). From *fungus*, a mushroom, and *boletus* (*q. v.*). The *Cortinarius violaceus.* [B, 121 (α, 24).]

FUNGOID, adj. Fu^{3}n^{2}′goid. From *fungus*, a mushroom, and εἶδος, resemblance. Fr., *fongoïde, fungiace.* Ger., *schwammartig.* See Mycetoid. The *Fungoidea* are: Of Batsch, a family of cryptogamous plants of the *Aphylla;* of Scopoli, a tribe of cryptogamous plants, including genera in which the fructification is exposed, as in *Clavaria* and other hymenomycetous *Fungi*, and genera in which the fructification is inclosed, as in *Peziza*, etc. [B, 170 (α, 24).]

FUNGOIDES (Lat.), n. f. Fu^{3}n^{2}(fu^{4}n^{2})-go(go^{2})-i(e)′dez(das). A name for some species of *Lycoperdon, Peziza*, and *Cyphella.* [B, 121 (α, 24).]—**F. auriculata.** The *Peziza cochleata umbrina.* [B, 173 (α, 24).]

FUNGOSÆ (Lat.), n. f. pl. Fu^{3}n^{2}(fu^{4}n^{2})-go′se(sa^{3}-e^{2}). From *fungus*, a mushroom. A class of plants, consisting of *Byssus, Clavaria, Helvella, Boletus, Peziza, Lycoperdon, Mucor*, etc. [B, 170 (α, 24).]

FUNGOSITY, n. Fu^{3}n^{2}-go^{2}s′i^{2}t-i^{2}. Lat., *fungositas* (from *fungus*, a mushroom). Fr., *fongosité.* Ger., *Fungosität* (1st def.), *schwammartiger Auswuchs* (2d def.). It., *fungosità.* Sp., *fungosidad.* 1. The state of being fungous. 2. An exuberant outgrowth. —**Urethral f.** See *Urethral* papilloma.

FUNGOUS, adj. Fu^{3}n^{2}′gu^{3}s. Lat., *fungosus* (from *fungus*, a mushroom). Fr., *fongueux.* Ger., *schwammig, schwammartig.* Like a fungus; soft, spongy, exuberant. [B, 1, 123 (α, 24); E.]

FUNG-SHU (Chin.), n. An unclassified tree, yielding a resin called in commerce *rose maloes.* ["Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]

FUNGULUS (Lat.), n. m. Fu^{3}n^{2}(fu^{4}n^{2})′gu^{2}l(gu^{4}l)-u^{3}s(u^{4}s). Dim. of *fungus*, a mushroom. 1. A small mushroom. 2. In the pl., *Funguli*, a term for several groups of *Fungi* (the *Nidularieæ, Myxomycetes*, etc.). [A, 312 (α, 21); B, 121 (α, 24).]—**F. lichenosus.** A phosphorescent production (the *Nostoc phosphoricus* of Paulet). [B, 121 (α, 24).]

FUNGUS (Lat.), n. m. Fu^{3}n^{2}(fu^{4}n^{2})′gu^{3}s(gu^{4}s). Gr., μύκης. Fr., *fongus, champignon.* Ger., *Schwamm, Pilz.* 1. A mushroom. 2. One of the *Fungi* (*q. v.*). 3. An exuberant, soft, spongy outgrowth. [A, 312 (α, 21).]—**Barberry f.** The *Æcidium berberidis.* [B, 275 (α, 24).]—**Beef-steak f.** The *Fistulina hepatica.* [B, 275 (α, 24).] —**Black-knot f.** The *Sphæria mortosa.* [B, 275 (α, 24).]—**Bleeding f.** See *Medullary* sarcoma.—**Bunt f.** The *Ustilago fœtida.* [B, 275 (α, 24).]—**Caterpillar f.** A name for various species of *Cordiceps.* [B, 275 (α, 24).]—**Cellar f.** The *Lentinus lepideus.* [B, 275 (α, 24).]—**Cleft fungi.** The *Schizomycetes* or fission *Fungi;* so called because they increase by fission. The term is also applicable to the earth-stars (*Geaster*), the peridium of which splits ultimately into several divisions. [B, 19, 77, 291 (α, 24).]—**Club-root f.** The *Plasmodiophora brassicæ.* [B, 275 (α, 24).]—**Coffee-blight f.** The *Hemileia vastatrix.* [B, 275 (α, 24).]—**Cotton f.** See Oidium *albicans.*—**Dust fungi.** The *Coniomycetes;* so called because the spores, which predominate over the receptacle, eventually form a dusty mass. Also the puff-ball, *Lycoperdon bovista.* [B, 19, 180, 185, 291 (α, 24).]—**Dry-rot f.** The f. causing dry-rot (*q. v.*). [B, 19, 185, 275 (α, 24).] See also Polyporus *hybridus*, Polyporus *ulmarius*, and Merulius *lacrimans.*—**Earth-star f.** The genus *Geaster.* [B, 275 (α, 24).]—**Edible tree f. of Tierra del Fuego.** A species of *Cyttaria.* [B, 275 (α, 24).]—**Ergot f.** The *Claviceps purpurea.* [B, 275 (α, 24).]—**Filamentous fungi.** A term reserved by some for the *Hyphomycetes*, but in the sense of *Fungi* in which the vegetative body or thallus consists of filiform elements (*hyphæ*) it includes all the larger groups of *Fungi* except the *Myxomycetes* (placed by De Bary among amœboid animal organisms) and certain degenerate higher forms, such as the yeast-plant. [B, 19, 77 185, 291 (α, 24).]—**Fission fungi.** The *Schizomycetes.* [B, 291 (α, 24).]—**Fly-f.** See Agaricus *muscarius.*—**Fungi ærei hypogæi.** Of Nees, a regnum of fungous plants, including the *Circuli, Sarcoidei*, and *Sphæroidei.* [B, 170 (α, 24).]—**F. albus.** The *Polyporus officinalis.* [B, 180 (α, 24).]—**F. albus acris (seu piperatus).** The *Boletus piperatus.* [α, 24.]—**F. albus saligneus.** The *Polyporus suaveolens.* [α, 24.]—**F. articuli.** Ger., *Gelenkschwamm.* See *Fungous* arthritis.—**F. auricula, F. auriculam referens.** The *Exidia auricula Judæ.* [B, 180 (α, 24).]—**F. benignus testiculi.** See *F. testis benignus.*—**F. bovista.** See Lycoperdon.—**F. cæsareus.** The *Agaricus cæsareus.* [B, 121 (α, 24).]—**Fungi calycini.** See under *Fungi utrini.*—**F. cancrosus hæmatodes.** See *F. hæmatodes* (1st def.).—**F. cancrosus medullaris.** See *Medullary* sarcoma.—**F. cavernosus.** The *Morchella deliciosa.* [B, 173 (α, 24).]—**F. cerebralis.** See *Medullary* sarcoma.—**F. cerebri.** Fr., *hernie du cerveau.* Ger., *Hirnschwamm.* A fungous outgrowth from the brain through an opening in the skull. Cf. Hernia *cerebri.*—**F. cervinus.** The *Elaphomyces cervinus.* [B, 180 (α, 24).]—**F. chirurgorum** [Ger. Ph.]. Ger., *Wundschwamm.* 1. See Amadou. 2. The *Lycoperdon bovista.* [B, 180 (α, 24).]—**Fungi clavati et pilsati.** Of Nees, a regnum of fungous plants, including the *Circuli, Clavaria*, and *Fungi pileati* (*Agaricus, Boletus*, etc.). [B, 170 (α, 24).]—**F. columbinus.** See Cedar-*apple.*—**F. comosus.** See Bedegar.—**F. coralloides.** The *Clavaria coralloides.* [L, 116.]—**F. cranii.** Ger., *Hirnschädelschwamm.* A fungous growth of the cranial bones. [α, 34.]—**F. cynomorii.** The *Cynomorium coccineum.* [B, 180 (α, 24).]—**F. cynosbati.** See Bedegar.—**F. duræ matris.** See *F. of the dura mater.*—**F. eryngii.** The *Agaricus eryngii.* [B, 173 (α, 24).]—**F. favaginosus.** See Boletus *esculentus* (2d def.).—**F. hæmatodes.** Fr., *cancer hématoïde, hématoncie fongoïde, carcinome sanglant.* Ger., *Blutschwamm.* See *Medullary* sarcoma, *Cavernous* angeioma, and Angeidiospongus.—**F. igniarius.** The *Polyporus fomentarius.* [B, 121 (α, 24).]—**F. igniarius præparatus** [Ger. Ph.]. See Amadou.—**Fungi imperfecti.** Those *Fungi* which were formerly regarded as forming distinct genera and orders, but which are now known to be only forms of various *Ascomycetes* in a certain stage of development.—**F. juniperi virginianæ.** See Cedar-*apple.*—**F. laricis** [Ger. Ph., 1st ed.]. See Polyporus *officinalis.*—**F. mammæ.** Ger., *Brustkrebs, Brustscirrh.* Cancer of the breast. [α, 34.]—**F. marinus.** See Spongia *marina.*—**F. maximus rotundus pulverulentus.** The *Bovista gigantea* (the *Lycoperdon bovista* of Linnæus, not of Persoon). [α, 24.]—**F. medullaris.** See *Medullary* sarcoma.—**F. medullaris oculi (seu retinæ).** See Glioma *retinæ.*—**F. melanodes.** See *Melanotic* cancer.—**F. melitensis.** See Cynomorium *coccineum.*—**F. membranaceus.** The *Exidia auricula Judæ.*—**F. muscarius.** The *Agaricus muscarius.* [B, 121 (α, 24).]—**F. of Malta.** Lat., *f. melitensis.* Ger., *Malteser Schwamm.* The *Cynomorium coccineum.* [B, 180 (α, 24).]—**F. of the dura mater.** Ger., *Hirnhautschwamm.* A tumor (usually medullary sarcoma) springing from the dura mater and perforating the skull and its integuments. [A, 319, 326 (α, 21).] —**F. of the testicle.** See *F. testis benignus* and *F. testis malignus.*—**F. of thrush.** See Oidium *albicans.*—**F. orbicularis, F. ovatus.** The *Lycoperdon bovista.* [B, 180 (α, 24).]—**F. phalloides.** The *Phallus impudicus.* [L, 116.]—**F. piperatus.** See Agaricus *piperatus.*—**Fungi pistillares.** See under *Fungi utrini.*—**F. porosus.** See Boletus *granulatus.*—**F. porriginis.** See Achorion *Schönleinii.*—**F. pulverulentus.** The *Lycoperdon bovista.* [B, 180 (α, 24).]—**F. quercinus, F. quercus.** See Polyporus *igniarius* and Polyporus *fomentarius.*—**F. quernus.** See *F. chirurgorum.*—**F. rosarum.** See Bedegar.—**F. rotundus.** The *Lycoperdon bovista.* [B, 180 (α, 24).]—**F. salicis.** The *Polyporus suaveolens.* [B, 121 (α, 24).]—**F. sambuci, F. sambucinus.** The *Exidia auricula Judæ.* [B, 121, 180 (α, 24).] —**F'säure** (Ger.). See Fungic *acid.*—**F. secalis.** See Ergot.—**F.-stone.** See Polyporus *tuberaster.*—**F. stypticus.** See Amadou. —**F. suaveolens.** See Polyporus *suaveolens.*—**F. testis.** See *F. testis benignus* and *F. testis malignus.*—**F. testis benignus.** A non-malignant fungous outgrowth from the testicle appearing through an opening in the scrotum.—**F. testis malignus.** A malignant fungous outgrowth from the testicle.—**F. testis profundus.** A f. of the testicle that protrudes through the albuginea. [A, 326 (α, 21).]—**F. testis superficialis.** A f. of the testicle that is covered by the albuginea. [A, 326 (α, 21).]—**F. typhoides.** See Cynomorium *coccineum.*—**F. umbilicalis.** Ger., *Nabelschwamm.* A fungous state of the stump of the umbilical cord in new-born infants. [D, 29.]—**Fungi utrini.** Of Nees, a regnum of *Fungi*, including *Ciculi, Fungi pistillares* (the genera *Batarrea, Hymenophallus, Phallus*, and *Clathrus*), and *Fungi calycini* (the genera *Peziza* and *Ascobolus*). [B, 170 (α, 24).]—**F. vasculosus.** See Nævus *vascularis.*—**F. vescus.** See Boletus *esculentus* (2d def.).—**F. vinosus.** See *Wine-cellar f.*—**Germ fungi.** See Blastomycetes. —**Jew's-ear f.** The *Exidia auricula Judæ.* [B, 275 (α, 24).]—**Man-f.** The genus *Geaster.* [B, 275 (α, 24).]—**Mold fungi.** The *Mucorini.* [B. 19, 291 (α, 24).]—**Morel f.** See Morchella.—**New Zealand f.** The *Hirneola polytrichia.* [B. 185 (α, 24).]—**Oak-leather f.** The *Xylostroma giganteum.* [B, 275 (α, 24).]—**Parasitic fungi.** Fungi growing on living bodies whether animal or vegetable. Cf. Saprophyte. [α. 24.]—**Pepper-brand f.** The *Ustilago fœtida.* [B, 275 (α, 24).]—**Potato-disease f.** The *Peronospora infestans.* [B, 275 (α, 24).]—**Rust f.** The *Trichobasis rubigo vera.* [B, 275 (α, 24).]—**Sap-ball f.** The *Polyporus squamosus, Polyporus betulinus*, etc. [B, 275 (α, 24).]—**Smut f.** The *Ustilago segetum.* [B, 275 (α, 24).]—**Split-fungi.** The *Schizomycetes.* [B.]—**Stinking polecat f.** The *Phallus impudicus.* [B, 275 (α, 24).]—**Sugar f.** The *Saccharomyces cerevisiæ.* In the pl., see Saccharomycetes. [B, 77, 291 (α, 24).]—**Thrush-f.** See Oidium *albicans.*—**Tinctura fungi cynosbati.** See *Tinctura* cynosbati *fungi Rademacheri.*—**Vinegar f.** See *Vinegar* ferment.—**Wine-cellar f.** Lat., *f. vinosus.* The *Zasmidium cellare.* [B, 275 (α, 24).]—**Witch's-butter f.** The *Exidia glandulosa.* [B, 275 (α, 24).]—**Yeast-fungi, Yeast-plant fungi.** The *Saccharomycetes.* [B, 291 (α, 24).]

FUNIC, adj. Fu^{2}′ni^{2}k. From *funis*, a rope. See Funicular.

FUNICLE, n. Fu^{2}′ni^{2}k′l. Lat., *funiculus* (from *funis*, a rope). Fr., *funicle.* Ger., *Faden, Strang.* It., *funicolo.* Sp., *funiculo, cordón.* A slender cord. [A, 312 (α, 21).]

FUNICULAR, adj. Fu^{2}-ni^{2}k′u^{2}-la^{3}r. Lat., *funicularis* (from *funiculus*, a slender rope. Fr., *funiculaire.* Ger., *strangförmig* (1st def.), *dem Nabelstrang angehörig* (3d def.). 1. See Funiform. 2. Of or pertaining to a funiculus or a funis. [B, 123 (α, 24).] 3. Pertaining to the umbilical cord.

FUNICULATE, adj. Fu^{2}n-i^{2}k′u^{2}l-at. Lat., *funiculatus.* Fr., *funiculé.* Ger., *nabelsträngig.* Furnished with a funiculus. [B, 1, 123 (α, 24).]

FUNICULE (Fr.), n. Fu^{6}-ne-ku^{6}l. See Funicle and Funiculus. —**F. accessoire, F. grêle, F. marginale.** The dorso-mesial (dorsal median or posterior median) column of the spinal cord. [I, 43.]

FUNICULITIS (Lat.), n. f. Fu^{2}(fu)-ni^{2}k-u^{2}l(u^{4}l)-i(e)′ti^{2}s. For deriv, see Funiculus and *-itis**. Fr., *funiculite.* Ger., *Strangentzündung, Samenstrangentzündung.* Inflammation of the spermatic cord; usually of gonorrhœal origin. [A, 319, 326 (α, 21); Tartarin, "Concours méd.," March 18, 1882.]

FUNICULOSE, adj. Fu^{2}-ni^{2}k′u^{2}-los. See Funicular.

FUNICULUS (Lat.), n. m. Fu^{2}(fu)-ni^{2}k′u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Dim. of *funis*, a rope. Fr., *funicule, funicle, faisceau nerveux* (1st def.), *cordon ombilical* (ou *placentaire*) (3d def.). Ger., *Strang, Nervenfaserbündel* (1st def.), *secundäres Nervenbündel* (1st def.), *Nabelstrang* (3d def.), *Keimgang* (3d def.), *Nabelschnur* (3d def.). It., *funicolo.* Sp., *funículo.* A cord or fasciculus. 1. A variable number of nerve-fibres united into a bundle and surrounded by a

tubular connective-tissue sheath (perineurium). A nerve usually consists of several such funiculi. 2. A column of the spinal cord. 3. The umbilical cord; in botany, the chorda umbilicalis. 4. In the *Polyzoa*, the gastro-parietal band. [I, 6 (K); J, 10, 30, 31; L, 180.] —**Anterior funiculi.** See *Anterior* COLUMNS *of the spinal cord.* —**Anterior lateral f.** See *Antero-lateral* COLUMN.—**Burdach's f. cuneatus, Cuneate f.** Lat., *f. cuneatus.* Fr., *cordon cunéiforme.* Ger., *Keilstrang.* The wedge-shaped expansion of a dorsal lateral column of the spinal cord at its termination in the oblongata. [I, 29 (K).]—**Funiculi anteriores medullæ spinalis.** See *Anterior* COLUMNS *of the spinal cord.*—**F. anterolateralis.** See *Antero-lateral* COLUMN.—**Funiculi arciformes olivæ.** See *Arciform* FIBRES.—**F. centralis.** A central column composed of cellular tissue prolonged into the stripes of the tunica exterior in mosses. [B, 198.]—**Funiculi cerebrales** [Bellingeri]. See *Anterior* COLUMNS *of the spinal cord.*—**F. cuneatus.** See *Cuneate f.*—**F. cuneatus lateralis.** Henle's name for the part of the oblongata commonly called f. of Rolando. [I, 15, 84.]—**F. cuneatus medialis, F. cuneiformis.** See *Cuneate f.*—**F. dorsalis.** See *Spinal* CORD.—**Funiculi funis umbilicalis.** An old term for the sepimenta of the umbilical cord. [A, 19.]—**Funiculi graciles cerebelli.** Fr., *funicules* (ou *cordons*) *grêles.* Ger., *zarte Strānge, solitäre Bündel.* The prolongations of the dorsal columns of the spinal cord in the oblongata. They diverge to form the lower lateral boundaries of the fourth ventricle. [I, 17 (K).]—**F. griseus anterior.** See *Anterior gray* CORNU.—**F. griseus posterior.** See *Posterior* CORNU *of the spinal cord.*—**Funiculi innominati.** See FASCICULI *teretes.*—**F. lateralis.** See *Lateral* COLUMN.—**Funiculi lateralis cerebelli.** The lateral fibres of the restiform body. [*a*, 29.]—**F. lateralis medullæ oblongatæ.** The continuation of the lateral column of the spinal cord into the oblongata. [I, 6.]—**F. lateralis medullæ spinalis.** See *Lateral* COLUMN.—**F. ligamentosus.** The ligamentum carpi ulnare of Arnold. [L, 31.]—**Funiculi longitudinales.** See FASCICULI *teretes.*—**F. medius medullæ spinalis.** See *Lateral* COLUMN.—**F. nerveus.** Of De la Boc. the habena. [I, 3 (K).]—**F. nervosus.** See *F.* (1st def.).—**F. nuclei olivæ.** A tract of nerve-fibres in the oblongata which enters the hilum of the corpus dentatum olivæ. [I, 6 (K).]—**F. of a nerve.** See *F.* (1st def.).—**F. of Rolando.** Lat., *f. rolandicus.* Fr., *cordon de Rolando.* Ger., *Rolando'scher Strang.* Of Schwalbe, a prominence which forms the continuation of the dorsal lateral column of the spinal cord, and terminates in the tubercle of Rolando (*q. v.*). [I, 29 (K).]—**F. olivæ, F. olivaris, F. ovalis.** See *Lateral* COLUMN.—**F. pontis inferior.** The more ventral (lower or superficial) transverse fibres of the pons Varolii. [I, 424.]—**F. pontis superior.** The more dorsal (upper or deeper) transverse fibres of the pons Varolii. [I.] —**F. posterior, Funiculi posteriores medullæ spinalis.** The posterior columns of the spinal cord. [L, 115.]—**F. pyramidalis.** See PYRAMID *of the spinal cord.*—**F. pyramidis** (seu **pyramidum**). A column or tract of fibres in one of the pyramids of the oblongata. [I, 3 (K).]—**F. restiformis.** See *Restiform* BODY. —**F. sacralis.** The pelvic portion of the sympathetic nerve. [L, 7 (*a*, 29).]—**F. scleræ, F. scleroticæ.** Of Hannover, a bundle of connective-tissue fibres piercing the sclerotic at a point corresponding to the fovea centralis, which he supposed to be a remnant of the fœtal ocular cleft. [H.]—**Funiculi siliquæ.** Ger., *Hülsenstränge.* Of Burdach, certain fibres of the lateral tract of the spinal cord which make a circuit around the olivary bodies. [I, 6 (K).]—**F. siliquæ externus.** A tract of longitudinal nerve-fibres lying immediately to the outer side of the olivary body. [I, 3 (K).]—**F. siliquæ internus.** Of Burdach, a tract of longitudinal nerve-fibres which lies in the groove that separates the restiform from the olivary body and surrounds the base of the latter, lying to its mesal side. [I, 3 (K).]—**F. solitarius.** See *Respiratory* FASCICULUS.—**F. spermaticus.** See *Spermatic* CORD.—**F. spinalis.** See *Spinal* CORD.—**Funiculi teretes.** See FASCICULI *teretes.*—**F. thoracicus nervi sympathici.** The thoracic portion of the sympathetic nerve. [L, 7 (*a*, 29).]—**F. transversus.** See *Anterior cerebral* COMMISSURE.—**F. tuberis.** See INFUNDIBULUM.—**F. tympani.** See CHORDA *tympani.*—**F. umbilicalis, F. umbilicaris.** See *Umbilical* CORD.—**F. uteri.** The round ligament of the uterus. [L, 7 (*a*, 29).]—**F. varicosus.** See CIRSOCELE.—**Lateral cuneate f.** See *F. of Rolando.*

FUNIFEROUS, adj. Fu^{2}-ni^{3}f'e^{2}r-u^{3}s. Lat., *funiferus* (from *funis*, a rope, and *ferre*, to bear). Fr., *funifère.* Having a cord-like appendage; of plants, having long, cord-like roots projecting from the stems, which descend perpendicularly to the ground. [L, 41, 180.]

FUNIFORM, adj. Fu^{2}n'i^{2}-fo^{2}rm. Lat., *funiformis* (from *funis*, a rope, and *forma*, form). Fr., *funiforme.* Ger., *strangförmig.* Having the form of a cord, cable, or funiculus. [B, 121, 173 (*a*, 24).]

FUNILIFORM, adj. Fu^{2}-ni^{2}l'i^{2}-fo^{2}rm. Lat., *funiliformis* (from *funis*, a rope, and *forma*, form). Fr., *funiliforme.* Formed of cord-like fibres (said of roots). [B, 1, 19 (*a*, 24).]

FUNIS (Lat.), n. m. Fu^{2}(fu)'ni^{2}s. Gen., *funis.* Gr., *πεῖσμα, σχοινίον.* 1. A rope, line, or cord. [A, 312 (*a*, 21).] 2. See *Umbilical* CORD.—**F. arborum.** The *Smilax lævis.* [L, 116.]—**F. brachii.** Of the Arabians, the median vein of the arm. [Zecchius (A, 325).]—**Funes cordis.** See COLUMNÆ *carneæ.*—**F. crepitans major.** The *Cissus latifolia* and *Cissus carnosa.* [*a*, 24.]—**F. felleus.** A plant of the *Menispermeæ*, employed in India as a substitute for quinine. [L, 87, 105 (*a*, 14).]—**F. furcalis.** Fr., *cordon en fourche.* A form of marginal insertion of the umbilical cord in which the vessels diverge and enter the placenta at different points. [A, 52.] See also *Velamentous* INSERTION, of which this condition is a lesser degree.—**F. murænarum latifolius.** See AYER.—**F. musarius latifolius.** The *Melodoreum latifolium.* [B, 121 (*a*, 24).]—**F. quadrangularis.** The *Cissus quadrangularis.* [*a*, 24.]—**Funes semicirculares.** See *Semicircular* CANALS.—**F. umbilicalis.** See *Umbilical* CORD.—**F. uncatus** (**angustifolius**). The *Uncaria gambier.* [B, 18 (*a*, 24).]—**F. uncatus latifolius.** The *Uncaria acida.* [B, 214.]—**F. viminalis.** The genus *Ventilago.* [B, 121 (*a*, 24).]

FUNKE (Ger.), n. Funk'e^{2}. See SPARK.—**F'nsehen.** See PHOTOPSIA.

FUNKELN (Ger.), n. Fun^{2}'ke^{2}ln. Scintillation. [L, 80 (*a*, 21).]

FUNKIA (Lat.), n. f. Funk'i^{2}-a^{3}. Fr., *funkie.* The white day-lily; of Sprengel, a small genus of liliaceous plants found in Japan and China; of Bentham and Hooker, a genus of the *Hemerocalleæ.* [B, 34, 42 (*a*, 24).]—**F. japonica.** A species the flowers of which are used to make a liquor said to be digestive. [B, 173 (*a*, 24).]

FUNKTION (Ger.), n. Fwn^{2}k-tse-on'. See FUNCTION.

FUNNEL, n. Fu^{3}n'e^{2}l. Probably from *infundibulum*, a funnel. Fr., *entonnoir.* Ger., *Frichter.* It., *imbuto.* Sp., *embudo.* 1. See INFUNDIBULUM. 2. A tube flaring at the upper end and narrow at the lower, for pouring liquids into bottles, etc. 3. In the *Cephalopoda*, the cone-shaped canal through which the excrementitious products and the water which has passed over the gills are expelled. When the water is driven out violently, it causes a backward movement of the animal. [L, 353 (*a*, 27).] Cf. SIPHON. 4. In heterosporous *Ficilinæ*, a space below the thick outer coats of the macrospore into which the apical papilla projects. [B, 279.] 5. In the *Ctenophora*, a f.-shaped cavity into which the stomach opens. [L, 147.]—**F.-formed, F.-shaped.** See INFUNDIBULIFORM.—**Nephridial f.** Ger., *Wimpertrichter.* The f.-like beginning of a renal tubule. In invertebrates it, in many forms, opens or begins in the body cavity or cavities. In vertebrates it begins in a glomerulus or Malpighian body of the kidney. [J, 11, 59.]—**Peritoneal f.** See NEPHROSTOMA.—**Pial f's.** The loose f.-shaped adventitia extending from the pia into the cerebral substance with the blood-vessels, and forming a part of the cerebral lymphatic system. [J, 55, 74.]

FUN-SÔ (Jap.), n. Doubly sublimed calomel. ["Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]

FUR, n. Fu^{5}r. Lat., *furra.* Fr., *fourrure* (1st def.), *saburre* (2d def.). Ger., *Pelz.* 1. The short, soft hair of an animal. 2. A coating deposited on the tongue.

FURBELOWS, n. Fu^{5}r'be^{2}-loz. The *Laminaria bulbosa.* [B, 275 (*a*, 24).]

FURBUINE (Fr.), n. Fu^{6}r-bu^{5}-en. See EUPHORBIUM.

FURCA (Lat.), n. f. Fu^{5}r(fu^{4}r)'ka^{3}. Fr., *fourche.* Ger., *Gabel.* A fork or a fork-shaped structure.—**F. orbitalis.** Of von Ammon, the first trace of the orbit in the embryo. It consists of a small disc of bone at the apex of the subsequent orbit, which embraces the optic nerve from above downward, like the prongs of a fork. [F.]

FURCAL, adj. Fu^{5}rk'a^{2}l. Lat., *furcalis* (from *furca*, a fork). Bifurcate; two-pronged. [L.]

FURCARIA (Lat.), n. f. Fu^{5}r(fu^{4}r)-ka(ka^{3})'ri^{2}-a^{3}. From *furca*, a two-pronged fork. Fr., *furcaire.* Ger., *Gabelhülle.* A section of the genus *Hibiscus.*

FURCATE, FURCATED, adj's. Fu^{5}r'kat, -e^{2}d. Lat., *furcatus* (from *furca*, a two-pronged fork). Fr., *fourchu, bifurqué.* Ger., *gabelig, gegabelt, gabelspaltig.* Forked, forficate, divided into two equal branches. The *Furcatæ* of Fries are a division of *Agarici* of the subgenus *Russula*, comprising species in which the entire gills are united with the extremity of dimidiate gills, giving them a forked appearance. [B, 121, 291 (*a*, 24).]

FURCATION, n. Fu^{5}r-ka'shu^{3}n. The state of being or becoming furcate. [*a*, 24.]

FURCELLA (Lat.), n. f. Fu^{5}r(fu^{4}r)-se^{2}l(ke^{2}l)'la^{3}. See FURCULA.

FURCELLARIA (Lat.), n. f. Fu^{5}r(fu^{4}r)-se^{2}l(ke^{2}l)-la(la^{3})'ri^{2}-a^{3}. From *furcilla*, a little fork. A genus of floridian *Algæ* allied to the *Gigartineæ*; so named from the dichotomous frond. The *Furcellarieæ* are: Of Meneghini, a family of rose-spored *Algæ*, with forked, cylindrical, fastigiate fronds; of Reichenbach, a family of the *Spærococceæ*, consisting of the genus *F.*, to which Decaisne added *Polyides.* [B, 19, 121, 170 (*a*, 30).]—**F. fastigiata.** The only known species, widely distributed in the northern Atlantic. It resembles *Polyides rotundus*, but has the capsules lodged in the pod-like branches, while the capsules of the latter are immersed in sponge-like masses. [B, 19, (*a*, 24).]

FURCELLATE, adj. Fu^{5}r'se^{2}l-at. See FURCILLATE.

FURCHE (Ger.), n. Furch^{2}'e^{2}. See GROOVE, FURROW, FISSURE, and SULCUS.—**Adergeflechtsf'.** See *Transverse cerebral* FISSURE.—**Aequatorialf'.** See *Equatorial* FURROW.—**Aeussere Hinterhauptf'.** See *Exoccipital* FISSURE.—**Ammonsf'.** See *Hippocampal* FISSURE.—**Atrioventrikularf'.** See *Auriculo-ventricular* GROOVE.—**Bauchf'.** See *Abdominal* FISSURE.—**Bogenförmige F.** A curved or arcuate fissure. [K.]—**Carotische F.** See *Carotid* GROOVE.—**Centralf'.** See *Central* FISSURE.—**Chorioidalf'.** See *Transverse cerebral* FISSURE.—**Collateralf'.** See *Collateral* FISSURE.—**Dotterf'.** See *Vitelline* FURROW.—**Dritte Primärf'.** The intraparietal fissure. [L, 94.]—**Eichelf', Eichelkronenf'.** The groove surrounding the glans penis.—**Erste radiäre Primärf'.** The precentral (anterior central) fissure. [I, 94.]—**Fingerf'.** See SULCUS *digitalis.*—**Flügelgaumenf'.** See SULCUS *pterygopalatinus.*—**Frontale Längsf'.** A frontal fissure. [I.]—**F. der Schreibfeder.** See FISSURE *of the calamus scriptorius.*—**F'uconflux.** Of Jensen, the point of crossing of the preoccipital and inferior (second) temporo-sphenoidal fissures. [I, 17 (K).]—**Gefässf'.** A fork formed by the union of two blood-vessels. ["Arch. f. Anat. u. Phys.," 1858, pp. 306, 307 (L).]—**Geschlechtsf'.** The embryonic genito-urinary aperture. [A, 521.]—**Gessässf'.** The fold of the nates. [A, 521.]—**Grenzf'.** A furrow marking a boundary line. [L, 46 (*a*, 21).]—**Grenzf' des lobus olfactorius.** See *Olfactory* SULCUS.—**Grosse horizontale F.** See *Calcarine* FISSURE.—**Halbcylindrische F.** See SULCUS *semicylindricus.*—**Hauptf'.** See *Cephalic* FISSURE.—**Hemisphärenrindef'n.** The

cerebral fissures. [I, 78.]—**Herzf'n.** See *Interventricular* FURROWS.—**Hinterhauptsschläfenf'.** The occipito-temporal fissure.—**Hippocampalf'.** See *Hippocampal* FISSURE.—**Horizontalf' des Kleinhirns.** See *Peduncular* SULCUS.—**Intermediarf'.** The sulcus intermedius. [I, 87.]—**Knochenf'.** See FISSURE *of bone*.—**Kopff'.** See *Cephalic* FISSURE.—**Längliche F.** See *Great longitudinal* FISSURE *of the brain*.—**Leistenf'.** See SULCUS *inguinalis*.—**Linke Sagittalf'.** See *Longitudinal* FISSURE *of the liver*.—**Lungenf'.** See SULCUS *pulmonalis*.—**Medianf'.** See *Medial* FISSURE.—**Meridian-f'n.** See *Vertical* FURROW.—**Mittlere Schläfenf'.** The sulcus temporalis medius. [I, 94.]—**Obere Frontalf'.** See *Superfrontal* FISSURE.—**Obere longitudinale Schläfenf', Obere Schläfenf'.** The parallel fissure. [I.]—**Obere Stirnf'.** See *Superfrontal* FISSURE.—**Parallelf'.** See *Parallel* FISSURE.—**Parietalf'.** See *Parietal* FISSURE.—**Parieto-occipitalf'.** See *Occipital* FISSURE.—**Polf'.** A small fissure at the apex of the insula. [I.]—**Präcentralf'.** See *Precentral* FISSURE.—**Primärf'n.** See *Primary* FISSURES.—**Primäre Scheitelf'.** The intraparietal fissure. [I, 94.]—**Primitive F.** See *Primitive* FISSURE.—**Querf'.** A transverse fissure or groove.—**Rindenf'n.** See *Partial* FISSURES.—**Rolando'sche F.** See *Central* FISSURE.—**Rückenf'.** See *Dorsal* FURROW and *Medullary* GROOVE.—**Sagittale F'n.** Of Schwalbe, those fissures of the occipital lobe which converge to a point at the anterior extremity of the lobe (*e. g.*, the calcarine fissure). [I, 17 (K).]—**Schmidt's Randf'.** See RIMA.—**Secundäre F'n.** See *Secondary* FISSURES.—**Temporäre F'n.** See *Transitory* FISSURES.—**Thränenf'.** See *Lacrymal* GROOVE.—**Totalf'n.** See *Primary* FISSURES (2d def.).—**Untere äussere F. des kleinen Hirns.** A fissure between the biventral and the posterior inferior lobes of the cerebellum. [I, 3 (K).]—**Untere Frontalf'.** See *Subfrontal* FISSURE.—**Untere Schläfenf'.** The subtemporal fissure or sulcus temporalis inferior. [I, 94, 98.]—**Vordere Grenzf'.** A fissure which separates one lobe or part of a lobe from another lobe. [J, 17 (K).]—**Vordere Inself'.** The fissure between the first and second gyrus of the insula. [I.]—**Vordere Occipitalf'.** See *Ape* FISSURE.—**Vordere Seitenf'.** See *Antero-lateral* GROOVE.—**Zahnf'.** See *Dental* GROOVE.—**Zweite radiäre Primärf'.** The central fissure. [I, 94, 98.]—**Zwingenf'.** The callosal fissure. [J.]

FURCHT (Ger.), n. Furch²t. Morbid dread. [L, 80.]—**Eisenbahnf'.** Morbid dread of railway accidents. [α, 27.]—**F. vor Operationen.** See ERGASIOPHOBIA.

FURCHUNG (Ger.), n. Furch²'un². 1. Bifurcation; segmentation. 2. A fissure. [I, 3 (K).]—**Eif'.** The segmentation of the vitellus.—**F'sabschnitt.** See *Segmentation* SPHERE.—**F'ssegment.** See *Segmentation* CELL.—**Oberflächliche F.** Superficial segmentation.—**Scheibenförmige F.** Discoidal segmentation.—**Ungleichmässige F.** Unequal segmentation.—**Partielle F. des Dotters.** Partial segmentation of the vitellus.

FURCIFER (Lat.), adj. Fu³rs(fu⁴rk)'i²-fe²r. From *furca*, a two-pronged fork, and *ferre*, to bear. Fr., *furcifère*. Having a forked tail. [L, 180.]

FURCIFERA (Lat.), n. f. Fu³r(fu⁴r)-si²f(ki²f)'e²r-a³. The penis. [A, 318.]

FURCILABRIS (Lat.), adj. Fu³r(fu⁴r)-si²(ki²)-la(la³)'bri²s. From *furca*, a fork, and *labrum*, the lip. Fr., *furcilabre*. Having the upper lip forked (said of animals). [L, 41, 180.]

FURCILLA (Lat.), n. f. Fu³r(fu⁴r)-si²l(ki²l)'la³. See FURCULA.

FURCILLATE, adj. Fu⁵r'si²l-at. Lat., *furcillatus*. Forked. [A, 312 (α, 21).]

FURCRÆA (Lat.), **FURCRŒA** (Lat.), **FURCROYA** (Lat.), n's f. Fu⁵r(fu⁴r)-kre'(kra³'e²)-a³, -kre'(kro²'e²)-a³, -kro'ya³. A genus of the *Amaryllideæ*, tribe *Agaveæ*. [B, 42, 121 (α, 24).]—**F. cubensis.** Fr., *furcrée* (ou *vigne*) *du Mexique, maguey des Mexicains*. See AGAVE *americana* and AGAVE *pulque*.—**F. fœtida.** The *Agave fœtida*. [B, 173 (α, 24).]—**F. gigantea.** 1. Of De Candolle, the *Agave fœtida*. 2. Of De Tussac, the *Agave gigantea*. [B, 173 (α, 24).]—**F. odorata, F. tuberosa.** See AGAVE *americana* and AGAVE *pulque*.

FURCULA (Lat.), n. f. Fu⁵r(fu⁴r)'ku²l(ku⁴l)-a³. Dim. of *furca*. 1. A furcate process or projection. 2. The clavicle; in birds, the V-shaped bone formed by the ankylosis of the two clavicles; the wish-bone, merry thought. 3. The upper end of the sternum. [A, 322.] 4. In the pl., *Furculæ* (Fr., *furculariens*), a family of *Infusoria*, having an ovoid body terminating in a forked tail. [L, 41 (α, 27).]—**F. superior.** See *F.* (2d and 3d def's).

FURCULAIRE (Fr.), adj. Fu⁶r-ku⁶-la²r. From *furca*, a fork-shaped prop. Furcular; as a n., of G. St.-Hilaire, the coracoid bone (1st def.) in fishes. [L, 14, 41.]

FURCULAR, adj. Fu⁵r'ku²-la³r. Lat., *furcularis* (from *furca*, a fork). Fr., *furculaire*. 1. Having the form of a small fork. 2. Of or pertaining to a furcula. 3. Pertaining to the clavicle. [L, 41; α, 17.]

FURCULO-TRACHEAL, adj. Fu⁵r''ku²-lo-tra'ke-a²l. From *furca*, a fork, and *trachea*, the wind-pipe. Situated in the region of the trachea and of the furcula (see *F.-t.* MUSCLE). [α, 27.]

FURCULUM (Lat.), n. n. Fu⁵r(fu⁴r)'ku²l(ku⁴l)-u³m(u⁴m). See FURCULA.

FÜRED (Ger.), n. Fu⁶r'e²d. A place on the western shore of Lake Balatony, Austria, where there are gaseous and chalybeate springs, and a bathing and whey-cure establishment. [L, 30, 41, 87 (α, 14).]

FURET (Fr.), n. Fu⁶-ra. 1. The ferret (*Putorius furo*). 2. An old term for an emeto-cathartic. [B, 38; L, 41.]

FUREUR (Fr.), n. Fu⁶-ru⁶r. From *furor*, a raging. Rage, madness, fury. [A, 312 (α, 21).]—**F. utérine.** See NYMPHOMANIA.

FURFUR (Lat.), n. m. Fu⁵r(fu⁴r)'fu⁵r(fu⁴r). Gen., *fur'furis*. 1. Bran. 2. Scurf. 3. The radicle, $(C_4H_3O)'$, of the furfuryl compounds. [B, 3; G.] 4. See ANABLASTEMA.—**Furfures capitis.** See *F.* (2d def.).—**F. triticeus.** See *F.* TRITICI.

FURFURA (Lat.), n. f. Fu⁵r(fu⁴r)'fu²(fu⁴)-ra³. See FURFUR.

FURFURACEOUS, adj. Fu⁵r-fu²-ra'shu³s. Lat., *furfuraceus* (from *furfur*, bran). Fr., *furfuracé*. Ger., *kleiig, kleienartig*. Made of bran, branny; of eruptions, attended with a bran-like desquamation; of plant-organs, scurfy. [B, 19, 123 (α, 24); G.] Cf. CRIMNODES.

FURFURACROLEIN, n. Fu⁵r''fu²r-a²k-ro'le-i²n. A crystalline compound, $C_4H_3O.CH : CH.C.OH = C_7H_6O_2$, of furfurol and acrolein, having a cinnamon-like odor. [B, 3.]

FURFURACRYLIC ACID, n. Fu⁵r-fu²r-a²k-ri²l'i²k. Fr., *acide furfuracrylique*. A crystalline acid, $C_7H_6O_3 = C_4H_3O.CH : CH.CO.OH$, isomeric with salicylic acid, and derived from the oxidation of furfuracrolein. [B, 3.]

FURFURAL, FURFURALDEHYDE, n's. Fu⁵r'fu²-ra²l, fu⁵r''fu²r-a²l'de-hid. See FURFUROL.

FURFURAMIDE, n. Fu⁵r-fu²r'a²m-i²d(id). An amide of the radicle of furfuryl alcohol; a crystalline substance, $(C_4H_3O.CH)^2.-N_2 = C_{15}H_{12}N_2O_3$. [B, 3.]

FURFURAN, n. Fu⁵r'fu²-ra²n. See TETROL.

FURFURANGELIC ACID, n. Fu⁵r-fu²r-a²n-je²l'i²k. A crystalline acid, $C_9H_{10}O_3 = C_4H_3O.C_4H_6 - CO.OH$. [B, 3.]

FURFURATION, n. Fu⁵r-fu²-ra'shu³n. Lat., *furfuratio* (from *furfur*, bran). Fr., *furfure*. A branny cutaneous desquamation; the falling of dandruff from the head. [G; L, 56.]

FURFURBUTYLENE, n. Fu⁵r-fu⁵r-bu²t'i²l-en. A colorless oily liquid, $C_4H_3O.C_4H_7$, of peculiar odor. [B, 3.]

FURFURINE, n. Fu⁵r'fu²-ren. Fr., *furfurine*. A crystalline base, $C_{15}H_{12}N_2O_3$, isomeric with furfuramide and prepared from the latter by the action of heat or of caustic potash. It is soluble in alcohol and in ether, insoluble in water, and combines with acids to form crystalline salts. [B, 3, 4.]

FURFURISCA (Lat.), n. f. Fu⁵r(fu⁴r)-fu²(fu⁴)-ri²s'ka³. See PITYRIASIS.

FURFUROL, n. Fu⁵r'fu²-ro²l. Pyromucic aldehyde, an oily liquid, $C_4H_3O\ COH = C_5H_4O_2$, of aromatic odor and taste resembling that of cinnamon, prepared by the distillation of bran, flour, sawdust, sugar, etc. It is always present in amylic alcohol. [B, 3; α, 27.]

FURFUROLAMIDE, n. Fu⁵r-fu²r-o²l'a²m-i²d(id). See FURFURAMIDE.

FURFUROUS, adj. Fu⁵r'fu²-ru³s. See FURFURACEOUS.

FURFURPROPIONIC ACID, n. Fu⁵r-fu⁵r-pro-pi²-o²n'i²k. A crystalline acid, $C_4H_3O.CH_2 - CH_2 - CO.OH = C_7H_8O_3$. [B, 3.]

FURFURVALERIC ACID, n. Fu⁵r-fu⁵r-va²l-e²r'i²k. An oily liquid of disagreeable odor, $C_9H_{12}O_3 = C_4H_3O - C_4H_8 - CO.OH$. [B, 3.]

FURFURYL, n. Fu⁵r'fu²-ri²l. The radicle, $C_4H_3O - CH_2'$—, of f. alcohol. The f. compounds are supposed to be formed on the type of the aromatic (benzene) compounds. [B, 3.]—**F. alcohol.** The alcohol, $C_4H_3O.CH_2.OH$, of which furfurol is the aldehyde. It has not yet been isolated in the pure state. [B, 3.]

FURFURYLAMINE, n. Fu⁵r-fu²r-i²l'a²m-en. A liquid, $C_5H_7N = C_4H_3.CH_2.NH_2$, with an odor resembling that of coniine. [B, 3.]

FURIA (Lat.), n. f. Fu²(fu⁴)'ri²-a³. From *furere*, to rage. Violent passion, rage, madness, fury. [A, 312 (α, 21).]—**F. infernalis.** Fr., *furie infernale*. Of Linnæus, a supposititious venomous worm or vermiform insect supposed to exist in marshy places in Finland and Sweden, and to be the cause of a malignant variety of anthrax. [L.] See ANTHRAX *malignus bothnicus*.—**F. medinensis.** See FILARIA *medinensis*.

FURIBUNDUS (Lat.), **FURIOSUS** (Lat.), adj's. Fu²(fu⁴)-ri²-bu³nd(bu⁴nd)'u³s(u⁴s), -os'u³s(u⁴s). From *furere*, to rage. Raging, mad, furious. [A, 312 (α, 21).]

FUROIN, n. Fu²-ro'i²n. A crystalline substance, $C_{10}H_8O_4$, derived from furfurol, and consisting of a double molecule of the latter. [B.]

FURONCLE (Fr.), n. Fu⁶-ro²n²k'l. See FURUNCLE.—**F. des vieillards, F. guêpier, F. malin.** See FURUNCULUS *vespajus*.

FURONIC ACID, n. Fu²-ro²n'i²k. Fr., *acide furonique*. A dibasic crystalline acid, $C_5H_6O_3\langle{}^{CO.OH}_{CO.OH} = C_7H_8O_7$, derived from furfuracrylic acid. [B, 3.]

FUROR (Lat.), n. m. Fu²(fu⁴)'ro²r. Gen., *furo'ris*. Fr., *fureur*. Ger., *F., Wuth*. Fury, frenzy; acute mania. [A, 319, 326 (α, 21); D, 36, 70.]—**F. amatorius.** See EROTOMANIA.—**F. brevis.** See *F. transitorius*.—**F. genitalis.** See EROTOMANIA.—**F. mania.** See MANIA.—**F. melancholicus.** Lypemania. [α, 34.]—**F. poeticus.** A mania for writing poetry. [α, 34.]—**F. transitorius.** Transitory mental aberration. [α, 34.]—**F. uterinus.** Fr., *fureur utérine*. Ger., *Mutterwuth, Manntollheit*. See NYMPHOMANIA.—**Maniacal f.** The frenzied condition of acute mania. [D.]

FURRED, adj. Fu⁵rd. Coated with a furry deposit (said of the tongue).

FURROW, n. Fu³r'ro. A.-S., *furh*. Gr., αὖλαξ, ὁλκός. Lat., *sulcus*. Fr., *sillon*. Ger., *Furche, Rinne*. See GROOVE and SULCUS.—**Auriculo-ventricular f.** See *Auriculo-ventricular* GROOVE.—**Dorsal f.** Fr., *sillon dorsal*. Ger., *Rückenfurche, Rückengrube*. 1. The hollow in the middle line of the back at the bottom of which is a number of slight elevations caused by the spinous processes of the vertebræ. 2. In embryology, the primitive groove after it has become clearly defined. [L, 31.]—**Equatorial f.** Ger., *Aequato-*

rialfurche. In the segmentation of the ovum, a f. through, or parallel to, the equator of the ovum. [L, 146, 201.]—**F. of Rolando.** See Fissure *of Rolando.*—**Genital f.** An antero-posterior groove formed on the lower aspect of the genital tubercle of the embryo. In the male it closes, forming the spongy portion of the urethra; in the female it remains open, except that it unites with the perinæum posteriorly, and its lips are converted into the labia minora. [A, 16.]—**Inguinal f.** Lat., *sulcus inguinalis.* Ger., *Leistenfurche.* The fold of the groin.—**Interventricular f's, Longitudinal f's of the heart.** Two longitudinal f's, one on the anterior, the other on the posterior surface of the heart, extending from base to apex of the latter, and marking the separation of the right from the left ventricle. [A, 478 (a, 17); C.]—**Mento-labial f.** Lat., *sulcus mento-labialis.* The transverse depression between the chin and the lower lip. [L, 31, 332.]—**Meridian-f.** See *Vertical f.*—**Oculomotor f.** A slight groove on the inner edge of the crus cerebri which lodges the third nerve. [K.]—**Œsophageal f.** See *Œsophageal* groove.—**Ophthalmic f.** In the embryos of certain insects, f's from which the eyes develop. [L.]—**Radial f's.** See *Vertical f's.*—**Ring-f.** See *Equatorial f.*—**Spinal f.** See *Dorsal f.* (1st def.).—**Sternal f.** See *Sternal* groove.—**Vertical f's.** Ger., *Meridian-Furchen.* In the segmentation of the ovum, f's which pass through the germinal and nutritive poles of the ovum. [L, 146, 201.]—**Vitelline f., Yolk f.** Fr., *sillon vitellin.* Ger., *Dotterfurche, Dotterrinne.* A groove on the surface of an ovum indicating its division into segments. [J, 1, 130.]

FURROWED, adj. Fu3r'rod. Lat., *sulcatus.* Fr., *sillonné.* Ger., *gefurcht.* Marked with furrows.

FURRUD (Beng., Hind.), n. The *Erythrina indica.* [B, 172 (a, 24).]

FURRYS, n. Fu6r'i2z. The *Ulex europæus.* [A, 505 (a, 21).]

FÜRSTENZELL (Ger.), n. Fu6rst'e2n-tse2l. A place in Lower Franconia, Bavaria, where there are mineral springs. [L, 30 (a, 14).]

FURUNCLE, n. Fu2'ru3n2-k'l. Gr., *δοθιήν.* Lat., *furunculus* (dim. of *fur,* a thief), a petty thief, a burning sore, a boil. Fr., *furoncle, clou.* Ger., *Furunkel, Blutschwäre.* It., *furuncolo, chiodo, fignolo.* Sp., *divieso.* See Boil.—**Anthracoid f.** Lat., *furunculus anthracoides.* Fr., *furoncle anthracoïde.* A small carbuncle. [D, 10, 79.]—**Interdigital f.** Fr., *furoncle interdigité.* A form of f. occurring in animals having digitate feet, due to irritation by foreign bodies lodged in the digital clefts. [L, 41 (a, 17).]—**Wasp's-nest f.** See Furunculus *vespajus.*

FURUNCULAR, adj. Fu2-ru3n'ku2-la3r. Lat., *furuncularis, furunculosus.* Fr., *furonculeux.* Ger., *furunkulös, schwärenartig.* Relating to or of the character of a furuncle. [E.]

FURUNCULOID, adj. Fu2-ru3n2'ku2-loid. From *furunculus,* a furuncle, and *εἶδος,* resemblance. Resembling a furuncle.

FURUNCULOSIS (Lat.), n. f. Fu2(fu)-ru3n2(ru4n2)-ku2l(ku4l)-o'si2s. Gen., *-o'seos (-is).* Fr., *furunculose.* Ger., *Furunkulose.* A morbid condition tending to the production of furuncular affections. [G.]—**F. neuritica.** See Phlegmone *neuritica.*

FURUNCULOUS (Lat.), adj. Fu2-ru3n2'ku2l-u3s. Lat., *furunculosus.* See Furuncular. In Wilson's clinical classification of skin diseases, f. affections form the fourth group, and include ecthyma, hordeolum, furunculus, and anthrax. [G, 1.] Cf. Phlogoses.

FURUNCULUS (Lat.), n. m. Fu2(fu)-ru3n2(ru4n2)'ku2l(ku4l)-u3s(u4s). See Furuncle.—**F. anthracoides.** See *Anthracoid* furuncle.—**Furunculi atonici.** Fr., *furoncles atoniques.* An old term for ecthyma. [G.]—**F. benignus.** See Furuncle.—**F. delhinus.** See *Delhi* boil.—**F. dothien.** See *F. minor.*—**F. follicularis.** Ger., *Talgdrüsenfurunkel, Follicularfurunkel.* A superficial furuncle that develops about a sebaceous gland. [G.]—**F. gangrænescens, F. gangrænosus.** See Anthrax.—**F. major.** A furuncle of large size, involving the subcutaneous connective tissue. [G.]—**F. malignus.** See Anthrax.—**F. minor.** A furuncle of small size, usually developing from a sebaceous follicle. [G, 33.] See F. follicularis.—**Furunculi neuritici.** A variety of erythanthema neuriticum. [G, 4.] See under Erythanthema.—**F. panulatus.** Fr., *furoncle panulé.* Of Alibert, some form of inflammatory tumor or tubercle of the skin the precise nature of which is uncertain; described as of very slow development and, after some months, a year, or even longer, forming an oblong opening resembling a weaver's shuttle in shape. [G.] See Panulatus and Phygethlon.—**F. phygethlon.** See *F. major.*—**F. suppuratorius.** See Boil.—**F. terminthus.** See Terminthus.—**F. verus.** See Boil.—**F. vespajus.** Fr., *furoncle guêpier* (ou *malin,* ou *des vieillards*). It., *vespajo.* Of Alibert, an indolent variety of furuncle of large size, in which a number of openings are formed through which the product of suppuration escapes, thus bearing a fancied resemblance to a wasp's nest. [G, 7.] See Vespajo and Anthrax.—**F. vulgaris.** Fr., *furoncle vulgaire.* An ordinary boil. [G, 7.]

FURUNKEL (Ger.), n. Fu'run2k-e2l. See Boil.—**Follicularf', Talgdrüsenf'.** See Furunculus *follicularis.*

FÜRWITZELBEEREN (Ger.), n. pl. Fu6r'vi2ts-e2l-bar-e2n. Currants (the fruit of *Ribes rubrum*). [B, 180 (a, 24).]

FURZE, n. Fu6rz. A.-S., *fyrs.* Fr., *azone.* Ger., *Hecksame, Stechginster.* It., *ginestrone.* Sp., *hiniesta espinosa, aliaga.* The *Ulex europæus.* [B, 19, 185, 275 (a, 24).]—**Autumn-flowering f., Dwarf f.** The *Ulex nanus.* [B, 275 (a, 24).]—**French f.** See *F.*—**F.-ball.** The genus *Lycoperdon,* especially the *Lycoperdon bovista.* [A, 505 (a, 21).]—**Great f.** See *F.*—**Ground-f.** The *Ononis arvensis.* [B, 275 (a, 24).]—**Irish f.** The *Ulex strictus.* [B, 275 (a, 24).]—**Needle-f.** The *Genista anglica.* [B, 275 (a, 24).]—**Tam-f.** The *Ulex nanus.* [A, 505 (a, 21).]

FUSAIN (Fr.), n. Fu6-za3n2. From *fusus,* a spindle. The genus *Euonymus.* [B, 121, 173 (a, 24).]—**Extrait d'écorce de f.** See *Extractum* euonymi.—**F. à feuilles épaisses.** The *Euonymus europæus macrophyllus.* [B, 173 (a, 14).]—**F. à feuilles tendres.** The *Euonymus europæus tenuifolius.* [B, 173 (a, 24).]—**F. à larges feuilles.** The *Euonymus latifolius.* [B, 173 (a, 24).]—**F. d'Europe.** The *Euonymus europæus.* [B, 173 (a, 24).]—**F. galeux, F. lépreux.** The *Euonymus verrucosus.* [B, 121, 173 (a, 24).]

FUSAMO (Jap.), n. The *Myriophyllum verticillatum.* [B, 121 (a, 24).]

FUSANUS (Lat.), n. m. Fu2(fu)-zan(sa3n)'u3s(u4s). From *fusus,* a spindle. Fr., *fusan, fusane.* A genus of sandalworts, of the *Osyrideæ.* [B, 42, 121 (a, 24).]—**F. acuminatus.** A species found in New Holland. The fruit, known as the *quandang-nut,* is sweet and edible. [B, 19 (a, 24).]—**F. lanceolatus, F. persicarius, F. spicatus.** Species found in Australia, from which oil of sandalwood is obtained. [E. M. Holmes, "Pharm. Jour. and Trans.," Mar. 27, 1886; "Am. Jour. of Pharm.," May, 1886, p. 254.]

FUSARIA (Lat.), n. f. Fu2(fu)-sa(sa3)'ri2-a3. From *fusus,* a spindle. A genus (in part) of the *Filaridæ.* [L, 16.]—**F. lumbricoides.** See Ascaris *lumbricoides.*—**F. marginata.** See Ascaris *marginata.*—**F. mystax.** See Ascaris *mystax.*—**F. renalis.** The *Eustrongylus gigas.* [L, 16.]—**F. vermicularis.** The *Oxyuris vermicularis.* [L, 16.]—**F. visceralis.** The *Eustrongylus gigas.* [L, 16.]—**F. Werneri.** The *Ascaris marginata.* [L, 18.]

FUSCEDO (Lat.), n. f. Fu3s(fu4s)-sed(ked)'o. Gen., *-ced'inis.* From *fuscare,* to become dark. Gr., *ὑπομελανίασις.* Swarthiness.—**F. ætatis.** Of Plenck, the deepening of the complexion which succeeds the whiteness of the skin peculiar to infancy. [G, 11.]—**F. cutis.** See Melasma *cutis.*—**F. nativa.** Of Plenck, any of the various shades of complexion observed in the progeny of mixed white and black races. [G, 11.]—**F. solaris.** See Chloasma *caloricum.*

FUSCESCENT, adj. Fu3s-se2s'e2nt. Becoming swarthy, inclining to swarthiness.

FUSCICOLLIS (Lat.), adj. Fu3s(fu4s)-si(ki2)-ko2l'i2s. From *fuscus,* dark, and *collum,* the neck. Fr., *fuscicolle.* Having a brown neck. [L, 41, 180.]

FUSCICORNIS (Lat.), adj. Fu3s(fu4s)-si2(ki2)-ko2rn'i2s. From *fuscus,* dark, and *cornu,* a horn. Fr., *fuscicorne.* Having brown antennæ. [L, 41, 180.]

FUSCIN, n. Fu3s'si2n. Lat., *fuscinum, fuscina.* Fr., *fuscine.* Ger., *F.* A brownish or dark-colored substance obtained from empyreumatic animal oil. [L, 41, 56.]

FUSCIPENNIS (Lat.), adj. Fu3s(fu4s)-si2(ki2)-pe2n'ni2s. From *fuscus,* dark, and *penna,* a feather. Fr., *fuscipenné.* Having brown wings. [L, 180.]

FUSCIPES (Lat.), adj. Fu3s(fu4s)'si2(ki2)-pez(pas). From *fuscus,* dark, and *pes,* the foot. Fr., *fuscipède.* Having brown feet. [L, 180.]

FUSCIVENTER (Lat.), adj. Fu3s(fu4s)-si2(ki2)-ve2nt(we2nt)'u6r(e2r). From *fuscus,* dark, and *venter,* the belly. Fr., *fusciventre.* Having a brown belly. [L, 180.]

FUSCO-CYANEOUS, adj. Fu3s-ko-si-a2n'e-u3s. From *fuscus,* dark, and *cyaneus,* dark-blue. Bluish-black. [a, 27.]

FUSCOMANUS (Lat.), adj. Fu3s(fu4s)-ko2m'a2n(a3n)-u3s(u4s). From *fuscus,* dark, and *manus,* the hand. Fr., *fuscomane.* Having the hands, or the extremities of the paws, of a brown color. [L, 180.]

FUSCO-SCLEROTINIC ACID, n. Fu3s-ko-skle2r-o-ti2n'i2k. Fr., *acide fusco-sclérotinique.* Ger., *Fuscosclerotinsäure.* A decomposition product, $C_{14}H_{24}O_7$, of sclererythrin, obtained by treating an alcoholic solution with lime-water. [B, 270 (a, 27).]

FUSCOUS, adj. Fu3s'ku3s. Lat., *fuscus.* Ger., *graubraun.* Brown with a grayish or blackish tinge; dark-brown. [B, 19, 123, 291 (a, 24); L, 341, 343 (a, 27).]

FUSE, v. tr. and intr. Fu2z. From *fundere,* to melt. Fr., *fondre.* Ger., *schmelzen.* To dissolve; to melt. [L, 56.]

FUSEAU (Fr.), n. Fu6-so. From *fusus,* a spindle. 1. The *Arum maculatum.* [B, 121, 173 (a, 24).] 2. See Spindle.—**F. à ruban.** The *Agaricus hæmatochelis.* [B, 121 (a, 24).]—**F. de direction.** See Amphiaster.—**F. nucléaire.** See *Nuclear* spindle.

FUSÉE (Fr.), n. Fu6-za. 1. The *Agaricus procerus.* [B, 121 (a, 24).] 2. A more or less long and sinuous channel by which pus makes its way to the surface. 3. Of the veterinarians, an oblong exostosis of a metatarsal bone in the solipeds. [A, 301.]—**F. purulente.** See *F.* (2d def.).

FUSELÉ (Fr.), adj. Fu6-ze2-la. From *fusus,* a spindle. Spindle-shaped. [L, 41 (a, 21).]

FUSELIG (Ger.), adj. Fu'ze2l-i2g. Containing fusel oil. [A, 521.]

FUSEL OIL, n. Fu2'se2l oil. Ger., *Fuselöl.* See Amyl alcohol.

FUSER (Fr.), v. intr. Fu6-za. From *fundere,* to melt. 1. To decompose and spread (said of pus). 2. To decompose with a slight crepitation, as when certain salts are placed in a flame. [L, 41.]

FUSHIGURO (Jap.), n. The *Melandrium firmum.* [B, 121 (a, 24).]—**F.-senno.** The *Lychnis miqueliana.* [B, 121 (a, 24).]

FUSHIKADA-FURO (Jap.), n. The *Geranium nepalense.* [B, 121 (a, 24).]

FUSIBILITY, n. Fu2z-i2-bi2l'i2-ti2. Lat., *fusibilitas* (from *fundere,* to pour). Fr., *fusibilité.* Ger., *Schmelzbarkeit.* It., *fusibilità.* Sp., *fusibilidad.* The quality of being fusible. [L, 56.]

FUSIBLE, adj. Fu2z'i2-b'l. From *fundere,* to pour. Fr., *f.* Ger., *schmelzbar.* Capable of being melted. [a, 27.]

FUSICORNIS (Lat.), adj. Fu^2(fu)-si^2-ko^{2}rn'i^{2}s. From *fusus*, a spindle, and *cornu*, a horn. Fr., *f.* Having spindle-shaped antennæ; as a n., in the m. pl., *Fusicornes*, a group of the *Coleoptera*, so characterized. [L, 41.]

FUSIFORM, adj. Fu^2'si^2-fo^{2}rm. Lat., *fusiformis* (from *fusus*, a spindle, and *forma*, form). Fr., *fusiforme*. Ger., *spindelförmig*. Spindle-shaped; tapering toward both ends, but often rather more abruptly toward one end. [A, 326 (α, 21); L, 341 (α, 27).]

FUSILABE (Fr.), adj. Fu^6-se-la^{3}b. From *fusus*, a spindle, and *labrum*, the lip. Having tapering lips; as a n., in the m. pl., *f's*, a group of the *Araneida* containing species characterized by spindle-shaped lips. [L, 41.]

FUSIN (Fr.), n. Fu^6-za^{2}n^2. The *Euonymus europæus*. [B, 121, 173 (α, 24).]

FUSION, n. Fu^2'zhu^{3}n. Gr., χύσις. Lat., *fusio* (from *fundere*, to pour). Fr., *f.* Ger., *Schmelzung*. It., *fusione*. Sp., *fusión*, *fundición*. 1. The act or process of melting or fusing; the passage from a solid to a liquid state through the agency of heat. [B, 21 (α, 27).] 2. An intimate blending of separate structures, a growing together.—**Aqueous f.** Fr., *f. aqueuse*. A false f. of salts in their water of crystallization; in reality, a solution. [L, 41 (α, 21).]—**Cell-f.** See under CELL.—**Igneous f.** Fr., *f. ignée*. F. properly speaking; the transformation of the matter of a solid body into liquid under the influence of heat. [L, 41 (α, 21).]—**Watery f.** See *Aqueous f.*

FUSIPES (Lat.), adj. Fu^2(fu)'si^2-pez(pas). From *fusus*, a spindle, and *pes*, the foot. Fr., *fusipède*. Having fusiform feet. [L, 41.]

FUSISPORIUM (Lat.), n. n. Fu^2(fu)-si^2-spor(spo^{2}r)'i^2-u^{3}m(u^{4}m). From *fusus*, a spindle, and σπόρος, a seed. Of Link, a genus of *Ascomycetes*, with septate, spindle-shaped spores, forming white and yellowish pellicles on rotten potatoes and other decaying vegetation. [A, 396 (α, 21); B, 19, 121 (α, 24).] Cf. *F. solani*.—**F. pulvinatum.** A species found in gutters. [B.]—**F. solani.** A species found on potatoes in company with the *Peronospora infestans*, and hastening the decomposition due to the latter parasite or rendering the tubers innutritious by converting them into a hard, dry mass. [B, 19 (α, 24).]

FUSO-CELLULAR, adj. Fu^2-so-se^{2}l'u^2-la^{3}r. Fr., *fuso-cellulaire*. From *fusus*, a spindle, and *cellula*, a cell. Spindle-celled.

FUSOGH, n. 1. The *Ferula tingitana*. 2. In Tangiers, a variety of gum ammoniac. [B, 46 (α, 14), 121 (α, 24).]

FUSOID, adj. Fu^2'soid. From *fusus*, a spindle, and εἶδος, form. See FUSIFORM.

FUSS (Ger.), n. Fus. 1. The foot. 2. A base.—**Afterfüsse.** The hind feet. [α, 27.]—**Borstenfüsse.** Legs covered with bristly hairs, as in the *Apidæ*. [L, 353 (α, 27).]—**Cirrenfüsse.** Legs provided with cirri, as in the *Chætopoda*. [L, 353 (α, 27).]—**F'angel.** The genus *Pedalium*. [B, 180 (α, 24).]—**F'arzt.** See CHIROPODIST.—**F'bett.** A fracture cradle. [E.]—**F'beuge, F'biege.** The instep. [A, 521.]—**F'binde.** See *Foot*-BANDAGE.—**F'blatt.** 1. See the major list. 2. See TARSUS.—**F'bug.** The ankle. [L, 349.]—**F. der Schleife.** See PES *lemnisci*.—**F. des Hirnschenkels.** See CRUST *of the* PEDUNCLE.—**F. des Stabkranzes.** See BASIS *coronæ radiatæ*.—**F'förmig.** See PEDATE.—**F'geburt.** Delivered with a foot presentation.—**F'los.** See APODOUS.—**F'nervig.** See PEDATINERVIUS.—**F'phänomen.** See *Ankle* CLONUS.—**F'rücken.** See ACROPODIUM, ACROTARSIUM, and DORSUM *of the foot*.—**F'sohle.** See the major list.—**F'spaltig.** See PEDATIFID.—**F'stück.** The basal portion of a cilium of a ciliated cell.—**F'theilig.** See PEDATIPARTITUS.—**F'wurzel.** See TARSUS.—**Geissf'.** See ÆGOPODIUM *podagraria*.—**Glattf'.** See FLAT-FOOT.—**Griffelf'.** See STYLOPODIUM.—**Grosser F. des Seepferdes.** See HIPPOCAMPUS *major*.—**Hirnschenkelf'.** See CRUST *of the peduncle*.—**Kaufüsse.** Maxillipeds. [α, 21.]—**Kieferfüsse.** See BRANCHIOPODA.—**Kiemenfüsse.** 1. Feet to which branchiæ are attached. 2. See BRANCHIOPODA.—**Klammerfüsse.** Chelæ. [α, 21.]—**Kleiner F. des Seepferdes.** See HIPPOCAMPUS *minor*.—**Mittelf'.** See METATARSUS.—**Platt F.** See FLAT-FOOT.

FUSS-BALLS, n. Fu^{3}s'ba^{4}lz. The genus *Lycoperdon* and the *Lycoperdon bovista*. [B, 275 (α, 24).]

FUSSBLATT (Ger.), n. Fus'bla^{3}t. The genus *Podophyllum*. [B, 180 (α, 24).]—**Gemeines F.** The *Podophyllum peltatum*. [B, 180 (α, 24).]

FÜSSCHEN (Ger.), n. Fu^{6}s'ch^{2}e^{2}n. See PEDICLE.—**Kiemenf'.** The respiratory suckers, or "feet," of star-fishes and sea-urchins. [B, 206 (α, 27).]—**Mundf'.** 1. The fleshy arms that project around the mouth of a cephalopod, and that serve for creeping, swimming, and the capture of prey. [L, 353 (α, 27).] 2. See MAXILLIPEDS.—**Saugf'.** A sucker. [α, 27.]

FÜSSLEIN (Ger.), n. Fu^{6}s'lin. See PEDICLE.

FUSSSOHLE (Ger.), n. Fus'zol-e^2. The sole of the foot. [L, 31.]—**F'ubogen.** The arch of the foot. [L, 43.]—**F'ngegend.** The plantar region. [L, 43.]—**F'nschreitend.** Plantigrade. [L, 43.]

FUSTEC (Fr.), n. Fu^{6}s-te^{2}k. See FUSTIC (1st def.).

FUSTÉINE (Fr.), n. Fu^{6}s-ta-en. 1. The coloring matter of the yellow orange. [L, 41.] 2. Of Preisser, see under FUSTIN.

FUSTEL (Fr., Ger.), n. Fu^{6}s-te^{2}l, fus'te^{2}l. See RHUS.—**F'holzbaum** (Ger.). See RHUS *cotinus*. [L, 135.]

FUSTET (Fr.), n. Fu^{6}s-ta. See FUSTIC (1st def.).

FUSTETE (Sp.), n. Fus-ta'ta. The *Rhus cotinus*. [B, 121 (α, 24).]—**F. de Cuba.** The *Maclura tinctoria*. [B, 121 (α, 24).]

FUSTIC, n. Fu^{3}s'ti^{2}k. Fr., *f.*, *fustiche* (2d def.), *fustet* (1st def.). Ger., *Fustik*. 1. The *Morus tinctoria*. 2. The *Rhus cotinus*. 3. The *Maclura aurantiaca*. 4. A term for various species of *Xanthoxylum*. 5. In the Antilles, the genus *Pictetia*. 6. In Kentucky, the *Cladrastis tinctoria*. [B, 5, 121, 173, 180, 282; "Am. Jour. of Pharm.," July, 1890, p. 324.]—**Hungarian f.** The wood of *Rhus cotinus*. [B, 5 (α, 24).]—**Old f.** Ger., *alter Fustik*. In England, the wood of *Morus tinctoria*. [B, 5 (α, 24).] Cf. *Young f.*—**Young f.** The wood of *Rhus cotinus*. [B, 5 (α, 24).]

FUSTIGATION, n. Fu^{3}s-ti^2-ga'shu^{3}n. From *fustigare*, to cudgel. See FLAGELLATION.—**Electric f.** Of Duchenne, the application of the faradaic current by interruptedly tapping the locality affected. [α, 34.]

FUSTIK (Ger.), n. Fus'tek. See FUSTIC.—**Alter F.** See *Old* FUSTIC.—**F'holz.** The wood of *Morus tinctoria*. [B, 121, 180 (α, 24).]

FUSTIN, n. Fu^{3}s'ti^{2}n. Fr., *fustine*. The coloring matter of *Aspidium filix mas*. It occurs in yellow crystals whose solutions are modified by the atmosphere, and form a yellow substance, the *fustéine* of Preisser. [B, 52 (α, 27).]

FUSTIQUE (Fr.), n. Fu^{6}s-tek. See FUSTET.

FUSULE (Fr.), n. Fu^6-zu^{6}l. One of the smaller tubes through which spiders emit their web. [A, 526.]

FU-TSZE (Chin.), n. The tuber of *Aconitum chinense*. ["Proc. of the Am. Pharm. Assoc.," xxix (α, 14).]

FUTTER (Ger.), n. Fut'te^{2}r. 1. Food, fodder. 2. A case, inner covering. [L, 46, 80 (α, 21).]

FUTTERAL (Ger.), n. Fut-te^{2}r-a^{3}l'. A capsule, incasement, or involucrum. [α, 14.]—**F'träger.** See SUBSCAPULARIS.

FUTTERKIND (Ger.), n. Fut'te^{2}r-ki^{2}nd. A child reared by artificial feeding. [α, 14.]

FUTTERKLEE (Ger.), n. Fut'te^{2}r-kla. The *Trifolium pratense*. [B, 180 (α, 24).]

FUTTERKRAUT (Ger.), n. Fut'te^{2}r-kra^3-u^{4}t. The *Vicia sativa*. [B, 121, 180 (α, 24).]

FÜTTERUNG (Ger.), n. Fu^{6}t'te^{2}r-un^2. A dietary or diet (*q. v.*, 1st def.).

FUTTERWICKE (Ger.), n. Fut'te^{2}r-vi^{2}k-e^2. The *Vicia sativa*. [L, 80.]

FUTUTIO (Lat.), n. f. Fu^{3}t(fu^{4}t)-u^2(u)'shi^2(ti^2)-o. Gen., *-o'nis*. From *futuere*, to copulate. Copulation. [A, 312 (α, 21).]

FUVVAHA (Ar.), n. The *Rubia cordifolia*. [A, 479 (α, 21).]

FUYU-AVI (Jap.), n. The *Malva pulchella*. ["Proc. of the Am. Pharm. Assoc.," xxviii (α, 14).]

FUYORAN (Jap.), n. The *Marsdenia tomentosa*. [B, 121 (α, 24).]

FUZZ, FUZZEN, n's. Fu^{3}z, fu^{3}z'n. The *Ulex europæus*. [A, 505 (α, 21).]

FUZZ-BALLS, n. Fu^{3}z'ba^{4}lz. See FUSS-BALLS.

FYADA (Ar.), n. See MERCURY.

FYAMS, n. The genus *Laminaria*. [B, 275 (α, 24).]

G

GAA-GUAZA, n. See *Paraguay* TEA.

GAB (Hind., Beng.), n. The *Embryopteris glutinifera*. [B, 172 (α, 24).]

GABALIUM (Lat.), n. n. Ga^{2}b(ga^{3}b)-al(a^{3}l)'i^2-u^{3}m(u^{4}m). Of Pliny, an undetermined aromatic plant found in Arabia. [B, 121 (α, 24).]

GABALLA, GABALLIA, GABANALA, n's. See CABAL.

GABBÉRÉ (Fr.), n. Ga^{3}b-ba-ra. A provincial name for *Croton tinctorium*. [B, 173 (α, 24).]

GABE (Ger.), n. Ga^{3}b'e^2. See DOSE.—**Gegeng'.** See ALEXIPHARMAC and ANTIDOTE.

GABEL (Ger.), n. Ga^{3}b'e^{2}l. A fork. [L, 80.] See FURCA, FURCULA, and FOURCHETTE.—**G'ähnlich.** See DICRANODES.—**G'förmig.** See BIFURCATE (adj.), DICRANODES, and DICHOTOMOUS.—**G'hülle.** The genus *Furcaria*. [B, 180 (α, 24).]—**G'ig.** See FURCATE.—**G'kiemig.** See DICRANOBRANCHIUS.—**G'spaltig.** See FURCATE.—**G'ständig.** See ALARIS (1st def.) and INTERFURCALIS.—**G'ung.** See BIFURCATION.—**Gemeiner G'weih.** See FALCO *milvus*.

GÁBHANA (Guz.), n. Calcium sulphate. [A, 479 (α, 21).]

GABIAN (Fr.), n. Ga^3-be-a^{3}n^2. A place near Béziers, in the department of Hérault, France, where there are warm chalybeate and alkaline springs and a spring containing petroleum. [L, 30, 41, 87, 105 (α, 14).]

GABIREA (Lat.), n. f. Ga^{2}b(ga^{3}b)-I(e)'re^2-a^3. Gr., γαβιρέα. An old name for a very oily variety of myrrh. [Gorræus (A, 325).]

GÄBLEIN (Ger.), n. Gab'lin. See MANUBRIUM (2d def.).

GABRICU, n. A spagyric name for "sulphur philosophorum." [A, 325.]

GĂBUSE (Ger.), n. Ga-bu'ze[2]. The *Artemisia rupestris.* [B, 121 (*a*, 24).]

GACHAKARANA, n. In Bombay, the *Rhinacanthus communis.* [A, 479 (*a*, 21).]

GACHIPAES (Sp.), n. Ga[3]-che-pa[3]'as. In Colombia, the *Gulielmia spinosa* and the *Bactris gasipaes.* [B, 121 (*a*, 24).]

GACH-MURICH (Beng.), n. The *Capsicum annuum.* [B, 172 (*a*, 24).]

GÄCKLE (Ger.), n. Ge[2]k'le[2]. The *Rumex pratensis.* [B, 180 (*a*, 24).]

GAD, n. In the East, the *Coriandrum sativum.* [B, 121 (*a*, 24).]

GADÂDARA (Sanscr.), n. The *Artemisia maritima.* [A, 479 (*a*, 21).]

GADAMES, GADAMIS. See Ghadamis.

GADARA, n. A place in Syria where there are hot sulphurous springs. [L, 49.]

GAD-BUSH, n. Ga[2]d'bu[4]sh. The *Arceuthobium gracile.* [B, 282.]

GADELLES (Fr.), n. Ga[3]-de[2]l. A provincial name for the fruits of *Ribes officinale.* [B, 173 (*a*, 24).]

GADELLIER (Fr.), n. Ga[3]-de[2]l-e-a. The *Ribes grossularia* and the *Ribes officinale.* [B, 121, 173 (*a*, 24).]

GADE (Fr.), n. Ga[3]d. See Gadus.

GADHA-BUNI (Hind., Beng.), n. The *Trianthema decandra.* [B, 172 (*a*, 24).]

GADHA-POORNA (Hind.). n. The *Boerhavia procumbens.* [B, 172 (*a*, 24).]

GASHUMA (Sanscr.), n. The *Triticum æstivum.* [A, 479 (*a*, 21).]

GADIC ACID, n. Ga[2]d'i[2]k. Fr., *acide gadinique.* Ger., *Gadinsäure.* A fatty acid, $C_{28}H_{58}O_4$, obtained by Lück (1857) from light-brown cod-liver oil. It occurs in crystals melting at between 60° and 63° C. [B. 46, 81 (*a*, 27).] See also Morrhuic acid.

GADIDA-GUDA-PURRA (Tel.), n. The *Aristolochia bracteata.* [B, 172 (*a*, 24).]

GADINIC, adj. Ga[2]d-i[2]n'i[2]k. Fr., *gadinique.* Pertaining to the genus *Gadus.*—**G. acid.** See Gadic acid.

GADININE, n. Ga[2]d'i[2]n-en. Fr., *g.* Ger., *Gadinin.* A ptomaine, $C_{35}H_{46}N_5O_9$, or, according to others, $C_7H_{17}NO_2$, found in putrefying fish, especially the *Gadus callarias.* It is not poisonous. [B. 46, 244 (*a*, 14, 27), 270; "Gaz. hebd. de méd. et de chir.," June 25, 1886, p. 434.]

GADO (Guz.), n. The *Cocculus cordifolius.* [A, 479 (*a*, 21).]

GADOID, adj. Ga[2]d'oid. From γάδος, the whiting, and εἶδος, resemblance. Fr., *gadoide.* Resembling or related to the *Gadus merlangus;* as a n., in the pl., *g's* (Lat., *Gadoidei;* Fr., *gadoïdes*), a family of the *Malacopterygii.* [L, 41 (*a*, 21).]

GADOONG, n. In Sumatra, a species of *Smilax.* [B, 121 (*a*, 24).]

GADRISE, n. 1. The *Cornus sanguinea.* 2. The *Euonymus europæus.* 3. The *Viburnum opulus.* [B, 275 (*a*, 24).]

GADUCHI (Sanscr.), n. The *Cocculus cordifolius.* [A, 479 (*a*, 21).]

GADUIN, n. Ga[2]d'u[2]-i[2]n. Fr., *gaduine.* Ger., *G.* Of De Jongh, a bile-derivative, $C_{35}H_{46}O_9$, obtained from cod-liver oil: a dark-brown, brittle substance, devoid of taste and odor, having the properties of, and apparently corresponding to, morrhuic acid. [B, 81 (*a*, 27); L. Gautier and L. Mourgues, "Jour. de pharm.," March 1, 1890, p. 253, quoted in "Am. Jour. of Pharm.," July, 1890 (*a*, 17).]

GADUS (Lat.), n. m. Gad(ga[3]d)'u[3]s(u[4]s). From γάδος, the whiting. Fr., *gade.* The cod; a genus of the *Gadidæ.* The *Gadidæ* are a family of the *Anacanthini gadoidei* or of the *Teleostei*, including the genus *G.* [L, 207, 353 (*a*, 27).] Cf. Gadoid.—**G. æglifinus.** Fr., *aigrefin, hadot.* Ger., *Schellfisch.* The haddock, a species found on the Atlantic coast of North America, frequently eaten and sometimes used medicinally like *G. morrhua.* [B, 81; L, 353 (*a*, 27).]—**G. callarias.** Ger., *Dorsch.* The dorse or dorsch; in reality the young of *G. morrhua.* It furnishes a variety of cod-liver oil. [B, 48, 49, 180 (*a*, 14); L, 135 (*a*, 14); L, 353 (*a*, 27).]—**G. carbonarius.** Fr., *charbonnier, grelin, colin.* Ger., *Köhler, Kohlfisch.* The coal-fish, a species yielding cod-liver oil. [B, 81 (*a*, 27).]—**G. ciliaris.** See *G. callarias.*—**G. lota.** See Lota *vulgaris.*—**G. merlangus.** Fr., *merlan.* Ger., *Wittling, Merlang.* The whiting, a species found on the coasts of northern Europe; used like *G. morrhua.* [L, 353 (*a*, 27).]—**G. merluccius.** The *Merluccius vulgaris.*—**G. minutus.** Fr., *capelan, officier.* Ger., *Zwergdorsch.* A variety of *G. morrhua* found in the Baltic Sea, highly valued as an article of food. [L, 28 (*a*, 21).]—**G. molva.** Ger., *Leng.* The ling; a species especially abundant in the North Sea and Baltic; nearly the exclusive source of the Norway dried codfish, and Bergen cod-liver oil. [B, 180 (*a*, 14).]—**G. morrhua.** Fr., *morue.* Ger., *Kabeljau.* The cod; used, fresh, salted, or pickled, as an article of food, and the source of official cod-liver oil. [L. 353 (*a*, 27).]—**G. pollachius.** Ger., *Pollack.* The pollack or pollock: a species with very soft flesh, used like *G. morrhua.* [B, 5, 81.]—**Oleum gadi, Pinguoleum jecoris gadorum.** Cod-liver-oil. [B.]

GÆA (Lat.), n. f. Je'(ga[3]-a')-a[3]. Gr., γαῖα. See Earth (1st def.).

GÆEPHAGIA (Lat.), n. f. Je(ga[3]-a)-e[2]f-a(a[3])'ji[2](gi[2])-a[3]. See Gæophagia.

GÆEPHAGUS (Lat.), n. m. Je(ga[3]-a)-e[2]f'a[2]g(a[3]g)-u[3]s(u[4]s). See Gæophagus.

GÆIDIC (or **GÆIDINIC**) **ACID**, n. Je-i[2]d'i[2]k, -i[2]d-i[2]n'i[2]k. From γαῖα, earth. Fr., *acide gaïdique.* Ger., *Gæidinsäure, Gaïdinsäure.* A monobasic acid, $C_{16}H_{30}O_2$, isomeric with hypogæic acid, and occurring as a solid melting at 39° C., soluble in alcohol and in ether, insoluble in water. It is homologous with elaidic acid. [B, 4, 46 (*a*, 14).]

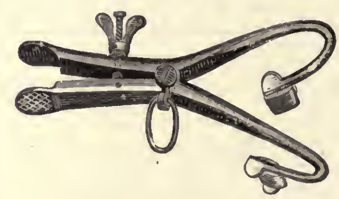
GÆIN, n. Je'i[2]n. From γαῖα, the earth. Fr., *géine.* 1. Of Berzelius, a substance resulting from the putrefaction of vegetable matter in the upper layers of the soil under the influence of air and humidity. 2. Of Buchner, a bitter substance extracted from the root of *Geum urbanum.* [B, 46 (*a*, 14).]

GÆINIC ACID, n. Je-i[2]n'i[2]k. Fr., *acide géinique.* An acid, $C_{40}H_{12}O_{14}$, found, together with humic and ulmic acids, in humus, and obtained by treating ammonium humate with an acid. According to Mulder, it is an oxidation product of humic acid. [B, 46 (*a*, 14).]

GÆODES (Lat.), n. f. Ga(ga[3]-e[2])-o'dez(das). Gen., *-od'is.* Gr., γεώδης. A species of aetite formerly supposed to act as an astringent and exsiccant in mastitis and orchitis. [L, 94.]—**G. Aldobrandi.** See Bezoar *minerale.*

GÆOPHAGIA (Lat.), n. f. Je(ga[3]-a)-o(o[3])-fa(fa[3])'ji[2](gi[2])-a[3]. Fr., *géophagie.* Ger., *Erdessen, Erdfressen.* 1. The practice of eating earth. See under *Edible* earth. 2. A morbid propensity to eat earthy substances. [A, 326 (*a*, 21).]

GAEOPHAGUS (Lat.), n. m. Ga(ga[3]-e[2])-o[2]f'a[3]-gu[3]s(gu[4]s). From γαῖα, earth, and φαγεῖν, to eat. A dirt-eater. [L, 135.]

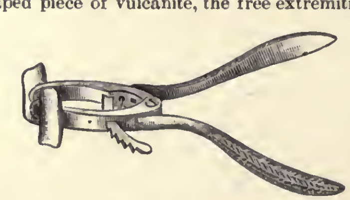


GAERA-HONÁRA-PÁTÁ (Beng.), n. The *Crinum asiaticum.* [A, 479 (*a*, 21).]

GÆTHAGHORAKA, n. In Ceylon, the *Cambogia gutta.* [B, 88 (*a*, 14).]

GA-ET-SAU (Chin.), n. The *Artemisia chinensis.* [B, 88 (*a*, 14).]

GAFETE, n. Ga[3]-fa'ta. A place in the province of Alentejo, Portugal, where there is a sulphurous spring. [L, 105 (*a*, 14).]



GAG, n. Ga[2]g. From *gaggare*, to choke. Fr., *bâillon.* Ger., *Knebel, Mundsperrer.* It., *sbarra.* Sp., *mordaza.* An instrument for holding the jaws apart. [E.]—**Annandale's g.** An instrument consisting of two steel blades bent at an obtuse angle where they are united by a screw joint; the handles are separated or closed by means of a nut working on a screw. The extremities of the blades are curved backward on themselves, and the tips are grooved to fit over the upper and lower teeth. [*a*, 34.]—**Clover's g.** Two flattened pieces of vulcanite or other material resting on pyramidal metal plates that can be separated by a screw that works between them. [*a*, 34.]—**Conical screw g.** A cone of vulcanite or other substance on the surface of which is cut a round-threaded screw; the base of the cone is expanded into a broad flattened handle. [*a*, 34.]—**Dental g.** A vulcanite cylinder grooved at either end to fit over the upper and lower teeth. [*a*, 34.]—**Fergusson's g.** A slight modification of Annandale's g. [*a*, 34.]—**Goodwillie's elastic mouth-g.** Two square pieces of vulcanite held apart by a spiral spring. [*a*, 34.]—**Goodwillie's g.** An instrument consisting of two blades, united by a single joint, bent at right angles to ring-shaped handles; to the expanded curved extremities of the blades are riveted grooved pieces to fit over the upper and lower maxillæ; the blades are kept separated by a square nut or serrations on the handle. [*a*, 34.]—**Meyer's g.** A lanciform piece of lead, grooved on its edges, attached to a curved metal bar fastened in a handle. ["N. Y. Med. Jour.," May 25, 1889, p. 565 (*a*, 34).]—**Mussey's g.** A slight modification of Whitehead's g. [*a*, 34.]—**Parker's g.** A V-shaped piece of vulcanite, the free extremities

ANNANDALE'S MOUTH-GAG.

GOODWILLIE'S ELASTIC MOUTH-GAG.

WEIR'S MOUTH-GAG.

being curved backward and flattened on the top to rest against the roof of the mouth; a strap, fastened to either side of the arms, passes about the neck and holds the g. in place. [*a*, 34.]—**Weir's g.** Two curved bars of steel united at one extremity by a single mortise joint; the bars are separated by a serrated spring attached to one and passing through an aperture in the other. On the tips of the free extremities are riveted grooved semi-cylinders placed transversely to the axis of the bars. Near the jointed extremities of the bars are slots for strong steel handles. [*a*, 34.]—**Whitehead's g.** Two bow-shaped metallic pieces joined to each other at the ends, approximated or separated by a spring catch near each end, and each fitted with a plate near the middle, that on the upper bow pressing against the roof of the mouth, that on the lower against the floor of the mouth and tongue. [*a*, 34.]

GAG, v. tr. and intr. Ga[2]g. 1. (Tr.) to apply a g. 2. (Tr.) to cause retching. 3. (Intr.) to retch.

GAGATES (Lat.), n. m. Ga[2]g(ga[3]g)-a(a[3])'tez(tas). Gen., *-at'œ.* Gr., γαγάτης. Ger., *Gagat.* See Ambra *nigra.*

GAGEA (Lat.), n. f. Gaj(ga^{3}g)'e^2-a^3 Ger., *Gelbstern* (2d def.). 1. Of Raddi, the genus *Zygodon*. 2. Of Salisbury, a genus of liliaceous herbs, formerly included in *Ornithogalum*. [B, 121, 180 (a, 24).]—**G. arvensis.** Ger., *Acker-Gelbstern.* A species found in Europe. The tuber, *radix ornithogali*, has a sweet, mucilaginous taste, and in decoction is emetic; used as an antispasmodic and as an application to ulcers. [B, 180 (a, 24).]—**G. lutea.** Ger., *gemeiner Gelbstern, gemeine Vogelmilch.* Our Lady's cowslip; a species found in Europe, and formerly used like *G. arvensis.* [B, 180 (a, 24).]—**G. pratensis, G. stenopetala.** A species found throughout Europe; its tuber, *radix ornithogali*, was formerly used like that of *G. arvensis.* [B, 180 (a, 24).]

GAGEL (Ger.), n. Ga^{3}g'e^{2}l. See COMPTONIA and MYRICA.—**G'kraut.** The herb (leaves) of *Myrica gale.* [B, 180 (a, 24).]—**G'öl.** The essential oil of *Myrica gale.* [L, 30 (a, 14).]—**G'wachs.** The wax of the berries of the *Myrica cerifera.* [B, 270.]—**Gemeiner G.** The *Myrica gale.* [B, 180 (a, 24).]—**Steiffarnblättriger G.** The *Myrica* (*Comptonia*) *asplenifolia.* [B, 180 (a, 24).]—**Wachstragender G.** The *Myrica cerifera.* [B, 180 (a, 24).]

GAGNACULES (Fr.), **GAGNAUDES** (Fr.), n's pl. Ga^{3}n-ya^3-ku^{6}l, -yod. The *Castaneæ.* [B, 121 (a, 24).]

GAGNEDI, n. In Abyssinia, the *Protea abyssinica.* [B, 121 (a, 24).]

GAH-DITZ, n. A Japanese drug, probably the rhizome of *Curcuma zerumbet.* ["Proc. of the Am. Pharm. Assoc.," xxxiii (a, 14).]

GAHJA (Hind.), n. The *Cannabis indica.* [B, 88 (a, 14).]

GÄHNEN (Ger.), **GÄHNUNG** (Ger.), n's. Gan'e^{2}n, -u^{2}n. Yawning. [L, 46 (a, 14).]

GÄHREND (Ger.), adj. Gar'e^{2}nd. Fermenting. [L, 46 (a, 21).]—**G'machend.** Zymotic. [L, 80.]

GÄHRSTOFF (Ger.), n. Gar'sto^{3}f. See FERMENT.

GÄHRUNG (Ger.), n. Gar'un^2. See FERMENTATION.—**Alkoholische G.** See *Alcoholic* FERMENTATION.—**Ameisensäureg'.** See *Formic-acid* FERMENTATION.—**Ammoniakg'.** See *Ammoniacal* FERMENTATION.—**Bernsteinsäureg'.** See *Succinic-acid* FERMENTATION.—**Buttersäureg'.** See *Butyric* FERMENTATION.—**Dextrang'.** See *Dextran* FERMENTATION.—**Essigsäureg'.** See *Acetic* FERMENTATION.—**Faulige G., Fäulnissg'.** See *Putrefactive* FERMENTATION.—**Fettg'.** See *Fat* FERMENTATION.—**G. durch chemische (oder lösliche) Fermente.** See *Indirect* FERMENTATION.—**G'sfähig.** See FERMENTABLE.—**G'serregend.** Exciting fermentation.—**G'slehre.** Zymology.—**G'smittel.** See FERMENT.—**G'sprocess.** See FERMENTATION (1st def.).—**G'sstoff.** See the major list.—**G'swidrig.** See ANTIZYMIC.—**Gluconsäureg'.** See *Gluconic-acid* FERMENTATION.—**Glyceringʼ.** See *Glycerin* FERMENTATION (1st def.).—**Glycerinverg'.** See *Glycerin* FERMENTATION (2d def.).—**Harng'.** See *Urinary* FERMENTATION.—**Mannitg'.** See *Viscous* FERMENTATION.—**Milchsäureg'.** See *Lactic-acid* FERMENTATION.—**Propionsäureg'.** See *Propionic-acid* FERMENTATION.—**Saure G.** See *Acetous* FERMENTATION.—**Schleimige G.** See *Viscous* FERMENTATION.—**Sumpfgasg'.** See *Marsh-gas* FERMENTATION.

GÄHRUNGSSTOFF (Ger.), n. Gar'un^{2}z-sto^{3}f. See FERMENT.—**Amylolytischer G.** See *Amylolytic* FERMENT.—**Glycogenischer G.** See *Glycogen* FERMENT.—**Hydrolytischer G.** See *Hydrolytic* FERMENT.—**Milchsäureg'.** See *Lactic* FERMENT.—**Pflanzlicher G.** See *Vegetable* FERMENT.—**Proteolytischer G.** See *Proteolytic* FERMENT.—**Thierischer G.** See *Animal* FERMENT.—**Unorganischer G.** See *Soluble* FERMENT.

GAHULÁ (Mah.), n. The *Prunus mahaleb.* [A, 479 (a, 21).]

GAÏAC (Fr.), n. Ga^3-e-a^{3}k. See GUAIACUM and GAYAC.—**Bois de g.** See GUAIAC-*wood.*—**Décoction de g.** See *Decoctum* GUAIACI.—**Décoction de g. composée.** See *Decoctum* GUAIACI *compositum.*—**Eau-de-vie de g.** A tincture prepared by macerating 1 part of guaiac-wood in 5 parts of 60-per-cent. alcohol. [L, 41 (a, 14).]—**Émulsion de résine de g.** See *Mistura* GUAIACI.—**Esprit de g.** See *Spiritus ligni* GUAIACI.—**Extrait alcoolique de g.** See GUAIAC *resin.*—**Extrait de g.** See *Extractum* GUAIACI.—**Extrait vineux de g.** See *Extractum* GUAIACI *vinosum.*—**G. à fruit tétragone.** See GUAIACUM *sanctum.*—**G. d'Afrique.** The *Schotia speciosa.* [B, 121 (a, 24).]—**G. de Cayenne, G. de la Guyane.** The *Dipteryx odorata.* [B, 121 (a, 24).]—**G. de Padoue.** The *Diospyros lotus.* [B, 121 (a, 24).]—**G. des Allemands.** The *Fraxinus excelsior.* [B, 121 (a, 24).]—**G. d'Italie.** The *Diospyros lotus.* [B, 121 (a, 24).]—**G. du Chili.** The *Porliera hygrometrica.* [B, 121 (a, 24).]—**G. officinel.** See GUAIACUM *officinale.*—**Huile de g.** See *Oleum* GUAIACI.—**Hydrolé de g.** See *Decoctum* GUAIACI.—**Lait de g.** See *Mistura* GUAIACI.—**Pilules de savon de g.** See *Pilulæ* SAPONIS *guaiacini.*—**Résine de g.** See GUAIACI *resin.*—**Savon de g.** See SAPO *guaiacinus.*—**Sirop de g.** See *Syrupus ligni* GUAIACI.—**Tablettes de g.** See *Tabellæ* GUAIACI.—**Teinture alcoolique de résine de g.** See *Tinctura* GUAIACI (1st def.).—**Teinture alcoolique de résine de g. composée.** See *Tinctura resinæ* GUAIACI *composita* (1st def.).—**Teinture de bois de g.** See *Tinctura ligni* GUAIACI.—**Teinture de bois de g. composée.** See *Tinctura* LIGNORUM.—**Teinture de g. fenouillée.** See *Tinctura* GUAIACI *cum fœniculo.*

GAÏACAN (Fr.), n. Ga^3-e-a^3-ka^{3}n^2. The genus *Guaiacum*, especially *Guaiacum arboreum.* [A, 385.]—**G. de Caracas.** See *G.*—**G. du Chili.** See PORLIERA *hygrometrica.*

GAÏACÈNE (Fr.), n. Ga^3-e-a^3-se^{2}n. See GUAIACENE.

GAÏACINE (Fr.), n. Ga^3-e-a^3-sen. See GUAIACIN.

GAÏACIQUE (Fr.), adj. Ga^3-e-a^3-sek. Guaiacic.

GAÏACOL (Fr.), n. Ga^3-e-a^3-kol. See GUAIACOL.

GAÏACONIQUE (Fr.), adj. Ga^3-e-a^{3}ko-nek. Guaiaconic.

GAÏARÉTIQUE (Fr.), adj. Ga^3-e-a^2-ra-tek. Guaiaretic.

GAÏDINSÄURE (Ger.), n. Ga^3-e-den'zoir-e^2. Gæidic acid. [B.]

GAÏDIQUE (Fr.), n. Ga^3-e-dek. Gæidic.

GAIEIRAS (Port.), n. Ga^3-e-a-e'ra^{3}s. A place in Alemquer, province of Estremadura, Portugal, where there is a sulphurous spring. [L, 105 (a, 14).]

GAIGAMODOU (Fr.), n. Ga-e-ga^3-mo-du. In Guiana, a species of *Myristica*, yielding a variety of vegetable tallow or wax generally called *guingamadou.* [B, 121 (a, 24); a, 14.]

GAIL (Jap.), n. Of Kampfer, a species of *Artemisia.* [B, 121 (a, 24).]

GAILEN, n. A place in the valley of St. Antonia, canton of Grisons, Switzerland, where there is a sulphurous spring. [L, 135 (a, 14).]

GAILLARD (Fr.), n. Ga^3-el-ya^{3}r. See GUAIACI *lignum.*

GAILLET (Fr.), n. Ga-el-ya. The genus *Galium*, especially the *Galium verum.* [B, 19, 121, 173 (a, 24).]

GAÎNE (Fr.), n. Ge^{2}n. From *vagina*, a scabbard. A sheath, a vagina, an enveloping structure. [L, 43, 87 (a, 14).]—**G. amniotique du cordon ombilical.** The amniotic sheath which contains the pedicle of the umbilical vesicle and that of the allantois at an early period in the development of the umbilical cord, and subsequently the fully formed cord.—**G. antibrachiale.** The tendinous sheath which covers a portion of the tendons of the external radial muscles of the forearm. It extends from a point 2 or 3 ctm. above the annular ligament, along the surface of the tendons, as far as the latter are covered by the short extensor and long abductor of the thumb, and ends at or near the upper border of the latter muscle. [R. Larger, "Rev. de. Chir.," May, 1882, p. 399 (D).]—**G. aponévrotique.** An aponeurotic sheath. [L, 41, 42.]—**G. capillaire.** See *Capillary* SHEATH.—**G. de Henle.** See SHEATH *of Henle.*—**G. de l'apophyse styloïde.** See *Vaginal* PROCESS.—**G. de la veine porte.** The portion of Glisson's capsule which accompanies the distribution of the portal vein in the substance of the liver. [L, 41.]—**G. de Mauthner.** See *Mauthner's* SHEATH.—**G. de myéline.** See *Medullary* SHEATH.—**G's des capuchons.** See *False* AMNION.—**G. de Schwann.** See NEURILEMMA.—**G. des vaisseaux spermatiques.** See *Infundibuliform* FASCIA.—**G. du nerf optique.** See SHEATH *of the optic nerve.*—**G. lamineuse.** See PERINEURIUM.—**G. médullaire.** See *Medullary* SHEATH.—**G. périvasculaire** [Robin]. See *Perivascular lymph* SHEATHS.—**G. propre des vaisseaux testiculaires.** See *Infundibuliform* FASCIA.—**G. radiculaire.** The root-sheath of a hair. [A, 301.]—**G. secondaire.** See *Secondary* SHEATH.—**G. stipulaire.** See *Stipulary* MEMBRANE.—**G. synoviales.** See *Synovial* SHEATH.—**G. tendineuse.** The synovial sheath of a tendon. [L, 41.]

GAINFARN (Ger.), n. Ga^3'en-fa^{3}rn. A place in lower Austria where there is a cold-water bathing establishment. [A, 319 (a, 21).]

GAÎNIER (Fr.), n. Ge^{2}n-e-a. The genus *Cercis.* [B, 121, 173 (a, 24).]—**G. de Canada.** The *Cercis canadensis.* [B, 173 (a, 24).]—**G. de Judée.** The *Cercis siliquastrum.* [B, 121, 172 (a, 24).]—**G. pubescent.** See CERCIS *pubescens.*

GAÎNULE (Fr.), n. Ge^{2}n-u^{6}l. See VAGINULA.

GAÏOL (Fr.), n. Ga^3-e-ol. GUAIACOL.

GAIRIKA (Sanscr.), n. See *Red* BOLE.

GAIROUTTE (Fr.), n. Ga^3-e-rut. The *Lathyrus cicera.* [B, 121, 173 (a, 24).]

GAIS (Ger.), n. Ga^3'es. 1. The domestic goat. 2. A place in the canton of Appenzell, Switzerland, where there are mineral springs, baths, and a whey-cure establishment. [A, 319 (a, 21); L, 30, 41, 80, 87 (a, 14).]—**G'fuss.** Langenbeck's periosteal elevator. [A, 521.]

GAIT, n. Gat. Fr., *marche* (of persons), *allure* (of horses, etc.). Ger., *Gang.* Any distinctive manner of walking or running.—**Ataxic g.** The g. of posterior spinal sclerosis, in which steps are taken slowly and deliberately at regular intervals with the eyes fixed on the ground; but there are irregular movements of the legs, the feet are jerked outward, making a swinging circular movement, and the heels are brought to the ground with a stamp, the toes following with a peculiar flapping sound. As the disease progresses, locomotion can only be made with the assistance of canes or crutches. [a, 34.]—**Cerebellar g.** A staggering and unsteady g. which is the result of cerebellar disease, the normal cerebellar influence upon co-ordination being removed. [Russell, "Med. Times and Gaz.," Mar. 3, 1883, p. 239 (D).]—**Equine g.** See *G. of peroneal paralysis.*—**Frog g.** The g. of infantile diplegia, in which the adductor paralysis and the contractures of the adductors and flexors of the thighs produce a peculiar hopping g. [Sachs and Peterson, "Jour. of Ment. and Nerv. Dis.," May, 1890 (a, 34).]—**G. of cerebrospinal sclerosis.** A g. in which the patient moves with an effort to keep the neck stiff and the head steady; the muscles of the trunk seem to be involved rather than those of the legs; the patient does not walk in a straight line, as in the ataxic g., but shoots suddenly forward to one side, sometimes losing muscular control and coming into violent contact with surrounding objects. [a, 34.]—**G. of chronic lead poisoning.** A peculiar stooping, uncertain, and tottering g. caused by paralysis of the dorsal muscles. [Wilson (a, 34).]—**G. of diffuse sclerosis.** See *Paraparetic g.*—**G. of locomotor ataxia.** See *Ataxic g.*—**G. of paralysis agitans.** A g. in which there is hesitation before beginning to walk; a few steps are made slowly, and then the g. becomes rapid on account of the tendency to fall forward (propulsion). In some cases, if a garment is pulled from behind, the patient runs backward (retropulsion). [a, 34.]—**G. of paraplegia with flaccidity.** A g. in which the feet are trailed with difficulty after each other, the knees do not interlock, the back is not arched, and there is no tendency to cross the legs. [a, 34.]—**G. of peroneal paralysis.** A g. in which the foot can not be flexed, abducted, or completely adducted, and

hangs down with the toes trailing on the ground. The foot is raised by flexing the thigh on the abdomen, and then placed on the ground with the outer border of the toes touching first. [*a*, 34.]—**G. of sciatic paralysis.** A limping g., with a tendency of the toes to drag. [*a*, 34.]—**G. of tetanoid paraplegia.** See *Spastic g.*—**Hemiplegic g.** In hemiplegia, locomotion by means of a support on the affected side; the body leans toward the healthy side, the pelvis and hip joint of the affected side being elevated by contraction of the abductor of the opposite thigh; the affected limb is partly swung and partly dragged forward; the heel is elevated and the toes on the ground. [*a*, 34.]—**High-action g.** See *G. of peroneal paralysis.*—**Hopping g.** See *Spastic g.*—**Paralytic g.** See *Paretic g.*, *G. of peroneal paralysis*, and *G. of sciatic paralysis.*—**Paraparetic g.** A g. in which locomotion is slow, the steps are short, and the feet are dragged along, as the patient is unable to lift them. It is seen in chronic myelitis. [*a*, 34.]—**Paretic g.** A g. in which the steps are shorter than normal, the feet are not raised, the legs are kept more or less wide apart, and, later in the disease, there are staggering, shuffling, and more uncertain movements. [*a*, 34.]—**Spasmodic g., Spastic g.** A g. characteristic of spastic paraplegia, in which each step is made with effort, as the feet seem to cling to the ground, and are raised by elevating the pelvis and the entire limb. The back is arched and the chest thrown forward, the patient assisting in the elevation of the trunk by leaning first on one arm, then on the other. The toes drag on the ground, the knees may interlock, and the legs may cross during locomotion. [*a*, 34.]

GAITBERRY, n. Gat′be^{2}r-i^2. The fruit of *Rubus fruticosus.* [A, 505 (*a*, 21).]

GAITER, n. Gat′u^{3}r. 1. See GADRISE. 2. The *Rubus fruticosus.* [A, 505 (*a*, 21).]—**G.-berries.** The fruit of *Cornus sanguinea* and *Euonymus europæus.* [B, 275 (*a*, 24).]

GÁJAGÁ KÁCHAKÁ, n. In Bombay, the *Cæsalpinia guilandina.* [A, 479 (*a*, 21).]

GAJA MARIOBA (Port.), n. Ga^3′ya^3 ma^3-re-o′ba^3. The *Cassia occidentalis.*

GÁJARA (Guz.), **GÁJARA BICHI** (Beng.), **GAJARA BIJA** (Hind.), **GÁJARA BIJÁMA** (Sanscr.), n's. The *Daucus carota.* [A, 479 (*a*, 21).]

GALA (Lat.), n. n. Ga^{2}l(ga^{3}l)′a^3. Gen., *galac′tos* (*-is*), *ga′latos* (*-is*). Gen., *-lactos* (*-tis*). Gr., γάλα. 1. See MILK. 2. Of Adanson, the genus *Laserpitium.* [B, 121 (*a*, 24); L, 135.]

GALABE (Ar.), n. The root of *Ipomœa purga.* [L, 77 (*a*, 14).]

GALACEÆ (Lat.), n. f. pl. Ga^{2}l(ga^{3}l)-a(a^3)′se^2(ke^2)-e(a^3-e^2). From γάλα, milk. Fr., *galacées.* A tribe of ericaceous plants; of De Candolle, a tribe of the *Pyrolaceæ;* of Reichenbach, a section of the *Pyroleæ genuinæ.*. [B, 19, 34, 121, 170 (*a*, 24).]

GALACIA, n. See GALAXA.

GALACINÆ (Lat.), n. pl. Ga^{2}l(ga^{3}l)-a(a^3)-sin(ken)′e(a^3-e^2). Fr., *galacinées.* Of G. Don, a family of plants (of Lindley, an order of the *Crassales*), including the *Galaceæ* of De Candolle and the *Francoaceæ* of Jussieu. The *Galacineæ* are: Of Reichenbach, a section of the *Saxifrageæ*, corresponding to the *G.*; of Wood, a suborder of the *Ericaceæ*, corresponding to the *Galaceæ.* [B, 34, 121, 170.]

GALACTACRASIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-a^{2}k-(a^{3}k)-ra(ra^3)′zi^2(si^2)-a^3. From γάλα, milk, α priv., and κρᾶσις, a mixing. Fr., *galactacrasie.* A defective composition of the milk. [L, 50 (*a*, 14).]

GALACTACRATIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-a^{2}k-(a^{3}k)-ra^{2}t(ra^{3}t)-i(e)′a^3. From γάλα, milk, and ἀκράτεια, lack of strength. Incontinence of milk. [A, 322.]

GALACTÆMIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-em′(a^3-am′)-i^2-a^3. See GALACTHÆMIA.

GALACTAGOGUE, adj. Ga^{2}l-a^{2}kt′a^2-go^{2}g. Lat., *galactagogus* (from γάλα, milk, and ἄγειν, to lead). Fr., *g.*, *galactophore.* Ger., *milchmachend, milchfördernd.* It., *galattagogo.* Sp., *galactagogo.* Promoting the secretion of milk; as a n., a g. drug or remedy. [A, 326 (*a*, 21).]

GALACTALCOHOL, n. Ga^{2}l-a^{2}kt-a^{2}l′ko-ho^{2}l. See GALACTOKOHOL.

GALACTANGEIOLEUCITIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt-(a^{3}kt)-a^{2}n(a^{3}n^2)-ji(ge^2-e)-o(o^3)-lu^2-si(ke)′ti^{2}s. Gen., *-it′idos* (*-is*). From γάλα, milk, ἀγγεῖον, a vessel, and λευκός, white. Fr., *galactangioleucite* [Piorry]. Lymphadenitis following lactation. [L, 41, 82.]

GALACTAPOSTEMA (Lat.), n. n. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-a^{2}p-(a^{3}p)-o^{2}s-te(ta)′ma^3. Gen., *-ste′matos* (*-is*). From γάλα, milk, and ἀπόστημα, a deep-seated abscess. See *Milk* ABSCESS.

GALACTHÆMIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)-them′-(tha^3-am′)-i^2-a^3. From γάλα, milk, and αἷμα, blood. A condition in which the mammary secretion is bloody. [A, 322.]

GALACTIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)′shi^2(ti^2)-a^3. From γάλα, milk. Fr., *galactie.* 1. In Good's classification of diseases, a genus including erratic, defective, excessive, and morbid lactation. [L, 107.] 2. See GALACTORRHŒA.

GALACTIC, adj. Ga^{2}l-a^{2}k′ti^{2}k. Gr., γαλακτικός (from γάλα, milk). Lat., *galacticus.* Fr., *galactique.* Ger., *milchartig, milchig.* See LACTIC.

GALACTIDROSIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)-ti^{2}d-ros′i^{2}s. Gen., *-os′eos* (*-is*). From γάλα, milk, and ἵδρωσις, sweating. Fr., *éphidrose lactée* (ou *laiteuse*). Ger., *Milchschwitzen.* Syn.: *sudor lacteus, ephidrosis lactea.* A term now rarely used, but formerly applied either to profuse sweating during the lying-in period, or to the excretion of a milk-like fluid by the skin during lactation; according to Fuchs, smelling, tasting, and looking like milk. [G, 5.]

GALACTIFEROUS, adj. Ga^{2}l-a^{2}k-ti^{2}f′e^{2}r-u^{3}s. From γάλα, milk, and *ferre*, to bear. See GALACTOPHOROUS.

GALACTIN, n. Ga^{2}l-a^{2}k′ti^{2}n. From γάλα, milk. Fr., *galactine.* Ger., *G.* It., *galattina.* 1. Of Döbereiner and Hünefeld, casein. 2. A wax-like substance obtained by evaporating the sap of the cow-tree (*Galactodendron utile*), extracting with ether, and evaporating. It forms a transparent, pale-yellow, shining mass, hard and brittle when cold; used in Venezuela for making candles. 3. Of Muntz, a dextrorotary carbohydrate, $C_6H_{10}O_5$, extracted from leguminous seeds; it occurs in white, translucent nodules, resembling gum arabic. [B, 270; L, 30, 41, 44, 50 (*a*, 14); "Proc. of the Am. Pharm. Assoc.," xxx, xxxvii (*a*, 14).]

GALACTINE, n. Ga^{2}l-a^{2}k′ten. Fr., *g.* Ger., *Galactin.* Of Blyth, an alkaloid, $C_{54}H_{78}N_4O_{45}$, occurring as an amorphous mass, obtained from milk. [B, 270.]

GALACTINIDROSIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-i^{2}n-i^2-dro′si^{2}s. Gen., *-dro′seos* (*-is*). See GALACTIDROSIS.

GALACTINOMYCES (Lat.), n. m. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-i^{2}n-o^{2}m′i^2(u^6)-sez(kas). Gen., *-mycet′os* (*-is*). See GALACTOMYCES.

GALACTINOUS, adj. Ga^{2}l-a^{2}k′ti^{2}n-u^{3}s. Gr., γαλάκτινος. Lat., *galactinus.* 1. See LACTIC. 2. Containing or made with milk. [A, 322.]

GALACTIRRHÉE (Fr.), n. Ga^3-la^{3}k-te-ra. See GALACTORRHŒA.—**G. séreuse** [Dugès]. See GALACTOPHORITE *sous-aureolaire.*

GALACTIRRHŒA (Lat.), n. f. Ga^{2}l(ga^{2}l)-a^{2}kt(a^{3}kt)-i^{3}r-re′-(ro^2′e^2)-a^3. See GALACTORRHŒA.

GALACTIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)′ti^{2}s. Gen., *-ac′tidos* (*-is*). Gr., γαλακτίς. See GALACTITES.

GALACTISCHESIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-i^{2}sk-(i^{2}sch^2)′e^2-si^{2}s. Gen., *-ische′seos* (*-i′schesis*). From γάλα, milk, and ἴσχειν, to hold. Ger., *Milchverhaltung.* Retention or suppression of milk. [L, 30, 50, 107 (*a*, 14).]

GALACTITES (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-i(e)′tez(tas). Gen., *-it′æ.* From γάλα, milk. Fr., *galactite* (1st def.). Ger., *Galaktit* (1st def.). Sp., *galactina* (1st def.). 1. An argillaceous stone which imparts a milky color to water, and was formerly supposed to act as a galactagogue. [L, 41, 50 (*a*, 14).] 2. A genus of the *Compositæ*, some species of which have a milky juice. The *Galactiteæ*, or *Galactitideæ* of Schultz, are a subdivision of the *Cirsieæ.* [B, 19, 170 (*a*, 24).]

GALACTOBLASTS, n. pl. Ga^{2}l-a^{2}k′to-bla^{2}sts. From γάλα, milk, and βλαστός, a sprout. Of Rauber, bodies containing fat globules, found in the mammary acini; considered to be exuded leucocytes undergoing fatty metamorphosis. ["Sitzungsb' der naturf. Gesells. zu Leipzig," 1879, p. 30 (J).]

GALACTOCATARACTA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)″-o(o^3)-ka^{2}t(ka^{3}t)-a^{2}r(a^{3}r)-a^{2}k(a^{3}k)′ta^3. From γάλα, milk, and καταῤῥεῖν, to flow down. Ger., *Milchstaar.* An old name for a milky cataract. [L, 50.]

GALACTOCELE (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-sel-(kal)′e(a); in Eng., ga^{2}l-a^{2}kt′o-sel. From γάλα, milk, and κήλη, a tumor. Fr., *galactocèle.* Ger., *G.*, *Milchgeschwulst.* 1. A cyst-like swelling due to the accumulation of milk in an obstructed lactiferous duct. 2. See CHYLOCELE. [E.]—**G. testis.** A form of hydrocele of the tunica vaginalis testis in which the liquid is milky. [Cocram and Miles, "N. O. Med. and Surg. Jour.," Sept., 1889; "Med. Record," Nov. 9, 1889, p. 518.]

GALACTOCHROUS (Lat.), adj. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)-to^{2}k-(to^{2}ch^2)′ro(ro^2)-u^{3}s(u^{4}s). Gr., γαλακτόχροος (from γάλα, milk, and χρώς, a color). Ger., *milchfarbig.* Milk-colored. [A, 322, 387.]

GALACTODENDRON (Lat.), **GALACTODENDRUM** (Lat.), n's n. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-de^{2}n′dro^{2}n, -dru^{3}m(dru^{4}m). From γάλα, milk, and δένδρον, a tree. Fr., *g.* Ger., *Milchbaum.* The genus *Brosimum.* [B, 19, 42, 173, 180 (*a*, 24).]—**G. utile.** Fr., *arbre à la vache.* Ger., *amerikanischer Kuhbaum* (oder *Milchbaum*). Sp., *palo de vaca.* The cow-tree, a species indigenous to Venezuela. The milky sap is eaten as food, and yields a cheese-like substance. It contains galactin (*q. v.*). [B, 19, 47, 173, 180, 185 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]

GALACTODENSIMETER, n. Ga^{2}l-a^{2}k″to-de^{2}ns-i^{2}m′e^{2}t-u^{5}r. From γάλα, milk, *densus*, thick, and μέτρον, a measure. Fr., *galactodensimètre.* See GALACTOMETER.

GALACTODES (Lat.), adj. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o′dez(das). Gr., γαλακτώδης (from γάλα, milk, and εἶδος, resemblance). Fr., *galactoïde.* Ger., *milchähnlich, milchfarbig.* Milky. [L, 50 (*a*, 14).]

GALACTODIÆTA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-di-(di^2)-et′(a^3′e^{2}t)-a^3.. From γάλα, milk, and δίαιτα, a way of living. See *Milk* DIET.

GALACTODIARRHŒA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o-(o^3)-di(di^2)-a^{2}r(a^{2}r)-re′(ro^2′e^2)-a^3. From γάλα, milk, and διαῤῥεῖν, to flow through. Ger., *milchähnlicher Durchfall.* Diarrhœa with stools of a milky color. [L, 30, 50 (*a*, 14).]

GALACTŒDEMA (Lat.), n. n. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-e^{2}d(o^2-e^{2}d)-e(a)′ma^3. Gen., *-e′matos* (*-is*). From γάλα, milk, and οἴδημα, a tumefaction. Ger., *ödematose Milchgeschwulst.* Of Schmalz, an œdematous galactocele. [L, 50 (*a*, 14).]

GALACTOFEROUS, adj. Ga^{2}l-a^{2}kt-o^{2}f′e^{2}r-u^{3}s. From γάλα, milk, and *ferre*, to bear. See GALACTOPHOROUS.

GALACTOGANGLION (Lat.), n. n. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)″o-(o^3)-ga^{2}n^2(ga^{3}n^2)′gli^2-o^{2}n. The indurated ganglion-like swelling produced by a distended lacteal duct. [*a*, 34.]

GALACTOGENOUS, adj. Ga^{2}l-a^{2}k-to^{2}j′e^{2}n-u^{3}s. From γάλα, milk, and γεννᾶν, to produce. Fr., *galactogène.* Favoring the production of milk. [A, 385.]

GALACTOGLYCOSURIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)''to-(to^3)-gli^{2}k(glu^{6}k)-o^{2}s-u^2(u)'ri^2-a^3. From γάλα, milk, γλυκύς, sweet, and οὖρον, urine. Glycosuria occurring during lactation. [α, 34.]

GALACTOHÆMIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-hem'(ha^3-am')-i^2-a^3. See GALACTHÆMIA.

GALACTOID, adj. Ga^{2}l-a^{2}k'toid. See GALACTODES.

GALACTOKOHOL, n. Ga^{2}l-a^{2}k-to'ko-ho^{2}l. Lat., *spiritus lactis.* Ger., *Milchgeist.* The kumyss of the Tartars. [L, 50 (α, 14).]

GALACTOMA (Lat.), n. n. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o'ma^3. Gen., *-om'atos (-is).* See GALACTOCELE.

GALACTOMAPOSTEMA (Lat.), **GALACTOMASTAPOSTEMA** (Lat.), **GALACTOMASTOPARECTAMA** (Lat.), n's n. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)''tom-a^{2}p(a^{3}p)-o^{2}s-te(ta)'ma^3, -ma^{2}st(ma^{3}st)-a^{2}p-(a^{3}p)-o^{2}s-te(ta)'ma^3, -o(o^3)-pa^{2}r(pa^{3}r)-e^{2}k'ta^{2}m(ta^{3}m)-a^3. Gen., *-stem'atos (-is), -stem'atos (-is), -ectam'atos (-is).* From γάλα, milk, μαστός, the breast, and ἀπόστημα, an abscesss, or παρέκταμα, distension. See *Milk* ABSCESS.

GALACTOMETASTASIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)''-o(o^3)-me^{2}t-a^{2}s(a^{3}s)'ta^3-si^{2}s. Gen., *-astas'eos (-ast'asis).* From γάλα, milk, and μετάστασις (see METASTASIS). Ger., *Milchversetzung.* A metastasis of the milk. [L, 50 (α, 14).]

GALACTOMETER, n. Ga^{2}l-a^{2}k-to^{2}m'e^{2}t-u^{5}r. Lat., *galactometrum* (from γάλα, milk, and μέτρον, a measure). Fr., *galactomètre.* Ger., *Galaktometer, Milchgütemesser, Milchprüfer.* An instrument for measuring the amount of cream in milk by ascertaining its specific gravity or the degree of its opacity. [B, 20; K.] Cf. CREMOMETER.—**Centesimal g.** Of Dinocourt, a hydrometer with two graduated scales, one for skimmed milk, the other for pure milk. [L.]

GALACTOMYCES (Lat.), n. m. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o^{2}m'i^2(u^6)-sez(kas). Gen., *-mycet'os (-is).* From γάλα, milk, and μύκης, a fungus. Lat., *fungus medullarum* (seu *cerebriformis*). Ger., *Eiweissschwamm, weicher Krebs, Gallertschwamm.* See *Medullary* SARCOMA and *Medullary* CARCINOMA.

GALACTONCUS (Lat.), n. m. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o^{2}n^{2}k'u^{3}s-(u^{4}s). From γάλα, milk, and ὄγκος, a swelling. See GALACTOCELE.

GALACTOPHAGIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-fa^{2}j(fa^{3}g)'i^2-a^3. Prom γάλα, milk, and φαγεῖν, to eat. Fr., *galactophagie.* Ger., *Milchessen, Milchnährung.* 1. The habit of subsisting upon milk. [L, 41.] 2. A diet of milk. [L, 41.]

GALACTOPHAGOUS, adj. Ga^{2}l-a^{2}kt-o^{2}f'a^{2}g-u^{3}s. From γάλα, milk, and φαγεῖν, to devour. Fr., *galactophage.* Ger., *milchessend.* Subsisting on milk. [L, 107.]

GALACTOPHLEBITIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-fle^{2}b-i(e)'ti^{2}s. Gen., *-it'idos (-is).* From γάλα, milk, and φλέψ, a vein (see also *-itis**). Fr., *galactophlébite* [Piorry]. Phlebitis in newly born children. [L, 41, 82.]

GALACTOPHLYSIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o^{2}f'-li^{2}s(lu^{6}s)-i^{2}s. Gen., *-ophlys'eos (-oph'lysis).* From γάλα, milk, and φλύσις, a vesicular eruption. Of Fuchs, an eruption of vesicles which contain milk, occurring in connection with suppression of lactation. [G, 5.]

GALACTOPHORE (Fr.), adj. and n. Ga^3-la^{3}k'to-for. See GALACTOPHOROUS and GALACTOPHORUS.

GALACTOPHORITE (Fr.), n. Ga^{3}l-a^{3}k-to-fo-ret. See GALACTOPHORITIS.—**G. sousauréolaire** [Duval]. Syn.: *cancer bénin* [Astruc], *galactirrhée séreuse* [Dugès]. A chronic inflammatory affection beginning in the subareolar portions of the milk-ducts with a discharge from the nipple, often followed by superficial excoriation and ulceration of the nipple, and in some cases by suppuration in the ducts, or by ulceration surrounding the nipple and causing it to fall off. [A, 33.]

GALACTOPHORITIS, n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-fo^{2}r-i(e)'ti^{2}s. Gen., *-i'tidos (-is).* From γάλα, milk, and φορεῖν, to bear (see also *-itis**). Fr., *galactophorite.* Ger., *Galaktophoritis.* 1. Of Bouchut, inflammation of the mouth of the milk-ducts. 2. Of Duval, inflammation of the milk-ducts, beginning as an engorgement and soon becoming a parenchymatous inflammation. [A, 33.]

GALACTOPHOROUS, adj. Ga^{2}l-a^{2}k-to^{2}f'o^{2}r-u^{3}s. Gr., γαλακτοφόρος (from γάλα, milk, and φορεῖν, to bear). Lat., *galactophorus.* Fr., *galactophore.* 1. Giving milk. [A, 387.] 2. Milk-conveying (said of the ducts of the mammary gland). [L, 41.] 3. See GALACTAGOGUE.

GALACTOPHORUS (Lat.), adj. and n. m. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o^{2}f'o^{2}r-u^{3}s(u^{4}s). 1. (Adj.) see GALACTOPHOROUS. 2. (N.) a nipple-shield. [A, 385.] 3. (N.) a galactophorous duct. [A, 385.]

GALACTOPHTHISIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o^{2}f'-thi^2-si^{2}s. Gen., *-ophthis'eos (-oph'thisis).* From γάλα, milk, and φθίσις, consumption. Fr., *galactophthisie.* Ger., *Milchauszehrung.* Syn.: *tabes lactea.* Phthisis due to excessive lactation. [L, 41.]

GALACTOPHYGOUS, adj. Ga^{2}l-a^{2}kt-o^{2}f'i^2-gu^{3}s. Lat., *galactophygus* (from γάλα, milk, and φυγή, banishment). Ger., *milchvertreibend.* Of medicines, tending to arrest or prevent the secretion of milk. [L, 107.]

GALACTOPIOMETER, n. Ga^{2}l-a^{2}kt-o-pi-o^{2}m'e^{2}t-u^{5}r. Lat., *galactopiometrum* (from γάλα, milk, πίων, fat, and μέτρον, a measure). Ger., *Milchfettmesser.* See GALACTOMETER and CREMOMETER.

GALACTOPLANIA (Lat.), n. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-plan-(pla^{3}n)'i^2-a^3. From γάλα, milk, and πλάνη, a wandering. Ger., *Galactoplanie, Austreten der Milch.* Any disease consequent on suppressed or disordered lactation, formerly supposed to be due to metastasis. In the pl., *galactoplaniæ,* a generic term applied by Fuchs to galactidrosis and galactophlysis. [G, 5.]

GALACTOPLEROSIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-ple(pla)-ro'si^{2}s. Gen., *-plero'seos (-is).* From γάλα, milk, and πλήρωσις, a filling up. Fr., *galactoplérose.* Ger., *Milchüberfluss.* See GALACTORRHŒA.

GALACTOPŒIA (Lat.), **GALACTOPOESIS** (Lat.), **GALACTOPOETICA** (Lat.), **GALACTOPOIESIS** (Lat.), n's f. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)-to(to^3)-pe'(po^2'e^2)-i^2-a^3, -po(po^2)-e(a)'si^{2}s, -e^{2}t-(at)'i^{2}k-a^3, -poi-e(a)'si^{2}s. From γάλα, milk, and ποιεῖν, to make. See GALACTOSIS.

GALACTOPOIETIC, adj. Ga^{2}l-a^{2}kt-o-poi-e^{2}t'i^{2}k. From γάλα, milk, and ποιεῖν, to make. Fr., *galactopoétique.* Ger., *milchmachend.* See GALACTAGOGUE.

GALACTOPOSIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)o(o^3)-po-(po^2)'si^2-a^3. From γάλα, milk, and πόσις, a drinking. Fr., *galactoposie.* Ger., *Milchtrinken.* See *Milk*-DIET.

GALACTOPOTES (Lat.), n. m. Gen., *-op'otu (-œ).* From γάλα, milk, and πότης, a drinker. A milk-drinker.

GALACTOPOTUS (Lat.), adj. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o^{2}p'o(o^2)-tu^{3}s(tu^{4}s). From γάλα, milk, and ποτός, for drinking. Fr., *galactopote.* Ger., *milchtrinkend.* Sp., *galactópoto.* Milk-drinking, galactophagous; as a n., a galactophagist. [L, 43.]

GALACTOPYCNOMETER, n. Ga^{2}l-a^{2}kt-o-pi^{2}k-no^{2}m'e^{2}t-u^{5}r. Lat., *galactopycnometrum* (from γάλα, milk, πυκνός, dense, and μέτρον, a measure). Ger., *Milchdichtheitsmesser.* See GALACTOMETER.

GALACTOPYRA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o^{2}p'i^{2}r-(u^{6}r)-a^3. From γάλα, milk, and πῦρ, fire. Fr., *galactopyre.* See *Milk* FEVER.

GALACTOPYRETIC, adj. Ga^{2}l a^{2}k''to-pi-re^{2}t'i^{2}k. Lat., *galactopyreticus* (from γάλα, milk, and πυρετικός, feverish). Pertaining to milk fever.

GALACTOPYRETOS (Lat.), n. m. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)-to(to^3)-pi^{2}r(pu^{6}r)'e^{2}t-o^{2}s. From γάλα, milk, and πυρετός, burning heat. See *Milk* FEVER.

GALACTORRHŒA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o^{2}r-re'-(ro^2'e^2)-a^3. From γάλα, milk, and ῥεῖν, to flow. Fr., *galactorrhée, galactirrhée, galactophorrhée* [Duval], *suintement par le mamelon.* Ger., *Galactorrhöe, übermässiger Milchfluss.* A persistent and debilitating secretion of milk after weaning. To be distinguished from *polygalactia,* for which, however, it is often used. [A, 24.]—**G. erronea.** Excretion of milk from an unusual locality. [α, 34.]—**G. saccharata.** The secretion of milk unusually rich in sugar. [α, 34.]

GALACTORRHŒIC, adj. Ga^{2}l-a^{2}k-to^{2}r-re'i^{2}k. Lat., *galactorrhoicus.* Fr., *galactorrhéique.* Ger., *galactorrhöisch.* Pertaining to galactorrhœa.

GALACTOSACCHARINUS (Lat.), adj. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-sa^{2}k(sa^{3}k)-ka^{2}r(ch^{2}a^{3}r)-in(en)'u^{3}s(u^{4}s). From γάλα, milk, and σάκχαρ, sugar. Pertaining to sugar of milk. See ACIDUM GALACTOSACCHARINUM.

GALACTOSACCHARUM (Lat.), n. n. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-sa^{2}k(sa^{3}k)'ka^{2}r(ch^{2}a^{3}r)-u^{3}m(u^{4}m). From γάλα, milk, and σάκχαρ, sugar. See LACTOSE.

GALACTOSCHESIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o^{2}sk-(o^{2}sch^2)'e^2-si^{2}s. Gen., *-osches'eos (-os'chesis).* From γάλα, milk, and σχέσις, condition. See GALACTISCHESIS.

GALACTOSCOPE, n. Ga^{2}l-a^{2}k'to-skop. From γάλα, milk, and σκοπεῖν, to examine. An instrument for estimating the quality of milk by the degree of its opacity. [B, 20.]—**Donné's g.** An instrument consisting of two parallel pieces of glass fixed in two copper tubes which screw into each other so as to be approximated or separated at will. Milk is inserted between the glasses by means of a funnel, and the glasses are then separated until the film of the milk is sufficiently thick to obscure the light of a candle at the distance of a metre. From the degree of separation of the glass the percentage of cream is calculated. In making this test the milk should be fresh and unboiled. [L, 88.]—**Feser's g.** A hollow glass cylinder doubly graduated, one graduation giving the number of c. c., and the other the percentage of cream. The lower part of the cylinder is of a lesser diameter than the upper, and to the back of it is fixed a piece of opaque glass marked with lines; 4 c. c. of milk are inserted and water gradually added until the markings on the opaque glass can be read. [L, 225.]—**Heinrich's g.** A g. somewhat similar to Reischauer's. [L.]—**Prismatic g.** A g. consisting of two glass plates fitted into a wooden frame so that a wedge-shaped vessel is formed, the base of which has an inside width of 15 mm. Along the middle of one of the plates is pasted a strip of black paper with 30 equidistant holes, each one numbered. A mixture of 95 c. c. of water and 5 c. c. of milk is introduced into the wedge-shaped vessel, and a candle-flame is looked at through the holes in the paper-strip. The thickness of the wedge (indicated by the number of the hole looked through), which just causes the light to disappear, is a measure of the amount of cream in the mixture. [L, 225.]—**Reischauer's g.** A modification of the prismatic g. [L.]—**Seidlitz g.** See *Prismatic g.*—**Vogel's g.** A g. consisting of a glass vessel into which a mixture of milk and water is poured. A candle-flame is looked at through the mixture, which has more milk or more water added to it until it reaches the degree of opacity at which the flame just becomes invisible. [L, 225.]—**Wedge-shaped g.** See *Prismatic g.*

GALACTOSE, n. Ga^{2}l-a^{2}k'tos. From γάλα, milk. Fr., *g.* Ger., *G.* A carbohydrate, $C_6H_{12}O_6$, derived from milk-sugar (lactose) by fermentation, or by boiling with a mineral acid. It occurs in foliate crystals arranged in warty masses. Its aqueous solution rotates the plane of polarization to the right more strongly than glucose. In chemical constitution it is at once a pentatomic alcohol and an aldehyde of the hexatomic alcohol dulcite. According to Granswindt, it is identical with arabinose. [B, 4, 9, 270.]

GALACTOSIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o'si^{2}s. Gen., *-tos'eos* (*-is*). From γάλα, milk. Ger., *Milchabsonderung*, *Milchbereitung*. The process of secretion of milk. [K.]

GALACTOSPONGUS (Lat.), n. m. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-spo^{3}n^2'gu^{3}s(gu^{4}s). From γάλα, milk, and σπόγγος, a sponge. Fr., *galactosponge*. Ger., *Milchschwamm*. See *Medullary* SARCOMA and *Medullary* CARCINOMA.

GALACTOSTASIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)-to^{2}st'a^{2}s-(a^{3}s)-i^{2}s. Gen., *-osta'seos* (*-os'tasis*). From γάλα, milk, and στάσις, stagnation. Fr., *galactostase*. Ger., *Milchansammlung*. A metastatic collection of milk. [A, 322.]

GALACTOSYRINX (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)-to(to^3)-si^{2}r(su^{6}r)'i^{2}n^{3}x. Gen., *-syri'ngos*. From γάλα, milk, and σῦριγξ, a tube. A lacteal fistula. [A, 322.]

GALACTOTES (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o'tez(tas). Gen., *-tot'u* (*-œ*). From γάλα, milk. See GALACTITES (1st def.).

GALACTOTHERAPY, n. Ga^{2}l-a^{2}kt''o-the^{2}r'a^{2}p-i^2. From γάλα, milk, and θεραπεία, a waiting on. The treatment of disease in the nursing infant by means of drugs administered to the mother that are excreted in her milk. [*a*, 34.]

GALACTOTROPHY, n. Ga^{2}l-a^{3}k-to^{2}t'ro-fi^2. Gr., γαλακτοτροφία (from γάλα, milk, and τροφή, nourishment). Lat., *galactotrophia*. Ger., *Milchnährung*. Alimentation with milk alone. [A, 322.]

GALACTOZEMIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-o(o^3)-zem(zam)'i^2-a^3. From γάλα, milk, and ζημία, loss. Fr., *galactozémie*. Ger., *Milchverlust*. Failure or diminution of the secretion of milk. [Blackwood, "Phila. Med. Times," Nov. 19, 1881.]

GALACTOZYME, n. Ga^{2}l-a^{3}kt'o-zim. From γάλα, milk, and ζύμη, leaven. Fr., *g*. See KUMYSS.

GALACTUCHIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)-tu^2(tu)'ki^2-(ch^{2}i^2)-a^3. Gr., γαλακτουχία (from γαλακτουχεῖν, to suckle). See LACTATION.

GALACTUCHOS (Lat.), adj. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-u^2(u)'ko^{2}s-(ch^{2}o^{2}s). Gr., γαλακτοῦχος. See LACTANS.

GALACTURIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}kt(a^{3}kt)-u^2(u)'ri^2-a^3. From γάλα, milk, and οὐρεῖν, to urinate. Fr., *galacturie*. Ger., *Galacturie*, *Milchharnen*. See CHYLURIA.

GALÆNA INANIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-en'(a^3'e^{2}n)-a^3 i^{2}n-a(a^3)'ni^{2}s. See BISMUTH.

GALANCIEH (Fr.), **GALANCIER** (Fr.), n's. Ga^3-la^{3}n^2-se-a. The *Rosa canina*. [B, 121, 173 (*a*, 24).]

GALANDE (Fr.), n. Ga^3-la^{3}nd. A variety of almond. [B, 121 (*a*, 24).]

GALANE (Fr.), n. Ga^3-la^{3}n. The genus *Chelone* (3d def.). [B, 121 (*a*, 24).]

GALANGA (Lat.), n. f. Ga^{2}l(ga^{3}l)-a^{2}n^2(a^{3}n^2)'ga^3. Fr., *g.* Sp., *g.* [Sp. Ph., Mex. Ph.]. See GALANGAL (1st def.).—**Chinese g.** Fr., *g. de la Chine* [Fr. Cod.]. Sp., *g. de China* [Mex. Ph.]. See *Smaller* GALANGAL.—**False g.** Lat., *g. spuria*. Fr., *faux g.* The *Kœmpferia g.* [B, 173 (*a*, 24).]—**G. de la China** [Sp. Ph.] (Sp.), **G. de la Chine** [Fr. Cod.] (Fr.). See *Smaller* GALANGAL.—**G. des marais** (Fr.). See *Marsh g.*—**Galangæ radix** [Gr. Ph.]. See *Larger* GALANGAL.—**G. major.** See *Larger* GALANGAL.—**G. menor** [Sp. Ph.] (Sp.), **G. minor.** See *Smaller* GALANGAL.—**G. moyen** [Fr. Cod.] (Fr.). The official galangal of large size. [B, 113 (*a*, 14).]—**G. officinal** [Fr. Cod.] (Fr.). See *Smaller* GALANGAL.—**G. (Radix)** [Netherl. Ph.]. See *Smaller* GALANGAL.—**G. silvestris.** The *Cyperus longus*. [B, 180 (*a*, 24).]—**G. sinensis.** See *Smaller* GALANGAL.—**G. spuria.** See *False g.*—**Grand g.** (Fr.), **Greater g.**, **Indian g.**, **Java g.**, **Major g.** See *Larger* GALANGAL.—**Marsh g.** Fr., *g. des marais*. The *Acorus calamus*. [B, 121, 173 (*a*, 24).]—**Minor g.**, **Official g.**, **Petit g.** [Fr. Cod.] (Fr.). See *Smaller* GALANGAL.—**Poudre de g.** [Fr. Cod.] (Fr.). Official galangal dried in the oven, cut into small pieces, powdered in an iron mortar, and passed through a No. 140 silk sieve. [B, 113 (*a*, 14).]—**Radix galangæ**, **Rhizoma galangæ** [Ger. Ph., Dan. Ph., Swiss Ph., Norw. Ph., Swed. Ph., Russ. Ph.]. See *Smaller* GALANGAL.—**Rhizoma galangæ majoris.** See *Larger* GALANGAL.—**Smaller g.**, **True g.** See *Smaller* GALANGAL.—**Tinctura galangæ** [Russ. Ph.]. A tincture made of 1 part of lesser galangal and 5 parts of alcohol. [B, 95.]

GALANGAL, n. Ga^{2}l-a^{2}n^2'ga^{2}l. Chin., *Kaw-liang kiang* (meaning Kaw-liang ginger). Ar., *khulanjan*. Hind., *bara-kulinjan*. Lat., *galanga*. Fr., *galanga*, *galangale*. Ger., *G.*, *Galgant*, *Galgantwurzel*. Sp., *galanga*. 1. The rhizome of various species of *Alpinia*; especially lesser g. (*q. v.*). 2. The *Cyperus longus*. [B, 5, 19, 172, 180 (*a*, 24).]—**English g.** See *G.* (2d def.).—**G.-root.** See *G.*—**Greater g.** See *Larger g.*—**Grosse G'wurzel** (Ger.). See ACORUS *calamus* and *Larger g.*—**Java g.**, **Larger g.** Lat., *galanga major*, *galangœ radix* [Gr. Ph.], *rhizoma galangœ majoris*. Fr., *grand galanga*. Ger., *grosser Galgant*. The rhizome of *Alpinia galanga*; considerably larger than the smaller g. and seldom imported. [B, 5 (*a*, 24), 95.]—**Lesser g.**, **Smaller g.** Lat., *rhizoma galangœ* [Ger. Ph., Dan. Ph., Norw. Ph., Russ. Ph., Swed. Ph., Swiss Ph.], *galanga* (*radix*) [Netherl. Ph.]. Fr., *galanga officinal* (ou *de la Chine*) [Fr. Cod.]. Ger., *Galgantwurzel*. Sp., *galanga* [Sp. Ph., Mex. Ph.], *galanga menor* (ó *de la China*) [Sp. Ph.]. China- (or India-) root; the rhizome of the *Alpinia officinarum* and perhaps of other species of scitamineous plants; occurring in cylindrical fragments, from 2 to 3 inches long and ¾ inch thick, of very aromatic order and taste. [B, 5, 19, 95.]

GALANGIN, n. Ga^2-la^{3}n'ji^{2}n. A glucoside, $C_{18}H_{10}O_{6} + H_2O$, obtained from the rhizome of *Alpinia galanga*, forming light-yellow tabular or acicular crystals. ["Am. Jour. of Pharm.," June, 1882, p. 288; B, 270 (*a*, 27).]

GALANG-LANT (Malay), n. The *Sesuvium portulacastrum*. [B, 121 (*a*, 24).]

GALANGOL, n. Ga-la^{2}n^2'go^{2}l. A pungent principle found in the rhizome of *Alpinia galanga*, soluble in dilute alcohol and in alkaline solutions. ["Proc. of the Am. Pharm. Assoc.," xxxiii (*a*, 14).]

GALANT (Fr.), n. Ga^3-la^{3}n^2. See CESTRUM (2d def.).—**G. de nuit.** See CESTRUM *nocturnum*.—**G. d'hiver.** See GALANTHUS *nivalis*.—**G. du jour.** The *Cestrum diurnum*. [B, 121 (*a*, 24).]—**G. du soir.** The *Cestrum vespertinum*. [B, 121 (*a*, 24).]

GALANTERIE (Fr.), n. Ga^3-la^{3}n^2-te^2-re. A venereal disease. [L, 41.]

GALANTHUS (Lat.), n. m. Ga^{2}l(ga^{3}l)-a^{2}n(a^{3}n)'thu^{3}s(thu^{4}s). From γάλα, milk, and ἄνθος, a flower. Fr., *galanthine*. Of Linnæus, a genus of the *Amaryllidaceœ*, tribe *Galantheœ*. The *Galanthaceœ* or *Galantheœ* (Fr., *galanthées*) are: Of Reichenbach, a subdivision of amaryllidaceous plants; of Ritgen, a tribe of the *Spathaceœ*; of Römer, a suborder (of Kunth, a tribe) of the *Amaryllideœ*. [B, 121, 170 (*a*, 24).]—**G. nivalis.** Fr., *galanthine* (ou

GALANTHUS NIVALIS. [A, 327.]

galant) d'hiver, *galantine* [*nivéole*], *perce-neige*, *baguenaudier de printemps campane blanche*, *pucelle*, *violette de février*, *violier bulbeux.*, Ger., *Schneeglöckchen*. It., *galanto*, *foraneve*. Sp., *campanilla blanca*. A species found in central and northern Europe. The bulbs are emetic, have been used as febrifuge, and are still in use for emollient cataplasms. The flowers yield a water by distillation, employed for removing freckles, tan, etc. [B, 173, 180 (*a*, 24).]—**G. vernus.** Of Allioni, the *Leucoium vernum*. [B, 173 (*a*, 24).]

GALANTINE (Fr.), n. Ga^3-la^{3}n^2-ten. 1. The *Aquilegia vulgaris*. 2. The *Galanthus nivalis*. [B, 121, 173 (*a*, 24).]

GALAPEE-TREE, n. Ga^{2}l-a^2-pe'tre. The *Sciadophyllum Brownei*. [B, 275, 282 (*a*, 24).]

GALARIN (Fr.), n. Ga^3-la^3-ra^{2}n^2. The *Trapa natans*. [B, 121, 173 (*a*, 24).]

GALARIPS (Fr.), n. Ga^3-la^3-rep. Syn.: *lianes à lait*. A genus of apocynaceous climbing plants. [L, 41 (*a*, 21).]

GALARRHŒUS (Lat.), n. m. Ga^{2}l(ga^{3}l)-a^3-re'(ro^2'e^2)-u^{3}s(u^{4}s). From γάλα, milk, and ῥεῖν, to flow. 1. Of Haworth, a section of the genus *Euphorbia*. 2. A subgenus of *Agaricus*, including *Fungi* with milky juice. Its species are now referred to the genus *Lactarius*. [B, 121, 173 (*a*, 24).]—**G. corallioides.** The *Euphorbia corollata*. [B, 173 (*a*, 24).]—**G. lathyris.** The *Euphorbia lathyris*. [B, 173 (*a*, 24).]—**G. palustris.** The *Euphorbia palustris*. [B, 173 (*a*, 24).]—**G. pithyusa.** The *Euphorbia pithyusa*. [B, 173 (*a*, 24).—**G. spinosus.** The *Euphorbia spinosa*. [B, 173 (*a*, 24).]—**G. verrucosus.** The *Euphorbia verrucosa*. [B, 173 (*a*, 24).]

GALATZIDÆ (Lat.), n. f. pl. Ga^{2}l(ga^{3}l)-a^{2}ts(a^{3}ts)'i^{2}d-e(a^3-e^2). From γάλα, milk, and εἶδος, form. In Greece, a name for different species of *Euphorbia*; so called on account of their milky sap. ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]

GALAX (Lat.), n. n. Ga(ga^3)'la^{2}x(la^{3}x). Gen., *-lac'tos* (*-is*). Gr., γαλάξ. 1. See GALA. 2. An ancient name for a certain plant having a milky juice. 3. See GLAUX. 4. Of Wood, the only genus of his *Galacineœ*. [A, 387; B, 34 (*a*, 24).]—**G. aphyllum.** Beetleweed, carpenter's leaf; a species of *G.* (4th def.) found in damp mountain woods from Maryland to South Carolina. [B, 34 (*a*, 24).]

GALAXA, n. Of Paracelsus, "sulphur subtilissimum," an imaginary cosmic principle causing wintry cold. [A, 325.]

GALAXIÆ (Lat.), n. f. pl. Ga^{2}l(ga^{3}l)-a^{2}x(a^{3}x)'i^2-e(a^3-e^2). An old name for certain cranial porosities, also for chyle-vessels. [A, 325.]

GALAXIAS (Lat.), n. m. Ga^{2}l(ga^{3}l)-a^{2}x(a^{3}x)'i^2-a^{2}s(a^{3}s). Gr., γαλαξίας. See *Mineral* AGARIC.

GALAZYME, n. Ga^{2}l'a-zim. From γάλα, milk, and ζύμη, leaven. See KUMYSS.

GALBA, n. In the West Indies, the *Calophyllum calaba*. [B, 121, 282 (*a*, 24).]

GALBAN (Ger.), n. Ga^{3}l-ba^{3}n'. See GALBANUM (2d def.).—**G'harz.** See GALBANUM (2d def.).—**G'harztinctur.** See *Tinctura*

GALBANI.—**G'kraut.** See GALBANUM (1st def.).—**G'pflaster.** See *Emplastrum* GALBANI.—**G'silge.** See GALBANUM (1st def.).

GALBANETUM, n. Of Paracelsus, a balsamic preparation of galbanum and turpentine. [A, 325.]

GALBANIFERUS (Lat.), adj. Ga^{2}l(ga^{3}l)-ba^{2}n(ba^{3}n)-i^{2}f'e^{2}r-u^{3}s(u^{4}s). From *galbanum* (*q. v.*), and *ferre*, to bear. Fr., *galbanifère.* Producing galbanum. [B.]

GALBANIFLUUS (Lat.), adj. Ga^{2}l(ga^{3}l)-ba^{2}n(ba^{3}n)-i^{2}f'lu^2-(lu^4)-u^{3}s(u^{4}s). From *galbanum* (*q. v.*), and *fluere*, to flow. Flowing with (yielding) galbanum. See FERULA *galbaniflua.*

GALBANUM (Lat.), n. n. Ga^{2}l(ga^{3}l)'ban(ba^{3}n)-u^{3}m(u^{4}m). Heb., *khelbenah* (lit., white milk or gum). Gr., χαλβάνη. γάλβανον. Fr., *g.* [Fr. Cod.]. Ger., *G.*, *Galbankraut* (1st def.), *Galbansilge* (1st def.), *Galban* (2d def.), *Galbanharz* (2d def.), *Mutterharz* (2d def.). It., *galbano.* Sp., *gálbano* [Sp. Ph.]. Roum., *galbanu* [Roum. Ph.]. Syn.: *gummi-resina g.* [Dan. Ph., Finn. Ph., Norw. Ph., Russ. Ph., Swed. Ph.] (2d def.). 1. Of Don, an undetermined genus of umbelliferous plants, referred by Bentham and Hooker to the genus *Polylophium.* 2. Of the U. S. Ph., Br. Ph., Ger. Ph., and Fr. Cod., a gum-resin, obtained from *Ferula galbaniflua* and *Ferula rubricaulis* (of Persia), and probably other allied species, occurring in commerce in masses of compact drops or tears having a peculiar aromatic odor and an unpleasant, bitter, alliaceous taste; employed as a stimulating expectorant and antispasmodic, and externally in the form of a plaster on indolent swellings. [B, 5, 18, 19, 42, 121, 180 (α, 24).]—**Alcoolé de g.** (Fr.). See *Tinctura galbani.*—**Compound g. plaster** [U. S. Ph., 1870]. See *Emplastrum galbani.*—**Compound pills of g.** See *Pilulæ galbani compositæ.*—**Compound plaster of g.** See *Emplastrum galbani.*—**Emplastrum de galbano crocatum** [Swiss Ph., Netherl. Ph.]. See *Emplastrum galbani crocatum.*—**Emplastrum galbani** [U. S. Ph., Br. Ph., Belg. Ph.], **Emplastrum galbani compositum** [U. S. Ph., 1870]. Fr., *emplâtre de g.* Ger., *Galbanpflaster*, *Mutterharzpflaster*, *Gummipflaster*, *Zugpflaster.* Sp., *emplastode gálbano* [Mex. Ph., Sp. Ph.]. A plaster made by melting together 16 parts of g. and 2 of Canada turpentine, straining, adding 6 of Burgundy pitch and 76 of lead plaster, and mixing thoroughly [U. S. Ph.]; 1 part each of g., ammoniacum, and yellow wax, and 8 parts of lead plaster [Br. Ph.], or 1 part each of yellow wax, pine-rosin, and larch turpentine, and 2 parts of g. [Belg. Ph.], or 8 parts each of yellow wax and g. and 25 parts of common turpentine [Sp. Ph.]. For the very similar *emplâtre diachylon gommé*, *emplastrum gummi-resinosum*, etc., see *Emplastrum* PLUMBI *compositum.* [B, 95.]—**Emplastrum galbani crocatum** [Dan. Ph., Ger. Ph., 1st ed., Gr. Ph., Russ. Ph.]. Sp., *emplasto de gálbano azafranado* [Mex. Ph.]. Syn.: *emplastrum oxidi plumbi* (seu *de galbano* [Swiss Ph., Netherl. Ph.]) *crocatum.* A plaster made, with slight variations, by melting together 24 parts of emplastrum lithargyri and 8 of yellow wax, adding when half cold a solution of 24 parts of clarified g. in 6 of turpentine and 1 part of powdered saffron moistened with alcohol [Ger. Ph.]; by mixing 50 parts each of emplastrum galbani and emplastrum meliloti, 25 of g., and 3 of powdered saffron; or by mixing 30 grains of powdered saffron moistened with alcohol with 4 oz. (troy) of melted emplastrum galbani. The Dan. and Gr. Ph's replace half of the emplastrum lithargyri by equal quantities of emplastrum meliloti. [A, 447; B, 81 (α, 14).]—**Emplastrum galbani rubrum.** See EMPLASTRUM *oxycroceum.*—**Emplâtre de g.** (Fr.). See *Emplastrum galbani.*—**Essentia galbani.** See *Tinctura galbani.*—**G. amygdaloides.** See *G. in lacrimis.*—**G. depuratum.** See *G. pulveratum.*—**G. in granis, G. in lacrimis.** The choicer commercial form of g., consisting of roundish or irregular, lenticular pieces of about the size of a walnut, either isolated or loosely massed together, of a light-yellow or green color, and transparent when split into thin bits. [A, 319 (α, 21); B, 18, 180 (α, 24).]—**G. in masses, G. in panibus.** Ger., *Galbanharz in Massen* (oder *Broden*, oder *Kuchen*). An inferior variety of g. obtained in Africa and appearing in commerce in the form of irregular masses of a yellow or bright or dark-brown color, in which the tears are more or less agglutinated. [B, 18, 180 (α, 24).]—**G. levanticum.** Sp., *gálbano blando* [Mex. Ph.]. G. imported from the Levant both in the form of tears (g. in lacrimis) and of lumps (g. in masses). [A, 447 (α, 21).]—**G. officinale.** Of Don, a species of *G.* (1st def.), erroneously supposed by him to be the source of *g.* (2d def.). [B, 5, 19, 180 (α, 24).]—**G. persicum.** See *Persian g.*—**G'pillen** (Ger.). See *Pilulæ galbani compositæ.*—**G. plaster.** See *Emplastrum galbani.*—**G. pulveratum, G. purifié** [Fr. Cod.] (Fr.). Syn.: *g. depuratum.* G. obtained in the form of a powder by dissolving in hot 60-per-cent. alcohol, straining, and evaporating in a water-bath [Fr. Cod.], or by trituration in a mortar, and subsequent sifting. [B, 95, 113 (α, 14).]—**G. resin plant.** The *Ferula galbaniflua.* [B, 275 (α, 24).]—**Gummi-resina galbani** [Dan. Ph., etc.]. See *G.* (2d def.).—**Huile essentielle de g.** (Fr.). See *Oleum galbani.*—**Lovage-leaved g.** The *Bubon galbanum.* [α, 24].—**Oil of g., Oleum galbani** [Pruss. Ph., 6th ed.]. Fr., *huile essentielle de g.* A colorless or yellowish essential oil obtained by distilling 2 parts of g. with 3 of sand in a sand-bath [Würt. Ph., 1798] or with water [Pol. Ph., 1817, Pruss. Ph., Sax. Ph., 1820]. [B, 95, 119 (α, 14).]—**Persian g.** Lat., *g. persicum.* Ger., *persisches Mutterharz.* Sp., *gálbano seco* [Mex. Ph.]. A variety of g. said to be used in Russia. It comes, inclosed in skins, in irregular masses of a reddish-brown color, streaked with white. It has a disagreeable odor, and a bitter, unpleasant taste. It differs from common g. in not forming tears, and, according to some authorities, it is derived from a different plant. [B, 5, 180 (α, 24).]—**Pilulæ galbani compositæ** [U. S. Ph.]. Fr., *pilules de g. composées.* Ger., *G.-Pillen.* Syn.: *pilula asafœtidæ composita* [Br. Ph.]. Pills containing 3 parts each of g. and myrrh, and 1 part of asafœtida, beaten together with a sufficiency of syrup [U. S. Ph.], 2 parts each of g., myrrh, and asafœtida, and 1 part of treacle by weight [Br. Ph.], or equal parts of g., gum ammoniac, sagapenum, and myrrh, with a sufficiency of oil of amber [Sard. Ph., 1773]. [B, 5, 81, 91, 119 (α, 14).]—**Pilules d'aloès et de g.** (Fr.). See PILULÆ *gummoso-laxativæ.*—**Pilules de g. composées** (Fr.). See *Pilulæ galbani compositæ.*—**Resina galbani.** See *G.* (2d def.).—**Sweet g.** The *Myrica gale*; also the *khelbenah* of the Scriptures, one of the sweet spices employed in the preparation of the sacred incense (Ex. xxx, 34). Dioscorides states that it is the juice of a *Narthex* growing in Syria, and other authorities refer it doubtfully to *Galbanum officinale*, *Opoidea galbanifera*, *Bubon galbanum*, and other plants. [A, 511; B, 18, 77, 185 (α, 24).]—**Tinctura galbani** [Russ. Ph., Pruss. Ph., 6th ed.]. Fr., *alcoolé* (ou *teinture*) *de g.* A preparation made by macerating 1 part of g. in 5 [Russ. Ph.] or 6 parts [Pruss. Ph.] of alcohol. Similar preparations of varying strength were formerly official. [B, 95, 119.]—**Unguentum galbani compositum.** A preparation known commonly under the name of *breast plaster*, made by melting together 2 parts each of yellow wax and g. and 3 parts each of olive and linseed oils. ["Proc. of the Am. Pharm. Assoc.," vii (α, 14).]

GALBAS, n. See GALBA.

GALBEUM (Lat.), n. n. Ga^{2}l(ga^{3}l)'be^2-u^{3}m(u^{4}m). An arm-band or fillet worn as an ornament or for medical purposes. [A, 312 (α, 21).]

GALBULA (Lat.), n. f. Dim. of *galbina.* A small bird, perhaps the thrush, formerly considered medicinal. [A, 312 (α, 21).]

GALBULUS (Lat.), n. m. Ga^{2}l(ga^{3}l)'bu^{2}l(bu^{4}l)-u^{3}s(u^{4}s). Fr., *galbule.* Ger., *Beerenzapfen*, *Kugelzapfen.* Of Gärtner, a form of fruit resembling a cone, but round, and with the carpel heads greatly enlarged and the scales succulent. The *Galbuliferæ* are a division of the *Coniferæ* having such fruits. [B, 19, 121, 123, 170, 291 (α, 24).]—**Galbuli cupressi.** See CYPRESS-*nuts.*

GALDA, n. Fr., *gomme de galda.* A gum resin of unknown origin said to have had the taste and smell of elemi, and to have been used as an expectorant in phthisis. [B, 121, 180 (α, 24).]

GALE (Lat.), n. f. Ga^3'la. Of Tournefort, the genus *Myrica.* [B, 121 (α, 24).]—**G. frutex.** The *Myrica g.* [α, 24.]—**Herba gales.** The leaves of the *Myrica g.* [B, 270.]

GALE, n. Gal. Lat., *g.* Fr., *galé.* The *Myrica g.* [B, 19, 121, 275 (α, 24).]—**Fern-leaved g.** The *Comptonia asplenifolia.* [B, 275 (α, 24).]—**G'worts.** The *Myricaceæ.* [B, 19 (α, 24).]—**Scotch g., Sweet g.** The *Myrica g.* [A, 505 (α, 21).]

GALE (Fr.), n. Ga^{3}l. See SCABIES.—**Fausse g.** See SCABIES *spuria.*—**G. anomale** (Fr.). See SCABIES *spuria.*—**G. atrobilaire.** Itching due to jaundice. [G.]—**G. bâtarde.** See SCABIES *spuria.*—**G. bédouine.** Lichen tropicus. [G.] Cf. SCABIES *retrogressa.*—**G. scorbutique.** See SCABIES *scorbutica.*—**G. sèche.** See SCABIES *sicca.*—**G. vénérienne.** See SCABIES *venerea.*—**G. vérolique.** See SCABIES *purulenta.*—**Grosse g.** See SCABIES *purulenta.*—**Vraie g.** See SCABIES.

GALÉ (Fr.), n. Ga^3-la. 1. Of Lamarck, the genus *Myrica.* 2. The *Myrica gale.* [B, 121, 173 (α, 24).]—**G. cérifère.** The *Myrica cerifera.* [α, 24.]—**G. odorant.** See *G.* (2d def.).

GALEA (Lat.), n. f. Gal(ga^{3}l)'e^2-a^3. Gr., γαλέα. Fr., *calotte* (1st and 2d def's), *casque* (4th def.). *galète* (5th def.). Ger., *Helm* (4th def.), *Haube*, *Kinnladenhelm* (5th def.). Lit., a helmet or head-piece. 1. An old name for a child's caul (*q. v.*). [J. Hyrtl, quoted by F. B. Stephenson, "N. Y. Med. Jour.," July 24, 1886, p. 92.] 2. A kind of head-bandage. 3. Headache extending all over the head. 4. The arched or casque-shaped part of a flower next to the axis, especially as seen in the upper lip of a personate flower. 5. The external of the two blade-like processes which form the terminal parts of the maxilla of insects. [L, 196, 353.] Cf. LACINIA. 6. An alembic. [B, 19, 109, 121, 123 (α, 24); L, 56, 180.]—**G. (aponeurotica) capitis, G. tendinea Santorini.** Ger., *aponeurotische Haube*, *Sehnenhaube des Schädels.* The aponeurosis of the occipito-frontalis muscle. [A, 523.]

GALEAMAUROSIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-e^2(a)-a^{2}m(a^{3}m)-a^4-(a^3-u^4)-ro'si^{2}s. Gen., *-roseos* (*-is*). From γαλῆ, the cat, and ἀμαύρωσις (see AMAUROSIS). See *Cat's-eye* AMAUROSIS.

GALEANCON (Lat.), n. m. Ga^{2}l(ga^{3}l)-e^2-a^{2}n^2(a^{3}n^2)'ko^{2}n(kon). Gen., *-anco'nis.* From γαλέη, a polecat, and ἀγκών, the bend of the arm. Ger., *Katzenarm*, *Wieselarm.* 1. A shortening of the arm produced by a luxation of the shoulder. 2. A short-armed person. [L, 50 (α, 14).]

GALEANTHROPY, n. Ga^{2}l-e-a^{2}n'thro-pi^2. Lat., *galeanthropia* (from γαλῆ, the polecat, and ἄνθρωπος, a man). Fr., *galéanthropie.* Ger., *Katzensucht.* A maniacal affection in which the patient believes himself to be transformed into a cat. [L, 42, 43, 87 (α, 14).]

GALEATE, GALEATED, adj's. Ga^{2}l'e-at, -e^{2}d. Lat., *galeatus* (from *galea*, a helmet). Ger., *gehelmt* (1st def.), *behelmt* (1st

def.), *helmförmig* (2d def.), *helmartig* (3d def.). 1. Furnished with a galea. 2. Shaped like a helmet. 3. Arched (see FORNICATE). [B, 77, 121, 123 (a, 24).] 4. Forming a cap-like crust over the head (said of cutaneous lesions). [G.]

GALEGA (Lat.), n. f. Ga^{2}l(ga^{3}l)-e(a)′ga^3. From γάλα, milk, because goats eating it have been thought to give more milk. Fr., *galéga*. Ger., *Geisraute* (1st def.), *G.* (2d def.). 1. A genus of perennial herbaceous plants of the *Leguminosæ*. The *Galegeæ* (Fr., *galégées*) are: Of Brown, a subtribe of the *Curvembryæ-Diadelphæ*; of De Candolle, a subtribe of the *Loteæ*; of Bentham and Hooker, a tribe of the *Papilionaceæ*; of Reichenbach, a section of the *Fabaceæ*. 2. The leaves of *G. officinalis*. [A, 319 (a, 21); B, 42, 121, 170, 173, 180 (a, 24).]—**Aqua galegæ** [Tur. Ph., 1833]. Fr., *eau* (ou *hydrolat*) *de galéga*. A preparation made by mixing 1 part of g. officinalis with 3 parts of water, and distilling off one half. [B, 119 (a, 14).]—**G. apollinea.** Fr., *galéga apollinea*. The *Tephrosia apollinea*. [B, 173, 180 (a, 24).]—**G. cinerea.** Fr., *galéga cendrée*. See TEPHROSIA *cinerea*.—**G. litoralis.** Fr., *galéga des pêcheurs, arbre à enivrer, mort à poisson*. A poisonous plant found in the West Indies, probably not a true *G.*; used in killing fish and as a vermifuge. The juice of the leaves is purgative, and that of the root caustic. [B, 42, 173 (a, 24).]—**G. nemorensis.** The *Orobus vernus*. [B, 180 (a, 24).]—**G. officinalis.** Fr., *galéga officinal, faux indigo, herbe aux chèvres, rue des chèvres, lavanèse*. Ger., *gemeine Geisraute, Ziegenraute, Bockraute, Pockenraute, Geisklee, Fleckenkraut, Pestilenzkraut, Suchtkraut*. Goat's rue; a species formerly used as a febrifuge, antispasmodic, and diuretic. In India the leaves are used to make an inferior blue dye. It is said to be galactagogue. [B, 19, 173, 180 (a, 24); R. Millbank, "N. Y. Med. Jour.," Nov. 16, 1889, p. 544.]—**G. persica.** A species growing in Persia with whitish flowers. It is distinct from the *G. officinalis*. [B, 214 (a, 24).]—**G. piscatoria.** See *G. litoralis*.—**G. purpurea.** Fr., *galéga pourpre*. The *Tephrosia purpurea*. [B, 173, 180 (a, 24).]—**G. sericea.** See *G. litoralis*.—**G. spinosa.** Fr., *galéga épineux*. The *Tephrosia spinosa*. [B, 180 (a, 24).]—**G. tinctoria.** Fr., *galéga des teinturiers*. A species found in Ceylon. The leaves furnish a pale indigo dye. [B, 5, 173 (a, 24).]—**G. toxicaria.** Fr., *galéga vénéneux*. The *Tephrosia toxicaria*. [B, 173, 180 (a, 24).]—**G. virginiana, G. virginica.** Fr., *galéga de Virginie*. The *Tephrosia virginiana*. [B, 5, 34, 173 (a, 24).]—**G. vulgaris.** See *G. officinalis*.

GALÉGIFORME (Fr.), adj. Ga^3-la-zhe-form. Resembling the genus *Galega*. [L, 41.]

GALEIFORM, adj. Ga^{2}l-e′i^2-fo^{2}rm. Lat., *galeiformis* (from *galea*, a helmet, and *forma*, form). Fr., *galéiforme*. Ger., *helmförmig*. See GALEATE (2d def.).

GALEISKRAUT (Ger.), n. Ga^{3}l′is-kra^3-u^{4}t. Dyers' broom; the flowering tops of *Genista tinctoria*. [B, 180 (a, 24).]

GALÉMIE [Piorry] (Fr.), n. Ga^3-la-me. See GALACTHÆMIA.

GALENA (Lat.), n. f. Ga^{2}l(ga^{3}l)-e(a)′na^3. Fr., *galène*. Ger., *Bleiglanz*. It., Sp., *g*. Native lead sulphide. [A, 479 (a, 21).]

GALENICA (Lat.), n. n. pl. Ga^2(ga^3)-le^{2}n(lan)′i^{2}k-a^3. Galenical remedies; remedies made according to the formulas of Galen and the Galenists. [B, 270.]

GALENICAL, adj. Ga-le^{2}n′i^{2}k-a^{2}l. Fr., *galénical, galénique*. Of or pertaining to the preparation of remedies or pertaining to remedies that are prepared according to an official formula, especially of or pertaining to the preparation of remedies used for human beings (as opposed to veterinary remedies). [B.]

GALENION (Lat.), n. n. Ga^{2}l(ga^{3}l)-en(an)′i^2-o^{2}n. Gr., γαλήνιον. Of Paulus Ægineta, a certain anodyne malagma. [A, 325.]

GALENISM, n. Gal′e^{2}n-i^{2}z′m. Fr., *galénisme*. Galen's doctrine of the part played by his four humors in the production of disease. [A, 385.]

GALENIST, n. Gal′e^{2}n-i^{2}st. Fr., *galéniste*. An adherent of galenism. [L, 41.]

GALENIUM (Lat.), n. n. Ga^{2}l(ga^{3}l)-en(an)′i^2-u^{3}m(u^{4}m). See GALENION.

GALEOBDOLON (Lat.), n. n. Ga^{2}l(ga^{3}l)-e^2-o^{2}b′dol(do^{2}l)-o^{2}n. Gr., γαλεόβδολον. Fr., *galéobdolon*. Ger., *Nesselkraut, Waldnessel*. A section of the genus *Lamium*. [B, 42, 121, 180 (a, 24).]—**G. luteum, G. vulgare.** Fr., *g. à fleurs jaunes*. The *Lamium g*. [B, 42, 173, 180 (a, 24).]—**G. de montagne** (Fr.). An alpine variety of *Lamium g*. [B, 173 (a, 24).]

GALEOCORE (Lat.), n. f. Ga^{2}l(ga^{3}l)″e^2(a)-o^{2}k′o^{2}r-e(a). Gen., *-ok′ores*. From γαλῆ, the polecat, and κόρη, the eyeball. See *Cat's-eye* AMAUROSIS. [A, 316.]

GALEODES (Lat.), n. Ga^{2}l(ga^{3}l)-e^2-od′ez(as). Fr., *galéode*. A genus of arachnids. [a, 24.]—**G. araneoides.** Fr., *galéode aranéoïde*. The *Phalangium araneoidum* of Pallas; a species found north of the Caspian Sea and in Persia; its bite is said to be poisonous. [a, 24.]

GALEOPDOLON (Lat.), n. n. Ga^{2}l(ga^{3}l)-e^2-o^{2}p′dol(do^{2}l)-o^{2}n. See GALEOBDOLON.

GALÉOPE (Fr.), n. Ga^3-la-op. See GALEOPSIS.—**G. à fleurs rouges.** See GALEOPSIS *ladanum*.—**G. à grandes fleurs.** See GALEOPSIS *grandiflora*.—**G. à petites fleurs.** See GALEOPSIS *intermedia*.

GALEOPSIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-e^2-o^{2}p′si^{2}s. Gen., *-op′sidos* (*-is*), *-op′sis*. From γαλέη, the weasel, and ὄψις, appearance. Fr., *g., galéopsis* (1st def.), *galéope, galéopside*. Ger., *Hohlzahn, Katzengesicht*. 1. An old name for the *Lamium album*. 2. Of Mönch, the genus *Stachys*. 3. The hemp-nettles; of Linnæus, a small genus of labiate plants; of Bentham and Hooker, a genus of the *Stachydeæ*. The *Galeopsideæ* (Fr., *galéopsidées*) of Dumortier are a subtribe of labiate plants of the *Stachydeæ*. [B, 19, 42, 121, 170, 173, 180 (a, 24).]—**G. acuminata.** The *G. tetrahit*, var. *parviflora*. [B, 180 (a, 24).]—**G. angustifolia.** Of Koch, a variety of the *G. ladanum*. [B, 128, 180 (a, 24).]—**G. bifida.** Of Bentham, the *G. tetrahit*, var. *parviflora*. [B, 180 (a, 24).]—**G. canescens.** Of Koch, a variety of *G. ladanum*. [B, 64, 180 (a, 24).]—**G. cannabina.** 1. Of Pollich, the *G. ochroleuca*; of Willdenow, Roth, and others, the *G. tetrahit*, var. *grandiflora*. [B, 64, 180 (a, 24).]—**G. dubia.** See *G. angustifolia*.—**G. fœtida.** The *Stachys palustris* and *Stachys silvatica*. [B, 180 (a, 24).]—**G. galeobdolon.** The *Lamium galeobdolon*. [B, 128, 173, 180 (a, 24).]—**G. grandiflora.** Fr., *galéope à grandes fleurs, danot*. 1. Of Gmelin, the *G. ochroleuca*. 2. Of Bentham, a variety of the *G. tetrahit*. [B, 180 (a, 24).]—**G. intermedia.** Fr., *galéope à petites fleurs*. Of Koch, a variety of *G. ladanum*. [B, 128, 180 (a, 24).]—**G. ladanum.** Fr., *galéope à fleurs rouges, chambreule, chanvre folle, herbe sauvage, ortie rouge, sarriette sauvage, crapaudine des champs*. Ger., *Ackerhohlzahn*. A species found in fields throughout Europe. It has properties similar to those of *G. ochroleuca*, and is used like the latter. [B, 173, 180 (a, 24).]—**G. latifolia.** 1. Of Hoffmann, a variety of the *G. ladanum*. 2. Of F. Martius, the *G. ladanum*. [B, 173, 180 (a, 24).]—**G. lutea.** The *Lamium galeobdolon*. [B, 180 (a, 24).]—**G. maculata.** See *G.* (1st def.).—**G. ochroleuca.** Ger., *gelblichweisser Hohlzahn, haarige Kornwuth*. A species growing in sandy places. The herb, or rather inflorescence (*herba g.*, seu *galeopsidis*, seu *g. grandifloræ*, seu *g. ochroleucæ*), has a mild, aromatic odor, and a bitter, salty taste; employed as a pectoral remedy. [B, 19, 180 (a, 24).]—**G. parviflora.** Of Lamarck and Linnæus, the *G. intermedia*. 2. Of Bentham, a variety of *G. tetrahit*. [B, 173, 180 (a, 24).]—**G. prostrata.** See *G. angustifolia*.—**G. pubescens.** Of Bentham, the *G. tetrahit*. var. *pubescens*. [B, 180 (a, 24).]—**G. segetum.** See *G. angustifolia*.—**G. silvatica.** The *Stachys silvatica*. [B, 180 (a, 24).]—**G. tetrahit.** Fr., *galéope tétrahit, herbe d'Hongrie, ortie épineuse* (ou *royale*). Ger., *gemeiner Hohlzahn, gemeine Hanfriesel*. A species of which the herb (*herba cannabis silvestris*) has the properties of *G. ochroleuca*, but is milder in its action; formerly official. [B, 19, 173, 180 (a, 24).]—**G. versicolor.** The *G. tetrahit*, var. *grandiflora*. [B, 128, 180 (a, 24).]—**G. villosa.** See *G. ochroleuca*.—**G. walteriana.** See *G. pubescens*.—**Herba galeopsidis.** The herb of *G. ochroleuca*. [B, 180 (a, 24).]

GALEPPUS (Lat.), n. m. Ga^{2}l(ga^{3}l)-e^{2}p′pu^{3}s(pu^{4}s). See JALAP.

GALERA (Lat.), n. f. Ga^{2}l(ga^{3}l)-e(a)′ra^3. See *Agaricus* (1st def., 25th subgenus).

GALERA (Sp.), n. Ga^{3}l-a′ra^3. A place in the province of Granada, Spain, where there are sulphurous springs. [L, 30, 41 (a, 14).]

GALERICULATE, adj. Ga^{2}l-u^{5}r-i^{2}k′u^{2}l-at. Lat., *galericulatus* (from *galerus*, a cap). Covered as if with a cap, like the fruit in the common skullcap (*Scutellaria galericulata*). [B, 19, 116, 121 (a, 24).]

GALERICULUM (Lat.), **GALERICULUS** (Lat.), n's n. and m. Ga^{2}l(ga^{3}l)-e^{2}r(ar)-i^{2}k′u^{2}l(u^{4}l)-u^{3}m(u^{4}m), -u^{3}s(u^{4}s). Dim. of *galerus*, a helmet. Gr., πιλίδιον. A wig. [A, 318.]—**Galericulum aponeuroticum capitis.** See GALEA (*aponeurotica*) *capitis*.—**Galericulus monachi.** See AGARICUS *naucinus*.

GALEROPIA (Lat.), **GALEROPSIA** (Lat.), n's f. Ga^{2}l(ga^{3}l)-e^{2}r-op(o^{2}p)′i^2-a^3, -o^{2}p′si^2-a^3. From γαλερός, cheerful, and ὄψις, sight. Ger., *Heitersehen*. Syn.: *pseudopia exclarans*. A form of pseudopia in which objects appear clearer and of lighter color than in normal vision. [L, 135 (a, 14).]

GALES, n. Galz. The *Myrica gale*. [A, 505 (a, 21).]

GALÈTE (Fr.), n. Ga^3-le^{2}t. See GALEA (5th def.).

GALETTE ÉPERONNÉE (Fr.), n. Ga^{3}l-e^{2}t a-pe^{2}r-o^{3}n-na. The *Urceolaria calcaria*. [B, 121, 173 (a, 24).]

GALEUX (Fr.). adj. Ga^3-lu^5. Pertaining to scabies; as a n., an individual affected with scabies. [A, 385.]

GALGANA (Sp.), n. Ga^{3}l-ga^3′na^3. The *Lathyrus cicera*. [B, 121 (a, 24).]

GALGANT (Ger.), n. Ga^{3}l-ga^{3}nt′. See GALANGAL.—**G'wurzel** [Ger. Ph.]. See GALANGAL.—**Grosse G'wurzel.** See *Larger* GALANGAL.—**Kleine G'wurzel.** See *Smaller* GALANGAL.—**Wilde G'wurzel.** The rootstock of *Cyperus longus*. [B, 180 (a, 24).]—**Wilder G.** See CYPERUS *longus*.

GALGENMÄNNLEIN (Ger.), n. Ga^{3}l′ge^{2}n-me^{2}n-lin. Lit., gallows-manikin. Mandragora; so called from a legend that the plant springs up wherever a hanging has taken place and owes its development to the sinking into the earth of semen emitted by the victim. [L, 30 (a, 14).]

GALHUMIC (or **GALHUMINIC**) **ACID,** n. Ga^{2}l-hu^{3}m′i^{2}k, -hu^2-mi^{2}n′i^{2}k. Metagallic acid. [B, 14.]

GALIANCON (Lat.), n. m. and f. Ga^{2}l(ga^{3}l)-i^2-a^{2}n^2(a^{3}n^2)′ko^{2}n-kon). Gen., *-con′os* (*-is*). Gr., γαλιάγκων (from γαλέη, the weasel or the polecat, and ἀγκών, the elbow). Of Hippocrates, a weasel-armed (*i. e.*, short-armed) person. [A, 311 (a, 21).]

GALIANCONISM, n. Ga^{2}l-i^2-a^{2}n^{2}k′o-ni^{2}z′m. From γαλέη, the weasel, and ἀγκών the elbow. Lat., *galiancones*. Fr., *galianconisme*. Ger., *Wieselarm*. Atrophy and shortening of the arm. [L, 41 (a, 21).]

GALIET (Fr.), n. Ga^3-le-a. See GALIUM.—**G. à feuilles d'hyssope.** See GALIUM *hyssopifolium*.—**G. aquatique.** See GALIUM *uliginosum*.—**G. blanc.** See GALIUM *mollugo*.—**G. des bois.** See GALIUM *silvaticum*.—**G. jaune.** See GALIUM *verum*.—**G. du nord.** See GALIUM *boreale*.—**G. rouge.** See GALIUM *rubioides*.—**G. tubéreux.** See GALIUM *tuberosum*.

GALIMETA, n. In Jamaica, the *Achras salicifolia*. [B, 121 (a, 24).]

GALIMETOS, n. In Provence, the *Valeriana olitoria*. [B, 88 (a, 14).]

GALINGALE, n. Ga[2]l'i[2]n[2]-gal. See GALANGAL.—**East Indian g.** The *Kœmpferia galanga.* [B, 275 (α, 24).]—**English g.** The *Cyperus longus.* [B, 19, A, 511 (α, 24).]

GALINGENHOLZ (Ger.), n. Ga[3]l-i[2]n[2]'e[2]n-ho[3]lts. The *Viburnum opulus.* [B, 180 (α, 24).]

GALINOLE (Fr.), n. Ga[3]-le-nol. The *Clavaria coralloides.* [B, 121, 173 (α, 24).]

GALINSOGA (Lat.), n. f. Ga[2]l(ga[3]l)-i[2]n-so'ga[3]. Written also *Galinsogœa* and *Galinsogea.* Fr., *g.* Of Ruíz and Pavón, a small genus of annual composite weeds found in South America, of the *Helianthoideœ.* The *Galinsogeœ* (Fr., *galinsogées*) are : (1) Of Cassini, a subdivision of composite plants, of his *Helenieœ ;* or of the *Anthemideœ* of Reichenbach ; or of the *Senecionideœ* of Lindley ; or the *Helianthoideœ* of Bentham and Hooker, who characterize them as having the flower-heads heterogamous or homogamous, the perfect flowers fertile, and achænia usually crowned with numerous chaffy scales (*paleœ*) rarely aristiform ; and (2) of De Candolle, a large division of the *Helenieœ*, comprising the *Eugalinsogeœ* (the true *Galinsogeœ*) and the *Sphenogyneœ.* The *Galinsogieœ* of Kunth are a division of the *Helenieœ.* [B, 19, 42, 121, 170 (α, 24).]—**G. cinq fois radiée** (Fr.). See *G. quinqueradiata.*—**G. parviflora.** Fr., *g. à petites fleurs.* A variety of *G. quadriradiata.* [B, 173 (α, 24).]—**G. quadriradiata.** Fr., *g. quatre fois radiée.* A species found in Peru. The expressed juice is used as a beverage. [B, 173 (α, 24).]—**G. quinqueradiata.** Fr., *g. cinq fois radiée.* A species found in Peru ; used like the *G. quadriradiata.* [B, 173 (α, 24).]

GALIOIDES (Lat.), n. Ga[2]l(ga[3]l)-i[2]-o(o[2])-id(ed)'ez(as). Of Spach, a section of *Asperula.* [B, 121 (α, 24).]

GALIOPSIS (Lat.), n. f. Ga[2]l(ga[3]l) i[2]-o[2]p'si[2]s. See GALEOPSIS.

GALIOTE (Fr.), **GALIOTTE** (Fr.), n's. Ga[3]-le-ot. The *Geum urbanum.* [B, 121, 173 (α, 24).]

GALIPÆA (Lat.), **GALIPEA** (Lat.), n's f. Ga[2]l(ga[3]l)-i[2]-pe'-(pa[3]'e[2])-a[3], -pe(pa)'a[3]. Fr., *galipier, galipé.* Ger., *Galipee.* A genus of rutaceous shrubs or trees of the tribe *Cusparieœ.* [B, 19, 42, 121 (α, 24).]—**G. cusparia.** Ger., *Cuspabaum.* Of De Candolle, the *G. officinalis* (of Hancock, another and larger species than *G. officinalis*). [B, 5, 18, 173, 180 (α, 24).]—**G. febrifuga, G. officinalis.** Fr., *g. fébrifuge, g. officinal.* Ger., *ächter Angosturabaum, Caronyrindenbaum, gebräuchliche Galipee.* A South American species, furnishing cusparia-bark. [B, 15, 18, 19, 121, 173, 180 (α, 24).]

GALIPEINE, n. Ga[2]l-i[2]-pe'en. An alkaloid, $C_{20}H_{21}NO_3$, forming white acicular crystals, extracted from cusparia-bark. [Körner and Böhringer, cited in "Ann. di chim. appl.," Apr., 1883, p. 201 (B) ; "Proc. of the Am. Pharm. Assoc.," xxxi (α, 14).]

GALIPOT (Fr.), n. Ga[3]-le-po. The common frankincense of the shops ; (1) the concrete resin of *Pinus maritima ;* (2) of the Fr. Cod., that of *Pinus pinaster.* [A, 319 (α, 21) ; B, 5, 18, 121, 173 (α, 24).] Cf. BARRAS.—**G. d'Amérique** (Fr.). See CHIBOU *resin.*—**G. purifié** [Fr. Cod.] (Fr.). Pine-resin dried on the trunk, purified by melting over a slow fire and straining with expression. [B, 113 (α, 14).]

GALITANNIC ACID, n. Ga[2]l-i[2]-ta[2]n'i[2]k. A variety of tannic acid obtained from *Galium aparine.* [B, 5 (α, 14).]

GALITZENSTEIN (Ger.), n. Ga[3]l-i[2]tz'e[2]n-stin. Zinc sulphate. [B.]—**Blauer G.** See COPPER *sulphate.*

GALIUM (Lat.), n. n. Gal(ga[3]l)'i[2]-u[3]m(u[4]m). Gr., γάλιον. Fr., *caille-lait, galiet.* Ger., *Labkraut.* It., Sp., *galio.* Of Linnæus, a genus of rubiaceous plants, the type of the *Galieœ.* The *Galiaceœ* (Fr., *galiacées*) are the stellates or madderworts ; an order ofc alycifloral dicotyledons of the *Cinchonales* of Lindley, or, according to many authors, a suborder or tribe of the *Rubiaceœ.* The *Galieœ* (Fr., *galiées*) of Dumortier are a tribe of the *Rubiaceœ.* [B, 19, 34, 42, 121, 170, 173, 180 (α, 24).]—**G. africanum.** A species of which the leaves and flowers are used in diarrhœa. [P. L. Simmonds, "Am. Jour. of Pharm.," Sept., 1890, p. 471 (α, 17).]—**G. agreste, var. α echinospermum.** The *G. aparine*, var. *β Vaillantii.* [α. 24.]—**G. album.** See *G. mollugo.*—**G. Andrewsii.** Of Gray, a species growing in California. ["Proc. of the Am. Pharm. Assoc.," xix (α, 14).]—**G. aparine.** Fr., *grateron, asprèle, capel à teigneux. gratons, gratteaux, grapelle, grippe, rable, rèble, rieble, croquenot.* Ger., *haftendes Labkraut, Klebkraut, Zaunreis, Nabelsamenkraut, Zungenpeitsche.* Goose-grass, cleavers ; a long, straggling species found in Europe and the United States. According to Schwartz, it contains, besides chlorophyll, starch, etc., a variety of tannic acid, and rubichloric acid. The herb, *herba aparines* (seu *aparines vulgaris*, seu *gallii aparines*, seu *lappaginis*, seu *aspera*), was formerly official. The juice is said to be aperient, diuretic, and antiscorbutic, and has been employed in dropsical and scrofulous affections, scorbutic eruptions, and lepra, and externally and internally in psoriasis. [B, 5, 19, 173, 180 (α, 24) ; T. R. Orarn, "Brit. Med. Jour.," quoted in "Proc. of the Am. Pharm. Assoc.," xxxiv (α, 14).]—**G. asprellum.** Pointed cleavers ; a species growing in Michigan. ["Proc. of the Am. Pharm. Assoc.," vii (α, 14).]—**G. boreale.** Fr., *galiet du nord.* Of Linnæus, a species the root of which is used in Finland as a red dye. [B, 173 (α, 24) ; B, 215.]—**G. brachycarpos.** See *G. aparine.*—**G. californicum.** Of Hooker, a species growing in California. ["Proc. of the Am. Pharm. Assoc.," xix (α, 14).]—**G. campanulatum.** The *Asperula glauca.* [B, 214.]—**G. caucasicum.** See *G. verum.*—**G. chapi.** A climbing species found in the forests of Bolivia. The stalks, *chapi del monte*, are used in dyeing. [B, 121 (α, 24).]—**G. chilensis.** A species growing in Chile, called there *relbum.* ["Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]—**G. circæzans.** Wild licorice ; a species found in the United States, especially in Kansas. It is diuretic. [L, 107.]—**G. cruciatum.** Fr., *croisette velue, croix de Saint-André, éperonelle.* Ger., *kreuzblättriges Labkraut, gelbe Kreuzwurz, Goldwaldmeister, Spornstich.* Crosswort, a species found throughout Europe and northern Asia. The herb, *herba cruciatœ* (seu *valantiœ cruciatœ*, seu *gentianœ cruciatœ*, seu *gentianœ minoris*, seu *asperulœ aureœ*), is used as a tonic and stomachic, and externally as a styptic. The root yields a weak, red dye, and the stem and leaves a yellow dye. [B, 19, 173, 180 (α, 24).]—**G. cynanchicum.** See ASPERULA *cynanchica.*—**G. glaucum.** The *Asperula glauca.* [B, 214.]—**G. græcum.** Ger., *griechisches Labkraut.* A species found in Candia and Greece, where the root is used in hæmorrhage and dysentery. [B, 180 (α, 24).]—**G. grandiflorum, G. Halleri.** The *Asperula glauca.* [B, 214.]—**G. hyssopifolium.** Fr., *galiet à feuilles d'hyssope.* A variety of the *G. boréale.* [B, 64, 173 (α, 24).]—**G. infestum.** The *G. aparine*, var. *β Vaillantii.* [B, 180 (α, 24).]—**G. lanceolatum.** An American species resembling *G. circœzans.*—**G. lævigatum.** See *G. silvaticum.*—**G. luteum.** See *G. verum.*—**G. mollugo.** Fr., *galiet* (ou *caille-lait*) *blanc* [Fr. Cod.], *grosse croisette, croisette noire.* Ger., *weisses Labkraut, breitblättriges weisses Klebkraut, weisses Waldstroh, Schmalstern, weisser Butterstiel, Grasstern.* It., *guaglio bianco.* Wild madder, sticky grass, great bed-straw ; a species the herb of which, with the flowers, *herba et flores galii albi*, was used like that of *G. verum*, and the juice of the flowers in epilepsy. In Russia the root is used as a red dye. [B, 173, 180, 275 (α, 24).]—**G. nervosum.** See *G. boreale.*—**G. odoratum.** See ASPERULA *odorata.*—**G. palustre.** Fr., *caille-lait des marais.* Ger., *Sumpflabkraut.* A species used in France for epilepsy. [B, 5, 121 (α, 24).]—**G. pilosum.** Hairy bed-straw, flux-weed ; of Aiton, a species growing in the Southern States, said to be a specific in venomous bites. ["Proc. of the Am. Pharm. Assoc.," xxxiii (α, 14).]—**G. rigidum.** Fr., *caille-lait roide.* A species used in France as an antispasmodic and diaphoretic. [B, 104 (α, 24).]—**G. rotundifolium.** Ger., *rundblättriges Labkraut.* A rather uncommon European species, found in thickets and mountain forests. The herb, *herba galii rotundifolii*, was used like that of other species. [B, 180 (α, 24).]—**G. rubioides.** Fr., *galiet rouge.* 1. A species the root of which is used as a red dye in some portions of southern Europe. 2 Of American authors, the *G. boreale.* [B, 5 (α. 24) ; B, 215.]—**G. scaberrimum.** See *G. aparine.*—**G. scabrum.** A variety of *G. mollugo.* [α, 24.]—**G. septentrionale.** See *G. boreale.*—**G. silvaticum.** Fr., *galiet de bois.* Ger., *Waldlabkraut.* A species the root of which furnishes a red dye. [B, 173 (α, 24).]—**G. spinulosum.** See *G. uliginosum* and *G. asprellum.*—**G. spurium.** 1. Of Linnæus, the *G. aparine*, var. *spurium.* 2. Of Sprengel, the *G. uliginosum.* [B, 173, 180 (α, 24).]—**G. supinum.** See *G. uliginosum.*—**G. tinctorium.** Ger., *färbendes Labkraut.* Dyer's cleavers ; a variety of *G. trifidum.* [B, 215.]—**G. triandrum.** See ASPERULA *tinctoria.*—**G. trifidum.** Small cleavers ; a species abundant in the Western States, especially Kansas and Michigan, closely allied in properties to *G. verum*, and recommended in skin diseases. It furnishes red dye. [B, 5, 180 (α, 24) ; "Proc. of the Am. Pharm. Assoc.," vii, xxix (α, 14).]—**G. triflorum.** A species found in North America in moist woods. It contains coumarin. [B, 5, 34 (α, 24).]—**G. trinerve.** See *G. boreale* (1st def.).—**G. tuberculatum.** See *G. verum.*—**G. tuberosum.** Fr., *galiet tubéreux.* A species the tubercles of the root of which are eaten, cooked. [B, 173 (α, 24).]—**G. tyrolense.** See *G. mollugo.*—**G. uliginosum.** Fr., *galiet aquatique, caille-lait uligineux.* A species having properties similar to those of *G. verum.* [B, 121, 173 (α, 24).]—**G. Vaillantii.** The *G. aparine*, var. *Vaillantii.* [B, 180 (α, 24).]—**G. verum.** Fr., *galiet* (ou *caille-lait*) *jaune* [Fr. Cod.], *fleur de la Saint-Jean, gaillet, petit muguet, vrai caille-lait.* Ger., *gelbes Labkraut* (oder *Waldstroh*), *gelber Butterstiel, Frauenbettstroh, Liebfrauen-Bettstroh, Liebkraut, Meierkraut, Magenkraut, Labmagenkraut, Rainritzkraut.* It., *giallo guaglialatte.* Sp., *cuajaleche amarillo.* Yellow bed-straw, cheese-rennet, hundred-fold ; a species found in Europe, where the flowering parts of the plant, *summitates* (seu *herba cum floribus*) *galii* (*lutei*, seu *veri*), were formerly employed in epilepsy and hysteria, and as an application for skin eruptions. The flowers have an agreeable smell, and have been used as an atispasmodic. The plant is said to have the property of coagulating milk. The bruised plant furnishes a yellow and the root a red dye. If eaten by animals, it colors the bones like madder. [B. 5, 19, 104, 173, 180, 185, 275 (α, 24).]—**Herba galii.** The tops of the flowering plants *G. mollugo* and *G. verum.* [A, 319 (α, 21).]

GALL, n. Ga[4]l. Gr., χολή (1st def.), κηκίς (2d def.). Lat., *fel* (1st def.), *galla* (2d def.). Fr., *fiel* (1st def.), *galle* (2d def.). Ger., *Galle* (1st def.), *Gallapfel* (2d def.). It., *fiele* (1st def.), *galla* (2d def.). Sp., *hiel* (1st def.), *agalla* (2d def.). 1. See BILE and FEL. 2. See NUT-GALL. 3. The *Myrica gale.* [A, 505 (α, 21).] 4. See INTERTRIGO and ABRASION.—**Acid of g's.** Gallic acid. [B, 86.]—**Aleppo g's.** Fr., *galles d'Alep.* G's (2d def.) from the *Quercus lusitanica*, var. *infectoria.* [B, 275 (α, 24).]—**Artichoke-g.** Fr., *galle en artichaut.* A nut-g. produced by an insect (*Andricus pilosus*) in the male flower-buds of the oak. [B, 275 (α, 24).]—**Bay-g's.** See *Red* BAY.—**Bedeguar g.** See BEDEGAR.—**Black g's.** Lat., *gallœ nigrœ.* Fr., *galles noires.* Ger., *dunkle Galläpfel.* Fully developed nut-g's of a black color. [B, 5 (α, 24).]—**Blue g's.** Lat., *gallœ cœruleœ.* Fr., *galles bleues.* Fully developed nut-g's of a blue color. [B, 5 (α, 24).]—**Bokhara g's.** Fr., *galles de Boukhara* (ou *de pistachiere*). Small astringent nut-g's known in the Indian bazaars as *bazghanj* and *gule-pistah* (flower of pistachio). They have the nature of the other pistacia g's. [B, 18 (α, 24).]—**Bussorah-g's.** A large, purplish nut-g. produced on a species of oak by *Cynips insana ;* thought by some to be identical with the Dead-Sea fruit, or apples of Sodom. [B, 77 (α, 24).]—**Button-g.** A nut-g. formed on the leaves of the oak by *Spathegaster vesicatrix.* [B, 275 (α, 24).]—**California flea-seed g's.** Oak-g's made by a species of *Cynips.* When detached, these g's are made to jump by the spasmodic movements of the larvæ within their cavity. [B, 77 (α, 24).]—**Cherry-g.** A succulent g. produced by *Dryophanta scutellaris.* [B, 77 (α, 24).]—**Chinese g's.** Lat., *gallœ chinenses* (seu *japonicœ*). Fr., *galles de Chine.* Ger., *chinesische Galläpfel.* Chin., *u poi cu, wu-pei-tze.* Vesicular protuberances, light and hollow, of an irregular form, and often distorted by numerous knobby

protuberances, formed on the leaf-stalks and branches of a Chinese tree, the *Rhus semi-alata*, by the punctures of *Aphis chinensis.* They contain 72 per cent. of tannin, are employed by the Chinese in medicine and dyeing, and are said to be preferable to the official g's for the manufacture of gallic acid, from their containing less coloring matter. In Germany they are employed chiefly for the manufacture of tannic and gallic acids and pyrogallol. [B, 5, 18, 77 (a, 24).]—**Corniculate g.** Fr., *galle corniculée.* A nut-g. formed by a woody central axis provided with horn-like excrescences curved inward at the extremities. It is yellowish and very light, all the horns are hollow, and each one seems to have been the breeding place of a *Cynips.* [L, 87 (a, 14).]—**Crowned Aleppo g's.** Fr., *petites galles couronnées d'Alep.* Nut-g's produced on the terminal sprouts of *Quercus infectoria.* [L, 87 (a, 14).]—**Currant-g's.** G's formed in the male flowers of the oak by the *Spathegaster baccarum.* [B, 275 (a, 24).]—**Devonshire woody-g's.** See *Marble g's.*—**Earth-g.** Lat., *fel terræ.* The *Erythræa centaurium.* [B, 180 (a, 24).]—**Edible g's.** See GALLÆ *esculentæ.*—**Eglantine g's.** See BEDEGAR.—**False g's.** Protuberances like nut-g's, produced on the surface of plants by plant-lice (*Aphides*). [B, 121 (a, 24).] Cf. *True g's.*—**French g's.** Fr., *galles rondes de France* (ou *de l'yeuse*). The nut-g's produced on the *Quercus ilex.* [a, 24.]—**G.-bladder.** See *G. bladder.*—**G. insect.** See CYNIPS.—**G.-nut, G'nuss** (Ger.). See NUT-GALL.—**G. of the earth.** 1. The *Lactuca floridana*; of Gray, the *Prenanthes alba* and *Prenanthes serpentaria.* [B, 19, 215 (a, 24).] 2. See *Earth g.*—**G'schärfe** (Ger.). Acridity of the bile. [L, 80.]—**G.-stone.** See *Biliary* CALCULUS.—**G'süchtig** (Ger.). See ATRABILIARY.—**G.-weed.** The *Picria fel terræ* and *Linaris vulgaris.* [B, 180, 275 (a, 24).]—**G'wespe** (Ger.). See the major list.—**G'wort.** The *Linaria vulgaris.* [B, 275 (a, 24).]—**Green g's.** Lat., *gallæ virides.* Fr., *galles vertes.* Fully developed official nut.-g's of a green color. [B, 5 (a, 24).]—**Hog-g.** Ger., *Schweinsgalle.* See FEL *porci.*—**Hungarian g's.** Lat., *gallæ hungaricæ.* Fr., *galles de Hongrie.* Ger., *ungarische Galläpfel.* Oak-g's collected in Austria-Hungary and in Bosnia; produced by the puncture of a species of *Cynips* on the woody cup of the acorn. [L, 87 (a, 14); B, 180 (a, 24).]—**Ilex g's.** See *French g's.*—**Inspissated ox-g.** [U. S. Ph.]. See FEL *bovis inspissatum.*—**Istrian g's.** Lat., *gallæ istrianæ.* Fr., *galles d'Istrie.* Ger., *istrianer* (oder *istrische*) *Galläpfel.* Nut-g's collected in Istria; produced by *Cynips hayneana.* [Brandt (B, 180 [a, 24]).]—**Japanese g's.** Lat., *gallæ japonicæ.* A species of g's resembling Chinese g's, but somewhat smaller and paler; known in Japanese commerce as *kifushi.* [B, 18 (a, 24).]—**Leaf-g's.** Nut-g's occurring on leaves. [a, 24.]—**Levant g's.** Lat., *gallæ levanticæ.* Fr., *galles du Levant.* Ger., *levantische Galläpfel.* See NUT-GALL.—**Marble g's.** Fr., *galles marmorines.* Nut-g's of a regular (marble-like) shape produced on oak-buds by *Cynips Kollari.* They contain 17 per cent. of tannin. [B, 77, 275 (a, 24).]—**May-thistle g's.** The g's found on the stem and leaves of the May-thistle. [a, 24.] See *Cnicus arvensis.*—**Mecca g.** See *Bussorah-g's.*—**Morea g's.** A superior variety of nut-g's exported from Greece to Holland. They are of a dirty, reddish-brown or grayish-brown color, and most of them are bored with large fly-holes. [B, 180 (a, 24).]—**Mosoul** (or **Mosul**, or **Mozoul**) **g's.** Oak-g's gathered in Persia and about the Tigris. [B, 180 (a, 24).]—**Myrobalan g's.** The very bitter, astringent g's produced on the fruits of *Terminalia chebula*; also the fruits themselves, formerly sold in the shops of Philadelphia under the name of *white g's.* [B, 5, 180 (a, 24).]—**Nut-g.** See NUT-GALL.—**Oak-apple g.** A g. formed on oak twigs by *Biorhiza aptera.* [B, 275 (a, 24).]—**Oak-g.** See NUT-GALL.—**Oak-root g.** A g. formed on oak-roots by *Andricus noduli.* [B, 275 (a, 24).]—**Oak-spangle g.** A g. formed on oak-leaves by *Neuropterus lenticularis.* [B, 275 (a, 24).]—**Ointment of g's.** See UNGUENTUM *gallæ.*—**Ointment of g's and opium.** See *Unguentum* GALLÆ *cum opio.*—**Ox-g.** [U. S. Ph.]. See FEL *bovis.*—**Piedmont g's.** Fr., *galles de Piémont.* See *Hungarian g's.*—**Pistacia g's.** Lat., *gallæ* (seu *folliculi*) *pistacinæ.* Fr., *galles de pistachier* (ou *de térébinthe*, ou *de Sodome*), *carobs de Judée.* Ger., *Pistachen-Gällapfel.* G's similar to Chinese g's produced by a species of *Aphis* on different species of *Pistacia*; used medicinally and as a dye. Similar growths, but smaller and of different shapes, are afforded by *Pistacia lentiscus*, and by the leaves of *Pistacia terebinthus.* [B, 5, 173 (a, 24).] See *Bokhara g's.*—**Purified ox-g.** [U. S. Ph.], **Refined ox-g.** See FEL *bovis purificatum.*—**Rose-g.** Fr., *galle de rosier.* See BEDEGAR.—**Simple g.** Fr., *galle simple.* A nut-g. of which the internal cavity is single.—**Smyrna g's, Syrian g's.** Fr., *galles de Smyrne.* Ger. *Smyrna'sche Galläpfel.* Oak-g's from Anatolia and the neighboring province. [B, 180 (a, 24).]—**Sweet-brier g.** See BEDEGAR.—**Tamarisk g's, Tamarix g's.** Fr., *galles de tamarix* (ou *rouges*). G's found on the branches of *Tamarix orientalis*; used in India in place of nut-g. [B, 18 (a, 24).]—**Tarablous g's.** G's imported from Tripoli, of inferior quality. [B, 77 (a, 24).]—**Tincture of g's.** See *Tinctura* GALLÆ.—**True g's.** Fr., *vraies galles.* Nut-g's produced by the puncture of some insect (*e. g.*, the *Cynips*) which deposits its eggs in the tissue of the plant so that the excrescence eventually covers the larva and affords it nourishment. [B, 121 (a, 24).] Cf. *False g's.*—**Turkey g's.** Lat., *gallæ* (*quercus*) *turcicæ.* See NUT-GALL.—**White g's.** Lat., *gallæ albæ.* Fr., *galles blanches.* Ger., *weisse Galläpfel.* 1. An inferior variety of nut-g's of large size, whitish, and poor in tannin: gathered after the fly has bored its way out. [B, 5, 18 (a, 24).] 2. See *Myrobalan g's.*

GALLA [U. S. Ph., Br. Ph.] (Lat.), n. f. Ga^{2}l(ga^{3}l)'a^3. 1. See NUT-GALL. 2. An ancient name for an inferior, bitter wine. [A, 318.]—**Acidum gallæ** (seu **gallarum**). Gallic acid. [B.]—**Extractum gallarum** [Austr. Ph., 1820]. Fr., *extrait de noix de galle.* An extract made by exhausting nut-galls with boiling water and evaporating the liquor in a water-bath to dryness. [B, 97, 119 (a, 14).]—**Gallæ albæ.** See *White* GALLS.—**Gallæ aleppenses.** See *Aleppo* GALLS.—**Gallæ angustinæ.** An inferior sort of galls used in Italy. [B, 180 (a, 24).]—**Gallæ chinenses.** See *Chinese* GALLS.—**Gallæ cæruleæ.** See *Blue* GALLS.—**Gallæ de Aleppo.** See *Aleppo* GALLS.—**Gallæ esculentæ.** Fr., *galles de sauge.* Edible galls, produced by the puncture of *Cynips salviæ* on the apple-bearing sage of Greece (*Salvia pomifera*). They are eaten after being steeped in water, and are also made into a conserve. ["Proc. of the Am. Pharm. Assoc.," xxix (a, 14).]—**Gallæ halepenses.** See *Aleppo* GALLS.—**Gallæ hungaricæ.** See *Hungarian* GALLS.—**Gallæ istrianæ.** See *Istrian* GALLS.—**Gallæ japonicæ.** See *Japanese* GALLS.—**G. levantica, Gallæ levanticæ.** See NUT-GALL.—**Gallæ marmonigæ.** See *Gallæ angustinæ.*—**Gallæ nigræ.** See *Black* GALLS.—**Gallæ pistacinæ.** See *Pistachia* GALLS.—**Gallæ quercinæ** (seu **quercus**). See NUT-GALL.—**Gallæ quercus calycis.** Fr., *gallons de Hongrie, gallons du Piedmont.* Ger., *Knobben, Knoppern.* Nut-galls produced on the acorns of *Quercus robur* and *Quercus sessiliflora* by the punctures of *Cynips quercus calycis.* They have been used in place of the official galls. [B, 121, 170 (a, 24).]—**Gallæ quercus turcicæ, Gallæ tinctoriæ, Gallæ turcicæ.** See NUT-GALL.—**G. tinctoria.** See NUT-GALL.—**Gallæ Verinæ** (seu **Veronæ**). In Italy, oak-galls of the better sort gathered in Apulia. [B, 180 (a, 24).]—**Gallæ virides.** See *Green* GALLS.—**Infusum gallarum** [Austr. Ph., 1820; Ferr. Ph., 1832]. Fr., *infusion* (ou *hydrolé*) *de noix de galle.* Infusion of nut-galls; made by macerating 3 or 4 parts of nut-galls in 24 of boiling water, expressing, and filtering. [B, 97, 119 (a, 14).]—**Nuces gallarum.** See NUT-GALL.—**Sal essentiale gallarum.** See GALLIC ACID.—**Tinctura gallæ** [U. S. Ph., Br. Ph.] (seu **gallarum** [Ger. Ph., Swiss Ph., Russ. Ph., Finn. Ph., Hung. Ph., 2d ed., Netherl. Ph.]). Fr., *teinture de noix de galle* [Fr. Cod.]. Ger., *Galläpfeltinctur.* A tincture made with 20 parts of powdered nut-gall, 10 of glycerin, and diluted alcohol sufficient to yield 100 parts of tincture [U. S. Ph.], or with 2½ oz. of nut-gall and proof spirit sufficient to give 1 pint (imp.) [Br. Ph.], or by prolonged maceration or digestion of nut-gall in 5 parts of dilute alcohol [Ger. Ph., Fr. Cod., Hung. Ph., Netherl. Ph., Russ. Ph., Finn. Ph., Swiss Ph.]. Similar preparations were formerly official in other pharmacopœias. [B, 81, 95, 97, 119 (a, 14).]—**Unguentum ex gallis opiatum** [Sax. Ph., 1820]. See *Unguentum gallæ cum opio.*—**Unguentum gallæ** [U. S. Ph., Br. Ph.] (seu **gallarum** [Dutch Ph., Niemann's Notes, 1811]). Fr., *pommade de noix de galle.* An ointment made by mixing 1 part of powdered nut-galls with 9 [U. S. Ph.], or 8 [Dutch Ph., Niemann's Notes], or 5·5 [Br. Ph.] parts of benzoated lard. [B, 81, 95, 119 (a, 14).]—**Unguentum gallæ cum opio** [Br. Ph.]. A preparation made by mixing 32 grains of powdered opium with 1 oz. of unguentum gallæ [Br. Ph.], or 1 part of opium, 2 parts of powdered nut-galls, and 12 of unguentum linariæ [Sax. Ph., 1820]. [B, 81, 97 (a, 14).]

GALLACTON [Hesse], **GALLACTUCON**, n's. Ga^{2}l-a^{2}k'to^{2}n, -tu^2-ko^{2}n. See LACTUCON.

GALLAMIC ACID, n. Ga^{2}l-a^{2}m'i^{2}k. Fr., *acide gallamique.* An acid prepared by treating tannin with a mixture of ammonia and ammonium sulphite. [L, 41 (a, 14).]

GALLAO, n. A form of yaws observed in Guinea. [A, 301]

GALLAPFEL (Ger.), n. Ga^{3}l'a^{3}p-fe^{2}l. See NUT-GALL.—**Abbruzzo Galläpfel.** Oak-galls collected in Abruzzo, Italy. They have a dirty, yellowish-brown, sometimes reddish-brown color, are rather heavy, and most of them have fly-holes. [B, 180 (a, 24).]—**Apulische Galläpfel.** See GALLÆ *angustinæ.*—**Chinesische Galläpfel.** See *Chinese* GALLS.—**Dunkle Galläpfel.** See *Black* GALLS.—**Galläpfeleiche.** The *Quercus infectoria.* [B, 180 (a, 24).]—**Galläpfelfliege.** See CYNIPS *gallæ tinctoriæ.*—**Galläpfelgerbsäure.** See TANNIN.—**Galläpfelsäure.** See GALLIC ACID.—**Galläpfeltinctur** [Ger. Cod.]. See NUT-GALL.—**Petites g's couronnées d'Alep.** See *Crowned Aleppo* GALLS.—**Pommade de noix de g.** See *Unguentum* GALLÆ.—**Teinture de noix de g.** [Fr. Cod.]. See *Tinctura* GALLÆ.

GALLE (Ger.), n. Ga^{3}l'le^2. See BILE.—**Eingedickte Rindsg.** See FEL *bovis inspissatum.*—**G'nabsonderung.** The secretion of bile. [A, 319 (a, 24).]—**G'nartig.** See BILIOUS.—**G'nausführung.** The excretion of bile.—**G'nausleerend.** See CHOLAGOGUE.—**G'nbehälter, G'behältniss.** See *Goll*-BLADDER.—**G'nbereitung.** See CHOLOPOIESIS.—**G'nbestandtheile.** The constituents of bile.

[A, 319 (α, 21).]—**G'nbitter.** As bitter as gall.—**G'nblasenschnitt.** See CHOLECYSTOTOMY.—**G'nblut.** See CHOLÆMIA.—**G'nbraun.** See BILIRUBIN.—**G'nbrechen.** Bilious vomiting. [A, 523.]—**G. der Leber.** See *Hepatic* BILE.—**G'ndyschymose.** See CHOLOPLANIA.—**G'nergiessung.** See CHOLECCHYSIS.—**G'nerguss.** See CHOLORRHŒA.—**G'nfarbstoffe.** See BILE *pigments*.—**G'nfluss.** A flow of bile.—**G'nflüsse.** See CHOLERA.—**G'nführend.** See CHOLEDOCHUS.—**G'ngelb.** See BILIFULVIN.—**G'ngrün.** See BILIVERDIN.—**G'kraut.** See the major list.—**G'nlosigkeit, G'nmangel.** See ACHOLIA.—**G'nreaction.** A chemical reaction of showing the presence of bile.—**G'nreich.** Rich in bile. [A, 521.]—**G'nsäuren.** See *Biliary* ACIDS.—**G'nschmerz.** See CYSTALGIA and CYSTORRHEUMA.—**G'nstauung.** Engorgement with bile. [A, 521.]—**G'nstein.** See the major list.—**G'nsucht.** See JAUNDICE and BILIOUSNESS.—**G'nsüchtig.** See BILIOUS.—**G'nsüss.** See PICROMEL.—**G'ntreibend.** See CHOLAGOGUE.—**G'nverdickung.** See CHOLOSTEGNOSIS.—**Gereinigte Ochseng'.** See FEL *bovis purificatum*.—**Glasg'.** See *Gall of* GLASS.—**Hepatische G.** See *Hepatic* BILE.—**Ochseng'.** See FEL *bovis*.—**Rindsg'.** See FEL *bovis*.—**Schwarze G.** See ATRABILIS.—**Verdickte G.** Inspissated bile. [L, 80.]

GALLEIN, n. Ga^{4}l'e-i^{2}n. Fr., *galléine.* Ger., *Galleïn.* A body, $C_{18}H_{14}O_7$, obtained by heating pyrogallic acid with phthalic anhydride. It forms crystals which are blue by transmitted light, and are little soluble in alcohol, but almost completely insoluble in water. [B, 2.]

GALLENKRAUT (Ger.), n. Ga^{3}l'le^{2}n-kra^3-u^{4}t. The *Picria fel terræ.* [B, 180 (α, 24).]—**Weisses G.** The *Gratiola officinalis.* [B, 180 (α, 24).]

GALLENSTEIN (Ger.), n. Ga^{3}l'e^{2}n-stin. See *Biliary* CALCULUS.—**G'einklemmung.** Impaction of a gall-stone.—**G'fett.** See CHOLESTERIN.

GALLERAJE (It.), n. Ga^{3}l-le^{2}r-a^3'ya. A place in Tuscany, Italy, where there are gaseous, sulphurous, and chalybeate springs. [L, 49, 105 (α, 14).]

GALLERTARTIG (Ger.), adj. Ga^{3}l'le^{2}rt-a^{3}rt-i^{2}g. See GELATINOUS.

GALLERTBILDUNG (Ger.), n. Ga^{3}l'le^{2}rt-bi^{2}ld-un^2. The formation of a jelly-like mass. [A, 396 (α, 21).]

GALLERTE (Ger.), n. Ga^{3}l'le^{2}rt-e^2. See GELATIN, GLUTEN, and JELLY.—**Arzeneig'.** Medicinal gelatin. [A, 319 (α, 21).]—**G'extract.** See OSMAZOME.—**Glaskörperg'.** See *Vitreous* HUMOR.—**Leimg', Thierische G.** Animal gelatin. [A, 319 (α, 21).]—**Wharton'sche G.** See *Wharton's* JELLY.

GALLERTFLECHTE (Ger.), n. Ga^{3}l'le^{2}rt-fle^{2}ch^{2}t-e^2. The genus *Collema.* [B, 180 (α, 24).]—**Durchscheinende G.** The *Collema diaphanum.* [B, 180 (α, 24).]

GALLERTFÖRMIG (Ger.), adj. Ga^{3}l'le^{2}rt-fu^{6}rm-i^{2}g. See GELATINIFORM.

GALLERTHAUFEN (Ger.), n. Ga^{3}l'le^{2}rt-ha^3-u^{4}f-e^{2}n. A colloid or gelatinous accumulation. [A, 521.]

GALLERTIG (Ger.), adj. Ga^{3}l'le^{2}rt-i^{2}g. See GELATINOUS.—**G.-schleimig.** Muco-gelatinous. [A, 521.]

GALLERTMASSE (Ger.), n. Ga^{3}l'le^{2}rt-ma^{3}s-se^2. See GALLERTHAUFEN.

GALLERTSÄURE (Ger.), n. Ga^{3}l'le^{2}rt-zoir-e^2. Pectic acid. [A, 324 (L).]

GALLERTSTOCK (Ger.), n. Ga^{3}l'le^{2}rt-sto^{2}k. See ZOOGLŒA.

GALLERYTHRONIC ACID, n. Ga^{2}l-e^{2}r-i^2-thro^{2}n'i^{2}k. Fr., *acide gallérythronique.* Ger., *Gallerythronsäure, Blaugallussäure.* An acid produced by the action of calcium bicarbonate or other carbonates of the alkaline earths on gallic acid; apparently formed also by the action of the air on the precipitates obtained by treating solutions of the chlorides of calcium, barium, and strontium in gallic acid with caustic potash. [B, 48 (α, 14).]

GALLGERBSÄURE (Ger.), n. Ga^{3}l'ge^{2}rb-zoir-e^2. Tannic acid. [A, 523.]

GALLHUMIC ACID, n. Ga^{2}l-hu^{2}m'i^{2}k. Ger., *Gallhuminsäure.* Metagallic acid. [B, 5.]

GALLIC, adj. Ga^{2}l'i^{2}k. 1. See GALLICUS. 2. Of or pertaining to galls. 3. Of or pertaining to gallium; as a g. salt.—**Gallic acid.** See the major list.

GALLIC ACID, n. Ga^{2}l'i^{2}k. Lat., *acidum gallicum* [U. S. Ph., Br. Ph., Fr. Cod.], *sal essentiale gallarum.* Fr., *acide gallique.* Ger., *Gallussäurs, Gallapfelsäure.* Trihydroxybenzoic (trioxybenzoic) acid, $C_6(H,OH,OH,H,OH,CO.OH,)=C_7H_6O_5$, a monobasic, aromatic acid, found in nut-galls, mangoes, the fruit of *Cæsalpina coriaria*, and other vegetable substances. Its presence in these vegetables is believed to be due to fermentative changes taking place in the tannic acid of the plants. See *G. a.* FERMENTATION. This conversion of tannic acid into g. a. takes place in the animal organism whenever the former substance is ingested, and can also be effected artificially by the action of dilute alkalies and acids. G. a. forms colorless, silky, acicular crystals, usually associated with a molecule of water of crystallization, and is of an acid, astringent taste, soluble in 100 parts of cold water, and in about 5 of alcohol; soluble in boiling water and in boiling alcohol. It forms salts called gallates. It is astringent, but does not coagulate albumin. [B, 4, 5.]—**Glycerine** (or **glycerite**) **of g. a.** See *Glycerinum* ACIDI GALLICI.—**Ointment of g. a.** See *Unguentum* ACIDI GALLICI.

GALLICHT (Ger.), adj. Ga^{3}l'li^{2}ch^{2}t. See BILIOUS.

GALLICOLOUS, adj. Ga^{2}l-i^{2}k'ol-u^{3}s. Lat., *gallicolus* (from *galla*, a nut-gall, and *colere*, to inhabit). Fr., *gallicole.* Inhabiting galls (said of the insects that so pass their larval state). The *Gallicolæ* are the *Cecidomyidæ.* [A, 301; L.]

GALLICUS (Lat.), adj. Ga^{2}l(ga^{3}l)'li^{2}k-u^{3}s(u^{4}s). From *Gallia*, the country of the Gauls. Fr., *français.* Ger., *französisch.* French (see MORBUS *g.*, SEMEN *gallicum*, SPIRITUS *vini gallici*, etc.).

GALLIFORM, adj. Ga^{2}l'i^2-fo^{2}rm. Lat., *galliformis* (from *gallus*, the cock, and *forma*, form). Fr., *galliforme.* Resembling the cock. The *Galliformes* are a family of climbing birds so characterized. [L, 41.] Cf. GALLINACEOUS.

GALLIG (Ger.), adj. Ga^{3}l'li^{2}g. See BILIOUS.

GALLIGASKINS, n. Ga^{2}l-i^2-ga^{2}s'ki^{2}nz. A variety of the *Primula veris.* [A, 505 (α, 21).]

GALLIGÈNE (Fr.), adj. Ga^3-le-zhe^{2}n. From *galla*, a nut-gall, and *generare*, to engender. Causing the formation of galls. [A, 385.]

GALLIN, n. Ga^{4}l'i^{2}n. A substance, $C_{18}H_{16}O_6$, formed by the action of reducing agents on gallein. It occurs in glistening, prismatic, and nearly colorless crystals. [B, 2.]

GALLINA (Lat.), n. f. Gal(ga^{3}l)-in(en)'a^3. Gr., ἀλεκτορίς. Fr., *galline, poule.* Ger., *Huhn.* The hen.—**Gallinæ stercus.** The excrement of the hen; formerly employed in medicine. [B, 97.]

GALLINACE (Fr.), n. Ga^{3}l-e-na^{3}s. See GALLINACIA.

GALLINACEUS (Lat.), adj. Ga^{2}l(ga^{3}l)-li^{2}n(len)-a(a^3)'se^2(ke^2)-u^{3}s(u^{4}s). From *gallina*, the hen. Gr., ἀλεκτόριος. Fr., *gallinacé.* Ger., *hühnerähnlich.* Pertaining to or resembling the common domestic fowl. The *Gallinaceæ* (*Gallinæ*) are a class of birds so characterized. [L, 343.]

GALLINACIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-li^{2}n(len)-a(a^3)'si^2(ki^2)-a^3. From *gallina*, the hen. Fr., *gallinace.* The *Cantharellus cibarius.* [B, 121 (α, 24).]

GALLINAGO (Lat.), n. f. Ga^{2}l(ga^{3}l)-li^{2}n(len)-a(a^3)'go. Gen., *-ag'inis.* From *gallina*, the hen. Gr., σκολόπαξ. Fr., *coq de bruyère.* Ger., *Schnepfe.* The woodcock. [A, 387.]—**Caput gallinaginis.** See under CAPUT.

GALLINARIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-li^{2}n(len)-a(a^3)'ri^2-a^3. From *gallina*, the hen. The *Cassia tora* and *Cassia sophora;* so called by Rumphius because they are used in treating diseases of fowls. [B, 121 (α, 24).]—**G. rotundifolia.** The *Cassia g.* (*tora*). [B, 121 (α, 24).]

GALLINATED, adj. Ga^{4}l'i^{2}n-at-e^{2}d. Of wines, having been subjected to Gall's process (the addition of glucose before their fermentation).

GALLINE (Fr.), n. Ga^3-len. See GALLIN and GALLINA.

GALLINETTE (Fr.), n. Ga^{3}l-e-ne^{2}t. From *gallina*, the hen. 1. The *Fedia olitoria* and the *Clavaria coralloides.* 2. In the pl., *g's*, the *Clavaria amethystina.* [B, 105, 173 (α, 24).]

GALLINHA-CHOCA (Port.), n. Ga^{3}l-len''ya^3-sho'ka^3. In Brazil, the *Erythroxylon suberosum.* [B, 121 (α, 24).]

GALLINODE (Fr.), n. Ga^{3}l-e-nod. The *Clavaria botrytis.* [B, 105.]

GALLINOLE (Fr.), n. Ga^{3}l-e-nol. The genus *Clavaria.* [B, 121 (α, 24).]

GALLINOTTE (Fr.), n. Ga^{3}l-e-no^{2}t. The *Clavaria coralloides.* [B, 173 (α, 24).]

GALLINSECTA (Lat.), n. n. pl. Ga^{2}l(ga^{3}l)-li^{2}n-se^{2}kt'a^3. From *galla*, a nutgall, and *insectum*, an insect. Fr., *gallinsectes.* A family of hemipterous, homopterous insects having for its type the genus *Cochenilla;* so called because the body is gall-shaped. [A, 385; L, 41 (α, 21).]

GALLINULA (Lat.), n. f. Ga^{2}l(ga^{3}l)-li^{2}n(len)'u^2(u^4)-la^3. A genus of birds belonging to the *Grallatores.* [B.]—**G. chloropus.** Ger., *grünfüssiges Mohrhuhn.* The moor hen; a European species living on lakes and ponds. The meat was formerly used for snake-bites and the heart as a remedy for epilepsy, and the fat was regarded as resolvent and calmative. [B, 180.]

GALLIPAVO (Lat.), n. m. Ga^{2}l(ga^{3}l)-li^2-pa(pa^3)'vo(wo). Gen., *-vo'nis.* From *gallus*, a cock, and *pavo*, a peacock. Fr., *gallopavo.* The genus *Meleagris.* [L, 41 (α, 21).]

GALLIPOT, n. Ga^{2}l'i^2-po^{2}t. A small glazed earthen pot for holding ointments, etc.

GALLIQUE (Fr.), adj. Ga^{3}l-ek. Gallic.

GALLISIN, n. Ga^{2}l'i^{2}s-i^{2}n. An unfermentable, amorphous, highly hygroscopic substance, $C_{12}H_{24}O_{10}$, remaining after the fermentation of commercial glucose in "gallinated" wines; slightly soluble in methyl alcohol, less soluble in glacial acetic acid and in absolute alcohol. [Schmitt and Cobenzl, "Ber. d. dtsch. chem. Gsllsch.," xvii; "Jour. of the Chem. Soc.," Oct., 1884; "Am. Jour. of Pharm.," Jan., 1885, p. 42; "Proc. of the Am. Pharm. Assoc.," xxxiii (α, 14).]

GALLITE (Fr.), n. Ga^{3}l-et. The *Linaria hirsuta.* [B, 121 (α, 24).]

GALLITRICHON (Lat.), n. n. Ga^{2}l(ga^{3}l)-li^{2}t'ri^{2}k(ri^{2}ch^2)-o^{2}n. See CALLITRICHON.—**Herba gallitrichi.** The herb of *Salvia horminum* and of *Salvia sclarea.* [B, 180 (α, 24).]—**Semen gallitrichi.** The seed of *Salvia horminum.* [B, 180 (α, 24).]

GALLITZENSTEIN (Ger.), n. Ga^{3}l-li^{2}tz'e^{2}n-stin. Zinc sulphate. [A, 521.]

GALLIUM, n. Ga^{2}l(ga^{3}l)'i^2-u^{3}m(u^{4}m). A metallic element discovered in 1875 by Lecoq de Boisbaudran. It is a tough, bluish-white substance of the sp. gr. of 5·9. It melts at 30° C. to form a silvery liquid which if undisturbed does not solidify, even when cooled to 0° C. If the molten metal is brought into contact with the solid metal, it solidifies in the crystalline form. In compounds, g. acts as a trivalent radicle, forming salts analogous to those of aluminium. Symbol, Ga; atomic weight, 69·8. [B, 3.]—**Ammonium g.-alum.** Ger., *G'ammoniakalaun.* A crystalline substance, $Ga_2(SO_4)_3 + (NH_4)_2SO_4 + 24H_2O$, soluble in water, having the composition of

ammonium-alum, in which g. takes the place of aluminium. It has poisonous properties, but is not very active. [Rabuteau, "Compt. rend. de la soc. de biol.," 1883, p. 305 (B).]—**G. chloride.** Fr., *chlorure de g.* Ger., *G'chlorid.* A poisonous, deliquescent substance, Ga_2Cl_6. [Rabuteau, *l. c.* (B, 3).]

GALLMEY (Ger.), n. Ga^{3}l-mi. See CALAMINE.

GALLO-COLUMBINE [Huxley], adj. Ga^{2}l″o-ko^{2}l′u^{3}m-bi^{2}n. Resembling the *Gallinæ* and the *Columbidæ*. [L.]

GALLOC, n. Ga^{2}l′o^{2}k. The *Symphytum officinale*. [A, 505 (*a*, 21).]

GALLOCRESTA (Sp.), n. Ga^{3}l-yo-kre^{2}s′ta^{3}. The *Salvia horminum*. [B, 121 (*a*, 24).]

GALLOIÉMIE (Fr.), **GALLOLOIÊMIE** [Piorry] (Fr.), n's. Ga^{3}l-o-e-e^{2}-me, -lo-e-a-me. From *Gallus*, a Gaul, λοιμός, a plague, and αἷμα, blood. The miliary fever of the Picards. [L, 82.]

GALLON, n. Ga^{2}l′u^{3}n. Lat., *congius* (1st def.). Fr., *g.* Ger., *G.* It., *gallone.* Sp., *galón.* 1. A liquid measure of four quarts. 2. The *Petasites vulgaris*. [A, 505 (*a*, 21).]

GALLON (Fr.), n. Ga^{3}-lo^{2}n^{2}. See NUT-GALL.—**G's de Hongrie.** See GALLÆ *quercus calycis*.—**G. d'Orient, G. du levant.** See ÆGILOPS (2d def.).—**G's du Piedmont.** See GALLÆ *quercus calycis*.

GALLONS (Fr.), n. Ga^{3}l-o^{2}n^{2}. See GALONS.

GALLOPING, adj. Ga^{2}l′u^{3}p-i^{2}n^{2}. Fr., *galopant.* Ger., *gallopirend.* Pursuing a rapid course (said of acute miliary tuberculosis).

GALLOTANNIC ACID, n. Ga^{2}l-o-ta^{2}n′i^{2}k. Fr., *acide gallotannique.* Ger., *Gallusgerbsäure.* See TANNIN.

GALLSUCHT (Ger.), n. Ga^{3}l′zuch^{2}t. See JAUNDICE.

GALLULMIC ACID, n. Ga^{2}l-u^{3}l′mi^{2}k. Fr., *acide gallulmique.* Metagallic acid. [B.]

GALLUS (Lat.), n. m. Ga^{2}l(ga^{3}l)′lu^{3}s(lu^{4}s). Gr., ἀλέκτωρ (1st def.), γάλλος (2d def.). Fr., *coq* (1st def.). Ger., *Hahn* (1st def.). 1. The domestic cock. 2. A eunuch, especially a self-made eunuch or one who has submitted to castration voluntarily. [A, 312 (*a*, 21); A, 322, 387.]

GALLUSGERBSÄURE (Ger.), n. Ga^{3}l′lus-ge^{2}rb-zol-re^{2}. Tannin. [B, 270.]

GALLUSSÄURE (Ger.), n. Ga^{3}l′lus-zoir-e^{2}. Gallic acid. [B.]—**Blaug'.** See GALLERYTHRONIC ACID.—**G'glycerit.** See *Glycerinum* ACIDI GALLICI.—**G'salbe.** See *Unguentum* ACIDI GALLICI.

GALLWESPE (Ger.), n. Ga^{3}l′ve^{2}sp-e^{2}. See CYNIPS.—**Hayne's G.** See CYNIPS *hayneana*.—**Roseng'.** See CYNIPS *rosæ*.

GALLYRION (Lat.), n. n. Ga^{2}l(ga^{3}l)-li^{2}r(lu^{6}r)′i^{2}-o^{2}n. The *Lilium bulbiferum* and the *Lilium martagon*. [B, 121 (*a*, 24).]

GALMEI (Ger.), n. Ga^{3}l′mi. See CALAMINE (1st def.).—**G'erde.** A native mixture of calamine and iron ochre. [B, 180 (*a*, 14).]—**G'salbe.** See *Ceratum* CALAMINÆ.

GALMOTE (Fr.), n. Ga^{3}l-mot. See AGARICUS *rubescens* (1st def.).

GALONS (Fr.), n. pl. Ga^{3}-lo^{2}n^{2}. A vulgar term for impetiginous eczema. [G.]

GALOPANT (Fr.), adj. Ga^{3}-lo-pa^{3}n^{2}. See GALLOPING.

GALOPODE (Fr.), adj. Ga^{3}-lo-pod. From γάλα, milk, and πούς, the foot. Of plants, having a foot or stipes containing a milky juice; as a n., a genus of Mexican plants. [L, 41 (*a*, 21).]

GALOPPIREND (Ger.), adj. Ga^{3}l-op-per′e^{2}nd. See GALLOPING.

GALO SATTA, n. In Bombay, the *Cocculus cordifolius*. [A, 479 (*a*, 21).]

GALREDA (Lat.), n. f. Ga^{2}l(ga^{3}l)-red(rad)′a^{3}. 1. Of Paracelsus, an excrementitious moldiness. 2. A kind of jelly made from boiled cartilage. [L, 94.]

GALTHOFER BITTERQUELLE (Ger.), n. Ga^{3}lt′hof-e^{2}r bi^{2}t′te^{2}r-kwe^{2}l-le^{2}. A place in the province of Moravia, Austria, where there is a spring containing magnesium and sodium sulphates. [L, 37 (*a*, 14).]

GALTIHENUM, n. Of Paracelsus, a certain preparation (of unknown constitution) used as a remedy for epilepsy. [A, 325, 518.]

GALUCHAT (Fr.), n. Ga^{3}-lu^{6}-sha^{3}. A commercial term for the skin of *Scyllium canicula*. [A, 301, 526.]

GALUNCHA (Hind.), n. See GULUNCHA.

GALVANIC, adj. Ga^{2}l-va^{2}n′i^{2}k. From *Galvani* (*Luigi*), a celebrated Bolognese physician. Fr., *galvanique.* Ger., *galvanisch.* It., *galvanico.* Sp., *galvánico.* Pertaining to galvanism. [*a*, 27.]

GALVANISM, n. Ga^{2}l′va^{2}n-i^{2}z′m. Lat., *galvanismus.* Fr., *galvanisme.* Ger., *Galvanismus.* It., Sp., *galvanismo.* Electricity developed by chemical action. [B, 270 (*a*, 27).]

GALVANIST, n. Ga^{2}l′va^{2}n-i^{2}st. One who employs galvanism. [B, 26.]

GALVANIZATION, n. Ga^{2}l-va^{2}n-i-za′shu^{3}n. Lat., *galvanisatio.* Fr., *galvanisation* Ger., *Galvanisirung.* The employment of a galvanic current, especially in diagnosis or therapeutics. [A, 326 (*a*, 21).] For subheadings not here given, see under ELECTRIZATION.—**Central g.** [G. M. Beard]. G. in which the anode is passed over the forehead and vertex, along the inner border of the sterno-cleido-mastoid to the clavicle, and down the spine, so as to successively stimulate the brain, sympathetic system, and spinal cord; the cathode is kept on the epigastrium. [*a*, 34.]—**General galvanization.** 1. General electrization by means of a galvanic current. [B, 26.] 2. See *General* GALVANO-FARADIZATION. [Erb (B).]—**Labile g.** G. in which one or both rheophores are moved from place to place.—**Localized g.** G. limited in its application to a circumscribed part of the body. [B.]—**Neuro-muscular g.** Ordinary galvanization. [*a*, 34.]—**Polar method of g.** G. in which one rheophore is placed over the part to be affected, while the other rheophore is applied to an indifferent (usually mesially located) part. [B.]—**Stabile g.** G. in which both rheophores are kept on the same place during the séance. [*a*, 34.]—**Unipolar g.** See *Polar g.*

GALVANIZED, adj. Ga^{2}l′va^{2}n-izd. Lat., *galvanisatus.* Fr., *galvanisé.* Ger., *galvanisirt.* 1. Subjected to the effects of galvanism. [*a*, 27.] 2. Electro-plated.

GALVANO-CAUSTIC, adj. and n. Ga^{2}l″va^{2}n-o-ka^{4}st′i^{2}k. Fr., *galvano-caustique.* Ger., *galvanokaustisch* (adj.), *Galvanokaustik* (n.). 1. (Adj.) acting as a galvanic cautery. 2. (N.) see *Galvanic* CAUTERY.

GALVANO-CAUSTICS, n. s. Ga^{2}l″va^{2}n-o-ka^{4}st′i^{2}ks. Fr., *galvano-caustique.* Ger., *Galvanokaustik.* The science of the caustic action of galvanism.

GALVANO-CAUSTY, n. Ga^{2}l″va^{2}n-o-ka^{4}s′ti^{2}. See *Galvanic* CAUTERY.

GALVANO-CAUTERIZATION, n. Ga^{2}l″va^{2}n-o-ka^{4}t-e^{2}r-i^{2}z-a′shu^{3}n. Cauterization by means of galvanism.—**Chemical g.-c.** The chemical decomposition of tissue by the galvanic current in electrolysis. [*a*, 34.]—**Thermic g.-c.** The destruction of tissue by the heat generated by a galvano-cautery. [*a*, 34.]

GALVANO-CAUTERY, n. Ga^{2}l″van-o-ka^{4}t′e^{2}r-i^{2}. See *Galvanic* CAUTERY.

GALVANO-CONTRACTILITY, n. Ga^{2}l‴va^{2}n-o-ko^{2}n″tra^{2}k-ti^{2}l′i^{2}t-i^{2}. For deriv., see GALVANIC and CONTRACTILITY. Capability of undergoing contraction under the influence of galvanism. [B, 26.]

GALVANODESMUS (Lat.), n. m. Ga^{2}l(ga^{3}l)-va^{2}n(va^{3}n)-o(o^{3})-de^{2}z(de^{2}s)′mu^{3}s(mu^{4}s). From *Galvani*, and δεσμός, a chain. A galvanic battery. [A, 322.]

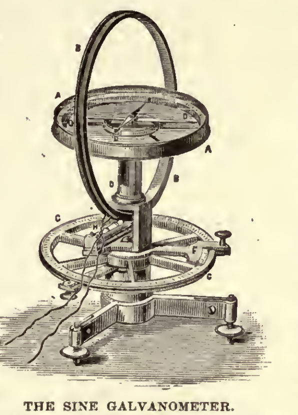
GALVANO-EMESIS (Lat.), n. f. Ga^{2}l(ga^{3}l)″va^{2}n(va^{3}n)-o(o^{3})-e^{2}m′e^{2}s-i^{2}s. Gen., *-emes′eos* (*-em′esis*). Emesis produced by applying one pole of a battery to the pharynx and another to the epigastrium. [*a*, 34.]

GALVANO-FARADAIC, GALVANO-FARADIC, adj's. Ga^{2}l″va^{2}n-o-fa^{2}r-a^{2}d-a′i^{2}k, -fa^{2}r′a^{2}d-i^{2}k. Pertaining to both galvanism and faradism.

GALVANO-FARADIZATION, n. Ga^{2}l″va^{2}n-o-fa^{2}r-a^{2}d-i^{2}z-a′shu^{3}n. For deriv., see GALVANISM and FARADIZATION. Syn.: *combined current*. The simultaneous employment of the galvanic and faradaic currents conveyed through a single set of conductors. [B, 26; De Watteville, cited in "Neurolog. Ctrlbl.," 1882, No. 12 (*a*, 27).]—**General g.** The combined application of galvanic and faradaic currents to the whole surface of the body; a simultaneous combination of general faradization and general galvanization. [B, 26.]

GALVANO-HYPNOTISM, n. Ga^{2}l-va″no-hi^{2}p′no-ti^{2}z′m. For deriv., see GALVANISM and HYPNOTISM. A hypnotic condition that has been produced by the passage of a galvanic current through the brain of an hysterical person. [*a*, 34.]

GALVANOKAUSTIK (Ger.), n. Ga^{3}l-fa^{3}n-o-ka^{3}-u^{4}st-ek′. See *Galvanic* CAUTERY and GALVANO-CAUSTICS.



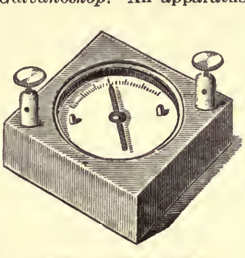
GALVANOLOGY, n. Ga^{2}l-va-no^{2}l′o-ji^{2}. From *Galvani*, and λογός, understanding. The science of galvanism.

GALVANOLYSIS (Lat.), n. f. Ga^{2}l(ga^{3}l)-van(va^{3}n)-o^{2}l′i^{2}(u^{6})-si^{2}s. Gen., *-olys′eos* (*-ol′ysis*). See ELECTROLYSIS.

GALVANO-MAGNETISM, n. Ga^{2}l″va^{2}n-o-ma^{2}g′ne^{2}t-i^{2}zm. For deriv., see GALVANISM and MAGNETISM. Lat., *galvano-magnetismus.* Fr., *galvano-magnétisme.* See ELECTRO-MAGNETISM.

GALVANOMETER, n. Ga^{2}l-va-no^{2}m′e^{2}t-u^{3}r. From *Galvani*, and μέτρον, a measure. Fr., *galvanomètre.* Ger., *G.* It., *galvanometro.* Sp., *galvanómetro.* Of Schweigger, an instrument for measuring the force of an electric current, consisting essentially of a magnetic needle, which is caused to deviate by the action of the current. Ruhmkorff's instrument is an astatic g., the lower needle of which is surrounded by a great number of coils of insulated copper wire, whose two ends communicate by means of binding screws with any given source of electricity. The feeblest current causes a deviation of the needles, whose extent can be read from a graduated circle placed beneath the upper needle. The entire apparatus, which is also called a multiplier, is inclosed by a glass cylinder supported on a copper stand. [B, 21 (*a*, 27).]—**Absolute g.** A variety of mirror g. in which the current-strength is measured by the amount of torsion required to bring two electro-magnets, which are mutually repelled by the action of the current, back to within a certain distance of each other. [B.]—**Astatic g.** A g. in which, instead of a single needle, two needles are used, placed parallel to each other and in the same vertical plane, but with their poles turned in opposite directions. In such a combination the action of terrestrial magnetism is almost neutralized by the opposition of the poles of the two needles, and hence the two needles swing freely under the influence of a galvanic current. [B.]—**Differential g.** A g. in which there is a double coil of wire surrounding the needle, so that two separate currents can be sent through the coils, and either in the same or in an opposite direction. In the latter case the degree of deflection of the needle measures the difference of intensity of the two currents. [B.]—**Dead-beat g.** A g. in which the vibrations of the needle come to rest quickly. [B.]—**Double g.** See *Helmholtz's g.*—**Gaugain's g.** A modification of the tangent g., in which the magnetic needle is suspended not at the centre of the vertical coil or band, but on a horizontal axis passing through the centre and at a distance from the latter equal to one half the radius of the vertical coil. [Prescott, Maxwell (B).]—**G. of two coils, Helmholtz's g.** A modification of Gaugain's g., in which the magnetic needle is suspended at a point equidistant between

two equal and vertical coils. [Maxwell (B).]—**Hirschmann's g.** A variety of vertical g. employed in medical electricity. [B, 24.]—**Intensity g.** See *Tension g.*—**Mirror g.** See *Reflecting g.*—**Quantity g.** See *Short coil g.*—**Reflecting g.** Of Sir William Thomson, a g. the needle of which is very short, and is fastened to a silvered glass mirror, suspended by a silk thread in the midst of a coil of wire. A current passing through the latter causes deflection of the needle, and hence of the mirror, which latter casts on a graduated arc a luminous reflection. The amount of movement of this reflected spot of light is a very delicate measure of the deflection of the mirror, and hence of the strength of the current. [B.]—**Short-coil g.** A g. with a short coil of wire; used to measure currents passing through circuits of small resistance. [B, 26.]—**Sine g.** Of Pouillet, a g. consisting of a vertical circle which can be placed at will in any meridian, and which bears a coil of wire, a horizontal graduated circle rigidly clamped to the former, and a magnetic needle revolving in a horizontal plane about an axis situated at the common centre of the two circles. A current sent through the wire coil, when the latter is placed in the magnetic meridian, causes a deflection of the needle through a certain arc, the sine of which is proportional to the strength of the current. [B.]—**Tangent g.** Ger., *Tangentenbussole.* A g. consisting of a very short and thick magnetic needle suspended by a thread so as to occupy the centre of a vertical ribbon of wire placed in the magnetic meridian. A current passing through the latter causes a deflection of the needle through a certain arc (measured on a horizontal circle), the tangent of which is proportional to the strength of the current. [B.]—**Tension g.** A g. in which there is a long wire coil; used to measure currents passing through circuits of great resistance. [B, 26.]—**Thomson's g.** See *Mirror g.*



THE SINE GALVANOMETER.

A, A, graduated dial; B, B, circular frame supporting a coil of wire; D, B, magnetic needle carrying a long pointer, O, D; C, C, graduated circle; F, index; H, spirit-level.

GALVANOPLASTY, n. Ga^{2}l'va^{2}n-o-pla^{2}s-ti^2. For deriv., see GALVANISM and PLASTIC. Fr., *galvanoplastie.* Ger., *Galvanoplastik.* The art of electro-plating or electrotyping. [B, 270 (*a*, 27).]

GALVANO-PUNCTURE, n. Ga^{2}l''va^{2}n-o-pu^{3}n^{2}k'tu^{2}r. Fr., *g.-p.* Ger., *Galvanopunktur.* See ELECTRO-PUNCTURE and ELECTROLYSIS.

GALVANOSCOPE, n. Ga^{2}l'va^{2}n-o-skop. From *Galvani*, and σκοπεῖν, to examine. Fr., *g.* Ger., *Galvanoskop.* An apparatus for indicating the occurrence and direction of a galvanic current; differing from a galvanometer in not showing the strength of the current. [A, 326 (*a*, 21); A, 385.]

THE GALVANOSCOPE.

GALVANOSCOPIC, adj. Ga^{2}l-va^{2}n-o-sko^{2}p'i^{2}k. Fr., *galvanoscopique.* Ger., *galvanoskopisch.* 1. Pertaining to the galvanoscope or to galvanoscopy. [*a*, 21.] 2. Serving as a galvanoscope (see *G.* FROG).

GALVANOSCOPY, n. Ga^{2}l-va^{2}n-o^{2}s'kop-i^2. Fr., *galvanoscopie.* Ger., *Galvanoskopie.* 1. The use of the galvanoscope. 2. Physiological or clinical examination by the application of galvanism. [A, 385.]

GALVANO-SURGERY, n. Ga^{2}l''va^{2}n-o su^{5}r'je^{2}r-i^2. From *galvanism* and *surgery.* The application of galvanism for surgical purposes. [B, 26.]

GALVANO-SUSCEPTIBILITY [Beard and Rockwell], n. Ga^{2}l'''va^{2}n-o-su^{3}s-se^{2}p''ti^2-bi^{2}l'i^{2}t-i^2. From *galvanism* and *susceptibility.* "Susceptibility to the galvanic current." [B, 26.]

GALVANO-THERAPEUTICS, GALVANO-THERAPY, n's. Ga^{2}l''va^{2}n-o-the^{2}r-a^3-pu^{2}t'i^{2}ks, -the^{2}r'a^{3}pi^2. Fr., *galvanothérapie.* See ELECTRO-THERAPEUTICS.

GALVANOTONIC, adj. Ga^{2}l-va^{2}n-o-to^{2}n'i^{2}k. Fr., *galvanotonique.* See ELECTROTONIC.

GALVANOTONUS (Lat.), n. m. Ga^{2}l(ga^{3}l)-va^{2}n(va^{3}n)-o^{2}t'o^{2}n-u^{3}s(u^{4}s). From *Galvani* (see GALVANISM), and τόνος, tension. 1. See ELECTROTONUS. 2. Of Pflüger, the condition of tetanic contraction in which a muscle remains for some time after a galvanic current applied to its motor nerve is closed. [Landois (K).]

GALVANOTROPISM [Verworn], n. Ga^{2}l-va^{2}n-o^{2}t'rop-i^{2}z'm. From *Galvani* (see GALVANISM), and τροπή, a turning. 1. The property possessed by the *Protozoa* of collecting at one of the poles of a galvanic current. ["Nature," Oct. 3, 1889, p. 542 (L).] 2. The phenomena observed in plants under the influence of galvanism, *e. g.*, the curvature produced in a root when placed vertically between two electrodes. [Vines (*a*, 35).]

GALVESIA (Lat.), n. f. Ga^{2}l(ga^{3}l)-ve(wa)'zi^2(si^2)-a^3. Fr., *galvézie.* Of Jussieu, a genus of the *Scrophulariaceæ.* [B, 42, 121 (*a*, 24).]—**G. punctata.** Fr., *galvézie ponctuée.* A species found in Peru; the leaves are aromatic, carminative, and stomachic. [B, 173 (*a*, 24).]

GÁMABHÁRI (Sanscr.), n. The *Gmelina arborea.* [A, 479 (*a*, 21).]

GAMANDER (Ger.), n. Ga^3-ma^{3}n'de^{2}r. The genus *Teucrium.* [B, 121, 180 (*a*, 24).]—**Aechter G.** The *Teucrium chamædrys.* [B, 180 (*a*, 24).]—**Canadischer G.** The *Teucrium canadense.* [B, 180 (*a*, 24).]—**Cretischer G.** The *Teucrium creticum.* [B, 180 (*a*, 24).]—**Edler G.** The *Teucrium chamædrys.* [B, 180 (*a*, 24).]—**Gelber G.** The *Teucrium flavum.* [B, 180 (*a*, 24).]—**Gelblicher G.** The *Teucrium flavescens.* [B, 180 (*a*, 24).]—**Gemeiner G.** The *Teucrium chamædrys.* [B, 180 (*a*, 24).]—**Goldgelber G.** The *Teucrium aureum.* [B, 180 (*a*, 24).]—**Köpfiger G.** The *Teucrium capitatum.* [B, 180 (*a*, 24).]—**Starkriechender G.** The *Teucrium scordioides.* [B, 180 (*a*, 24).]—**Strauchiger G.** The *Teucrium fruticans.* [B, 180 (*a*, 24).]—**Wilder G.** The *Veronica chamædrys.* [B, 180 (*a*, 24).]

GAMANDER-EHRENPREIS (Ger.). n. Ga^3-ma^{3}n''der-ar'-e^{2}n-pris. The *Veronica chamædrys.* [B, 180 (*a*, 24).]—**Breitblättriger G.-E., Edler G.-E., Wahrer G.-E.** The *Veronica latifolia.* [B, 180 (*a*, 24).]

GAMANDERLEIN (Ger.), n. Ga^3-ma^{3}n'de^{2}r-lin. The *Teucrium chamædrys.* [B, 180 (*a*, 24).]—**Kleines G.** The *Veronica chamædrys.* [B, 180 (*a*, 24).]

GAMANDRÆ (Lat.), n. f. pl. Ga^{2}m(ga^{3}m)-a^{2}n(a^{3}n)'dre(dra^3-e^2). Gamboge. [B, 180 (*a*, 24).]—**Gummi g.** See *G.*

GAMARDE (Fr.), n. Ga^3-ma^{3}rd. A village in the department of Landes, France, where there are springs containing sodium and magnesium chlorides, calcium carbonate and sulphate, and free carbon dioxide and hydrogen sulphide. [L, 87, 105 (*a*, 14).]

GAMASS, n. Ga^3-ma^{3}s'. The *Camassia esculenta.* [B, 19, 121 (*a*, 24).]

GAMASUS (Lat.), n. Ga^{2}m(ga^{3}m)'a^{2}s(a^{3}s)-u^{3}s(u^{4}s). Fr., *gamase.* A genus of *Gamasidæ*, several species of which are parasitic upon mammals; the *Gamasidæ* or *Gamasina* (Fr., *gamasidés*) are a family of the *Acarina.* [L, 196, 321.]

GAMBA (Lat.), n. f. Ga^{2}m(ga^{3}m)'ba^3. Gr., καμπή. A hoof. [A, 312 (*a*, 21).]

GAMBARUS (Lat.), n. m. Ga^{2}m(ga^{3}m)'ba^{2}r(ba^{3}r)-u^{3}s(u^{4}s). See ASTACUS *fluviatilis.*

GAMBAS-KANONG, n. In Sunda, the *Cardiopteris Rumphii.* [B, 121 (*a*, 24).]

GAMBEER, n. Ga^{2}m'ber. See CATECHU (2d def.).

GAMBICUS (Lat.), n. m. Ga^{2}mb(ga^{3}mb)'i^{2}k-u^{3}s(u^{4}s). An old name for various species of *Garcinia* yielding gamboge.—**Succus gambici.** See GAMBOGE.

GAMBIER (Ger.), n. Ga^{3}m-ber'. See CATECHU (2d def.).

GAMBING, n. In Java, manna. [B, 121 (*a*, 24).]

GAMBINUR, n. In Sumatra, the *Dacrydium elatum.* [B, 121 (*a*, 24).]

GAMBIR, n. Ga^{2}m'ber. See CATECHU (2d def.).—**Blockg'** (Ger.). G. in solid blocks. [B, 270.]—**G. catechu, G. cubique** (Fr.). See CATECHU (2d def.).—**Würfelg'** (Ger.). G. in porous cubes. [B, 270.]

GAMBIRSTRAUCH (Ger.), n. Ga^{3}m-ber'stra^3-u^{4}ch^2. The genus *Uncaria.* [B, 180 (*a*, 24).]—**Aechter G.** The *Uncaria gambir.* [B, 180 (*a*, 24).]—**Saurer G.** The *Uncaria acida.* [B, 180 (*a*, 24).]

GAMBOA (Port.), n. Ga^{3}m-bo'a^3. A variety of sweet quince. [B, 121 (*a*, 24).]

GAMBODIC ACID, n. Ga^{2}m-bo^{2}d'i^{2}k. Fr., *acide gambodique.* An acid, $C_{65}H_{35}O_{12}$, obtained as a yellow resin from gamboge and resembling cambogic acid in its properties. [L, 41, 49 (*a*, 14).]

GAMBOGE, n. Ga^{2}m-boj'. Lat., *cambogia* [U. S. Ph., Br. Ph.], *gambogia* [U. S. Ph., 1870], *gambogium, gutti* [Ger. Ph., Hung. Ph.], *gummi-resina gutti* [Russ. Ph.] (seu *gutta* [Dan. Ph., Finn. Ph., Swed. Ph.]), *gummi guttæ* [Belg. Ph.]. Fr., *gomme-gutte* [Fr. Cod.]. Ger., *Gummigutt, Gummiharz, Gutti* [Ger. Ph.]. It., *gamma-gotta.* Sp., *gutagamba* [Sp. Ph.], *gomazuta.* Roum., *gumma gutta* [Roum. Ph.]. The *guttagemou* of the old pharmacopœias; a gum resin consisting of the hardened juice of *Garcinia Hanburii*, also of *Garcinia morella* and *Garcinia pictoria.* It occurs in rolls (*pipe g.*), and in cakes and amorphous masses of a dirty orange-color externally, breaking with a conchoidal fracture and affording a brilliant yellow powder. It contains 25 to 30 per cent. of gum and 70 to 75 of resin (cambogic acid). It is a powerful hydragogue cathartic and has been used as a diuretic. [B, 5, 18, 77 (*a*, 24).]—**American g.** The product of *Vismia guianensis.* [B, 185 (*a*, 24).]—**Cake g.** Ger., *Schollengutti.* Lump g., g. in irregular masses, mixed with impurities, less dense and less brittle than pipe g. and breaking with a dull fracture. [B, 5 (*a*, 27).]—**Ceylon g.** The product of *Hebradendron cambogioides.* It resembles coarse g., with which it is identical in composition. In Ceylon it is employed as a purgative. [B, 5 (*a*, 24).]—**Coarse g.** Cake g. mixed with sticks and other impurities. [B, 5 (*a*, 24).]—**Compound pill of g.** See *Pilula* CAMBOGIÆ *composita.*—**G. butter.** An oil obtained from the fruit of *Garcinia pictoria*; used in place of butter, and as a lamp-oil. [B, 185 (*a*, 35).]—**G. family.** The *Guttiferæ.* [B, 185 (*a*, 24).]—**Lump g.** See *Cake g.*—**Pipe g.** Ger., *Röhrengutti.* The best g., occurring in commerce in cylindrical rolls. [B, 5 (*a*, 24).]

GAMBOGE-TREE, n. Ga^{2}m-boj'tre. The *Garcinia Hanburii.* [B, 275 (*a*, 24).]—**American g.-t.** The *Vismia guianensis.* [B, 275 (*a*, 24).]—**Ceylon g.-t.** The *Hebradendron cambogioides.* [B, 5, 185 (*a*, 24).]

GAMBOGIA (Lat.), n. f. Ga^{2}m(ga^{3}m)-bo'ji^2(gi^2)-a^3. See CAMBOGIA and GAMBOGE.

GAMBOGIC ACID, n. Ga^{2}m-boj'i^{2}k. Fr., *acide gambogique.* Ger., *Gambogiasäure.* See CAMBOGIC ACID.

GAMBOGIOIDES (Lat.), adj. Ga^{2}m(ga^{3}m)-boj(bog)-i^2-o(o^2)-i(e)'dez(das). From *Gambogia*, and εἶδος, form. Resembling the *Gambogia*; a botanical specific name. [B.]

GAMBOGIUM (Lat.), n. n. Ga^{2}m(ga^{3}m)-boj(bog)'i^2-u^{3}m(u^{4}m). See GAMBOGE.—**G. verum.** The product of *Garcinia Hanburii.* [B, 5, 18 (a, 24).]

GAMBOSUS (Lat.), adj. Ga^{2}m(ga^{3}m)-bos'u^{3}s(u^{4}s). From *gamba*, a hoof. Having a swelling near the hoof. [A, 312 (a, 21).]

GAMELLEIRA (Port.), n. Ga^3-me^{2}l-la-e'ra^3. See *Ficus doliaria.* [a, 14.]

GAMENOMANIA (Lat.), n. f. Ga^{2}m(ga^{3}m)-e^{2}n-o(o^3)-man-(ma^{3}n)'i^2-a^3. From γαμεῖν, to marry, and μανία, frenzy. Fr., *gaménomanie.* See GAMOMANIA.

GAMETA (Lat.), n. f. Ga^{2}m(ga^{3}m)'e^{2}t-a^3. See GAMETE.

GAMETANGEIA (Lat.), n. n. pl. Ga^{2}m(ga^{3}m)-e^{2}t-a^{2}n(a^{3}n^2)-ji'(ge^2-e')-a^3. From γάμος, a wedding, and ἀγγεῖον, a vessel. The sexual organs of *Ectocarpus siliculosus*, *Scytosiphore*, and other *Phæosporeæ*; now regarded merely as multilocular sporangeia, the zoospores they contain being gametes. [B, 77 (a, 24).]

GAMETE, n. Ga^{2}m'et. Lat., *gameta* (from γαμέτης, a spouse). Fr., *g.* Ger., *G.* One of the two similar or dissimilar reproductive cells, which by their fusion produce a new organism. [B, 77, 291 (a, 24); W. R. McNab, "Sci. Proc. of the Roy. Dublin Soc.," July, 1885, p. 451; T. J. Parker, "Proc. of the Australas. Assoc. for the Adv. of Sci.," 1888, p. 338 (J).] Cf. COPULATION (2d def.).—**Aplano-g.** A g. without cilia; a non-motile g. [B, 77 (a, 24).]—**Female g.**, **Macrog'.** See OVULE.—**Male g.**, **Microg'.** See SPERMATOZOOID.—**Plano-g.** A g. with cilia; a motile g. [B, 77 (a, 24).]

GAMETOPHORE, n. Ga^{2}m-et'o-for. From γαμέτης, a spouse, and φορεῖν, to bear. Of W. R. McNab, a plant that bears the gametangeia. ["Sci. Proc. of the Roy. Dublin Soc.," July, 1885, p. 451 (a, 24).]

GAMIC, adj. Ga^{2}m'i^{2}k. From γάμος, a wedding. Sexual, as opposed to parthenogenetic. [J.]

GAMILLE (Fr.), n. Ga^3-mel-y'. The *Caltha palustris.* [B, 121 (a, 24).]

GAMMACISMUS (Lat.), n. Ga^{2}m(ga^{3}m)-ma^3-si^{2}z(ki^{2}s)'mu^{3}s-(mu^{4}s). Inability to pronounce the letters *g* and *k.*

GAMMAROGRAPHY, n. Ga^{2}m-a^{2}r-o^{2}g'ra^{2}f-i^2. From κάμμαρος, a crab, and γράφειν, to write. Fr., *gammarographie.* The zoology of the *Crustacea.* [L, 41.]

GAMMARUS (Lat.), n. m. Ga^{2}m(ga^{3}m)'ma^{2}r(ma^{3}r)-u^{3}s(u^{4}s). Gr., κάμμαρος. Fr., *gammare.* See ASTACUS *fluviatilis.* The *Gammaridæ* or *Gammarinæ* (Fr., *gammarides, gammariens*) are a family of amphipodous crustaceans. [L, 87, 180.]

GAMMATUS (Lat.), adj. Ga^{2}m(ga^{3}m)-ma(ma^3)'tu^{3}s(tu^{4}s). Shaped like the Greek letter Γ. [A, 318.]

GAMMAUT (Fr.), n. Ga^{2}m-mo. A curved, probe-pointed bistoury. [A, 518.]

GAMMOÏDE (Fr.), n. Ga^{3}m-mo-ed. From Γ, the third letter of the Greek alphabet, and εἶδος, form. A surgical instrument having the shape of the Greek letter Γ. [L, 41.]

GAMOGASTROUS, adj. Gam-o-ga^{2}s'tru^{3}s. From γάμος, a wedding, and γαστήρ, the belly. Fr., *gamogastre.* Ventrally united (said of a syncarpous pistil when its union is incomplete and takes place by the ovaries alone, leaving the styles and stigmata free). [B, 77 (a, 24).]

GAMOGENESIS (Lat.), n. f. Ga^{2}m(ga^{3}m)-o(o^3)-je^{2}n(ge^{2}n)'e^{2}s-i^{2}s. Gen., *-genes'eos* (*-gen'esis*). From γάμος, a wedding, and γένεσις, an origin. The process of sexual reproduction; sexual generation; that mode of generation in which the development of the germ into an independent organism is brought about by the influence of living matter different from the germ, and, in the animal kingdom, proceeding from another individual. [A, 12, 17.]

GAMOGENETIC, adj. Ga^{2}m-o-je^{2}n-e^{2}t'i^{2}k. From γάμος, a wedding, and γένεσις, an origin. Pertaining to gamogenesis.

GAMOMANIA (Lat.), n. f. Ga^{2}m(ga^{3}m)-o(o^3)-man(ma^{3}n)'i^2-a^3. From γάμος, a wedding, and μανία, frenzy. Fr., *gamomanie.* Ger., *Eheeuth.* An insane desire to marry. [D.]

GAMOMORPHISM, n. Ga^{2}m-o-mo^{2}rf'i^{2}z'm. From γάμος, a wedding, and μορφή, form. Sexual maturity; puberty.

GAMOPETALÆ (Lat.), n. f. pl. Ga^{2}m(ga^{3}m)-o(o^3)-pe^{2}t'a^{2}l(a^{3}l)-e(a^3-e^2). From γάμος, a wedding, and πέταλον, a leaf. Fr., *gamopétales.* Of Brongniart, a series of the *Angeiospermæ*, including the *Campanulaceæ, Asteroideæ, Loniceroideæ, Coffeineæ, Asclepiadineæ, Convolvulineæ, Asperifolieæ, Solanineæ, Personeæ, Selaginoideæ, Verbenineæ, Primulineæ, Ericoideæ*, and *Diospyroideæ*; of Lun, a division including the *Ligustrinæ, Rubiacinæ, Contortæ, Tubifloræ, Labiatifloræ, Myrsineæ, Styracineæ, Ericineæ, Campanulinæ, Compositæ*, and *Aggregatæ*; of Eichler and of Sachs, a class including nine orders (cohorts), three of the *Isocarpeæ* and six of the *Anisocarpeæ*, or (Bentham and Hooker) the *Inferæ, Heteromeræ*, and *Bicarpellatæ.* In all classifications, the *G.* comprise all dicotyledonous plants with double perianth, in which the inner segment of the latter consists of petals more or less united into a single piece. [B, 42, 170, 291 (a, 24).]

GAMOPETALIA (Lat.), n. f. Ga^{2}m(ga^{3}m)-o(o^3)-pe^{2}t-al(a^{3}l)'-i^2-a^3. The condition of being gamopetalous. [B.]

GAMOPETALOUS, adj. Ga^{2}m-o-pe^{2}t'a^{2}l-u^{3}s. Lat., *gamopetalus* (from γάμος, a wedding, and πέταλον, a leaf). Fr., *gamopétale.* Ger., *verwachsenkelchblättrig.* Having the petals more or less united; belonging to the *Gamopetalæ.* [B, 291 (a, 24).]

GAMOPHYLLIA (Lat.), n. f. Ga^{2}m(ga^{3}m)-o(o^3)-fi^{2}l(fu^{6}l)'li^2-a^3. Fr., *gamophyllie.* Ger., *Gamophyllie.* The condition of being gamophyllous. [B.]

GAMOPHYLLOUS, adj. Ga^{2}m-o-fi^{2}l'u^{3}s. Lat., *gamophyllus* (from γάμος, marriage, and φύλλον, a leaf). Fr., *gamophylle.* Ger., *verbundenblättrig, verwachsenblättrig.* Having the sepals or petals of the floral whorls more or less united. [B, 1, 123, 291 (a, 24).]

GAMOSEPALIA (Lat.), n. f. Ga^{2}m(ga^{3}m)-o(o^3)-se^{2}p-al(a^{3}l)'i^2-a^3. Fr., *gamosépalie.* Ger., *Gamosepalie.* The condition of being gamosepalous. [B.]

GAMOSEPALOUS, adj. Ga^{2}m-o-se^{2}p'a^{2}l-u^{3}s. Lat., *gamosepalus* (from γάμος, marriage, and *sepalum* [see SEPAL]). Fr., *gamosépale.* Ger., *verwachsenblättrig.* Having the sepals more or less united. [B, 1, 123, 291 (a, 24).]

GAMOSTYLOUS, adj. Ga^{2}m-o-stil'u^{3}s. Lat., *gamostylus* (from γάμος, marriage, and στῦλος, a pillar). Fr., *gamostyle.* Ger., *verwachsengriffelig.* Having the styles more or less united (said of a flower). [B, 38 (a, 14).]

GAMOTE, n. See CYMOPTERUS *Fendleri.*

GAMPHÆ (Lat.), **GAMPHELÆ** (Lat.), n's f. pl. Ga^{2}m-(ga^{3}m)'fe(fa^3-e^2), ga^{2}m(ga^{3}m)-fe(fa)'le(la^3-e^2). Gr., γαμφαί, γαμφηλαί. Ger., *Kinnbacken.* The jaw bones or the cheeks (mostly of the lower animals). [A, 387; L, 50 (a, 14).]

GAMPSONYX (Lat.), adj. Ga^{2}mps(ga^{3}mps)'o^{2}n-i^{2}x(u^{6}x). Gen., *-on'ychos* (*-is*). From γαμψός, curved, and ὄνυξ, a claw. Having crooked claws. [L, 94.]

GAMSWURZ (Ger.), n. Ga^{3}ms'vurts. The *Primula auricula.* [B, 180 (a, 24).]

GAMUTE (Mal.), n. The *Arenga saccharifera.* [B, 38 (a, 14).]

GANACHE (Fr.), **GANASSE** (Ger.), n's. Ga^{3}n-a^{3}sh, -a^{3}s'se^2. The chin of a soliped. [A, 526.]

GANASUR, n. In Bombay, the root-bark of *Croton oblongifolia.* [B, 289; "Proc. of the Amer. Pharm. Assoc." (a, 14).]

GANCHE (Fr.), n. Ga^{3}n^{2}sh. The *Iris pseudacorus.* [B, 121, 173 (a, 24).]

GANDA-KI-LAKARI (Duk.), n. The *Acorus calamus.* [A, 479 (a, 21).]

GANDAR (Hind.), n. The *Andropogon muricatus.* [B, 172 (a, 24).]

GANDASULI, n. In the East Indies, the genus *Hedychium.* [B, 121 (a, 24).]

GANDATVAKA (Sanscr.), n. The *Cinnamomum cassia.* [A, 479 (a, 21).]

GANDA UMBÁRA (Hind.), n. The *Ficus oppositifolia.* [A, 479 (a, 21).]

GANDBEL (Hind., Beng.), n. The *Andropogon schœnanthus.* [B, 173 (a, 24).]

GANDELBEERE (Ger.), n. Ga^{3}nd'e^{2}l-bar-e^2. The *Vaccinium myrtillus* and its fruit. [B, 180 (a, 24).]

GANDERGOOSE, GANDER-GOSSES, n's. Ga^{2}nd'u^{6}r-gus, -go^{2}s-e^{2}z. The *Orchis mascula* and the *Orchis morio.* [A, 505 (a, 21); B, 275 (a, 24).]

GANDESA (Sp.), n. Ga^{3}n-da'sa^3. A place in the province of Tarragona, Spain, where there is a hot sulphurous spring. [L, 41, 49 (a, 14).]

GANDHA BENA (Beng.), n. The *Andropogon citratus.* [A, 479 (a, 21).]

GANDHABIROZÁH (Hind.), n. The *Pinus longifolia.* [A, 479 (a, 21).]

GANDHA MAOLI (Sanscr.), n. The *Curcuma zerumbet.* [A, 479 (a, 21).]

GANDHA MARAJÁRA (Sanscr.), n. The *Viverra civetta.* [A, 479 (a, 21).]

GANDHANA KULI (Sanscr.), n. The *Tylophora asthmatica.* [A, 479 (a, 21).]

GANDHARASAHA (Sanscr.), n. The *Balsamodendron myrrha.* [A, 479 (a, 21).]

GANDHÁTI KIRÁMÁRA (Bomb.), n. The *Aristolochia bracteata.* [A, 479 (a, 21).]

GANDHISA (Hind.), n. The *Andropogon laniger.* [A, 479 (a, 21).]

GANDIGOSLING, n. Ga^{2}nd'i-go^{2}z-li^{2}n^2. The *Orchis mascula.* [A, 505 (a, 21).]

GANDIO, n. The *Digitalis purpurea.* [B, 121, 173 (a, 24).]

GÁNDOLA (Sp.), n. Ga^{3}n'do-la^3. Fr., *gandole.* The *Basella rubra.* [B, 121 (a, 24).]

GANDOO (Tamil), n. The *Entada scandens.* [B, 121 (a, 24).]

GANDU, GANDUL, n's. In the West Indies, the *Cajanus flavus.* [B, 121 (a, 24).]

GANELLE (Fr.), n. Ga^3-ne^{2}l. The *Senecio jacobæa, Tanacetum vulgare*, and other yellow-flowered plants. [B, 121 (a, 24).]

GANG (Ger.), n. Ga^{3}n^2. See CANAL, DUCT, and GAIT.—**Abführungsg'.** See *Excretory* DUCT.—**Absonderungsgänge.** See *Secretory* DUCTS.—**Accessorische Bauchspeichelg'.** See *Accessory pancreatic* DUCT.—**Aderg'.** See DUCTUS *venosus.*—**Aeusserer Bogeng'.** See *External semicircular* CANAL.—**Albuming'.** See under ALBUMIN.—**Ambulacralgänge.** See *Ambulacral* CANALS.

GANGAME (Lat.), **GANGAMON** (Lat.), n's f. and n. Ga^{2}n^2-(ga^{3}n^2)'ga^{2}m(ga^{3}m)-e(a), -o^{2}n. Gr., γαγγάμη, γάγγαμον. 1. The umbilical region. [A, 387.] 2. An old name for the omentum. [L, 41.]

GANGANDHOOL (Hind.), n. The *Pandanus odoratissimus*. [B, 172 (α, 24).]

GANGART (Ger.), n. Ga^{3}n^2'a^{3}rt. See GAIT.—**Spastische G.** A spastic gait. [α, 34.]

GANG-FLOWER, n. Ga^{2}n^2'flu^5-u^4-u^{5}r. The *Polygala vulgaris*. [B, 275 (α, 24).]

GANGLIAC, GANGLIAL, GANGLIAR, adj's. Ga^{2}n^2'gli^2-a^{2}k, -a^{2}l, -a^{3}r. Lat., *gangliaris* (from γάγγλιον, see GANGLION). Constituting, pertaining to, or resembling a ganglion.

GANGLIASTHENIA (Lat.), n. f. Ga^{2}n^2(ga^{3}n^2)-gli^2-a^{2}s(a^{3}s)-the^{2}n-i(e)'a^3. From γάγγλιον (see GANGLION), and ἀσθένεια, weakness. A diminution of the power which the ganglia have over the nutrition of the sympathetic nerve. [H. C. Wyman, "Mich. Med. News," Oct. 25, 1882, p. 313.]

GANGLIATED, adj. Ga^{2}n^2'gli^2-at-e^{2}d. 1. Provided with ganglia. 2. Intermixed or intertwined. [C.]

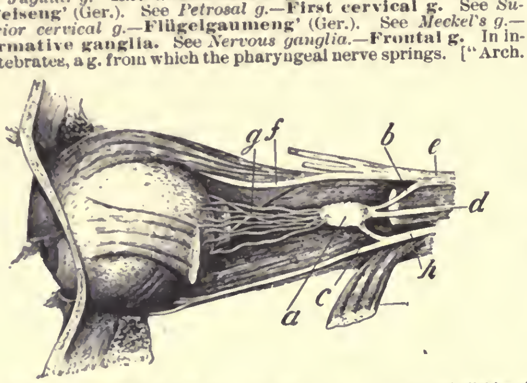
GANGLIFORM, adj. Ga^{2}n^2'gli^2-fo^{2}rm. Lat., *gangliformis*. Fr., *gangliforme*. See GANGLIOID.

GANGLIITIS (Lat.), n. f. Ga^{2}n^2(ga^{3}n^2)-gli^2-i(e)'ti^{2}s. Gen., *-it'idos (-is)*. Fr., *gangliïte*. Ger., *Ganglienentzündung*. Inflammation of a nervous or lymphatic ganglion. [E.]—**G. centralis, G. medullaris.** Of W. Nissen, cholera of a severe form; supposed by him to be due to inflammation of the inner portion of the ganglia of the solar plexus, and especially of the hepatic plexus. [A, 322.]—**G. neurilemmatos, G. peripherica.** Of W. Nissen, mild cholera; supposed by him to be due to inflammation of the sheaths of the nervous structures mentioned under g. medullaris. [A, 322.]

GANGLIOCARCINIE [Piorry] (Fr.), n. Ga^{3}n-gle-o-ka^{3}r-se-ne. Cancer of the lymphatic ganglia. [L, 41, 82.]

GANGLIOCYTIN, n. Ga^{2}n^2-gli^2-o^{2}s'i^{2}t-i^{2}n. See NUCLEIN.

GANGLIOID, adj. Ga^{2}n^2'gli^2-oid. Gr., γαγγλιώδης (from γάγγλιον, a ganglion, and εἶδος, resemblance). Lat., *gangliodes*. Fr., *ganglioïde*. Ger., *ganglienähnlich*. Resembling or pertaining to a ganglion. [A, 387.]



GANGLIOLITHIE [Piorry] (Fr.), n. Ga^{3}n^2-gle-o-le-te. From γάγγλιον, a ganglion, and λίθος, a stone. A calculus of a lymphatic ganglion. [L, 41, 82.]

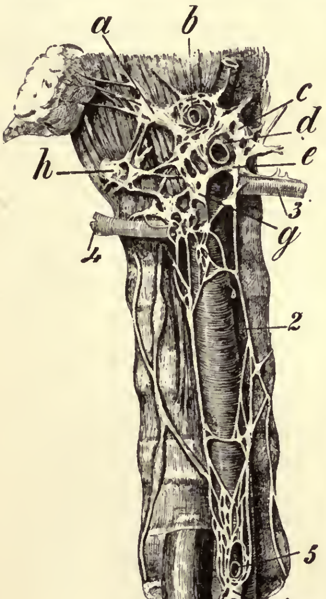
GANGLIOLUM (Lat.), n. n. Ga^{2}n^2(ga^{3}n^2)-gli(gli^2)'o^{2}l-u^{3}m(u^{4}m). A little ganglion. [α, 14.]—**G. coccygeum.** See *Coccygeal* GLAND.—**Gangliola intermedia trunci cervicalis nervi sympathici.** See GANGLIA *intermedia trunci cervicalis*.—**Gangliola plexuum vesicarum seminalium.** Swellings, possibly ganglionic, in the plexus vesiculæ seminalis. [L, 7 (α, 29).]—**G. tympanicum.** See GLANDULA *tympanica*.—**G. tympanicum superius.** An anomalous g. on the small superficial petrosal nerve. [L, 332.]

GANGLIOMA (Lat.), n. n. Ga^{2}n^2(ga^{3}n^2)-gli^2-om'a^3. Gen., *-om'atos (-is)*. A tumor of a lymphatic gland. [E.]

GANGLION (Lat.), n. n. Ga^{2}n^2(ga^{3}n^2)'gli^2-o^{2}n. Gr., γάγγλιον. Fr., *g*. Ger., *Ueberbein* (1st def.), *Sehnenbalg* (1st def.), *Ganglion* (pl., *Ganglien* [2d def.]), *Nervenknoten* (2d def.). It., *ganglio*. Sp., *g*. 1. An indolent, cyst-like enlargement of the sheath of a tendon, most commonly observed at the wrist; also an enlarged bursa mucosa. [A, 301; A, 364 (α, 21); E.] 2. A mass of nervous tissue which receives, records, sends out, or originates nervous impulses, or gives rise to psychical activity, or combines all these functions. Anatomically, it is a more or less distinct mass of nervous matter, consisting of nerve-cells and nerve-fibres, the cells and fibres being intimately associated or directly continuous. In its most comprehensive sense the term includes the brain and the spinal cord as well as the ganglia of the cerebro-spinal and sympathetic nerves. It is also frequently used to designate the special well-defined masses of ganglionic nervous tissue in the central nervous system, such as the cerebral hemispheres (hemispheral ganglia), the basal ganglia (striata, thalami or optic lobes), and other masses frequently also called nuclei, such as the g., or nucleus, of Sömmerring, of Luys, etc. This term is used frequently as a synonym of nerve-centres. A g. has, however, an anatomically definite individuality, while a nerve-centre may not have, although its function may be very distinct; *e. g.*, the entire spinal cord or cerebral hemisphere might properly be designated as either a g. or a nerve-centre, but each possesses many subordinate centres distinct physiologically, although anatomically continuous. [J, 55, 112, 124, 183.] 3. A nodose enlargement of the mycelium in *Fungi*. [B, 121 (α, 24).] 4. A lymphatic node.—**Abdominal ganglia.** Lat., *ganglia abdominalia*. Ger., *Bauchganglien*. 1. See *Semilunar ganglia*. 2. All the ganglia contained in the abdominal cavity. [L.]—**Adenoid g.** A gland-like body, such as the spleen, thyreoid, etc. [J.] Cf. *Blood* GLANDS.—**Andersch's g.** See *Petrous g.*—**Annular g.** See ANNULUS *gangliformis*.—**Anterior cerebral g.** Lat., *g. cerebrale* (seu *cerebri*) *anterius* (seu *anticum*), *g. cerebri magnum anticum*. 1. The corpus striatum. 2. The corpus striatum and the corpus lenticulare regarded as a whole. [L, 31, 332.]—**Anterior g. (of the optic thalamus).** The anterior tubercle of the optic thalamus. [I, 56.]—**Arnold's (auricular) g.** See *Otic g.*—**Auditory g.** See TUBERCULUM *acusticum*.—**Auerbach's ganglia.** See *Ganglia of Auerbach*.—**Auricular g.** See *Otic g.*—**Axillary ganglia.** See *Axillary* GLANDS.—**Azygous g.** 1. A g. which exists singly, not as one of a pair. 2. The g. opposite the coccyx, in which the two portions of the sympathetic nerve are united.—**Basal g.** See *Great basal ganglia of the brain*.—**Basal optic g.** Lat., *g. basale opticum, g. post optici*. Ger., *basales Opticusg'*. Of Meynert, a collection of gray matter below the third ventricle, which begins above the optic commissure and extends over the optic tract to the posterior border of the tuber cinereum. He regards the g. as a part of the tuber, but does not believe with Luys that the opposite ganglia touch. ["Arch. f. Psych.," 1877, p. 492 (K).]—**Bauchganglien** (Ger.). See *Abdominal ganglia*.—**Bauchmarksg'** (Ger.). An enlargement in the ventral nervous system found in the *Crustacea*. ["Arch. f. Anat. u. Phys.," 1857, p. 480 (α, 29).]—**Bidder's ganglia.** See *Ganglia of Bidder*.—**Bochdalek's g.** Lat., *g. Bochdalekii*. See *Supramaxillary* PLEXUS.—**Branchial ganglia.** In the true molluscan type, the third and most persistent pair of ganglia. [L, 147 (α, 21).]—**Buccal g.** In the *Mollusca*, a g. situated at the point where the œsophagus joins the buccal mass. [L, 322.]—**Cardiac g. (of Wrisberg).** Lat., *g. cardiacum* (*Wrisbergii* [seu *magnum*]). Fr., *g. cardiaque*. Ger., *Herzg'*. A small g. to which the fibres of the superficial cardiac plexus converge. It is sometimes absent and often is represented by two or more smaller ganglia. [L, 31, 142, 332.] Cf. *Inferior* and *Superior cardiac ganglia*.—**Carotid g.** Lat., *g. caroticum, g. cavernosum*. Ger., *carotisches G*. A small ganglioid swelling beneath the carotid artery, in the lower part of the cavernous sinus; formed by filaments from the carotid plexus. [A, 478 (α, 17); L, 332.]—**Cephalic ganglia.** Fr., *g. céphalique*. See *G. of Ribes*. 2. In insects, large ganglia which distribute filaments to the eyes and to the antennæ. [L, 147 (α, 21).]—**Cephalic ganglia of the sympathetic.** The ophthalmic, otic, sphenopalatine, and submaxillary ganglia. [L.]—**Cerebral ganglia.** Lat., *g. cerebri*. Fr., *g's cérébraux*. Ger., *Ganglien des Gehirns*. 1. In the *Mollusca*, a pair of ganglia connected by a commissure situated above the œsophagus. [L, 147.] 2. In the pl., the great cerebral centres. [L.]—**Cervical ganglia.** Lat., *ganglia cervicalia*. See *Inferior cervical g.*, *Middle cervical g.*, and *Superior cervical g.*—**Cervical g. of the pneumogastric nerve.** See *Inferior g. of the pneumogastric nerve*.—**Cervical g. of the uterus.** Lat., *g. cervicale uteri*. A large plexus of nerves formed by filaments from the hypogastric plexus, the three upper sacral ganglia, and the first, second, and third sacral nerves. It sends branches to the whole uterus, but especially to the cervix. [A, 22.]—**Cervicouterine g.** The cervical g. of the uterus. [B.]—**Ciliary g.** Fr., *g. ciliaire*. Ger., *Ciliarg'*. See *Ophthalmic g.*—**Cloquet's g.** Lat., *g. Cloquetii*. See *Naso-palatine* PLEXUS.—**Coccygeal g.** See *Coccygeal* GLANDS.—**Cochlear g.** See *G. spirale*.—**Cœliac g.** Lat., *g. cœliacum*. See *Cœliac* PLEXUS and *Semilunar ganglia*.—**Compound g.** A swelling produced by dilatation and partial or complete obliteration of the sheaths of several tendons, forming a thickened sac that contains colloid material and white bodies like melon-seeds or grains of rice. [α, 34.]—**Compound palmar g.** A compound g. connected with the flexor tendons as they pass under the annular ligament at the wrist. [α, 34.]—**Corti's g.** Lat., *g. Cortii*. See *G. spirale*.—**Diaphragmatic g.** Lat., *g. diaphragmaticum*. Fr., *g. diaphragmatique*. 1. A small g. connected with the semilunar g. at the point where the latter joins the phrenic nerve. It occurs on the right side only, and on the lower surface of the diaphragm. It sends branches to the vena cava, the suprarenal

body, and the hepatic plexus. [A, 478 (a, 17).] 2. See *Phrenic g.* —**Diffuse g.** Fr., *g. diffus.* See *Compound g.*—**Doppelg'** (Ger.). A double g. [a, 29.]—**Dorsal ganglia.** Lat., *ganglia dorsalia.* See *Thoracic ganglia.*—**Ehrenritter's g.** Lat., *g. Ehrenritterii.* See *Jugular g.*—**Extraventricular g.** See *Lenticular* NUCLEUS. —**Felseng'** (Ger.). See *Petrosal g.*—**First cervical g.** See *Superior cervical g.*—**Flügelgaumeng'** (Ger.). See *Meckel's g.*—**Formative ganglia.** See *Nervous ganglia.*—**Frontal g.** In invertebrates, a g. from which the pharyngeal nerve springs. ["Arch.

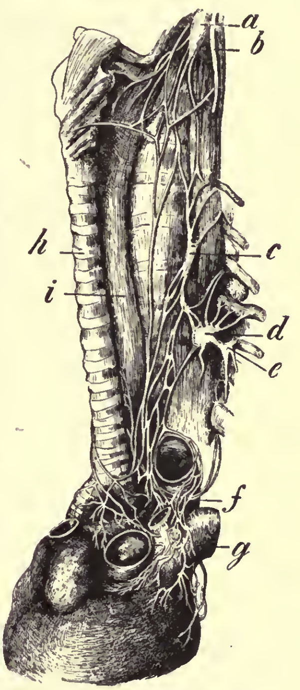
a, the ciliary ganglion; *b*, its long root; *c*, its short root; *d*, the ophthalmic division of the fifth nerve; *f*, the nasal nerve; *g*, the ciliary nerves; *h*, the third nerve; *i*, the external rectus muscle.



f. Anat. u. Phys.," 1855 (a, 29).]—**Fusiform g.** Lat., *g. fusiforme.* See *Superior cervical g.*—**Fussg'** (Ger.). See *Infra-œsophageal g.* [L.]—**G. abdominale centrale.** See *Cœliac* PLEXUS.—**Ganglia abdominalia.** See *Abdominal* GANGLIA.—**G. abdominale maximum.** See *Semilunar g.*—**Ganglia aberrantia.** Ger., *Schaltganglien.* Small nodules or ganglia found occasionally on the dorsal roots of the spinal nerves. [L, 332.]—**Ganglia accessoria.** See *Ganglia intermedia.*—**G. accessoria trunci cervicalis.** Ganglia accessory to the cervical portion of the sympathetic nerve. [a, 29.]—**G. acustico-faciale.** Ger., *Acusticofacialg'.* See *G. vestibulare.*—**G. acusticum.** A g. which in certain insects, such as the grasshopper, forms the termination of the acoustic nerve. ["Arch. f. Anat. u. Phys.," 1855 (a, 29).]—**Ganglia adposita.** See *G's par apposition.*—**G. Anderschii.** See *Petrous g.*—**G. Arnoldi, G. auriculare (Arnoldi).** See *Otic g.*—**G. auriculare posterius.** See *Temporal g.*—**G's auriculo-ventriculaires** (Fr.). See *Ganglia of Bidder.*—**G. basale opticum.** See *Basal optic g.*—**G. Bochdalekii.** See *Supramaxillary* PLEXUS.—**G. cardiacum.** See *Cardiac g.*—**G. cardiacum inferius.** See *Inferior cardiac g.* —**G. cardiacum magnum.** See *Cardiac g.*—**G. cardiacum minus (seu superius).** See *Superior cardiac g.*—**G. cardiacum Wrisbergii.** See *Cardiac g.*—**G. caroticum.** See *Carotid g.* —**G. caroticum accessorium inferius.** An anomalous g. in the internal carotid plexus. [L, 332.]—**G. caroticum accessorium superius.** An occasional g. found in the internal carotid plexus. [L, 332.]—**G. caroticum inferius.** Fr., *g. carotidien inférieur.* A g. in the lower part of the carotid plexus. [L, 31.]—**G. caroticum internum (seu superius).** A g. in the upper portion of the carotid plexus. [L.]—**Ganglia caudicis encephali.** Ger., *Hirnstammganglien.* The thalami and the corpora striata. [Burdach (a, 18).] —**G. cavernosum.** See *Carotid g.*—**G. centrale.** See *Cœliac* PLEXUS.—**G. cerebelli.** See CORPUS *dentatum.*—**G. cerebrale anterius (seu anticum).** See *Anterior cerebral g.*—**G. cerebralis.** See *Cerebral g.*—**Ganglia cerebri magna inferiora.** See *Great basal ganglia of the brain.*—**G. cerebri magnum anticum.** See *Anterior cerebral g.*—**G. cerebri magnum inferius.** Of Goll, the optic thalamus. [I, 3 (K).]—**G. cerebri magnum superius.** See CORPUS *striatum.*—**Ganglia cerebri media.** The optic thalami. [L, 7 (a, 29).]—**G. cerebri posterius (seu posticum).** See THALAMUS.—**G. cervicale fusiforme.** See *Superior cervical g.*—**G. cervicale inferius (seu infimum).** See *Inferior cervical g.*—**G. cervicale magnum.** See *Superior cervical g.*—**G. cervicale medium.** See *Middle cervical g.*—**G. cervicale ovale.** See *Superior cervical g.*—**G. cervicale primum.** See *Superior cervical g.*—**G. cervicale stellatum.** See *Middle cervical g.*—**G. cervicale superius (seu supremum).** See *Superior cervical g.*—**G. cervicale tertium.** See *Inferior cervical g.*—**G. cervicale thyreoideum.** See *Middle cervical g.*—**G. cervicale uteri.** See *Cervical g. of the uterus.*—**G. cervicale vagi.** See *Inferior g. of the vagus nerve.*—**Ganglia cervicalia.** See *Inferior cervical g.*, *Middle cervical g.*, and *Superior cervical g.*—**G. chordæ tympani.** In some invertebrates, a g. on the chorda tympani just above its exit from the Glaserian fissure. ["Arch. f. Anat. u. Phys.," 1844 (a, 29).]—**G. ciliare.** See *Ophthalmic g.*—**G. ciliare accessorium inferius.** An anomalous g. connected with the ciliary branches of the ophthalmic nerve. [L, 332.]—**G. ciliare accessorium superius.** An anomalous g. connected with the ciliary branches of the ophthalmic g. [L, 332.]—**G. Cloquetii.** See *Naso-palatine* PLEXUS.—**Ganglia coccygea.** See *Coccygeal* GLANDS.—**G. cochleare.** See *G. spirale.*—**G. cœliacum.** See *Cœliac g.*—**G. cœliacum dextrum.** The right semilunar g. [L.]—**G. cœliacum laterale.** A small g. of the splenic plexus. [L, 7 (a, 29).]—**G. cœliacum medium.** A g. on the anterior aspect of the aorta above the origin of the cœliac trunk, belonging to the hepatic plexus. [L, 7 (a, 29).]—**G. cœliacum sinistrum.** The left semilunar g. [L.]—**G. Cortii.** See *G. spirale.*—**G. cranio-cervicale.** See *Superior cervical g.*—**G. crochu.** Of Hirschfeld, the hippocampal convolution. [I, 42 (K).]—**Ganglia cubitalia.** See *Brachial* GLANDS.—**G. de Remak.** See *G. of the sinus of the vena cava.*—**Ganglien der Haube** (Ger.). See NUCLEUS *of the tegmentum.*—**Ganglien der hinteren Vierhügel** (Ger.). The gray matter of the posterior pair of corpora quadrigemina. [I, 17 (K).]—**G. der Hirnschenkelshlinge** (Ger.). See LEMNISCUS.—**G. des Gehirns** (Ger.). See *Cerebral g.*—**G. diaphragmaticum.** See *Diaphragmatic g.* and *Phrenic g.*—**Ganglia dorsalia.** See *Thoracic ganglia.*—**G. du cervelet** (Fr.). See CORPUS *dentatum.*—**G. du tubercule quadrijumeau antérieur** (Fr.). The central gray matter of the anterior corpus quadrigeminum. [K.]—**G. [L, 7 (a, 29).]—**G. mesentericum medium dextrum.** See *G. meseraicum medium dextrum.*—**G. mesentericum superius.** A g. connected with the solar plexus immediately beneath the origin of the superior mesenteric artery. [L, 332.]—**Ganglia meseraica.** See *Mesenteric ganglia.*—**Ganglia meseraica dextra inferiora.** A number of small ganglia belonging

A SYMPATHETIC GANGLION.

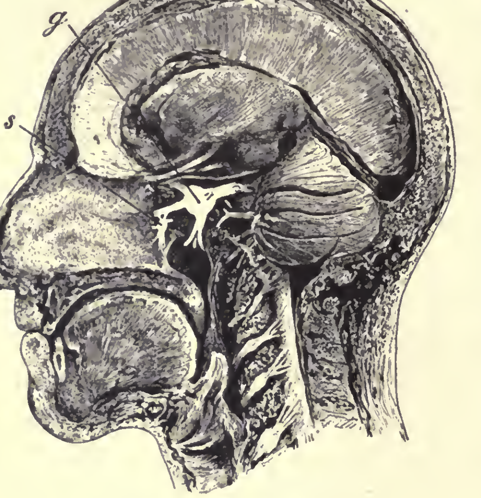
a, the superior cervical ganglion; *b*, the eleventh nerve; *c*, the tenth nerve; *d*, the sphenoidal sinus; *e*, the uvula; *f*, the great horn of the hyoid bone; *g*, the common carotid artery; *h*, the œsophagus; *i*, the superior thyreoid artery; *k*, the thyreoid gland.



to the superior mesenteric plexus, which are situated above the renal artery and below the suprarenal capsule on the right side. [L, 7 (a, 29).]—**Ganglia meseraica dextra superiora.** Two or three small ganglia in the upper part of the superior mesenteric plexus on the right side. [L, 7 (a, 29).]—**G. meseraico-aorticum dextrum superius.** A small oblong g. at the anastomosis of branches of the renal plexus with branches of the superior mesenteric plexus. [L, 7 (a, 29).]—**G. meseraico-aorticum inferius.** An oblong, flat, somewhat convex g. at the anastomosis of the external lateral branch of the aortic plexus and the lumbar portion of the sympathetic nerve. [L, 7 (a, 29).]—**G. meseraicum medium dextrum.** A g. of the superior mesenteric plexus situated on the right side between the superior and inferior mesenteric ganglia. [L, 7 (a, 29).]—**G. Müllerli.** See *Jugular g.* (1st def.).—**G. nasale.** See *Meckel's g.*—**G's néphro-aortiques** (Fr.). See *Renal ganglia.*—**G's néphro-lombaires** (Fr.). Small ganglia at the points of anastomosis between the branches of the lumbar and the spermatic nerves. [L, 7 (a, 29).]—**G. nervi auditorii.** The auditory nucleus. [I, 3 (K).]—**G. nervi glossopharyngei inferius.** See *Petrous g.*—**G. nervi glossopharyngei superius.** See *Jugular g.* (1st def.).—**G. nervi olfactorii.** Ger., *Riechg'.* See *Olfactory* BULB.—**G. nervi optici.** The ganglionic layer of the retina. [L, 117 (a, 29).]—**G. nervi splanchnici.** See *Semilunar g.*—**G. nervi splanchnici minus** [Valentin]. A small g. on the smaller splanchnic nerve, close to its union with the cœliac plexus. [L.]—**G. nervi vagi inferius.** See *Inferior g. of the vagus nerve.*—**G. nervi vagi radicis superius.** See *Superior g. of the pneumogastric nerve.*—**G. nervi vagi trunci.** See *Inferior g. of the pneumogastric nerve.*—**G. nervi vestibuli.** See *G. vestibulare.*—**G. of Andersch.** Lat., *g. Anderschii.* Fr., *g. d'Andersch.* See *Petrous g.*—**G. of Arnold.** See *Otic g.*—**Ganglia of Auerbach.** Ger., *Auerbach'sche Ganglienknoten.* Minute nerve ganglia in Auerbach's plexus. [J.]—**Ganglia of Bidder.** Fr., *g's auriculo-ventriculaires, g's de Bidder.* The two groups of nerve-cells at the termination of the two cardiac branches of the vagi in the auricular septum of the frog's heart. [J, 30.]—**G. of Cloquet.** See *Naso-palatine* PLEXUS.—**G. of Corti.** See *G. spirale.*—**G. of Frankenhäuser.** Lat., *g. Frankenhäuseri.* The cervico-uterine g. [Friend, "Arch. f. Gynäk.," xxvii, 2; "N. Y. Med. Jour.," July 3, 1886, p. 26 (a, 29).]—**G. of Gasser.** See *Gasserian g.*—**Ganglia of increase.** See *Nervous ganglia.*—**G. of interruption.** Ger., *Unterbrechungsg'.* Of Meynert, one of the basal ganglionic masses of the brain, so called because they interrupt the direct course of the nerve-fibres in the projection system. [I, 38 (K).]—**G. of life.** See *Respiratory* CENTRE.—**G. of Meckel.** See *Meckel's g.*—**Ganglia of Meissner.** See *Meissner's ganglia.*—**G. of origin of the tegmentum.** See NUCLEUS *of the tegmentum.*—**G. of Ribes.** A small g. found on the anterior communicating artery of the brain; formed by the union of branches, from both sides, of the superior cervical g. [L, 142.]—**G. of Scarpa.** Lat., *g. Scarpæ.* Fr., *g. de Scarpa.* See INTUMESCENTIA *gangliiformis of Scarpa.*—**G. of the auditory nerve.** See *Auditory* NUCLEUS.—**G. of the cerebrum.** See *Cerebral g.*—**G. of the circumflex nerve.** A gangliform enlargement upon the branch of the circumflex nerve to the teres minor muscle. [L, 172.]—**G. of the corpus bigeminum inferius.** See NUCLEUS *of the lower quadrigeminal body.*—**Ganglia of the crusta.** The masses of gray matter between the bundles of white fibres in the crusta. [I, 38 (K).]—**G. of the facial nerve.** See *Geniculate g.*—**G. of the fifth nerve.** See *Gasserian g.*—**Ganglia of the glosso-pharyngeal nerve.** See *Petrous g.*—**G. of the habenula.** Lat., *g. habenulæ.* Fr., *g. de l'habénule.* Syn.: *nucleus pedunculi conarii.* Of Meynert, a collection of nerve-cells in the trigonum habenulæ, connected by white fibres with the intercrural g. [I, 15 (K).]—**G. of the interosseous nerve.** An enlargement of the posterior interosseous nerve of the arm on the back of the carpus, from which branches to the adjoining structures are given off. [L, 142.]—**Ganglia of the pneumogastric nerve.** See *Inferior g. of the pneumogastric nerve* and *Superior g. of the pneumogastric nerve.*—**G. of the portio dura.** See *Geniculate g.*—**G. of the posterior interosseous nerve.** A ganglioid enlargement of the posterior interosseous nerve on the back of the carpus, whence filaments are distributed to the ligaments and

SYMPATHETIC GANGLIA.

a, the phrenic ganglion; *b*, the hepatic artery; c and *h*, tha left and right splanchnic ganglia; *d*, the superior mesenteric artery; *e*, the renal ganglion; *g*, the superior mesenteric ganglion; *i*, tha inferior mesenteric ganglion. 1, the inferior vena cava; 2, the abdominal aorta; 3, 4, the left and right renal arteries; 5, the inferior mesenteric artery.



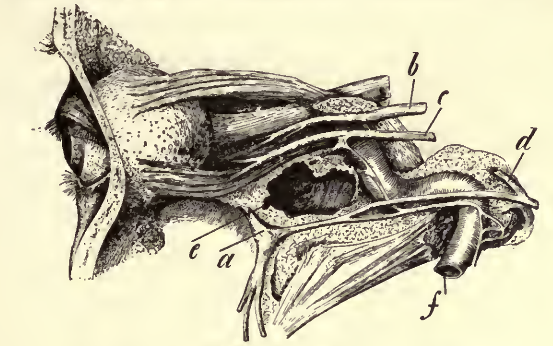
articulations of the carpus. [L, 172 (a, 29).]—**G. of the root of the pneumogastric** (or **vagus**) **nerve.** Lat., *g. nervi vagi radicis.* See *Superior g. of the pneumogastric nerve.*—**G. of the sinus of the vena cava.** A small g. of the cardiac plexus at the mouth of the vena cava. [L, 55 (a, 29).]—**G. of the superior corpus bigeminum.** The central gray matter of the anterior corpora quadrigemina. [I, 31 (K).]—**Ganglia of the sympathetic nerve.** A series of ganglia on each side of the vertebral column which are connected together and form, together with the intervening cords, the sympathetic nerve. [L, 172 (a, 29).]—**Ganglia of the tegmentum.** Ger., *Ganglie der Haube.* See NUCLEUS *of the tegmentum.*—**G. of the trigeminus.** Ger., *G. des dreigetheilten Nerven.* See *Gasserian g.*—**G. of the trunk of the pneumogastric nerve.** See *Inferior g. of the pneumogastric nerve.*—**G. of the vagus root.** See *Superior g. of the pneumogastric nerve.*—**G. of Wrisberg.** See *Cardiac g.* and *Superior cardiac g.*—**G. olivæ.** See CORPUS *dentatum.*—**G. olivare.** See *Superior cervical g.*—**G. ophthalmicum.** See *Ophthalmic g.*—**G. ophthalmicum secundarium inferius** [Switzer]. See *G. ciliare accessorium inferius.*—**G. ophthalmicum secundarium superius** [Switzer]. See *G. ciliare accessorium superius.*—**G. optici, G. opticum.** See *Optic g.*—**G. opticum basale.** See *Basal optic g.*—**G. orbitaire** (Fr.). See *Optic g.*—**G. oticum.** See *Otic g.*—**G's palléaux** (Fr.). In molluscs, an accessory g. situated in the lateral portion of the space formed by the mantle. [L, 158 (a, 29).]—**Ganglia par apposition.** Ganglia which occupy one side, but not the whole thickness of a nerve. [L, 7 (a, 29).]—**G's péritrachéo-laryngiens** (Fr.). See *Peritracheo-laryngeal ganglia.*—**G. pétreux** (Fr.), **G. petrosum (Anderschii).** See *Petrous g.*—**G. pharyngeum.** See *Pharyngeal g.*—**G. pharyngeum molle** [Valentin]. A small g. close to the pharyngeal g. from which issue branches which form a plexus upon the lingual artery. [L, 31.]—**G. pharyngeum nervi vagi.** See *Pharyngeal g.*—**Ganglia phrenico-hepatica.** A number of small ganglia on the lower surface of the diaphragm which belong to the phrenic plexus. [L, 7 (a, 29).]—**G. phrenicum.** See *Diaphragmatic g.* and *Phrenic g.*—**G. phrenicum majus.** A small g. at the junction of the phrenic nerves of the spinal and sympathetic systems. [L, 7, 142 (a, 29).]—**G. phrenicum secundarium.** A g. belonging to the anterior superior transverse plexus formed by the hepatic branches of the cœliac plexus. [L, 7 (a, 29).]—**Ganglia posteriora.** See *Ganglia lateralia.*—**G. posticum (Galli).** See *Optic* THALAMUS.—**G. postopticum.** See *Basal optic g.*—**G. préfaryngé** (Fr.). See *Prelaryngeal* GLAND.—**Ganglia prostatica.** Small ganglia connected with the prostatic plexus. [L, 332.]—**G. pterygopalatinum.** See *Meckel's g.*—**Ganglia pudenda fœminarium.** See *Vesico-vaginal ganglia.*—**Ganglia pudenda marium.** See *Ganglia prostatica.*—**G. radicis nervi vagi.** See *Superior g. of the pneumogastric nerve.*—**G. renale aorticum sinistrum.** A flat, oblong, or triangular g. of the renal plexus at the origin of the renal artery. [L, 7 (a, 29).]—**G. renale commune anterius.** A g. of the renal plexus situated on the anterior aspect of the nasal artery. [L, 7 (a, 29).]—**G. renale commune posterius.** An oblong or semilunar g. belonging to the renal plexus, found on the posterior aspect of the renal artery. [L, 7 (a, 29).]—**Ganglia renalia (aortica).** See *Renal ganglia.*—**Ganglia renalia dispersa.** A number of small ganglia on the anterior aspect of the renal artery connected with the renal plexus. [L, 7 (a, 29).]—**Ganglia renalia interna.** A number of small ganglia on the branches of the renal plexus which enter the kidney. [L, 7 (a, 29).]—**G. reticulare.** See *Reticulate g.*—**G. retinæ.** A portion of the inner nuclear layer of the retina in birds.—**G's rétropéritonéaux** (Fr.). Lymphatic glands situated behind the peritonæum. [a, 18.]—**G. rhinicum.** See *Meckel's g.*—**Ganglia sacralia.** See *Sacral ganglia.*—**Ganglia sacralia accessoria.** Four small accessory ganglia along the course of the median artery of the sacrum. [a, 29.]—**Ganglienschicht** (Ger.). A ganglionic layer. [A, 521.]—**G. semilunare.** See *Semilunar g.* and *Gasserian g.*—**G. semilunare abdominale** (seu **abdominis**). See *Semilunar g.*—**G. semilunare Gasseri** (seu **nervi trigemini**). See *Gasserian g.*—**Ganglia spermatica.** See *Spermatic ganglia.*—**G. spermatico-renale.** A small round or oblong g. found at the commencement of a small plexus formed by the inferior branches of the renal plexus. [L, 7 (a, 29).]—**G. spermaticum**

SYMPATHETIC GANGLIA.

a, the superior cervical ganglion; *b*, the tenth nerve; *c*, the middle cervical ganglion; *d*, the inferior cervical ganglion; *e*, the first dorsal ganglion; *f*, the arch of the acrta; *g*, the pulmonary artery; *h*, the trachea; *i*, the œsophagus.

inferius. The inferior and smaller of the ganglionic enlargements in the inferior spermatic plexus. [a, 29.]—**G. spermaticum primum.** The superior and larger of the two ganglionic enlargements in the inferior spermatic plexus. [L, 7 (a, 29).]—**G. sphénoïdal** (Fr.), **G. sphenopalatinum.** See *Meckel's g.*—**G. spinale.** See *Intervertebral g.*—**G. spinale infimum.** The ganglionic enlargement on the coccygeal nerve, usually contained within the cavity of the dura mater. [L, 31, 332.]—**G. spirale.** Syn.: *g. cochléar.* Fr., *g. de Corti.* A spiral cord-like aggregation of bipolar g. cells in the spiral canal of the modiolus, through which the cochlear nerve passes. [L, 142.]—**Ganglia splanchnica.** See *Semilunar ganglia.*—**G. splanchnico-supra-**

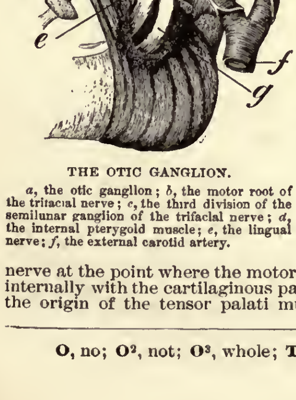
(AFTER FRAZER.)
g, the Gasserian ganglion; *s*, the spheno-palatine ganglion.



renale. See *G. nervi splanchnici minus.*—**G. stellatum.** Fr., *g. stellaire.* See *Inferior cervical g.* and *Middle cervical g.*—**G. submaxillare.** See *Submaxillary g.*—**G. superius vagi.** See *Superior g. of the pneumogastric nerve.*—**G. supramaxillare.** Fr., *g. sus-maxillaire.* 1. See *Supramaxillary* PLEXUS. 2. See *Supramaxillary g.*—**Ganglia supramaxillaria posteriora** [Valentin]. Fr., *g's sus-maxillaires postérieurs.* Small ganglia upon the superior posterior dental nerves. [L, 31.]—**Ganglia sympathetica accessoria (seu intercalaria, seu intermedia).** See *Ganglia intermedia.*—**Gangliensystem** (Ger.). The ganglionic nervous system.—**G. Tarini.** See PONS *Tarini.*—**G. temporale.** See *Temporal g.*—**Ganglia thoracica.** See *Thoracic ganglia.*—**Ganglia thyreoidea inferiora, anteriora et posteriora.** Fr., *g's thyroïdiens, inférieurs et postérieurs.* Small ganglia in the inferior thyreoid plexus. [L, 332.]—**G. thyreoideum inferius.** See *Middle cervical g.*—**G. thyreoideum superius.** See *Superior cervical g.*—**G. transversum.** See *Semilunar ganglia.*—**G. trunci nervi vagi.** See *Inferior g. of the pneumogastric nerve.*—**G. trunci nodosum.** See PLEXUS *gangliformis.*—**G. tympanicum.** Fr., *g. tympanique.* A small ganglioid swelling in the tympanic branch of the glosso-pharyngeal nerve in the canal between the inferior surface of the petrous portion of the temporal bone and the tympanum. [L, 7 (a, 29).]—**G. unciforme.** The uncinate fasciculus. [a, 29.]—**G. uterina.** G. contained in the uterine plexus, by the side of the cervical portion of the uterus. [L, 7 (a, 29).]—**Ganglia vascularia, G's vaso-moteurs** (Fr.). See *Blood* GLANDS and *Vaso-motor* CENTRES.—**G. vertebrale** [Arnold]. See *Inferior cervical g.*—**Ganglia vesicalia minora.** Small ganglioid swellings on the branches of the middle vesical plexus. [L, 7 (a, 29).]—**G. vestibulare.** Syn.: *intumescentia ganglionaris* (seu *ganglioniformis*). Lat., *g. nervi vestibuli.* Fr., *g. vestibulaire.* Ger., *Vestibularg'.* A small g. connected with the vestibular nerve which receives small fibres from the geniculate g. [L, 332.]—**G. Walteri.** See *Coccygeal* GLANDS.—**G. Wrisbergii.** See *Inferior cardiac g.*—**Ganglienzellenverästelung** (Ger.). Ramification of the processes of nerve-cells. [J.]—**Gasserian g.** Lat., *g. (semilunare) Gasseri* (seu *nervi trigemini*). Fr., *g. de Gasser, g. semilunaire du trijumeau.* Ger., *gasserisches G., G. Gasseri.* A large crescent-shaped g. lodged in a shallow depression on the anterior (superior) surface, and near the apex, of the petrous portion of the temporal bone; formed by the union of fibres from the larger root of the fifth cranial nerve with filaments from the carotid plexus. From its anterior convex border are given off the ophthalmic, superior maxillary, and inferior maxillary nerves. [L, 31, 42, 332.]—**Gastro-epiploic ganglia.** See *Gastro-epiploic* GLANDS.—**Gehörg'** (Ger.). The organ of hearing in certain insects. ["Arch. f. Anat. u. Phys.," 1855 (a, 29).]—**Gelenkg'** (Ger.). 1. A pouch in the capsule of a joint interposed between the joint and a tendon. 2. A bursa mucosa which communicates with a joint. [L, 57 (a, 29).]—**Geniculate g.** Lat., *g. geniculatum, g. geniculare, g. geniculi, intumescentia gangliaformis.* Fr., *g. géniculé.* Ger., *Knieg'.* A ganglioid enlargement of the facial nerve in the aqueduct of Falloppius, which receives the large superficial petrosal nerve and a branch of the small superficial petrosal nerve. [L, 31, 142, 332.]—**Genito-spinal g.** See *Genito-spinal* CENTRE.—**Grand g. supérieur du cerveau** (Fr.). See CORPUS *striatum.*—**Great basal ganglia of the brain.** Lat., *ganglia cerebri magna inferiora.* Of Spitzka, the striata and thalami. ["Jour. of Nerv. and Ment. Dis.," Apr., 1880, p. 48 (K).]—**Great cardiac g.** Lat., *g. cardiacum magnum.* See *Cardiac g.*—**Halbmondförmige Ganglien** (Ger.). See *Semilunar ganglia.*—**Hemispherical ganglia.** See *Cerebral* HEMISPHERE.—**Herzg'** (Ger.). See *Cardiac g.*—**Hinteres inneres G. des Sehhügels** (Ger.). Of Carus, an accessory corpus quadrigeminum which occurs in some fishes. [I, 3 (K).]—**Hirng'** (Ger.). See *Cerebral g.*—**Hypogastric g.** Lat., *g. hypogastricum.* See *Cervical g. of the uterus.*—**Hypoglossal g.** See *Hypoglossal* NUCLEUS.—**Inferior cardiac g.** Lat., *g. cardiacum inferius.* Fr., *g. cardiaque inférieur.* The lower of the two ganglia which sometimes take the place of the cardiac g. [L, 31.]—**Inferior cervical g.** Lat., *g. cervicale inferius* (seu *infimum*), *g. thoracicum primum.* Fr., *g. cervical inférieur.* Ger., *unteres Halsg', unterer Halsknoten.* A g. of irregular shape situated between the transverse process of the last cervical vertebra and the neck of the first rib, behind and to the outer side of the root of the vertebral artery. It is connected with the three lower cervical nerves, sometimes with the first dorsal, and gives off numerous branches, the most important being the inferior cardiac nerve. From its situation it is by some regarded as the first dorsal g. [L, 31, 142, 332.]—**Inferior ganglia of the cerebrum.** See *Great basal ganglia of the brain.*—**Inferior g. of the pneumogastric (or vagus) nerve.** Lat., *g. inferius* (seu *cervicale*) *vagi, g. trunci* (seu *jugulare*) *nervi vagi.* A reddish, somewhat cylindroid enlargement of the pneumogastric nerve, placed at a short distance from its exit from the jugular foramen. All of the fibres of the nerve are not included in it, and it is connected with the hypoglossal and cervical nerves and the various plexuses in its vicinity. [L, 31, 142, 332.]—**Inferior optic g.** See *Basal optic g.*—**Infra-œsophageal g.** Ger., *Fussganglie.* A g. in the *Mollusca* situated beneath the œsophagus and innervating the foot. [L, 147.]—**Inguinal ganglia.** See *Inguinal* GLANDS.—**Intercalar ganglia.** Lat., *ganglia intercalaria.* See *Ganglia intermedia.*—**Intercarotic g., Intercarotid g.** Lat., *g. intercaroticum, g. intercarotidicum.* Fr., *g. intercarotidien.* See *Intercarotid* GLAND.—**Intercrural g.** Lat., *g. intercrurale.* A small mass of gray matter between the crura cerebri. [I, 99.]—**Intermediäre Ganglien** (Ger.). See *Ganglia intermedia.*—**Internodial ganglia, Interrupting ganglia.** See *G. of interruption.*—**Interoptic g.** The gray matter of the interoptic lobes. [Spitzka, "Jour. of Nerv. and Ment. Dis.," 1880, p. 86, 98, 102 (I).]—**Interpeduncular g.** See *Intercrural g.*—**Intervertebral g.** Lat., *g. intervertebrale.* The enlargement upon the posterior root of a spinal nerve near the intervertebral foramen. [L, 31.]—**Intraventricular g.** See *Caudate* NUCLEUS.—**Jugular g.** Lat., *g. jugulare* (*glossopharyngei,* seu *Mulleri,* seu *superius,* seu *supremum*) (1st def.), *g. jugulare inferius* (seu *nervi vagi*) (2d def.). Fr., *g. jugulaire.* 1. The g. of the glosso-pharyngeal nerve in the upper part of the jugular foramen. It is connected with only a portion of the nerve, a small bundle of fibres passing around it to unite with the nerve beyond it. [L, 31, 142, 332.] 2. See *Inferior g. of the vagus nerve.*—**Knieg'** (Ger.). See *Geniculate g.*—**Kopfganglien** (Ger.). See *Cerebral ganglia.*—**Labial ganglia.** See *Labial* GLANDS.—**Lenticular g.** Lat.,

lg, the lingual ganglion; *g*, the genio-glossus muscle; *m*, the mylo-hyoid muscle; *l*, the lingual nerve; *e*, the epiglottis; *h*, the hypoglossal nerve, *mg*, the submaxillary gland.

g. lenticulare. Fr., *g. lenticulaire.* See *Ophthalmic g.*—**Lesser cardiac g.** Lat., *g. cardiacum minus.* See *Superior cardiac g.*—**Lingual g.** Lat., *g. linguale.* Fr., *g. lingual.* See *Submaxillary g.*—**Linsenförmiges G.** (Ger.). See *Optic g.*—**Lower cervical g.** See *Inferior cervical g.*—**Lower g. of the pneumogastric nerve.** See *Inferior g. of the vagus nerve.*—**Ludwig's g.** A g. in the right auricle of the heart. [L, 332.]—**Lumbar ganglia.** Lat., *ganglia lumbaria.* Fr., *g's lombaires.* Ger., *Lendenknoten, Lumbalganglien.* The ganglia of the sympathetic system in the lumbar region. They are four or five in



number on each side and lie along the inner muscles behind the abdominal aorta. [L, 31, 142, 332.]—**Lymphatic g.** Lat., *g. lymphaticum.* Fr., *g. lymphatique.* See *Lymphatic* GLAND.—**Marginal g.** Fr., *g. marginal.* Ger., *Grenzg'.* A g. of the great sympathetic chain in the trunk or the head. [J, 67.]—**Meckel's g.** Lat., *g. Meckelii* (seu *rhinicum*, seu *nasale*, seu *pterygopalatinum*). Fr., *g. de Meckel.* Ger., *Gaumenkeilbeinknoten.* A g. situated in the sphenomaxillary fossa near the sphenopalatine foramen. It receives the two sphenopalatine branches of the superior maxillary nerve, and sends branches to the periosteum of the orbit and the mucous membrane of the posterior ethmoidal and sphenoidal sinuses [Luschka]. Its branches are the anterior posterior and external palatine, the upper nasal, and the nasopalatine, Vidian, and pharyngeal nerves (*q. v.*).—**Medial g., Median g.** See *Median* CENTRE *of Luys.*—**Meissner's ganglia.** Ger., *Meissner'sche Ganglien* (oder *Knoten*). The ganglia of Meissner's plexus. [L. 31.]—**Mesenteric ganglia.** Lat., *ganglia mesenterica* (seu *meseraica*).

THE NASAL GANGLION.

a, the nasal ganglion; *b*, the third nerve; *c*, the sixth nerve; *d*, the seventh nerve; *e*, the sphenoidal sinus; *f*, the internal carotid artery.

Fr., *g's mésentériques.* Sympathetic ganglia near the root of the superior mesenteric artery; formed by filaments from the superior mesenteric plexus. [C.]—**Middle cervical g.** Lat., *g. cervicale medium* (seu *stellatum*, seu *thyreoideum*). Fr., *g. cervical moyen* (ou *intermédiaire*). Ger., *mittleres Halsg'*, *mittlerer Halsknoten.* The smaller of the three cervical ganglia, situated close to the inferior thyreoid artery. It usually receives branches from the fifth and sixth cervical nerves, and gives branches to the thyreoid gland and parts adjacent, and to the middle cardiac nerve. [L, 142, 332.]—**Middle g.** See *Median* CENTRE *of Luys.*—**Mittleres Halsg'** (Ger.). See *Middle cervical g.*—**Müller's g.** See *Jugular g.* (1st def.).—**Nasal g.** Lat., *g. nasale*, *g. rhinicum.* Ger., *Nasenknoten.* See *Meckel's g.*—**Naso-palatine g.** See *Naso-palatine* PLEXUS.—**Nerve g., Nervous g.** Fr., *g. nerveux.* Ger., *G'knoten*, *Nervenknoten.* See *G.* (2d def.).—**Oberes Halsg'** (Ger.). See *Superior cervical g.*—**Ophthalmic g., Optic g.** Lat., *g. ophthalmicum*, *g. optici*, *g. opticum.* Fr., *g. ophthalmique* (ou *ciliaire*, ou *orbitaire*), *g. optique* (*d'Arnold*). Ger., *ophthalmisches* (oder *linsenförmiges*) *G.*, *Ciliarg'.* A small quadrangular, flattened g., of a reddish-gray color and about the size of a pin's head, situated at the back part of the orbit between the optic nerve and the external rectus muscle, generally lying on the outer side of the ophthalmic artery. It has three roots, all of which enter its posterior border. The long root comes from the nasal branch of the ophthalmic nerve. The short root, occasionally divided into two parts, comes from that branch of the third nerve which supplies the inferior oblique muscle. The third or sympathetic root comes from the cavernous plexus of the sympathetic. It also sometimes receives a root from Meckel's g. Its branches of distribution are the short ciliary nerves, which run forward, pierce the sclerotic around the entrance of the optic nerve, and are distributed to the chorioid, ciliary body, and the iris. [F.]—**Opto-striate g.** Fr., *g. opto-strié.* Of Luys, the gray substance of the corpus striatum and optic thalamus. [I, 56 (K).]—**Orbital g.** Fr., *g. orbitaire.* Ger., *Orbitalg'.* See *Ophthalmic g.*—**Otic g.** Lat., *g. oticum.* Fr., *g. d'Arnold*, *g. otique*, *g. maxillo-tympanique.* Ger., *otisches G.*, *Ohrknoten.* A small, oval, flattened g., of a reddish-gray color, situated immediately below the foramen ovale, on the inner surface of the inferior maxillary nerve, and near the origin of the internal pterygoid nerve. It is in relation externally with the trunk of the inferior maxillary nerve at the point where the motor root joins the sensory portion; internally with the cartilaginous part of the Eustachian tube and the origin of the tensor palati muscle; and posteriorly with the middle meningeal artery. It is connected with the inferior maxillary, auriculo-temporal, sympathetic, glosso-pharyngeal, and facial nerves. Its branches of distribution are a filament to the tensor tympani, and one to the tensor palati. [F, 31.]—**Palmar bursal g.** See *Compound palmar g.*—**Parieto-splanchnic ganglia.** See *Branchial ganglia.*—**Pedal g.** See *Infra-œsophageal g.*—**Periosteal g.** See *Periostitis* ALBUMINOSA.—**Peritracheo-laryngeal ganglia.** Fr., *g's péritrachéo-laryngiens.* Of Gouguenheim and Leval-Picquechef, the deep-seated lymphatic glands of the neck, situated about the upper segments of the air-passages, toward the lower and posterior part of the larynx, and in the neighborhood of the recurrent nerve. ["Gaz. hebd. de méd. et de chir.," Feb. 29, 1884, p. 141.]—**Petrosal g., Petrous g.** Lat., *g. petrosum* (*Anderschii*). Fr., *g. pétreux.* Ger., *Felseng'.* A g. situated in a small groove (the fossula petrosa) on the lower border of the petrous portion of the temporal bone. It includes all the fibres of the nerve, and gives off the tympanic nerve and branches to the sympathetic and vagus nerves. [L, 142, 332.]—**Pharyngeal g.** Lat., *g. pharyngeum.* A g., often multiple, connected with the pharyngeal branches of the glosso-pharyngeal nerve. [L, 31, 332.]—**Phrenic ganglia.** Lat., *ganglia phrenica.* Ger., *Zwerchfellganglien*, *phrenische Ganglien.* 1. A number of small ganglia connected with the phrenic plexus. [L, 31, 332.] 2. See *Diaphragmatic g.*—**Plexiform g.** 1. The Gasserian g. 2. The g. inferius of the vagus nerve. [L, 55 (*a*, 29).]—**Pneumogastric ganglia.** See *Inferior* and *Superior g. of the pneumogastric nerve.*—**Post-œsophageal ganglia.** In insects, ganglia united to the cephalic ganglia by cords, which form a collar round the gullet and supply nerves to the mouth. [L, 147 (*a*, 29).]—**Post-optic ganglia.** Of Spitzka, the posterior corpora quadrigemina. ["Jour. of Nerv. and Ment. Dis.," July, 1880, p. 407 (K).]—**Pre-œsophageal ganglia.** See *Cephalic ganglia.*—**Remak's g.** A g. in the tissue of the heart near the entrance of the superior vena cava. [L.]—**Renal ganglia.** Lat., *ganglia renalia* (*aortica*). Fr., *g's rénaux*, *g's néphro-aortiques.* Numerous small ganglia connected with the renal plexus. [L, 332.]—**Respiratory ganglia.** The respiratory centres. [L.]—**Reticular g.** Lat., *g. reticulare.* The scattered gray matter of the oblongata. [Spitzka, "Jour. of Nerv. and Ment. Dis.," 1878 (I).]—**Riechg'** (Ger.). See *Olfactory* BULB.—**Rückenmarksganglien** (Ger.). Ganglia of the spinal cord in the lower vertebrates. ["Arch. f. Anat. u. Phys.," 1842 (*a*, 29).]—**Sacral ganglia.** Lat., *ganglia sacralia.* Fr., *g's sacrés.* Ger., *Kreuzbeinknoten*, *Sacralganglien.* Sympathetic ganglia, four or five in number, on the ventral surface of the sacrum. [L, 31, 332.]—**Schacher's g.** See *Ophthalmic g.*—**Schaltganglien** (Ger.). See *Ganglia aberrantia.*—**Schmiedel's G.** (Ger.). A small g. of the carotid plexus which receives a filament from the third branch of the fifth nerve. [*a*, 29.]—**Schwanzg'** (Ger.). The caudal g. [*a*, 29.]—**Second cervical g.** See *Middle cervical g.*—**Semilunar ganglia.** Lat., *ganglia semilunaria.* Ger., *halbmondförmige Ganglien.* Two ganglionic masses in the solar plexus. They are situated, one on each side, at the upper part of the plexus, close to the suprarenal bodies, and receive the great splanchnic nerves. [L, 31, 142, 332.]—**Sensory ganglia.** Fr., *g's d'organes sensoriels.* Ger., *Empfindungsganglien.* Ganglia, such as the thalami, connected with sensory nerves, especially the nerves of special sense. Cf. *Sensory* CENTRE.—**Simple g.** A smooth, globular, semifluctuating swelling connected with a tendon and varying in size from a shot to a pigeon's egg. It is a sac of fibrous tissue and contains colloid material, and does not communicate with the interior of the sheath of the tendon. [*a*, 34.]—**Solar ganglia.** Lat., *ganglia solaria.* Fr., *g's solaires.* See *Semilunar ganglia.*—**Spermatic ganglia.** Lat., *ganglia spermatica.* Fr., *g's spermatiques.* Small ganglia connected with the internal spermatic plexuses. [L, 332.]—**Sphenoidal g., Spheno-palatine g.** See *Meckel's g.*—**Spinal ganglia.** Lat., *ganglia spinalia.* Ger., *Spinalganglien.* The roundish, gray enlargements of the dorsal roots of the spinal nerves. [L, 332.]—**Spinal g.** Lat., *g. spinale.* See *Intervertebral g.*—**Splanchnic ganglia.** Lat., *ganglia splanchnica.* Fr., *g's splanchniques.* See *Semilunar ganglia.*—**Stammganglien** (Ger.). In invertebrates, the ganglia of the central nervous system. [*a*, 29.]—**Steissg'** (Ger.). See *Coccygeal* GLAND.—**Stomato-gastric ganglia.** Fr., *g's stomato-gastriques.* In molluscs, small ganglia situated on the superior surface of the stomach or in the frontal region, united by a median trunk, and communicating with the general ganglionic chain by means of anastomotic branches. [L, 188 (*a*, 21).]—**Subintestinal ganglia.** See *Meissner's ganglia.*—**Sublingual g., Submaxillary g.** Lat., *g. sublinguale*, *g. submaxillare.* Fr., *g. sous-maxillaire.* Ger., *Unterkieferknoten*, *Kieferknoten*, *Zungenknoten.* A g. situated above the deep portion of the submaxillary gland. It is connected with the lingual nerve, the chorda tympani, and the submaxillary nerve; also with the sympathetic plexus on the facial artery. It sends branches to the submaxillary gland, to the mucosa of the mouth, and to Wharton's duct, and sometimes communicates with the hypoglossal nerve. [C.]—**Sub-œsophageal g.** See *Infra-œsophageal g.*—**Superior cardiac g.** Lat., *g. cardiacum superius.* Fr., *g. cardiaque supérieur.* Syn.: *g. of Wrisberg.* The uppermost of the two ganglia, when two exist, connected with the superficial cardiac plexus. [L, 31.]—**Superior cervical g.** Lat., *g. cervicale superius* (seu *supremum*, seu *fusiforme*, seu *magnum*, seu *ovale*). Fr., *g. cervical supérieur.* Ger., *oberes Halsg'.* The largest of the three cervical ganglia. It is situated on the rectus capitis anticus major muscle, behind the internal carotid artery, and opposite the second and third cervical vertebræ. It is connected with the four upper cervical and the vagus, glosso-pharyngeal, and hypoglossal nerves, and gives off numerous branches to adjacent structures, the most important being those to the pharynx and to the superior cardiac nerve. [L, 31, 142, 332.]—**Superior ganglia of the cerebrum.** See CORPUS *striatum.*—**Superior g. of the pneumogastric** (or vagus) **nerve.** Lat., *g. nervi vagi superius* (seu *radicis*). A g. situated in the jugular foramen which receives fibres from the superior cervical g. of the sympathetic

THE OTIC GANGLION.

a, the otic ganglion; *b*, the motor root of the trifacial nerve; *c*, the third division of the semilunar ganglion of the trifacial nerve; *d*, the internal pterygoid muscle; *e*, the lingual nerve; *f*, the external carotid artery.

system, from the spinal accessory nerve, and from the petrous g. of the glosso-pharyngeal nerve. [C.]—**Supramaxillary g.** Lat., *g. supramaxillare.* Fr., *g. sus-maxillaire.* A small g. on the anterior superior dental nerve, above the root of the canine tooth. [L, 31, 142.]—**Supraœsophageal ganglia.** See *Cerebral g.* (1st def.).—**Suprarenal ganglia.** Gauglia in the suprarenal plexus. [L.]—**Temporal g.** Lat., *g. temporale* (*molle*). Fr., *g. temporal* (*mou*). A small g. connected with the anterior branches of the superior cervical g. which is normally situated on the external carotid artery, near the posterior auricular artery, but is occasionally found on the parotid gland. [L, 31.]—**Tentacular ganglia.** In the *Opisthobranchiata*, a series of ganglionic elements situated in the tentacles at the point of origin of the suckers. [L, 158 (a, 21).]—**Third cervical g.** See *Superior cervical g.*—**Thoracic ganglia.** Lat., *ganglia thoracica.* Fr., *g's thoraciques.* Ger., *thoracische Ganglien, Brustknoten, Dorsalganglien.* The ganglia, twelve in number, of the thoracic portion of the sympathetic nerve. They are situated between the heads of the ribs and the transverse processes of the vertebræ. They give rise to the splanchnic nerves, and send off branches to the spinal nerves and plexuses and to the adjacent tissues. [L, 31, 142, 332.]—**Thyreoid g.** [Haller]. Lat., *g. thyreoideum.* See *Middle cervical g.*—**Unterbrechungsg'** (Ger.). See *G. of interruption.*—**Unteres Halsg'** (Ger.). See *Inferior cervical g.*—**Upper cervical g.** See *Superior cervical g.*—**Upper g. of the pneumogastric nerve.** See *Superior g. of the vagus nerve.*—**Vascular ganglia.** Lat., *ganglia vascularia.* Fr., *g's vaso-moteurs.* See *Blood* GLANDS and *vasomotor* CENTRES.—**Ventral ganglia.** In certain worms, in *Crustacea*, insects, and many other invertebrates, ganglia on a nervous cord extending along the ventral surface of the body cavity. [L, 322.]—**Ventricular ganglia.** Fr., *g. ventriculaires.* See *Ganglia of Bidder.*—**Vesico-vaginal ganglia.** Fr., *g's vésico-vaginaux.* Ganglionic swellings found in the vesico-vaginal plexus. [L, 7 (a, 29).]—**Vestibularg'** (Ger.). See *G. vestibulare.*—**Vierhügelganglien** (Ger.). The masses of gray matter in the dorsal parts of the germinal lobes. [I, 94.]—**Vormauerg'.** The claustrum. [I.]—**Zwerchfellganglien** (Ger.). See *Diaphragmatic g.*

GANGLIONARY, adj. Ga^{2}n^2'gli^2-o^{2}n-a-ri^2. Lat., *ganglionarius.* Fr., *ganglionnaire.* See GANGLIONIC. The *Ganglionaria* of Ehrenberg are animals without a spinal cord. [A, 22.]

GANGLIONEMPHRAXIS [Piorry] (Fr.), n. pl. Ga^{2}n^2-(ga^{3}n^2)''gli^2-o^{2}n-e^{2}m-fra^{2}x(fra^{3}x)'i^{2}s. From γάγγλιον, a tumor under the skin, and ἔμφραξις, a stopping. Obstructions of the lymphatic ganglia. [L, 82.]

GANGLIONEURA (Lat.), n. n. pl. Ga^{2}n^2(ga^{3}n^2)-gli^2-o(o^3)-nu^2'ra^3. From γάγγλιον, a tumor under the skin, and νεῦρον, a nerve. Fr., *ganglioneures.* Of Rudolphi, those animals, including the *Mollusca* and *Articulata*, whose nervous system consists of one or more ganglionic cords. They comprise the *Homogangliata* and *Heterogangliata.* [B, 7.]

GANGLIONIC, adj. Ga^{2}n^2-gli^2-o^{2}n'i^{2}k. Lat., *ganglionicus, ganglionaris.* Fr., *ganglionique, ganglionnaire.* Ger., *nervenknotig, mit Ganglien versehen.* 1. Pertaining to a ganglion. 2. Provided with ganglia. 3. Acting upon the g. nervous system (said of drugs). [L, 107.]

GANGLIONITIS (Lat.), n. f. Ga^{2}n^2(ga^{3}n^2)-gli^2-o^{2}n-i(e)'ti^{2}s. Gen., *-it'idos* (*-is*). Fr., *ganglionite.* 1. See GANGLIITIS. 2. Of Piorry, see LYMPHADENITIS.

GANGLIONOPHYMIE [Piorry] (Fr.), n. Ga^{3}n^2-gle-o-no-fe-me. From γάγγλιον, a ganglion, and φῦμα, a growth. Tubercular disease of the lymphatic glands. [L, 82.]

GANGLIOPATHY, n. Ga^{2}n^2-gli^2-o^{2}p'a^{2}th-i^2. From γάγγλιον, a ganglion, and πάθος, disease. Fr., *ganglionévrie.* Disease of the nervous ganglia. [L, 41.]

GANGLIOPYITE [Piorry] (Fr.), n. Ga^{3}n^2-gle-o-pe-et. From γάγγλιον, a ganglion, and πύον, pus. Suppuration of a lymphatic gland.—**G. syphiliosique, G. syphiosique.** Suppuration of the lymphatic glands from syphilis. [L, 82.]

GANGLIOSTÉIES [Piorry] (Fr.), n. pl. Ga^{3}n^2-gle-o-sta-e. From γάγγλιον, a ganglion, and ὀστέον, a bone. Ossifications of the lymphatic glands. [L, 82.]

GANGLIOSUS (Lat.), adj. Ga^{2}n^2(ga^{3}n^2)-gli^2-o'su^{3}s(su^{4}s). Ger., *gangliös.* See GANGLIONIC.

GANGLIUM (Lat.), n. n. Ga^{2}n^2(ga^{3}n^2)'gli^2-u^{3}m(u^{4}m). See GANGLION.

GANGRÆNA (Lat.), n. f. Ga^{2}n^2(ga^{3}n^2)-gren'(gra^3'e^{2}n)-a^3. See GANGRENE.—**G. a decubitu.** See *Bed*-SORE.—**G. alopecia.** See ALOPECIA (1st def.).—**G. atrophica.** Gangrene from thrombosis or embolism. [L, 290 (a, 34).]—**G. caries.** See CARIES.—**G. circumscripta.** Fr., *gangrène circonscrite.* Circumscribed gangrene. [A, 319 (a, 21).]—**G. diabetica bullosa serpiginosa.** Of Kaposi, a cutaneous disease observed in a diabetic patient, and characterized by an eruption of bullæ on the lower extremities, followed by gangrene. The gangrenous spots tended to heal in one direction, while in another the process continued to advance, preceded by a wall of flaccid bullæ. ["Anz. d. Ges. d. Aerzte in Wien.," No. 9, 1883; "Vierteljahrschr. f. Derm. u. Syph.," 1884, p. 150 (G).]—**G. diffusa.** Progressive gangrene. [A, 319 (a, 21).]—**G. emphysematosa.** Fr., *gangrène emphysémateuse.* Gangrene characterized by the development and collection of gas in the disintegrating tissues. [A, 326 (a, 21).]—**G. Græcorum.** See *Dry* GANGRENE.—**G. humida.** See *Humid* GANGRENE.—**G. idiopathica.** See *Senile* GANGRENE.—**G. neurotica.** See ASPHYXIA *localis cum g. symmetrica.*—**G. nosocomialis, G. nosocomiorum.** See *Hospital* GANGRENE.—**G. oris.** See *Gangrenous* STOMATITIS.—**G. ossis.** See SPINA *ventosa.*—**G. ossium.** See CARIES.—**G. per decubitum.** See *Bed*-SORE.—**G. Pottii.** Of Pott, senile gangrene. [a, 34.]—**G. senilis.** See *Senile* GANGRENE.—**G. septica.** See *Septic* GANGRENE.—**G. sicca.** See *Dry* GANGRENE.—**G. sphacelus, G. spontanea.** See SPHACELUS.—**G. symmetrica (Raynaudi).** See ASPHYXIA *localis cum g. symmetrica.*—**G. ustilaginea.** See *Gangrenous* ERGOTISM.—**G. uteri partialis post partum.** See METRITIS *dissecans.*—**G. venostasis.** Gangrene due to venous stasis. [a, 34.]

GANGRÆNANCHONE (Lat.), n. f. Ga^{2}n(ga^{3}n^2)-gren(gra^3-e^{2}n)-a^{2}n^2(a^{3}n^2)'ko^{2}n(ch^{2}o^{2}n)-e(a). Gen., *-an'chones* (*-æ*). From γάγγραινα, gangrene, and ἀγχόνη, a strangling. See *Gangrenous* ANGINA.

GANGRÆNESCENS (Lat.), adj. Ga^{2}n^2(ga^{3}n^2)-gre^{2}n(gra^3-e^{2}n)-e^{2}s'se^{2}nz(kans). See GANGRENESCENT.

GANGRÆNESCENTIA (Lat.), n. f. Ga^{2}n^2(ga^{3}n^2)-gre^{2}n(gra^3-e^{2}n)-e^{2}s-se^{2}n(ke^{2}n)'shi^2(ti^2)-a^3. From γάγγραινα, an eating sore. Fr., *gangrénescence.* 1. The formation of gangrene. 2. An inclination to the development of gangrene. [L, 50 (a, 14).]

GANGRÆNIC, adj. Ga^{2}n^2-gre^{2}n'i^{2}k. Lat., *gangrœnicus.* See GANGRENOUS.

GANGRÆNODES (Lat.), adj. Ga^{2}n^2(ga^{3}n^2)-gre^{2}n(gra^3-e^{2}n)-o'-dez(das). See GANGRENOID.

GANGRÆNODYSPNŒA (Lat.), n. f. Ga^{2}n^2(ga^{3}n^2)-gre^{2}n(gra^3-e^{2}n)-o(o^3)-di^{2}sp(du^{6}sp)-ne'(no^2'e^2)-a^3. For deriv., see GANGRENE and DYSPNŒA. Dyspnœa occasioned by gangrene of the respiratory organs. [L, 50 (a, 14).]

GANGRÆNOMA (Lat.), n. n. Ga^{2}n^2(ga^{3}n^2)-gren(gra^3-e^{2}n)-o'-ma^3. Gen., *-no'matos* (*-is*). Gr., γαγγραίνωμα. A gangrenous part. [L, 50 (a, 14).]

GANGRÆNOPSIS (Lat.), n. f. Ga^{2}n^2(ga^{3}n^2)-gre^{2}n(gra^3-e^{2}n)-o^{2}p'si^{2}s. Gen., *-ops'eos* (*-is*). From γάγγραινα, gangrene, and ὄψις, the face. Gangrenous erosion of the cheek. [S. Jackson, "Am. Med. Record.," July, 1827 (E).]

GANGRÆNOSIS (Lat.), n. f. Ga^{2}n^2(ga^{3}n^2)-gre^{2}n(gra^3-e^{2}n)-o'-si^{2}s. Gen., *-os'eos* (*-is*). Gr., γαγγραίνωσις. The state of being or becoming gangrenous. [A, 322.]

GANGRÆNOSUS (Lat.), adj. Ga^{2}n^2(ga^{3}n^2)-gre^{2}n(gra^3-e^{2}n) os'-u^{3}s(u^{4}s). See GANGRENOUS.

GANGRÄN (Ger.), n. f. Ga^{3}n^2-gran'. See GANGRENE.—**Druckg'.** See *Pressure* GANGRENE.—**Frostg'.** Gangrene from frost-bite.—**Symmetrisches G.** See ASPHYXIA *localis cum gangræna symmetrica.*—**Trockenes G.** See *Dry* GANGRENE.

GANGRENE, n. Ga^{2}n^2'gren. Gr., γάγγραινα (from γρᾶν, to gnaw). Lat., *gangræna.* Fr., *gangrène, asphyxie des parties.* Ger., *Gangrän, Brand.* It., *gangrena, cangrena.* Sp., *gangrena.* Death of a portion of the living organism, followed by putrefaction or desiccation; due to its direct chemical or mechanical injury, to impairment of its supply of blood, or to certain impaired conditions of the general health. Formerly the term was applied more particularly to a state in which the affected part was not yet actually dead, complete death of a part being called *sphacelus.* [A, 385, 387; A, 326 (a, 21).]—**Acute g.** G. that pursues an acute course. [a, 34.]—**Acute inflammatory g., Acute septic g., Acute spreading g.** [Horsley]. Fr., *gangrène foudroyante.* Of Cripps, g. following acute septic inflammation. [a, 34.]—**Anæmic g., Arterial g.** G. from arterial obstruction. [A, 69; E.]—**Aseptic g.** Of Duncan, the death and absorption of necrosed tissue without the presence of microzymes. [a, 34.]—**Caseous g.** See CASEATION.—**Cerebral g.** See *G. by colliquation.*—**Chronic g.** G. that pursues a chronic course. [a, 34.]—**Circumscribed g.** A local necrosis caused by traumatic disorganization of the tissue-elements or occlusion of a blood-vessel. [a, 34.]—**Cold g.** Fr., *gangrène froide.* G. without fever or pronounced constitutional disturbance. [a, 34.]—**Congenital g.** A circumscribed g. occurring during uterine life, and existing when the child is born. [a, 34.]—**Constitutional g.** G. caused by some constitutional disease, such as diabetes, atheroma, etc. [a, 34.]—**Contagious g.** See *Hospital g.*—**Cutaneous g.** G. affecting the skin and subcutaneous connective tissue only, as in erysipelas. [a, 34.]—**Decubital g.** See *Bed*-SORES.—**Diabetic g.** Fr., *gangrène diabétique.* G. caused by the disturbances of vascular and tissue nutrition in diabetes. [a, 34.]—**Diffuse g.** Of Cohnheim, g. in which there is the tendency to extend and rapidly involve tissues adjacent to those first affected. [a, 34.]—**Diphtheritic g.** Fr., *gangrène diphthérique.* Ger., *diphtheritisches Gangrän.* G. due to diphtheria.—**Direct traumatic g.** G. due directly to an injury.—**Dry g.** Fr., *gangrène sèche.* Ger., *trockenes Gangrän.* A variety of anæmic g. in which the dead part is dry and shriveled. [E.]—**Embolic g.** Fr., *gangrène embolique.* G. due to embolism.—**Emphysematous g.** Lat., *gangræna emphysematosa.* See *Gaseous g.*—**Ergotic g.** Fr., *gangrène des solonois.* See *Gangrenous* ERGOTISM.—**Fulminant g.** Fr., *gangrène foudroyante.* See *Acute inflammatory g.*—**G. by cadaverization.** Fr., *gangrène par cadavérisation.* Of Cruveilhier, g. preceding general somatic death in which the affected portions are cold and cadaverous. [a, 34.]—**G. by coagulation.** Fr., *gangrène par coagulation.* See *Coägulation* NECROSIS.—**G. by colliquation, G. by liquefaction.** Fr., *gangrène par colliquation.* G. that is actually a softening, as in the brain. [a, 34.]—**Gaseous g.** Fr., *gangrène gazeuse.* G. in which gases, such as ammonia, hydrogen sulphide, and volatile fatty acids, are formed in the subcutaneous tissues, as in malignant œdema. [a, 34.]—**Glycæmic g.** Fr., *gangrène glycoémique* (ou *glycohémique*). Of Marchal, diabetic g. [Bouchardat, "Bull. gén. de thérap.," Oct. 15, 1882, p. 289.]—**Hospital g.** Lat., *gangræna nosocomialis* (seu *nosocomiorum*). Fr., *gangrène d'hôpital.* Ger., *Hospitalbrand.* It., *gangrena di spidale.* Sp., *gangrena de hospital.* A serpiginous, phagedænic, traumatic diphtheria consisting in a serpiginous necrosis arising from specific causes (probably from bacteria which do not appear to be identical with diphtheritic fungi) and spreading over fresh or granulating wounds, the surfaces of which, together with the neighboring skin, are transformed into a slimy, yellow pulp, or into crater-like depressions penetrating deep into

the tissue. [A, 326 (α, 21).]—**Hot g.** Fr., *gangrène chaude.* True g. (*i. e.*, that accompanied by inflammation, as distinguished from cold g., or sphacelus). [L, 107.]—**Humid g.** Lat., *gangræna humida.* Fr., *gangrène humide.* That form of g. in which the affected part contains more or less decomposed blood or other fluids. [L, 107.]—**Idiopathic g.** G. not traceable to any injury to the affected parts or to impairment of its blood supply.—**Indirect traumatic g.** A variety seen in children or old people after the application of a mild irritant to the skin, such as a blister. [E.]—**Infantile g.** Spontaneous g. occurring in children. [α, 34.]—**Inflammatory g.** See *Acute g.*—**Inodorous g.** See *Odorless g.*—**Local g.** A circumscribed g. produced by trauma or thrombosis. [α, 34.]—**Metastatic g.** G. occurring in a metastatic inflammation. [α, 34.]—**Mixed g.** G. in which there are both dry and moist patches. [α, 34.]—**Molecular g.** Fr., *gangrène moléculaire.* Necrosis of molecules of tissue, as in ulceration. [α, 34.]—**Moist g.** See *Humid g.*—**Multiple g. of the skin in infants.** See Ecthyma *gangrænosum.*—**Mummified g.** See *Dry g.*—**Odorless g.** Fr., *gangrène sans odeur.* G. in which there is no odor, as in g. by colliquation. [α, 34.]—**Potato g.** Potato murrain; a disease of the *Solanum tuberosum*, characterized by the rapid putrescence of the leaves and stems, and by the softening and rotting of the tubers. Its ravages have produced several famines in Ireland. It is caused by a microscopic fungus (*Peronospora infestans*). [B, 19, 77, 185 (α, 35).]—**Pressure g.** Fr., *gangrène par compression.* Ger., *Druckgangrän.* G. due to prolonged pressure upon the affected part.—**Primary g.** G. in which the death of the affected part occurs primarily, as in a burn. [α, 34.]—**Puerperal g.** Arterial g. occurring in a puerpera. [α, 34.]—**Pulpy g.** See *Hospital g.*—**Purpuric g.** See *Scorbutic g.*—**Raynaud's symmetrical g.** See Asphyxia *localis cum gangræna symmetrica.*—**Scorbutic g.** G. caused by scurvy. [α, 34.]—**Secondary g.** Fr., *gangrène secondaire.* G. following an acute inflammation. [α, 34.]—**Senile g.** Lat., *gangræna senilis.* Fr., *gangrène sénile.* Ger., *Altersbrand.* A variety of dry g. of the toes or feet, arising in the aged from diminished power of the heart's action, together with atheromatous degeneration of the arteries. [A, 326 (α, 21).]—**Senile g. of the brain.** Necrotic softening of the brain from arteriosclerosis, thrombosis, or embolism in aged persons. [α, 34.]—**Septic g.** Lat., *gangræna septica.* Fr., *gangrène septique.* Ger., *septisches Gangrän.* 1. G. with putrefaction of the affected tissue. 2. G. due to septic poisoning.—**Sloughing hospital g.** A form of hospital g. in which the tissues die *en masse*, forming pale, ash-colored, pultaceous, and highly offensive sloughs. To be distinguished from ulcerous hospital g. [E.]—**Soft g.** See *G. by colliquation.*—**Specific septic g.** Of H. Cripps, g. caused by a specific septic infection, as in hospital g., etc. [α, 34.]—**Splenic g.** Acute splenitis in which softening has occurred. [α, 34.]—**Spontaneous g.** Lat., *gangræna spontanea.* Fr., *gangrène spontanée.* G. not due to injury.—**Spreading g.** See *Acute inflammatory g.*—**Static g.** G. due to circulatory obstruction, as in strangulated hernia. [E.]—**Symmetrical g.** See Asphyxia *localis cum gangræna symmetrica.*—**Sympathetic g.** See *Spontaneous g.*—**Tachetic g.** Fr., *gangrène tachetée.* A form of g. attended by the appearance of spots on various parts of the body. The eruption is generally ecchymotic, and of greater or less extent. The disease is supposed to be due to some unknown blood poisoning. ["Med. Times and Gaz.," May 12, 1883, p. 541 (E).]—**Thrombotic g.** G. due to thrombosis.—**Traumatic g.** Fr., *gangrène traumatique.* G. caused by direct violence, mechanical or chemical. [E.]—**Trophic g.** G. caused by the disturbances of nutrition following lesions of the trophic nerves. [α, 34.]—**Ulcerous g.** [Delpech]. The phagedæna gangrænosa of Boggie. [E.]—**Ulcerous hospital g.** A form of hospital g. attended by violent ulcerative action, the wound attacked rapidly spreading, and the skin and the subcutaneous and connective tissues rapidly ulcerating and disappearing. [E.]—**Venous g.** See *Static g.*—**Visceral g.** Fr., *gangrène viscérale.* G. of a viscus, usually secondary to a constitutional infection. [α, 34.]—**White g.** Fr., *gangrène blanche.* A peculiar and very rare form of g. marked by a dull-white color. It usually appears as a circumscribed spot on the foot or leg, and runs a slow course. It is a disease of early adult life, due probably to a constitutional cause of which little is known. [Moore (E, 4).]

GANGRÈNE (Fr.), n. Ga^{3}n^2-gre^{2}n. See Gangrene.—**G. blanche.** See *White* gangrene.—**G. de Bussorah.** See *Aleppo* boil.—**G. des riches.** G. produced by alterations of the blood in consequence of excessive gormandizing. [α, 34.]—**G. des Solonois.** See *Gangrenous* ergotism.—**G. d'hôpital.** See *Hospital* gangrene.—**G. emphysémateuse.** See Gangræna *emphysematosa.*—**G. foudroyante.** See *Acute inflammatory* gangrene.—**G. froide.** See *Cold* gangrene.—**G. galopante, G. (gazeuse) foudroyante (traumatique).** A rapidly developed gangrene attended by great swelling, lividity of the skin, and gaseous distension, with an intense typhoid condition; often running its course to a fatal termination in twenty-four hours. It is always due to a specific germ. [Trifaud, "Rev. de chir.," Oct., Nov., Dec., 1883 (E).]—**G. glycoémique, G. glycohémique.** See *Glycœmic* gangrene.—**G. inopexique.** Gangrene due to inopexia. [α, 34.]—**G. massive.** A spontaneous g., affecting the extremities, caused by parenchymatous neuritis of peripheric nerves. [Pitres and Vaillard, "Arch. de physiol. norm. et pathol.," 1885, 1; "Gaz. hebd. de méd. et de chir.," Feb. 27, 1885, p. 149 (α, 34).]—**G. multiple.** Gangrene developing contemporaneously in different localities. [α, 34.]—**G. palustre.** Gangrene occurring in patients affected with malarial fever. It is usually of embolic origin. [α, 34.]—**G. par coagulation.** See *Coagulation* necrosis.—**G. par colliquation.** See Gangrene *by colliquation.*—**G. par compression.** See *Pressure* gangrene.—**G. par congélation.** See Frost-bite.—**G. sans odeur.** See *Odorless* gangrene.—**G. sèche.** See *Dry g.*—**G. symétrique.** See Asphyxia *localis cum gangræna symmetrica.*—**G. tachetée.** See *Tachetic* gangrene.—**G. typhoïdique.** Gangrene occurring during the course of typhoid fever. [α, 34.]—**G. viscérale.** See *Visceral* gangrene.—**G. vulvaire.** Gangrene of the labia majora or minora, occurring between the second and tenth days after parturition. [α, 34.]

GANGRENESCENCE, n. Ga^{2}n^2-gre^{2}n-e^{2}s'e^{2}ns. See Gangrænescentia.

GANGRENESCENT, adj. Ga^{2}n^2-gre^{2}n-e^{2}s'e^{2}nt. Lat., *gangrænescens.* Becoming gangrenous.

GANGRENOID, adj. Ga^{2}n^2'gre^{2}n-oid. Lat., *gangrænodes* (from γάγγραινα, an eating sore, and εἶδος, resemblance). Resembling gangrene.

GANGRENOPSIS (Lat.), n. f. Ga^{2}n^2(ga^{3}n^2)-gre^{2}n(gran)-ops'-i^{2}s. See Gangrænopsis.

GANGRENOUS, adj. Ga^{2}n^2'gre^{2}n-u^{3}s. Gr., γαγγραινικός. Lat., *gangrænosus.* Of the nature of, pertaining to, or in a state of gangrene.

GANGSALAN (Japan.), n. The genus *Punica.* [B, 121 (α, 24).]

GANGUE, n. Ga^{2}n^2. Fr., *g.* Ger., *Gangart.* An amorphous intercellular or enveloping material. [B, 107 (α, 27).]—**G. cellulaire** (Fr.). In botany, the primordial parenchyma. [B, 121 (α, 24).]

GANI KÁRIKÁ (Sanscr.), n. The *Clerodendron phlomoides.* [A, 479 (α, 21).]

GANITERBAUM (Ger.), n. Ga^3-net'er-ba^3-u^{4}m. See Elæocarpus.

GANITRE (Fr.), n. Ga^3-netr'. See Elæocarpus.—**G. à feuilles entières.** See Elæocarpus *integrifolia.*—**G. denté en scie.** See Elæocarpus *serrata.*—**G. des cabanes.** The *Elæocarpus tectorum.* [B, 173 (α, 24).]—**G. lancéolé.** See Elæocarpus *lanceolatus.*—**G. redjosso.** The *Elæocarpus redjosso.* [B, 173 (α, 24).]

GANITRUS (Lat.), n. m. Ga^{2}n(ga^{3}n)'i^{2}t-ru^{3}s(ru^{4}s). Fr., *ganitre.* Ger., *Ganiterbaum.* Of Gärtner, see Elæocarpus.—**G. oblongus.** See Elæocarpus *integrifolia.*—**G. serratus.** Fr., *ganitre denté en scie.* See Elæocarpus *serrata.*

GÁNJÁ (Hind., Beng., Mah.), n. The *Cannabis sativa* and its flowering tops. ["Ind. Med. Gaz.," Oct., 1885, p. 320.]

GANJH (Hind.), n. The *Andropogon muricatum.* [B, 172 (α, 24).]

GANJICA (Sanscr.), **GANJIKA** (Sanscr.), n's. The genus *Cannabis*, especially *Cannabis sativa.* [B, 92 (α, 14).]

GANNA (Beng., Hind.), n. The *Saccharum officinarum.* [B, 172 (α, 24).]

GANNE (Fr.), n. Ga^{3}n. The *Molinia cærulea.* [B, 121 (α, 24).]

GANNEAU (Fr.), n. Ga^{3}n-no. The *Aquilegia vulgaris.* [B, 121 (α, 24).]

GANNILLE (Fr.), n. Ga^{3}n-ne^{2}l. The *Caltha palustris* and the *Ranunculus ficaria.* [B, 121, 173 (α, 24).]

GANOID, adj. Gan'oid. Lat., *ganoideus* (from γάνος, brightness, and εἶδος, form). Fr., *ganoïde.* In ichthyology, having brilliant scales, belonging to the *Ganoidea*, or *Ganoidei*, the g. fishes, "having an osseous or cartilaginous skeleton with mesal and paired fins, the hind pair abdominal; gills free, rarely attached to the walls of the gill-cavity, one external gill-opening only on each side; possessed of gill-covers; the air-bladder with a pneumatic duct; the ova impregnated after extrusion; the embryo sometimes with external gills"; divided into the *Placodermei*, *Acanthodini*, *Dipnoi*, *Chondrostei*, *Polypteroidei*, and *Amioidei.* [L, 20, 41.]

GANOIN [Wilk], n. Ga'no-i^{2}n. From γάνος, brilliant. Fr., *émail* [Agassiz]. A hard, transparent substance covering the outer surface of the scales of ganoid fishes. [L, 14.]

GANPI (Jap.), n. The *Lychnis grandiflora.* [B, 121 (α, 24).]

GANS (Ger.), n. Ga^{3}ns. The goose. See Anser.—**Gänseblümchen.** See Bellis *perennis.*—**Gänseblume.** See the major list.—**Gänsebrust.** See Pectus *carinatum.*—**Gänsedistel.** See the major list.—**Gänsefett.** See Adeps *anserinus.*—**Gänsefingerkraut.** The *Potentilla anserina.* [B, 180 (α, 24).]—**Gänsefuss.** See the major list.—**Gänserich.** See the major list.

GÄNSEBLUME (Ger.), n. Gans'e^2-blum-e^2. See Daisy and Bellis.—**Blaue G.** The *Globularia vulgaris.* [B, 180 (α, 24).]—**Grosse G.** See Chrysanthemum *leucanthemum.*

GÄNSEDISTEL (Ger.), n. Gans'e^2-di^{2}st-e^{2}l. The genus *Sonchus.* [B, 180 (α, 24).]—**Gemeine G.** The *Sonchus oleraceus.* [B, 180 (α, 24).]—**Rauhe G.** The *Sonchus asper.* [B, 180 (α, 24).]

GÄNSEFUSS (Ger.), n. Gans'e^2-fus. 1. The genus *Chenopodium.* [B, 180 (α, 24).] 2. See Pes *anserinus.*—**Bastard-G.** See Chenopodium *hybridum.*—**Dorf-G.** See Chenopodium *bonus Henricus.*—**Eichenblättriger G.** The *Chenopodium botrys.* [B, 180 (α, 24).]—**Grosser G.** See Pes *anserinus major.*—**Quinoa-G.** The *Chenopodium quinoa.* [B, 180 (α, 24).]—**Rother G.** See Chenopodium *rubrum.*—**Stechapfelblättriger G.** The *Chenopodium hybridum.* [B, 180 (α, 24).]—**Stinkender G.** See Chenopodium *vulvaria.*—**Traubiger G.** See Chenopodium *botrys.*—**Wohlriechender G.** See Chenopodium *ambrosioides.*—**Wurmwidriger G.** See Chenopodium *anthelminthicum.*

GÄNSERICH (Ger.), n. Gans'e^2-ri^{2}ch^2. The *Potentilla anserina.* [B, 121, 180 (α, 24).]—**Goldener G.** The *Alchemilla vulgaris* and *Alchemilla alpina.* [B, 48 (α, 14).]

GANSO (Jap.), n. The *Pteris nervosa.* [B, 121 (α, 24).]

GANT (Fr.), n. Ga^{3}n^2. A glove. [α, 14.]—**G. de bergère, G. de Notre-Dame.** The *Digitalis purpurea*, the *Aquilegia vulgaris*, and the *Campanula trachelium.* [B, 121, 173 (α, 24).]—**G. des dames.** See Condom.

GANTELÉE (Fr.), n. Ga^{3}n^2-te^2-la. 1. The *Digitalis purpurea.* 2. The *Campanula trachelium.* [B. 173; L, 87 (α, 21).]

GANTELET (Fr.), n. Ga^{3}n^2-te^2-la. See CHEIROTHECA and DIGITALIS *purpurea*.

GANTELINE (Fr.), n. Ga^{3}n^2-te^2-len The *Clavaria coralloides* and other species of *Clavaria*. [B, 121, 173 (*a*, 24).]—**G. (menotte) grise.** See CLAVARIA *cinerea*.

GANTILIER (Fr.), **GANTILLIER** (Fr.), n's. Ga^{3}n^2-te-le-a. See GANTELÉE.

GANTU-BHARANGE (Hind.), n. The root of a species of *Clerodendron*, probably the *Clerodendron serratifolium*; used for catarrhal affections. [B, 46 (*a*, 14).]

GANZ (Ger.), adj. Ga^{3}nts. See ENTIRE.—**G.-einfach.** Not branched. [B, 123 (*a*, 24).]—**G'furchend.** See HOLOBLASTIC.—**G.-randig.** Of a leaf, entire. [B, 123 (*a*, 24).]

GÁOZABÁNA (Pers., Hind., Beng., Bomb.), n. The *Onosma bracteatum*. [A, 479 (*a*, 21).]

GAP, n. Ga^{2}p. A cleft or opening.—**Foliar g.** In the *Filices*, a mesh in the vascular-bundle cylinder, from the margin of which vascular bundles pass in to a leaf. [B, 279.]

GAPE, n. Gap. 1. In ornithology, opening of the mouth; the area of the opened mouth. 2. In the pl., *g's*, a disease of young graminivorous birds attended with much gaping, caused in fowls by the *Sclerostoma syngamus* and in grouse by the *Strongylus pergracilis trachealis*. [B; L, 56, 343.]—**G.-worm.** The *Sclerostoma syngamus* or the *Strongylus pergracilis*. [B.]

GAPING, adj. Gap'i^{2}n^2. Lat., *oscitans*. Fr., *béant*. Ger., *gähnend*. Yawning, wide open.

GAR (Ar.), n. The *Laurus nobilis*. [B, 92, 121 (*a*, 24).]

GARADALA (Mah.), n. The *Entada pusætha*. [A, 479 (*a*, 21).]

GARADO (Hind.), n. An intoxicating drink made from the leaves, tops, and seeds of *Cannabis sativa*. [A, 479 (*a*, 21).]

GARAIL, n. A Brahman name for the *Entada scandens*. [B, 121 (*a*, 24).]

GARAIS (Fr.), n. Ga^3-re^2. The *Euonymus europœus*. [B, 173 (*a*, 24).]

GARAJA-KÁ-TELA (Hind., Bomb.), n. The *Dipterocarpus turbinatus*. [A, 479 (*a*, 21).]

GARAJA-PHALA (Beng.), n. The *Bryonia epigœa*. [A, 479 (*a*, 21).]

GARAMÁLAHA (Hind.), n. The *Cassia fistula*. [A, 479 (*a*, 21).]

GÁRAMBI (Mah.), n. The *Entada pusætha*. [A, 479 (*a*, 21).]

GARAMBULLO, n. Ga^2-ra^{3}m-bu^{4}l'yo. In Mexico, the *Arctostaphylos discolor*. [B, 121 (*a*, 24).]

GARANCE (Fr.), n. Ga^2-ra^{3}n^{2}s. See RUBIA and MADDER.—**Décoction de g. alcaline.** See *Decoctum* RUBIÆ *compositum*.—**Extrait alcoolique de g.** See *Extractum* RUBIÆ *tinctoriæ alcoholicum*.—**Extrait aqueux de g.** See *Extractum* RUBIÆ *tinctoriæ aquosum*.—**G. à feuilles en cœur.** The *Rubia cordifolia*. [B, 173 (*a*, 24).]—**G. d'Alsace.** See *Alsatian* MADDER.—**G. de chien.** The *Asperula cynanchica*. [B, 173 (*a*, 24).]—**G. de Hollande.** See *Dutch* MADDER.—**G. de Smyrne.** See *Smyrna* MADDER.—**G. des teinturiers.** The *Rubia tinctorum*. [B, 173 (*a*, 24).]—**G. du Chili.** The *Rubia chilensis*. [B, 173 (*a*, 24).]—**G. étrangère.** The *Rubia peregrina*. [B, 173 (*a*, 24).]—**G. manjith.** The *Rubia manjith*. [B, 173 (*a*, 24).]—**Petite g.** The *Asperula cynanchica*. [B, 173 (*a*, 24).]—**Poudre de g. composée.** See *Pulvis* RUBIÆ *tinctoriæ compositus*.

GARANCIN, n. Ga^{2}r'a^{2}n-si^{2}n. Fr., *garancine*. Ger., *G., Krappkohle*. It., *garanzina*. Sp., *garancina*. The coloring principle of madder; or a preparation containing in a concentrated form the coloring principles of madder, obtained by carbonizing the latter with sulphuric acid. [B, 270; L, 41, 44 (*a*, 14).]

GARAPATA (Sp.), n. Ga^3-ra^{3}pa^3'ta^3. See PULEX *penetrans*.

GARAS (Fr.), n. Ga^3-ra^3. See EUONYMUS *europœus*.

GARAUMA, n. Ga^3-ra^3'um-a^3. In Brazil, the *Melanoxylon brauna*. [B, 121 (*a*, 24).]

GARAVANCE (O. Fr.), n. Ga^3-ra^3-va^{3}n^{2}s. See GARBANCE.

GARB, n. Ga^{3}rb. 1. The *Salix babylonica*. 2. A name for certain species of *Populus*. [B, 121 (*a*, 21).]

GARBANCE (Fr.), n. Ga^{3}r-ba^{3}n^{2}s. The *Cicer arietinum*. [B, 121 (*a*, 24).]

GARBANZO (Sp.), n. Ga^{3}r-ba^{3}n'tho. The *Cicer arietinum*. [B, 121 (*a*, 24).]—**G. de cura.** The *Centaurea calcitrapa*. [B, 121 (*a*, 24).]—**G. de Filipinas.** The *Mucuna mitis*. [B, 121 (*a*, 24).]

GARBE (Ger.), n. Ga^{3}rb'e^2. 1. The genus *Achillea*. 2. The *Carum carvi*. 3. The corona radiata. [I, 30 (K).]—**Balsamg', Feldg'.** The *Achillea millefolium*. [B.]—**G'nkraut.** The herb of the *Achillea millefolium*. [B, 270.]—**Gemeine G., Schafg'.** The *Achillea millefolium*. [L, 80.]—**Wilde G.** The *Spiræa filipendula*. [L, 80.]

GARBHAGHÁTINI (Sanscr.), n. The *Gloriosa superba*. [A, 479 (*a*, 21).]

GARBHA PHULA (Bomb.), n. The *Anastatica hierochuntica*. [A, 479 (*a*, 21).]

GARBLED, adj. Ga^{3}r'b'ld. From O. Fr., *grabeler*, to examine closely. Freed from worthless material, selected for the market (said of crude drugs).

GARCINIA (Lat.), n. f. Ga^{3}r-si^{2}n(ki^{2}n)'i^2-a^3. Fr., *garcinie*, *g.* Ger., *Garcinie*. Of Linnæus, a genus of the *Guttiferæ*. The *Garcinieæ* (Fr., *garciniées*) are: Of De Candolle and others, a tribe of the *Guttiferæ* (of Endlicher, a tribe [of Baillon, a series] of the *Clusiaceæ*), comprising *G.*, *Rheedia*, etc.; of Reichenbach, a division of the *Guttiferæ*, comprising the *Canelleæ*, *Calophylleæ*, and *Mangostaneæ*; of Bartling, an order of the *Guttiferæ*, comprising *Clusia*, *Stalagmites*, *Arrudea*, *G.*, *Rheedia*, *Pentadesma*, etc. [B, 1, 42, 121, 170, 173, 180 (*a*, 24).]—**G. acuminata.** The *G. morella*. [B, 212 (*a*, 35).]—**G. cambogia, G. cambogioides.** Fr., *garcinie de Ceylan*. Ger., *guttabringende Garcinie, unächter Guttibaum*. A species growing in the East Indies, especially in Malabar and Travancore. It yields a semi-transparent, very adhesive pigment, formerly known as Ceylon or Cinghalese gamboge, though this is now known to be the product of another tree (see *Ceylon* GAMBOGE). The rinds of the ripe fruit are acid and edible, and in Ceylon are dried and used as a condiment. [B, 19, 172, 173, 180 (*a*, 24).]—**G. celebica.** A species found in the Moluccas and the East Indies, and cultivated in the West Indies and Mascarene Islands. The fruits are edible, and are used as a febrifuge. The tree yields a colorless gum or resin. [B, 180 (*a*, 24).]—**G. cochinchinensis.** Fr., *garcinie de Cochin-Chine*. Ger., *Birnförmige Garcinie*. A species found in Cochin China and the Moluccas. It yields Siamese gamboge. The leaves and the acid fruits are eaten. [B, 173, 180 (*a*, 24).]—**G. cowa.** A species growing in Chittagong and yielding an inferior sort of gamboge. The fruits, though of rather an unpleasant odor, are eaten. [B, 180 (*a*, 24).]—**G. elliptica.** A species perhaps identical with *G. cowa*. [B (*a*, 24).]—**G. gambogia.** See *G. cambogia*.—**G. Gaudichaudi.** According to De Lanessan, the *G. morella*. [B, 212 (*a*, 35).]—**G. gutta.** See *G. morella*.—**G. Hanburii, G. Hanburyi.** Dom-rond; the species (according to some, *G. morella*, var. *pedicellata*) recognized by the pharmacopœias as the source of the official gamboge. It is a tree with handsome laurel-like foliage and small yellow flowers, growing in Cambodia, Siam, and in the southern parts of Cochin-China. [B, 5, 18 (*a*, 24).]—**G. indica.** Fr., *g. de l'Inde*. A species indigenous to the coast region of western India. The seeds yield an oil much used in India in cases of chapped skin, and also a concrete oil or whitish fat, known as kokum butter (*garciniæ purpureæ oleum* [Ind. Ph.]), which is employed by the natives as a healing application, and is well suited as a vehicle for some pharmaceutical preparations. The fresh fruit is acid and is used as an ingredient in curries, and by the apothecaries of Goa for preparing a fine purple syrup. [B, 18, 172 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]—**G. kola.** A tree, 10 to 20 feet high, growing in tropical Africa, and closely resembling *G. morella*. The fruit, which is of about the size of an apple, contains 3 or 4 large seeds surrounded by a yellowish sour pulp. These seeds, which are the *male kola* or *bitter kola* of the Africans, have a very bitter, astringent, and aromatic taste, and are said to be slightly stimulant and aphrodisiac. [Heckel and Schlagenhaffen, cited in "New Comm. Pl. and Drugs.," No. 8, 1885, p. 5 (B).]—**G. kydia.** Ger., *genabelte Garcinie*. A species found in India and Farther India. The fruits have a sharp, pleasant, acid taste, and are used medicinally like lemons. The tree affords an inferior kind of gamboge. [B, 180 (*a*, 24).]—**G. lanceolata.** A species cultivated in Silhet for its savory fruit. [B, 180 (*a*, 24).]—**G. lateriflora, G. lobulosa.** See *G. morella*.—**G. malabarica.** Fr., *garcinie de Malabar*. A species yielding a purgative resin, also a variety of glue used to bind books and to preserve them from insects and as a covering for nets. [B, 173 (*a*, 24).]—**G. mangostana.** Fr., *mangoustan*. Ger., *Mangostangarcinie, wohlschmeckende Garcinie*. A species indigenous to the Molucca Islands and the Indian Archipelago, and cultivated in India for its very delicate and palatable fruit. The fleshy pericarp is astringent, and is used in dysentery, in chronic diarrhœa, and as a febrifuge. The bark of the stem and the leaves are used also in diarrhœa, and as a gargle for sore mouth and throat. In England they are sometimes substituted for bael. The Chinese use the bark as a black dye. The decoction of the peeled fruit (*extractum antidysentericum aquosum*) is used in the Philippine Islands in chronic diarrhœa and dysentery, and in chronic affections of the uterus, bladder, and urethra. [B, 5, 19, 173, 180 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxv (*a*, 14).]—**G. morella.** Pers., Hind., *gotá ganaba*. Darambo; a species found in India and Ceylon, yielding pipe gamboge. It has, according to some, two varieties, the var. *pedicellata* and the var. *sessilis*, though by Sir Joseph Hooker the former is considered a distinct species. The latter also yields gam-

GARCINIA MANGOSTANA. [A, 327.]

boge of good quality. [B, 5, 18, 180 (*a*, 24).]—**G. morella, var. pedicellata.** See *G. Hanburii.*—**G. morella, var. sessilis.** See under *G. morella.*—**G. papilla.** See *G. cambogia.*—**G. pedicellata.** See *G. Hanburii.*—**G. pedunculata.** Ger., *gestielte Garcinie.* A Bengal species. The large fruits have the acid, pleasant taste of lemons, and, like the latter, are used as a food and to make a cooling beverage. [B, 180 (*a*. 24).]—**G. pictoria.** Ger., *Maler-Garcinie.* The Mysore gamboge-tree; a species found in the high mountain lands of Wynaad, and producing a variety of gamboge. The seeds yield a non-purgative oil; used chiefly as a lamp-oil by the poor in place of ghee, and as an antiscorbutic. According to Sir J. Hooker, this species is identical with *G. morella;* according to others, with *Hebradendron gambogioides;* according to Christison, it is distinct from both. [B, 5, 18, 172, 180 (*a*, 24).]—**G. purpurea.** See *G. indica.*—**G. travancorica.** A species found in Travancore and the Tinnevelly Ghats, yielding, according to its discoverer, Bedome, much bright-yellow gamboge, which is not, however, exported. [B, 18, 77 (*a*, 35).]—**G. zeylanica.** See *G. cambogia.*—**Succus garciniæ cambogiæ.** See GAMBOGE.

GARCINIE (Ger.), n. Ga^{3}r-tse-ne′. See GARCINIA.—**Birnförmige G.** See GARCINIA *cochinchinensis.*—**Ceylonische G.** See GARCINIA *cambogia.*—**Genabelte G.** See GARCINIA *kydia.*—**Gestielte G.** See GARCINIA *pedunculata.*—**Guttabringende G.** See GARCINIA *cambogia.*—**Maler-G.** See GARCINIA *pictoria.*—**Wohlschmeckende G.** See GARCINIA *mangostana.*

GARDÈNE (Fr.), n. Ga^{3}r-de^{2}n. See GARDENIA.—**G. à feuilles de jasmin.** See RANDIA *scandens.*—**G. à grandes fleurs.** See GARDENIA *grandiflora.*—**G. à larges fleurs.** See GARDENIA *florida.*—**G. des haies.** See GARDENIA *dumetorum.*—**G. gommifère.** See GARDENIA *gummifera.*

GARDENER'S-DELIGHT, GARDENER'S-EYE, n's. Ga^{3}rd′nu^{6}rz-de-lit′, -i′. The *Lychnis coronaria.* [B, 275 (*a*. 24).]

GARDENER'S-GARTERS, n. Ga^{3}rd′nu^{5}rz-ga^{3}rt′u^{5}rz. The *Phalaris arundinacea variegata.* [B, 275 (*a*, 24).]

GARDEN-GATE, n. Ga^{3}rd′n-gat′. The *Viola tricolor.* [B, 275 (*a*, 24).]

GARDENIA (Lat.), n. f. Ga^{3}r-den(dan)′i^2-a^3. From *Garden,* an American botanist. Fr., *gardène, gardénie.* Ger., *Gardenie.* A genus of the *Gardeniaceæ* (or of the *Gardeniæ*, or the *Gardenariæ*). The *Gardeniaceæ* of Humboldt, Bonpland, and Kunth are a section of rubiaceous plants, consisting of *Genipa, Gardenia, Randia, Mussænda,* etc., or (De Candolle) of the *Sarcocephaleæ* and *Gardenieæ.* The *Gardeniæ* of Richard are a tribe of the *Rubiaceæ,* containing the genera of the *Gardeniaceæ,* and *Argostemma, Spicillaria, Bertiera,* etc. The *Gardeniariæ* of Reichenbach are a section of the *Cinchoneæ,* including the *Hamelieæ, Isertieæ,* and *Gardenieæ.* [B, 42, 173, 180 (*a*, 24).]—**G. aculeata.** See RANDIA *aculeata.*—**G. arborea.** A tree found in the East Indies, yielding a sort of elemi; by some regarded as identical with *G. gummifera.* [B, 173, 180 (*a*, 24).]—**G. campanulata.** Ger., *glockenförmige Gardenie.* A Bengal species bearing large yellow berries, used by the natives as an emetic, purgative, and vermifuge. [B, 5, 180 (*a*, 24).]—**G. dumetorum.** Fr., *gardène des haies.* See RANDIA *dumetorum.*—**G. florida.** Fr., *gardène à larges fleurs, jasmin fleuri.* Ger., *jasminartige Gardenie.* A species found in Japan or China and cultivated in southern Asia for the sake of its fragrant flowers. The fruits are used in China as a cooling and soothing remedy in phthisis, fever, inflamed eyes, and skin diseases. [B, 173, 180 (*a*, 24).]—**G. genipa.** The *Genipa americana.* [B, 180 (*a*, 24).]—**G. grandiflora.** Fr., *gardène à grandes fleurs.* Ger., *grossblüthige Gardenie.* A species found in China, where it is used like *G. florida.* According to Mayer, the fruit contains crocin. [B, 5, 173, 180 (*a*, 24).]—**G. gummifera.** Fr., *gardène gommifère.* Ger., *harzbringende Gardenie.* A species found in Ceylon and Coromandel. It yields a yellow resin, similar to gum elemi, and is the source of East Indian elemi. [B, 172, 173, 180 (*a*, 24).]—**G. jasminoides.** Fr., *gardène à feuilles de jasmin.* See RANDIA *scandens.*—**G. longiflora.** Of Ruiz and Pavón, the *Randia ruiziana.* [B, 42 (*a*, 35).]—**G. lucida.** Ger., *glänzende Gardenie.* An East Indian species, resembling the *G. gummifera.* It yields a fragrant resin known in Canara and Mysore as *Dikamali* resin, said to be used in hospitals to keep flies away from sores. [B, 172, 180 (*a*, 24).]—**G. lycioides.** See RANDIA *aculeata.*—**G. medicinalis.** Ger., *heilsame Gardenie.* A species found in Guinea, where it is used medicinally. [B, 180 (*a*, 24).]—**G. mitis.** See RANDIA *mitis.*—**G. multiflora.** See RANDIA *longiflora.*—**G. pavetta.** A plant found in the East Indies, not well defined. According to Ainslie, the bark is acrid and astringent. [B, 180 (*a*, 24).]—**G. radicans.** Of Wallich, a variety of *G. florida* found in Japan, but cultivated in the East Indies and South Africa. [B, 180 (*a*, 24).]—**G. randia.** See RANDIA *aculeata.*—**G. resinifera.** See *G. lucida.*—**G. scandens.** See RANDIA *scandens.*—**G. spinosa.** See RANDIA *dumetorum.*—**G. suaveolens.** A species growing in Brazil, where it is known as *laranja do mato.* The leaves and inner husk of the fruit are used as a tonic. ["Proc. of the Am. Pharm. Assoc.," xxxiii (*a*, 14).]

GARDENIA FLORIDA. [A, 327.]

GARDENIC ACID, n. Ga^{3}r-de^{2}n′i^{2}k. Fr., *acide gardénique.* An acid, $C_{14}H_{10}O_6$, occurring in bright-red crystals, obtained by treating gardenin with nitric acid; more a quinone in character than an acid. [Stenhouse and Groves, "Proc. of the Am. Pharm. Assoc.," xxviii (*a*, 14).]

GARDENIE (Ger.), n. Ga^{3}r-da-ne′. See GARDENIA.—**Glänzende G.** See GARDENIA *lucida.*—**Glockenförmige G.** See GARDENIA *campanulata.*—**Grossblüthige G.** See GARDENIA *grandiflora.*—**Harzbringende G.** See GARDENIA *gummifera.*—**Heilsame G.** See GARDENIA *medicinalis.*—**Jasminartige G.** See GARDENIA *florida.*

GARDENIN, n. Ga^{3}rd′e^{2}n-i^{2}n. A compound, $C_{23}H_{30}O_{10}$ [Flückiger], or $C_{14}H_{12}O_5$ [Stenhouse and Groves], obtained by dissolving in alcohol the resin of *Gardenia lucida.* It forms dark-yellow, acicular crystals, fusing at 163° to 164° C. [B, 244 (*a*, 27); "Proc. of the Am. Pharm. Assoc.," xxv, xxviii (*a*, 14).]

GARDE-MALADE (Fr.), n. Ga^{3}rd-ma^3-la^{3}d. A nurse for a sick person. [A, 301.]

GARDERACANTHA (Lat.), n. f. Ga^{3}r-de^{2}r-a^2(a^3)-ka^{2}n(ka^{3}n)′-tha^3. At Lemnos, the *Centaurea benedicta.* [B, 121 (*a*, 24).]

GARDEROBE (Fr.), n. Ga^{3}rd-rob. 1. A name for various aromatic plants (the *Artemisia abrotanum, Osyris alba, Santolina chamæcyparissus,* and *Lavandula spica*), placed in closets to protect clothes from insects. 2. A fæcal evacuation. [B, 121, 173 (*a*, 24); D, 72.]

GARENCE (Fr.), n. Ga^3-ra^{3}n^{2}s. See GARANCE.

GARENT-OGUEN, n. An Iroquois name for ginseng. [B, 88 (*a*, 14).]

GARFUANA (Port.), n. Ga^{3}r-fu-a^3′na^3. In Brazil, the *Morus tinctoria.* [B, 121 (*a*, 24).]

GARGA (Tel.), n. The *Gardenia gummifera.* [B, 172 (*a*, 24).]

GARGALE (Lat.), **GARGALISMUS** (Lat.), **GARGALOS** (Lat.), n's f., m., and m. Ga^{3}rg′a^{2}l(a^{3}l)-e(a), ga^{3}rg-a^{2}l(a^{3}l)-i^{2}z(i^{2}s)′-mu^{3}s(mu^{4}s), ga^{3}rg′a^{2}l(a^{3}l)-o^{2}s. Gr., γαργαλισμός, γάργαλος (from γαργαλίζειν, to tickle). Ger., *Kitzeln.* Titillation, especially of a libidinous sort. [A, 322.]

GARGANICA (Lat.), n. f. Ga^{3}r-ga^{2}n(ga^{3}n)′i^2-ka^3. The *Thapsia g.* [A, 385.]

GARGAREON (Lat.), n. m. Ga^{3}r-gar(ga^{3}r)′e^2-o^{2}n(on). Gen., *-on′os* (*-is*). Gr., γαργαρεών. 1. The uvula. 2. The throat. [A, 311 (*a*, 21); L, 7.]

GARGARISM, n. Ga^{3}r′ga^{3}r-i^{2}z′m. Gr., γαργάρισμα. Lat., *gargarisma.* Fr., *gargarisme.* Ger., *Gurgelwasser, Gurgelmittel.* A gargle. [B, 117.]

GARGARISMA (Lat.), n. n. Ga^{3}r-ga^{3}r-i^{2}z(i^{2}s)′ma^3. Gen., *-is′matos* (*-tis*). See GARGARISM.—**G. acidulatum** [Ferr. Ph., 1832]. Fr., *gargarisme acidulé* (ou *détersif* [Fr. Cod., 1837]). Syn.: *g. adstringens acidum, g. detergens.* A mixture of 1 part of sulphuric acid, 12 parts [Ferr. Ph.] (or 32) [Fr. Cod.] of honey of roses, and 80 [Ferr. Ph.] (or 128) [Fr. Cod.] of barley-water. [B, 119 (*a*, 14).] Cf. *G. commune,* GARGARISME *émollient,* and GARGARISME *acétique.*—**G. ad aphthas.** See *G. boraxatum.*—**G. adstringens** [Ferr. Ph., 1832]. 1. A preparation made by dissolving 1 part of extractum krameriæ in 40 parts of water and adding 8 of vinegar. [B, 119 (*a*, 14).] 2. See *G. aluminosum.*—**G. adstringens acidum.** See *G. acidulatum.*—**G. aluminosum.** Fr., *gargarisme astringent* [Fr. Cod.] (ou *alumineux,* ou *antiseptique*). Sp., *gargarismo astringente* [Sp. Ph.]. Syn.: *g. astringens.* A gargle containing alum. The preparation of the present Fr. Codex is made by infusing 10 grammes of red-rose petals in 250 grammes of boiling water, straining, adding to the colature 5 grammes of potash alum and 50 grammes of honey of roses. The Sp. Ph. orders a mixture of 30 grammes of honey of roses with a solution of 4 grammes of potash alum in 500 of boiling water. Similar preparations, in which the honey of roses was replaced by honey and the decoction of rose-leaves by tincture of pimpinella or by infusion of sage, were formerly official. [B, 95, 113; B, 119 (*a*, 14).]—**G. antiphlogisticum** [Disp. fuld. 1791]. Fr., *gargarisme antiphlogistique.* A mixture of 1 part of spirit of nitrous ether with 4 parts of syrup and 48 of decoction of marsh-mallows. [B, 119 (*a*, 14).]—**G. antiscorbuticum** [Sp. Ph., 1798]. A preparation made by boiling 1 part each of *Aquilegia vulgaris, Veronica beccabunga, Nasturtium officinale, Parietaria officinalis, Salvia officinalis* and Winter's bark, and 4 parts of the root of *Rubia tinctorum* in 120 of lime-water, straining, and adding 2 parts of *spiritus cochleariæ* and 16 of honey of roses. [B, 119 (*a*, 14).]—**G. antisepticum** [Disp. fuld., 1791]. A gargle made by boiling 4 parts of the leaves of *Ruta graveolens,* 8 of cinchona, and 144 of water till reduced to two thirds, and adding 1 part of camphor triturated with mucilage of gum arabic. [B, 97 (*a*, 14).]—**G. astringens** [Fr. Cod.]. See *G. aluminosum.*—**G. boraxatum.** Fr., *gargarisme au borate de soude* [Fr. Cod.] (ou *boraté,* ou *détersif*). Syn.: *g. e borace, g. ad aphthas.* A preparation

made by digesting 10 grammes of red-rose petals in 250 grammes of boiling distilled water, straining, dissolving 5 grammes of borax, and 50 of honey of roses [Fr. Cod.]. Similar preparations, in which quince mucilage and infusion of sage formed a part, were formerly official in various pharmacopœias. [B, 95; B, 97, 119 (*a*, 14).]—**G. commune.** Fr., *hydrolat de roses rouges.* 1. A preparation made by mixing 1 part of honey of roses and 6 parts of acidulous infusion of roses [Genev. Ph., 1780]. 2. See GARGARISME *émollient.* [B, 97, 119 (*a*, 14).]—**G. detergens.** Fr., *gargarisme détersif* [Fr. Cod., 1837]. See *G. acidulatum.*—**G. emolliens.** 1. A preparation made by boiling 1 part of the fruit of *Ficus carica* and 4 parts of the root of *Symphytum officinale* in 36 of water until reduced to two thirds. [Disp. fuld. 1791]. 2. Of the Fr. Cod., see GARGARISME *émollient.* [B, 119 (*a*, 14).]—**G. nitrosum, G. refrigerans** [Disp. fuld., 1791, Lipp. Disp., 1794]. Fr., *gargarisme commun.* A mixture of 1 part of potassium nitrate, 8 parts of syrup of vinegar, and 64 of water. [B, 97, 119 (*a*, 14).]

GARGARISME (Fr.), n. Ga^{3}r-ga^{3}r i^{2}z'm. See GARGARISMA.—**G. acétique** [Pharm. Form. of the Fr. Mil. Hosp., 1821]. A mixture of 5 parts of vinegar, 6 of honey, and 40 of decoction of barley. [B, 119 (*a*, 14).]—**G. acidulé.** 1. See GARGARISMA *acidulatum.* 2. See *G. acétique.*—**G. adoucissant** [Lipp. Disp., 1794]. A preparation consisting of 1 part of marsh-mallow root, 2 parts of figs, and 36 of milk, reduced by boiling to one third. [L, 85.] Cf. GARGARISMA *emolliens* (1st def.).—**G. alumineux.** See GARGARISMA *aluminosum.*—**G. antiscorbutique** [Fr. Cod., 1837]. 1. A preparation made by infusing 1 part of species amaræ for one hour in 64 parts of boiling water, straining, and adding 8 parts of tinctura raphani and 16 of purified honey. [B, 119 (*a*, 14).] 2. See GARGARISMA *antiscorbuticum.*—**G. antiseptique.** See GARGARISMA *aluminosum.*—**G. astringent** [Fr. Cod.]. See GARGARISMA *aluminosum* and GARGARISMA *antisepticum.*—**G. boraté.** See GARGARISMA *boraxatum.*—**G. chlorhydrique.** A mixture of 1 part of pure hydrochloric acid, 30 parts of honey of roses, and 220 of distilled lettuce-water. [B, 46, 93 (*a*, 14).]—**G. chlorique** [Dan. Mil. Ph., 1808]. A preparation made by mixing 1 part of chlorine-water with 8 parts each of honey and water. [B, 119 (*a*, 14).]—**G. chloruré.** A mixture of 3 parts of solution of chlorinated soda, 6 of honey of roses, and 50 of barley-water. [B, 38, 46, 93 (*a*, 14).]—**G. commun.** See GARGARISMA *nitrosum.*—**G. détersif.** 1. See GARGARISMA *acidulatum.* 2. See GARGARISMA *commune.*—**G. détersif boraté.** See GARGARISMA *boraxatum.*—**G. émollient** [Fr. Cod.]. Lat., *gargarisma emolliens.* 1. A preparation consisting of 50 grammes of honey added to 250 grammes of barley-water (made from 5 grammes of barley) and enough water to bring the whole up to 300 grammes. [B.] 2. See GARGARISMA *emolliens* (1st def.).—**G. excitant.** See *Camphorated* GARGLE.—**G. hydrochlorique.** See *G. chlorhydrique.*—**G. ioduré.** A mixture of 1 part of potassium iodide, 8 parts of tincture of iodine, and 400 of distilled water. [L, 41, 49 (*a*, 14).]—**G. mercuriel.** A mixture of 50 parts of *liqueur de Van Swieten* [Fr. Cod.] and 70 of distilled water; or of 1 part of bichloride of mercury and 200 of infusum conii. [L, 49 (*a*, 14).]—**G. narcotique.** A solution of 3 parts of tincture of opium or belladonna in 20 of infusion of root of *Althæa officinalis.* [L, 49 (*a*, 14).] Cf. *G. opiacé.*—**G. opiacé.** A gargle made of 5 parts of tincture of opium and 200 of decoction of althæa. [B, 119.]—**G. oxymellé.** See *G. acétique.*—**G. sulfurique.** See GARGARISMA *acidulatum.*—**G. térébenthiné de Geddings.** A mixture of 1 part of oil of turpentine and 25 parts of mucilage of gum arabic. [B, 38, 46, 93 (*a*, 14).]—**G. tonique et hémostatique.** See GARGARISMA *aluminosum.*—**G. vinaigré.** See *G. acétique.*

GARGARISMUM (Lat.), n. n. Ga^{3}r-ga^{3}r-i^{2}z(i^{2}s)'mu^{3}m(mu^{4}m). See GARGARISM.

GARGARISMUS (Lat.), n. m. Ga^{3}r-ga^{3}r-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). Gr., γαργαρισμός. 1. The act of gargling. 2. An erroneous term for a gargle. [L, 50 (*a*, 14).]

GARGARIZATION, n. Ga^{3}r-ga^{3}r-i-za'shu^{3}n. Lat., *gargarisatio* (from γαργαρίσειν, to gargle). See GARGARISMUS.

GARGATHUM (Lat.), n. n. Ga^{3}r-gath(ga^{3}th)'u^{3}m(u^{4}m). An old name for a bed for the confinement of lunatics. [Laurentius (A, 325).]

GARGET, n. Ga^{3}rg'e^{2}t. 1. The *Phytolacca decandra.* [B, 19, 275 (*a*, 24).] 2. Mammitis in the cow.

GARGLE, n. Ga^{3}rg'l. Lat., *gargarisma* (from γαργαρίζειν, to wash the throat). Fr., *gargarisme.* Ger., *Gurgelmittel.* A liquid for washing the back part of the mouth and the throat by throwing the head back and expiring through the liquid.—**Bell's g.** A preparation made by mixing 1 part of sodium borate, 2 parts each of yeast and honey, and 28 of boiling water. ["Proc. of the Am. Pharm. Assoc.," vi (*a*, 14).] Cf. GARGARISMA *boraxatum.*—**Camphorated g.** [Ferr. Ph., 1832]. Fr., *gargarisme excitant.* A preparation made of 3 parts of camphor, 1 part of ether, 24 parts of syrup of sugar, and 576 of hot water. [B, 97, 119.]—**Opiate g.** See GARGARISME *opiacé.*—**Resolvent g.** [Hamb. Ph., 1804]. A preparation made by boiling 2 parts of species emollientes in sufficient water to obtain 32 of strained decoction, and adding 1 part of ammonium chloride and 8 parts of honey of roses. [L, 97 (*a*, 14).]

GARGLE, v. tr. Ga^{3}rg'l. Gr., γαργαρίζειν. Fr., *gargouiller.* Ger., *gurgeln.* It., *gargogliare, gargarizzare* Sp., *gargarizar.* To wash (the throat) with a g. [L, 56.]

GARGLING, n. Ga^{3}rg'li^{2}n^{2}. Lat., *gargarismus.* Ger., *Gurgelung.* The act of using a gargle.

GARGOL, n. Ga^{3}r'go^{2}l. See GARGET.

GARGOUILLEMENT (Fr.), n. Ga^{3}r-gu-el-y'-ma^{3}n^{2}. The gurgling sound made by liquid or gas within the body. [L, 41 (*a*, 21).]—**G. caverneux.** See *Cavernous* RÂLE.—**G. intestinal.** See BORBORYGMUS.—**G. pulmonaire.** See *Cavernous* RÂLES.

GARGOULETTE (Fr.), n. Ga^{3}r-gu-le^{2}t. See ALCARRAZA.

GARICON ABIAD (Ar.), n. The *Polyporus officinalis.* [B, 92 (*a*, 14).]

GARIDEL (Fr.), n. Ga^{3}-re-de^{2}l. The *Agaricus Garidelli.* [B, 105.]

GARIDELLA (Lat.), n. f. Ga^{3}r-i^{2}-de^{2}l'a^{3}. From *Garidel,* a French botanist. Fr., *garidelle.* A section of the genus *Nigella.* [B, 42, 121 (*a*, 24).]—**G. nigellastrum.** The *Nigella g.* [B, 121 (*a*, 24).]

GARIOT (Fr.), n. Ga^{3}-re-o. The *Geum urbanum.* [B, 121, 173 (*a*, 24).]

GARIPOT (Fr.), n. Ga^{3}-re-po. See GALIPOT.

GARIQUE (Fr.), n. Ga^{3}-rek. In Canada, an undetermined fungus used in angina. [B, 121 (*a*, 24).]

GARJARA (Sanscr.), n. The *Daucus carota.* [B, 88 (*a*, 14).]

GARLAND-FLOWER, n. Ga^{3}r'la^{2}nd-flu^{5}-u^{4}-u^{6}r. The genus *Hedychium;* also the *Daphne cneorum* and, in Australia, the *Calocephalus Brownii.* [B, 19, 121, 275 (*a*, 24).]—**Fragrant g.-f.** The *Hedychium coronarium.* [B, 275 (*a*, 24).]

GARLIC, n. Ga^{3}r'li^{2}k. A.-S., *gârleac* (from *gai,* a spear, and *leak,* the leek). See ALLIUM *sativum.*—**Bear's g.** See ALLIUM URSINUM.—**Broad-leaved g.** See ALLIUM *latifolium.*—**Common g.** See ALLIUM SATIVUM.—**Cow-g., Crow-g.** See ALLIUM *vineale.*—**English g.** See ALLIUM SATIVUM.—**Field-g.** See ALLIUM *oleraceum.*—**G.-shrub.** 1. The *Bignonia alliacea.* 2. The *Petiveria alliacea.* [B, 275, 282 (*a*, 24).]—**G.-tree.** In Jamaica, the *Cratæva tapia.* [B, 185 (*a*, 24).]—**G.-wort.** The *Sisymbrium alliaria.* [*a*, 24.]—**Golden-flowered g.** The *Allium moly.* [B, 275 (*a*, 24).]—**Great-(round-) headed g.** The *Allium ampeloprasum.* [B, 275 (*a*, 24).]—**Hedge-g.** The *Sisymbrium alliaria.* [*a*, 24.]—**Hog's-g.** The *Allium ursinum.* [A, 505 (*a*, 21).]—**Honey-g.** The genus *Nectaroscordum.* [B, 275 (*a*, 24).]—**Levant g.** The *Allium ampeloprasum.* [B, 275 (*a*, 24).]—**Long-rooted g.** The *Allium victoriale.* [B, 275 (*a*, 24).]—**Meadow-g.** Fr., *ail des près.* The *Allium pratense* (a variety of *Allium vineale*). [B, 173 (*a*, 35).]—**Oil of g.** Fr., *essence* (ou *huile*), *d'ail, moutarde du diable.* See under ALLIUM SATIVUM.—**Rush-g.** The *Allium schœnoprasum.* [A, 505 (*a*, 21).]—**Sand g.** See ALLIUM *arenarium* (1st def.).—**Sorcerers' g.** The *Allium moly.* [B, 275 (*a*, 24).]—**Spanish g.** The *Allium scorodoprasum.* [B, 275 (*a*, 24).]—**Stag's g.** The *Allium vineale.* [B, 275 (*a*, 24).]—**Syrup of g.** See *Syrupus* ALLII.—**Vinegar of g.** See *Acetum* ALLII.—**Vipers' g.** Fr., *ail serpentin.* The *Allium victoriale.* [B, 173 (*a*, 35).] See also ALLIUM *ampeloprasum.*—**Wild g.** The *Allium vineale* and the *Allium ursinum.* [B, 275 (*a*, 24).]

GARLOCK, n. Ga^{3}r'lo^{2}k. The *Sinapis arvensis.* [A, 505 (*a*, 21).]

GARMAL (Sp.), n. Ga^{3}r-ma^{3}l'. The *Zygophyllum simplex.* [B, 121 (*a*, 24).]

GARMISWYL (Ger.), n. Ga^{3}r'mi^{2}s-vu^{6}l. A place in the canton of Freyburg, Switzerland, where there is a mineral spring. [*a*, 14.]

GÄRMITTEL (Ger.), n. Gar'mi^{2}t-te^{2}l. A ferment. [A, 521.]

GARNET-BERRY, n. The fruit of *Ribes rubrum.* [B, 121, 275 (*a*, 24).]

GARNITURE (Fr.), n. Ga^{3}r-ne-tu^{6}r. The care of a part (such as the breast or the genitals after delivery) to promote comfort and prevent morbid action. [A, 76.]

GARNOTTE (Fr.), n. Ga^{3}r-no^{3}t. The *Sorghum vulgare* and the *Œnanthe pimpinelloides.* [B, 121, 173 (*a*, 24).]

GARO (Mal.), n. Of Lamarck, the genus *Aquilaria.* [B, 121 (*a*, 24).]—**Bois de g.** (Fr.). See ALOES-WOOD (2d def.).—**G. de Malacca** (Fr.). The *Aquilaria malaccensis.* [B, 121 (*a*, 24).]

GAROFALUM (Lat.), n. n. Ga^{2}r(ga^{3}r)-o^{2}f'a^{2}l(a^{3}l)-u^{3}m(u^{4}m). See CARYOPHYLLUS (1st def.).—**Fusti garofalorum.** Clove-stalks. [B, 18 (*a*, 24).]

GAROFANINI (It.), n. Ga^{3}-ro-fa^{3}'ne-ne. The *Dianthus plumarius* and other species of *Dianthus.* [B, 121 (*a*, 24).]

GAROFANO (It.), n. Ga^{3}-ro-fa^{3}'no. 1. The *Dianthus caryophyllus.* 2. A clove. [B, 121 (*a*, 24).]—**Chiodi di g.** Cloves. [B.]

GARON (Lat.), n. n. Ga(ga^{3})'ro^{2}n. See GARUM.

GAROSMUS (Lat.), n. n. Ga^{2}r(ga^{3}r)-o^{2}z(o^{2}s)'mu^{3}s(mu^{4}s). From γάρος, a small fish. The *Chenopodium vulvaria.* [B, 121 (*a*, 24).]

GAROU (Fr.), n. Ga^{3}-ru. Of the Fr. Cod., the *Daphne gnidium;* of the other pharmacopœias, the *Daphne mezereum.* [B, 5, 46, 105 (*a*, 14).]—**Baccæ g.** (Lat.). The dried fruits of *Daphne gnidium.* [B, 180 (*a*, 24).]—**Cortex g.** (Lat.). The bark of *Daphne mezereum.* [B, 180 (*a*, 24).]—**Décoction de g.** See *Decoctum* DAPHNES *mezerei.*—**Décoction de g. composée.** See *Decoctum* MEZEREI *compositum.*—**Éléolé de g.** See *Oleum* MEZEREI.—**Épispastique au g.** An epispastic consisting of the fresh bark of *Daphne gnidium.* [L, 88 (*a*, 14).]—**Extrait alcoolique de g.** See *Extractum* MEZEREI.—**Extrait (éthéré [Fr. Cod.]) de g.** See *Extractum* MEZEREI *æthereum.*—**Extract liquide de g.** See *Extractum* MEZEREI *fluidum.*—**Faux g.** See DAPHNE *mezereum.*—**G.-bark.** See *Cortex g.*—**Huile de g.** See *Oleum* MEZEREI.—**Pommade au g.** See *Unguentum* MEZEREI.—**Pommade au g. aromatisée.** See *Pomatum* MEZEREI *aromaticum.*—**Pommade épispastique au g.** [Fr. Cod.]. See *Unguentum* MEZEREI.

GAROUETTE (Fr.), n. Ga^{3}-ru-e^{2}t. See DAPHNE *gnidium.*

GAROUILLET (Fr.), n. Ga^{3}-ru-el-ya. The *Zea mais.* [B, 121 (*a*, 24).]

GAROULTE (Fr.), n. Ga^{3}-rult. The *Lathyrus cicera.* [B, 121 (*a*, 24).]

GAROUPE (Fr.), n. Ga^{3}-rup. The *Cneorum tricoccum.* [B, 121, 173 (*a*, 24).]

GAROUTE (Fr.), n. Ga^3-rut. The *Daphne mezereum*. [B, 38 (α, 14).]

GAROUTTE (Fr.), n. Ga^3-rut. 1. The *Lathyrus cicera*. 2. The *Daphne gnidium*. [B, 121, 173 (α, 24).]

GAROW, n. Ga^2-ro'. The *Achillea millefolium*. [A, 505 (α, 21).]

GARRIGA (Sp.), n. Ga^{3}r-re'ga^3. A place in the province of Barcelona, Spain, where there are hot springs and a much-frequented bathing establishment. [L, 30 (α, 14).]

GARRIS (Fr.), n. Ga^{3}r-re. A place in the department of the Basses-Pyrénées, France, where there are sulphurous springs. [A, 385.]

GARROBE (Fr.), n. Ga^{3}r-rob. A name for many leguminous plants (*e. g.*, the *Ceratonia siliqua* and various species of *Lathyrus*). [B, 121 (α, 24).]

GARROO, n. In Singapore, the wood of *Aquilaria agallocha*; used as an expectorant. ["Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).] See GARO.

GARROT, n. Ga^{2}r-rot'. Fr., *g.* Ger., *Drehstock* (1st def.), *Widerrist* (2d def.). It., *randello* (1st def.), *garese* (2d def.). Sp., *garrote*. 1. A form of tourniquet devised by Morel in 1674, which was tightened by twisting it with a stick inserted beneath it. [A, 301.] 2. The withers of the horse. [L, 180.]

GARRUBIA (Sp.), n. Ga^{3}r-ru'bi^2-a^3. 1. The *Ceratonia siliqua*. 2. The *Dolichos melanophthalmus*. [B, 121 (α, 24), 127 (α, 14).]

GARRULITAS (Lat.), n. f. Ga^{2}r(ga^{3}r)-ru^{2}l(ru^{4}l)'i^{2}t-a^{2}s(a^{3}s). Gen., *-ta'tis*. From *garrire*, to prattle. Loquacity.—**Cunni g., G. vulvæ.** An audible discharge of gas from the vagina. [A, 44.]

GARRYA (Lat.), n. f. Ga^{2}r'ri^2-a^3. From *Garry*, secretary of the Hudson Bay Company. Fr., *garrye*. A genus of cornaceous plants. The *Garryaceæ* (Fr., *garryacées*) are: Of Lindley, an order of the *Garryales*; of Endlicher and Meissner, a family of the *Juliforæ* (or of the *Cornaceæ* [Baillon and Hooker]). Brongniart doubtfully places them in the *Umbellineæ*. [B, 19, 42, 121, 170 (α, 24).]—**G. buxifolia.** Of Gray, a species indigenous to California. ["Proc. of the Am. Pharm. Assoc.," xix (α, 14).]—**G. Fadyeni.** A species found in Cuba and Jamaica. [B, 121 (α, 24).]—**G. Fremontii.** Skunk- (or quinine-) bush; a species found in California, where the leaves are used as a tonic in malarial disease. According to D. W. Ross, it contains an alkaloid, *garryine*. [B, 5 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxvii (α, 14).]

GARRYAL, adj. Gar'ri^2-a^{2}l. Lat., *garryalis*. Of or pertaining to the *Garyaceæ*; like the genus *Garrya*. [B, 121 (α, 35).]

GARRYINE, n. Ga^{2}r'ri^2-en. Fr., *g.* Ger., *Garryin*. A bitter, astringent, odorless, crystalline body, soluble in alcohol and in water, found by Ross in the leaves of *Garrya Fremontii*, and by him considered an alkaloid. [B, 270 (α, 27); "Proc. of the Am. Pharm. Assoc.," xxvi (α, 14).]

GÄRSTOFF (Ger.), n. Gar'sto^{3}f. A ferment. [A, 521.]

GARTEN (Ger.), n. Ga^{3}rt'e^{2}n. A garden; as a botanical prefix, see HORTENSIS. [L, 80.]

GARTER, n. Ga^{3}rt'u^{5}r. Lat., *tæniola*. Fr., *jarretière*. Ger., *Strumpfband*. It., *giarrettiera*, *legaccio*. Sp., *jarretera*, *liga*. A band to encircle the leg to hold the stocking up.—**Lithotomy g's.** A bandage employed to tie the hands and feet together in the lithotomy posture. [α, 34.]—**G.-tree.** See GADRISE.

GARTHAGEL (Ger.), **GARTHEGEN** (Ger.), **GARTHEIL** (Ger.), n's. Ga^{3}rt'ha^{3}g-e^{2}l, -hag-e^{2}n, -hil. The *Artemisia abrotanum*. [B, 180 (α, 24).]

GARUGA (Lat.), **GARUJA** (Lat.), n's f. Ga(ga^3)-ru^2(ru)'ga, -ja^3(ya^3). A genus of the *Burseraceæ*. [B, 42 (α, 24).]—**G. pinnata.** A species found in India, where it is used in tanning. In Malabar the leaves are used both internally and externally in hepatic complaints. The fruit is eaten by the natives. [B, 180 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]

GARULEUM (Lat.), n. n. Ga(ga^3)-ru^{2}l(rul)'e^2-u^{3}m(u^{4}m). A genus of composite plants. [B, 270.]—**G. bipinnatum.** Syn.: *Osteospermum bipinnatum*. A species found growing at the Cape of Good Hope, the root of which is used for snake-bites. [B, 270.]

GARUM (Lat.), n. n. Gar(ga^{3}r)'u^{3}m(u^{4}m). Gr., γάρον. Of the ancients, a sort of laxative sauce made from the drippings of certain salted fishes; used as an application to foul ulcers and as an enema in dysentery. [A, 318, 325, 385; L, 30, 41, 50 (α, 14).]

GÄRUNG (Ger.), n. Gar'un^2. See GÄHRUNG.

GARVANCE (Fr.), **GARVANE** (Fr.), n's. Ga^{3}r-va^{3}n^{2}s, -va^{3}n. The *Cicer arietinum*. [B, 121, 173 (α, 24).]

GARYOPHYLLATA (Lat.), n. f. Ga^{2}r(ga^{3}r)-i^2(u^6)-o(o^3)-fi^{2}l-(fu^{6}l)-lat(la^{3}t)'a^3. See CARYOPHYLLATA.

GARYOPHYLLON (Lat.), **GARYOPHYLLUM** (Lat.), n's n. Ga^{2}r(ga^{3}r)-i^2(u^6)-o(o^3)-fi^{2}l(fu^{6}l)'lo^{2}n, -lu^{3}m(lu^{4}m). See CARYOPHYLLON.

GARYOPHYLLUS (Lat.), n. m. Ga^{2}r(ga^{3}r)-i^2(u^6)-o(o^3)-fi^{2}l-(fu^{6}l)'lu^{3}s(lu^{4}s). See CARYOPHYLLUS.

GAS, n. Ga^{2}s. Probably related to Ger., *Geist*, spirit. Fr., *gaz*. Ger., *G.* It., Sp., *g.* An aeriform fluid whose particles tend continually to diverge from each other, so that the body itself tends constantly to increase in volume in all directions, and fills the whole of the vessel in which it is contained. The term was first employed by Van Helmont, who applied it to the exhalation arising from fermenting vegetable substances. The term without qualification denotes in common parlance illuminating g. [B.]—**Acid g.** See *Calcareous g.*—**Air-g.** Illuminating g. made by charging air with a combustible g., *e. g.*, with the vapor of certain hydrocarbons. [B, 116.]—**Alcoholic g.** Alcohol volatilized into the state of vapor. [B, 91.]—**Alkaligen g.** A name originally proposed for nitrogen. [B, 91.]—**Ammoniacal g.** Ammonia. [A, 1; B, 91.]—**Aqueous g.** The vapor of water. [B, 91.]—**Azotic g.** Nitrogen. [B, 91.]—**Beständiges G.** (Ger.). See *Permanent g.*—**Blutg'** (Ger.). See *G. of the blood.*—**Calcareous g., Chalk-g.** An old name for carbon dioxide. [B, 86.]—**Chlorg'** (Ger.). See CHLORINE.—**Chlorisches g.** (Ger.). See CHLORINE.—**Coal g.** See COAL *g.*—**Coercible g.** See *Liquefiable g.*—**Darmg'** (Ger.). See *Intestinal g.*—**Dephlogisticated marine-acid g.** [Scheele]. Chlorine. [B, 3.]—**Ethereal nitrous g.** An old term for a mixture of various g's resulting from the action of strong nitric acid on ethyl alcohol. [A, 1.]—**Ethereal g.** Ether vaporized. [B, 91.]—**Faulnissg'** Ger.). G. produced by putrefaction. [α, 14.]—**G. ammoniacale** (Lat.). Ammonia. [B, 98.]—**G. acida** (Lat.). Acid gases; gaseous acids. [B.]—**G'ähnlich** (Ger.). Gaseous. [A, 521.]—**G'anhäufung** (Ger.). An accumulation of gas. [A, 521.]—**G. animale sanguinis** (Lat.). See *G. of the blood.*—**G'artig** (Ger.). See AERIFORM.—**G'aufsteigen** (Ger.). Eructation. [K, 16.]—**G'austausch** (Ger.). See *G. interchange.*—**G. azoticum** (Lat.). Fr., *gaz azotique*. Ger., *azotisches G.* Nitrogen protoxide. [L, 80 (α, 21).]—**G. battery.** See under BATTERY.—**G'brenner** (Ger.). See *G.*-CAUTERY.—**G. carbon.** See *G.* CARBON.—**G.-chamber.** See under CHAMBER.—**G'elasticitätsmesser** (Ger.), **G'elaterometer** (Ger.). See ELATEROMETER.—**G. enema.** Ger., *G'klystier*. An enema of carbon dioxide. [A, 319 (α, 21).]—**G'entwickelung** (Ger.). The development of g. [A, 521.]—**G'förmig** (Ger.). See GASEOUS.—**G. fructuum** [Van Helmont] (Lat.). Water. [B, 200.]—**G. hepaticum** (Lat.). Gaseous hydrogen sulphide. [B, 97.]—**G. hilarant** (Fr.), **G. hilarante** [Mex. Ph.] (Sp.). Nitrogen protoxide. [A, 447 (α, 21).]—**G. hydrogenicum** (Lat.). Ger., *wassererzeugendes G.* Hydrogen. [L, 80.]—**G. hydrogenium sulphuratum** (Lat.). See *G. hepaticum.*—**G'ig** (Ger.). See GASEOUS.—**G. interchange.** Fr., *échange gazeus* (ou *respiratoire*). Ger., *G'wechsel*, *G'austausch*, *G'verkehr*. The exchange, by diffusion through a respiratory membrane, of carbon dioxide for oxygen. The oxygen may be taken from the atmospheric air, as in aerial respiration, or from the air dissolved in water, as in aquatic respiration. [J.]—**G'kammer** (Ger.). See *Gas* CHAMBER.—**G'klystier** (Ger.). See *G. enema.*—**G'messer** (Ger.). See GASOMETER (2d def.).—**G. of the lungs.** See *Expired* AIR and *Inspired* AIR.—**G. of the blood.** Lat., *vapor sanguinis*. Fr., *gaz du sang*. Ger., *Blutg'*. 1. The vapor arising from fresh blood. 2. The gaseous matter extracted from the blood in an air-pump. It consists of oxygen, nitrogen, and carbon dioxide. [L.]—**G. of the intestines.** See *Intestinal g.*—**G. pingue sulphureum** (Lat.). An exhalation arising in caves and mines and producing sudden death; probably carbon dioxide. [B, 200.]—**G.-plant.** The *Dictamnus fraxinella*. [B, 275 (α, 24).]—**G. salium** [Van Helmont] (Lat.). Water. [B, 200.]—**G. sanguinis** (Lat.). See *G. of the blood.*—**G. siccum** [Van Helmont] (Lat.). A sublimate. [B, 200.]—**G. silvestre** [Van Helmont] (Lat.). Fr., *gaz silvestre*. Carbon dioxide. [B, 2, 200.]—**G. tar.** See *Coal* TAR.—**G. trap.** See TRAP.—**G'uhr** (Ger.). See GASOMETER (2d def.).—**G. ventosum** [Van Helmont] (Lat.). Common air. [B, 200.]—**G'verkehr** (Ger.), **G'wechsel** (Ger.). See *G. interchange.*—**G. vitale** (Lat.). The vital animal spirit; "the light and the balsam which preserves from corruption." [B, 200.]—**G'zähler** (Ger.). See GASOMETER (2d def.).—**Grubeng'** (Ger.). The gas of mines. [A, 521.]—**Harzg'** (Ger.). See *Resin g.*—**Holzg'** (Ger.). See *Pyroligneous g.*—**Illuminating g.** See COAL *g.*, *Water-g.*, and *Oil-g.*—**Incoercible g.** See *Permanent g.*—**Inflammable g.** Hydrogen. [B, 97.]—**Intestinal g.** Fr., *gaz intestinal*. Ger., *Darmg'*. The g's present in the alimentary canal. They are in part due to swallowed air, in part to carbon dioxide exhaled from the blood, and in part to fermentative changes due to micro-organisms. The amount and character of the g. varies with the food and the health of the individual. The chief constituents are oxygen, hydrogen, nitrogen, and carbon dioxide; methane and hydrogen sulphide are frequently present in varying quantities. The carbon dioxide is supposed to be largely derived from the blood (cf. *Intestinal* RESPIRATION). [J, 57, 124.]—**Intoxicating g.** See *Laughing g.*—**Kanalg'** (Ger.). See *Sewer-g.*—**Laughing g.** Fr., *gaz hilarant*. Ger., *Lachg'*, *Lustg'*. It., *gas esilarante*. Sp., *g. hilarante*. Nitrogen monoxide; so called on account of its exhilarating effects when inhaled. [B.]—**Liquefiable g.** A g. capable of reduction to the liquid state. [B.] Cf. *Permanent g.*—**Lustg'** (Ger.). See *Laughing g.*—**Marsh g.** Methane. [B, 3.]—**Natural g.** Illuminating g. occurring naturally in coal strata and emitted from wells, etc.; occurring especially in western Pennsylvania and other regions rich in coal and petroleum. [B.]—**Non-condensable g., Non-liquefiable g.** See *Permanent g.*—**Oelbildendes G.** (Ger.). See ETHYLENE.—**Oil-g.** Ger., *Oelg'*. 1. The mixture of g'es obtained by distilling oil; used for illuminating on a small scale. It contains nearly 50 per cent. of methane, 10 of carbon monoxide, 3 each of hydrogen and nitrogen. [B, 270.] 2. See *Water-g.*—**Olefiant g.** See ETHYLENE.—**Oxygenated muriatic-acid g., Oxymuriatic-acid g.** See CHLORINE.—**Peat-g.** Ger., *Torfg'*. A g. obtained by the dry distillation of peat. [B, 138, 270.]—**Permanent g.** Fr., *gaz permanent*. Ger., *permanentes G.* A name given to certain of the g'es which, up to 1878, had not been liquefied. These were oxygen, hydrogen, nitrogen, atmospheric air, nitrogen dioxide, carbon monoxide, and methane. [B.]—**Petroleum g.** G. obtained by the distillation of petroleum. [B, 138.] See *Oil-g.*—**Pyroligneous g.** Ger., *Holzg'*. Illuminating g. obtained by the destructive distillation of wood; containing chiefly carbon monoxide, hydrogen, and methane. [B, 270.]—**Resin g.** Ger., *Harzg'*. An illuminating g. obtained by the dry distillation of resin. [B, 138.]—**Sewer-g.** Fr., *gaz d'égout*. Ger., *Kanalg'*. A mixture of g'es consisting chiefly of methane and carbon dioxide, and of oxygen, hydrogen, nitrogen, ammonia, acetic, lactic, and butyric acids, hydrogen sulphide, and various mercaptans and sulphur ethers in small quantities. It may contain pathogenic micro-organisms. [C. F. Chandler (α, 17).]—**Steinkohleng'** (Ger.). See COAL *g.*—**Torfg'** (Ger.). See *Peat-g.*—**Wassererzeugendes G.** (Ger.). See HYDROGEN.—**Wasserg'**

(Ger.). See *Water-g.*—**Wasserstoffg'** (Ger.). Hydrogen. [L, 80.] —**Water-g.** Ger., *Wasserg'.* An illuminating g., consisting chiefly of hydrogen, methane, carbon monoxide, and carbon dioxide, made by blowing steam through glowing coal or coke and afterward adding a hydrocarbon and again subjecting the mixture to heat to render it more stable. [B, 270.]—**Wood-g.** 1. See *G. silvestre.* 2. See *Pyroligneous g.*

GÄSCHT (Ger.), n. Ge^{2}sht. Yeast. [*a*, 14.]

GASCOIGNES, n. pl. Ga^{2}s'koinz. See GASKINS (1st def.).

GASEOL, n. Ga^{2}s'e^2-o^{2}l. See GAZÉOL.

GASEOUS, adj. Ga^{2}z'e-u^{3}s. Lat., *gasiformis.* Fr., *gazeux.* Ger., *gasförmig, gasig.* In the form of a gas.

GASGARILLA (Lat.), n. f. Ga^{2}s(ga^{3}s)-ga^3-ri^{2}l'la^3. See CASCARILLA.

GASIFÈRE (Fr.), adj. Ga^3-ze-fe^{2}r. See AEROPHOROUS.

GASIFICATION, n. Ga^{2}s-i^2-fi^2-ka'shu^{3}n. The act of transforming into a gas. [B, 49.]

GASIFORM, adj. Ga^{2}z'i^2-fo^{2}rm. Lat., *gasiformis.* Ger., *gasförmig.* See GASEOUS.

GASIOL, n. The *Eupatorium cannabinum.* [B, 121 (*a*, 24).]

GASKINE, n. Ga^{2}s'ken. See KASKINE.

GASKINS, n. sing. and pl. Ga^{2}s'ki^{2}nz. 1. The *Prunus avium.* 2. The *Ribes grossularia.* 3. The *Primula veris.* 4. In the pl., the inner parts of a horse's thighs. [A, 505 (*a*, 21); L, 56.]

GASMIRIS, n. In Ceylon, the *Capsicum frutescens.* [B, 88 (*a*, 24).]

GASOLINE, n. Ga^{2}s'o-len. A commercial name for a light grade of benzin (*q. v.*, 2d def.), or petroleum ether. ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]

GASOMETER, n. Ga^{2}s-o^{2}m'e^{2}t-u^{3}r. From *gas* (*q. v.*), and μέτρον, a measure. Fr., *gasomètre.* Ger., *G., Gasmesser* (2d def.). An instrument for measuring the quantity of a gas present. [B, 270 (*a*, 27).]

GASOMETRIC, adj. Ga^{2}s-o-me^{2}t'ri^{2}k. Fr., *gazométrique.* Ger., *gasometrisch.* Syn.: *eudiometric.* Relating to the measurement of gases. [*a*, 27.]

GASOMETRY, n. Ga^{2}s-o^{2}m'e^{2}t-ri^2. Fr., *gazométrie.* Ger., *Gasometrie.* Syn.: *eudiometry.* See *Gasometric* ANALYSIS.

GASP, n. Ga^{2}sp. A convulsive inspiration, especially through the mouth. [J.] See GASPING.

GASPING, n. Ga^{2}sp'i^{2}n^2. Lat., *anhelatio* (from *anhelare,* to move about for breath). Fr., *anhélation, essouflement.* Ger., *Keuchen, schweres Athmen.* It., *anelasione, anelite.* Sp., *anhelación, boqueada.* Convulsive inspiration, mostly through the mouth, accompanied by drawing of the face and dilatation of the nostrils. [J.] Cf. ANHELATION.

GASSERIAN, adj. Ga^{2}s-se'ri^2-a^{2}n. Fr., *gassérien.* Ger., *Gasserisch.* Described by Gasser. [H.] See *G.* GANGLION.

GAST (Ger.), n. Ga^{3}st. Lit., a guest; a parasite. [A, 521.]

GASTEIN (Ger.), n. Ga^{3}s'tin. A place in the province of Salzburg, Austria, where there are thermal springs containing sodium sulphate, chloride, and carbonate, calcium carbonate, magnesium oxide, etc. [A, 319, 363 (*a*, 21); L, 30, 41, 87, 105 (*a*, 14).]

GASTER (Lat.), n. f. Ga^{2}st(ga^{3}st)'u^{3}r(ar). Gen., *gast'eros (-is), gastri.* Gr., γαστήρ. 1. The belly. 2. The stomach. 3. Of some old writers, the uterus. [A, 312 (*a*, 30); A, 387.]—**G. musculi.** The belly of a muscle.

GASTERALGIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-te^{2}r-a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. See GASTRALGIA.

GASTERANAX [Dolæus] (Lat.), n. m. Ga^{2}s(ga^{3}s)-te^{2}r'a^{2}n(a^{3}n)-a^{2}x(a^{3}x). Gen., *-anact'os (-is).* From γαστήρ, the belly, and ἄναξ, a lord. Fr., *gastéranax.* See BITNIMALCA.

GASTERANGEIEMPHRAXIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-te^{2}r-a^{2}n(a^{3}n^2)-ji(ge^2-e)-e^{2}m-fra^{2}x(fra^{3}x)'i^{2}s. Gen., *phrax'eos (phrax'is).* From γαστήρ, the belly, ἀγγειῶν, a vessel, and ἔμφραξις, obstruction. Fr., *gastérangiemphraxie.* Ger., *Mageninfarct, Ueberfüllung des Magens.* 1. Obstruction of the pylorus. 2. A congested state of the blood-vessels of the stomach. [L, 43, 50 (*a*, 14).]

GASTERASA [Mex. Ph.] (Sp.), **GASTÉRASE** (Fr.), n's. Ga^{3}s-ta-ra^3'sa^3, -ra^{3}z. See PEPSIN.

GASTERASTHENIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-te^{2}r-a^{2}s(a^{3}s)-the^{2}n-i(e)'a^3. From γαστήρ, the stomach, and ἀσθένεια, weakness. Weakness of the stomach.

GASTERATAXIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-te^{2}r-a^{2}t(a^{3}t)-a^{2}x(a^{3}x)'-i^2-a^3. From γαστήρ, the stomach, and ἀταξία, a want of discipline. Fr., *gestérataxie.* Ger., *Gasterataxie, Störung der Magenthätigkeit.* A relaxed and otherwise disordered state of the coats of the stomach. [A, 322.]—**G. aquosa.** Of Albert, A. M. Kuhn, and others, softening of the coats of the stomach, with thickening, suppuration, etc., in places. [A, 322.]

GASTERECHEMA (Lat.), n. n. Ga^{2}s(ga^{3}s)-te^{2}r-e^{2}k(ach^2)-em(am)'a^3. Gen., *-em'atos (-tis).* From γαστήρ, the stomach, and ἤχημα, a sound. Fr., *gastérechème.* Ger., *Magenlaut.* A sound in the stomach heard on auscultation. [L, 50.]

GASTEREMPHRAXIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-te^{2}r-e^{2}m-fra^{2}x-(fra^{3}x)'i^{2}s. Gen., *-phrax'eos (phrax'is).* From γαστήρ, the stomach, and ἔμφραξις, a stopping. Fr., *gastéremphraxie.* 1. Over-distension of the stomach. 2. See GASTERANGEIEMPHRAXIS.

GASTÉRHYSTÉROTOMIE (Fr.), n. Ga^{3}s-tar-i^{2}s-ta-ro-to-me. See LAPARO-HYSTEROTOMY.

GASTERIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-te(ta)'ri^2-a^3. A genus of liliaceous plants of the *Aloineæ.* [B, 19, 42 (*a*, 24).] See ALOE.—**G. angulata.** See ALOE *sulcata.*—**G. angustifolia.** See ALOE *angustifolia.*—**G. disticha.** See ALOE *disticha* (3d def.).—**G. excavata.** See ALOE *excavata.*—**G. intermedia.** See ALOE *intermedia.*—**G. latifolia.** See ALOE *excavata.*—**G. lingua.** See ALOE *disticha* (1st def.).—**G. sulcata.** See ALOE *sulcata.*—**G. trigona.** See ALOE *elongata* (1st def.).—**G. verrucosa.** See ALOE *verrucosa.*

GASTERIC, adj. Ga^{2}s'tu^{3}r-i^{2}k. See GASTRIC.

GASTÉROBASIDÉS (Fr.), n. pl. Ga^{3}s-ta-ro-ba^{3}s-e-da. *Gasteromycetes* in which the hymenium is basidiosporous. [B, 121 (*a*, 24).]

GASTEROCARPEÆ (Lat.), **GASTEROCARPIDÆ** (Lat.), n's f. pl. Ga^{2}s(ga^{3}s)-te^{2}r-o(o^3)-ka^{3}rp'e^2-e(a^3-e^2), -i^{2}d-e(a^3-e^2). From γαστήρ, the belly, and καρπός, fruit. Of Grevaise and of Lindley, a tribe of the *Phyceæ;* of Decaisne, an order of the *Choristoporeæ;* of Agardh, a subdivision of the *Cryptonemeæ,* the types of which are *Dumontia, Kalbymenia, Iridea,* etc. [B, 121, 170 (*a*, 24).]

GASTERODELUS [Ehrenberg] (Lat.), adj. Ga^{2}s(ga^{3}s)-te^{2}r-o(o^3)-del(dal)'u^{3}s(u^{4}s). From γαστήρ, the belly, and δῆλος, visible. Fr., *gasterodèle.* Having organs of mastication and a very short œsophagus (said of *Rotifera*). [L, 41, 180.]

GASTEROHYSTEROTOMIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-te^{2}r-o(o^3)-hi^{2}s(hu^{6}s)-te^{2}r-o(o^3)-tom(to^{2}m)'i^2-a^3. From γαστήρ, the belly, ὑστέρα, the uterus, and τέμνειν, to cut. Fr., *gastérhystérotomie.* See LAPARO-HYSTEROTOMY.

GASTEROMYCEÆ (Lat.), **GASTEROMYCETES** (Lat.), n's f. pl. Ga^{2}s(ga^{3}s)-te^{2}r-o(o^3)-mi(mu^6)'se^2(ke^2)-e(a^3-e^2), -mi(mu^6)-set-(kat)'ez(e^{2}s). From γαστήρ, the belly, and μύκης, a mushroom. Fr., *gastéromycées, gastéromycètes.* Ger., *Bauchpilze, Balgpilze.* A suborder of basidiomycetous *Fungi* (of Fries, 1825, a cohort of the *Sporomycetes*), distinguished from the rest by having the hymenium inclosed within the body of the sporocarp, and comprising (Fries) the *Angeiogastres, Trichospermi, Trichodermacei,* and *Sclerotiacei;* or (Endlicher) the *Perisporiacei, Sclerotiaca, Trichodermacei, Trichospermei,* and *Angeiogastres;* or (Bonorden, 1851) the *Angeiogastres* and *Trichogastres.* The *G.* are by Fries conveniently divided into the groups *Podaxinei, Hypogæi, Phalloidei, Nidulariacei, Trichogastres,* and *Myxogastres,* and include certain genera of the *Myxomycetes* (*Physarum, Arcyria,* etc.), now made a distinct class. According to more recent authors, the *G.* comprise the *Lycoperdaceæ, Hymenogastreæ, Nidularieæ,* and *Phalloideæ* (see these words). The *Gasteromyci* of Acharius, 1803, are the same; and of Willdenow and Wahlenberg, an order of cryptogams, corresponding to the *G.* of Link. [B, 19, 77, 121, 170, 291 (*a*, 24).]

GASTEROPODOUS, adj. Ga^{2}s-tu^{3}r-o^{2}p'o-du^{3}s. Lat., *gasteropodus* (from γαστήρ, the belly, and πούς, the foot). Fr., *gastéropode.* Ger., *bauchfüssig.* Of molluscs, having the feet placed under the belly. The *Gasteropoda* (the *Gasteropodophora* of Gray; Fr., *gastéropodes;* Ger., *Bauchfüssler, Schnecken*) are a class of molluscs so characterized. [L, 41, 180.]

GASTEROTHALAMÆ (Lat.), n. f. pl. Ga^{2}s(ga^{3}s)''te^{2}r-o-(o^3)-tha^{2}l(tha^{3}l)'a^{2}m(a^{3}m)-e(a^3-e^2). From γαστήρ, the belly, and θαλάμη, a lurking-place. Of Wahlenberg, a division of terrestrial *Algæ,* including *Verrucaria, Endocarpon,* and *Sphærophoron;* of Reichenbach, a family of the *Gasteropsoreæ,* including the *Verrucarieæ, Trypetheliaceæ,* and *Endocarpeæ.* The *Gasterothalameæ* (Fr., *gastérothalames;* Ger., *Balgkornflechten*) of Lindley are a division of the *Lichenales,* comprising the *Verrucaridæ, Trypethelidæ, Endocarpidæ,* and *Sphærophoridæ.* See ANGEIOCARPI (2d def.). The *Gasterothalami* of Fries are the same. [B, 121, 170 (*a*, 24).]

GASTEROZOA (Lat.), n. n. pl. Ga^{2}s(ga^{3}s)-te^{2}r-o(o^3)-zo'a^3. From γαστήρ, the belly, and ζῷον, a living being. Fr., *gastérozoaires.* Sp., *gasterozoarios.* Of Ficinus and Carus, a division consisting of animals in which the digestive system is prominently developed. [L, 180.]

GASTERYSTEROTOMY, n. Ga^{2}s-tu^{3}r-i^{2}s-tu^{3}r-o^{2}t'o-mi^2. Lat., *gasterysterotomia* (from γαστήρ, the belly, ὑστέρα, the uterus, and τέμνειν, to cut). See LAPARO-HYSTEROTOMY.

GASTRA (Lat.), n. f. Ga^{2}s(ga^{3}s)'tra^3. Gr., γάστρα. The belly of a jar. [A, 311 (*a*, 21).]

GASTRADENITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tra^{2}d(tra^{3}d)-e^{2}n-i-(e)'tis. Gen., *-it'idos (-it'idis).* See GASTRO-ADENITIS.

GASTRÆA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tre'(tra^3'e^2)-a^3. From γαστήρ, the belly. Of Haeckel, an ideal primitive type of the *Metazoa,* consisting of a sac with a double cellular wall, inclosing a central cavity, and open at one end. The *Gastræadæ,* or *Gastrææ,* are a supposititious class of animals having the *Gastræa* as a type. [A, 12; L.]—**G. theory (of blastodermic development).** Fr., *théorie gastréenne.* Ger., *Gastræatheorie.* Of Kowalevsky and Haeckel, the theory of the formation of the double-walled blastoderm by invagination of the simple sac (see BLASTULA) so as to form the gastrula (*q. v.*). [A, 5.]

GASTRÆMIA (Lat.), n. f. Ga^{2}s(ga^{3}s) trem'(tra^3-am')-i^2-a^3. From γαστήρ, the stomach, and αἷμα, the blood. Fr., *gastrémie.* Ger., *Blutcongestion zum Magen.* Congestion of the stomach.

GASTRÆUM (Lat.), n. n. Ga^{2}s(ga^{3}s)-tre'(tra^3'e^2)-u^{3}m(u^{4}m). From γαστήρ, the belly. Fr., *g.* Ger., *Bauchseite.* Of Illiger, the ventral surface of the body of the *Mammifera* from the larynx to the anus. [L, 43.]

GASTRAL, adj. Ga^{2}s'tra^{2}l. From γαστήρ, the belly. See GASTRIC.

GASTRALGIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tra^{2}l(tra^{3}l)'ji^2(gi^2)-a^3. From γαστήρ, the stomach, and ἄλγος, pain. Fr., *gastralgie, colique d'estomac.* Ger., *Bauchschmerz.* See GASTRODYNIA and CARDIALGIA.

GASTRALGIE (Fr.), n. Ga^{3}s-tra^{3}l-zhe. See GASTRODYNIA and CARDIALGIA.—**G. par polygastrie.** Of Peter, gastralgia due to excessive secretion of gastric juice in consequence of disordered

action of the pneumogastric nerve. [" Union méd.," May 6, 1890, p. 645.]

GASTRANABOLE (Lat.), n. f. Ga^{2}s(ga^{3}s)-tra^{2}n(tra^{3}n)-a^{2}b-(a^{3}b)′ol(o^{2}l)-e(a). Gen., *-ab′oles.* From γαστηρ, the stomach, and ἀναβολή, that which is thrown up. Ger., *Magenauswurf.* Ejection of the contents of the stomach, either by vomiting or in rumination. [L, 50 (α, 14).]

GASTRANAX (Lat.), n. m. Ga^{2}s(ga^{3}s)′tra^{2}n(tra^{3}n)-a^{2}x(a^{3}x). Gen., *-ac′tos (-tis).* See GASTERANAX.

GASTRANEURIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tra^{2}n(tra^{3}n)-u^2′ri^2-a^3. From γαστήρ, the stomach, and νεῦρον, a nerve. Defective action of the nerves of the stomach. [L, 50 (α, 14).]

GASTRANEURYSMA (Lat.), n. n. Ga^{2}s(ga^{3}s)-tra^{2}n(tra^{3}n)-u^2-ri^{2}z(ru^{6}s)′ma^3. Gen., *rys′matos (-tis).* From γαστήρ, the stomach, and ἀνεύρυσμα, a dilatation. See GASTRECTASIS.

GASTRANGEMPHRAXIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tra^{2}n-(tra^{3}n^2)-je^{2}m(ge^{2}m)-fra^{2}x(fra^{3}x)′i^{2}s. Gen., *-phrax′eos (-phrax′is).* See GASTERANGEIEMPHRAXIS.

GASTRATAXIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tra^{2}t(tra^{3}t)-a^{2}x(a^{3}x)′-i^2-a^3. See GASTERATAXIA.

GASTRATROPHIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tra^{2}t(tra^{3}t)-ro-(ro^2)′fi^2-a^3. From γαστήρ, the stomach, and ἀτροφία, atrophy. Atrophy of the stomach. [A, 316.]

GASTRECHEMA (Lat.), **GASTRECHOS** (Lat.), **GASTRECHUS** (Lat.), n's n., m., and m. Ga^{2}s(ga^{3}s)-tre^{2}k(trach^2)-em(am)′-a^3, -tre(tra)′ko^{2}s(ch^{2}o^{2}s), -ku^{3}s(ch^{2}u^{4}s). See GASTERECHEMA.

GASTRECPHLOGIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tre^{2}k-floj(flo^{2}g)′-i^2-a^3. From γαστήρ, the belly, and ἐκφλογοῦσθαι, to blaze up. See VARIOLA *gastrica.*

GASTRECTASIS (Lat.), n. f. Ga^{2}st(ga^{3}st)-re^{2}k′ta^3-si^{2}s. Gen., *-ectas′eos, -ec′tasis.* From γαστήρ, the stomach, and ἔκτασις, distension. Fr., *gastrectasie.* Ger., *Magenausdehnung.* Dilatation of the stomach. [D.]

GASTRECTOMY, n. Ga^{2}s-tre^{2}k′to-mi^2. From γαστήρ, the stomach, ἐκ, out of, and τέμνειν, to cut. Fr., *gastrectomie.* Ger., *Gastrektomie.* The operation of excising a diseased portion of the stomach. [Péan (A, 385).]

GASTRÉEN (Fr.), adj. Ga^{3}s-tra-a^{3}n^2. Pertaining to or involving the theory of a gastræa. [α, 18.]

GASTRELCOBROSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tre^{2}l-ko(ko^3)-bro′si^{2}s. Gen., *-bros′eos (-bros′is).* From γαστήρ, the stomach, ἕλκος, a wound, and βρῶσις, an eating. Fr., *gastrelcobrose, gastrelcie* [Piorry], *gastrelcosie* [Piorry]. Ger., *geschwürige Magenzerfressung.* Ulceration of the stomach. [L, 50.]

GASTRELCOSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tre^{2}l-kos′i^{2}s. Gen., *-cos′eos (-cos′is).* From γαστήρ, the stomach, and ἕλκωσις, ulceration. See GASTRELCOBROSIS.

GASTRELYTROTOMIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tre^{2}l-i^{2}t(u^{6}t)-ro(ro^3)-tom(to^{2}m)′i^2-a^3. From γαστήρ, the belly, ἔλυτρον, a sheath, and τέμνειν, to cut. See LAPARO-ELYTROTOMY.

GASTREMPHRAXIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tre^{2}m-fra^{2}x-(fra^{3}x)′i^{2}s. Gen., *-phrax′eos (-phrax′is).* See GASTEREMPHRAXIS.

GASTRENCEPHALOMA (Lat.), n. n. Ga^{2}s(ga^{3}s)-tre^{2}n-(tre^{3}n^2)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-o′ma^3. Gen., *-om′atos (-tis).* From γαστήρ, the stomach, and ἐγκέφαλος, the brain. See GASTROMYELOMA.

GASTRENCHYTA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tre^{2}n(tre^{2}n^2)′ki^2-(ch^{2}u^6)-ta^3. From γαστήρ, the belly, and ἔγχυτος, poured in. See *Stomach* PUMP.

GASTRENTERALGIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tre^{2}n-te^{2}r-a^{2}l-(a^{3}l)′ji^2(gi^2)-a^3. From γαστήρ, the stomach, ἔντερον, an intestine, and ἄλγος, pain. Neuralgia of the stomach and intestine. [α, 34.]

GASTRENTERIC, adj. Gas-tre^{2}n-ter′i^{2}k. See GASTRO-ENTERIC.

GASTRENTERITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tre^{2}n-te^{2}r-i(e)′ti^{2}s. Gen., *-it′idos (-it′idis).* See GASTRO-ENTERITIS.

GASTRENTEROMALACIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tre^{2}n-te^{2}r-o(o^3)-ma^{2}l(ma^{3}l)-as(a^{3}k)′i^2-a^3. From γαστήρ, the stomach, ἔντερον, an intestine, and μαλακία, softness. Fr., *gastrentéromalacie.* Ger., *Magendarmerweichung.* Softening of the stomach and intestines. [A, 322.]

GASTREPATICUS (Lat.), adj. Ga^{2}s(ga^{3}s)-tre^2(tra)-pa^{2}t(pa^{3}t)′-i^{2}k-u^{3}s(u^{4}s). See GASTRO-HEPATIC.

GASTREPATITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tre^2(tra)-pa^2(pa^3)-ti-(te)′ti^{2}s. Gen., *-it′idos (-it′idis).* See GASTRO-HEPATITIS.

GASTREPIPLOIC, adj. Ga^{2}s-tre^{2}p-i^2-plo′i^{2}k. See GASTRO-EPIPLOIC.

GASTRERETHISIA (Lat.), **GASTRERETHISMUS** (Lat.), n's m. and f. Ga^{2}s(ga^3)-tre^{2}r-e^2-thi^{2}z(thi^{2}s)′i^2-a^2(a^3), -mu^{3}s(mu^{4}s). From γαστήρ, the stomach, and ἐρεθίζειν, to rouse to anger. Fr., *gastréréthisme.* Erethism of the stomach. [L, 50.]

GASTREUPEPTIC, adj. Ga^{2}s-tru^2-pe^{2}p′ti^{2}k. From γαστήρ, the belly, and εὔπεπτος, easy of digestion. Ger., *magenstärkend.* Promoting digestion. [A, 316.]

GASTRIC, adj. Ga^{2}s′tri^{2}k. Lat., *gastricus* (from γαστήρ, the stomach). Fr., *gastrique.* Ger., *gastrisch, den Magen betreffend.* It., *gastrico.* Sp., *gástrico.* Pertaining to or occurring in the stomach. [K.]

GASTRICISM, n. Ga^{2}s′tri^2-si^{2}z′m. Lat., *gastricismus.* Fr., *gastricisme.* Ger., *Gastricismus.* 1. The doctrine that most diseases are primarily due to gastric derangements. 2. Functional disturbance of the stomach, indigestion. [A, 326 (α, 21); D; K.]

GASTRICITY, n. Ga^{2}s-tri^{2}s′i^{2}t-i^2. Lat., *gastricitas.* Fr., *gastricité.* Ger., *Gastricität.* Gastric disturbance, dyspepsia. [K.]

GASTRICOLUS (Lat.), adj. Ga^{2}s(ga^{3}s)-tri^{2}k′ol(o^{2}l)-u^{3}s(u^{4}s). From γαστήρ, the stomach, and *colere,* to inhabit. Fr., *gastricole.* Parasitic in the stomach. [L, 41.]

GASTRICUS (Lat.), adj. Ga^{2}s(ga^{3}s)′tri^{2}k-u^{3}s(u^{4}s). See GASTRIC.

GASTRILOQUIST, n. Ga^{2}s-tri^{2}l′o-kwi^{2}st. From γαστήρ, the stomach, and *loqui,* to speak. Fr., *gastriloque.* A ventriloquist. [A, 385.]

GASTRIMARGIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tri^2-ma^{3}rj(ma^{3}rg)′-i^2-a^3. Gr., γαστριμαργία (from γαστήρ, the stomach, and μάργος, raging mad). Ger., *Schlemmerei.* Voracity, gluttony. [A, 322.]

GASTRIMARGUS (Lat.), n. m. Ga^{2}s(ga^{3}s)-tri^2-ma^{3}rg′u^{3}s(u^{4}s). Gr., γαστρίμαργος. A glutton. [A, 387.]

GASTRISMUS (Lat.), n. m. Ga^{2}s(ga^{3}s)-tri^{2}z(tri^{2}s)′mu^{3}s(mu^{4}s). Gr., γαστρισμός. Gluttony. [A, 311 (α, 21).]

GASTRITE (Fr.), n. Ga^{3}s-tret. See GASTRITIS.—**G. blenplastique** [Piorry]. Catarrhal gastritis. [L, 82.]

GASTRITIC, adj. Ga^{3}s-tri^{2}t′i^{2}k. Lat., *gastriticus.* Pertaining to gastritis. [A, 322.]

GASTRITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tri(tre)′ti^{2}s. Gen., *trit′idos (-idis).* From γαστήρ, the stomach (see also *-itis**). Fr., *gastrite.* Ger., *Magenentzündung.* It., *gastrite.* Sp., *g.* 1. Inflammation of the stomach, especially of its mucous membrane. It may be of various forms and degrees of intensity, and tends to exudation, with destruction or condensation of the tissue affected, especially near the pylorus. [D, 1.] 2. Of Broussais, inflammation of any part of the digestive apparatus. [A, 322.]—**Acute g., Acute catarrhal g.** Lat., *g. acuta.* Fr., *gastrite aiguë.* Ger., *akute G.* G. running a short, sharp course; usually, unless caused by mechanical or chemical injury, limited to the mucosa.—**Catarrhal g.** Lat., *catarrhus gastricus, g. catarrhalis.* Fr., *gastrite catarrhale.* Ger., *catarrhalische G.* Catarrhal inflammation of the mucous membrane of the stomach. Hyperæmia is a prominent feature at the beginning of the disease or during exacerbations; but an abundant secretion of tenacious mucus is a more constant characteristic. It may be either acute or chronic. [H. Jones (D).]—**Chronic g.** Lat., *g. chronica.* Fr., *gastrite chronique.* Ger., *chronische G.* A form of g. arising from the same causes that produce acute catarrh of the stomach in case they are lasting or repeated. Dyspepsia, vomiting, and flatulence constitute the chief symptoms. The pathological changes pertain more especially to the pylorus. The color of the mucous membrane is bluish-red or pale, with pigment spots (from old ecchymoses), the mucous membrane is thickened, and in cases of long standing the whole gastric wall becomes thickened. [A, 326 (α, 21).]—**Chronic intertubular g.** Of Fenwick, a form of g. in which the gastric tubes are firmly adherent to each other, the spaces between them being occupied by an increased amount of connective tissue. The tubes may eventually undergo fatty degeneration. [α, 34.]—**Chronic sclerosing g.** Ger., *chronische sclerosirende G.* A round- and spindle-celled fibrous hyperplasia of the gastric mucous membrane and submucosa, with compression and atrophy of the muscular coat. [α, 34.]—**Chronic tubular g.** Of Fenwick, a form of chronic g. in which the tubes are lessened in calibre, the basement membrane is wrinkled, and the tubes contain only a few cells or some granular matter. [α, 34.]—**Chronic ulcerous g.** Fr., *gastrite chronique ulcéreuse.* Inflammation of the gastric mucous membrane with cellular infiltration, epithelial desquamation, and circumscribed destruction of fibrous tissue, forming separate ulcers. The glandular structure of the mucosa may be infiltrated with leucocytes, though it is frequently destroyed; the muscular structure may be infiltrated with cells, and the submucosa is thickened by fibrous hyperplasia. [α, 34.]—**Croupous g., Diphtheritic g.** Lat., *g. diphtherica, g. membranacea.* A rare form of g. characterized by the formation of a false membrane and necrotic hyaline products on the mucous membrane, occurring by extension from pharyngeal diphtheria and secondarily in other infectious diseases and in cases of extreme debility. [A, 326 (α, 21).]—**Erythematous g.** Lat., *g. erythematica.* Of Cullen, capillary congestion of the mucous membrane of the stomach found post-mortem, though no ante-mortem symptoms of g. existed. [α, 34.]—**Favous g.** Lat., *g. favosa.* Fr., *gastrite faveuse.* A g. caused by the introduction of the *Achorion Schönleinii* into the stomach, this fungus being detected by stomach washing or in the evacuations from the bowels. [α, 34.]—**Follicular g.** See *Glandular g.*—**Gangrenous g.** See *Phlegmonous g.*—**G. acuta.** See *Acute g.*—**G. adhæsiva.** Of Good, g. with high fever and severe gastrodynia. [α, 34.]—**G. arthritica.** See *Rheumatic g.*—**G. bacillaris.** Of Klebs, g. produced by bacilli. [α, 34.]—**G. catarrhalis.** See *Catarrhal g.*—**G. catarrhalis chronica cystica proliferans.** Fibrous hyperplasia of the gastric mucous membrane with dilatation and degeneration of the glands into cysts of various sizes; there is colloid degeneration of the epithelium, and many of the cylindrical cells have the appearance of typical goblet cells. [α, 34.]—**G. chronica.** See *Chronic g.*—**G. diphtherica.** See *Diphtheritic g.*—**G. erythematica.** See *Erythematous g.*—**G. favosa.** See *Favous g.*—**G. glandularis.** Of Klebs, that condition of the gastric mucous membrane in senile marasmus in which groups of glands, containing fat and presenting the appearance of small yellow spots, are to be found. [D, 3.]—**G. glandularis acuta simplex.** See *Acute g.*—**G. glandularis chronica.** See *Chronic g.*—**G. glandulosa degenerativa.** G. from degeneration of the glands caused by phosphorus poisoning, the abuse of alcoholic liquors, etc. [α, 34.]—**G. membranacea.** See *Diphtheritic g.*—**G. mycotica.** G. due to the introduction of fungi into the stomach. [α, 34.]—**G. parasitaria.** G. caused by the presence of parasites, such as the larvæ of flies, intestinal worms, etc., in the stomach. [α. 34.]—**G. parenchymatosa.** See *Glandular g.*—**G. phlegmonosa.** See *Phlegmonous g.*—**G. polyposa.** A very advanced stage of g. prolifera in which the circumscribed hypertrophies are converted into polypoid growths. [D, 65.]—**G.**

prolifera. A form of g. in which there are circumscribed hypertrophies of the entire mucous membrane ; often a result of chronic alcoholism. [D, 59.]—**G. purulenta, G. submucosa.** See *Phlegmonous g.*—**G. sympathica acuta.** G. occurring during the course of diphtheria, dysentery, pyæmia, or puerperal fever. [*a*, 34.]—**G. toxica.** See *Toxic g.*—**G. verrucosa.** An advanced state of g. prolifera in which the circumscribed hypertrophies of that condition are developed into warty projections. [D, 59.]—**Glandular g.** A form of acute gastric catarrh limited to the glands. [D, 70.] Cf. *G. glandularis.*—**Idiopathic g.** An extremely rare form of g., for which no cause can be assigned. Some of the best observers have never seen it. [D, 1.]—**Mamillated g.** A chronic g. in which the mucous membrane of the stomach presents a mamillated appearance, in consequence of dilatation and fatty degeneration of a few glands that form a prominence, while the adjacent glands are atrophied and the submucous connective tissue is thickened, thus forming a groove. [*a*, 34.]—**Pemphigous g.** A condition characterized by blackish, superficial ulcerations of the gastric mucous membrane that sometimes occur during the course of general pemphigus. [*a*, 34.]—**Phlegmonous g.** Lat., *g. phlegmonosa* (*diffusa*), *g. purulenta*, *g. submucosa.* Acute g. with fibrinous exudation and superficial circumscribed ulceration of the mucous membrane, and submucous suppuration ; the symptoms are severe pain, vomiting, fever, and eventual collapse. It occurs in septicæmia, typhus fever, etc. [*a*, 34.]—**Primary g.** See *Idiopathic g.*—**Purulent g.** See *Phlegmonous g.*—**Rheumatic g.** Gastralgia and gastric irritability in a person affected with rheumatism or gout. [*a*, 34.]—**Secondary g.** G. caused by some general physical disorder. [*a*, 34.]—**Suppurative g.** See *Phlegmonous g.*—**Toxic g.** Lat., *g. toxica.* Ger., *toxische G.* G. produced by the ingestion of corrosive or irritant poisons into the stomach. [*a*, 34.]

GASTRO-ADENITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-a^{2}d-(a^{3}d)-e^{2}n-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). For deriv., see GASTER and ADENITIS. Inflammation of the gastric glands ; especially mamillated gastritis.

GASTRO-ADYNAMIC, adj. Ga^{2}s″tro-a^{2}d-i^{2}n-a^{2}m′i^{2}k. For deriv., see GASTER and ADYNAMIC. Fr., *gastro-adynamique.* Characterized by gastric or intestinal symptoms and by prostration. See *G.-a.* FEVER.

GASTRO-ARACHNOIDITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro-(tro^3)-a^{2}r(a^{3}r)-a^{2}k(a^{3}ch^2)-no-i^{2}d-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). For deriv., see GASTER and ARACHNITIS. Fr., *gastro-arachnoïdite.* Inflammation of the stomach and the arachnoid. [L, 41.]

GASTRO-ARCTIA (Lat.), n. f. Ga^{2}st(ga^{3}st)″ro(ro^3)-a^{3}rk′shi^2-(ti^2)-a^3. From γαστήρ, the stomach, and *arctare*, to constrict. Fr., *gastro-arctie* [Piorry]. See GASTROSTENOSIS.

GASTRO-ARTHRITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-a^{3}rth-ri(re)′tis. Gen., *-it′idos* (*-idis*). For deriv., see GASTER and ARTHRITIS. Fr., *gastro-arthrite.* A simultaneous inflammation of a joint and the stomach. [L, 41.]

GASTRO-ATAXIA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-a^{2}t(a^{3}t)-a^{2}x(a^{3}x)′i^2-a^3. See GASTERATAXIA.

GASTRO-ATAXIC, adj. Ga^{2}s″tro-a^{2}t-a^{2}x′i^{2}k. For deriv., see GASTER and ATAXIC. Accompanied by gastric or intestinal symptoms and by ataxia.

GASTRO-ATONIA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-a^{2}t(a^{3}t)-on(o^{2}n)′i^2-a^3. For deriv., see GASTER and ATONIA. See *Atonic* DYSPEPSIA.

GASTROBLENNOZEMIA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-ble^{2}n-o(o^3)-zem(zam)′i^2-a^3. For deriv., see GASTER and BLENNOZEMIA. An excessive formation of gastric mucus. [L, 50 (*a*, 14).]

GASTRO-BRONCHITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i(e)′tis. Gen., *-it′idos* (*-idis*). For deriv., see GASTER and BRONCHITIS. Fr., *gastrobronchite.* 1. Gastritis complicated with bronchitis. 2. The distemper (2d def.) of young dogs. [L, 41.]

GASTROBROSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-bro′si^{2}s. Gen., *-bros′eos* (*-bros′is*). For deriv., see GASTER and BROSIS. Fr., *gastrobrose.* Ger., *Zerfressung des Magens.* See *Perforating* ULCER *of the stomach.*

GASTROCARCINIE [Piorry] (Fr.), n. Ga^{3}s-tro-ka^{3}r-se-ne. For deriv., see GASTER and CARCINIE. Cancer of the stomach. [L, 82.]

GASTROCATHARSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-ka^{2}th-(ka^{3}th)-a^{3}r′si^{2}s. Ger., *-ar′seos* (*-ars′is*). For deriv., see GASTER and CATHARSIS. See GASTRANABOLE.

GASTROCELE (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-sel(kal)′e(a) ; in Eng., ga^{2}s′tro-sel. Gen., *-cel′es.* From γαστήρ, the stomach, and κήλη, a tumor. Fr., *hernie de l'estomac.* Ger., *Magenbruch.* A hernia of the stomach. [E.]—**Scrotal g.** Fr., *gastrocèle scrotal.* A scrotal hernia containing the stomach or a part of it. [M. Schmidt, "Berl. klin. Woch.," 1, 1885 ; "Med. Chron.," Aug., 1885, p. 407.]

GASTRO-CEPHALITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). For deriv., see GASTER and CEPHALITIS. Fr., *gastro-céphalite.* Concurrent inflammation of the stomach and of the brain. [D, 74.]

GASTROCHOLECYSTITIS (Lat.), n. f. Ga^{2}s(ga^{2}s)″tro(tro^3)-kol(ch^{2}o^{2}l)-e^2(a)-si^{2}st(ku^{6}st)-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). For deriv., see GASTER and CHOLECYSTITIS. Fr., *gastro-cholécystite.* Gastritis complicated with cholecystitis. [L, 41.]

GASTROCHOLIA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-kol(ch^{2}o^{2}l)-i(e)′a^3. For deriv., see GASTER and CHOLIA. Fr., *gastrocholie.* Ger., *gallichtes Magenleiden.* A bilious disorder of the stomach. [L, 107.]

GASTROCHOLOSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-kol-(ch^{2}o^{2}l)-o′sis. Gen., *-os′eos* (*-os′is*). For deriv., see GASTER and CHOLOSIS. Fr., *gastrocholose.* Ger., *gallichtes gastrisches Fieber.* Gastric bilious fever. [L, 107.]

GASTROCNEME (Lat.), **GASTROCNEMIA** (Lat.), **GASTROCNEMIUM** (Lat.), n's f., f., and n. Ga^{2}st(ga^{3}st)-ro^{2}k-ne(na)′-me(ma), -mi^2-a^3, -mi^2-u^{3}m(u^{4}m). Gr., γαστροκνημία. Fr., *mollet.* Ger., *Wade.* The calf of the leg. [A, 322.]

GASTROCNEMIUS (Lat.), n. m. Ga^{2}s(ga^{3}s)-tro^{2}k-nem(nam)′-i^2-u^{3}s(u^{4}s). Fr., *gastrocnémien.* Ger., *Wadenmuskel.* The most superficial of the muscles forming the calf of the leg. It arises by two tendons, the outer being attached to the outer, upper, and back portions of the external condyle of the femur, and the inner to the back part of the femur above the internal condyle. Muscular fibres spring from the tendons, which are united in part in the middle line to a fibrous septum. Slightly below the middle of the calf the whole muscle blends with the tendo Achillis. The two heads form the lower boundary of the popliteal space. [L, 31, 142, 332.]—**G. externus.** 1. See *G.* 2. Of Riolan, the external head of the g. [L.]—**G. internus.** 1. See SOLÆUS. 2. Of Riolan, the internal head of the g. [L, 349.]—**G. lateralis.** See *G. externus* (2d def.).—**G. medialis.** See *G. internus* (2d def.).—**G. tertius.** An anomalous head of the g. which may arise from the posterior surface of the femur, the fascia lata, the fibula, the long head of the biceps femoris, or almost any of the structures near the knee joint. [L, 332.]

GASTROCŒLIAC, adj. Ga^{2}s″tro-sel′i^2-a^{2}k. Lat., *gastrocœliaque.* See CŒLIAC.

GASTROCOLIC, adj. Ga^{2}s-tro-kol′i^{2}k. Lat., *gastrocolicus* (from γαστήρ, the stomach, and κῶλον, the colon). Fr., *gastrocolique.* Relating to the stomach and to the colon.

GASTROCOLICA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro(tro^3)-kol′i^{2}k-a^3. For deriv., see GASTER and COLIC. See COLIC *of the stomach.*

GASTROCOLITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-kol-i(e)′tis. Gen., *-it′idos* (*-idis*). For deriv., see GASTER and COLITIS. Fr., *gastrocolite.* Ger., *Magenkolonentzündung, G.* Inflammation of the stomach and colon. [L, 41, 44, 50, 95 (*a*, 14).]

GASTRO-COLPOTOMY, n. Ga^{2}s″tro-ko^{2}lp-o^{2}t′o-mi^2. For deriv., see GASTER and COLPOTOMY. Lat., *gastrocolpotomia.* Fr., *gastro-colpotomie.* See LAPARO-ELYTROTOMY.

GASTRO-CONJONCTIVITE (Fr.), n. Ga^{3}s-tro-ko^{2}n^2-zho^{2}n^{2}k-te-vet. For deriv., see GASTER and CONJUNCTIVITIS. In veterinary medicine, inflammation of the stomach and of the conjunctiva, attributed to excessive heat. [L, 41, 44, 95 (*a*, 14).]

GASTROCYSTIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-si^{2}st(ku^{6}st)′-i^{2}s. Gen., *-cyst′eos*, *-cyst′ios*, *-cyst′is.* For deriv., see GASTER and CYST. See BLASTOSPHERE.

GASTROCYSTITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-si^{2}st-(ku^{6}st)-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). For deriv., see GASTER and CYSTITIS. Fr., *gastro-cystite.* Ger., *Harnblasenmagenentzündung.* Simultaneous inflammation of the stomach and of the bladder. [L, 41, 50 (*a*, 14).]

GASTRODE, adj. Ga^{2}s′trod. Gr., γαστρώδης (from γαστήρ, the belly, and εἶδος, resemblance). Fr., *gastroïde.* Ger., *magenförmig, bauchförmig.* Big-bellied. Cf. GASTROID.

GASTRO-DERMATITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-du^{5}rm(de^{2}rm)-a^3-ti(te)′ti^{2}s. Gen., *-ti′tidos* (*-idis*). For deriv., see GASTER and DERMATITIS. An old term for an exanthem associated with a gastric disease. [G.]

GASTRODERMIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-du^{6}rm-(de^{2}rm)′i^{2}s. From γαστήρ, the belly, and δέρμα, the skin. Ger., *G.* Of Haeckel, the epithelium of the alimentary canal and its glands, exclusive of the mouth. [J.] See *Entodermic* EPITHELIUM.

GASTRO-DERMITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-du^{5}rm-(de^{2}rm)-i(e)′ti^{2}s. Gen., *-it′idos* (*-idis*). Fr., *gastro-dermite.* See GASTRO-DERMATITIS.

GASTRODIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-trod′i^2-a^3. From γαστήρ, the belly. A genus of orchids. [B, 19, 121 (*a*, 24).]—**G. Cunninghamii.** A species found in New Zealand, where its root is eaten by the natives, who call it *peri.* It is rich in starch. [B, 19 (*a*, 24).]

GASTRODIABROSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-di(di^2)-a^3-bro′si^{2}s. Gen., *-bros′eos* (*-os′is*). See GASTROBROSIS.

GASTRODIALYSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-di(di^2)-a^{2}l(a^{3}l)′i^{2}s(u^{6}s)-i^{2}s. Gen., *-alys′eos* (*-al′ysis*). For deriv., see GASTER and DIALYSIS. Fr., *gastro-dialyse.* Ger., *G.* A solution of continuity involving the whole thickness of the wall of the stomach. [A, 322.]

GASTRODIAPHANIE (Ger.), n. Ga^{3}s-tro-de-a^3-fa^3-ne′. From γαστήρ, the stomach, and διαφανής, diaphanous. Diaphanoscopy of the stomach. [M. Einhorn, "Med. Mnttschr.," Nov., 1889.]

GASTRODIATREMA (Lat.), n. n. Ga^{2}s(ga^{3}s)″tro(tro^3)-di-(di^2)-a^3-tre(tra)′ma^3. Gen., *-tre′matos* (*-tis*). From γαστήρ, the stomach, διά, through, and τρῆμα, a perforation. A perforation of the wall of the stomach. [A, 322.]

GASTRODIATRESIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-di(di^2)-a^3-tre(tra)′si^{2}s. Gen., *-tres′eos* (*-tres′is*). For deriv., see GASTER and DIATRESIE. Ger., *Magendurchlöcherung.* The formation of a perforation of the stomach. [A, 322.]

GASTRODIDYMUS (Lat.), n. m. Ga^{2}s(ga^{3}s)″tro(tro^3)-di^{2}d′-i^{2}m(u^{6}m)-u^{3}s(u^{4}s). From γαστήρ, the belly, and δίδυμος, double. Fr., *gastro-didyme.* A double monster having but one abdominal cavity. [A, 322.]

GASTRODISC, n. Ga^{2}s′tro-di^{2}sk. Lat., *gastrodiscus* (from γαστήρ, the belly, and δίσκος, a round plate). Fr., *gastro-disque.* See *Embryonic* AREA.

GASTRODIUM (Lat.), n. n. Ga^{2}s(ga^{3}s)-trod′i^2-u^{3}m(u^{4}m). See GASTRODIA.

GASTRODODECADACTYLOPYRA (Lat.), n. Ga^{2}s(ga^{3}s)″-tro(tro^3)-do-de^{2}k-a^3-da^{2}k(da^{3}k)-ti^{2}l(tu^{6}l)-o^{2}p′i^{2}r(u^{6}r)-a^3. From γαστήρ, the stomach, δωδεκαδάκτυλον, the duodenum, and πῦρ, feverish heat. A term suggested by L. A. Kraus for the *gastroduodenopyra* of Eisenmann.

GASTRODODECADACTYLOTYPHUS (Lat.), n. m. Ga^{2}s-(ga^{3}s)-tro(tro^3)-do-de^{2}k-a^3-da^{2}k(da^{3}k)″ti^{2}l(tu^{6}l)-o(o^3)-tif(tu^{6}f)′u^{3}s-(u^{4}s). For deriv., see GASTER, DODECADACTYLON, and TYPHUS. A term suggested by L. A. Kraus for the *gastroduodenotyphus* of Eisenmann.

GASTRO-DUODENAL, adj. Ga^{2}s(ga^{3}s)″tro-du^2-o-den′a^{2}l. Lat., *gastro-duodenalis* (from γαστήρ, the stomach, and *duodenum* [*q. v.*]). Fr., *gastro-duodénal.* Ger., *Magen und Zwölffingerdarm betreffend.* Pertaining to the stomach and to the duodenum. [L, 41, 44, 50, 95 (α, 14).]

GASTRO-DUODENITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-du^2-(du^4)-o(o^2)-de^{2}n(dan)-i(e)′ti^{2}s. Gen., *-it′idos (-idis).* For deriv., see GASTER and DUODENITIS. Fr., *gastro-duodénite.* Ger., *Zwölffingerdarmmagenentzündung.* Inflammation of the stomach and of the duodenum. A better term would be *gastro-dodecadactylitis.* [L, 41, 44, 95 (α, 14).]

GASTRODUODENOCHOLECYSTITIS (Lat.), n. f. Ga^{2}s-(ga^{3}s)″tro(tro^3)-du^2(du^4)-o(o^2)-den(dan)″o(o^3)-kol(ch^{2}o^{2}l)-e^2(a)-si^{2}st-(ku^{6}st)-i(e)′tis. Gen., *-it′idos (-idis).* For deriv., see GASTER, DUODENUM, and CHOLECYSTITIS. Fr., *gastroduodéno-cholécystite.* Inflammation of the stomach, duodenum, and gall-bladder. [L.]

GASTRODUODENOPYRA [Eisenmann] (Lat.), n. f. Ga^{2}s-(ga^{3}s)″tro(tro^3)-du^2(du^4)-o(o^2)-de^{2}n(dan)-o^{2}p′i^{2}r(u^{6}r)-a^3. From γαστήρ, the stomach, *duodenum* (*q. v.*), and πῦρ, feverish heat. See *Pituitary* FEVER.

GASTRO-DUODENOSTOMY, n. Ga^{2}s″tro-du^2-o^2-de^{2}n-o^{2}s′-tom-i^2. For deriv., see GASTER and DUODENOSTOMY. The operation of establishing a gastro-duodenal fistula.

GASTRODUODENOTYPHUS [Eisenmann] (Lat.), n. m. Ga^{2}s(ga^{3}s)″tro(tro^3)-du^2(du^4)-o(o^3)-de^{2}n(dan)-o(o^3)-tif(tu^{6}f)′u^{3}s(u^{4}s). For., deriv., see GASTER, DUODENUM, and TYPHUS. Petechial (typhus) fever. [A, 322.]

GASTRODYME (Fr.), n. Ga^{3}s-tro-dem. See GASTRODIDYMUS.

GASTRODYNE (Lat.), **GASTRODYNIA** (Lat.), n's f. Ga^{2}s-(ga^{3}s)-tro^{2}d′i^{2}n-e(a), -tro(tro^3)-di^{2}n(du^{6}n)′i^2-a^3. From γαστήρ, the stomach, and ὀδύνη, pain. Fr., *gastro-dynie.* Ger., *Magenschmerz, Gastrodynie.* An affection characterized by severe cramps or paroxysms of pain referred to the epigastrium. They may or may not be an accompaniment of organic disease of the stomach. In some cases they are associated with a general tendency to neuralgic pains; in others they may be attributed to faults in digestion. [D, 25.] See CARDIALGIA.—**G. flatulenta.** Of Szerlecki, g. caused by flatus. [α, 34.]—**G. neuralgica.** Of Romberg, g. caused by hyperæsthesia of the pneumogastric nerve. [α, 34.]—**Uterine g.** Of Fosbroke, g. associated with uterine or ovarian disease, probably due to anæmia. [α, 34.]

GASTRODYSNEURIA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-di^{2}s-(du^{6}s)-nu^2′ri^2-a^3. From γαστήρ, the stomach, δύς [see *Dys-**], and νεῦρον, a nerve. Ger., *Magennervenleiden.* Nervous derangement of the stomach. [A, 322.]

GASTRO-ECTASIA (Lat.), n. f. Ga^{3}s(ga^{3}s)″tro(tro^3)-e^{2}k-taz-(ta^{3}s)′i^2-a^3. See GASTRECTASIS.

GASTRO-ELYTROTOMY, n. Ga^{2}s″tro-e^{2}l-i^{2}t-ro^{2}t′o-mi^2. Lat., *gastro-elytrotomia* (for deriv., see GASTER and ELYTROTOMY). Fr., *gastro-élytrotomie.* See LAPARO-ELYTROTOMY.

GASTRO-ENCEPHALITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-e^{2}n(e^{2}n^2)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-i(e)′ti^{2}s. Gen., *-it′idos (-idis).* For deriv., see GASTER and ENCEPHALITIS. Fr., *gastro-encéphalite.* Inflammation of the stomach accompanied by brain symptoms. [L, 41.]

GASTRO-ENCEPHALOMA (Lat.), n. n. Ga^{2}s(ga^{3}s)″tro(tro^3)-e^{2}n(e^{2}n^2)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-om′a^3. Gen., *-om′atos (-tis).* From γαστήρ, the stomach, and ἐγκέφαλος, the brain. See GASTROMYELOMA.

GASTRO-ENTERALGIA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-e^{2}n-te^{2}r-a^{2}l(a^{3}l)′ji^2(gi^2)-a^3. For deriv., see GASTER and ENTERALGIA. Fr., *gastro-entéralgie.* Neuralgia of the stomach and of the intestines. [L, 41.]

GASTRO-ENTERIC, adj. Ga^{2}s″tro-e^{2}n-te^{2}r′i^{2}k. For deriv., see GASTER and ENTERIC. Fr., *gastro-entérique.* Ger., *gastro-enterisch.* Pertaining to the stomach and the intestine or to a condition involving both. [D.]

GASTRO-ENTERITIC, adj. Ga^{2}s″tro-e^{2}n-te^{2}r-i^{2}t′i^{2}k. Lat., *gastrenteriticus.* Fr., *gastrentéritique.* Ger., *gastro-enteritisch.* Of or pertaining to gastro-enteritis. [B.]

GASTRO-ENTERITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-e^{2}n-te^{2}r-i(e)′ti^{2}s. Gen., *-it′idos (-idis).* For deriv., see GASTER and ENTERITIS. Fr., *gastro-entérite.* Ger., *Magendarmentzündung.* 1. Simultaneous inflammation of the stomach and intestine. Broussais taught that the essential fevers were due to such an affection. 2. Of the veterinarians, membranous enteritis. [A, 301.]—**Follicular g.-e.** Fr., *gastro-entérite folliculeuse.* See *Typhoid* FEVER.—**G.-e. carbunculosa.** Inflammation and suppuration of the gastric and enteric follicles with circumfollicular infiltration. [α, 34.]—**G.-e. favosa.** Of Klebs, a g.-e. produced by the *Achorion Schönleinii* developing in the gastro-intestinal tract. [α, 34.]—**G.-e. mucosa.** Syn.: *English cholera.* Inflammation of the mucous membrane of the gastro-intestinal tract. Its most prominent symptoms are nausea, pain in and dilatation of the stomach and intestines, vomiting, and the discharge of feculent and mucous stools. [D, 63.]—**G.-e. nervosa.** See *Typhoid* FEVER.—**G.-e. venosa.** A g.-e. caused by congestion of the gastric and enteric veins; a term founded on Broussais's theory. [α, 34.]

GASTRO-ENTEROCOLITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro-(tro^3)-e^{2}n-te^{2}r-o(o^3)-kol-i(e)′ti^{2}s. Gen., *-it′idos (-idis).* From γαστήρ, the stomach, ἔντερον, the intestine, and κῶλον, the colon. Fr., *gastro-entéro-colite.* Inflammation of the stomach, the small intestine, and the colon. [L, 41.]

GASTRO-ENTERO-MENINGITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″-tro(tro^3)-e^{2}n-te^{2}r-o(o^3)-me^{2}n(man)-i^{2}n(i^{2}n^2)-ji(ge)′ti^{2}s. Gen., *-it′idos (-idis).* From γαστήρ, the belly, ἔντερον, the intestine, and μῆνιγξ, a membrane of the brain. Fr., *gastro-entéro-méningite.* Of Levillain, gastro-enteritis and meningitis associated with inflammation of the veins and the heart, probably of bacterial origin. [α, 34.]

GASTRO-ENTÉROPATHIE (Fr.), n. Ga^{2}s(ga^{3}s)-tro-a^{3}n^2-ta-ro-pa^3-te. From γαστήρ, the stomach, ἔντερον, the intestine, and πάθος, disease. Any gastro-intestinal disease.—**G.-e. alcoolique aiguë.** Gastro-intestinal derangement caused by acute alcoholism. [B, 46.]

GASTRO-ENTEROSTOMY, n. Ga^{2}s″tro-e^{2}n-te^{2}r-o^{2}s′to-mi^2. For deriv., see GASTER and ENTEROSTOMY. Fr., *gastro-entérostomie.* Ger., *Gastroënterostomie.* The operation of establishing an artificial communication between the stomach and the small intestine. [Wolfler, "Ctrlbl. f. Chir.," Nov. 12, 1881, cited in "Edinb. Med. Jour.," Apr., 1882.]

GASTRO-ENTEROTOMY, n. Ga^{2}s″tro-e^{2}n-te^{2}r-o^{2}t′o-mi^2. For deriv., see GASTER and ENTEROTOMY. Enterotomy through the anterior abdominal wall.

GASTRO-EPIPLOIC, adj. Ga^{2}s″tro-e^{2}p-i^2-plo′i^{2}k. Lat., *gastro-epiploicus* (from γαστήρ, the stomach, and ἐπίπλοον, the omentum). Fr., *gastro-épiploïque.* Ger., *gastro-epiploisch.* Of or pertaining to the stomach and the omentum. [L, 41, 44, 50, 95 (α, 14).]

GASTROHÆMORRHAGIA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro-(tro^3)-he^{2}m(ha^3-am)-o^{2}r-raj(ra^{3}g)′i^2-a^3. See GASTRORRHAGIA.

GASTRO-HEPATIC, adj. Ga^{2}s″tro-he-pa^{2}t′i^{2}k. Lat., *gastro-hepaticus* (see GASTER and HEPATIC). Fr., *gastro-hépatique.* Ger., *gastrohepatisch.* Of, pertaining to, or under the influence of, the stomach and the liver. [D.]

GASTRO-GENITAL, adj. Ga^{2}s″tro-je^{2}n′i^{2}t-a^{2}l. For deriv., see GASTER and GENITAL. Pertaining to the abdomen and to the genital apparatus.

GASTRO-HEPATITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-he^{2}p-(hap)-a^{2}t(a^{3}t)-i(e)′ti^{2}s. Gen., *-it′idos (-idis).* For deriv., see GASTER and HEPATITIS. Fr., *gastro-hépatite.* Inflammation of the stomach and liver. [L, 41.]

GASTRO-HUMÉRAL (Fr.), adj. Ga^{3}s-tro-u^6-ma-ra^{3}l. From γαστήρ, the belly, and *humerus*, the arm. Pertaining to the abdomen and to the shoulder. [A, 385.]

GASTROHYPERNERVIA [Piorry] (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro(tro^3)-hi(hu^6)-pu^{6}r(pe^{2}r)-nu^{6}r(ne^{2}r)′vi^2(wi^2)-a^3. See GASTRYPERNEURIA.

GASTROHYPONERVIA [Piorry] (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro-(tro^3)-hi(hu^6)-po(po^2)-nu^{6}r(ner)′vi^2(wi^2)-a^3. See GASTRYPONEURIA.

GASTRO-HYSTEROTOMY, n. Ga^{2}s″tro-hi^{2}st-e^{2}r-o^{2}t′o-mi^2. For deriv., see GASTER and HYSTEROTOMY. Fr., *gastro-hystérotomie.* Ger., *Gastrohysterotomie.* See LAPARO-HYSTEROTOMY.

GASTROID, adj. Ga^{2}s′troid. Gr., γαστρώδης. Lat., *gastrodes.* Resembling a belly (said of parts of animals and plants). [L, 107.]

GASTRO-INTESTINAL, adj. Ga^{2}s″tro-i^{2}n-te^{2}st′i^{2}n-a^{2}l. Lat., *gastro-intestinalis.* Fr., *gastro-intestinale.* See GASTRO-ENTERIC.

GASTRO-JEJUNOSTOMY, n. Ga^{2}s″tro-je-ju^{2}n-o^{2}st′o-mi^2. From γαστήρ, the stomach, *jejunum* (*q. v.*), and στόμα, an aperture. See GASTRO-NESTEOSTOMY.

GASTRO-LARYNGITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-la^{2}r(la^{3}r)-i^{2}n(u^{6}n^2)-ji(ge)′tis. Gen., *-git′idos (-idis).* For deriv., see GASTER and LARYNGITIS. Fr., *gastro-laryngite.* Gastritis complicated with laryngitis. [L, 41, 44, 95 (α, 14).]

GASTRO-LIENAL, adj. Ga^{2}s″tro-li-en′a^{2}l. Lat., *gastrolienalis* (from γαστήρ, the stomach, and *lien*, the spleen). See GASTRO-SPLENIC.

GASTROLITH, n. Ga^{2}s′tro-li^{2}th. Lat., *gastrolithus* (from γαστήρ, the stomach, and λίθος, a stone). See *Gastric* CALCULUS.

GASTROLITHIASIS (Lat.), n. f. G^{2}s(ga^{3}s)″tro(tro^3)-li^{2}th-i^2-as(a^{3}s)′i^{2}s. Gen., *-thias′eos (-as′is).* For deriv., see GASTER and LITHIASIS. Fr., *gastro-lithiase.* A morbid condition due to or characterized by gastric concretions. [A, 322.]

GASTROLOBIN, n. Ga^{2}s-tro^{2}l′o-bi^{2}n. A glucoside obtained by von Müller and Rummel from the leaves and young branches of *Gastrolobium bilobum*; a blackish, brittle, hygroscopic substance having an odor and taste like sassafras, and soluble in hot water and in alcohol. Dissolved in aqua ammoniæ, it forms an intensely yellow solution. ["Proc. of the Am. Pharm. Assoc.," xxviii (α, 14).]

GASTROLOBIUM (Lat.), n. n. Ga^{2}s″tro(tro^3)-lob(lo^{2}b)′i^2-u^{3}m(u^{4}m). From γαστήρ, the belly, and λόβιον, the lower part of the ear. Fr., *gastrolobe.* The poison-plant of western Australia; of R. Brown, a genus of leguminous bushes. The leaves of a number of the species have been supposed to be poisonous, cattle in large numbers being annually lost by eating them; but by Fraas this effect is considered more likely due to poisonous *Fungi* parasitic on the leaves, for the latter have been found free from toxic ingredients. [B, 19, 121 (α, 24).]

GASTROLOGY, n. Ga^{2}s-tro^{2}l′o-ji^2. Lat., *gastrologia* (from γαστήρ, the stomach, and λόγος, understanding). Fr., *gastrologie.* Ger., *Magenlehre.* The physiology, etc., of the stomach. [A, 322.]

GASTROMALACIA (Lat.), **GASTROMALACOSIS** (Lat.), **GASTROMALAXIA** (Lat.), n's f. Ga^{2}s(ga^{3}s)″tro(tro^3)-ma^{2}l-(ma^{3}l)-as(a^{3}k)′i^2-a^3, -a^3-ko′si^{2}s, -a^{2}x(a^{3}x)′i^2-a^3. From γαστήρ, the

stomach, and μαλακίζεσθαι, to be softened. Fr., *gastromalacie, gastromalacose.* Ger., *Gastromalacie. Magenerweichung.* It., Sp., *gastromalacia.* Softening of the stomach ; thought by some to be purely a post-mortem condition, by others to exist during life. [D, 29.]—**G. cadaverosa.** Ger., *cadaveröse Gastromalacie.* A post-mortem digestion of the mucous membrane of the stomach, in which it is changed into a soft, slimy, transparent mass. It occurs when the contents of the viscus are acid. [*a*, 34.]

GASTROMELÆNA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-me^{2}l-en(a^3′e^{2}n)-a^3. See MELÆNA.

GASTROMELIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro(tro^3)-mel(me^{2}l)′-i^2-a^3. Fr., *gastromélie.* The form of monstrosity described under GASTROMELUS.

GASTROMELUS (Lat.), n. m. Ga^{2}s(ga^{3}s)-tro^{2}m′e^{2}l-u^{3}s(u^{4}s). From γαστήρ, the belly, and μέλος, a limb. A monster having one or more accessory limbs attached to the abdomen. [L, 41.]

GASTROMENIA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-men(man)′-i-a^3. From γαστήρ, the stomach, and μήν, a month. Fr., *gastromenstrues.* Vicarious menstruation by the stomach. [A, 322.]

GASTRO-MENINGITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-me^{2}n(man)-i^{2}n(i^{2}n^2)-ji(ge)′ti^{2}s. Gen., *-it′idos* (*-idis*). For deriv., see GASTER and MENINGITIS. Fr., *gastro-méningite.* It., *gastromeningite.* Sp., *g.-m.* Inflammation of the stomach and of the meninges of the brain. [L, 41, 44, 95 (*a*, 14).]

GASTRO-METRITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-me^{2}t-(mat)-ri(re)′ti^{2}s. Gen., *-tri′tidos* (*-idis*). For deriv., see GASTER and METRITIS. Fr., *gastro-métrite.* Simultaneous inflammation of the stomach and of the uterus. [L, 41.]

GASTRO-METROTOMY, n. Ga^{2}s″tro-me^{2}t-ro^{2}t′o-mi^2. Lat., *gastrometrotomia* (see GASTER and METROTOMY). See LAPARO-HYSTEROTOMY.

GASTRO-MUCOUS, adj. Ga^{2}s″tro-mu^2′ku^{3}s. Lat., *gastromucosus.* Fr., *gastro-muqueux.* Involving irritation of the stomach, and accompanied by a mucous secretion. [L, 41.]

GASTROMYCETES (Lat.), n. m. pl. Ga^{2}s(ga^{3}s)″tro(tro^3)-mi-(mu^6)-set(kat)′ez(e^{2}s). From γαστήρ, the belly, and μύκης, a mushroom. See GASTEROMYCETES.

GASTROMYCODERA (Lat.), **GASTROMYCODERIS** (Lat.), n′s n. and f. Ga^{2}s(ga^{3}s)″tro(tro^3)-mi(mu^6)-ko^{2}d′e^{2}r-a^3, -i^{2}s. Gen., *-der′atos* (*-tis*), *-od′eris.* From γαστήρ, the stomach, μῦκος, mucus, and δέρας or δέρις, a skin. The mucous membrane of the stomach. [A, 322.]

GASTROMYCODERITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-mi^2(mu^6)-ko^{2}d-o^{2}r-i(e)′ti^{2}s. Gen., *-ri′tidos* (*-idis*). Inflammation of the gastric mucosa. [A, 322.]

GASTROMYELOMA (Lat.), n. n. Ga^{2}s(ga^{3}s)″tro(tro^3)-mi(mu^6)-e^{2}l-om′a^3. Gen., *-om′atos* (*-is*). From γαστήρ, the stomach, and μυελός, marrow. Fr., *gastro-myélome.* Ger., *Gastromyelom.* Medullary sarcoma of the stomach. [A. 322.]

GASTRONECTE (Fr.), adj. Ga^{3}s-tro-ne^{2}kt. From γαστήρ, the belly, and νήκτης, a swimmer. Sp., *gastronecto.* Of fishes, having the abdominal vertebræ so developed as to form a swimming organ. [L, 41 (*a*, 14).]

GASTRONEPHRITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-ne^{2}f-ri(re)′tis. Gen., *-rit′idos* (*-idis*). From γαστήρ, the stomach, and νεφρός, the kidney. Fr., *gastro-néphrite.* Ger., *Magen und Nierenentzündung.* Gastritis complicated with nephritis. [L, 41 (*a*, 14).]

GASTRONERVIA [Piorry] (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro(tro^3)-nu^{6}r(ne^{2}r)′vi^2(wi^2)-a^3. See GASTRONEURIA.

GASTRO-NESTEOSTOMY, n. Ga^{2}s″tro-ne^{2}st-e^2-o^{2}st′o-mi^2. From γαστήρ, the stomach, νῆστις, the jejunum, and στόμα, an aperture. The operation of establishing an artificial communication between the stomach and the jejunum.

GASTRONEURIA (Lat.), n. n. pl. Ga^{2}s(ga^{3}s)″tro(tro^3)-nu^2′-ri^2-a^3. From γαστήρ, the stomach, and νεῦρον, a nerve. The nervous action of the stomach. [A, 322.]

GASTRONOSOS (Lat.), **GASTRONOSUS** (Lat.), n′s f. Ga^{2}s-(ga^{3}s)-tro^{2}n′o^{2}s-o^{2}s, -u^{3}s(u^{4}s). From γαστήρ, the belly or stomach, and νόσος, a sickness. Ger., *Magenkrankheit, Unterleibskrankheit.* A disorder of the stomach or of the abdomen. [A, 322 ; L, 107.]

GASTRO-ŒSOPHAGITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-e(o^2-e^2)-so^{2}f-a^3-ji(ge)′ti^{2}s. Gen., *-git′idos* (*-idis*). From γαστήρ, the stomach, and οἰσοφάγος, the gullet. Fr., *gastro-œsophagite.* Inflammation of the stomach and of the œsophagus. [L, 41.]

GASTRO-OMENTAL, adj. Ga^{2}s″tro-o-me^{2}nt′a^{2}l. See GASTRO-EPIPLOIC.

GASTRO-PANCREATIC, adj. Ga^{2}s″tro-pa^{2}n-kre-a^{2}t′i^{2}k. Pertaining to the stomach and to the pancreas.

GASTROPANCREATITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-pa^{2}n(pa^{3}n)-kre^2-a^3-ti(te)′ti^{2}s. Gen., *-it′idos* (*-idis*). For deriv., see GASTER and PANCREATITIS. Fr., *gastro-pancréatite.* Concurrent inflammation of the stomach and pancreas. [A, 322.]

GASTROPARALYSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-pa^{2}r-(pa^{3}r)-a^{2}l(a^{3}l)′i^2(u^6)-si^{2}s. Gen., *-lys′eos* (*-al′ysis*). From γαστήρ, the belly, and παράλυσις, a loosening. Fr., *gastro-paralyse.* Ger., *Magenlähmung.* It., *gastro-paralisi.* Sp., *gastro-paralisis.* Paralysis of the stomach. [L, 107.]

GASTROPARIETAL, adj. Ga^{2}s″tro-pa^{2}r-i′e^{2}t-a^{2}l. From γαστήρ, the belly, and *paries*, a wall. 1. Pertaining to the wall of the stomach. 2. Pertaining to the stomach and to the abdominal wall. [*a*, 21.]

GASTROPATHY, n. Ga^{2}s-tro^{2}p′a^{2}th-i^2. Lat., *gastropathia* (from γαστήρ, the stomach, and πάθος, a disease). Fr., *gastropathie.* Ger., *Magenkrankheit, Magenleiden.* Any disease of the stomach. [L, 107.]

GASTRO-PERICARDITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-pe^{2}r-i^2-ka^{3}rd-i(e)′tis. Gen., *-it′idos* (*-idis*). From γαστήρ, the belly, περί, around, and καρδία, the heart. Fr., *gastro-pericardite.* Ger., *Magenherzbeutelentzündung.* Concurrent inflammation of the stomach and the pericardium. [L, 41.]

GASTROPERIODYNIA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-pe^{2}r-i^2-o(o^3)-di^{2}n(du^{6}n)′i^2-a^3. From γαστήρ, the belly, περίοδος, a period, and ὀδύνη, pain. A disease, said to be peculiar to India, attended with severe periodical gastralgia. [L, 107.]

GASTROPERITONITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-pe^{2}r-i^2-to^{2}n-i(e)′tis. Gen., *-it′idos* (*-idis*). For deriv., see GASTER and PERITONITIS. Ger., *Magenbauchfellentzündung.* Concurrent inflammation of the stomach and the peritonæum. [L, 41.]

GASTROPHAN (Ger.), n. Ga^{3}s-tro-fa^{3}n′. Of Fürst, a tincture made up of dilute alcohol and quassia, oranges, galangal, and cardamoms. [B, 270.]

GASTROPHARYNGITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)-ji(ge)′ti^{2}s. Gen., *-it′idos* (*-idis*). From γαστήρ, the belly, and φάρυγξ, the throat. Fr., *gastro-pharyngite.* Ger., *Mageuschlundkopfentzündung.* Concurrent inflammation of the stomach and the pharynx. [L, 41.]

GASTROPHILUS (Lat.), n. m. Ga^{2}s(ga^{3}s)-tro^{2}f′i^{2}l-u^{3}s(u^{4}s). See ŒSTRUS.—**G. equi.** The gad fly, a species causing the "bots." Its eggs, deposited on portions of the body, in the horse and other solipeds, accessible to the tongue, are there hatched out and afterward, being licked off, make their way into the stomach, where they attach themselves, and remain until developed, when they are detached and escape with the fæces. They then bury themselves in the ground, and in six or seven weeks appear in the form of the fly. [L.]—**G. hæmorrhoidalis.** Ger., *Afterbremse, Mastdarmbremse.* A species which inhabits the stomach and intestines of the horse, being ingested along with green grass; so called because formerly supposed to enter by the anus. [B, 49 (*a*, 27).]

GASTRO-PHRENIC, adj. Ga^{2}s″tro-fre^{2}n′i^{2}k. Lat., *gastrophrenicus* (from γαστήρ, the stomach, and φρήν, the diaphragm. Fr., *gastro-phrénique.* Of or pertaining to the stomach and the diaphragm. [L, 41.]

GASTROPHTHALMIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro^{2}f-tha^{2}l-(tha^{3}l)′mi^2-a^3. From γαστήρ, the belly, and ὀφθαλμία, ophthalmia. See OPHTHALMIA *gastrica.*

GASTROPHTHISIS (Lat.), **GASTROPHTHOE** (Lat.), n′s f. Ga^{2}s(ga^{3}s)-tro^{2}t(tro^{2}f)′i^{2}s(thi^{2}s)-i^{2}s, -tho(tho^2)-e(a). From γαστήρ, the stomach, and φθίσις, or φθόη, consumption. Fr., *gastro-phthisie.* Ger., *Magenschwindsucht, Bauchschwindsucht.* An emaciated and hectic state due to abdominal disease. [A, 322.]

GASTROPHYMIES [Piorry] (Fr.), n. pl. Ga^{3}s-tro-fe-me. From γαστήρ, the stomach, and φῦμα, a growth. Tubercles of the stomach. [L, 82.]

GASTRO-PLATYPODE (Fr.), adj. Ga^{3}s-tro-pla^3-te-pod. From γαστήρ, the belly, πλατύς, broad, and πούς, the foot. In ornithology, having the body poised upon palmated claws. [L, 41.]

GASTROPLEGIA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-ple(pla)′-ji(gi^2)-a^3. From γαστήρ, the stomach, and πληγή, a blow. Ger., *Gastroplegie.* See GASTROPARALYSIS.

GASTROPLETHORA (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-ple-(pla)-tho′ra^3. From γαστήρ, the stomach, and πληθώρη, fullness. Fr., *gastro-pléthore.* Congestion of the stomach. [A, 322.]

GASTROPLEURITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)″tro(tro^3)-plu^2-ri(re)′ti^{2}s. Gen., *-it′idos* (*-idis*). From γαστήρ, the stomach, and πλευρόν, the side. Fr., *gastro-pleurésie.* Concurrent gastritis and pleurisy. [L, 116.]

GASTROPNEUMONIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro(tro^3)-nu^2-(pnu^2)-mon(mo^{2}n)′i^2-a^3. From γαστήρ, the stomach, and πνευμονία, pneumonia. Fr., *gastro-pneumonie.* Ger., *Magenlungenentzündung.* Concurrent inflammation of the stomach and lungs. [L, 41.]

GASTRO-PNEUMONIC, adj. Ga^{2}s″tro-nu^2-mo^{2}n′i^{2}k. Fr., *gastro-pneumonique.* See PNEUMOGASTRIC.

GASTROPODA (Lat.), n. Ga^{2}s(ga^{3}s)-tro^{2}p′o^{2}d-a^3. See GASTEROPODA.

GASTROPODOUS, adj. Ga^{2}s-tro^{2}p′o-du^{3}s. See GASTEROPODOUS.

GASTROPORPHYROTYPHUS (Lat.), n. m. Ga^{2}s(ga^{3}s)″-tro(tro^3)-po^{2}r-fi^2(fu^6)-ro(ro^3)-ti(tu^6)′fu^{3}s(fu^{4}s). From γαστήρ, the stomach, πορφῦρος, dark-gleaming, and τῦφος, typhus. See PORPHYROTYPHUS *anginosus.*

GASTROPTOSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro^{2}p-to′si^{3}s. Gen., *-os′eos* (*-os′is*). From γαστήρ, the stomach, and πτῶσις, a falling. Fr., *gastroptose.* A sinking down of the stomach. [Glénard, "Union méd.," May 20, 1886, p. 828.]

GASTROPTYGMA (Lat.), **GASTROPTYX** (Lat.), n′s n. and f. Ga^{2}s(ga^{3}s)-tro^{2}p-ti^{2}g(tu^{6}g)′ma^3, -tro^{2}p′ti^{2}x(tu^{6}x). Gen., *-ptyg′matos* (*-tis*), *-op′tychos* (*-chis*). From γαστήρ, the belly, and πτύγμα, anything folded, or πτύξ, a fold. Ger., *Bauchfalte.* One of the plicæ abdominales [Wolff] (seu ventrales [von Baer]). [A. 322.]

GASTRO-PULMONARY, adj. Ga^{2}s″tro-pu^{3}l′mo-na-ri^2. From γαστήρ, the stomach, and *pulmo*, the lung. See PNEUMOGASTRIC.

GASTRO-PYLORIC, adj. Ga^{2}s-tro-pi^2-lo^{2}r′i^{2}k. Lat., *gastropyloricus* (from γαστήρ, the stomach, and πυλωρός [see PYLORUS]). Fr., *gastro-pylorique.* Pertaining to the stomach and to the pylorus. [L, 41.]

GASTROPYRA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro^{2}p′i^{2}r(u^{6}r)-a^3. From γαστήρ, the stomach, and πῦρ, fire. Of Eisenmann, inflammation of the mucous membrane of the stomach. [L, 50 (*a*, 14).]

GASTROPYRETOS (Lat.), **GASTROPYRETUS** (Lat.), n′s m. Ga^{2}s(ga^{3}s)-tro(tro^3)-pi^{2}r(pu^{6}r)′e^{2}t-o^{2}s, -u^{3}s(u^{4}s). From γαστήρ, the stomach, and πυρετός, fever. See *Gastric* FEVER.

GASTRORRHAGIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro^{2}r-raj(ra^{3}g)'i^2-a^3. From γαστήρ, the stomach, and ῥηγνύναι, to break. Fr., *gastrorrhagie, gastrorrhémie.* Ger., *Gastrorrhagie, Magenblutung.* Hæmorrhage from the stomach. [A, 319, 326 (α, 21).]

GASTRORRHAGIE (Fr.), n. Ga^{3}s-tror-ra^3-zhe. See GASTRORRHAGIA.—**G. quinique.** Gastrorrhagia due to the ingestion of quinine. [α, 18.]

GASTRORRHAPHY, n. Ga^{2}s-tro^{2}r'ra^{2}f-i^2. Lat., *gastrorrhaphia, gastrorrhaphe* (from γαστήρ, the belly or stomach, and ῥαφή, a seam). Fr., *gastrorraphie.* Ger., *Gastrorrhaphie, Bauchnaht* (1st def.), *Magennaht* (2d def.). 1. The operation of closing a penetrating wound of the abdomen with sutures. 2. More precisely, the same operation applied to a wound of the stomach or to a gastric fistula. [A, 326 (α, 21).]

GASTRORRHÉMIE [Piorry] (Fr.), n. Ga^{3}s-tror-ra-me. See GASTRORRHAGIA.

GASTRORRHEXIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro^{2}r-re^{2}x(rax)'i^{2}s. Gen., *-rhex'eos (-is).* From γαστήρ, the stomach, and ῥῆξις, a breaking. Ger., *Magenzerreissung.* Rupture of the stomach.

GASTRORRHŒA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro^{2}r-re'(ro^2'e^2)-a^3. From γαστήρ, the stomach or belly, and ῥεῖν, to flow. Fr., *gastrorrhée.* Ger., *Magenfluss* (1st def.), *Bauchfluss* (2d def.). 1. An excessive secretion of gastric mucus. [D, 57.] 2. See *Cœliac* FLUX.—**G. acida.** Ger., *Magensaftfluss.* An excessive secretion of the gastric juice. [A, 326 (α, 21).]

GASTROSCHISIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro^{2}s'ki^2(chi^2)-si^{2}s. Gen., *-schis'eos (-os'chisis).* From γαστήρ, the belly, and σχίσις, a cleaving. See CŒLIOSCHISIS.

GASTROSCIRRHUS (Lat.), n. m. Ga^{2}s(ga^{3}s)"tro(tro^3)-si^{2}r-(sker)'ru^{3}s(ru^{4}s). From γαστήρ, the stomach, and σκῖρρος (see SCIRRHUS). Ger., *Magenverhärtung.* Scirrhus of the stomach. [E.]

GASTROSCOPE, n. Ga^{2}s'tro-skop. From γαστήρ, the belly, and σκοπεῖν, to examine. An apparatus for illuminating and inspecting the interior of the stomach in the living subject. See POLYSCOPE.

GASTROSCOPY (Lat.), n. Ga^{2}s-tro^{2}s'kop-i^2. Lat., *gastroscopia.* Ger., *Bauchschau.* Visual examination of the interior of the stomach. [Baratoux, "Rev. mens. de laryng. otol. et rhinol.," 4; "Presse méd.," Apr., 1882.]

GASTROSEISIS (Lat.), n. f. Ga^{2}s(ga^{3}s)"tro(tro^3)-sis'(se^2-es')-i^{2}s. Gen., *-seis'eos (-seis'is).* From γαστήρ, the stomach, and σεῖσις, a shaking. Ger., *Magenerschütterung.* Concussion of the stomach. [L, 50 (α, 14).]

GASTROSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tro'si^{2}s. Gen., *-os'eos (-is).* Fr., *gastrose.* Ger., *Bauchkrankheit* (1st def.), *Magenkrankheit* (2d def.). 1. Of Baumes, any disease of the abdomen. 2. Of Alibert, any disease of the stomach. [A, 301.]

GASTROSOLVENS (Lat.), adj. Ga^{2}s(ga^{3}s)-tro(tro^3)-so^{2}l've^{2}nz-(wans). From γαστήρ, the stomach, and *solvere,* to dissolve. See DIGESTANT and DIGERENS.

GASTROSPASMA (Lat.), **GASTROSPASMUS** (Lat.), n's n. and m. Ga^{2}s(ga^{3}s)"tro(tro^3)-spa^{2}z(spa^{3}s)'ma^3, -mu^{3}s(mu^{4}s). Gen., *-spas'matos (-is), -i.* From γαστήρ, the stomach, and σπάσμα, a sprain, or σπασμός, a spasm. Ger., *Magenkrampf.* A spasmodic contraction or cramp of the stomach. [L, 44 (α, 14).]

GASTROSPHONGIOMATA (Lat.), n. n. pl. Ga^{2}s(ga^{3}s)"tro-(tro^3)'sfo^{2}n(sfo^{2}n^2)-ji(gi^2)-o^{2}m'a^3-ta^3. From γαστήρ, the belly, and σπογγίον, a little sponge. Ger., *Magenschwammknoten, Magentuberkeln.* Fungosities of the stomach. [L, 50 (α, 14).]

GASTRO-SPLENIC, adj. Ga^{2}s"tro-sple^{2}n'i^{2}k. Lat., *gastrosplenicus* (from γαστήρ, the stomach, and σπλήν, the spleen). Fr., *gastro-splénique.* Of or pertaining to the stomach and to the spleen. [C.]

GASTROSPLENITIS (Lat.), n. f. Ga^{2}s(ga^{3}s)"tro(tro^3)-sple^{2}n-(splan)-i(e)'ti^{2}s. Gen., *-i'tidos (-idis).* From γαστήρ, the stomach, and σπλήν, the spleen (see also *-itis**). Fr., *gastro-splénite.* Ger., *Milzmagenentzündung.* Concurrent inflammation of the stomach and of the spleen. [L, 41.]

GASTROSTEGOUS, adj. Ga^{2}s-tro^{2}s'te^{2}g-u^{3}s. From γαστήρ, the belly, and στέγος, a house. Fr., *gastrostège.* Covering the abdomen (said of the ventral scales of serpents). [A, 385.]

GASTROSTENOSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)"tro(tro^3)-ste^{2}n-o'-si^{2}s. Gen., *-os'eos (-os'is).* From γαστήρ, the stomach, and στένωσις, constriction. A pathological contracted state of the stomach. [A, 385.]—**G. cardiaca.** Stenosis of the cardiac orifice of the stomach. [α, 34.]—**G. pylorica.** Stenosis of the pylorus. [α, 34.]

GASTROSTOMY, n. Ga^{2}s-tro^{2}s'tom-i^2. From γαστήρ, the stomach, and στόμα, an aperture. The operation of making a fistulous opening into the stomach through the abdominal wall for the purpose of inserting food in cases of inability to swallow. [L. H. Petit, "Union méd.," Apr. 10, 1886, p. 577.]

GASTROSUCCORRHŒA (Lat.), n. f. Ga^{2}s(ga^{3}s)"tro(tro^3)-su^{3}k(su^{4}k)-ko^{2}r-re'(ro^2'e^2)-a^3. From γαστήρ, the stomach, *succus,* juice, and ῥεῖν, to flow. See GASTRORRHŒA *acida.*

GASTROSYPHILIDIE [Piorry] (Fr.), n. Ga^{3}s-tro-se-fe-le-de. A syphilitic affection of the stomach. [L, 82.]

GASTROTHÈQUE (Fr.), n. Ga^{3}s-tro-te^{2}k. From γαστήρ, the belly, and θήκη, a sheath. That part of the envelope of a chrysalis which covers the abdomen. [L, 41.]

GASTRO-THORACIQUE (Fr.), n. Ga^{3}s-tro-to-ra^3-sek. From γαστήρ, the belly, and θώραξ, the thorax. Pertaining to the abdomen and to the thorax. [A, 385.]

GASTROTHORACODIDYMUS (Lat.), n. m. Ga^{2}s(ga^{3}s)"-tro(tro^3)-tho^{2}r(thor)-a^{2}k(a^{3}k)-o(o^3)-did'i^2(u^6)-mu^{3}s(mu^{4}s). From γαστήρ, the belly, θώραξ, the thorax, and δίδυμος, a twin. A monster formed of two individuals united by fusion of the thorax and abdomen of each with those of the other. [Fisher (α, 29).]

GASTROTOME (Fr.), n. Ga^{3}s-tro-tom. Of the veterinarians, an instrument for puncturing the stomach or intestine for the relief of tympanites. [A, 301.]

GASTROTOMY, n. Ga^{2}s-tro^{2}t'om-i^2. Lat., *gastrotomia* (from γαστήρ, the belly or stomach, and τέμνειν, to cut). Fr., *gastrotomie.* Ger., *Gastrotomie, Bauchschnitt.* 1. Properly, the opening of the abdominal cavity by a cutting operation, but sometimes applied to the accomplishment of the same thing by means of caustics. Cf. LAPAROTOMY. 2. An incision into the stomach.—**Subchondral g.** Of Reeves, a lateral g. with the incision made beneath the costal cartilages. [α, 34.]—**Ventro-g.** Of Reeves, a g. in which the incision is made through the linea alba. [α, 34.]

GASTROTONICUS (Lat.), adj. Ga^{2}s(ga^{3}s)-tro(tro^3)-to^{2}n'i^{2}k-u^{3}s(u^{4}s). From γαστήρ, the stomach, and τονικός, tonic. Acting as a stomachic tonic. [L, 57.]

GASTRO-TRACHELOTOMY, n. Ga^{2}s"tro-tra^{2}k-e^{2}l-o^{2}t'o-mi^2. From γαστήρ, the belly, τράχηλος, the neck, and τέμνειν, to cut. Ger., *Gastrotrachelotomie.* Of Physick, an operation for accomplishing delivery through the abdomen; differing from the ordinary Cæsarean operation by the fact that the opening into the uterus was made by a transverse incision of the cervix. [Dewees (A, 32).]

GASTROTRYPIE [Piorry] (Fr.), n. Ga^{3}s-tro-tre-pe. From γαστήρ, the belly, and τρῦπα, a hole. A perforation of the stomach. [L, 82.]

GASTROTUBERCULA (Lat.), n. n. pl. Ga^{2}s(ga^{3}s)"tro(tro^3)-tu^2(tu)-bu^{6}r(be^{2}r)'ku^{2}l(ku^{4}l)-a^3. See GASTROSPHONGIOMATA.

GASTRO-TUBOTOMY, n. Ga^{2}s"tro-tu^2-bo^{2}t'o-mi^2. From γαστήρ, the belly, *tuba,* a tube, and τέμνειν, to cut. Of Gardien, laparo-salpingotomy for removing the ovum from a tubal gestation-sac. [A, 301.]

GASTROTYMPANITES (Lat.), n. m. Ga^{2}s(ga^{3}s)"tro(tro^3)-ti^{2}m(tu^{6}m)-pa^{2}n(pa^{3}n)-i(e)'tez(tas). From γαστήρ, the stomach, and τυμπανίτης, tympanites. Fr., *gastro-tympanite.* Ger., *Magentrommelsucht.* Excessive distension of the stomach with gas. [A, 322.]

GASTRO-URETHRITIS (Lat.), adj. Ga^{2}s(ga^{3}s)"tro(tro^3)-u^2-(u)-re(ra)-thri(thre)'ti^{2}s. Gen., *-ri'tidos (-idis).* From γαστήρ, the belly, and οὐρήθρα, the urethra. Fr., *gastro-urétrite.* Ger., *Magenharnröhrenentzündung.* Concurrent inflammation of the stomach and of the urethra. [L, 41.]

GASTRO-VASCULAR, adj. Ga^{2}s"tro-va^{2}s'ku^2-la^{3}r. From γαστήρ, the belly, and *vasculum,* a small vessel. Fr., *gastro-vasculaire.* Belonging to the digestive tube. [L, 41, 193.] See *G.-v.* SPACE and *G.-v.* SYSTEM.

GASTROXIA (Lat.), **GASTROXYNSIS** [Rossbach] (Lat.), **GASTROXYTES** (Lat.), n's f. Ga^{2}s(ga^{3}s)-tro^{2}x'i^2-a^3, -tro^{2}x-i^{2}n-(u^{6}n)'si^{2}s, -tro^{2}x-it(u^{6}t)'ez(as). Gen., *-ox'iœ, -yns'eos (-yns'is), -yt'etos (-is).* From γαστήρ, the stomach, and ὀξύς, acid. Fr., *gastroxie.* Ger., *Magensäure.* Acidity of the stomach.—**Nervous g.** Ger., *nervöse G.* Of Rossbach, a form of nervous dyspepsia affecting adults who are the subjects of severe mental strain; periodical in its attacks, sometimes cerebral and sometimes gastric symptoms predominating; due to an overproduction of acid in the stomach as the result of nervous action. [Rossbach, "Dtsch. Arch. f. klin. Med."; "Ctrlbl. f. klin. Med.," Dec. 27, 1884, p. 834.]

GASTROZOOID, n. Ga^{2}s-tro-zo'oi^{2}d. In the *Hydrocerallinæ,* a polypoid which is provided with a mouth. [L, 121.] Cf. DACTYLOZOOID.

GASTRULA (Lat.), n. f. Ga^{2}s(ga^{3}s)'tru^2(tru^4)-la^3. From γαστήρ, the belly. Of Haeckel, the blastoderm at that period of its development when it consists of a double-walled bag formed by its invagination, so that its cavity is the primitive alimentary canal. [A, 5.] See Plate I.—**Archæostomatous g.** [Haeckel]. A g. in which the blastopore persists, forming the oral aperture. [L, 11.]—**Bell g.** See ARCHIGASTRULA.—**Bilaminar g.** See *G.*—**Bladder g.** See PERIGASTRULA.—**Deuterostomatous g.** A g. in which the oral aperture is formed secondarily, the blastopore closing. [L, 11.]—**Disc g.** See DISCOGASTRULA.—**Glockeng'** (Ger.). See ARCHIGASTRULA.—**Haubeng'** (Ger.), **Hood-g.** See AMPHIGASTRULA.

GASTRULATION, n. Ga^{2}s-tru^2-la'shu^{3}n. Fr., *g.* Ger., *G.* The process of development of the gastrula. See Plate I.

GASTRURIA (Lat.), n. f. Ga^{2}s(ga^{3}s)'tru^2(tru)'ri^2-a^3. From γαστήρ, the stomach, and οὖρον, urine. An old term for a supposed discharge of urine through the stomach. [L, 50 (α, 14).]

GASTRUS (Lat.), n. m. Ga^{2}s(ga^{3}s)'tru^{3}s(tru^{4}s). See ŒSTRUS.

GASTRYPALGIA [Piorry] (Lat.), n. f. Ga^{2}s(ga^{3}s)-tri^{2}p(tru^{6}p)-a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. From γαστήρ, the stomach, ὑπό, somewhat, and ἄγλος, pain. Fr., *gastrypalgie.* Slight gastralgia. [A, 322.]

GASTRYPECTASIA (Lat.), **GASTRYPECTASIS** (Lat.), n's f. Ga^{2}s(ga^{3}s)-tri^{2}p(tru^{6}p)-e^{2}k-taz(ta^{3}s)'i^2-a^3, -e^{2}k'ta^{2}s(ta^{3}s)-i^{2}s. Gen., *-ectas'iœ, -ectas'eos (-ec'tasis).* From γαστήρ, the stomach, ὑπό, somewhat, and ἔκτασις, extension. Moderate distension of the stomach. [A, 322.]

GASTRYPERNEURIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tri^{2}p(tru^{6}p)-u^{6}r(e^{2}r)-nu^2'ri^2-a^3. From γαστήρ, the belly, ὑπέρ, above measure, and νεῦρον, a nerve. Excessive or morbid activity of the nerves of the stomach. [L, 50, 107.]

GASTRYPERPATHIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tri^2(tru^6)-pu^{6}r-(pe^{2}r)-pa^{2}th(pa^{3}th)-i(e)'a^3. From γαστήρ, the stomach, ὑπέρ, above measure, and πάθος, a disease. Fr., *gastryperpathie.* A severe affection of the stomach. [L, 50, 107.]

GASTRYPONEURIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tri^2(tru^6)-po(po^2)-nu^2'ri^2-a^3. From γαστήρ, the stomach, ὑπό, somewhat, and νεῦρον, a nerve. Defective nervous activity of the stomach. [A, 322.]

GASTRYPOPATHIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tri^2(tru^6)-po(po^2)-pa^{2}th(pa^{2}th)-i(e)′a^3. From γαστήρ, the stomach, ὑπό, somewhat, and πάθος, a disease. Fr., *gastrypopathie.* A slight affection of the stomach. [L, 50, 107.]

GASTRYPORRHAGIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tri^2(tru^6)-po^{2}r-raj(ra^{3}g)′i^2-a^3. From γαστήρ, the stomach, ὑπό, somewhat, and ῥηγνύναι, to break. A slight gastrorrhagia. [L, 50 (*a*, 14).]

GASTRYPORRHŒA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tri^2(tru^6)-po^{2}r-re′(ro^2′e^2)-a^3. From γαστήρ, the stomach, ὑπό, somewhat, and ῥεῖν, to flow. Slight gastrorrhœa. [A, 322.]

GASTRYPOSTENOSIS (Lat.), n. f. Ga^{2}s(ga^{3}s)-tri(tru^6)-po-(po^2)-ste^{2}n-o′si^{2}s. Gen., *-os′eos* (*-os′is*). From γαστήρ, the stomach, ὑπό, somewhat, and στένωσις, a being straightened. Slight constriction of the stomach. [A, 322.]

GASTRYSTEROTOMIA (Lat.), n. f. Ga^{2}s(ga^{3}s)-tri^2(tru^2)-ste^{2}r-o(o^2)-tom(to^{2}m)′i^2-a^3. See LAPARO-HYSTEROTOMY.

GATAHY, n. See GATOBA.

GATA RABIOSA (Sp.), n. Ga^3′ta^3 ra^3-be-o′sa^3. The *Ranunculus sceleratus.* [B, 121 (*a*, 24).]

GATAS-GATAS DE FILIPINAS (Sp.), n. Ga^3-ta^{3}s-ga^3′ta^{3}s da fe-le-pe′na^{3}s. The *Euphorbia maculata.* [B, 121 (*a*, 24).]

GATCHY, n. See GATOBA.

GATEADO, n. The *Astronium fraxinifolium.* [B, 121 (*a*. 24).]

GÂTEAU (Fr.), n. Ga^3-to. 1. A cake. 2. In surgery, a roll of lint spread over a wound. 3. A honey-comb. [L, 180.]—**G. de loup.** The *Boletus luridus.* [B, 121 (*a*, 24).]—**G. fébrile.** See AGUE *cake.* —**G. mercuriel.** Of Bus, a small cake containing 1 centigramme of corrosive sublimate. [L, 49 (*a*, 14).]—**G. placentaire.** The placenta. [A, 45.]

GATEN, n. Gat′e^{2}n. See GADRISE.

GATER, n. Gat′u^{6}r. See GAITER.

GATERA (Sp.), n. Ga^3-ta′ra^3. The *Nepeta cataria.* [B, 121 (*a*, 24).]

GÂTEUX (Fr.), adj. Ga^3-tu^6. 1. Paralytic; having incontinence of urine and fæces. 2. Feeble-minded. [L, 41, 42, 49 (*a*, 14).]

GATHERED, adj. Ga^{2}th^2′u^{6}rd. Affected with suppuration (said of the breast or of any inflamed part).

GATHERING, n. Ga^{2}th^2′u^{6}r-i^{2}n^2. See ABSCESS.

GATIFE (Ar.), n. The *Tagetes patula.* [B, 121 (*a*, 24).]

GATILLO (Sp.), n. Ga^3-tel′yo. The *Capparis linearis.* [B, 121 (*a*, 24).]

GATIP, n. In Java, the *Inocarpus edulis.* [B, 121 (*a*, 24).]

GÂTISME (Fr.), n. Ga^3-tez′m. Incontinence of fæces. [*a*, 18.]

GATOBA, n. The copal of *Hymenæa courbaril.* [B, 121 (*a*, 24).]

GATTA GAMBEER, n. See CATECHU (2d def.).

GATTA-NITTOL, n. In Ceylon, the *Streblus asper.* [B, 121 (*a*, 24).]

GATTARA (It.), n. Ga^{2}t′a^{3}r-a^3. The *Nepeta cataria.* [B, 92 (*a*, 14).]

GATTERIDGE, GATTERIDGE-TREE, n's. Ga^{2}t′u^{6}r-i^{2}j, -tre. See GADRISE.

GATTILIER (Fr.), n. Ga^{3}t-te-le-a. See VITEX.—**G. à bois blanc.** The *Vitex leucoxylon.* [B, 173 (*a*, 24).]—**G. à larges feuilles.** The *Vitex agnus castus*, var. *latifolia.* [B, 173 (*a*, 24).]—**G. à trois feuilles.** The *Vitex trifolia.* [B, 173 (*a*, 24).]—**G. blanc.** The *Vitex incisa*, var. *alba.* [B, 173 (*a*, 24).]—**G. blanchâtre.** The *Vitex agnus castus*, var. *albidus.* [B, 173 (*a*, 24).]—**G. incisé.** The *Vitex incisa.* [B, 173 (*a*, 24).]—**G. penné.** The *Vitex pinnata.* [B, 173 (*a*, 24).]—**G. verticellé.** The *Vitex agnus castus.* [B, 173 (*a*, 24).]

GATTINE (Fr.), n. Ga^{3}t-ten. A disease of silk-worms in which the skin gradually becomes brownish-yellow or reddish, and small black spots appear on the body. [*a*, 34.] Cf. PEBRINE.

GATTOO, n. See FRAMBŒSIA.

GATUÑA (Sp.), n. Ga^3-tun′ya^3. The *Ononis arvensis.* [B, 121 (*a*, 24).]

GATTUNG (Ger.), n. Ga^{3}t′un^2. A genus. [B.]—**G'scharakter, G'skennzeichen.** A generic character. [B, 270.]—**G'sname.** A generic name. [B.]

GAUB, n. In the East Indies, the fruit of *Diospyros glutinosa.* [B, 19, 121, 185 (*a*, 24).]

GAUCHBLUME (Ger.), n. Ga^3′u^{4}ch^2-blum-e^2. See CARDAMINE *pratensis.*

GAUCHER (Fr.), n. Go-sha. A left-handed person.—**G. du cerveau.** Of Broca, a "left-brained" person. [K, 16.] Cf. LINKSHIRNIG.

GAUCHHEIL (Ger.), n. Ga^3′u^{4}ch^2-hil. See ANAGALLIS.—**Ackerg'.** The *Anagallis arvensis.* [B, 180 (*a*, 24).]—**Blaues G.** See ANAGALLIS *cærulea.*—**Gelbes G.** The *Lysimachia nemorum.* [B, 180 (*a*, 24).]

GAUDE (Fr.), n. God. 1. The *Reseda luteola.* 2. Boiled Indian corn. [B, 121, 173 (*a*, 24).]

GAUDEMELLE (Fr.), n. God-me^{2}l. The *Agaricus procerus.* [B, 105.]

GAUDIO (Fr.), n. Go-de-o. The *Digitalis purpurea.* [L, 87 (*a*, 24).]

GAUGE, n. Gaj. An instrument for measuring the volume of a material or the intensity, rapidity, etc., of a process.—**Catheter g.** See FILIÈRE (2d def.).

GAUKLERBLUME (Ger.), n. Ga^3′u^{4}k-le^{2}r-blum-e^2. The genus *Mimulus.* [B, 48 (*a*, 14).]

GAUL, n. Ga^{4}l. The *Myrica gale.* [A, 505 (*a*, 21).]

GAULA-ITAN, n. See under ARENGA *saccharifera.*

GÄULE (Ger.), n. Goil′e^2. The *Rumex pratensis.* [B, 180 (*a*, 24).]

GAULEMELLE (Fr.), n. Gol-me^{2}l. The *Agaricus procerus.* [B, 105.]

GAULTHERIA (Lat.), n. f. Ga^{4}l(ga^3-u^{4}l)-the(tha)′ri^2-a^3. From *Gaultier*, a Canadian botanist. Fr., *gaulthérie.* Ger., *Bergthee, canadischer Thee, G., Gaultherie.* It., Sp., *gaulteria.* 1. A genus of the *Ericaceæ*, tribe *Andromedeæ.* 2. Of the U. S. Ph., the leaves of the *G. procumbens.*—**Folia gaultheriæ.** See *G.* (2d def.). —**G. antipoda.** The New Zealand bilberry. A species having roundish, scattered leaves and shrubby, diffused stem. The berries are edible. [B, 215, 275 (*a*, 35).]—**G. fragrans, G. fragrantissima.** Indian wintergreen; a species growing on the Nilgherry hills in India, and in Japan. It furnishes a variety of oil of g. like that of *G. procumbens*, consisting of almost pure methyl salicylate, and available for the same purposes. It is used as a stimulant, carminative, and antispasmodic. [B, 172 (*a*, 24); E. J. Waring, "Ind. Med. Gaz.," Aug., 1885, p. 260 (*a*, 24).]—**G. hispidula.** A species the roots and stems of which have the flavor of oil of wintergreen. [B, 5 (*a*, 24).] —**G. humilis.** The *G. procumbens.* [B, 215 (*a*, 35).]—**G. Leschenaultii.** See *G. fragrans.*—**G. leucocarpa.** A species found in Japan, furnishing oil of wintergreen and quinic acid. [B, 5 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxi, xxvi (*a*, 14).]—**G'öl** (Ger.). See *Oil of* WINTERGREEN.—**G. ovalifolia.** See *G. fragrans.* —**G. procumbens.** Fr., *gaulthérie couchée* (ou *du Canada*) [Fr. Cod.], *palommier.* Ger., *niedergestreckte Gaultherie.* Wintergreen, partridge-berry, checkerberry; a small, shrubby species with spicy leaves and edible, scarlet berries, found in woods and pastures from Canada to Kentucky. Its leaves in infusion are used as a stimulant (called Canada, or mountain, tea). Its chief use is as a source of oil of wintergreen. The leaves [U. S. Ph.] and the entire plant [Fr. Cod.] are official. [B, 34, 121, 173, 180 (*a*, 24).]—**G. punctata.** See *G. fragrans.* — **G'säure** (Ger.). See GAULTHERIC ACID.—**G. serpyllifolia.** The *Phalerocarpus serpyllifolia.* [B, 214 (*a*, 35).]—**G. shallon.** The *shallon* or *salal* of the northeast coast of America; a small, shrubby plant flourishing in shady pine forests. From the dark, fleshy berries, which are very palatable, the Indians prepare a sort of bread by mashing them together and drying in the sun. [B, 19, 180, 185 (*a*, 24).]—**Herba gaultheriæ.** The herb of the *G. procumbens.* [B, 95.]—**Oil of g.** [U. S. Ph.], **Oleum gaultheriæ** [U. S. Ph.]. Fr., *huile de gaulthérie, essence de wintergreen* [Fr. Cod.]. Ger., *Gaultheriaöl.* See *Oil of* WINTERGREEN.—**Spirit of g., Spiritus gaultheriæ** [U. S. Ph.]. A solution of 3 parts of oil of wintergreen in 97 of alcohol. [B, 81, 95.]

GAULTHERIA PROCUMBENS. [A, 327.]

GAULTHERIC ACID, n. Ga^{4}l-the^{2}r′i^{2}k. Fr., *acide gaulthérique.* Ger., *Gaultheriasäure.* An acid, isomeric with methyl-salicylic acid, contained, according to some, in oil of wintergreen; really methyl salicylate. [B, 5, 48 (*a*, 14).]

GAULTHÉRIE (Fr.), n. Gol-ta-re. See GAULTHERIA.—**G. couchée, G. du Canada** [Fr. Cod.]. The *Gaultheria procumbens.* [B, 173 (*a*, 24).]

GAULTHERILENE, n. Ga^{4}l-the^{2}r′i^{2}l-en. Fr., *gaulthérilène.* Ger., *Gaultherilen.* A constituent, $C_{10}H_{16}$, of oil of wintergreen; a colorless, very mobile liquid, having a peppery odor, and boiling at 160° C. [B, 5, 38, 46, 48, 93, 125 (*a*, 14).]

GAULTHERIN, n. Ga^{4}l-the′ri^{2}n. Fr., *gaulthérine.* Ger., *G.* A resinous substance, slightly bitter, obtained from the bark of *Betula lenta*; treated with an alkali, it yields a volatile oil which, according to Procter, is identical with oil of wintergreen. [B, 5, 38, 48, 93, 125 (*a*, 14).]

GAULTHIERA (Lat.), **GAULTIERA** (Lat.), n's f. Ga^{4}l-(ga^3-u^{4}l)-thi^2-e(a)′ra^3, -ti^2-e(a)′ra^3. See GAULTHERIA.

GAUMEN (Ger.), n. Ga^3′u^{4}m-e^{2}n. The palate. [I, 30 (K).]—**Beweglicher G.** The velum palati. [L. 80.]—**G'bildung.** See URANOPLASTY.—**G'bogen.** See ARCH *of the palate.*—**G'bräune.** Angina of the palate. [L, 80.]—**G'entzündung.** Inflammation of the palate. [*a*, 21.]—**G'flor.** See VELUM *palati.*—**G'flügel.** See *Pterygoid* PROCESS.—**G'gewölbe.** The arch of the palate.—**G'laute.** The palatal letters. [L, 46 (*a*, 21).]—**G'lust.** A tickling of the palate. [L, 46 (*a*, 21).]—**G'reiz.** A tickling of the palate. [L, 46 (*a*, 21).]—**G'segel.** See VELUM *palati.*—**G'spalte.** 1. The palatine cleft of the embryo. 2. See *Cleft* PALATE.—**G'vorhang.**

The soft palate. [L, 80, 735.]—**Harter G., Knöcherner G.** The hard palate. [L, 304.]—**Weicher G.** The soft palate.

GAUN, GAUND, n's. Ga^{4}n, ga^{4}nd. The *Petasites vulgaris.* [A, 505 (*a*, 21).]

GAUROCHANA (Sanscr.), n. A variety of bezoar bovinus used in India as a nervine, digestive, and laxative. [A, 479 (*a*, 17).]

GAUTIERA (Lat.), n. f. Go-ti^{2}′e^{2}r-a^{3}. See GAULTHERIA.

GAUZE, n. Ga^{4}z. From *Gaza*, a town of Syria. Lat., *carbasus.* Fr., *gaze.* Ger., *Gaze.* A light, loose-woven fabric. [L, 41 (*a*, 21).]—**Absorbent g.** G. made absorbent by removing all oily matter and sizing. [*a*, 34.]—**Antiseptic g.** A g. containing antiseptic material and used in surgical dressings. [B.] See *Carbasus* ACIDI CARBOLICI, *Sublimate g.*, *Iodoform g.*—**Benzoated g.** G. impregnated with from 5 to 10 per cent. of compound tincture of benzoin. [*a*, 34.]—**Borated g.** G. impregnated with from 5 to 10 per cent. of its weight of boric acid. [*a*, 34.]—**Carbolic g., Carbolized g.** See *Carbasus* ACIDI CARBOLICI.—**Cyanide-of-zinc-and-mercury g.** Of Lister, a g. containing cyanide of zinc and mercury; less irritating and more aseptic than sublimate g. ["N. Y. Med. Jour.," Dec. 21, 1889 (*a*, 34).]—**Eucalyptus g.** Of Lister, g. muslin impregnated with a molten mixture of 3 parts each of dammar resin and paraffin, and 1 part of eucalyptus oil. ["Proc. of the Am. Pharm. Assoc.," xxx (*a*, 14).]—**G.-tree.** The *Lagetta lintearia.* [B, 275 (*a*, 24).]—**Hydronaphthol g.** G. impregnated with 5 per cent. of hydronaphthol. [*a*, 34.]—**Iodoform g.** G. impregnated with iodoform, either by dusting the latter in its meshes or by being soaked in an ethereal or ethereal-alcoholic solution of iodoform. [B.]—**Salicylic-acid g.** G. impregnated with 5 per cent. of salicylic acid. [*a*, 34.]—**Sublimate g.** Ger., *Sublimatgaze.* A g. containing corrosive sublimate; much used in surgical dressings. [B.]—**Thymol g.** G. impregnated with 5 per cent. of thymol. [*a*, 34.]

GAVA (Sp.), n. Ga^{3}′va^{3}. A place in the province of Barcelona, Spain, where there is a gaseous, earthy, and ferruginous spring containing alkaline sulphates. [A, 319 (*a*, 21); L, 49 (*a*, 14).]

GAVAGE (Fr.), n. Ga^{3}-va^{3}zh. Ger., *Sondenernährung.* A term, said not to be French, but used by French writers, to signify forced feeding, especially the artificial introduction of food into the stomach through a tube passed into it by the œsophagus. [Dujardin-Beaumetz, "Bull. gén. de thérap.," July 15, 1882, p. 1.]

GAVALA, n. An Oriental name for the nuclei of certain cherry-stones imported into Bombay from northern India and Arabia. The entire stones have very fragile shells of a pointed, oval shape; the nuclei have a pale-buff color, a thin skin, and a strong hydrocyanic-acid flavor. ["Proc. of the Am. Pharm. Assoc.," xxx (*a*, 14).]

GAVANZO (Sp.), n. Ga^{3}-va^{3}n′tho. The *Rosa canina.* [B, 127 (*a*, 14).]

GAVA ZAHRAHA (Pers.), n. See GAUROCHANA.

GAVIA [Mex. Ph.] (Sp.), n. Ga^{3}′ve-a^{3}. The *Mimosa laccifera.* [A, 447 (*a*, 21).]

GAVIÃO (Port.), n. Ga^{3}-ve-o^{2}n^{2}′. A place in the province of Alentejo, Portugal, where there is a ferruginous spring. [L, 105 (*a*, 14).]

GAVIRIA (Sp.), n. Ga^{3}-ve′re-a^{3}. A place in the province of Guipuzcoa, Spain, where there is a sulphurous spring. [L, 49, 95 (*a*, 14).]

GAVORRANO (It.), n. Ga^{3}-vo^{2}r-ra^{3}′no. A place in Tuscany, Italy, near which are several gaseous and chalybeate thermal springs. [L, 105.]

GAWPURGEE (Hind., Beng.), n. The *Bixa orellana.* [B, 172 (*a*, 24).]

GAWSE-TREE, n. Ga^{4}z′tre. The *Lagetta lintearia.* [B, 282.]

GAXEN (Ger.), n. Ga^{3}x′e^{2}n. See ANGOPHRASIA.

GAXOHOLZ (Ger.), n. Ga^{3}x′o-holts. A variety of aloes-wood obtained from *Excœcaria agallocha.* [B, 180 (*a*, 24).]

GAYAC [Fr. Cod.] (Fr.), n. Ga-ya^{3}k. See GAIAC and GUAIACUM.—**Bois de g.** [Fr. Cod.]. See GUAIAC *wood.*—**Décoction de g.** See *Decoctum* GUAIACI.—**Décoction de g. composée.** See *Decoctum* GUAIACI *compositum.*—**Esprit de g.** See *Spiritus ligni* GUAIACI.—**Extrait alcoolique de g.** See *Extractum* GUAIACI *alcoholicum.*—**Extrait aqueux de g., Extrait de g.** [Fr. Cod.]. See *Extractum* GUAIACI.—**Faux g.** The *Afzelia bijuga.* [B, 121 (*a*, 24).]—**G. d'Afrique.** The *Schottia speciosa.* [B, 121 173 (*a*, 24).]—**G. de Cayenne, G. de la Guyane.** See DIPTERYX *odorata.*—**G. de Padoue.** See DIOSPYROS *lotus.*—**G. des Allemands.** The *Fraxinus apetala.* [B, 121 (*a*, 24).]—**G. d'Italie.** See DIOSPYROS *lotus.*—**G. du Chili.** The *Guaiacum hygrometricum.* [B, 121 (*a*, 24).]—**G. officinal.** The *Guaiacum officinale.* [B, 173 (*a*, 24).]—**G. saint.** The *Guaiacum sanctum.* [B, 173 (*a*, 24).]—**Hydrolé de g.** See *Decoctum* GUAIACI.—**Poudre de g.** [Fr. Cod.]. Guaiacum-wood in small pieces, dried at a temperature of 40° C., powdered, and passed through a No. 120 silk sieve. [B, 113 (*a*, 14).]—**Poudre de résine de g.** [Fr. Cod.]. Guaiac resin powdered and passed through a No. 100 sieve. [B, 113 (*a*, 14).]—**Résine de g.** [Fr. Cod.]. See GUAIAC *resin.*—**Sirop de g.** [Fr. Cod.]. See *Syrupus* GUAIACI.—**Teinture de g. ammoniacale.** See *Tinctura* GUAIACI *ammoniata.*—**Teinture de g.** [Fr. Cod.]. See *Tinctura ligni* GUAIACI.—**Teinture de résine de g.** [Fr. Cod.]. See *Tinctura* GUAIACI (1st def.).—**Tisane de g.** [Fr. Cod.]. See *Decoctum* GUAIACI.

GAYACAN (Fr.), n. Ga-ya^{3}-ka^{3}n^{2}. A name for various species of *Guaiacum*, and especially the *Guaiacum arboreum.* [B, 121 (*a*, 24).]

GAYACINE (Fr.), n. Gi′a-si^{2}n. See GUAIAC *resin.*

GAYACIQUE (Fr.), adj. Ga-ya′sek. Guaiacic.

GAYACUM (Lat.), n. n. Ga(ga^{3})′ya^{3}-ku^{3}m(ku^{4}m). See GUAIACUM.

GAYAGUSSA, n. In the East, the *Papaver somniferum.* [B, 121 (*a*, 24).]

GAYAL, n. In India, the *Agave vivipara.* [B, 121 (*a*, 24).]

GAYAPIN, n. The *Genista anglica.* [B, 121 (*a*, 24).]

GAY-FEATHER, n. Ga′feth^{2}-u^{5}r. The *Liatris spicata, Liatris scariosa*, and other species of *Liatris.* [B, 34, 121, 275 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxix (*a*, 14).]

GAYLUSSACEA (Lat.), **GAYLUSSACIA** (Lat.), n's f. Ga^{3}-e-lu^{6}s-sa(sa^{3})′se^{2}(ke^{2})-a^{3}, -si^{2}(ki^{2})-a^{3}. From *Gay-Lussac*, a French chemist. Fr., *gaylussacie.* A genus of the *Vacciniaceæ*, tribe *Euvaccinieæ.* The *Gaylussacieæ* of Reichenbach are a subdivision of the *Vaccinieæ.* [B, 121, 178 (*a*, 24).]—**G. dumosa.** Of Torrey and Gray, the dwarf huckleberry. A North American species sometimes used as an astringent, found in swamps and thickets. Its large, black berries are insipid. [B, 34, 275 (*a*, 35).]—**G. frondosa.** Blue tangle, dangle-berry, high blue-berry; a shrub from 3 to 5 feet high, growing in open woods from New England to Louisiana, and bearing large blue, sweet berries, with a glaucous bloom. [B, 34 (*a*, 24).]—**G. resinosa.** Black huckleberry (or whortleberry); a shrub about 2 feet high, growing in woods from Canada to Tennessee, and bearing sweet and edible berries. [B, 34 (*a*, 24).]—**G. ursina.** The bear-huckleberry; a species with insipid fruit, found in North and South Carolina. [B, 2, 15.]

GAYLUSSITE (Fr.), n. Ga^{3}-e-lu^{6}s-set. A double carbonate of calcium and sodium. [A, 301.]

GAYTER-TREE, n. Gat′u^{5}r-tre. The *Euonymus europœus.* [A, 505 (*a*, 21).]

GAYUBA (Sp.), n. Ga^{3}-yu′ba^{3}. The *Arctostaphylos uva ursi.* [B, 121 (*a*, 24).]—**G. del país** [Mex. Ph.]. In Mexico, the *Arctostaphylos pungens* and other species of *Arctostaphylos.* [B, 121 (*a*, 24).]

GAY-VINE, n. Ga′vin. The genus *Pharbitis* (especially the *Pharbitis nil*). [B, 19, 121, 275 (*a*, 24).]

GAZ (Fr.), n. Ga^{3}z. See GAS.—**Chalumeau à g. oxyhydrique.** See *Oxyhydrogen* BLOWPIPE.—**G. ammoniaque.** See AMMONIA.—**G. chloro-azotique.** Nitrosyl dichloride. [B.]—**G. d'éclairage.** See *Illuminating* GAS.—**G. des marais.** See METHANE.—**G. du sang.** See GAS *of the blood.*—**G. étouffant.** See METHANE.—**G. hépatique.** See HYDROGEN *sulphide.*—**G. hilarant.** Nitrous oxide. [L, 87 (*a*, 14).]—**G. huileux.** Ethylene. [B, 3.]—**G. liquide.** A mixture of oil of turpentine and alcohol, also called liquid hydrogen. [L, 77 (*a*, 14).]—**G. phosgène.** Carbonyl chloride. [B, 92 (*a*, 14).]

GAZ, n. In Afghanistan, the *Tamarix gallica.* [J. E. T. Aitchison, "Am. Jour. of Pharm.," Jan., 1887, p. 38.—**G.-alefi.** The best manna; obtained from *Astragalus florulentus* and *Astragalus ascendens.* [B, 18, 121 (*a*, 24).]—**G.-angabin.** Tamarisk honey; a variety of manna obtained from *Tamarix gallica*, var. *mannifera;* sold in cakes in Eastern bazaars. [B, 18, 121 (*a*, 24).]—**G.-khonsari.** See *G.-alefi.*—**G.-shakar.** In Kharan, Persia, a kind of manna obtained from *Tamarix gallica.* [J. E. T. Aitchison, *l. c.*].

GAZABARA (Pers.), n. The *Tamarix orientalis.* [A, 479 (*a*, 21).]

GAZALIBU (Ar.), n. The *Lolium temulentum.* [B, 121 (*a*, 24).]

GAZATI, n. The *Codja jambi.* [B, 121 (*a*, 24).]

GAZE (Fr., Ger.), n. Ga^{3}z, ga^{3}tz′e^{2}. See GAUZE.—**Carbolg'** (Ger.). See *Carbasus* ACIDI CARBOLICI.—**Jodoformg'** (Ger.). See *Iodoform* GAUZE.—**Sublimatg'** (Ger.). See *Sublimate* GAUZE.

GAZELLE, n. Ga-ze^{2}l′. 1. The genus *Antilope.* [*a*, 14.] 2. See ANTILOPE *dorcas.*

GAZELS, n. Gaz′e^{2}lz. 1. The fruit of the *Ribes nigrum.* 2. The *Ribes rubrum.* [A, 505 (*a*, 21).]

GAZÉOL (Fr.), n. Ga^{3}-za-ol. A preparation made by dissolving 1 part of impure naphthaline in 10 parts of impure benzene, and adding 10 parts of acetone, 100 of coal-tar fresh from the condensing tanks, and 1,000 of impure 20-per-cent. aqua ammonia; proposed by Burin-Dubuisson as a substitute for the air of the purifying rooms of gas factories and recommended as an inhalation in whooping-cough. [B, 38, 92, 93 (*a*, 14).]

GAZIFÈRE (Fr.), adj. Ga^{3}z-e-fe^{2}r. See AEROPHOROUS.

GAZIOL, n. The *Eupatorium cannabinum.* [B, 121 (*a*, 24).]

GAZLES, n. Gaz′lz. See GAZELS.

GAZOCHIMIE (Fr.), n. Ga^{3}-zo-she-me. The chemistry of gases. [L, 41.]

GAZOGÈNE (Fr.), adj. Ga^{3}-zo-zhe^{2}n. Giving rise to gas; producing effervescence. [B.]

GAZO-INJECTEUR (Fr.), n. Ga^{3}-zo-a^{2}n^{2}-zhe^{3}k-tu^{5}r. An apparatus for injecting gas into certain cavities of the body for a therapeutic purpose. [L, 40, 87 (*a*, 14).]

GAZOLÈNE (Fr.), n's. Ga^{3}-zo-le^{2}n. See GASOLENE.

GAZOLYTE, n. Ga^{3}z′o-lit. One of the three permanent gaseous elements—oxygen, nitrogen, and hydrogen; of Maigne, a body (*e. g.*, carbon) forming a permanent gaseous combination with the same. [B, 7.]

GAZON (Fr.), n. Ga^{3}-zo^{2}n^{2}. 1. See CÆSPES. 2. The *Poa annua.* [B, 173 (*a*, 24).]—**G. anglais.** The *Lolium perenne.* [B, 121, 173 (*a*, 24).]—**G. d'Angleterre.** The *Saxifraga hypnoides.* [B, 121 (*a*, 24).]—**G. de Mahon.** The *Cheiranthus cheiri.* [B, 121 (*a*, 24).]—**G. de montagne.** The *Statice armeria.* [B, 121, 173 (*a*, 24).]—**G. de Parnasse.** The *Parnassia palustris.* [B, 121 (*a*, 24).]—**G. d'Espagne, G. d'Olympe.** The *Statice armeria.* [B, 121 (*a*, 24).]

—**G. du Parnasse.** The *Parnassia palustris.* [B, 173 (*a*, 24).]—**G. turc.** The *Saxifraga hypnoides.* [B, 19 (*a*, 24).]

GAZOST (Fr.), n. Ga^2-zo. A place in the department of the Hautes-Pyrénées, France, where there are springs containing sulphur and iodobromides. [L, 41, 49, 87 (*a*, 14).]

GBELLY, n. See EGBELL.

GE (Lat.), n. f. Je(ga). Gen., *ges.* Gr., γῆ. γαῖα. See EARTH and TERRA.

GEÄDER (Ger.), n. Ge^2-ad'e^{2}r. The venous system. [A, 521.]

GEÄDERT (Ger.), adj. Ge^2-ad'e^{2}rt. Veined. [A, 521.]

GEADIC, adj. Je-a^{2}d'i^{2}k. See GÆIDIC.

GEAN, n. Je'a^{2}n. In England, the wild cherry (*Prunus avium*). [B, 19, 121 (*a*, 24).]

GÉANT (Fr.), adj. and n. Zha-a^{3}n^2. See GIANT.

GEASTER (Lat.), n. m. Je(ga)-a^{2}s(a^{3}s)'tu^{6}r(tar). Gen., *-ast'eros* (*-is*). From γῆ, the earth, and ἀστήρ, a star. Fr., *géastre.* Ger., *Erdstern.* Earth- (or man-) star; a genus of the *Lycoperdaceæ*, having an outer coat distinct from the inner, which contains the spores and splitting into a star-shape at maturity. The *Geastrei*

GEASTER HYGROMETRICUS. [A, 327.]

of Léveillé are a tribe of the *Lycoperdaceæ.* The *Geastrideæ* of Corda are a family of the *Dermatogasteres.* The *Geastridei* of Rabenhorst are a division of the *Lycoperdei;* and the *Geastridei* of Bonorden are a family of the *Trichogastres.* [B, 19, 121, 170 (*a*, 24).]—**G. hygrometricus.** Fr., *géastre hygrométrique, étoile-de-terre.* A species used in medicine by the Chinese. [B, 61.]

GEASTRUM (Lat.), n. n. Je(ga)-a^{2}s(a^{3}s)'tru^{3}m(tru^{4}m). See GEASTER.—**G. anglicum.** Fr., *géastre d'Angleterre.* A variety of the *Geaster hygrometricus.* [B, 173 (*a*, 24).]—**G. hygrometricum.** See GEASTER *hygrometricus.*—**G. quadrifidum.** Ger., *vierspaltiger Hüllenstreuling, Erdstern.* The *Lycoperdon coronatum.* [B, 173, 180 (*a*, 24).]

GÉATE (Fr.), n. Zha-a^{3}t. See HUMATE.

GEÄUGELT (Ger.), adj. In botany, ocellated. [B, 123 (*a*, 35).]

GEBÄLKE (Ger.), n. Ge^2-balk'e^2. A stroma. [A, 521.]

GEBALLT (Ger.), adj. Ge^2-ba^{3}lt'. See CONGLOBATE.

GEBÄNDERT (Ger.), adj. Ge^2-band'ert. See FASCIATE.

GEBANG (Malay), n. The *Corypha gebanga.* [B, 121 (*a*, 24).]

GÉBANGAN, n. A place in the Dutch East Indies where there is a saline spring. [A, 385.]

GEBÄRACHSE (Ger.), n. Ge^2-bar'a^{3}ch^{2}s-e^2. The axis of the parturient canal. [A, 521.]

GEBÄRAKT (Ger.), n. Ge^2-bar'a^{2}kt. The act of parturition.

GEBÄRANSTALT (Ger.), **GEBÄRASYL** (Ger.), n's. Ge^2-bar'a^{2}n-sta^{3}lt, -a^3-su^{6}l. A lying-in institution.

GEBÄREN (Ger.), n. Ge^2-bar'e^{2}n. See PARTURITION.

GEBÄRENDE (Ger.), **GEBÄRERIN** (Ger.), n's. Ge^2-bar'e^{2}nd-e^2, -e^{2}r-en. A woman in labor.

GEBÄRFÄHIG (Ger.), adj. Ge^2-bar'fa-hi^{2}g. Capable of parturition. [A, 521.]—**G'keit.** Capable of parturition. [A, 521.]

GEBÄRHAUS (Ger.), n. Ge^2-bar'ha^3-u^{4}s. A lying-in asylum.

GEBÄRMUTTER (Ger.), n. Ge^2-bar'mut-te^{2}r. See UTERUS.—**Doppelte G.** See *Double* UTERUS.—**Einhörnige G.** See UTERUS *unicornis.*—**G'abweichung.** A version or flexion of the uterus. [L, 46 (*a*, 21).]—**G'anschoppung.** Chronic metritis. [A, 521.]—**G'ausrottung.** See HYSTERECTOMY.—**G'bauchentzündung.** See METROPERITONITIS (2d def.).—**G'baum.** See ARBOR VITÆ *uterina.*—**G'beugung.** Flexion of the uterus. [A, 521.]—**G'blasenbruch.** Hystero-cystocele. [L, 43.]—**G'blutfluss, G'blutung.** Uterine hæmorrhage. [L, 43.]—**G'bruch.** See HYSTEROCELE.—**G'dislocation.** Displacement of the uterus. [L, 135.]—**G'durchlöcherung.** Perforation of the uterus. [A, 521.]—**G'ei.** A fecundated ovum contained in the uterus.—**G'eihaut.** See DECIDUA.—**G'einstülpung.** Inversion of the uterus. [A, 521.]—**G'eiterung.** Suppuration of the uterus. [A, 521.]—**G'eklampsie.** See *Uterine* ECLAMPSIA.—**G'entzündung.** See METRITIS.—**G'erhebung.** Elevation of the uterus. [A, 521.]—**G'erschlaffung.** Atony of the uterus. [A, 521.]—**G'erweichung.** Softening of the uterus. [L, 80.]—**G'erweiterung.** Distension or dilatation of the uterus. [A, 521.]—**G'exstirpation.** See HYSTERECTOMY.—**G'fellentzündung.** See METROPERITONITIS (1st def.).—**G'fluss.** See METRORRHŒA.—**G'grund.** The fundus uteri.—**G'hals.** See CERVIX *uteri.*—**G'halter.** See HYSTEROPHORE and PESSARY.—**G'höhle.** See *Uterine* CAVITY.—**G'hörner.** See CORNUA *of the uterus.*—**G'hülle.** See PERIMETRIUM.—**G'knickung.** A flexion of the uterus. [A, 521.]—**G'körper.** See CORPUS *uteri.*—**G'lähmung.** Paralysis of the uterus. [L, 80.]—**G'mund, G'mündung.** See OS *uteri.*—**G'mundverschliess.** Occlusion of the os uteri. [A, 521.]—**G'neigung.** A version of the uterus. [A, 521.]—**G'neuralgie.** See HYSTERALGIA.—**G'riss.** Rupture of the uterus. [L, 80.]—**G'rückwärtsbeugung, G'rückwärtsbiegung, G'rückwärtsumbeugung.** See RETROVERSION *of the uterus* and RETROFLEXION *of the uterus.*—**G'scheidentheil.** The vaginal portion of the cervix uteri.—**G'schiefheit, G'schieflage.** See OBLIQUITY *of the uterus.*—**G'schmerz.** See HYSTERALGIA.—**G'schnitt.** See HYSTEROTOMY.—**G'schwamm.** A fungous growth of the uterus. [L, 43.]—**G'senkung.** See DESCENSUS *uteri.*—**G'stich.** Puncture of the uterus. [A, 521.]—**G'theil.** The pars uterina placentæ. [L, 80.]—**G'tiefstand.** See DESCENSUS *uteri.*—**G'träger.** See HYSTEROPHORE.—**G'umbeugung.** Flexion or version of the uterus. [A, 521.]—**G'umkehrung, G'umstülpung.** See INVERSION *of the uterus.*—**G'verschliessung.** Occlusion of the uterus.—**G'vollblutigkeit.** Congestion of the uterus. [L, 43.]—**G'vorfall.** See PROLAPSE *of the uterus.*—**G'vorwärtsbeugung, G'vorwärtsbiegung.** Anteversion or anteflexion of the uterus.—**G'wand, G'wandung.** The wall of the uterus.—**G'wassersucht.** See HYDROMETRA.—**G'windsucht.** See PHYSOMETRA.—**G'wurzel.** The root of *Aristolochia rotunda.* [B, 180 (*a*, 24).]—**G'zerreissung.** Rupture of the uterus. [L, 46 (*a*, 21).]—**Zweihörnige G.** See UTERUS *bicornis.*

GEBÄRORGAN (Ger.), n. Ge^2-bar'or-ga^{3}n. See UTERUS.

GEBÄRSTUHL (Ger.), n. Ge^2-bar'stul. An obstetrical chair. [L, 46 (*a*, 21).]

GEBARTET (Ger.), adj. Ge^2-ba^{3}rt'e^{2}t. Barbate. [B, 123 (*a*, 35).]

GEBÄRUNFÄHIG (Ger.), adj. Ge^2-bar'un-fa-hi^{2}g. Incapable of parturition.

GEBÄRUNG (Ger.), n. Ge^2-bar'un^2. See PARTURITION.

GEBÄRUNMÖGLICHKEIT (Ger.), n. Ge^2-bar'un-mu^{5}g-li^{2}ch^2-kit. Incapability for parturition. [B.]

GEBÄRZEIT (Ger.), n. Ge^2-bar'tsit. The time of delivery. [L, 46 (*a*, 21).]

GEBEIN (Ger.), n. Ge^2-bin'. See BONE.

GEBELL (Ger.), n. Ge^2-be^{2}l'. See ABOIEMENT.

GEBERDE (Ger.), **GEBERDUNG** (Ger.), n's. Ge^2-be^{2}rd'e^2, -un^2. Gesticulation. [L, 80.]

GEBIET (Ger.), n. Ge^2-bet'. A district, territory, region. [L, 46 (*a*, 21).]

GEBILDE (Ger.), n. Ge^2-bi^{2}ld'e^2. A form, structure, image. [L, 46 (*a*, 21).]—**Achseng'.** An axial formation, such as the bundle of nerve-fibres in the eye of the leech. [G.]—**Afterg'.** A secondary formation, such as an epithelioma. ["Arch. Anat. Phys.," 1882, p. 186 (J).]—**Anhangsg'.** See EPIPHYSIS and HYPOPHYSIS.—**Elementarg'.** See *Anatomical* ELEMENTS.

GEBINDE (Ger.), n. Ge^2-bi^{2}nd'e^2. A bandage. [A, 523.]

GEBIRGSWEIDE (Ger.), n. Ge^2-bergz'vi-de. The *Salix arenaria.* [B, 131.]

GEBISS (Ger.), n. Ge^3-bi^{2}s'. A set of teeth, natural or artificial.—**Bleibendes G.** See *Second* DENTITION.—**Greiseng'.** Lat., *mordex senilis.* The absence of the upper and lower incisors and canines, while all or a part of the molars remain. [L, 30 (*a*, 14).]—**Milchg'.** See *First* DENTITION.

GEBLÄSE (Ger.), n. Ge^2-blaz'e^2. A bellows. [B.]—**G'lampe.** A lamp in which the flame is acted upon by a current of air, as in a Bunsen burner, etc. [B, 270.]

GEBLÄTTERT (Ger.), adj. Ge^2-blat'te^{2}rt. Foliate.

GEBLEICHT (Ger.), n. Ge^2-blich^{2}t'. See ETIOLATED.

GEBLÜT (Ger.), n. Ge^2-blu^{6}t'. The entire volume of blood in the body. [*a*, 14.]—**Monatliches G.** Menstruation. [L, 80.]—**Wildes G.** Of the veterinarians, ataxo-adynamic fever. [L, 80.]

GEBLUTE (Ger.), n. Ge^2-blut'e^2. Repeated or constant bleeding. [B, 131.]

GEBLÜTHTHEE (Ger.), n. Ge^2-blu^{6}t'ta. See *Species* LIGNORUM.

GEBOGEN (Ger.), adj. Ge^2-bog'e^{2}n. See ARCUATE.—**Einwärts g.** See INFLEXED.—**Gegeneinanderg'.** See CONNIVENS (1st def.).—**Rückwärts g.** See REFLEXED.

GEBORENWERDEN (Ger.), n. Ge^2-bor'e^{2}n-ve^{2}rd-e^{2}n. See BIRTH.

GEBORSTEN (Ger.), adj. Ge^2-borst'e^{2}n. Dehiscent at the apex. [L, 80.]

GEBRANNT (Ger.), adj. Ge^2-bra^{3}nt'. Calcined, burnt. [B, 131.]

GEBRAUCH (Ger.), n. Ge^2-bra^3'u^{4}ch^2. Use, employment. [L, 46 (*a*, 21).]—**G'sanweisung, G'svorschrift, G'szettel.** A direction or label for the use of a medicament. [L, 46 (*a*, 21).]

GEBRÄUSE (Ger.), n. Ge^2-broiz'e^2. See TINNITUS.

GEBRECHE (Ger.), n. Ge^2-bre^{2}ch^2'e^2. Constant or repeated vomiting. [B, 131.]

GEBRECHEN (Ger.), n. Ge^2-bre^{2}ch^2'e^{2}n. A fault, defect, blemish. [L, 46 (*a*, 21).]

GEBRECHLICH (Ger.), adj. Ge^2-bre^{2}ch^2'li^{2}ch^2. Having some bodily defect. [L, 46 (*a*, 21).]—**G'keit.** Infirmity, defect, frailty. [L, 46 (*a*, 21).]

GEBROMT (Ger.), adj. Ge^2-bromt'. Treated or combined with bromine; bromated. [B.]

GEBUCKELT (Ger.), adj. Ge^2-buk'e^{2}lt. In botany, umbonate. [B, 123 (*a*, 35).]

GEBURT (Ger.), n. Ge^2-burt'. 1. Birth, labor, parturition. According to von Scanzoni, the word, when unqualified, should be

restricted to cases in which the process is accomplished by the unaided efforts of nature, the term *Entbindung* being applied to those in which artificial assistance is given. [A, 20.] See *Natural* LABOR. 2. The expulsion of any solid substance, such as a tumor, from the uterus.—**Achselg'.** See *Shoulder* PRESENTATION.—**Achtmonatliche G.** An eignth-month delivery. [L, 80 (*a*, 21).]—**Afterg'.** See Afterbiath.—**Agrippinische G.** See Partus *agrippinus*.—**Drillingsg'.** The birth of triplets. [*a*, 18.]—**Eheliche G'en.** Legitimate births. [L, 57 (*a*, 21).]—**Fehlerhafte G.** See *Difficult* LABOR.—**Fehlg'.** See Abortion.—**Frühg', Frühzeitige G.** Premature labor.—**G. mit dem Steisse.** See *Breech* LABOR.—**G. mit den Füssen.** See *Footling* LABOR.—**G'sachse.** The axis of the parturient canal.—**G'sact, G'sarbeit.** See *G.*—**G'sbefördernd.** See Oxytocic.—**G'sdauer.** The duration of labor. [A, 521.]—**G'seintritt.** The beginning of labor.—**G'sfehler.** A congenital defect. [A, 521.]—**G'sgeile.** The testicle. [L, 80.]—**G'sgeile der Weiber.** The ovary. [L. 80.]—**G'sgeschäft.** See Obstetrics.—**G'sgeschwulst.** See Caput *succedanum*.—**G'shandlung.** See *G.*—**G'shäutchen, G'shäutlein.** The fœtal envelopes.—**G'shelfer.** See Obstetrician.—**G's helferin.** A female obstetrician. [*a*, 21.]—**G'shergang.** See *G.*—**G'shilfe.** See Obstetrics.—**G'shilflich.** Obstetrical.—**G'shinderniss.** An impediment to delivery.—**G'shülfe, G'shülfekunst, G'shülfelehre.** See Obstetrics.—**G'shülflich.** Obstetrical. [*a*, 21.]—**G'skunde.** See Obstetrics.—**G'slage.** See Presentation.—**G'slehre.** See Obstetrics.—**G'smaal, G'smal.** See Nævus.—**G'smechanismus.** The mechanism of labor.—**G'snoth.** See *G.*—**G'sorgane.** The material parts concerned in the act of parturition.—**G'spause.** The interval between two successive labors. [L. Kleinwachter, "Ztschr. f. Geburtsh. u. Gynäk.," xi, 1.]—**G'sperioden.** The stages of labor. [L, 135.]—**G'sreinigung.** The lochia. [L, 80.]—**G'schmerzen.** See *Labor* PAINS.—**G'störung.** 1. Any deviation from the normal course of parturition. 2. See Dystocia.—**G'sstuhl.** An obstetrical chair. [A, 521.]—**G'stheile.** See *G'sorgane.*—**G'svorgang.** A step in the process of parturition.—**G'swasser.** See *Liquor* AMNII.—**G'sweg.** See *Parturient* CANAL.—**G'swehen.** Labor pains, especially those of the expulsive stage.—**G'szange.** See *Obstetrical* FORCEPS.—**G'szeit.** The time of parturition. [L, 80.]—**Gedoppelte G.** See *Twin* LABOR.—**Gerichtliche G'hülfe.** Obstetrics in its medico-legal relations.—**Gesichtsg'.** See *Face* DELIVERY and *Face* PRESENTATION.—**Gesundheitsgemässe G., Gewöhnliche G., Glückliche G.** See Eutocia and *Natural* LABOR.—**Hinterhauptsg'.** See *Occipital* PRESENTATION.—**Kopfg'.** See *Head* DELIVERY.—**Künstlich beendete G.** Labor accomplished by decided operative interference. [A, 20.] Cf. *Künstlich geregelte G.*—**Künstliche Frühg'.** See *Induced premature* LABOR.—**Künstlich geregelte G.** Parturition with artificial assistance, but only to the degree of aiding the natural forces. [A, 20.] Cf. *Künstlich beendete G.*—**Langsame G.** See *Protracted* LABOR.—**Mehrfache G.** See *Plural* BIRTH.—**Moleng'.** The birth of a mole.—**Nachg'.** See Afterbirth.—**Naturgemässe G., Natürliche G., Normale G.** See *Natural* LABOR.—**Plastische G'svorgang.** Of Küneke, the molding undergone by the fœtal head during labor. [A, 91.]—**Präcipitirte G.** See *Precipitate* LABOR.—**Rechtzeitige G.** Labor at full term.—**Regelmässige G.** See *Natural* LABOR.—**Reife G.** Labor at full term.—**Schädelg.** See *Vertex* DELIVERY.—**Schnelle G.** See *Precipitate* LABOR.—**Schwere G.** See Dystocia.—**Siebenmonatliche G.** A seven months' delivery.—**Spätg'.** See Partus *serotinus*.—**Steissg'.** See *Breech* DELIVERY.—**Stirng'.** Labor with brow presentation (*q. v.*). [A, 319 (*a*, 21).]—**Trockene G.** See *Dry* LABOR.—**Ueberzeitige G.** See Partus *serotinus*.—**Uneheliche G'en.** Illegitimate births. [L, 57 (*a*, 21).]—**Unregelmässige G.** Abnormal labor. [L, 80.]—**Unreife G.** See *Premature* LABOR.—**Unvollendete G.** See Partus *imperfectus*.—**Unzeitige G.** Labor coming on somewhat in advance of term, but not early enough to seriously imperil the survival of the child. Cf. *Frühzeitige G.*—**Verheimlichte G.** A concealed delivery. [L, 80.]—**Verspätete G.** See Partus *serotinus*.—**Verstellte G.** See *False* LABOR.—**Vierlingsg'.** The birth of quadruplets.—**Vollendete G., Vollkommene G.** See Partus *perfectus*.—**Vorgeschützte G.** See *False* LABOR.—**Vorzeitige G.** See *Premature* LABOR.—**Widernatürliche G.** See *Preternatural* LABOR.—**Zeitige G.** Labor at full term.—**Zwillingsg'.** See *Twin* LABOR.

GEBÜSCHELT (Ger.), adj. Ge^2-bu^{6}sh'e^{2}lt. Fasciculate. [B, 131.]

GEBÜSCHIG (Ger.), adj. Ge^2-bu^{6}sh'i^{2}g. See Dumetose.

GECARCINUS (Lat.), n. f. Je(ge^2)-ka^{3}r'si^{2}n(ki^{2}n)-u^{3}s(u^{4}s). From γῆ, the earth, and καρκίνος, a crab. Fr., *gécarcin*. Of Leach, a genus of the family *Gecarcinii*, having a heart-shaped shell, deeply truncate on the posterior side, the exterior maxillipeds separated from each other, and the second pair of feet shorter than the following. It is found in South America. [F. G. Levrault (*a*, 21).]—**G. ruricola, G. tourlourou.** See Cancer *ruricola*.

GECHLORT (Ger.), adj. Ge^2-ch^{2}lort'. Combined or treated with chlorine; chlorated. [B.]

GECKELKRAUT (Ger.), n. Ge^{2}k'e^{2}l-kra^3-ut. The *Euonymus europæus*. [B, 131.]

GEDÄCHTNISS (Ger.), n. Ge^2-dacht'ni^{2}s. Memory. [L, 43, 80.]—**G'bein.** The occipital bone. [L, 46 (*a*, 21).]—**G'kraft.** The retentive power of memory. [L, 46 (*a*, 21).]—**G'kunst.** The art of memory, mnemonics. [L, 46 (*a*, 21).]—**G'losigkeit.** See Amnesia.—**G'mangel, G'schwäche.** Weakness of memory. [L, 46 (*a*, 21).]—**G'stärkend.** Anamnestic (2d def.). [L, 46 (*a*, 21).]—**G'übungen.** Exercises for strengthening the memory. [L, 46 (*a*, 21).]—**G'verlust.** Loss of memory.

GEDANITE [Helm], n. Je^{2}d'a^{2}n-it. A fossil resin, containing 81·01 per cent. of carbon. 11·41 of hydrogen, 7·33 of oxygen, and 0·25 of of sulphur, formerly known as unripe amber. It does not contain succinic acid, and, when heated in oil, it swells up and becomes like caoutchouc. Ether dissolves from 40 to 52, and alcohol from 18 to 12 per cent. The portion soluble in alcohol softens at 100° C. and melts at 105° C., then resembling mastic. It is electro-negative. ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).]

GEDANKE (Ger.), n. Ge^2-da^{3}n^{2}k'e^2. Thought. [L, 80.]—**G'nbein.** The parietal bone. [L, 46 (*a*. 21).]

GEDÄRM (Ger.), n. Ge^2-darm'. The intestines. [L, 304.]—**Dickes G.** The large intestine. [*a*, 21.]—**Dünnes G.** The small intestine. [*a*, 21.]—**G'saft.** See *Intestinal* JUICE.—**G'seuche.** Epizootic dysentery. [L, 80.]—**G'verschlingung.** A coil of intestine. [*a*, 21.]—**G'vorfall.** Prolapse of the bowel. [E.]

GEDDA (Ar.), n. See G. GUM.

GEDOPPELT (Ger.), adj. Ge^2-dop'pe^{2}lt. Double. [L, 43.]

GEDRÄNGT (Ger.), adj. Ge^2-dran^{2}t. See Compact.

GEDREHT (Ger.), adj. Ge^2-drat'. See Contorted.

GEDREIET, GEDREIT (Ger.), adj's. Ge^2-dri'e^{2}t, drit'. See Ternate.

GEDULDAMPFER (Ger.), n. Ge^2-duld'a^{3}mp-fe^{2}r. The *Rumex patientia*. [B, 131.]

GEDULDKRAUT (Ger.), n. Ge^2-duld'kra^3-u^{4}t. The *Rumex alpinus*. [B, 180 (*a*, 24).]

GEDUNSEN (Ger.), adj. Ge^2-duns'e^{2}n. Turgid, bloated. [A, 521.]—**Bleiche G'heit.** See Phelgmasia *alba dolens*.—**G'heit.** Turgidity.

GEELGILGEN (Ger.), n. Gal'gi^{2}l-ge^{2}n. The *Iris pseudo-acorus*. [B, 180 (*a*, 24).]

GEENO, n. In Bombay, a medicinal root furnished by a species of plant called by the Portuguese of Goa *ratanha*, to which it bears considerable resemblance. It is astringent, and is used in diarrhœa and chronic dysentery. ["Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]

GEESE-AND-GOSLINGS, n. Ges-a^{2}nd-go^{2}z'li^{2}n^{2}z. The blossoms of the *Salix* (probably of various species). [A, 505 (*a*, 21).]

GEFALTET (Ger.), adj. Ge^2-fa^{3}lt'e^{2}t. See Plicate.—**Einfach G.** See Plicatus *simplex*.—**Vielfach G.** See Plicatus *multiplex*. [*a*, 21.]

GEFALZT (Ger.), adj. Ge^2-fa^{3}ltzt'. See Carinate.

GEFÄNGNISSFIEBER (Ger.), n. Ge^2-fe^{2}n^2'ni^{2}s-fe-ber. See *Jail*-FEVER.

GEFÄRBT (Ger.), adj. Ge^2-farbt'. Stained. [L, 31.]

GEFÄSS (Ger.), n. Ge^2-fas'. A vessel.—**Abdämpfungsg'.** An evaporating vessel.—**Ableitende G'e.** Deferent vessels.—**Absondernde G'e.** Secretory vessels. [L, 80.]—**Absorbirendes G.** See Absorbent (2d def.).—**Aeussere G'haut.** See Tunica *adventitia*.—**Arterielles G.** An artery. [L, 115.]—**Ausdampfende G'e, Ausdünstende G'e.** Exhalant vessels. [L, 43.]—**Ausführende G'e.** Excretory vessels or ducts. [L, 43, 80.]—**Aushauchende G'e.** Exhalant vessels. [L, 135.]—**Blutführendes G., Blutg'.** See Blood-vessel.—**Büschelförmige G'e.** See Vasa *vorticosa*.—**Chylöse G'e, Chylusführende G'e, Chylusg'e.** See *Chyliferous* VESSELS.—**Einsaugende G'e.** See *Absorbent* VESSELS.—**Ernährende G'e.** Nutrient vessels.—**Exhalirende G'e.** Exhalant vessels. [L, 80.]—**Falsches G.** See Pseudangeium.—**Galleng'e.** See *Bile*-DUCTS.—**G'anfüllung.** Vascular repletion.—**G'anlage.** A rudimentary vascular formation. [A, 523.]—**G'ast.** A branch of a vessel. [L, 80.]—**G'ausbildung.** The formation of vessels. [L, 80.]—**G'ausbreitung.** A distribution of vessels. [A, 521.]—**G'ausdehnung.** See Angeiectasia.—**G'bahn.** A vascular channel. [A, 521.]—**G'balken.** A vascular trabecula. [A, 521.]—**G'barometer.** See *Cistern* BAROMETER.—**G'baum.** See *Vascular* TREE and *Purkinje's* (*cross-cobweb*) FIGURE.—**G'beschreibung.** See Angeiology.—**G'bezirk.** A vascular area. [A, 521.]—**G'bildung.** The formation of vessels. [A, 521.]—**G'blatt.** A vascular layer (*e. g.*, of the blastoderm). [A, 8.]—**G'bogen.** A vascular arch.—**G'bündel.** See *Vascular* BUNDLE.—**G'büschel.** See *Vascular* TUFT.—**G'canal.** A canal transmitting a blood-vessel. [D, 31.]—**G'canälchen.** See *Haversian* CANALS.—**G'centren.** See *Vaso-motor* CENTRES.—**G'chen.** See the major list.—**G'cryptogamen.** See *Vascular* CRYPTOGAMS.—**G'dehnung.** See Angeiotasis.—**G'dislokation.** See Angeiectopia.—**G'druck.** Pressure on a vessel. [A. 521.]—**G'drüsen.** See Glandulæ *vasculares* (1st def.).—**G'durchschlingung.** See Angeioploce.—**G'eindrücke.** Depressions for blood-vessels (*e. g.*, on the inner surface of the skull). [L, 31.]—**G'einmündung.** See Inosculation.—**G'endenausdehnung, G'endenerweiterung.** See Teleangeiectasis.—**G'entwickelung.** See *G'bildung.*—**G'entzündung.** See Angeiitis.—**G'erkrankung.** The development of disease of the blood-vessels. [L, 57.]—**G'erweichung.** See Angeiomalacia.—**G'erweiternd.** See Vaso-dilator.—**G'erweiterung.** See Angeiochalasis and Angeiectasia.—**G'förmig.** See Angeiodes.—**G'führend.** Containing or transmitting vessels.—**G'gift.** See *Vascular* POISON.—**G'haltig.** Vascular. [D, 31.]—**G'haut.** See the major list.—**G'hof.** See *Vascular* AREA.—**G'ig.** Vascular. [L, 46 (*a*, 21).]—**G'igkeit.** Vascularity. [L, 46 (*a*, 21).]—**G'knauel.** A glomerulus. [L.]—**G'knoten.** Ligation of a vessel. [A, 521.]—**G'krampf.** See Angeiospasm.—**G'krankheit.** See Angeionosus.—**G'kranz, G'kreis.** A vascular circle.—**G'lähmung.** See Angeioparalysis.—**G'leere, G'leerheit.** Emptiness of the vessels. [A, 521.]—**G'lehre.** See Angeiology.—**G'leiden.** See Angeionosus.—**G'lein.** A little vessel. [L, 80.]—**G'lumen.** The lumen of a vessel.—**G'maul, G'mal.** See Nævus *vascularis*.—**G'mündung.** 1. See Inosculation. 2. The osculum of a sponge. [L.]—**G'nerv.** A vascular (especially a vaso-motor) nerve. [B, 131.]—**G'nervencentrum.** See *Vascular* CENTRES.—**G'netz.** See Rete *vasculosum*.—**G'neubildung.** A formation of new vessels. [A, 521.]—**G'öffnung.** 1. A vascular aperture. [A, 521.] 2. The operation of opening a vessel.—**G'pflanzen.** Vascular plants; the *Vasculares*. [B, 131.]—**G'provinz.** See *Vascular* AREA.—**G'reibung.**

See ANGEIOTHLIPSIS.—**G'reich.** Highly vascular. [D, 31.]—**G'reichthum.** Vascularity.—**G'reiser.** The small branches of a vessel. [L, 80.]—**G'schall.** See *Gefäss*GERAUSCH.—**G'scheide.** The sheath of a vessel. [L.]—**G'schicht.** A vascular layer; of Pander, the mesoblast. [A, 8.]—**G'schwamm.** See TELEANGEIECTASIS.—**G'spannung.** See ANGEIOTASIS.—**G'stamm.** An arterial trunk. [L, 31.]—**G'strang.** A vascular cord. [A, 521.]—**G'system.** See *Vascular* SYSTEM.—**G'thätigkeit.** Vascular action. [A, 521.]—**G'tonus.** Vascular tonicity. [A, 521.]—**G'tragend.** See ANGEIOPHOROUS.—**G'überfüllung.** See ANGEIOPLEROSIS.—**G'umdrehung.** See ANGEIOSTROPHE.—**G'unterbindung.** Ligation of a blood-vessel.—**G'veränderung.** A morbid change of the blood-vessels. [A, 521.]—**G'verästelung.** The branching of a vessel.—**G'verbindung.** See ANASTOMOSIS.—**G'verbreitung.** A distribution of vessels. [A, 523.]—**G'verengernd.** See ANGEIOSTENOTIC.—**G'verengerung.** See ANGEIOSTENOSIS.—**G'verknöcherung.** Ossification of vessels. [A, 521.]—**G'verlauf.** The course of a vessel.—**G'verschliessung.** Occlusion of a vessel. [A, 521.]—**G'verschlingung.** Ligation of a vessel.—**G'verschwärung.** See ANGEIELCUS.—**G'verstopfung.** Obstruction of a vessel. [L, 43.]—**G'verwachsung.** See ANGEIOSYMPHYSIS.—**G'verzweigung.** See *G'verästelung.*—**G'vorhang.** See the major list.—**G'wand, G'wandung.** The wall of a vessel. [A, 521.]—**G'wucherung.** Vascular proliferation. [A, 521.]—**G'zergliederer.** See ANGEIOTOMIST.—**G'zergliederung.** See ANGEIOTOMY.—**G'zerreissung.** See ANGEIORRHEXIS.—**G'zirkel.** The vascular system. [K.]—**G'zweig.** A vascular twig. [A, 521.]—**Gekrösg'.** A mesenteric vessel. [A, 521.]—**Gekrümmte straffe G'e.** See VASA *capreolaria.*—**Grenzg'.** See SINUS *terminalis.*—**Haarg'.** See CAPILLARY (3d def.).—**Haller'scher G'kranz.** See CIRCULUS *arteriosus Halleri.*—**Harng'e.** In insects, vessels which excrete urine. [α, 29.]—**Innere G'haut.** See TUNICA *interna.*—**Kapillarg'.** See CAPILLARY (3d def.).—**Kiemeng'e.** Openings on each side of the heart in the *Arthropoda.* [α, 29.]—**Lymphatische G'e, Lymphg'e.** See *Lymphatic* VESSELS.—**Milzg'.** A splenic vessel. [α, 29.]—**Nährendes G.** See *Nutrient* VESSEL.—**Ringförmige G'e, Ringg'e.** See VASA *annularia.*—**Saftg'e.** Vessels that convey juices. [α, 29.]—**Sameng'e.** See VASA *capreolaria.*—**Seröse G'e.** See *Serous* CANALICULI.—**Stammg'.** A vascular trunk.—**Sublimirg'.** See ALUDEL.—**Verwickelte G'e.** See VASA *capreolaria.*—**Zuführendes G.** An afferent vessel.—**Zurückführendes G. des Hodens.** See VAS *deferens.*

GEFÄSSCHEN (Ger.), n. Ge^2-fas'ch^{2}e^{2}n. A small vessel. [L, 80.]—**Urinführende G.** See *Uriniferous* TUBULES.

GEFÄSSHAUT (Ger.), n. Ge^2-fas'ha^3-u^{4}t. 1. A coat of a vessel. [A, 523.] 2. A vascular layer or membrane; *e. g.*, the chorioid of the eye. [A, 521; L, 332.] 3. See PIA.—**Aeussere G.** See ADVENTITIA.—**G. des Auges.** See CHORIOID.—**G. des Hirns, G'überzug.** See PIA.—**Innere G.** See INTIMA.—**Mittlere G.** The tunica media of a blood-vessel. [L.]

GEFÄSSHÄUTCHEN (Ger.), n. Ge^2-fas'hoit-ch^{2}e^{2}n. See CHORION.—**G. des Eies.** See *False* CHORION.—**Schwammiges G.** See DECIDUA.

GEFÄSSVORHANG (Ger.), n. Ge^2-fas'for-ha^{3}n^2. See TELA *chorioidea.*—**Oberer G.** See TELA *chorioidea superior.*—**Unterer G.** See TELA *chorioidea inferior.*

GEFELDERT (Ger.), adj. Ge^2-fe^{2}ld'e^{2}rt. See AREOLATE.

GEFENSTERT (Ger.), adj. Ge^2-fe^{2}nst'e^{2}rt. See FENESTRATED.

GEFIEDERT (Ger.), adj. Ge^2-fed'e^{2}rt. See PINNATE.—**Abwechselnd-g.** Alternately pinnate. [B.]—**Dreifach g.** Triply pinnate. [B.]—**Gefingert-g.** See DIGITIPINNATE.—**Gegenständig-g, Gegenüberstehend-g.** Opposito-pinnate. [B, 123 (α, 24).]—**Gepaart-g.** See CONJUGATO-PINNATE.—**Herablaufend-g.** Decursively pinnate. [B.]—**Unpaarig g.** Unequally pinnate; imparipinnate. [B.]—**Unterbrochen-g.** Interruptedly pinnate. [B.]—**Zweifach g.** See BIPINNATE.

GEFINGERT (Ger.), adj. Ge^2-fi^{2}n^2'e^{2}rt. See DIGITATE.—**Doppelt-g.** See BIDIGITATE.—**G.-gefiedert.** See DIGITIPINNATE.

GEFLECHT (Ger.), n. Ge^2-fle^{2}ch^{2}t'. See PLEXUS, RETE, RETICULUM, and SCROFULA.—**Achselg'.** See *Brachial* PLEXUS.—**Aderg'.** See *Venous* PLEXUS.—**Aderg' des dritten Ventrikels.** The chorioid plexus of the third ventricle. [L.]—**Aderg' der Seitenventrikel.** The chorioid plexuses of the lateral ventricles. [L.]—**Aderg' des vierten Ventrikels.** The chorioid plexus of the fourth ventricle. [L.]—**Aeusseres Kopfaderg'.** See *External carotid* PLEXUS.—**Armg'.** See *Brachial* PLEXUS.—**Bauchaorteng'.** See *Abdominal aortic* PLEXUS.—**Bauchg'.** See *Cœliac* PLEXUS.—**Beckeng'.** See *Pelvic* PLEXUS.—**Brustaorteng'.** See *Thoracic aortic* PLEXUS.—**Chorioidisches G.** See *Chorioid* PLEXUS.—**Cöliacisches G.** See *Cœliac* PLEXUS.—**Drosselg'.** The jugular lymphatic plexus. [α, 29.]—**Gallenblasengangg'.** A sympathetic venous plexus upon the surface of the gall-bladder. [L, 31.]—**Gangliong'.** See *Ganglionic* PLEXUS.—**Gänsefussg'.** See PES *anserinus.*—**Gebärmutterg'.** See *Uterine* PLEXUS.—**Gefässg'.** A vascular plexus. [A, 521.]—**G'artig.** See PLEXIFORM.—**G. der Harnblasenvenen.** See *Vesical* PLEXUS.—**G. der Rückenmarksnerven.** A plexus of spinal nerves. [L, 43.]—**G'theil des Gangliensystems.** The plexus of the sympathetic nervous system. [L, 175.]—**Halbmondförmiges G.** See *Cœliac* PLEXUS.—**Halsg'.** See *Cervical* PLEXUS.—**Herzg', Herznerveng'.** See *Cardiac* PLEXUS.—**Hinteres Gebärmutterg'.** See *Posterior uterine* PLEXUS.—**Hüftg'.** See *Sacral* PLEXUS.—**Iliacisches G.** See *Iliac* PLEXUS.—**Inneres Kopfschlagaderg'.** See *Internal carotid* PLEXUS.—**Knoteng'.** See PLEXUS *nodosus.*—**Kopfg'.** See *Cranial* PLEXUS.—**Kranzg'e.** The coronary plexuses of the heart or stomach. [L, 332.]—**Leberg'.** See *Hepatic* PLEXUS.—**Lendeng'.** See *Lumbar* PLEXUS.—**Mageng'.** See *Gastric* PLEXUS.—**Milzg'.** See *Splenic* PLEXUS.—**Nebennierenng'.** See *Suprarenal* PLEXUS.—**Nerveng'.** A plexus of nerves.—**Niereng'.** See *Renal* PLEXUS.—**Oberes Beckeng'.** See *Superior hypogastric* PLEXUS.—**Oberes Gebärmutterg'.** See *Posterior uterine* PLEXUS.—**Oberes Gekrösg'.** See *Superior mesenteric* PLEXUS.—**Pankeng'.** See *Tympanic* PLEXUS.—**Sameng'.** See *Spermatic* PLEXUS.—**Schamg'.** See *Pudendal* PLEXUS.—**Sonneng'.** See *Cœliac* PLEXUS.—**Steissg'.** See *Coccygeal* PLEXUS.—**Traubenförmiges G.** See *Pampiniform* PLEXUS.—**Tympanisches Nerveng'.** See *Tympanic* PLEXUS.—**Unteres Beckeng'.** See *Inferior hypogastric* PLEXUS.—**Unteres Gebärmutterg'.** See *Anterior uterine* PLEXUS.—**Unteres Gekrösg'.** See *Inferior mesenteric* PLEXUS.—**Veneng'.** See *Venous* PLEXUS.—**Venöses Flügelg'.** See *Pterygoid* PLEXUS.—**Venöses G.** See *Venous* PLEXUS.—**Vorderes Gebärmutterg'.** See *Anterior uterine* PLEXUS.—**Zellkörperg'.** The cavernous plexus of the clitoris or the penis. [L, 332.]—**Zwerchfellg'.** See *Phrenic* PLEXUS.

GEFLECKT (Ger.), adj. Ge^2-fle^{2}kt'. Spotted. [B, 123 (α, 24).]

GEFLÜGELT (Ger.), adj. Ge^2-flu^{6}g'e^{2}lt. See ALATE.

GEFRANSET (Ger.), **GEFRANZT** (Ger.), adj's. Ge^2-fra^{3}ns'e^{2}t, -fra^{3}ntst'. See FIMBRIATED.

GEFRÄSSIG (Ger.), adj. Ge^2-fras'i^{2}g. See VORACIOUS.—**G'keit.** See BULIMIA and ADEPHAGIA.

GEFRIEREN (Ger.), n. Ge^2-frer'e^{2}n. See CONGELATIO and CONGELATION.

GEFRIERPUNKT (Ger.), n. Ge^2-frer'punkt. See *Freezing* POINT.

GEFRIERSALZ (Ger.), n. Ge^2-frer'za^{3}ltz. See *Freezing* MIXTURE.

GEFRIERUNG (Ger.), n. Ge^2-frer'un^2. See CONGELATION (1st def.).

GEFROREN (Ger.), adj. Ge^2-fror'e^{2}n. Frozen. See CONGELATUS.

GEFÜGE (Ger.), n. Ge^2-fu^{6}g'e^2. 1. Texture. [B, 123 (α, 24).] 2. See ARTICULATION (1st def.).

GEFÜHL (Ger.), n. Ge^2-fu^{6}l'. Sensation, sense.—**Angstg'.** See ANGOR.—**Anstrengungsg'.** A feeling of fatigue. [Gruenhagen (K).] See *Muscular* SENSE.—**Bewegungsg'.** That general sensation which is imparted to the sensory nerves by the change of place of the body. [Gruenhagen (K).]—**Druckg'** [Gruenhagen]. See *Pressure*-SENSE.—**Fastg'.** The sense or feeling of hunger or fasting. [J.]—**G'los.** Insensitive.—**G'sabstumpfung.** Impairment of sensibility. [A, 521.]—**G'sanomalie.** See PARÆSTHESIA and DYSÆSTHESIA.—**G'sdelirium.** See DÉLIRE *des sentiments.*—**G'seindruck.** Sense impression. [J.]—**G'sfasern.** See *Sensory* NERVE-FIBRES.—**G'snerv.** See *Sensory* NERVE.—**G'ssinn.** The sense of touch. [α, 21.]—**G'stäuschung.** See PSEUDÆSTHESIA.—**G'sveränderung.** See PARÆSTHESIA.—**G'svermögen.** Sensory capacity. [A, 521.]—**G'swerkzeug.** A sensory apparatus. [K.]—**Gleichgewichtsg'** [Gruenhagen]. The feeling of equilibrium. [K.] See *Pressure*-SENSE.—**Innervationsg'.** The sense of existence of innervation. [J.]—**Krankhaftes G.** See DYSAPHE.—**Mangelndes G.** Stupor. [L, 80.]—**Müdigkeitsg'.** A sensation of weariness (in the muscles). [Gruenhagen (K).]—**Muskelg'.** See *Muscular* SENSE.—**Schwindelg'** [Gruenhagen]. The sensation of dizziness. [K.]—**Widerstandsg'.** A sensation of resistance. [J.]—**Wollustg'** [Gruenhagen]. The sexual sense or orgasm. [K.]

GEFÜLLT (Ger.), adj. Ge^2-fu^{6}lt'. Full. See PLENUS.—**G'heit.** See REPLETION and PLETHORA.

GEFÜNFT (Ger.), adj. Ge^2-fu^{6}nft'. Growing in fives. [B, 123 (α, 24).] See QUINATE.

GEFÜNFTET (Ger.), adj. Ge^2-fu^{6}nft'e^{2}t. See QUINCUNCIAL.

GEFURCHT (Ger.), adj. Ge^2-furch^{2}t'. Furrowed, grooved. See SULCATE.

GEFUSST (Ger.), adj. Ge^2-fust'. See PEDATE.

GEGABELT (Ger.), adj. Ge^2-ga^{3}b'e^{2}lt. See FURCATE.

GEGENANZEIGE (Ger.), n. Ga'ge^{2}n-a^{3}n-tzig-e^2. A contra-indication. [B, 131.]

GEGENARZNEI (Ger.), n. Ga'ge^{2}n-a^{3}rts-ni. See ANTIDOTE.

GEGENAUSDEHNUNG (Ger.), n. Ga'ge^{2}n-a^3-u^{4}s-dan-un^2. See COUNTER-EXTENSION.

GEGENBEZIEHUNG (Ger.), **GEGENBEZUG** (Ger.), n's. Ga'gen-be^2-tse-hun^2, -tsug. Correlation. [A, 521.]

GEGENBOCK (Ger.), n. Ga'ge^{2}n-bo^{3}k. See ANTITRAGUS.

GEGENBOGEN (Ger.), n. Ga'ge^{2}n-bog-e^{2}n. See ANTHELIX.

GEGENBRUCH (Ger.), n. Ga'ge^{2}n-bruch^2. See CONTRAFISSURA.

GEGENCRISE (Ger.), n. Ga'ge^{2}n-krez-e^2. See ANTICRISIS.

GEGEND (Ger.), n. Ga'ge^{2}nd. See REGION.

GEGENDRUCK (Ger.), n. Ga'ge^{2}n-druk. See COUNTER-PRESSURE.

GEGENECKE (Ger.), n. Ga'ge^{2}n-e^{2}k-e^2. See ANTITRAGUS.

GEGENEINANDERGENEIGT (Ger.), adj. Ga'ge^{2}n-in-a^{3}n-de^{2}r-ge^2-nigt. In botany, connivent. [B, 131.]

GEGENEINANDERHALTUNG, GEGENEINANDERSTELLUNG (Ger.), adj's. Ga'ge^{2}n-in-a^{3}n-de^{2}r-ha^{3}lt-un^2, -ste^{2}l-lun^2. See CONFRONTATION.

GEGENENTZÜNDLICH (Ger.), adj. Ga'ge^{2}n-e^{2}nt-tsu^{6}nd-li^{2}ch^2. See ANTI-INFLAMMATORY.

GEGENFARBEN (Ger.), n. pl. Ga'ge^{2}n-fa^{3}rb-e^{2}n. See *Complementary* COLORS.

GEGENFÜSSIG (Ger.), adj. Ga'ge^{2}n-fu^{6}s-si^{2}g. See ANTIPODAL.

GEGENGABE (Ger.), **GEGENGIFT** (Ger.), n's. Ga'ge^{2}n-ga^{3}b-e^2, -gi^{2}ft. See ALEXIPHARMAC and ANTIDOTE.

GEGENHALL (Ger.), n. Ga'ge^{2}n-ha^{3}l. See Echo.

GEGENKLOPFER (Ger.), n. Gag'e^{2}n-klop-fe^{2}r. See Flexor *pollicis brevis.*

GEGENKREIS (Ger.), **GEGENKREMPE** (Ger.), n's. Ga'-ge^{2}n-kris. -kre^{2}mp-e^{2}. See Anthelix.

GEGENKRISE (Ger.), n. Ga'ge^{2}n-krez-e^{2}. See Anticrisis.

GEGENLÄPPCHEN (Ger.), n. Ga'ge^{2}n-lap-ch^{2}e^{2}n. See Antitragus.

GEGENLÄUFIG (Ger.), adj. Ga'ge^{2}n-loif-i^{2}g. See Anatropal.

GEGENLAUTE (Ger.), n. Ga'ge^{2}n-la^{3}-ut-e^{2}. See Echo.

GEGENLEISTE (Ger.), n. Ga'ge^{2}n-list-e^{2}. See Anthelix.

GEGENMITTEL (Ger.), n. Ga'ge^{2}n-mi^{2}t-te^{2}l. See Antidote.—**Chemisches G.** See *Chemical* antidote.—**Dynamisches G.** See *Dynamical* antidote.—**Functionell wirkendes G.** See *Physiological* antidote.—**Mechanisch (oder Physikalisch) wirkendes G.** See *Mechanical* antidote.

GEGENMUSKEL (Ger.), n. Gag'e^{2}n-musk-e^{2}l. See Opponens.—**G. des Daumens.** See Opponens *pollicis.*

GEGENÖFFNUNG (Ger.), n. Ga'ge^{2}n-u^{5}f-nun^{2}. See Counter-opening.

GEGENPOLSEITE (Ger.), n. Ga'ge^{2}n-pol-zit-e^{2}. See *Antipolar* field.

GEGENREGUNG (Ger.), n. Ga'ge^{2}n-rag-un^{2}. See Reaction.

GEGENREIZ (Ger.), n. Ga'ge^{2}n-ritz. See Counter-irritation.—**G'mittel.** See Counter-irritant.—**G'ung.** See *G.*

GEGENSATZ (Ger.), n. Ga'ge^{2}n-za^{3}tz. See Contrast.

GEGENSCHALL (Ger.), n. Ga'ge^{2}n-sha^{3}l. See Echo.

GEGENSCHLAG (Ger.), n. Ga'ge^{2}n-shla^{3}g. See Contre-coup.

GEGENSPALT (Ger.), n. Ga'ge^{2}n-spa^{3}lt. See Contrafissura.

GEGENSTÄNDIG (Ger.), **GEGENSTEHEND** (Ger.), adj's. Ga'ge^{2}n-stand-i^{2}g, -sta-he^{2}nd. See Opposite.

GEGENSTELLER (Ger.), n. Ga'ge^{2}n-ste^{2}l-le^{2}r. See Opponens.—**G. der kleinen Zehe.** See Opponens *digiti minimi pedis.*—**G. des Daumens.** See Opponens *pollicis.*—**G. des kleinen Fingers.** See Adductor *minimi digiti.*

GEGENSTOSS (Ger.), n. Ga'ge^{2}n-stos. See Contre-coup and Reaction (1st def.).

GEGENSTRAHL (Ger.), n. Ga'ge^{2}n-stra^{3}l. See Reflection.

GEGENSTREBEN (Ger.), n. Ga'ge^{2}n-strab-e^{2}n. See Antagonism.

GEGENSTRECKUNG (Ger.), n. Ga'ge^{2}n-stre^{2}k-un^{2}. See Counter-extension.

GEGENÜBERSTELLUNG (Ger.), n. Ga'ge^{2}n-u^{6}b-e^{2}r-ste^{2}l-lun^{2}. See Confrontation.

GEGENVORSTEHER (Ger.), adj. and n. Ga'ge^{2}n-for-sta-he^{2}r. See Antiprostate.—**G. der Harnröhre.** See *Méry's* glands.

GEGENWENDIG (Ger.), adj. Ga'ge^{2}n-ve^{2}nd-i^{2}g. See Anatropal.

GEGENWIRKEND (Ger.), adj. Ga'ge^{2}n-verk-e^{2}nd. Antidotal, antagonistic, reacting. [*a*, 24.]

GEGENWIRKUNG (Ger.), n. Ga'ge^{2}n-verk-un^{2}. 1. See Antagonism. 2. In mechanics, reaction. [B.]

GEGENZUG (Ger.), n. Ga'ge^{2}n-tsug. See Counter-extension.

GEGIPFELT (Ger.), adj. Ge^{2}-gi^{2}p'fe^{2}lt. See Fastigiate.

GEGITTERT (Ger.), adj. Ge^{2}-gi^{2}t'te^{2}rt. See Clathrate and Cancellate.

GEGLÄTTET (Ger.), adj. Ge^{2}-glat'te^{2}t. See Glazed.

GEGLIEDERT (Ger.), adj. Ge^{2}-gled'e^{2}rt. Articulated. [*a*, 24.]

GEGNER (Ger.), n. Gag'ne^{2}r. See Antagonist.

GEGOHREN (Ger.), adj. Ge^{2}-gor'e^{2}n. Fermented. [A, 523.]

GEGOS, n. In Congo, the *Ximenia americana*. [B, 88 (*a*, 14).]

GEGRANNT (Ger.), adj. Ge^{2}-gra^{3}nt'. See Aristate.

GEGURGEL (Ger.), n. Ge^{2}-gurg'e^{2}l. See Gurgling.

GEGÜRTELT (Ger.), adj. Ge^{2}-gu^{8}rt'e^{2}lt. See Zonate.

GEGYIOMENOS (Lat.), adj. Je^{2}(ge^{2})-ji(gu^{6})-i^{2}-o^{2}m'e^{2}n-o^{2}s. Gr., γεγυιόμενος (from γυιοῦν, to weaken). Broken-down, enervated, enfeebled. [A, 322, 325.]

GEHACT (Ger.), n. Ga'a^{3}kt. See Gait.

GEHÄNGSEL (Ger.), n. Ge^{2}-han^{2}'ze^{2}l. See Appendix (1st def.).—**G. am dicken Darm.** The appendices epiploicæ. [L. 80.]

GEHAUBT (Ger.), adj. Ge^{2}-ha^{3}'u^{4}bt. See Calyptrate.

GEHÄUFT (Ger.), adj. Ge^{2}-hoift'. See Aggregate.

GEHÄUSE (Ger.), n. Ge^{2}-hoiz'e^{2}. See Excipula (2d def.).—**G'förmig.** See Excipuliform.

GEHÄUTET (Ger.), adj. Ge^{2}-hoit'e^{2}t. See Tunicate.

GEHEIMMITTEL (Ger.), n. Ge^{2}-him'mi^{2}t-te^{2}l. See Arcanum.

GEHELMT (Ger.), adj. Ge^{2}-he^{2}lmt'. See Galeate.

GEHEMMT (Ger.), adj. Ge^{2}-he^{2}mt'. See Impeditus.

GEHIRN (Ger.), n. Ge^{2}-hern'. The brain, encephalon. [I, 6 (K).] Cf. Hirn.—**Ambulacralg'.** The ambulacral nerve of echinoderms. [I.]—**Augeng'.** That portion of the brain of arthropods which is in close relation with the eye. [I.]—**G'anämie.** Cerebral anæmia. [B.]—**G'anhang.** See Hypophysis *cerebri.*—**G'anlage.** The primitive brain. [I, 17 (K).]—**G'artig.** See Encephaloid.—**G'atrophie.** Atrophy of the brain.—**G'balken.** See Corpus *callosum.*—**G'basis.** The lower surface of the brain. [L.]—**G'bau.** The structure of the brain.—**G'bedeckungen.** The coverings of the brain.—**G'behälter.** See Cranium.—**G'-bewegung.** The movement (pulsation) of the brain. [A, 521.]—**G'bläschen.** See *Cerebral* vesicle.—**G'bläschenreihe.** The series of embryonic vesicles from which the brain is developed. [I, 17 (K).]—**G'blase.** See *Cerebral* vesicle.—**G'blutfluss, G'-blutschlag.** See *Sanguineous* apoplexy.—**G'blutung.** Cerebral hæmorrhage. [A, 521.]—**G'bruch.** See Encephalocele.—**G'druck.** Compression of the brain. [L, 57 (*a*, 21).]—**G'dunst.** The fluid of the ventricles of the brain. [L, 80.]—**G'eindrücke.** See under Eindruck.—**G'einschnitt.** A cerebral fissure. [L.]—**G'eiterung.** See Encephalopyosis.—**G'entzündung.** See Encephalitis.—**G'erregung.** Cerebral excitement. [A, 521.]—**G'erscheinung.** A cerebral phenomenon. [A, 521.]—**G'erschütterung, G'erstarrung.** See Concussion *of the brain.*—**G'erweichung.** See Encephalomalacia.—**G'fatte.** See Hippocampus *minor.*—**G'fett.** See Cerebrin.—**G'fläche.** The surface of the brain. [L, 80.]—**G'haut.** See the major list.—**G'häutchen.** See G'haut.—**G'höhle.** See the major list.—**G'hyperämie.** Hyperæmia of the brain. [A, 521.]—**G'hypertrophie.** Hypertrophy of the brain. [L, 46 (*a*, 21).)—**G'kammer.** See G'höhle.—**G'-krankheit.** See Encephalopathy.—**G'lähmung.** Paralysis of cerebral origin. [A, 521.]—**G'lappen.** A lobe of the brain. [B, 131.]—**G'lehre.** See Cephalology.—**G'leiden.** See Encephalopathy.—**G'lein.** See Cerebellum.—**G'los.** See Anencephalous.—**G'mangel.** See Anencephalia.—**G'mark.** The white substance of the brain. [A, 523.]—**G'markstaub.** See Myelocyte.—**G'masse.** The cerebral substance. [L. 80.]—**G'missbildung.** A malformation of the brain. [A, 521.]—**G'nerv.** See *Cranial* nerve.—**G'ödem.** See Encephalœdema.—**G'pulsader.** A cerebral artery. [B. 131.]—**G'quetschung.** Contusion of the brain. [A. 521.]—**G'reiz.** Cerebral irritation. [A, 521.]—**G'rinde.** See *Cerebral* cortex.—**G'sand.** See Acervulus.—**G'säure.** See Cerebric *acid.*—**G'schädel.** That portion of the skull inclosing the brain. [L.]—**G'scheidewand.** See Septum *lucidum.*—**G'schicht der Retina.** The nervous element of the retina. [L.]—**G'schlagfluss.** See *Sanguineous* apoplexy.—**G'schrumpfung.** Shrinking of the brain. [A, 521.]—**G'schwäche.** Cerebral weakness. [L, 57.]—**G'schwamm.** See Fungus *cerebri.*—**G'schwammbildung.** See Encephalosis.—**G'schwund.** Atrophy of the brain. [A, 521.]—**G'sclerose.** See Cerebrosclerosis.—**G'spalte.** A cerebral fissure. [B, 131.]—**G'stamm.** See *Brain*-stem.—**G'stein.** See Encephalolith.—**G'stiel.** See Crus *cerebri.*—**G'störung.** Cerebral disturbance. [A, 521.]—**G'thätigkeit.** Cerebral activity. [L, 80.]—**G'vereiterung.** Suppuration of the brain.—**G'verhärtung.** Induration of the brain. [L, 46 (*a*, 21).]—**G'vielkopf.** See Cœnurus *cerebralis.*—**G'vorfall.** See Encephalocele.—**G'wassererguss.** See *Serous* apoplexy.—**G'wassersucht.** See Hydrocephalus.—**G'wulst.** See Hippocampus *major.*—**G'wuth.** Mania. [L, 46 (*a*, 21).]—**Grosses G.** See Cerebrum.—**Hinterg'.** See Epencephalon.—**Kleines G.** See Cerebellum.—**Mittelg'.** See Mesencephalon.—**Nachg'.** See Myelencephalon.—**Verlängertes G.** See *Spinal* cord.—**Vorderes G.** See Prosencephalon.

GEHIRNHAUT (Ger.), n. Ge^{2}-hern'ha^{3}-ut. One of the cerebral meninges. [B, 131.]—**Dünne G.** See Pia.—**Obere G.** See Dura.—**Untere G., Weiche G.** See Pia.

GEHIRNHÖHLE (Ger.), n. Ge^{2}-hern'hu^{5}l-e^{2}. A ventricle of the brain. [L, 115.]—**Dritte G.** See *Third* ventricle.—**G'nwassersucht.** See Hydrocephalus *internus.*—**Vierte G.** See *Fourth* ventricle.

GEHIRNSICHEL (Ger.), n. Ge^{2}-hern'zech^{2}-e^{2}l. See Falx.—**Grosse G.** See Falx *cerebri.*—**Kleine G.** See Falx *cerebelli.*

GEHOHLKEHLT (Ger.), adj. Ge^{2}-kol'kalt. See Cunicular.

GEHÖR (Ger.), n. Ge^{2}-hu^{5}r'. The sense of hearing. See Audition.—**G'apparat.** See *Auditory* apparatus.—**G'balsam.** See Balsamum *acusticum.*—**G'becher.** See Infundibulum *cochleæ.*—**G'bläschen, G'blase.** See the major list.—**G'fehler.** A defect in the sense of hearing. [L, 46 (*a*, 21).]—**G'gang.** See the major list.—**G'knöchelchen.** Auditory ossicles. [L.]—**G'krankheit.** Any abnormal state of the hearing.—**G'kunde, G'kunst.** See Acoustics.—**G'lähmung.** Deafness. [L, 46 (*a*, 21).]—**G'lehre.** See Acoustics.—**G'leiden.** See *G'krankheit.*—**G'leiste.** See Lamina *spiralis.*—**G'los.** Deaf. [L, 46 (*a*, 21).]—**G'losigkeit.** Deafness. [L, 80.]—**G'mangel.** Imperfect hearing. [L, 46 (*a*, 21).]—**G'messer.** See Acoumeter and Audiometer.—**G'mittel.** An acoustic remedy. [L, 43.]—**G'nerv.** See *Auditory* nerve.—**G'öl.** See Balsamum *acusticum.*—**G'organ.** The organ of hearing. [L, 46 (*a*, 21).]—**G'prüfung.** The art or process of testing the sense of hearing. [L, 575, 567.]—**G'sempfindung.** A sensation transmitted by the auditory nerve. [*a*, 29.]—**G'sinn.** See Hearing.—**G'stäbchen.** See Rods *of Corti.*—**G'störung.** Any derangement of hearing.—**G'swahrnehmung.** See *G'prüfung.*—**G'täuschung.** See Pseudacusis.—**G'vermögen.** The power of hearing.—**G'werkzeug.** See *Auditory* apparatus.—**G'zähne.** The tooth-like projections upon the edge of the limbus laminæ spiralis. [L, 31.]

GEHÖRBLÄSCHEN (Ger.), **GEHÖRBLASE** (Ger.), n's. Ge^{2}-hu^{5}r'blas-ch^{2}e^{2}n, -bla^{3}z-e^{2}. See *Otic* vesicle.—**Primitives G.** The primitive otic vesicle, formed by the epiblast. [A, 5; H.]

GEHÖRGANG (Ger.), n. Ge^{2}-hu^{5}r'ga^{3}n^{2}. See *Auditory* meatus.—**Aeusserer G.** See *External auditory* meatus.—**Innerer G.** See *Internal auditory* meatus.—**Knöcherner G.** See *Osseous auditory* meatus.—**Knorpeliger G.** See *Cartilaginous auditory* meatus.

GEHÖRN (Ger.), n. Ge^{2}-hu^{5}rn. 1. Horns, antlers. [L, 46 (*a*, 21).] 2. A horny excrescence. [A, 523.]

GEHÖRNT (Ger.), adj. Ge-hu^{5}rnt′. See Cornigerous and Cornutus.—**G'früchtige.** See Corniculatæ.

GEHSTÖRUNG (Ger.), n. Ga′stu^{5}r-un^2. Any abnormity of gait.

GEHUF, n. An undetermined tree of Sumatra which yields a medicinal gum and an oil. The latter is employed in diseases of the liver and spleen. [B, 46, 121 (*a*, 14).]

GEHUFT (Ger.), adj. Ge^2-huft′. See Ungulate.

GEHÜLFSMITTEL (Ger.), n. Ge^2-hu^{6}lfs′mi^{2}t-te^{2}l. See Synergist.

GEHUÑGA (Mah.), n. The *Triticum æstivum*. [A, 479 (*a*, 21).]

GEHÜLLT (Ger.), adj. Ge^2-hu^{6}lt′. See Involucrate.

GEHUPH, n. See Gehuf.

GEHWERKZEUG (Ger.), n. Ga′ve^{2}rk-tsoig. The apparatus of locomotion.

GÉHYDROPHILE (Fr.), adj. Zha-e-dro-fel. From γῆ, the earth, ὕδωρ, water, and φιλεῖν, to love. See Amphibious.

GEIC ACID, n. Je′i^{2}k. From γῆ, earth. Fr., *acide géique* (ou *géinique*). See Ulmic acid.

GEIFER (Ger.), n. Gif′e^{2}r. Saliva. [L, 46 (*a*, 21).]—**G'ig.** Driveling. [A, 521.]—**G'n.** Salivation. [L, 80.]—**G'wurz.** The *Anthemis pyrethrum*. [B, 131.]

GEÏGELT (Ger.), adj. Ge^2-eg′e^{2}lt. See Echinate.

GEIGENFÖRMIG (Ger.), adj. Gig′e^{2}n-fu^{5}rm-i^{2}g. Fiddle-shaped. [B, 123 (*a*, 24).]

GEIGENHARZ (Ger.), n. Gig′e^{2}n-ha^{3}rts. See Colophony.—**Französisches G.** See Colophonium *gallicum*.

GEIL (Ger.), adj. Gil. Lascivious. [L, 46 (*a*, 21).]—**G'heit.** Luxuriance, lasciviousness. [L, 46 (*a*, 21).]—**G'sucht.** Morbid lasciviousness. See Nymphomania and Satyriasis.

GEILE (Ger.), n. Gil′e^2. See Testicle.—**G'nband.** The gubernaculum testis. [L, 43.]—**Weibliche G.** See Ovary.

GEILNAU (Ger.), n. Gil′na^3-u^4. A place in the province of Nassau, Germany, where there is a gaseous and alkaline spring. [L, 30, 37, 49, 87, 135 (*a*. 14).]

GEILWURZ (Ger.), n. Gil′vurts. The *Orchis mascula*. [L, 46 (*a*, 21).]

GEIMPFT (Ger.), adj. Ge^2-i^{2}mpft′. Inoculated.

GEIN, n. Je′i^{2}n. From γῆ, earth. Fr., *géine*. Ger., *Geïn*. See Humin.—**G'säure** (Ger.). See Humic acid.

GEISION (Lat.), n. m. Jis′(ge^2′i^{2}s)-i^2-o^{2}n. Gr., γείσιον, dim. of γεῖσον, an overhanging part. See Geison.

GEISMAR (Ger.), n. Gis′ma^{3}r. A place in the province of Hesse, Prussia, where there is a gaseous and ferruginous spring. [L, 30, 41 (*a*, 14).]

GEISOMA (Lat.), **GEISON** (Lat.), n's n. Ji(ge^2-i^2)-so′ma^3, ji′(ge^2′i^2)-so^{2}n. Gen., *-som′atos* (*-is*), *-su*(*si*). Gr., γείσωμα, γεῖσον. Ger., *Augenbrauenbogen*. The superciliary ridge of the frontal bone. [A, 322, 325, 387.]

GEISS (Ger.), n. Gis. See Capra *hircus*.—**G'auge.** See Ægilops (1st def.) and Anchilops.—**G'bart.** The *Spiræa ulmaria*. [B, 180 (*a*, 24).]—**G'bartblumen.** See *Flores* ulmariæ.—**G'baum.** The *Acer pseudoplatanus*. [L. 46 (*a*, 21).]—**G'baumesche.** The *Fraxinus excelsior*. [B, 131.]—**G'blatt, G'blume.** See the major list.—**G'bohnenbaum.** The *Pyrus communis*. [L, 46 (*a*, 21).]—**G'fuss.** See the major list.—**G'holz, G'hülsen.** The *Ligustrum*. [B, 131.]—**G'klee.** The *Cytisus laburnum*. [B, 131.]—**G'kohl.** A large variety of cabbage. [B, 131.]—**G'raute.** See the major list.—**G'rebe.** The *Lonicera periclymenum*. [B, 180 (*a*. 24).]—**G'schaden.** See Rhododendron.—**G'staude.** See *G'klee*.—**G'wedel.** The *Spiræa ulmaria*. [B, 180 (*a*, 24).]

GEISSBLATT (Ger.), n. Gis′bla^{3}t. 1. The *Lonicera caprifolium*. 2. The *Lonicera periclymenum*. [B, 121, 180 (*a*, 24).]—**Deutsches G.** See *G.* (2d def.).—**G'gewächse.** The *Caprifoliaceæ*. [*a*, 24.]—**Italienisches G.** See *G.* (1st def.).

GEISSBLUME (Ger.), n. Gis′blum-e^2. The *Ranunculus sceleratus*. [B, 48 (*a*, 14).]—**Grosse G.** The *Chrysanthemum leucanthemum*. [B, 48 (*a*, 14).]

GEISSEL (Ger.), n. Gis′e^{2}l. 1. A whip or scourge. [*a*, 14.] See Flagellum. 2. In the pl., *G'n*, see Cilia.—**G. des heiligen Thomas.** The *Lycopodium phlegmaria*. [B, 121 (*a*, 24).]—**G'gras.** See *G'segge*.—**G'inge.** See Flagellate.—**G'segge.** The genus *Scleria*. [B, 121 (*a*, 24).]—**G'tragend.** See Flagellate.—**G'ung.** See Flagellation.—**G'zustand.** Literally, the flagellum state. That phase in the life-history of *Protozoa* (including the *Mycetozoa*, or *Myxomycetes*) in which the nucleated cell-body is provided with one or more processes of vibratile protoplasm. [B, 77, 121 (*a*, 35).]

GEISSFUSS (Ger.), n. Gis′fus. 1. The genus *Ægopodium*. 2. The *Spiræa ulmaria*. [B, 121, 180 (*a*, 24).] 3. An elevator for extracting teeth. [A, 521.]—**Gemeiner G.** The *Ægopodium podagraria*. [B, 180 (*a*, 24).]

GEISSINE, GEISSOSPERMINE, n's. Je-i^{2}s′sen, -i^{2}s-so-spu^{5}rm′en. Fr., *géissine*, *géissospermine*. Ger., *Geissin*, *Geissospermin*. An alkaloid, $C_{19}H_{24}N_2O_2 + H_2O$, obtained from the bark of *Geissospermum læve*, readily soluble in alcohol and in chloroform, and melting at 160° C. It has slightly toxic properties, causing paralysis in frogs, and in man acting as a cardiac and respiratory sedative. [B, 5, 93 (*a*, 14); "Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]

GEISSOSPERMUM (Lat.), n. n. Jis(ge^2-i^{2}s)-so(so^3)-spu^{5}rm-(spe^{2}rm)′u^{3}m(u^{4}m. From γείσσον (= γεῖσον), an overhanging projection, and σπέρμα, a seed. Fr., *géissosperme*. A genus of the *Apocynaceæ*, tribe *Plumerieæ*. [B, 42, 121 (*a*, 24).]—**G. læve.** One of the species furnishing Pao-Pereira bark, which is used in Brazil as a tonic, febrifuge, and astringent, and contains geissospermine (*q. v.*). [B, 5, 121 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]—**G. Vellosii.** A species furnishing Pao-Pereira bark. [B, 5 (*a*, 24).]

GEISSRAUTE (Ger.), n. Gis′ra^3-u^{4}t-e^2. The genus *Galega*. [B, 180 (*a*, 24).]—**Gemeine G.** The *Galega officinalis*. [B, 180 (*a*, 24).]

GEISSWEIDE (Ger.). Gis′vi-de^2. The *Salix caprea*. [B, 131.]

GEIST (Ger.), n. Gist. 1. The mind, soul, or spirit. 2. A material (*e. g.*, an alcoholic) spirit.—**Animalischer G.** See *Nervous* fluid and *Animal* spirits.—**Flüchtiger G.** A volatile spirit.—**G'abwesenheit.** 1. Absent-mindedness. 2. Delirium. 3. Insanity. [L, 43, 80.]—**G'anstrengung.** Mental strain.—**G'armuth.** Feeble-mindedness.—**G'ermüdung.** See *G'anstrengung*.—**G'ersquickung.** Mental refreshment.—**G'esabwesenheit.** See *G'abwesenheit*.—**G'esanstrengung.** See *G'anstrengung*.—**G'esarbeit.** Mental work.—**G'esarmuth.** See *G'armuth*.—**G'esbeschränktheit.** Weak-mindedness, stupidity. [A, 521.]—**G'eserstarrung.** Mental torpor. [A, 523.]—**G'esgestört.** See Alienated.—**G'esgesundheit.** Soundness of mind.—**G'eskraft.** Mental vigor or energy. [L, 46 (*a*, 21).]—**G'eskrank.** Weak in mind; as a n., an insane person. [L, 46 (*a*, 21).]—**G'eskrankheit.** Mental disease, insanity.—**G'esleere.** Vacancy of mind. [A, 521.]—**G'esruhe.** See Ataraxia.—**G'esschwach.** Imbecile, feeble-minded. [L, 46 (*a*, 21).]—**G'esschwäche.** Weakness of mind, imbecility. [L, 46 (*a*, 21).]—**G'esspannung.** See *G'anstrengung*.—**G'esstörung.** See *Mental* aberration.—**G'esstumpfheit, G'esträgheit.** Imbecility. [A, 521.]—**G'esverstörung.** See *Mental* aberration.—**G'esverwirrung.** See Delirium.—**G'eszerrüttung.** See *Mental* alienation.—**G'ig.** 1. Intellectual, mental. 2. Spirituous. [A, 523.]—**G'lähmung.** Mental paralysis. [A, 521.]—**G'losigkeit.** Dullness of mind. [A, 521.]—**Gliederg'.** An antarthritic water. [L, 46 (*a*, 21).]—**Minderer's G.** See *Liquor* ammonii *acetatis*.—**Thierischer G.** See *Nervous* fluid.—**Wilder G.** Carbon dioxide. [A, 324.]

GEISUM (Lat.), n. n. Jis′(ge^2′i^{2}s)-u^{3}m(u^{4}m). Gr., γεῖσον. See Geison.

GEITONOGAMY, n. Jit-o^{2}n-o^{2}g′a^{2}m-i^2. From γείτων, a neighbor, and γαμεῖν, to marry. See *Cross*-fertilization.

GEKÄMMT (Ger.), adj. Ge^2-kamt′. See Pectinate.

GEKAMPHERT (Ger.), adj. Ge^2-ka^{3}mf′e^{2}rt. See Camphorated.

GEKEIMT (Ger.), adj. Ge^2-kimt′. Germinated. [L, 43.]

GEKELCHT (Ger.), adj. Ge^2-ke^{2}lch^{2}t′. See Calyculate.

GEKERBT (Ger.), adj. Ge^2-ke^{2}rbt′. See Crenate.

GEKIELT (Ger.), adj. Ge^2-kelt′. See Carinate.

GEKKAKO, n. In Japan, the *Polianthes tuberosa*. [B, 121 (*a*, 21).]

GEKNÄUELT (Ger.), adj. Ge^2-knoi′e^{2}lt. See Agglomerate and Glomerate.

GEKNICKT (Ger.), adj. Ge^2-kni^{2}kt′. Bent, kinked. [A, 521.]

GEKNIET (Ger.), adj. Ge^2-knet′. See Geniculate.

GEKNÖPFT (Ger.), adj. Ge^2-knu^{5}pft′. Button-tipped, knob-tipped, probe-pointed. [A, 521.]

GEKOCHT (Ger.), adj. Ge^2-kocht′. Boiled.

GEKÖPFT (Ger.), adj. Ge^2-ku^{5}pft′. See Capitate.

GEKOPPELT (Ger.), adj. Ge^2-ko^{3}p′e^{2}lt. See Conjugate.

GEKÖRNELT (Ger.), **GEKÖRNT** (Ger.), adj's. Ge^2-ku^{5}rn′-e^{2}lt, -ku^{5}rnt′. See Granular and Granulated.

GEKRÄUSELT (Ger.), adj. Ge^2-kroiz′e^{2}lt. See Crispate, Curled, and Turbinated.

GEKREUZT (Ger.), n. Ge^2-kroitst′. See Cruciate and Crossed.

GEKRÖNT (Ger.), adj. Ge^2-kru^{5}nt′. See Coronate.

GEKRÖSARTERIE (Ger.), n. Ge^2-kru^{5}s′a^{3}r-ta-ri^2-e^2. A mesenteric artery. [B, 131.]

GEKRÖSARTIG (Ger.), adj. Ge^2-kru^{5}s′a^{3}rt-i^{2}g. See Gekrösförmig.

GEKRÖSBLATT (Ger.), n. Ge^2-kru^{5}s′bla^{3}t. A layer of the mesentery. [A, 521.]

GEKRÖSBRUCH (Ger.), n. Ge^2-kru^{5}s′bruch^2. Mesenteric hernia. [A, 521.]

GEKRÖSDARM (Ger.), n. Ge^2-kru^{5}s′darm. The jejunum and ileum. [A, 521.]

GEKRÖSDRÜSE (Ger.), n. Ge^2-kru^{5}s-dru^{5}s-e^2. A mesenteric gland. [B, 131.]

GEKRÖSE (Ger.), n. Ge^2-kru^{5}s′e^2. 1. The mesentery. [L, 43, 50 (*a*, 24).] 2. In botany a frill-like structure. [*a*, 24.]—**Darmg', Dünndarmg'.** See Mesentery.—**Grimmdarmg'.** See Mesocolon.

GEKRÖSENTZÜNDUNG (Ger.), n. Ge^2-kru^{5}s′e^{2}nt-tsu^{6}nd-un^2. Inflammation of the mesentery.

GEKRÖSFÖRMIG (Ger.), adj. Ge^2-kru^{5}s′fu^{5}rm-i^{2}g. Shaped like the mesentery; in botany, folded like the frills of the mesentery. [B, 123 (*a*, 24).]

GEKRÖSWURZEL (Ger.), n. Ge^2-kru^{5}s′vurts-e^{2}l. The root of the mesentery. [A, 521.]

GEKRÜMMT (Ger.), adj. Ge^2-kru^{6}mt′. See Curvate and Aduncous.

GÉLACIN (Fr.), n. Zha-la^3-sa^{2}n^2. The cell-contents of *Algæ*. [A, 385.]

GELADEN (Ger.), adj. Ge^2-la^{3}d′e^{2}n. Charged. [B.]

GELÄHMT (Ger.), adj. Ge^2-lamt′. Paralyzed.

GELALA (Lat.), n. f. Je^{2}l(ge^{2}l)-a(a^3)'la^3. See Erythrina.—**G. aquatica.** See Erythrina *fusca.*

GELANT (Fr.), adj. Zhe^2-la^{3}n^2. See Freezing.

GELAPHAL [Bombay], **GELAPHALA** [Mah.], n's. The *Genipa* (*Randia*) *dumetorum.* [Egasse, "Nouv. rém.," Aug. 24, 1888, p. 362.]

GELAPIUM (Lat.), **GELAPPIUM** (Lat.), n's n. Je^{2}l(ge^{2}l)-a(a^3)'pi^2-u^{3}m(u^{4}m), -a^{2}p(a^{3}p)'pi^2-u^{3}m(u^{4}m). The *Ipomœa jalapa.*

GELAPPT (Ger.), adj. Ge^2-la^{3}pt'. Lobate. [B, 123 (*a*, 24).]

GELASINUS (Lat.), n. m. Je^{2}l(ge^{2}l)-a^3-sin(sen)'u^{3}s(u^{4}s). Gr., γελασῖνος. Ger., *Lachgrübchen* (1st def.), *Lachzahn* (2d def.). 1. Of Suidas, a dimple produced in laughing. 2. Of Martial, an incisor tooth. [L, 349.]

GELASMA (Lat.), n. n. Je^{2}l(ge^{2}l)-a^{2}z(a^{3}s)'ma^3. Gen., *-as'matos* (*-is*). Gr., γέλασμα. A laugh. [A, 311 (*a*, 21).]

GELASMUS (Lat.), n. m. Je^{2}l(ge^{2}l)-a^{2}z(a^{3}s)'mu^{3}s(mu^{4}s). Ger., *Krampflachen* (2d def.). 1. See Gelasma. 2. Morbid convulsive laughter. [A, 322.]

GELASSENHEIT (Ger.), n. Ge^2-la^{3}s'se^{2}n-hit. Tranquillity of mind. [L, 80.]

GELATIFICATION, n. Je^{2}l-a^{2}t-i^2-fi^2-ka'shun. The production of gelatin. [B, 116.]

GELATIGENOUS, adj. Je^{2}l-a^{2}t-i^{2}j'e^{2}n-u^{3}s. From *gelare*, to congeal, and *gignere*, to produce. Producing gelatin. [L, 56.]

GELATIN, n. Je^{2}l'a^{2}t-i^{2}n. Lat., *gelatina* [Ger. Ph., 1st ed.] *colla, gelatina alba* [Norw. Ph., Russ. Ph., Swed. Ph.]. Fr., *gélatine animale* [Fr. Cod.] *grénétine* [Fr. Cod.]. Ger., *Leim, Gallerte.* It., *gelatina.* Sp., *gelatina, cola* [Sp. Ph.] *grenetina.* A substance obtained from white connective-tissue fibrils by prolonged boiling or by the action of very dilute acids upon collagen. Commercial g. (Flemish g.) is obtained by the prolonged boiling under pressure of hoofs, bones, cartilage, leather, and the skins of various animals, etc. Pure g. is obtained by repeated maceration in water, with subsequent heating, followed by filtration. It then consists of white fibrils, devoid of taste and odor, which are insoluble in cold water, but swell up in the latter into a mass which dissolves in water into a colorless liquid that, on cooling, gelatinizes, *i. e.*, sets into a tremulous, translucent jelly. G. is insoluble in alcohol, ether, and chloroform ; soluble by the aid of heat in glycerin (see *Glycerin-g.*). Its aqueous solution is lævorotary. It contains carbon, 50·2 per cent.; oxygen (with or, according to most, without sulphur), 25·0 per cent.; nitrogen, 17·9 per cent.; and hydrogen, 6·7 per cent. Its composition is $C_{76}H_{124}N_{24}O_{29}$ [Schützenberger and Bourgeois] or $C_{102}H_{151}N_{31}O_{39}$ [Hofmeister]. G. is official in several pharmacopœias, being used for the preparation of baths (see Balneum *gelatinosum*), for which the commercial g. is used, and for the preparation of capsules, pearls, etc., for which purified g. (*q. v.*) is used. The latter is the only kind official in the Ger. Ph., Russ. Ph., Norw. Ph., and Swed. Ph. G. is also used in microscopy as a culture-medium for micro-organisms and for other purposes. See Glycerin *g.* [B, 13, 95, 270.]—**Animal g.** See *G.*—**Bone g.** Fr., *gélatine des os.* Ger., *Knochenleim.* G. obtained from bones. [B.]—**Calabarized g.** A preparation made by dissolving 30 grains of g. and 20 drops of glycerin in 2 fl. oz. of distilled water, adding 100 minims of fluid extract of physostigma, drying on plates, and cutting into 100 equal squares or discs ; used in ophthalmic practice. ["Proc. of the Am. Pharm. Assoc.," xxiii (*a*, 14).]—**Chinese g.** See *Vegetable g.* (1st def.).—**Chromatized g.** Ger., *Chromleim.* A mixture of 1 part of potassium bichromate and 5 parts of a 10-per-cent. solution of g. [B. 5 (*a*, 14).]—**Cologne g.** See *Flemish g.*—**Cooper's g.** Probably the dried froth of a solution of pure bone-glue ; used as a substitute for isinglass. [B. 5 (*a*, 14).]—**Cox's g.** A commercial variety similar to Cooper's g. [L.]—**Culture g.** Ger., *Nährgelatin.* G. used as a culture medium for micro-organisms. It consists either of ordinary g., glycerin-g., or the gelatinous principle of agar-agar. [B.]—**Deane's g.** A mixture of g. and honey devised by Deane for mounting microscopic objects. It is now replaced by glycerin jelly. [J, 113.]—**Elastic g.** A preparation made by dissolving g. in a water-bath, evaporating till it becomes quite thick, and then adding the same weight of thick glycerin as of the dry g. used. ["Proc. of the Am. Pharm. Assoc.," vi (*a*, 14).] Cf. *Glycerin-g.*—**Fleischpeptong'** (Ger.), **Fleischwasserpeptong'** (Ger.). Meat-peptone g. [Koch (A, 521).]—**Flemish g.** Fr., *colle de Flandre, colette.* Ger., *Kölner Leim.* Sp., *cola de Flandes* [Sp. Ph.]. Bright-yellow, translucent g. [B, 92, 270.]—**G. bath.** See Balneum *gelatinosum.*—**G. capsules.** See *G.* capsule, Capsula *operculata*, and *Medicinal* pearls.—**G. for the bath.** See *Flemish g.*—**G'-glycerin** (Ger.). See Glycerin-*g.*—**G. of Wharton.** Lat., *gelatina Whartoni.* Fr., *gélatine* (ou *gélée*) *de Wharton.* Syn.: *Wharton's jelly.* The gelatinous connective tissue of the umbilical cord. —**G. peptone.** See under Peptone.—**G. suppository.** Ger., *G'-suppositorium.* A suppository the basis of which is g. [B. 270.]—**Japanese g.** See *Vegetable g.* (1st def.).—**Liquid g.** G. dissolved in acetic or some other acid, frequently used as mucilage. [J.]—**Mayence g.** Fr., *colle de Mayence.* A factitious isinglass used in solution as a soothing lotion in enteritis and as an injection in vesical irritation. It is also employed in making court-plaster. [L, 77 (*a*, 21).]—**Medicated g.** Lat., *gelatina medicata in lamellis.* Ger., *medicamentöse Leimblättchen.* A form of internal medicament made by adding the drug to a solution of g. and glycerin, drying in a thin layer, and dividing into small tablets. An elastic dressing is made by dissolving the tablets in warm water, and applying with a brush. ["Proc. of the Am. Pharm. Assoc.," xvii, xxxii (*a*, 14).]—**Meta-g.** G. that has been so altered by boiling with water that it does not gelatinize on cooling. [J, 55, 99.]—**Nährg'** (Ger.), **Nutrient g.** See *Culture g.*—**Patent g.** Ger., *Patentleim.* A variety of bone g., which usually has a milky appearance from the presence of calcium phosphate. [B, 270.]—**Purified g.** Lat., *gelatina* [Gr. Ph., 1st ed.], *gelatina alba* [Russ. Ph., Swed. Ph., Norw. Ph.] (seu *albissima*). Fr., *grénétine* [Fr. Cod.], *colle de Flandres purifiée* [Fr. Cod.]. Sp., *cola purificada* [Sp. Ph.], *grenetina* [Sp. Ph.]. G. so purified as to be almost colorless and odorless, and occurring in thin, nearly transparent sheets. [B, 95.]—**Russian g.** See *White g.*—**Salicylated g.** A preparation made by dissolving 3 parts of g. and 1 part of glycerin in 30 parts of hot water, and adding 1 part of salicylic acid ; recommended by Schwimmer in vesicular eczema. ["Proc. of the Am. Pharm. Assoc.," xxxiv (*a*, 14).]—**Silk g.** Sericin. [B.]—**Solution of g.** See *Test solution of g.*—**Sugar of g.** Fr., *sucre de gélatine.* Ger., *Leimzucker.* Of Braconnot, amido-acetic acid (glycocoll) ; so called from its being a sweet substance derived from the action of sulphuric acid on glue. [B, 3.]—**Test solution of g.** [U. S. Ph.]. A solution made by mixing and digesting for half an hour on a water-bath, with repeated shakings, 50 grains of isinglass, in shreds, with 5 fl. oz. of warm distilled water, and filtering through clean tow moistened with distilled water. [B, 81 (*a*, 21).]—**Vegetable g.** Lat., *pseudo-gelatina.* Fr., *gélatine de Chine* (ou *du Japon*), *colle de Chine* (ou *du Japon*, ou *de poisson de Bengale*) [all of 1st def.]. Ger., *falsche* (oder *vegetabilische*) *Gallerte.* Syn.: *Chinese g., Japanese g., phycocoll, gliadin* (2d def.). Any gelatinous substance obtained from vegetable tissues especially : 1. A substance resembling g. obtained from the agar-agar of the Celebes. 2. A tenacious mass, insoluble in water, left on evaporation of the strong alcoholic mother-liquor of gluten. [B, 4 (*a*, 27), 81 (*a*, 14).]—**White g.** Ger., *weisser* (oder *russischer*) *Leim.* G. rendered opaque by the action of lead sulphate or other chemical reagents. [B, 49.]

GELATINA (Lat.). n. f. Je^{2}l(ge^{2}l)-a^3-tin(ten)'a^3. Fr., *gélée* [Fr. Cod.] (2d def.). Ger., *Gallerte.* 1. Of the Ger. Ph., 1st ed., gelatin. 2. Jelly ; a gelatinous pharmaceutical preparation resembling a mucilage, and containing gelatin, ichthyocolla, pectin, or starch. [B ; B, 95 (*a*, 14).]—**G. alba** [Norw. Ph., Russ. Ph., Swed. Ph.], **G. albissima.** See Gelatin and *Purified* gelatin.—**G. animalis.** See Gelatin.—**G. animalis alba.** See *Purified* gelatin.—**G. bubula.** See Bouillon *sec.*—**G. chirurgica.** A gelatin preparation used for external application, *e. g.*, gelatin suppositories, gelatin bougies. [B, 270.]—**G. flava.** See *Flemish* gelatin.—**G. glutinosa alba.** The jelly that is prepared from purified gelatin. [B, 108.]—**G. hymenea.** In some cryptogams, the gelatinous mass containing the asci and paraphyses. [B, 308 (*a*, 35).]—**G. in foliis, G. in tabulis.** Gelatin occurring in thin sheets. [B, 270.]—**G. medicata in lamellis.** See *Medicated* gelatin.—**G. tabulata.** See Bouillon *sec.*—**G. Whartoni.** See Gelatin *of Wharton.*

GELATINATION, n. Je^{2}l-a^{2}t-i^{2}n-a'shu^{3}n. See Gelatinization.

GÉLATINE (Fr.), n. Zha-la^3-ten. See Gelatin.—**G. animale** [Fr. Cod.]. Lat., *gelatina.* See Gelatin.—**G. de Chine.** See *Vegetable* gelatin.—**G. des os.** See *Bone* gelatin.—**G. pour bains.** See *Flemish* gelatin.—**Sucre de g.** See *Sugar of* gelatin.

GÉLATINEUX (Fr.), adj. Zha-la^3-te-nu^5. See Gelatinous.

GELATINIFORM, adj. Je^{2}l-a^{2}t-i^{2}n'i^2-fo^{2}rm. From *gelatina*, gelatin, and *forma*, form. Fr., *gelatiniforme.* Resembling, or having the form of, gelatin. [B ; L, 41 (*a*, 21).]

GÉLATINIGÈNE (Fr.), adj. and n. Zha-la^3-te-ne-zhe^{2}n. See Albuminoid and Gelatigenous.

GELATINIZATION, n. Je^{2}l-a^{2}t-i^{2}n-i-za'shu^{3}n. From *gelatina*, gelatin. Fr., *gélatinisation.* Ger., *Gelatinirung.* Transformation into a gelatinous mass. [A, 385.]

GELATINIZED, adj. Je^{2}l-a^{2}t'i^{2}n-izd. From *gelatina*, gelatin. Fr., *gélatinifié.* Ger., *gelatinirt.* Converted into a gelatinous mass.

GELATINOID, adj. and n. Je^{2}l-a^{2}t'i^{2}n-oid. From *gelatina*, gelatin, and εἶδος, resemblance. Resembling gelatin ; colloid ; as a n., one of a class of nitrogenous substances, comprising gelatin, collagen, chondrin, elastin, keratin, and mucin. [B, 9.]

GELATINOUS, adj. Je^{2}l-a^{2}t'i^{2}n-u^{3}s. Lat., *gelatinosus.* Fr., *gélatineux.* Ger., *gallertig, gallertartig.* Containing gelatin, or of the consistence of jelly.

GELATION, n. Je^{2}l-a'shu^{3}n. Lat., *gelatio* (from *gelare*, to freeze). Fr., *gélation.* See Congelatio (2d and 3d def's).

GELATRANG DE JAVA, n. The *Aromadendron elegans.* [B, 121 (*a*, 24).]

GELB (Ger.), adj. and n. Ge^{2}lb. 1. Yellow. [B.] 2. See *Yellow* vitellus.—**Aniling'.** See Aniline *yellow.*—**Aristolochieng'.** See Aristolochia *yellow.*—**Casseler G.** See *Cassel's* yellow.—**Eidotterg'.** The color of yolk of egg. [L. 80.]—**Eig'.** The yolk of an egg. [L.]—**G'angel.** The *Anemone ranunculoides.* [B. 121 (*a*, 24).]—**G'beeren.** See the major list.—**G'blatt.** The genus *Xanthophyllum.* [B, 121 (*a*, 24).]—**G'blümchen.** The genus *Lyperia.* [B, 121 (*a*, 24).]—**G'blume.** The *Anthemis tinctoria.* [B, 121 (*a*, 24).]—**G'ebenholz.** The wood of *Tecoma leucoxylon.* [B, 121 (*a*, 24).]—**G'frauenschuh.** See the major list.—**G'frucht.** The genus *Tovomita.* [B. 121 (*a*, 24).]—**G'glas.** See Orpiment.—**G'harzbaum, G'harzpflanze, G'holz.** See the major list.—**G'ingwer.** See Curcuma.—**G'kraut.** The *Reseda luteola.* [B, 180 (*a*, 24).]—**G'lich.** Yellowish. [*a*, 24.]—**G'ohrig.** See Chrysostachyus.—**G'schoten.** The fruits of several species of *Gardenia.* [B, 270.]—**G'sehen.** See Xanthopsia.—**G'stern, G'sucht.** See the major list.—**G'süchtig.** Jaundiced. [A, 521.]—**G'suchtwurzel, G'wurz, G'wurzel.** The *Curcuma longa, Asphodelus ramosus, Hydrastis canadensis*, and *Xanthorrhiza apiifolia.* [B, 48, 121, 180, 270 (*a*, 24).]—**Kaiserg'.** See Aurantia.—**Königsg', Rauschg', Schwefelg'.** See Orpiment. [B, 49.]—**Turner's G.** Turner's yellow. [B.]—**Victoriag'.** See *Victoria* yellow.—**Weisslich g.** See Alutaceous (1st def.).

GELBBEEREN (Ger.), n. pl. Ge^{2}lb'bar-e^{2}n. The unripe fruit of several species of *Rhamnus.* [B, 180, 270.]—**Avignon-G.** The berries of *Rhamnus infectoria* and *Rhamnus saxatilis.* [B, 270.]—**Chinesische G.** The fruits of several species of *Gardenia.* [B, 270.]—**Deutsche G.** The berries of the *Rhamnus cathartica.*

O, no; **O^2**, not; **O^3**, whole; **Th**, thin; **Th^2**, the; **U**, like oo in too; **U^2**, blue; **U^3**, lull; **U^4**, full; **U^5**, urn; **U^6**, like ü (German).

[B, 270.]—**Levantinische G.** See *Avignon-G.*—**Persische G.** The berries of *Rhamnus infectoria.* [B, 270.]—**Walachische G.** See *Avignon-G.*

GELBENECH (Ger.), n. Ge^{2}lb′e^{2}n-e^{2}ch^2. An old name for the genus *Gratiola.* [B, 121 (*a*, 24).]

GELBFRAUENSCHUH (Ger.), n. Ge^{2}lb′fra^3-u^4-e^{2}n-shu. See CYPRIPEDIUM (1st def.).—**G'wurzel.** See CYPRIPEDIUM (2d def.).—**Flüssiges G'extrakt.** See *Extractum* CYPRIPEDII *fluidum.*

GELBHARZBAUM (Ger.), n. Ge^{2}lb′ha^{3}rts-ba^3-u^{4}m. The genus *Xanthorrhœa.* [B, 180 (*a*, 24).]—**Grosser G.** The *Xanthorrhœa arborea.* [B, 180 (*a*, 24).]—**Mittlerer G.** The *Xanthorrhœa media.* [B, 180 (*a*, 24).]—**Niedriger G.** The *Xanthorrhœa hastilis.* [B, 180 (*a*, 21).]—**Schwertblättriger G.** The *Xanthorrhœa australis.* [B, 180 (*a*, 24).]

GELBHARZPFLANZE (Ger.), n. Ge^{2}lb′ha^{3}rts-pfla^{3}nts-e^2. See GELBHARZBAUM.—**Baumartigo G.** The *Xanthorrhœa arborea.* [L, 80.]

GELBHOLZ (Ger.), n. Ge^{2}lb′holts. 1. Yellow wood; the wood of *Broussonetia tinctoria*, *Rhus cotinus*, and other species having wood of this color. 2. The genus *Xanthoxylon.* [B, 121, 180 (*a*, 24).]—**Ausgerandetes G.** The *Xanthoxylon emarginatum.* [B, 180 (*a*, 24).—**Caraïbisches G.** The *Xanthoxylon clava Herculis.* [B, 180 (*a*, 24).]—**Dreiblättriges G.** The *Xanthoxylon ternatum.* [B, 180 (*a*, 24).]—**Eschenblättriges G.** The *Xanthoxylon fraxineum.* [B, 180 (*a*, 24).]—**Geflügeltes G.** The *Xanthoxylon alatum.* [B, 180 (*a*, 24).]—**G. aus Siam.** The wood (called in China kaieb wood) of an undetermined tree, probably the *Chloroxylon swietenia* or a species of *Xanthoxylon.* [B, 180 (*a*, 24).]—**G'rinde.** The bark of *Rhus cotinus.* [B. 180 (*a*, 24).]—**G'sumach.** The *Rhus cotinus.* [B, 180 (*a*, 24).]—**Glänzendes G.** The *Xanthoxylon nitidum.* [B. 180 (*a*, 24).]—**Mastixblättriges G.** The *Xanthoxylon pterota.* [B, 180 (*a*, 24).]—**Pfefferartiges G.** The *Xanthoxylon piperitum.* [B, 180 (*a*, 24).]—**Senegalisches G.** The *Xanthoxylon senegalense.* [B, 180 (*a*, 24).]—**Sichelblättriges G.** The *Xanthoxylon rhetsa.* [B, 180 (*a*, 24).]—**Ungarisches G.** The wood of *Rhus coriaria* and *Rhus cotinus.* [B, 180 (*a*, 24).]—**Westindisches G.** The wood of *Broussonetia tinctoria.* [B, 180 (*a*, 24).—**Zwitterblüthiges G.** The *Xanthoxylon hermaphroditum.* [B, 180 (*a*, 24).]

GELBSTERN (Ger.), n. Ge^{2}lb′ste^{2}rn. The genus *Gagea.* [B, 180 (*a*, 24).]—**Gemeiner G.** The *Gagea lutea.* [B, 180 (*a*, 24).]

GELBSUCHT (Ger.), n. Ge^{2}lb′zuch^{2}t. Jaundice.—**G. der Kinder, G. der Neugeborenen.** See ICTERUS *neonatorum.*—**G. der Schafe.** See CACHEXIA *aquosa.*—**G'wurzel.** See *Radix* CURCUMÆ.—**Greiseng'.** See GERICTERUS.

GELBWURZ (Ger.), n. Ge^{2}lb′vurts. 1. *Curcuma longa.* 2. The genus *Xanthorrhiza.* [B, 180 (*a*, 24).—**Canadische G.** The *Hydrastis canadensis.* [B, 270 (*a*, 24).]—**Sellerieblättrige G.** The *Xanthorrhiza apiifolia.* [B, 180 (*a*, 24).]

GELDING, n. Ge^{2}ld′i^{2}n^2. 1. Castration (of the domestic animals). 2. A castrated animal, especially a horse.

GELDROLLENBILDUNG (Ger.), n. Ge^{2}ld′rol-le^{2}n-bi^{2}ld-un^2. The arrangement of red blood-corpuscles in the form of rouleaux. [K.]

GELDROLLENFÖRMIG (Ger.), adj. Ge^{2}ld′rol-le^{2}n-fu^{5}rm-i^{2}g. Resembling rouleaux of coins. [A, 521.]

GELÉE [Fr. Cod.] (Fr.), n. Zhe^2-la. A jelly. [B.] See GELATINA (2d def.).—**Arzneiliche G's** (Ger.). Medicinal jellies. [A, 319 (*a*, 21).]—**G. analeptique.** See DACTYLÈNE.—**G. animale.** See GELATIN.—**G. de Rolando.** The gray, gelatiniform substance which constitutes the greater part of the head of the dorsal cornu of the spinal cord. [L, 49 (*a*, 14).]—**G. de Stilling.** The neuroglia surrounding the central canal of the spinal cord. [L, 49 (*a*, 14).]—**G. de Wharton.** See GELATIN *of Wharton.*—**G. de framboises.** See *Jalea de* FRAMBUESA.—**G. pectique.** A gelatinous substance containing pectic acid. [L, 88 (*a*, 14).]—**G. pectorale.** See DACTYLÈNE.—**G. purgative.** See DIACYDONION *jalappinum.*—**G. végétale.** See *Vegetable* GELATIN.

GELÉINE (Fr.), n. Zha-la-en. See GELIN.

GELENK (Ger.), n. Ge^2-le^{2}n^{2}k′. 1. A joint. [L, 115.] See ARTICULATION (1st def.). 2. In botany, see GENICULUM.—**Acromialg', Acromioclaviculärg', Akromioclaviculärg'.** See *Acromio-clavicular* ARTICULATION.—**Amboss-Orbicular G.** See *Incudo-orbicular* ARTICULATION.—**Amboss-Steigbügel-G.** See *Incudo-stapedial* ARTICULATION.—**Antibrachial-Carpalg'.** See *Erstes Carpalg'* and *Carpal-Carpalg'.*—**Atlanto-Occipitalg'.** See *Occipito-atlantal* ARTICULATION.—**Bandg'.** See SYNDESMOSIS.—**Berührungsg'.** A variety of articulation in which the articular surfaces are in contact by linear or circular surfaces. The knee joint is the only (but disputed) example. [L, 332.]—**Bewegliches G.** See DIARTHROSIS.—**Brustschlüsselbeing'.** See *Sterno-clavicular* ARTICULATION.—**Carpal-Carpalg'e.** The articulations between the two rows of carpal bones. GELENKGESCHWULST (Ger.), n. Ge^2-le^{2}n^{2}k'ge^2-shvulst. See ARTHRONCUS.—**Weisse G.** See *Fungous* ARTHRITIS.

GELENKSEUCHE (Ger.), n. Ge^2-le^{2}n^{2}k'soich^2-e^2. An epidemic or epizootic disease of the joints.—**G. der Lämmer, Ungarische G.** See ARTHROCACE *agniculorum.*

GELENKSTÜCK (Ger.), n. Ge^2-le^{2}n^{2}k'stu^{6}k. The articular portion of a bone.—**G. des Hinterhauptbeins** [Wiedemann]. See *Exoccipital* BONE.—**G. des Unterkiefers.** See ARTICULAR (n.) and *Articular* BONE (1st def.).

GELENKTHEIL (Ger.), n. Ge^2-le^{2}n^{2}k'ti^{2}l. See GELENKSTÜCK.—**G. des Grundbeins.** See *Exoccipital* BONE.—**G. des Schläfenbeins.** See *Tympanic* BONE.

GELFUM (Ar.), n. See GELBUM.

GELID, adj. Je^{2}l'i^{2}d. Gr., κρυερός. Lat., *gelidus.* Ice-cold. [A, 318.]

GELI DEL PERÚ (Sp.), n. Ha-le'de^{2}l-pa-ru'. The *Conocarpus erecta.* [B, 121 (α, 24).]

GELIDIUM (Lat.), n. n. Je^{2}l(ge^{2}l)-i^{2}d'i^2-u^{3}m(u^{4}m). A genus of *Algæ* (*Florideæ*) some species of which furnish agar-agar. [B, 270.]—**G. corneum.** Fr., *gélidie cornée.* Ger., *hornartige Knopfalge.* A Japanese species furnishing gelosin and one of the constituents of agar-agar. [Guérin, "Gaz. hebd. de méd. et de chir.," June 18, 1886, p. 415; B, 5, 173, 180 (α, 24).]

GÉLIF (Fr.), adj. Zha-lef. Ger., *verwittert.* Cracked by the freezing of juices or of water that has entered the interstices (said of trees). [A, 301, 385, 526.]

GELIFICATION, n. Je^{2}l-i^2-fi^2-ka'shu^{3}n. Fr., *gélification.* See GELATINIZATION.

GELIN, n. Je^{2}l'i^{2}n. Fr., *géline, géleine.* Ger., *G.* 1. According to some German chemists, cellulose; of Nägele, a cellulosic substance containing a little starch and much mesamylin and diamylin. 2. See COLLAGEN. [B, 38, 48, 125 (α, 14); B, 121 (α, 24).]

GELINEÆ (Lat.), n. f. pl. Je^{2}l(ge^{2}l)-i^{2}n'e^2-e(a^3-e^2). Cells in *Algæ* secreting vegetable jelly. [B, 19 (α, 24).]

GELL, n. Je^{2}l. The *Nepeta glechoma.* [A, 505 (α, 21); B, 19, 121 (α, 24).]

GELLEN (Ger.), n. Ge^{2}l'le^{2}n. A shrill noise, yelling. [L, 46 (α, 21).]—**G. der Ohren.** See TINNITUS *aurium.*

GELLY, n. Je^{2}l'i^2. See JELLY.

GELOFER, n. Je^{2}l'o-fu^{5}r. See GILLIFLOWER.

GELOS (Lat.), n. m. Je^{2}l(ge^{2}l)'os. Gen., *gelot'os (-is).* Gr., Γέλως. 1. Laughter. 2. Of Pliny, a fountain of Phrygia, so called because it was said to excite the spirits. [L, 105.]

GELOSE, n. Je^{2}l'os. Fr., *gélose.* Ger., *G.* The active gelatinizing principle of the nutrient gelatin obtained from agar-agar. The formula $C_6H_{10}O_5$ has been doubtfully assigned to it. [B, 270 (α, 27); "Proc. of the Am. Pharm. Assoc.," xxvi, xxix (α, 14).] See PARARABIN.

GELOSIN, n. Je^{2}l'os-i^{2}n. Of Guérin, a mucilaginous substance obtained from *Gelidium corneum,* soluble in its own bulk of warm water; recommended for making suppositories, cataplasms, bougies, etc., also as a substitute for agar-agar in cultivating bacteria. ["Proc. of the Am. Pharm. Assoc.," xxxv (α, 14); "Gaz. hebd. de méd. et de chir.," June 18, 1886, p. 415; "Bull. gén. de thérap.," July 15, 1886, p. 31; "Am. Jour. of Pharm.," Dec., 1886, p. 609.]

GELÖST (Ger.), adj. Ge^2-lu^{5}st'. Dissolved.

GELOTOPHYLLIS (Lat.), n. f. Je^{2}l(ge^{2}l)-ot-o(o^3)-fi^{2}l(fu^{6}l)'li^{2}s. Gen., *gelotophyl'lidos (-is).* Gr., γελωτόφυλλις. The *Ranunculus illyricus.* [B, 121 (α, 24).]

GELSEMIA (Lat.), n. f. Je^{2}l(ge^{2}l)-se^{2}m(sam)'i^2-a^3. See GELSEMINE.

GELSEMIC ACID, n. Je^{2}l-se^{2}m'i^{2}k. Fr., *acide gelséminique.* Ger., *Gelseminsäure.* Of Wormley, a crystalline, highly fluorescent acid, obtained from *Gelsemium sempervirens.* According to Robbins, it is a glucoside and identical with æsculin. [B, 81 (α, 27), 270.]

GELSEMIE (Ger.), n. Ge^{2}l-sa'me. See GELSEMIUM.—**Flüssiges G'nextrakt.** See *Extractum* GELSEMII *fluidum.*—**G'nextrakt.** See *Extractum* GELSEMII.

GELSEMIN, n. Je^{2}l'se^{2}m-i^{2}n. 1. See GELSEMPERIN. 2. As a Ger. word, see GELSEMINE.—**G.-resinoid.** See GELSEMPERIN.—**G'säure** (Ger.). See GELSEMIC ACID.

GELSEMINE, n. Je^{2}l'se^{2}m-en. Lat., *gelsemina, gelseminum, gelseminia.* Fr., *gelsémine.* Ger., *Gelsemin.* An amorphous, poisonous alkaloid, $C_{11}H_{19}NO_2$ [Sonnenschein, Robbins], $C_{12}H_{14}NO_2$ [Gerrard], $C_{54}H_{69}N_4O_{12}$ [Thompson], or $C_{22}H_{38}N_2O_4$ [Wormley], obtained from *Gelsemium sempervirens;* white, intensely bitter, highly alkaline, and fusing at about 100° C.; slightly soluble in water, more soluble in alcohol, very soluble in ether. [B, 8, 81, 270 (α, 27); "Proc. of the Am. Pharm. Assoc.," xxxi (α, 14).]—**G. hydrochloride.** Lat., *gelseminum hydrochloricum.* A salt of g. and hydrochloric acid, $(C_{11}H_{19}NO_2)_2HCl$. [B, 2.]—**G. tartrate.** Lat., *gelseminum tartaricum.* A compound of g. and tartaric acid; white laminæ readily soluble in water and in alcohol. ["Ann. di chim. e di farmacol.," July, 1890, p. 46 (B).]

GELSEMINIC ACID, n. Je^{2}l-se^{2}m-i^{2}n'i^{2}k. Fr., *acide gelséminique.* See GELSEMIC ACID.

GELSEMININE, n. Je^{2}l-se^{2}m'i^{2}n-en. Of F. A. Thompson, an alkaloid obtained from the rhizome of *Gelsemium sempervirens,* together with gelsemine, but differing greatly from the latter in physical and chemical properties. ["Proc. of the Am. Pharm. Assoc.," xxxv (α, 14).]

GELSEMINUM (Lat.), n. n. Je^{2}l(ge^{2}l)-se^{2}m(sam)-in(en)'u^{3}m-(u^{4}m). 1. See GELSEMIUM. 2. See GELSEMINE.—**G. hydrochloricum.** See GELSEMINE *hydrochloride.*—**G. tartaricum.** See GELSEMINE *tartrate.*

GELSEMIUM (Lat.), n. n. Je^{2}l(ge^{2}l)-se^{2}m(sam)'i^2-u^{3}m(u^{4}m). Fr., *gelsémium.* Ger., *Gelsemie.* It., Sp., *gelsemio.* 1. Of the U. S. Ph. and Br. Ph., the rhizome and rootlets of *G. sempervirens.* 2. A genus of the *Loganiaceæ,* tribe *Gelsemieæ,* composed of slender, smooth, climbing shrubs, with evergreen leaves and large, showy yellow flowers. They have a 5-parted calyx, funnel-shaped corolla, with 5 short lobes, stigmas, each 2-parted, and anthers dimorphous. [B, 5, 34, 42, 121 (α, 24).]—**Extractum gelsemii** [Belg. Ph.] (**alcoholicum** [Br. Ph.]). Fr., *extrait de gelsémium sempervirens* [Fr. Cod.]. Ger., *Gelsemienextrakt.* A thick extract made by exhausting the coarsely powdered root [Belg. Ph.] or rhizome [Br. Ph.] of *G. sempervirens* with alcohol, and evaporating. [B, 95 (α, 14).]—**Extractum gelsemii fluidum** [U. S. Ph.]. Fr., *extrait liquide de gelsémium.* Ger., *flüssiges Gelsemienextrakt.* A preparation made by macerating 25 oz. av. of coarsely powdered g. rhizome, with enough alcohol to thoroughly moisten it in a percolator, adding afterward sufficient alcohol to make 24 fl. oz., reserving the first 21¼ fl. oz. of the percolate, evaporating the remainder to a soft extract, dissolving this in the reserved portion, and adding enough alcohol to make 24 fl. oz. of fluid extract. [B, 81, 95 (α, 14).]—**Gelsemii radix.** See *Radix gelsemii.*—**G. elegans.** Of Bentham, a species growing in China, differing widely from the other known species. The rhizome, known as *humuanchiang,* is extensively used in Chinese medicine. It contains an alkaloid differing in action from gelsemine, and belonging to the tetanus-producing alkaloids. ["Proc. of the Am. Pharm. Assoc.," xxxv (α, 14).]—**G. lucidum, G. nitidum.** See *G. sempervirens.*—**G'säure** (Ger.). See GELSEMIC ACID.—**G. sempervirens.** Yellow (or Carolina) jasmine, or jessamine; a slender vine twining and overrunning bushes and low trees, and flowering profusely with a delicious odor. It is common to the banks of streams from Virginia to Florida, and has corollaceous, shining leaves, and corollas of a rich golden yellow, which are said to be poisonous. The rhizome (*g.* [U. S. Ph.]) appears in commerce sliced in pieces about an inch long, very light and fibrous, of a yellowish-white color, an unpleasant smell, and a bitter taste. It contains gelsemine, gelsemic (or gelseminic) acid, and gelsemin-ine. G. is a depressant of nervous reflex action, and has been used in a variety of diseases, but is best adapted to spasmodic and neuralgic affections. It is also by some considered an antiperiodic and an adjuvant to quinine. The honey made from its flowers is said to be poisonous. [B, 5, 34, 42 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxxiv (α, 14).]—**Radix gelsemii** [Br. Ph., Belg. Ph.]. Ger., *G'wurzel.* The rhizome and rootlets of *G. sempervirens.* [Vogl (A, 319 [α, 21]).]—**Tinctura gelsemii** [U. S. Ph., Br. Ph., Belg. Ph.]. Fr., *teinture de gelsémium.* Ger., *Gelsemientinktur.* A tincture made by exhausting the rhizome of *G. sempervirens* with alcohol, 100 parts of tincture representing 15 parts of powdered rhizome [U. S. Ph.], or 1 pint imperial representing 2·5 oz. [Br. Ph.]. The Belg. preparation is of somewhat greater strength than the U. S. Ph. [B, 88 (α, 14), 95.]

GELSÉMIUM (Fr.), n. Zhe^{2}l-sa-me-u^{3}n^2. See GELSEMIUM.—**Extrait de g. sempervirens** [Fr. Cod.] (Fr.). See *Extractum* GELSEMII *alcoholicum.*—**Extrait liquide de g.** (Fr.). See *Extractum* GELSEMII *fluidum.*—**Teinture de g.** See *Tinctura* GELSEMII.

GELSEMPERIN, n. Je^{2}l-se^{2}m'pe^{2}r-i^{2}n. A concentration obtained from the root of the *Gelsemium sempervirens.* [B, 270.]

GELSTER (Ger.), n. Ge^{2}l'ste^{2}r. 1. The *Spartium scoparium.* 2. The *Genista tinctoria.* [B, 48 (α, 14).]—**Blaue G.** The *Aconitum napellus.* [B, 48 (α, 14).]—**Gelbe G.** The *Aconitum lycoctonum.* [B, 48 (α, 14).]—**G'kraut.** The herb and flowering tops of *Genista tinctoria.* [B, 180 (α, 24).]

GELSUM (Lat.), n. n. Je^{2}l(ge^{2}l)'su^{3}m(su^{4}m). An ancient name of the genus *Morus.* [B, 121 (α, 24).]

GELTERKINDEN (Ger.), n. Ge^{2}l'e^{2}r-ki^{2}nd-e^{2}n. A place in the canton of Basel, Switzerland, near which there is a sulphurous spring and a bathing establishment called Kienberg. [L, 30, 135 (α, 14).]

GELTSBERG (Ger.), n. Ge^{2}lts'be^{2}rg. A place in the district of Leitmeritz, Bohemia, Austria-Hungary, where there is a cold-water-cure establishment. [A, 319 (α, 21).]

GELU (Lat.), n. n. Jel(ge^{2}l)'u^2(u). Gen., *gel'us.* Icy coldness, frost, cold. [A, 312 (α, 21).]

GELURE (Fr.), n. Zhe^{2}l-u^{6}r. See CONGELATION (2d def.).

GELÜST (Ger.), n. Ge^2-lu^{6}st'. Desire, appetite. [L, 46 (α, 21).]

GELUTA, n. The *Carlina vulgaris.* [B, 121 (*a*, 24).]

GEM, n. Je^{2}m. See GEMMA (1st def.).

GEMÄCHT (Ger.), n. Ge^2-me^{2}ch^{2}t′. The male external genitals. [A, 521.]

GEMÄHNT (Ger.), adj. Ge^{2}mant′. See CRINITE.

GEMALT (Ger.), adj. Ge^2-ma^{2}lt′. See PAINTED.

GEMECKER (Ger.), n. Ge^2-me^{2}k′e^{2}r. See ÆGOPHONY.

GEMEIN (Ger.), adj. Ge^2-min′. Common, frequent, ordinary. [L, 46 (*a*, 21).]—**G'braun.** See FUSCUS.—**G'schaftlich.** See *G.*

GEMELLARY, adj. Je^{2}m′e^{2}l-a-ri^2. Lat., *gemellus.* Fr., *gémellaire.* Pertaining to or resembling twins. [A, 385.]

GÉMELLÉ (Fr.), adj. Zha-me^{2}l-a. See GEMINATE.

GEMELLI (Lat.), n. m. pl. Je^{2}m(ge^{2}m)-e^{2}l′li(le). Pl. of *gemellus* (*q. v.*).

GEMELLIFERUS (Lat.), adj. Je^{2}m(ge^{2}m)-e^{2}l-li^{2}f′e^{2}r-u^{2}s(u^{4}s). From *gemellus*, a twin, and *ferre*, to bear. 1. Twin-bearing. 2. Consisting of twin germs (see OVUM *gemelliferum*).

GEMELLIFLORUS (Lat.), adj. Je^{2}m(ge^{2}m)-e^{2}l-li^2 flor′u^{2}s(u^{4}s). From *gemellus*, a twin, and *flos*, a flower. Fr., *gémelliflore.* Having the flowers disposed two by two. [L, 41.]

GEMELLIFORMIS [E. Coues] (Lat.), n. m. Je^{2}m(ge^{2}m)-e^{2}l-li^2-fo^{2}rm′i^{2}s. From *gemellus*, a twin, and *forma*, form. See GEMELLUS *superior.*

GEMELLIPAROUS, adj. Je^{2}m-e^{2}l-i^{2}p′a^{2}r-u^{2}s. Lat., *gemelliparus* (from *gemellus*, a twin, and *parere*, to bring forth). Producing twins. [L, 56.]

GEMELLITY, n. Je^{2}m-e^{2}l′i^{2}t-i^2. From *gemellus*, a twin. Fr., *gémellité.* The state of being geminate.

GEMELLUS (Lat.), adj. and n. m. Je^{2}m(ge^{2}m)-e^{2}l′lu^{2}s(lu^{4}s). Dim. of *geminus.* Gr., διδυμος. Fr., *géminé* (adj.), *jumeau* (n.). Ger., *gepaart* (adj.), *Zwilling* (n.). 1. (Adj.) born as a twin; in botany, springing in a pair from one stalk. 2. (N.) a twin; in anatomy, one of a pair of similar muscles, also the gastrocnemius muscle, from its having two heads; in the pl., *gemelli*, the testicles. [A, 312 (*a*, 21); L, 135 (*a*, 14); L, 349.]—**Gemelli coaliti.** The individuals constituting a double monster. [A, 47.]—**Gemelli femoris.** See Fr., *jumeaux pelviens.* See *G. inferior* and *G. superior.*—**G. inferior.** Ger., *unterer Zwillingsmuskel.* A small muscle which arises from the upper back portion of the tuberosity of the ischium and passes along the lower border of the extra-pelvic portion of the obturator internus muscle to be inserted into its tendon, acting as a rotator of the thigh outward. [C; L, 142, 332.] Cf. MARSUPIALIS.—**Gemelli of the tibia.** See BIFEMORO-CALCANEUS.—**G. superior.** Ger., *oberer Zwillingsmuskel.* The smaller of the gemelli muscles. It arises from the spine of the ischium, and, after passing along the upper margin of the extra-pelvic portion of the obturator internus, is blended with its tendon. [L, 142, 332.]—**Gemelli suræ.** See GASTROCNEMIUS.

GEMEN (Ar.), n. The *Pastinaca opopanax.* [B, 121 (*a*, 24).]

GEMENGE (Ger.), n. Ge^2-me^{2}n^2′e^2. A mechanical mixture of two or more bodies. [L, 135 (*a*, 14).] Cf. GEMISCH.

GEMENGSEL (Ger.), n. Ge^2-me^{2}n^2′ze^{2}l. See CONGERIES.

GEMINAL, adj. Je^{2}m′i^{2}n-a^{2}l. Of or pertaining to either of the gemina. [I, 98.]

GEMINATE, GEMINATED, adj's. Je^{2}m′i^{2}n-at, -e^{2}d. Lat., *geminatus.* Fr., *géminé.* Ger., *gepaart*, *gezweit.* Sp., *geminado.* Arranged in pairs (said of plant-organs). [B, 1, 121, 123 (*a*, 24).]

GEMINATION, n. Je^{2}m-i^{2}n-a′shu^{2}n. Lat., *geminatio* (from *geminare*, to double). Fr., *gémination.* Ger., *Verdoppelung*, *Paarung.* 1. See DUPLICATION. 2. The process of rendering or becoming, or the state of being, gemellary.

GEMINI (Lat.), n. m. pl. Je^{2}m(ge^{2}m)′i^{2}n-i(e). Pl. of *geminus* (see GEMELLUS).

GEMINIFLORATE, GEMINIFLOROUS, adj's. Je^{2}m-i^{2}n-i^2-flo′rat, -ru^{2}s. Lat., *geminiflorus* (from *geminus*, a twin, and *flos*, a flower). Fr., *géminiflore.* Ger., *doppelblüthig.* Having two flowers growing together. [B, 1, 19, 123 (*a*, 24).]

GEMINIFORMIS [E. Coues] (Lat.), n. m. Je^{2}m(ge^{2}m)-i^{2}n-i^2-fo^{2}rm′i^{2}s. See GEMELLUS *inferior.*

GEMINIPOL (Ger.), n. Ga′me-ne-pol. See *Geminous* POLE.

GEMINOUS, adj. Je^{2}m′i^{2}n-u^{2}s. See GEMELLARY.

GEMINUM, n., n. of adj. *geminus.* Je^{2}m(ge^{2}m)′i^{2}n-u^{2}m(u^{4}m). A name proposed by B. G. Wilder for either pair of mesencephalic (optic) lobes. [I, 98.]

GEMINUS (Lat.), adj. and n. m. Je^{2}m(ge^{2}m)′i^{2}n-u^{2}s(u^{4}s). Fr., *géminé* (adj.), *jumeau* (n.). Ger., *gezweit* (adj.), *Zwilling* (n). See GEMELLUS.

GEMISCH (Ger.), n. Ge^2-mi^{2}sh′. A chemical compound. [L, 135 (*a*, 14).] Cf. GEMENGE.

GEMISCHT (Ger.), adj. Ge^2-mi^{2}sht′. Mixed. [L, 46 (*a*, 21).]—**Schlechtg'.** See DYSCRATICUS.

GEMITORES (Lat.), n. Je^{2}m(ge^{2}m)-i^2-tor′ez(as). From *gemere*, to sigh, groan. See COLUMBÆ.

GÉMISSEUR (Fr.), n. Zha-mes-su^{8}r. A person affected with insanity characterized by continual groaning. [A, 301, 385.]

GEMITUS (Lat.), n. m. Je^{2}m(ge^{2}m)′i^{2}t-u^{2}s(u^{4}s). Gr., στεναγμός. Fr., *gémissement.* Ger., *Seufzen.* A sighing or groaning. [A, 322.]

GEMMA (Lat.), n. f. Je^{2}m(ge^{2}m)′ma^3. Gr., λίθος (1st def.), βλάστη (2d def.). Fr., *gemme*, *bourgeon* (2d def.). Ger., *Gemme* (1st def.), *Edelstein* (1st def.), *Auge* (2d def.), *Knospe* (2d def.). 1. A gem, a precious stone. 2. See BUD.—**G. alectoria.** See ALECTORIA (1st def.).—**G. floralis, G. florifera, G. floripara.** A flower-bud. [B, 19 (*a*, 24).]—**G. foliifera, G. foliipara.** A leaf-bud. [B, 19 (*a*, 24).]—**G. lateralis.** See *Lateral* BUD.—**G. oculi.** An old term for the crystalline lens. [F.]—**Gemmæ populaginis.** The flower-buds of *Caltha palustris.* [B, 180 (*a*, 24).]—**G. proventitia.** See *Latent* BUD.—**G. terminalis.** See *Terminal* BUD.

GEMMACEOUS, adj. Je^{2}m-ma′shu^{2}s. From *gemma*, a bud. Fr., *gemmaire*, *gemmacé.* Ger., *knospenartig.* Bud-like. [A, 385.]

GEMMAGE (Fr.), n. Zhe^{2}m-ma^{2}zh. From *gemma*, a bud. The incision of pines to secure the resin; if made on one side only so as to preserve the tree, it is called *g. à vie*, and if on all sides at once, which generally kills the tree, *g. à mort*, or *g. à pin perdu.* [B, 121 (*a*, 24); "Proc. of the Am. Pharm. Assoc.," xxvi (*a*, 14).]

GEMMATE, adj. Je^{2}m′at. Lat., *gemmatus* (from *gemmare*, to bud). Ger., *beknospt.* It., *gemmato.* Provided with buds. [B, 123 (*a*, 35).]

GEMMATION, n. Je^{2}m-ma′shu^{3}n. Lat., *gemmatio* (from *gemmare*, to bud). Fr., *g.*, *bourgeonnement.* Ger., *Knospung*, *Knospenbildung.* Syn.: *budding.* 1. A variety of generation in which only a small part of the parent organism is detached and becomes developed into a similar organism. 2. In botany, the production and development of buds; also cell division in cryptogams. [A, 12; L; B, 104 (*a*, 24).] 3. In zoology, the reproduction of a lost part (*e. g.*, the claw of a crustacean). [L.]—**Basal g., Basilar g.** In certain compound corals, a variety of g. in which the buds spring mediately from the base of the original polype, or from processes of the latter. [L, 121.]—**Calicular g.** A variety of g. in certain compound corals, in which the buds spring from the margins of the calice. [L, 121.]—**Continuous g.** The production of a series of buds similar to the parent organism, which remain attached, together forming a compound organism or colony. [L, 14.]—**Discontinuous g.** Reproduction by buds which are detached from the parent organism. [L, 147.]—**Entogastric g., Internal g.** Of Huxley, a method of multiplication observed in certain of the *Polyzoa*, in which the bud grows out from the wall of the gastric cavity and eventually passes into it on its way outward. [A, 12.]—**Lateral g., Parietal g.** In certain compound corals, a variety of g. in which the buds are given off from the sides of the original polype. [L, 121.]

GEMME (Fr.), n. Zhe^{2}m. 1. A clear, concrete drop of exuding resin, or the like. [A, 385.] 2. See BOURGEON and GEMMA.

GEMME (Ger.), n. Ge^{2}m′me^2. 1. See GEMMA. 2. A pear-shaped swelling of the fine filaments of the *Mucorini*, consisting of oily protoplasm and a thick membrane. [A, 396 (*a*, 21).]

GEMMIDIE (Fr.), n. Zhe^{2}m-me-de. From *gemma*, a bud. The reproductive apparatus of the *Florideæ.* [B, 121 (*a*, 24).]

GEMMIFEROUS, adj. Je^{2}m-i^{2}f′e^{2}r-u^{2}s. Lat., *gemmiferus*, *gemmifer* (from *gemma* [*q. v.*], and *ferre*, to bear). Fr., *gemmifère.* Ger., *knospentragend.* Bearing buds. [B, 121, 123 (*a*, 24).]

GEMMIFICATION, n. Je^{2}m-i^2-fi^2-ka′shu^{3}n. Lat., *gemmificatio* (from *gemma*, a bud, and *facere*, to make). Ger., *Knospenbildung.* See GEMMATION.

GEMMIFLORATE, adj. Je^{2}m-i^2-flo′rat. Lat., *gemmiflorus* (from *gemma* [*q. v.*], and *flos*, a flower). Fr., *gemmiflore.* Ger., *sprossenblüthig.* Having bud-like flowers. [L, 41.]

GEMMIFORM, adj. Je^{2}m′i^2-fo^{2}rm. Lat., *gemmiformis* (from *gemma* [*q. v.*], and *forma*, form). Fr., *gemmiforme.* Ger., *knospenförmig*, *sprossenförmig.* Of flowers, bud-like, surrounded by leaves. [L, 41, 180.]

GEMMIN (Fr.), adj. Zhe^{2}m-a^{2}n^2. See GEMMACEOUS.

GEMMINE (Fr.), n. Zhe^{2}m-en. Turpentine exuded in drops. [A, 385.]

GEMMIPARITY, n. Je^{2}m-i^2-pa^{2}r′i^{2}t-i^2. From *gemma* (*q. v.*), and *parere*, to bring forth. Fr., *gemmiparité*, *gemmiparie.* See *Gemmiparous* GENERATION.

GEMMIPAROUS, adj. Je^{2}m-i^{2}p′a^{2}r-u^{2}s. Lat., *gemmiparus.* Fr., *gemmipare.* Ger., *knospentragend* (1st def.). 1. Bearing or producing buds. [B, 1, 123 (*a*, 24).] 2. Reproduced by buds. [A, 385.]

GEMMULA (Lat.), n. f. Je^{2}m(ge^{2}m)′u^{2}l(u^{4}l)-a^3. Dim. of *gemma.* See GEMMULE.—**Gemmulæ Hobokenii.** Syn.: *genicula* (Schulz and Trew), *cellulæ Ruyschii*, *varices arteriarum* (Brendel), *aneurysmata* (Eysson), *noduli* (Hoboken), *cochleæ* (Hebenstreit), *tubercula* (Böhmer), *elevationes arcuatæ*, *eminentiæ læves* (Wrisberg). Of Hyrtl, the spaces between the valves of the umbilical arteries; so called in honor of Hoboken, the discoverer of those valves. [A, 19.]—**G. prolifica.** Ger., *Brutknöspchen.* A bud capable of developing into a new plant. [B, 123 (*a*, 24).]—**G. racemosa.** See ANABLASTEMA *glomerulosum.*

GEMMULAIRE (Fr.), adj. Zhe^2-mu^6-la^{2}r. Pertaining to a gemmule. [*a*, 35.] See FENTE *g.*

GEMMULE, n. Je^{2}m′u^{2}l. Lat., *gemmula* (dim. of *gemma*, a bud). Fr., *g.* Ger., *Knöspchen.* 1. That part of the plumule at the top of the embryo. 2. The stellule of mosses. 3. The ovule. 4. In the pl., *g's*, of Darwin (1868), the minute particles or granules which were supposed to be given off by the different cells of the body to form the sexual elements (ova and spermatozooids). [B, 1, 19, 121, 123 (*a*, 24); J, 26.] 5. A sponge spore. 6. A ciliated embryo in many *Cœlenterata.* [L, 147.]

GEMMULIFEROUS, adj. Je^{2}m-u^{2}l-i^{2}f′e^{2}r-u^{2}s. From *gemmula*, a little bud, and *ferre*, to bear. Bearing gemmules. [L, 56.]

GEMONIS (Lat.), n. f. Je^{2}m(ge^{2}m)-on′i^{2}s. Gr., γεμωνίς. See AETITE.

GEMS (Ger.), n. Ge^{2}ms. See ANTILOPE *rupicapra.*—**G'ballen.** See *G'kugeln.*—**G'bock.** See ANTILOPE *oryx.*—**G'kugeln.** See BEZOAR *germanicus* and under ANTILOPE *rupicapra.*

GEMSE (Ger.), n. Ge^{2}ms′e^2. See GEMS.—**G'ngeschlecht.** See ANTILOPE.—**G'nhorn.** The genus *Martynia.* [B, 121 (*a*, 24).]—**G'nkraut.** The *Doronicum pardalianches.* [B, 121 (*a*, 24).]—**G'nkugel.** See BEZOAR *germanicus* and under ANTILOPE *rupicapra.*

GEMSWURZ (Ger.), n. Ge^{2}ms′vurts. 1. The genus *Doronicum.* 2. The *Primula auricula.* [B, 180 (*a*, 24).]—**Gegliederte G.** See DORONICUM *scorpioides.*—**Gemeine G.** See DORONICUM *pardalianches.*

GEMURMEL (Ger.), n. Ge^2-murm′e^{2}l. See MURMUR.

GEMURSA (Lat.), n. f. Ge^{2}m-u^{2}r(u^{4}r)′sa^3. An old term for a small swelling between the toes, probably a corn. [G.] See CLAVUS.

GEMÜSE (Ger.), n. Ge^2-mu^{6}s′e^2. Green edible vegetables. [A, 450.]—**Garteng'.** Garden vegetables.—**G'ähnlich.** Oleraceous. [L, 43.]

GEMÜTH (Ger.), n. Ge^2-mu^{6}t′. See ANIMUS.—**G'saffect, G'sanregung.** An affection of the mind.—**G'sart.** A temperament or disposition. [A, 521.]—**G'saufregung.** Mental excitement.—**G'sbeschaffenheit.** See *G'sart.*—**G'sbewegung.** Emotion. [A, 521.]—**G'sblödsinn, G'sblödsucht.** Imbecility. [L, 57.]—**G'seigenheit.** See *G'sart.*—**G'skrankheit, G'sleiden.** Emotional distress, or depression; melancholia. [*a*, 31.]—**G'sregung.** Emotional excitement. [A, 521.]—**G'sreizbarkeit.** Mental irritability. [A, 521.]—**G'sruhe.** Mental tranquillity. [L, 43.]—**G'sstimmung.** A mental mood. [A, 521.]—**G'sstumpfheit.** Mental hebetude. [A, 521.]—**G'sunruhe.** Mental inquietude. [A, 521.]—**G'sveränderung.** A morbid mental change. [A, 521.]—**G'szustand.** A frame of mind. [A, 521.]

GEN, n. Persian manna; according to some, an exudation caused by insects on the stems of *Tamarix;* according to other authorities, Alhagi manna (*q. v.*). [B, 18, 19, 121 (*a*, 24).] Cf. *Tamarisk* MANNA.

GENA (Lat.), n. f. Je(ge^2)′na^3. Gr., γένυ. Fr., *joue.* Ger., *Backe, Wange.* 1. The side of the face, the cheek. 2. In ornithology, the feathered side of the lower mandible. [L, 221, 343.]

GENABELT (Ger.), adj. Ge^2-na^{3}b′e^{2}lt. See UMBILICATE.

GENAGELT (Ger.), adj. Ge^2-na^{3}g′e^{2}lt. Unguiculate. [B, 123 (*a*, 24).]

GENAGT (Ger.), adj. Ge^2-na^{3}gt′. See ERODED.

GENÄHERT (Ger.), adj. Ge^2-na′e^{2}rt. See APPROXIMATE.

GENAL, adj. Jen′a^{2}l. From *gena*, a cheek. Fr., *génal.* Pertaining to the cheeks. [L, 41.]

GENARBT (Ger.), adj. Ge^2-na^{3}rbt′. Scarred, cicatrized. [L, 80.]

GENCIVAL (Fr.), adj. Zha^{3}n^2-se-va^{3}l. See GINGIVAL.

GENCIVE (Fr.), n. Zha^{3}n^2-sev. See GINGIVA.

GENCIVITE (Fr.), n. Zha^{3}n^2-se-vet. See GINGIVITIS.

GENDA-PURA (Malay), n. The *Hibiscus abelmoschus.* [B, 121 (*a*, 24).]

GENDARME (Fr.), n. Zha^{3}n^2-da^{3}rm. The *Agaricus maleficus.* [B, 121, 173 (*a*, 24)]

GENDARUSSA (Lat.), n. f. Je^{2}n(ge^{2}n)-da^{2}r(da^{3}r)-u^{3}s(u^{4}s)′sa^3. A section of the genus *Justicia.* The *Gendarusseæ* (Fr., *gendarussées*) of Nees (1832), Reichenbach, Endlicher, Spach, and Meissner are a division of the *Justicieæ* (or, of Nees [1847], a tribe of *Acanthaceæ*), comprising *Herpetacanthus. Adhatoda*, etc., and corresponding in part to the *Eujusticieæ* of Bentham and Hooker. [B, 42, 121, 170 (*a*, 24).]—**G. rosea.** The *Justicia g.* [*a*, 24.]—**G. sericea.** Of Kostel, the *Justicia sericia.* [B, 42, 180 (*a*, 24).]—**G. tranquebariensis.** Of Nees. the *Adhatoda tranquebariensis.* [B, 172 (*a*, 35).]—**G. vulgaris.** The *Justicia g.* [B, 42, 172, 180 (*a*, 24).]

GÊNE (Fr.), n. Zhe^{2}n. 1. The marc of grapes. 2. Embarrassment in the performance of a function. [A, 385.]

GENEA (Lat.), n. f. Je^{2}n(ge^{2}n)′e^2-a^3. Gr., γενεά. 1. Generation. 2. Birth. 3. Descent. 4. A genus of hypogæous *Fungi* with a thick, warty envelope. [B, 121 (*a*, 24).]

GENEAGENESIS (Lat.), n. f. Je^{2}n(ge^{2}n)-e^2-a^3-je^{2}n(ge^{2}n)′e^{2}s-i^{2}s. Gen., *-genes'eos* (*-gen'esis*). From γενεά, a race, and γένεσις, an origin. See *Alternate* GENERATION.

GENEANTHROPY, n. Je^{2}n-e-a^{2}n′thro-pi^2. See ANTHROPOGENY.

GENEESBLAADEN (Dutch), n. pl. At the Cape of Good Hope, the leaves of *Solanum niveum.* ["Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]

GENEIAS (Lat.), n. f. Je^{2}n(ge^{2}n)-i′(e^2′i^2)-a^{2}s(a^{3}s). Gen., *-ei'ados* (*-is*). Gr., γενειάς. 1. The beard. 2. The chin. 3. Of Galen, a certain bandage for the chin. [A, 325, 387.]

GENEIGT (Ger.), adj. Ge^2-nigt′. Bent, inclined. [B, 123 (*a*, 24).]—**Gegeneinanderg'.** See CONNIVENS (1st def.).—**G'heit.** Inclination. [L, 80.]

GENEION (Lat.), n. n. Je^2(ge^2)-ni′(ne^2′i^2)-o^{2}n. Gr., γένειον. See GENEIAS (1st and 2d def's).

GÉNÉPI (Fr.), n. Zha-na-pe. Lat., *genippi* (seu *geneppi*) *herba.* Ger., *Geneppikraut, Genippikraut.* Genipi; a term for many Alpine composite plants, especially *Artemisia* and *Achillea*, used in the preparation of aromatic and stimulant beverages. [B, 121, 180 (*a*, 24).] See ABSINTHIUM *alpinum.*—**G. bâtard.** The *Achillea nana.* [B, 121 (*a*, 24).]—**G. blanc.** The *Artemisia Mutellini* and the *Achillea lanata.* [B, 173 (*a*, 24).]—**G. des Alpes.** The *Artemisia glacialis.* [B, 173 (*a*, 24).]—**G. noir.** The *Artemisia spicata.* [B, 173 (*a*, 24).]—**G. vrai** [Fr. Cod.]. See ARTEMISIA *glacialis* and ACHILLEA *moschata.*

GENEPISTASIS (Lat.), n. f. Je^{2}n(ge^{2}n)-e^{2}p-i^{2}s′ta^3-si^{2}s. Gen., *-istas'eos* (*-is'tasis*). From γεννᾶν, to produce, and ἐφιστάναι, to place upon. The separation of organic forms into species. [J, 193.]

GENEPPIKRAUT (Ger.), n. Ge^{2}n-e^{2}p′pi^2-kra^3-u^{4}t. See GÉNÉPI.

GENERAL, adj. Je^{2}n′u^{5}r-a^{2}l. Lat., *generalis* (from *genus*, an origin). Gr., καθολικός. Fr., *général.* Ger., *allgemein.* It., *generale.* Sp., *g.* Pertaining to the whole system, etc., as distinguished from its individual parts.

GENERALIZATION, n. Je^{2}n-u^{5}r-a^{2}l-i^2-za′shu^{3}n. From *genus*, an origin. Fr., *généralisation.* Ger., *Verallgemeinerung.* It., *generalizzazione.* Sp., *generalización.* 1. The process of rendering or becoming, or the state of being, general or diffused: the spread of a local morbid process through the system or over the general surface. 2. The deduction and promulgation of broad principles from the observation of concrete phenomena.

GENERALIZED, adj. Je^{2}n′u^{5}r-a^{2}l-izd. Fr., *généralisé.* Ger., *verallgemeinert.* Showing generalization (1st def.).

GENERANT, adj. Je^{2}n′e^{2}r-a^{2}nt. From *generare*, to beget. See GENERATIVE.

GENERATIO (Lat.), n. f. Je^{2}n(ge^{2}n)-e^{2}r-a(a^3)′shi^2(ti^2)-o. Gen., *-o'nis.* See GENERATION.—**G. æquivoca.** See *Spontaneous* GENERATION.—**G. alterna.** See *Alternate* GENERATION.—**G. homogenea.** See *Univocal* GENERATION.—**Generationum vicissitudo.** See *Alternation of* GENERATION.—**G. originaria.** See *Spontaneous* GENERATION.—**G. ovovivipara.** See *Ovoviviparous* GENERATION.—**G. primigena, G. primitiva.** See *Spontaneous* GENERATION.—**G. sexualis.** See GAMOGENESIS.—**G. spontanea.** See *Spontaneous* GENERATION.

GENERATION, n. Je^{2}n-e^{2}r-a′shu^{3}n. Gr., γένεσις, γονή. Lat., *generatio* (from *generare*, to beget). Fr., *génération.* Ger., *Zeugung, G.* It., *generazione.* Sp., *generación.* 1. Reproduction; the act or function of begetting or forming a new organism. [K.] 2. The assemblage of individuals constituting the entire immediate progeny of given parents.—**Accrementitial g.** Fr., *génération accrémentitielle* (ou *par accrémentition*). See ACCREMENTITION.—**Alternate g., Alternation of g's.** Lat., *generatio alterna.* Fr., *génération alternante.* Ger., *abwechselnde Zeugung.* An alternation of agamogenesis with gamogenesis; in the same type, one or several sexless g's intervening between the sexual g's. [L.]—**Asexual g.** See AGAMOGENESIS.—**Changeable g.** See *Alternate g.*—**Endogenous g.** Fr., *génération endogène.* In botany, reproduction by the multiplication of the nucleus in the formation of pollen in the embryo-sac, etc. [B, 104 (*a*, 24).]—**Equivocal g.** Lat., *generatio œquivoca.* Fr., *générationéquivoque.* See *Spontaneous g.*—**Fissiparous g.** Fr., *génération fissipare* (ou *par scission*). Ger., *Fissionsg'.* It., *generazione fissipara, scissione.* See FISSION.—**Gemmiparous g.** Fr., *gemmiparité. génération par gemmation.* Ger., *Knospeng', Knospung.* See GEMMATION (1st def.).—**G. by fecundation.** See FECUNDATION.—**G. by fission.** See FISSION.—**G. by gemmation.** See GEMMATION (1st def.).—**G'swechsel** (Ger.), **Heteromorphous g.** Fr., *génération hétéromorphique.* See *Alternation of g's.*—**Interstitial g.** Fr., *génération interstitielle.* See ACCREMENTITION.—**Marsupial g.** Fr., *génération marsupiale.* Ger., *beutelthierische Zeugung.* A mode of g. among certain animals (*e. g.*, the opossum) in which the young are undeveloped at birth, and are received into a pouch in the skin of the parent. [K.]—**Non-sexual g.** See AGAMOGENESIS.—**Oviparous g.** Fr., *oviparité.* Ger., *eierlegende Zeugung.* A mode of g. in which the new animal is hatched from an egg. [K.]—**Ovoviviparous g.** Lat., *generatio ovovivipara.* Fr., *ovoviviparité.* G. in which the young of an animal are hatched from the egg before it has left the body of the mother. [K.] Cf. *Oviparous g.*—**Regular g.** See *Univocal g.*—**Sexual g.** Lat., *generatio sexualis.* Fr., *génération sexuelle.* Ger., *geschlechtliche Zeugung.* See GAMOGENESIS.—**Spontaneous g.** Lat., *generatio spontanea* (seu *œquivoca*, seu *primitiva*). Fr., *génération spontanée.* Ger., *spontane* (*willkührliche*) *Erzeugung.* It., *generazione spontanea, eterogenia.* Sp., *generación espontánea.* Syn.: *abiogenesis.* The formation of a living organism from inanimate matter, such organism having no parent. The theory has been held, but has never been proved to be true.—**Univocal g.** Lat., *generatio homogenea.* 1. Of ancient writers, viviparous g. 2. The production of an organism by parents of the g. (2d def.) next preceding. [K.]—**Virginal g.** See PARTHENOGENESIS.—**Viviparous g.** Fr., *viviparité.* Ger., *lebendige Zeugung.* The ordinary mode of g. among the higher animals, in which the young are brought forth. [K.]

GÉNÉRATION (Fr.), n. Zha-na-ra^3-se-o^{2}n^2. See GENERATION.—**G. alternante.** See *Alternate* GENERATION.—**G. par accrémentition.** See ACCREMENTITION.—**G. par bourgeonnement, G. par gemmation.** See GEMMATION (1st def.).—**G. par scission.** See FISSION.

GENERATIVE, adj. Je^{2}n′e^{2}r-at-i^{2}v. Lat., *generativus* (from *generare*, to beget). Fr., *générateur. génératif.* Ger., *Erzeugungs-, generativ.* Concerned in or effecting generation. Cf. GENITAL.

GÉNÉRESCENCE (Fr.), n. Zha-na-re^{2}s-sa^{3}n^{2}s. The state of being in process of generation. [A. 385.]

GÉNÉRESCENT (Fr.), adj. Zha-na-re^{2}s-sa^{3}n^2. In a state of *générescence.* [A. 385.]

GÉNÉRESCIBLE (Fr.), adj. Zha-na-re^{2}s-se-bl'. Capable of *générescence.* [A, 385.]

GENERIC, adj. Je^{2}n-e^{2}r′i^{2}k. Lat., *genericus* (from *genus* [*q. v.*]). Fr., *générique.* Ger., *generisch.* 1. Pertaining to a genus. [L, 343.] 2. See HEREDITARY.

GENERKRAUT (Ger.), n. Gan′e^{2}r-kra^3-u^{4}t. The *Campanula cervicaria.* [B, 180 (*a*, 24).]

GENEROUS, adj. Je^{2}n′e^{2}r-u^{3}s. Lat., *generosus.* Fr., *généreux.* Ger., *geistreich, edel.* Of wine, containing a large proportion of alcohol. [L.]

GENERVT (Ger.), n. Ge^2-ne^{2}rft'. 1. Full of sinews, sinewy. [L, 80.] 2. See NERVED.

GENÈSE (Fr.), n. Zhe^2-ne^{2}z. See GENESIS.—**G. cellulaire.** See CELL-*genesis.*

GENESIAC, GENESIAL, adj's. Je^{2}n-es'i^2-a^{2}k, -a^{2}l. Pertaining to or concerned in procreation.

GENESIC, adj. Je^{2}n-es'i^{2}k. Lat., *genesicus.* Fr., *génésique.* Ger., *Genesis* (oder *Zeugung*) *betreffend.* See GENETIC.

GENESIOLOGY, n. Je^{2}n-es''i^2-o^{2}l'o-ji^2. Lat., *genesiologia* (from γένεσις, generation, and λόγος, understanding). Ger., *Erzeugungslehre.* The science of generation.

GENESIS (Lat.), n. f. Je^{2}n(ge^{2}n)'e^{2}s-i^{2}s. Gen., *genes'eos* (*gen'esis*). Gr., γένεσις (from γεννᾶν, to engender). Fr., *genèse, génésie.* Ger., *Zeugung, Erzeugung.* 1. The act, mode, or condition of reproduction; generation. [L, 343.] 2. A mode or process of production.

GENEST, n. Je^{2}n-e^{2}st'. Lat., *genesta, genista.* The *Spartium scoparium.* [A, 505 (*a*, 21).]

GENESTA (Lat.), n. f. Je^{2}n(ge^{2}n)-e^{2}st'a^3. See GENISTA.

GENESTADE (Fr.), n. Zhe^2-ne^{2}s-ta^{3}d. From *genesta,* the broom-plant. Cystitis in ruminants, probably caused by their eating the *Genista tinctoria.* [A, 385; L, 41.]

GENESTRA (Lat.), n. f. Je^{2}n(ge^{2}n)-e^{2}st'ra^3. See GENISTA.

GENESTRALE (Fr.), **GENESTRELLE** (Fr.), **GENESTROLE** (Fr.), n's. Zhe^{2}n-e^{2}s-tra^{3}l, -tre^{2}l, -trol. The *Genista tinctoria.* [B, 121 (*a*, 24); L, 41 (*a*, 21).]

GENESUNG (Ger.), n. Ge^2-naz'un^2. See CONVALESCENCE.

GENÊT (Fr.), n. Zhe^2-na. From *genista,* the broom-plant. The genera *Genista* and *Spartium.* [B, 173 (*a*, 14).]—**Décoction de g. à balais (ou g. composée).** See *Decoctum* SCOPARII.—**G. à balais.** The *Spartium scoparium.* [B, 173 (*a*, 24).]—**G. à larges feuilles.** See GENISTA *latifolia.*—**G. aspalate.** See GENISTA *aspalatoides.*—**G. cendré.** See GENISTA *cinerea.*—**G. commun.** The *Spartium scoparium.* [B, 173 (*a*, 24).]—**G. des Canaries.** See GENISTA *canariensis.*—**G. des champs.** The *Passerina stellera.* [B. 121 (*a*, 24).]—**G. de Sibérie.** The *Genista sibirica.* [B, 173 (*a*, 24).]—**G. d'Espagne.** See SPARTIUM *junceum.*—**G. des rochers.** See GENISTA *saxatilis.*—**G. des teinturiers.** See GENISTA *tinctoria.*—**G. épineux.** The *Ulex compositus.* [B, 121, 173 (*a*, 24).]—**G. griot.** See GENISTA *purgans.*—**G. jonciforme.** See SPARTIUM *junceum.*—**G. purgatif.** See GENISTA *purgans.*—**G. velu.** See GENISTA *humifusa.*—**Tisane de g. à balais.** See *Decoctum* SCOPARII.—**Tisane de g. composée.** See *Decoctum* SCOPARII *compositum.*

GENETALIS (Lat.), adj. Je^{2}n(ge^{2}n)-e^{2}t-a(a^3)'li^{2}s. See GENITAL and GENITALIS.

GENETHE (Fr.), n. Zhe^2-ne^{2}t. The *Narcissus pseudonarcissus.* [B, 121 (*a*, 24).]

GENETIC, GENETICAL, adj's. Je^{2}n-e^{2}t'i^{2}k, -i^{2}k-a^{2}l. Lat., *geneticus* (from γίγνεσθαι, to come into being). Fr., *génétique.* Ger., *genetisch.* 1. Of the older writers, pertaining to reproduction or to the reproductive organs; of drugs, acting on the genital organs; of diseases, affecting those organs. 2. Causative, formative.

GENETTE (Fr.), n. Zhe^2-ne^{2}t. 1. The *Narcissus poeticus* and the *Genista tinctoria.* 2. In zoology, a family of the *Viverridæ.* [B, 121, 173 (*a*, 24); L, 87 (*a*, 14).]

GENEVA, n. Je^{2}n-e'va^3. See GIN.

GENÈVRE (Fr.), n. Zhe^2-ne^{2}vr'. The *Juniperus communis.* [B, 121, 173 (*a*, 24).]

GENÉVRETTE (Fr.), n. Zhe^2-na-vre^{2}t. A beverage obtained by fermentation of the berries of *Juniperus communis.* [B, 173 (*a*, 24).]

GENÉVRIER (Fr.), n. Zhe^2-na-vre-a. The genus *Juniperus,* especially the *Juniperus communis.* [B, 173 (*a*, 24).]—**Cérat de g.** See *Ceratum* JUNIPERI *virginianæ.*—**Décoction de bois de g.** A preparation made by boiling 1 part of juniper-wood in 32 parts of water down to one half. [B, 119 (*a*, 14).]—**Essence de baies de g.** See *Oil of* JUNIPER.—**G. à gros fruit.** The *Juniperus drupacea.* [B, 173 (*a*, 24).]—**G. à l'encens.** The *Juniperus hispanicus.* [B, 173 (*a*, 24).]—**G. commun** [Fr. Cod.]. The *Juniperus communis.* [B, 173 (*a*, 24).]—**G. des Barbades.** The *Juniperus barbadensis.* [B, 173 (*a*, 24).]—**G. des Bermudes.** The *Juniperus bermudiana.* [B. 173 (*a*, 24).]—**G. de Phénicie.** The *Juniperus phœnicea.* [B, 173 (*a*, 24).]—**G. de Suède.** The *Juniperus communis,* var. *suecica.* [B, 173 (*a*, 24).]—**G. de Virginie.** The *Juniperus virginiana.* [B, 173 (*a*, 24).]—**G. de Lycia.** The *Juniperus lycia.* [B, 173 (*a*, 24).]—**G. ordinaire.** See JUNIPERUS *communis.*—**G. oxycèdre.** The *Juniperus oxycedrus.* [B, 46 (*a*, 14).]—**G. sabine.** The *Juniperus sabina.* [B. 46 (*a*, 14).]—**Goudron de g., Huile empyreumatique de g.** [Sard. Ph., 1773]. See JUNIPER *tar.*—**Huile essentielle de bois de g.** See *Oil of* JUNIPER *wood.*

GENGELI, GENGILION, n's. In India, the *Sesamum indicum.* [B, 93 (*a*, 14).]

GENI (Fr.), n. pl. Zhe^{2}n-e. See *Genial* TUBERCLES.

GENIAL, GENIAN, adj's. Je^{2}n-i'a^{2}l, -a^{2}n. Lat., *genianus* (from γένειον, the chin). Fr., *génien.* Of or pertaining to the chin. [L.]

GENICA (Lat.), n. n. pl. Je^{2}n(ge^{2}n)'i^{2}k-a^3. Remedies affecting the sexual organs; *e. g.,* aphrodisiacs, emmenagogues, parturifacients, etc. [B, 270.]

GENICELLA (Lat.), n. f. Je^{2}n(ge^{2}n)-i^2-se^{2}l(ke^{2}l)'la^3. The *Polygonatum officinale.* [B, 180 (*a*, 24).]

GENICK (Ger.), n. Ge^2-ni^{2}k'. The neck, the nucha, or the atlanto-axial articulation. [A, 523.]—**G'brechen, G'bruch.** Breaking of the neck. [A, 521.]—**Genickstarre.** See *Cerebro-spinal* MENINGITIS.

GENICULAR, adj. Je^{2}n-i^{2}k'u^{2}l-a^{3}r. Of or pertaining to a geniculum (2d def.). [I, 98.]

GENICULARIS (Lat.), n. f. Je^{2}n(ge^{2}n)-i^{2}k-u^{2}l(u^{4}l)-a(a^3)'ri^{2}s. An old name for the *Valeriana officinalis.* [B, 121 (*a*, 24).]

GENICULATA (Lat.), n. f. Je^{2}n(ge^{2}n)-i^{2}k-u^{2}l(u^{4}l)-a(a^3)'ta^3. See GENICELLA.

GENICULATE, adj. Je^{2}n-i^{2}k'u^{2}l-at. Gr., γονατώδης. Lat., *geniculatus* (from *geniculum,* a knot in the stalk of a plant). Fr., *géniculé.* Ger., *gekniet, gelenkig, knieförmig.* 1. Bent like a knee. [B. 1, 19, 123, 291 (*a*, 24).] 2. Having the knee (or corresponding part) differing in color from the remainder of the limb. [L, 180.]

GENICULATUM (Lat.), n. n. Je^{2}n(ge^{2}n)-i^{2}k-u^{2}l(u^{4}l)-at(a^{3}t)'u^{3}m(u^{4}m). From *geniculum,* a little knee. See *Geniculate* BODY.—**G. externum.** See *External geniculate* BODY.—**G. internum.** See *Internal geniculate* BODY.

GENICULUM (Lat.), n. n. Je^{2}n(ge^{2}n)-i^{2}k'u^{2}l(u^{4}l)-u^{3}m(u^{4}m). Dim. of *genu,* the knee. Ger., *Gelenk.* 1. The node of a stem of a plant. [B, 19, 123 (*a*, 24).] 2. Of Wilder, see *Geniculate* BODY.—**G. canalis facialis.** See GENU *aquæductus Falloppii.*

GENICULUS (Lat.), n. m. Je^{2}n(ge^{2}n)-i^{2}k'u^{2}l(u^{4}l)-u^{3}s(u^{4}s). From *genu,* a knee. Of Corda, one of the joints or elementary parts composing the hyphæ of *Fungi.* [B, 121 (*a*, 24).]

GÉNIE (Fr.), n. Zha-ne. See GENIUS.—**G. épidémique.** See *Epidemic* CONSTITUTION.

GENIESSBAR (Ger.), adj. Ge^2-nes'ba^{3}r. See EDIBLE.

GENIÈVRE (Fr.), n. Zhe^2-ne-e^{2}vr'. The *Juniperus communis.* [B, 121, 173 (*a*, 24).]—**Alcoolat de g.** See *Spiritus* JUNIPERI.—**Alcoolat de g. composé.** See *Spiritus* JUNIPERI *compositus.*—**Baie de g.** [Fr. Cod.]. The juniper-berry. [B, 5 (*a*, 24).]—**Eau de g.** See *Aqua* JUNIPERI.—**Eau-de-vie de g.** Gin. [B, 173.]—**Esprit de g.** See *Spiritus* JUNIPERI.—**Essence de g.** Oil of juniper. [B.]—**Extrait de g.** See *Extractum* JUNIPERI.—**Fumigation de g.** Fumigation produced by throwing juniper-berries on live coals. [L, 41 (*a*, 14).]—**Huile de g., Huile volatile de g.** See *Oil of* JUNIPER.—**Hydrolé de g., Infusion de g.** See *Infusum* JUNIPERI.—**Oléosucre de g.** See *Elæosaccharum* JUNIPERI.—**Rob de g.** See *Succus* JUNIPERI *inspissatus.*—**Teinture d'essence de g.** [Fr. Cod.]. See *Spiritus* JUNIPERI.

GENIO-EPIGLOTTICUS (Lat.), n. m. Je^{2}n(ge^{2}n)-i(e)''o(o^3)-e^{2}p-i^2-glo^{2}t(glot)'ti^{2}k-u^{3}s(u^{4}s). From γένειον, the chin, and ἐπιγλωττίς, the epiglottis. Syn.: *retractor glottidis, levator glottidis.* An anomalous bundle of fibres from the genio-glossus muscle inserted into the epiglottis. [L, 332.]

GENIO-GLOSSUS (Lat.), n. m. Je^{2}n(ge^{2}n)-i(e)''o(o^3)-glo^{2}s-(glos)'su^{3}s(su^{4}s). From γένειον, the chin, and γλῶσσα, the tongue. Fr., *génio-glosse.* Ger., *Kinnzungenmuskel.* A muscle which arises from the superior genial tubercle of the inferior maxilla and diverges like a fan to be inserted into the septum linguæ, the mucous membrane of the dorsum of the tongue. the root of the tongue. some of the latter fibres (the genio-epiglotticus) extending to the apex of the epiglottis, the side of the pharynx, and the body of the hyoid bone. It lies close to the median vertical plane of the tongue and is separated from its fellow by the septum linguæ and connective tissue. [L, 142, 332.]—**G.-g. accessorius.** A bundle of fibres separated from the inner side of the genio-hyo-glossus muscle. [L, 332.]

GENIO-HYO-GLOSSUS (Lat.), n. m. Je^{2}n(ge^{2}n)-i(e)''o(o^3)-hi-(hu^6)-o(o^3)-glo^{2}s(glos)'su^{3}s(su^4). See GENIO-GLOSSUS.

GENIO-HYOID, adj. Je^{2}n-i''o-hi'oid. Lat., *genio-hyoideus* (from γένειον, the chin, and ὑοειδές, the hyoid bone). Fr., *génio-hyoïde.* Pertaining to the chin and to the hyoid bone; as a n., see GENIO-HYOIDEUS.

GENIO-HYOIDEUS (Lat.), n. m. Je^{2}n(ge^{2}n)-i(e)''o(o^3)-hi(hu^6)-o(o^2)-i^{2}d(ed)'e^2-u^{3}s(u^{4}s). Lat., *genio-hyoideus.* Fr., *génio-hyoïdien.* Ger., *Kinnzungenbeinmuskel.* The genio hyoid muscle; in the solipeds, a muscle arising from the genial surface of the inferior maxilla, and attached to the free extremity of the appendix of the hyoid bone. It draws the hyoid bone toward the anterior part of the intermaxillary space. [L, 13.]—**G.-h. superior** [Ferrein]. Certain of the transverse fibres of the tongue connected with the lesser cornua of the hyoid bone. [L, 31, 332.]

GENION (Lat.), n. n. Je^{2}n(ge^{2}n)-i(e)'o^{2}n. See GENEION.

GENIO-PHARYNGEUS (Lat.), n. m. Jen(ge^{2}n)-i(e)''o(o^3)-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)'je^2(ge^2)-u^{3}s(u^{4}s). From γένειον, the chin, and φάρυγξ, the pharynx. Fr., *génio-pharyngien.* See MYLO-PHARYNGEUS and *Superior* CONSTRICTOR *of the pharynx.*

GENIOPLASTY, n. Je^{2}n-i'o-pla^{2}st-i^2. Lat., *genioplastice* (from γένειον, the chin, and πλαστική, plastic art. The plastic surgery of the chin.

GENIOSPORUM (Lat.), n. n. Je^{2}n(ge^{2}n)-i^2(e)-o^{3}s'po^{2}r-u^{3}m(u^{4}m). An East Indian genus of the *Labiatæ.* [B, 48 (*a*, 14).]—**G. prostratum.** Of Bentham, a species growing on the Coromandel coast and in Ceylon; said to be a febrifuge. [B, 309 (*a*, 35).]

GENIOSTOMA (Lat.), n. n. Jen(ge^{2}n)-i^2(e)-o^{2}st'o^{2}m-a^3. Gen., *-stom'atos* (*-is*). A genus of the *Loganiaceæ,* tribe *Euloganieæ.* [B, 42. 121 (*a*, 24).] Cf. ANASSERA (3d def.).—**G. borbonicum.** A species found in the Mauritius, having oval-oblongate leaves, and flowers in corymbs. [*a*, 24; "Nouv. rem.," May 8, 1889, p. 242.]—**G. febrifugum.** The *Strychnos pseudo-quina.* [B, 214 (*a*, 35).]

GENIP (Ger.), n. Ge^2-nep'. 1. The genus *Achillea.* 2. The genus *Artemisia.* [B, 48 (*a*, 14).]—**Falsche G.** See ACHILLEA *nana.*—**G. fruit.** The fruit of *Genipa americana.* [*a*, 24.]—**G'garbe.** The *Achillea moschata.* [B, 48 (*a*, 14).]—**G'kraut.** See ABSINTHIUM *alpinum.*—**G.-tree.** The *Genipa americana.* [B, 19, 275 (*a*, 24).]—

Schwarze G. The *Artemisia spicata.* [B, 48 (a, 14).]—**Wahre G.** The *Achillea moschata.* [B, 48 (a, 14).]—**Weisse G.** The *Artemisia rupestris* and the *Artemisia mutellina.* [B, 48 (a, 14).]—**West Indian g.-tree.** The *Melicocca bijuga* and the *Melicocca paniculata.* [B, 275 (a, 24).]

GENIPA (Lat.), n. f. Je^{2}n(ge^{2}n)′i^{2}p-a^3. Fr., *génipayer, génipape.* A genus of the *Genipeæ* (a series of the *Rubiaceæ*), tribe *Gardenieæ.* The *Geniparia* of Rafinesque is a subfamily of the *Dilarnia.* [B, 44, 121, 170 (a, 24).]—**G. americana.** Fr., *génipayer d'Amérique.* Ger., *amerikanischer G'baum.* A South American species having an agreeable and edible fruit (genipap). Its juice furnishes a fermented drink and a dye. The unripe fruit is used in cataplasms. [B, 19, 173, 180 (a, 24).]—**G. caruto.** Fr., *génipayer caruto.* A species found on the Orinoco. The juice of the fruit is used by the Indians as a cosmetic. [B, 173 (a, 24).]—**G. dumetorum.** See RANDIA *dumetorum.*—**G. edulis.** Fr., *génipayer comestible.* A species found in Cayenne, having edible fruit. [B, 173 (a, 24).]—**G. esculenta.** Fr., *génipayer alimentaire.* A species found in Cochin-China. The fruit is edible. [B, 173 (a, 24).]—**G. gardenia.** See *G. americana.*—**G. Merianæ.** Fr., *génipayer de Mérian.* A species found in Surinam. The fruit is eaten. [B, 173 (a, 24).]—**G. oblongifolia.** Fr., *génipayer oblong.* A species found in Peru having an edible fruit. [B, 173, 180 (a, 24).]

GENIPABEIRO (Port.), n. In Brazil, the *Genipa brasiliensis.* [B, 121 (a, 24).]

GENIPAP, GENIPAPO, n's. In Brazil, the *Genipa americana* and its fruit. [B, 121 (a, 24).]—**West Indian g.-tree.** The *Melicocca bijuga* and the *Melicocca paniculata.* [B, 275 (a, 24).]

GÉNIPAYER (Fr.), n. Zha^2-ne-pa-ya. The genus *Genipa.* [B, 121 (a, 24).]—**G. alimentaire.** See GENIPA *esculenta.*—**G. comestible.** See GENIPA *edulis.*—**G. d'Amérique.** See GENIPA *americana.*—**G. de Mérian.** See GENIPA *Merianæ.*—**G. oblong.** See GENIPA *oblongifolia.*

GENIPI (Lat.), n. n. indecl. Je^{2}n(ge^{2}n)′i^2-pi(pe). Fr., *génipi.* Ger., *Genipkraut.* A name applied to various species of *Achillea* and *Artemisia.* [B, 270.]—**Bastard g.** Fr., *génipi bâtard.* The *Achillea nana.* [A, 385.]—**Black g.** Lat., *g. atrum.* Fr., *génipi noir.* The *Artemisia eriantha* or *Artemisia vallesiaca.* [A, 385; B, 270.]—**G. album.** See *White g.*—**G. atrum.** The *Artemisia eriantha.*—**G'garbe** (Ger.). The *Achillea moschata.* [L, 80.]—**G. verum.** Fr., *génipi vrai.* 1. The *Achillea moschata, Achillea atrata,* and *Achillea nana.* 2. The *Artemisia glacialis.* [A, 385; B, 270.]—**Musk-g.** Fr., *génipi musqué* (ou *iva*). The *Achillea moschata.* [A, 301.]—**True g.** See *G. verum.*—**White g.** Lat., *g. album.* Fr., *génipi blanc.* The *Artemisia mutellina, Artemisia glacialis, Artemisia spicata,* and other species of *Artemisia.* [A, 385; B, 270.]

GENIPPUM (Lat.), n. n. Je^{2}n(ge^{2}n)-i^{2}p′pu^3(pu^{4}m). Of the pharmacists, see ABSINTHIUM *alpinum.*—**G. nigrum.** The *Artemisia vallesiaca.* [B, 180 (a, 24).]

GENISTA (Lat.), n. f. Je^{2}n(ge^{2}n)-i^{2}st′a^3. Fr., *genêt.* Ger., *Ginster.* It., *ginestra.* Sp., *g., ginesta.* Dyer's-broom, wood-waxen; of Linnæus, a genus of the *Leguminosæ,* tribe *Genisteæ.* The *Genistæ* (Fr., *genistées*; Ger., *Genisteen*) of Adanson are a section of the *Leguminosæ.* The *Genisteæ* are: 1. Of Brown, a subtribe of the *Curvembyæ diadelpæ*; and of De Candolle, Dumortier, Don, Koch, Endlicher, and Brongniart, a subtribe of the *Loteæ.* 2. Of Reichenbach, a division of the *Papilionaceæ.* 3. Of Bentham and Hooker, a tribe of *Leguminosæ,* suborder *Papilionaceæ.* [B, 34, 42, 121, 170, 180 (a, 24).]—**Cacumina genistæ (angulosæ, seu scopariæ).** The flowering tops of *Spartium scoparium.* [B, 180 (a, 24).]—**Cineres genistæ.** See *Sal genistæ.*—**Cortex genistæ.** The bark of *Spartium junceum.* [B, 95.]—**Extractum genistæ** [Hess. Ph., 1806]. A solid aqueous extract of the tops of *Genista tinctoria.* [B, 97 (a, 14).]—**Flores genistæ.** 1. The flowers of *Spartium scoparium.* 2. The flowers or flowering plant of *G. purgans* and *G. tinctoria.* [A, 319 (a, 21); B, 180 (a, 24).]—**Flores genistæ angulosæ (seu scopariæ).** See *Flores genistæ* (1st def.).—**G. acanthoclada.** A species found in Greece, Crete, and the islands of the Grecian Archipelago. [B, 214, 309, a, 35).]—**G. angulosa.** See SPARTIUM *scoparium.*—**G. aspalatoides.** Fr., *genêt aspalate.* A species indigenous to Africa; supposed to furnish some of the so-called aloes-wood. [B, 183 (a, 24).]—**G. canariensis.** Fr., *genêt des Canaries.* A species found in Spain and the Canary Islands. It yields a fragrant wood formerly mistaken for lignum Rhodii. [B, 5, 173, 180 (a, 24).]—**G. erinacea.** The *Anthyllis erinacea.* [B, 180 (a, 24).]—**G. herbacea.** See *G. sagittalis.*—**G. hirsuta.** See SPARTIUM *scoparium.*—**G. hispanica.** See SPARTIUM *junceum.*—**G. horrida.** Large-spined broom; a species found in southern Europe, formerly used as a tonic and astringent. [B, 180 (a, 24).]—**G. inermis.** See *G. tinctoria.*—**G. juncea.** See SPARTIUM *junceum.*—**G. latifolia.** Fr., *genêt à large feuilles.* A broad-leaved variety of *G. tinctoria.* [B, 173 (a, 24).]—**G. monosperma.** A species found in southern Europe and northern Africa. The Arabs use the root in hepatic complaints and in hypochondriasis. The leaves, macerated in water, are applied to sores. [B, 180 (a, 24).]—**G. nervata, G. ovata.** Species found in Hungary and Italy, used like *G. tinctoria.* [B, 180 (a, 24).]—**G. pratensis, G. pubescens.** Varieties of *G. tinctoria.* [B, 180 (a, 24).]—**G. purgans.** Fr., *genêt griot* (ou *purgatif*), *griot.* A species found in southern France; purgative, and said to be poisonous. [B, 173, 180 (a, 24).]—**G. sagittalis.** Ger., *geflügelter Ginster.* A species found in southern and middle Europe. The herb and tops (*herba et summitates genistellæ* [Sp. Ph.]) are used like those of *G. tinctoria.* [B, 180 (a, 24).]—**G. scoparia.** See SPARTIUM *scoparium.*—**G. scorpius.** Ger., *Scorpionen-Ginster.* The ἠκακία ἑτέρα of Dioscorides, a species found in southern Europe, in northern Africa, and in Asia. In Spain, the flowers, sweetened, are used as a stomachic. [B, 180 (a, 24).]—**G. sibirica.** A species very like *G. tinctoria*; perhaps a variety of it. [B, 173, 180 (a, 24).]—**G. spiniflora.** See *G. scorpius.*—**G. spinosa vulgaris.** The *Ulex europæus.* [B, 310 (a, 35).]—**G. tinctoria.** Fr., *genêt* (ou *fleur*) *des teinturiers, bois vert, genestrolle, genette, gilbe, herbe aux teinturiers* (ou *de pâturage*) *marjolaine, cornéole.* Ger., *färbender Ginster, Färberginst, Färberscharte, gelbe Scharte, Färberkraut, Gelbkraut.* Base (or green) broom, dyer's-broom, dye-weed, Kendal green, wood-waxen; a species found in central and southern Europe, but naturalized in America and elsewhere. It has been used in Russia for rabies, is considered purgative and diuretic, and in Michigan is used as an astringent. [B, 19, 173, 180 (a, 24); "Proc. of the Am. Pharm. Assoc.," vii (a, 14).]—**Herba genistæ.** 1. The herb of *G. tinctoria.* 2. The herb of *Spartium scoparium.* [B, 180 (a, 24).]—**Sal genistæ.** Salt of broom; the ash obtained by burning the entire broom-plant. It contains a large portion of potassium carbonate. [L, 130.]—**Semen genistæ.** The seed of *Spartium scoparium.* [B, 180 (a, 24).]—**Summitates genistæ.** The tops of *G. tinctoria* and of *G. purgans.* [B, 180 (a, 24).]

GENISTA TINCTORIA. [A, 327.]

GENISTE (Ger.), n. Ge^{2}n-est′e^2. See GENISTA.—**Spanische G.** The *Spartium junceum.* [B, 180 (a, 24).]

GENISTELLA (Lat.), n. f. Je^{2}n(ge^{2}n)-i^{2}s-te^{2}l′la^3. See GENISTA *sagittalis.*

GENISTELLOIDES (Lat.), adj. Je^{2}n(ge^{2}n)-i^{2}st-e^{2}l-lo(lo^2)-id(ed)′ez(as). From *genistella,* a little broom-plant, and εἶδος, resemblance. Resembling a little broom-plant. [B.] See BACCHARIS *g.*

GENISTOIDES (Lat.), n. f. Je^{2}n(ge^{2}n)-i^{2}st-o(o^2)-i(e)′dez(das). From *genista,* the broom-plant, and εἶδος, resemblance. Of Reichenbach, a genus of leguminous plants allied to *Genista.* The *Genistoideæ* (Link) are a section of the *Papilionaceæ.* [B, 121, 170 (a, 24).]—**G. hirsuta, G. tinctoria.** See GENISTA *tinctoria.*

GENITAL, adj. Je^{2}n′i^{2}t-a^{2}l. Gr., γεννητικός. Lat., *genitalis.* Fr., *génital.* Ger., *geschlechtlich Zeugungs-.* Pertaining to generation; as a n., in the pl., *g's* (Lat., *genitalia*; Fr., *parties honteuses*; Ger., *Genitalien, Zeugungsglieder*), the organs of generation.—**External g's.** Lat., *genitalia externa.* Fr., *organes génitaux externes.* Ger., *äussere Genitalien.* Those organs of generation that are visible on external inspection. According to some writers, they include, in the female, the mammary glands.—**Internal g's.** Lat., *genitalia interna.* Fr., *organes génitaux internes.* Ger., *innere Genitalien.* Those g. organs that are situated in the interior of the body.

GENITALIEN (Ger.), n. pl. Ge^{2}n-e-ta^{3}l′e-e^{2}n. The genital organs.—**Aeussere G.** See *External* GENITALS.—**Brustg'.** The mammary glands.—**Innere G.** See *Internal* GENITALS.—**Männliche G.** The genitals of the male.—**Weibliche G.** The genitals of the female.

GENITALIS (Lat.), adj. Je^{2}n(ge^{2}n)-i^{2}t-a(a^3)′li^{2}s. Genital; as a n., an old name for the genus *Gladiolus*; as a n., in the n. pl., *genitalia* (*membra* understood), the genital organs. [B, 121 (a, 24).]—**Genitalia externa.** See *External* GENITALS.—**Genitalia interna.** See *Internal* GENITALS.—**Genitalia muliebria.** The genitals of the human female.—**Genitalia thoracica.** The mammary glands of the human female.—**Genitalia viri.** The genitals of the human male.

GENITALITY, n. Je^{2}n-i^{2}t-a^{2}l′i^2-ti^2. Fr., *génitalité.* Ger., *Zeugungsfähigkeit.* Capability of taking part in generation. [A, 385.]

GENITO-CRURAL, adj. Je^{2}n″i^{2}t-o-kru^2′ra^{2}l. Lat., *genitocruralis* (from *genitalis,* genital, and *crus,* the leg). Fr., *génitocrural.* Ger., *Schamschenkel-.* Pertaining to the genitals and to the thigh. [L, 41 (a, 21).]

GENITO-ENTERIC, adj. Je^{2}n″i^{2}t-o-e^{2}n-te^{2}r′i^{2}k. From *genitalis,* genital, and ἔντερον, an intestine. Pertaining to the genitals and to the intestines (said of a fold of peritonæum).

GÉNITOIRES (Fr.), n. pl. Zha-ne-twa^{3}r. See *External* GENITALS.

GENITOR (Lat.), n. m. Je^{2}n(ge^{2}n)′i^{2}t-o^{2}r. Gen., *-tor′is.* From *gignerc,* to beget. Gr., γενετήρ. Fr., *géniteur.* A begetter, parent, father; in the lower animals, a male selected for breeding purposes. [A, 312 (a, 21); A, 385.]

GENITO-SPINAL, adj. Je^{2}n″i^2-to-spin′a^{2}l. From *genitalis,* genital, and *spina,* the spinal column. Fr., *génito-spinal.* Ger., *Schamrückenmarks-.* Pertaining to the genitals and to the spinal cord (see *G.-s.* CENTRE). [a, 21.]

GENITO-URINARY, adj. Je^{2}n″i^2-to-u^2′ri^{2}n-a-ri^2. Fr., *génito-urinaire.* Ger., *Harn und Geschlechts-.* Pertaining to the genitals and to the urinary organs. [L, 41 (a, 21).]

GENITURA (Lat.), n. f. Je^{2}n(ge^{2}n)-i^2-tu^2(tu)′ra^3. From *gignere,* to beget. See SEMEN, GENITALS, and GENERATION.

GENIUM (Lat.), n. n. Je^{2}n(ge^{2}n)-i(e)′u^{3}m(u^{4}m). See GENEION.

GENIUS (Lat.), n. m. Jen(ge^{2}n)′i^2-u^{3}s(u^{4}s). From *gignere,* to beget. Fr., *génie.* Ger., *Genie.* It., Sp., *genio.* 1. Conspicuous

ability in intellectual, imaginative, or artistic work, etc., especially in work involving originality. 2. Some distinctive dominant quality, as of a disease, of the atmosphere, etc.—**G. epidemicus.** Fr., *génie épidémique.* Ger., *epidemisches Genie.* See *Epidemic* CONSTITUTION.—**G. morbi.** Fr., *génie morbide.* Ger., *Krankheits-character.* Any special feature characteristic of a disease, especially as occurring in a particular epidemic. [A, 385.]

GENNESIS (Lat.), n. f. Je^{2}n(ge^{2}n)-ne(na)'si^{2}s. Gen., *-es'eos* (*-is*). Gr., γέννησις. See GENESIS, and for other words in *Genn-* not here given see the corresponding words in *Gen-*.

GENNET, n. Je^{2}n'e^{2}t. The *Bunium flexuosum.* [A, 505 (*a*, 21).]

GENNOSHOKO, n. In Japan, the *Geranium nepalense.* [B, 121 (*a*, 24).]

GENOBLAST, n. Je^{2}n'o-bla^{2}st. From γένος, race, and βλαστός, a sprout, or germ. A sexual product, ovum or spermatozooid. [J.]

GENOMETABOLE (Lat.), n. f. Je^{2}n(ge^{2}n)-o(o^3)-me^{2}t-a^{2}b(a^{3}b)'-ol(o^{2}l)-e(a). Gen., *-es* (*-æ*). From γένος, sex, and μεταβολή, a change. Ger., *Geschlechtsumwandlung.* The change of sex formerly supposed to occur in women after the menopause. [L, 50 (*a*, 14).]

GENONUSI (Lat.), n. f. pl. Je^{2}n(ge^{2}n)-o^{2}n-u^2(u)'si(se). From γένος, sex, and νοῦσος (= νόσος), a disease. Diseases of the sexual organs.

GENOPLASTY, n. Je^{2}n'o-pla^{2}st-i^2. See GENIOPLASTY and MELOPLASTY.

GENOU (Fr.), n. Zhe^2-nu. See GENU and KNEE.—**G. antérieur (du corps calleux).** See GENU *of the corpus callosum.*—**G. cagneux.** See GENU *valgum.*—**G. de la scissure interlombaire** [Hirschfeld], **G. du corps calleux.** See GENU *of the corpus callosum.*—**G. du (nerf) facial.** See GENU *nervi facialis.*—**G. en dedans.** See GENU *valgum.*—**G. en dehors.** See GENU *varum.*—**G. postérieur du corps calleux.** See *Posterior* GENU *of the corpus callosum.*—**G. recourbé paralytique.** See GENU *recurvatum.*—**G. valgus.** See GENU *valgum.*

GENOUILLÉ (Fr.), adj. Zhe^2-nu-el-ya. See GENICULATE.

GENOUILLE (Fr.), n. Zhe^2-nu-el-y'. See GENICULUM.—**G. externe.** See *External geniculate* BODY.

GENOUILLÈRE (Fr.), n. Zhe^2-nu-el-ye^{2}r. An appliance for supporting the knee joint. [A, 335 ; L, 41, 87 (*a*, 14).]

GENOUILLET (Fr.), n. Zhe^2-nu-el-ya. The *Polygonatum vulgare.* [B, 46, 121, 173 (*a*, 29).]

GENRE (Fr.), n. Zha^{3}n^{2}r'. See GENUS.

GENSENG, n. Je^{2}n'se^{2}n^2. See GINSENG.

GENTIA (Lat.), n. f. Je^{2}n(ge^{2}n)'shi^2(ti^2)-a^3. See GENTISIC ACID.

GENTIAN, n. Je^{2}n'shu^{3}n. 1. See GENTIANA. 2. The *Erythræa centaurium.* [A, 505 (*a*, 21).]—**Alcoholic extract of g.** See *Extractum* GENTIANÆ *alcoholicum.*—**Autumn-g.** See GENTIANA *amarella.*—**Aqueous extract of g.** See *Extractum* GENTIANÆ.—**Barrel-flowered g.** See GENTIANA *saponaria.*—**Bastard-g.** The *Hypericum sarothra* (*Sarothra gentianoides*). [B, 19, 275 (*a*, 35).]—**Blue-fringed g.** See GENTIANA *crinita.*—**Blue g., Catesbian g.** See GENTIANA *Catesbæi.*—**Climbing g.** The *Crawfurdia japonica.* [B, 275 (*a*, 24).]—**Closed blue (or blue-flowered) g.** See GENTIANA *Andrewsii.*—**Common g.** Ger., *gemeiner Enzian.* The *Gentiana lutea.* [B, 180 (*a*, 35).]—**Compound alkaline tincture of g.** See *Tinctura* GENTIANÆ *salina composita.*—**Compound decoction of g.** [Fr. Cod., 1818 ; Pharm. Form. of the Fr. Mil. Hosp., 1821 ; Ferr. Ph., 1825]. A preparation made by boiling 1 part of g.-root in 240 parts of water, adding 2 parts of species amaræ, infusing, and straining without expression. [B, 97 (*a*, 14).]—**Compound infusion of g.** See *Infusum* GENTIANÆ *compositum.*—**Compound tincture of g.** See *Tinctura* GENTIANÆ *composita.*—**Crossworts-g.** See GENTIANA *cruciata.*—**Dwarf g.** The *Gentiana campestris.* See also GENTIANA *nana.* [A, 511 ; B, 64, 180 (*a*, 35).]—**Elixir of g. with iron.** An elixir made by mixing ½ fl. oz. of fluid extract of g., 7½ fl. oz. of diluted alcohol, 2 fluidrachms of spirit of orange, 10 minims of spirit of cinnamon, 6 fl. oz. of syrup, and 256 grains of citrate of iron and ammonium, previously dissolved in 2 fl. oz. of water. [B, 81 (*a*, 21).]—**Extract of g.** See *Extractum* GENTIANÆ.—**Felwort-g.** See GENTIANA *amarella.*—**Field-g.** See GENTIANA *campestris.*—**Fluid extract of g.** See *Extractum* GENTIANÆ *fluidum.*—**G. bitter.** See GENTIOPICRIN.—**G. family.** See GENTIANACEÆ. [*a*, 24.]—**G. mixture.** See *Mistura* GENTIANÆ.—**G.-root.** Lat., *gentiana* [U. S. Ph.], *gentianæ radix* [Br. Ph.], *radix gentianæ* [Ger. Ph.]. Fr., *racine de gentiane jaune* [Fr. Cod.]. Ger., *Enzianwurzel, Bitterwurzel.* Of the U. S. Ph., Br. Ph., Fr. Cod., and Ger. Ph., the root of *Gentiana lutea ;* also, of the Ger. Ph., the root of *Gentiana major* (see also GENTIANA *purpurea*, GENTIANA *punctata*, GENTIANA *pannonica*, GENTIANA *macrophylla*, and GENTIANA *Catesbæi*). The fresh root is long, cylindrical, and fleshy, of a pale color, and occasionally 1½ inch thick. The dry root occurs in commerce in irregular pieces, several inches long, wrinkled longitudinally, and marked transversely with rings. It is yellowish-brown (internally, of an orange tint), spongy, with a peculiar heavy odor, and intensely bitter taste. It contains gentiopicrin (g. bitter), gentianin (gentisin), pectin, from 12 to 15 per cent. of uncrystallizable sugar, and, according to Maisch, no tannin. It is a superior stomachic bitter, and is used in all diseases associated with atonic dyspepsia. The powder has been applied as an application to malignant ulcers. It was first used by Fragus (1552) for tents for dilating wounds. [B, 5, 18, 77 (*a*, 24).]—**G'säure** (Ger.). See GENTIANIC ACID.—**G. spirit.** See *G. wine.*—**G. violet.** See *G.* VIOLET.—**G. wine.** Ger., *Enzianbranntwein.* A spirit made, in Switzerland, the Vosges, and Bavaria, from the fermentation of the root of *Gentian lutea.* Its occasional toxic effects are attributed to an accidental use of the root of *Veratrum album.* [B, 77, 92 (*a*, 24).]—**G'worts.** The *Gentianaceæ.* [*a*, 24.]—**G'wurzel** (Ger.). See GENTAIN-*root.*—**Horse-g.** A plant of the genus *Triosteum*, especially the *Triosteum perfoliatum.* [B, 275 (*a*, 24).]—**Marsh-g.** The GENTIANA *pneumonanthe.*—**Milkweed-g.** See GENTIANA *asclepiadea.*—**New Zealand mountain-g.** See GENTIANA *saxosa.*—**Smaller fringed g.** See GENTIANA *detonsa.*—**Small mountain-g.** See GENTIANA *nivalis.*—**Soapwort-g.** The *Gentiana saponaria* and the *Saponaria officinalis.* [B, 275 (*a*, 24).]—**Southern g.** The *Gentiana Catesbæi.* [*a*, 35.]—**Spring Alpine g.** The *Gentiana verna.* [B, 19 (*a*, 35).]—**Spurred g.** The genus *Halenia.* [B, 275 (*a*, 24).]—**Stemless g.** See GENTIANA *acaulis.*—**Tincture of g.** See *Tinctura* GENTIANÆ.—**White g.** See GENTIANA *alba.*—**Willow-g.** See GENTIANA *asclepiadea.*—**Yellow g.** See GENTIANA *lutea.*

GENTIANA (Lat.), n. f. Je^{2}n(ge^{2}n)-shi^2(ti^2)-an(a^{3}n)'na^3. From *Gentius*, an Illyrian king. Gr., γεντιανή, γεντιάς. Fr., *gentiane* [Fr. Cod.]. Ger., *Enzian. Entzian.* It., *genziana.* Sp., *genciana.* Gentian, felwort, a genus of the *Gentianeæ*, tribe *Swertieæ*, comprising herbs characterized by a 5-cleft calyx, tubular corolla, 4 to 5 stamens, 2 stigmas, styles short or none, a 2-valved capsule, 1-celled, many-seeded, leaves opposite, flowers blue, yellowish purple, or white. The *Gentianaceæ* (Fr., *gentianacées ;* Ger., *Gentianaceen*), or *gentianworts* of Dumortier are a family of the *Asclepiarieæ*, including the *Gentianeæ*, *Spigelieæ*, and *Romanzoviaceæ ;* of Lindley, an order of the *Gentianales* (or [Wood] of the *Gamopetalæ*), including the *Gentianeæ* and *Menyantheæ ;* and of Meissner an order of the *Contortæ* (of Grisebach, an order of the *Corolliferæ*, or, of Jussieu, an order of hypogynous, monopetalous dicotyledons), consisting of the *Menyantheæ.* The *Gentianæ* are: Of Jussieu, a class of plants comprising *Gentiana*, *Vohiria*, *Coutoubea*, *Swertia*, *Chlora. Exacum*, *Lisianthus. Tahia*, *Chironia*, *Spigelia*, etc.; of Gray, a family of the *Corollifloræ*, comprising *Pneumonanthe*, *Swertia*, the *Menyantheæ*, etc., and of Lindley an order of the *Gentianales* (see under GENTIANAL). The *Gentianeæ* are: Of Necker, an order of plants comprising the genus (tribe) *Gentiana ;* of Ventenat comprising the genera *Menyanthes*, *Gentiana*, *Swertia*, *Chironia*, *Spigelia*, etc.; of Batsch, an order of *Nudæ*, with the same genera ; of De Candolle (1805) and of R. Brown, a family of the *Monopetalæ ;* or De Candolle (1819), an order of the *Corolliferæ ;* of Bentham and Hooker, an order of the *Gentianales*, comprising the tribes *Exaceæ*, *Chironieæ*, *Swertieæ*, and *Menyantheæ ;* of Wood, a tribe of the *Gentianaceæ*, including the genera *Obolaria. Frasera*, *Bartonia*, *Gentiana*, *Erythræa*, and *Sabbatia.* [B, 34, 42, 121, 170 (*a*, 24).]—**Essentia gentianæ (rubræ).** See *Tinctura gentianæ.*—**Extractum gentianæ** [U. S. Ph., Br. Ph., Ger. Ph., Belg. Ph., Dan. Ph., Norw. Ph., Swed. Ph., Russ. Ph., Hung. Ph., Finn. Ph., Swiss Ph., Netherl. Ph., Gr. Ph., Austr. Ph.]. Fr., *extrait de gentiane* [Fr. Cod.]. Ger., *Enzianextrakt, Enzianwurzelextrakt.* Sp., *extracto de genciana* [Sp. Ph., Mex. Ph.]. Roum., *extractu de g.* [Roum. Ph.]. Syn.: *extractum gentianæ luteæ* [Edinb. Ph., 1826]. A thick extract made by exhausting powdered gentian-root with water, and evaporating. [B. 5, 81, 95, 97, 113, 119 (*a*, 14).]—**Extractum gentianæ alcoholicum** [Disp. fuld., 1791 ; Palat. Disp., 1764 ; Würzb. Ph., 1796]. Fr., *extrait alcoolique de gentiane.* A preparation made by digesting powdered gentian-root with alcohol, decanting, boiling the residue with water, expressing, evaporating the strained decoction to the consistence of honey, and adding the alcoholic tincture. [B, 97, 119 (*a*, 14).]—**Extractum gentianæ fluidum** [U. S. Ph.]. Fr., *extrait liquide de gentiane.* Ger., *flüssiges Enzianextrakt.* A fluid extract made by exhausting

GENTIANA ANDREWSII. [A, 327.]

powdered gentian-root with dilute alcohol, reserving the first portion of percolate, evaporating the remainder to the consistence of an extract, mixing with the reserved portion, and adding sufficient alcohol to make the whole measure 100 parts. [B, 5, 81, 95 ; "Proc. of the Am. Pharm. Assoc.," xi (*a*, 14).]—**Extractum gentianæ luteæ** [Edinb. Ph., 1826]. See *Extractum gentianæ.*—**G. acaulis.** Fr., *gentiane grandiflore* (ou *sans tige*). Ger., *stengelloser Enzian.* Gentianella, stemless gentian, a species indigenous to the Alpine regions of Europe and Asia. The root and leaves (*radix* et *herba gentianellæ alpinæ*) are very bitter, and are employed in jaundice, chlorosis, and indigestion. [B, 77, 128, 173, 180, 275 (*a*, 24).]—**G. alba.** 1. White gentian, a species growing in the western and southern United States. 2. Of the old Ph's, the *Laserpitium latifolium.* [B, 34, 121 (*a*, 24).]—**G. alpina.** A variety of *G. excisa.* [B, 180 (*a*, 24).]

—**G. amarella.** Fr., *amarella, gentianelle.* Ger., *bitterer Enzian, Himmelsstengel, Herbstenzian, Gentianellenkraut.* Felwort- (or autumn-) gentian. 1. A species widely dispersed through the high mountainous and northern portions of North America, northern Europe, eastern Siberia, Scotland, and Sweden. It is a bitter tonic and febrifuge. 2. Of Allioni, the *G. campestris* of Linnæus. 3. Of other authors, the *G. germanica.* [B, 77, 128, 173, 180 (α, 24).]—**G. amarelloides.** See *G. quinqueflora.*—**G. Andrewsii.** Closed blue gentian; a species found in British America and the United States as far south as the Carolinas. [B, 34 (α, 24).]—**G. angustifolia.** 1. Of Michaux, a species found from New Jersey to Florida in sandy fields. [B, 34 (α, 24).] 2. Of Villars, see *G. acaulis.* —**G. aquatica.** See *G. humilis* (1st def.).—**G. asclepiadea.** Ger., *schwalbenwurzartiger Enzian.* Milkweed- (or willow-) gentian, the dragon's-gall-plant of the Chinese; a species found in the Alpine regions of Europe. Its root (*radix asclepiadeæ*) is used as a tonic. [B, 180, 275 (α, 24).]—**G. auriculata.** Ger., *geöhrter Enzian.* A species found in Siberia, Kamtchatka, and the Aleutian Islands, where it is used as a tonic in dyspepsia and in scurvy. [B, 180 (α, 24).]—**G. axillaris.** See *G. amarella* (1st def.).—**G. barbata.** See *G. serrata.*—**G'bitter** (Ger.). See GENTIOPICRIN.—**G. Bürgeri.** A species found in Japan, where it is called dragon's-gall-plant. [B, 77 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxviii (α, 14).]—**G. Burseri.** A species found in the eastern and central Pyrenees. [B, 275 (α, 24); "Proc. of the Am. Pharm. Assoc.," xxvi (α, 14).]—**G. cachenlaguen.** The cachanlahuen or cachenlaguen of Chili. [B, 121, 180 (α, 35).] See ERYTHRÆA *cachanlahuen.*—**G. cærulea.** See *G. pneumonanthe.*—**G. calycina.** 1. A variety of the *G. obtusifolia* of Willdenow. 2. A species now referred to *Sabbatia.* [B, 121, 285 (α, 24).]—**G. calyculata.** Sp., *flor de Santo Domingo* (*ó de nieve*). A species found in Mexico. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601.]—**G. campanulata.** See *G. punctata.*—**G. campestris.** Fr., *gentiane champêtre* (ou *des champs*), *gentianelle.* Ger., *Feldenzian.* 1. Of Linnæus, a species found in middle and western Europe. [B, 77, 173, 180 (α, 24).] 2. Of Allioni, see *G. germanica.* 3. Of Pallas, see *G. amarella.*—**G. Catesbæi.** Fr., *gentiane de Catesby.* 1. Samson's snake-root, blue gentian. Of Walter, see *G. saponaria.* 2. Of Elliott, see *G. Elliottii.* 3. Of Andrews, see *G. Andrewsii.* —**G. centaurium.** 1. Of Linnæus, the *Erythræa centaurium.* 2. Of Linnæus, var. β, the *Erythræa pulchella.* [B, 180 (α, 24).]—**G. chirata, G. chirayita, G. chirayta.** Fr., *gentiane chyraita.* See AGATHOTES *chirayta.*—**G. chloræfolia.** A broad-leaved variety of the *G. campestris* of Linnæus. [B, 180 (α, 24).]—**G. connata.** Fr., *gentiane à longs pédoncules.* The *Lisianthus exaltatus.* [B, 173 (α, 24).]—**G. crinita.** Blue fringed gentian; a species found from Canada to the Carolinas. [B, 34 (α, 24).]—**G. cruciata.** Fr., (*gentiane*) *croisette.* Ger., *Kreuz-Enzian.* Crossworts-gentian; a species with leaves growing in the form of a cross, from which fact unusual medicinal virtues have been superstitiously attributed to it. It is found in pastures and on mountains throughout middle Europe and Siberia. The whole plant is very bitter, and its root and herb (*radix* et *herba gentianæ minoris*) were formerly official. [B, 173, 180 (α, 24).] Cf. CHILIODYNAMA.—**G. detonsa.** See *G. serrata.*—**G. Elliotti.** A species found in Florida, closely related to *G. saponaria.* [B, 215.]—**Gentianæ radix.** See GENTIAN-*root.*—**G. erythræa.** A species growing in the province of Kiang-Su, China, where it is used as a cooling and arthritic remedy, in eye complaints, and as an aperient. ["Proc. of the Am. Pharm. Assoc.," xxiv (α, 14).]—**G. exaltata.** The *Lisianthus exaltatus.* —**G. fimbriata.** See *G. crinita.*—**G. flavida.** See *G. alba* (1st def.).—**G. Fremontii.** See *G. humilis.*—**G. Gerardi.** The *Erythræa centaurium.* [B, 311 (α, 35).]—**G. germanica.** Fr., *gentiane d'Allemagne.* Ger., *deutscher Enzian.* A species found in Great Britain, southern France, southern Germany, northern Italy, Dalmatia, and Hungary. It is very like the *G. amarella* of Linnæus. [α, 24.]—**G. grandiflora.** See *G. acaulis.*—**G. Hartwegi.** A species indigenous to Mexico, nearly allied to *G. mexicana.* [α, 24.] —**G. humilis.** Ger., *niedriger Enzian.* 1. A species growing in Asia and in the Rocky Mountains. The bitter herb is used as a domestic remedy in Siberia. [B, 180, 215 (α, 24).] 2. Of Rochel, see *G. nivalis.*—**G. hyssopifolia.** A species found in Ecuador. [α, 24.]—**G. kurroo.** A species found in the Himalayas; the *kurroo* of the Indian Ph. [α, 24.]—**G. linearifolia.** See *G. pneumonanthe.*—**G. linearis.** A species, by some considered a variety, of the *G. saponaria* of Linnæus, found from Canada to the Carolinas and in Kentucky. [B, 34, 215 (α, 24).]—**G. lutea.** Fr., *gentiane jaune, grande gentiane.* Ger., *gelber* (oder *gemeiner*, oder *gebräuchlicher*, oder *grosser*, oder *edler*) *Enzian, Bitterwurz.* A species found in the Alpine and mountainous regions of middle and southern Europe, including Portugal, Spain, Sardinia, Corsica, and the Apennines and Pyrenees, but not the mountains of Germany. It is from 3 to 4 feet high, with opposite, sessile, oval, bright-green leaves, and whorls of showy yellow flowers. Its root is the official gentian of the pharmacopœias. [B, 5, 173, 180 (α, 24).]—**G. macrophylla.** Fr., *gentiane à feuilles épaisses.* A species found in Siberia, where it is used in convulsions and delirium. [B, 5, 173 (α, 24).]—**G. major.** See *G. lutea.*—**G. mexicana.** A species indigenous to Mexico. [De Candolle (α, 24).]—**G. minor.** See *G. cruciata.*—**G. nigra.** An old name for the *Peucedanum cervaria.* [B, 121 (α, 24).]—**G. nivalis.** Small mountain gentian; a species found in Alpine regions in Hungary and the Pyrenees, Sweden, Scotland, Iceland, Greenland, and Labrador. [B, 77 (α, 24).]—**G. obtusifolia.** Ger., *stumpfblättriger Enzian.* 1. A species found in the Tyrolese Alps. Its herb (*herba gentianellæ*) was formerly official. [B, 180 (α, 24).] 2. Of Reichenbach, see *G. amarella* (1st def.).—**G. ochroleuca.** 1. The Sampson snake-root; a species found in the United States from Pennsylvania to Florida; used as a tonic. 2. Of Sims and Torrey, see *G. alba* (1st def.). [B, 34, 180 (α, 24); "Proc. of the Am. Pharm. Assoc.," vii (α, 14).]—**G. palustris, G. paniculata.** The *Swertia perennis.* [B, 173 (α, 24).]—**G. pannonica.** Ger., *ungarischer Enzian.* A species found in the Pyrenees, Austrian Bohemia, and Hungary. The root is used for dyeing, and has the bitter and tonic properties of that of *G. lutea*, with which it is often found mixed in the shops. [B, 5, 180 (α, 24).]—**G. parviflora.** A variety of *G. quinqueflora* growing in the western United States. [B, 34 (α, 24).]— —**G. perfoliata.** See CHLORA *perfoliata.*—**G. peruviana.** 1. A species found in the Andes, in Ecuador. 2. The *Erythræa chilensis.* [B, 173, 180 (α, 24).]—**G. pneumonanthe.** Fr., *gentiane pneumonanthé* (ou *des marais*). Ger., *gemeiner Enzian, Lungenenzian, Lungenblume, blauer Dorant* (oder *Torant*). 1. Of Linnæus, marsh

GENTIANA LUTEA. [A, 327.]

gentian; a species found throughout Europe to northern Asia. The root, herb, and flowers, *radix, herba* et *flores pneumonanthes* (seu *antirrhini cærulei*, seu *gentianæ cæruleæ*, seu *gentianellæ*), have the bitter properties of the other species, and were formerly used in pectoral complaints. In Russia it is employed in epilepsy. 2. Of Michaux, the *G. linearis.* [B, 77, 180, 215 (α, 24); "Proc. of the Am. Pharm. Assoc.," vii (α, 14).]—**G. pratensis.** See *G. amarella.*—**G. pseudo-pneumonanthe.** See *G. linearis.*—**G. puberula.** A species found in the western and southern United States. [B, 34 (α, 24).]—**G. punctata.** Fr., *gentiane ponctuée.* Ger., *punktirter Enzian.* 1. A species found in the Alps of south-eastern France, Savoy, Switzerland, Austria, and Hungary, having yellow flowers spotted with violet. The root is considered equal in medicinal value to that of *G. lutea*, and is often sold with it. [B, 5, 18, 173, 180 (α, 24).] 2. Of Jacquin, see *G. pannonica.*—**G. punicea.** See *G. purpurea* (1st def.).—**G. purpurea.** Fr., *gentiane pourprée.* Ger., *purpurrother* (oder *spitziger*) *Enzian.* 1. A species found in Norway, Switzerland, the Pyrenees, and Kamtchatka. The root, *radix gentianæ purpureæ* (seu *carsutæ*), is considered equal to and even better than that of *G. lutea*, and is often found in commerce with it. [B, 5, 18, 173, 180 (α, 24).] 2. Of Schrank, see *G. pannonica.* 3. Of Villars, see *G. punctata.* 4. Of Walter, see *G. angustifolia.*—**G. quinqueflora.** Gall-of-the-earth; a species growing in woods and pastures in the United States and Canada. The root is employed like that of *G. lutea.* [B, 5, 34 (α, 24); "Proc. of the Am. Pharm. Assoc.," xii (α, 14).]—**Gentianæ radix** [Br. Ph.]. See GENTIAN-*root.*—**G. ramosissima.** The *Erythræa pulchella.*— **G. rotata.** The *Pleurogyne rotata.* [B, 173 (α, 24).]—**G. rubra.** 1. In pharmacy, the root of several species of g., especially *G. purpurea* and *G. lutea.* 2. A purple-flowered species of g. that De Candolle considers a hybrid between *G. lutea* and another plant. [B, 64, 180, 214 (α, 35).]—**G. saponaria.** Ger., *seifenkrautblättriger Enzian.* 1. The soapwort- (or barrel-flowered) gentian; a species found in the United States from Virginia to Louisiana. It is used as a bitter tonic, and, as *G. Catesbœi*, was formerly recognized in the U. S. Ph. 2. Of Walter, see *G. ochroleuca.* 3. Of others, see *G. Andrewsii* and *G. linearis.* [B, 18, 34, 180 (α, 24).]—**G'säure** (Ger.). See GENTIANIC ACID.—**G. saxosa.** New Zealand mountain gentian; a species found in New Zealand at Dusky Bay. [α, 24.]—**G. scandens.** A plant found in China and Cochin-China, having a bitter root and leaves which are used as a tonic in dyspepsia. Its botanical place is not well known. [B, 180 (α, 24).]—**G. serrata.** Syn.: *G. barbata, G. detonsa.* A variety found extensively throughout the northern and western parts of North America, Greenland, northern Europe, and Siberia. It is used as a bitter tonic. [B, 180 (α, 24), 215.]—**G. spathulata.** See *G. obtusifolia* (1st def.).—**G. squarrosa.** A variety of *G. asclepiadea* growing in Manchooria; used in ophthalmia and hæmaturia and as an antiphlogistic. ["Proc. of the Am. Pharm. Assoc.," xxxiv (α, 14).]—**G. trinervis.** The *Lisianthus zeylanicus.* [B, 180 (α, 24).]—**G. uliginosa.** The *G. amarella* of Linnæus; of De Candolle, a variety of the latter. [B, 128, 180 (α, 24).]—**G. uniflora.** A variety of *G. germanica.* [B, 180.]—**G. verna.** A small British species with brilliant blue flowers and small leaves. It is somewhat rare and bears but one flower. [B, 77 (α, 24).]—**G. verticillata.** Fr., *gentiane verticillée.* The *Exacum verticillatum.* [B, 173, 180 (α, 24).]—**G. veterum.** See *G. lutea.*—**G. villosa.** See *G. ochroleuca.*—**G'violett** (Ger.). See *Gentian*-VIOLET.—**G. virginiana.** See *G. ochroleuca* (1st def.).— **G. vulgaris.** See *G. lutea.*—**Infusum gentianæ.** See *Tisane de* GENTIANE.—**Infusum gentianæ compositum** [Br. Ph., Swed. Ph.]. An infusion made with 1 part of gentian-root, 1 part of orange-peel, 2 parts [Br. Ph.] (or 1 part [Swed. Ph.]) of lemon-peel, and 80 parts [Br. Ph.] (or 100 [Swed. Ph.]) of boiling water. The preparation of the U. S. Ph., 1870, and that of the old Ed. Ph. contained coriander also. [B, 95.]—**Mistura gentianæ** [Br. Ph.]. A preparation made by macerating 30 grains each of bitter-

orange peel, cut small, and bruised coriander-seed, in 2 fl. oz. of proof spirit, adding 8 fl. oz. of distilled water, and macerating again. [B. 5, 81 (*a*, 14).]—**Ptisana gentianæ** [Fr. Cod.]. See *Tisane de* GENTIANE.—**Pulvis gentianæ** [Fr. Cod.]. Fr., *poudre de gentiane*. A preparation made by finely slicing gentian-root, drying, powdering, and passing through a No. 140 silk sieve. [B, 113 (*a*, 14).]—**Radix gentianæ** [Ger. Ph.]. See GENTIAN-*root*.—**Syrupus gentianæ** [Fr. Cod., Belg. Ph.], **Syrupus radicis gentianæ** [Gr. Ph.]. Fr., *sirop de gentiane* [Fr. Cod.]. Sp., *jarabe de genciana* [Sp. Ph.]. An infusion of 1 part of gentian-root in 15 of distilled water, combined by gentle heating with sugar in the proportion of 9 parts of the latter to every 5 of infusion [Fr. Cod.]. The preparations of the other pharmacopœias are of such a strength that 100 parts of the syrup (or 110 [Gr. Ph.]) represent 3 parts of the root. [B, 95.]—**Tinctura gentianæ** [Ger. Ph., Fr. Cod., Belg. Ph., Dan. Ph., Norw. Ph., Russ. Ph., Gr. Ph., Netherl. Ph., Swiss Ph.]. Fr., *teinture* [Fr. Cod.] (ou *alcoolé*) *de gentiane*. Ger., *Enziantinktur*. Sp., *tinctura alcohólica de genciana* [Sp. Ph.]. Syn.: *essentia gentianæ*, *tinctura* (seu *essentia*) *gentianæ rubræ*. A tincture made by macerating 1 part of gentian-root in 5 parts (or 6 [Gr. Ph., Netherl. Ph.]) of diluted alcohol. Similar preparations were formerly official in other pharmacopœias. [B, 81, 95, 97, 113, 119 (*a*, 14).]—**Tinctura gentianæ alcalina** [Fr. Cod.]. See *Teinture de* GENTIANE *alcaline*.—**Tinctura gentianæ aquosa.** See *Tisane de* GENTIANE.—**Tinctura gentianæ composita** [U. S. Ph., Br. Ph.]. Fr., *teinture amère* (ou *de gentiane composée*), *élixir stomachique amer*. Syn.: *tinctura amara*, *elixir stomachicum*. A preparation made by exhausting 8 parts of coarsely powdered gentian-root, 4 of bitter-orange peel, and 2 of cardamom, with diluted alcohol sufficient to give 100 parts of tincture. [B, 5, 81, 97, 119 (*a*. 14).]—**Tinctura gentianæ rubræ.** See *Tinctura gentianæ*.—**Tinctura gentianæ salina composita** [Oldenb. Ph., 1801, Russ. Ph., 1803]. Compound alkaline tincture of gentian, made by digesting 1 part each of orange-peel and gentian-root and 4 parts of potassium carbonate in 4 of alcohol and 12 of water, expressing, and filtering [Russ. Ph., 1803]; or 1 part of potassium carbonate, 3 parts of zedoary, and 4 each of gentian, *Menyanthes trifoliata*, *Mentha crispa*, and lesser centaury, in 120 of alcohol [Oldenb. Ph., 1801]. [B, 97 (*a*, 14).]—**Tisana gentianæ.** See *Tisane de* GENTIANE.—**Vinum gentianæ** [Fr. Cod., Belg. Ph., Swiss Ph.]. Fr., *vin amer*, *vin* [Fr. Cod.] (ou *œnolé*) *de gentiane*, *élixir amer de Rosenstein*. A preparation made by macerating 3 parts of sliced gentian-root in 6 (or 3 [Belg. Ph.]) of alcohol, adding 100 (or 94 [Swiss Ph.]) of claret, or 97 of Malaga wine [Belg. Ph.], and, after prolonged maceration, expressing and filtering. Some of the old pharmacopœias order 1 part of tincture of gentian dissolved in 12 parts of claret. [B, 95, 97, 113, 119 (*a*, 14).]—**Vinum gentianæ compositum.** Fr., *teinture amère* (ou *de gentiane composée*), *élixir stomachique amer*. Syn.: *vinum amarum* (*cum spiritu vini*), *infusum amarum vinosum*. Of the U. S. Ph., 1820, and most of the older pharmacopœias, a preparation made by macerating 1 part of canella alba, 2 parts of dried orange-peel, 4 of gentian, and 8 of cinchona, all well bruised, in 32 of alcohol, adding 240 of Spanish white wine, and straining after prolonged maceration. [B, 97, 119 (*a*, 14).]

GENTIANACEOUS, adj. Je^{2}n-shi^2-a^{2}n-a'shu^{3}s. Fr., *gentianacé*. Belonging to the *Gentianaceæ* (see under GENTIANA) or resembling the genus *Gentiana*. [*a*, 24.]

GENTIANAL, adj. Je^{2}n'shi^2-a^{2}n-a^{2}l. Lat., *gentianalis*. Of or resembling the genus *Gentiana* or the *Gentianales*. [*a*. 24.]—**G. alliance.** Lat., *nixus gentianalis*. The *Gentianales*; of Lindley, 1833, an alliance (nixus) of the *Dicarpæ*, comprising the *Gentianæ*, *Spigeliaceæ*, *Apocyneæ*, and *Asclepiadeæ*, and, in 1847, an alliance (nixus) of perigynous *Exogynæ*, comprising the *Ebenaceæ*, *Aquifoliaceæ*, *Apocynaceæ*, *Loganiaceæ*, *Diapensiaceæ*, *Stilbaceæ*, *Orobanchaceæ*, and *Gentianaceæ*. Of Bentham and Hooker, a cohort of the *Gamopetalæ bicarpellatæ*, comprising the *Oleaceæ*, *Salvadoraceæ*, *Apocynaceæ*, *Asclepiadeæ*, *Loganiaceæ*, and *Gentianeæ*. [B. 42, 170 (*a*, 24).]

GENTIANATE, n. Je^{2}n'shi^2-a^{2}n-at. A compound of gentianic acid with a base. [B.]

GENTIANE (Fr.), n. Zha^{3}n^2-se-a^{3}n. 1. The genus *Gentiana*. 2. The *Triosteum perfoliatum*. [B, 121, 173 (*a*, 24).]—**Alcoolé d'absinthe et de g. composé.** See *Teinture d'*ABSINTHE *composée*.—**Alcoolé de g.** See *Tinctura* GENTIANÆ.—**Alcoolé de g. alcaline** [Fr. Cod.]. See *Teinture de g. alcaline*.—**Alcoolé de g. et d'absinthe.** See *Teinture d'*ABSINTHE *composée*.—**Extrait alcoolique de g.** See *Extractum* GENTIANÆ *alcoholicum*.—**Extrait de g.** See *Extractum* GENTIANÆ.—**Extrait liquide de g.** See *Extractum* GENTIANÆ *fluidum*.—**G. à feuilles épaisses.** See GENTIANA *macrophylla*.—**G. à longs pédoncules.** See GENTIANA *connata*.—**G. blanche.** The *Laserpitium asperum*. [B, 121 (*a*, 24).]—**G. centaurée.** See GENTIANA *centaurium*.—**G. champêtre.** See GENTIANA *campestris*.—**G. croisette.** See GENTIANA *cruciata*.—**G. chyraita.** See GENTIANA *chirata*.—**G. d'Allemagne.** See GENTIANA *germanica*.—**G. de Catesby.** See GENTIANA *Catesbæi*.—**G. des champs.** See GENTIANA *campestris*.—**G. des marais.** See GENTIANA *pneumonanthe*.—**G. grande.** See GENTIANA *lutea*.—**G. grandiflore.** See GENTIANA *acaulis*.—**G. jaune.** See GENTIANA *lutea*.—**G. ponctuée.** See GENTIANA *punctata*.—**G. pourprée.** See GENTIANA *purpurea*.—**G. sans tige.** See GENTIANA *acaulis*.—**Œnolé de g.** See *Vinum* GENTIANÆ.—**Poudre de g.** [Fr. Cod.]. See *Pulvis* GENTIANÆ.—**Racine de g. jaune** [Fr. Cod.]. See GENTIAN-*root*.—**Sirop de g.** [Fr. Cod.]. See *Syrupus* GENTIANÆ.—**Teinture de g.** [Fr. Cod.]. See *Tinctura* GENTIANÆ.—**Teinture de g. alcaline** [Fr. Cod.]. Sp., *tintura alcohólica de genciana alcalina* [Sp. Ph.]. A preparation made by macerating 3 parts (or 3·3 parts [Sp. Ph.]) of sodium carbonate and 10 of powdered gentian-root in 300 (or 287 [Sp. Ph.]) of alcohol, straining with expression, and filtering. [B, 81, 95, 97, 113 (*a*, 14).]—**Teinture de g. composée.** See *Vinum* GENTIANÆ *compositum* and *Tinctura* GENTIANÆ *composita*.—**Tisane de g.** [Fr. Cod.]. Lat., *ptisana gentianæ* [Fr. Cod.]. Sp., *tintura acuosa de gentiana* [Sp. Ph.]. A preparation made by macerating 1 part of gentian in 200 parts (or 100 [Sp. Ph.]) of water, and filtering. [B, 95, 113.]—**Vin de g.** [Fr. Cod.]. See *Vinum* GENTIANÆ.—**Violet de g.** See *Gentian* VIOLET.

GENTIANEIN, n. Je^{2}n-shi^2-a^{2}n-e'i^{2}n. Lat., *gentianeina*. Fr., *gentianéine*. See GENTIANIN.

GENTIANELLA (Lat.), n. f. Je^{2}n(ge^{2}n)-shi^2(ti^2)-a^{2}n(a^{3}n)-e^{2}l'-la^3. Dim. of *gentiana*. A name for several plants of the genera *Gentiana*, *Endotrichea*, and *Crossopetalum*. [B, 121, 185 (*a*, 24).]—**Flores gentianellæ.** The flowers of *Gentiana pneumonanthe*. [B, 180 (*a*, 24).]—**G. autumnalis.** The autumn gentian, *Gentiana amarella*. [B, 307 (*a*, 35).]—**G. cruciata.** The *Gentiana cruciata*. [B, 173 (*a*, 24).]—**G. tetrandra.** The *Gentiana campestris*. [B, 173 (*a*, 24).]—**G. verna.** The *Gentiana verna*. [B, 309 (*a*, 35).]—**Herba gentianellæ.** The herb of *Gentiana amarella* and that of *Gentiana pneumonanthe*. [B, 180 (*a*, 24).]

GENTIANELLE (Fr.), n. Zha^{3}n^2-se-a^3-ne^{2}l. 1. The *Gentiana campestris*. 2. The *Gentiana amarella*. 3. The genus *Exacum*. [B, 121 (*a*, 24).]—**G'nkraut** (Ger.). See GENTIANA *amarella*.—**G. pourpre.** The *Sebæa guianensis*. [B, 173 (*a*, 24).]—**G. violette.** The *Exacum tenuifolium*. [B, 173 (*a*, 24).]

GENTIANIA (Lat.), n. f. Je^{2}n(ge^{2}n)-shi^2(ti^2)-an(a^{3}n)'i^2-a^3. 1. A name for certain plants of the genus *Erythræa*. 2. See GENTIANIN.—**G. cachenlahen, G. peruviana.** See ERYTHRÆA *chilensis*.—**Syrupus gentianiæ** [Ferr. Ph., 1832]. Fr., *sirop de gentianin*. A syrup containing 16 grains of gentianin to the pound. [B, 97, 119 (*a*, 14).]—**Tinctura gentianiæ** [Ferr. Ph., 1832]. Fr., *alcoolé* (ou *teinture*) *de gentianin*. A solution of 5 grains of gentianin in 1 oz. of 24-per-cent. alcohol. [B, 97, 119 (*a*, 14).]

GENTIANIC ACID, n. Je^{2}n-shi^2-a^{2}n'i^{2}k. Fr., *acide gentianique* (ou *gentisique*). Ger., *Gentianasäure*. It., *acido genzianico*. Syn.: *gentianin*, *gentisin*, *gentisic acid*. A substance, $C_4H_{10}O_5 = (OH)_2 : C_6H_3.CO.C_6H_2.(CH_3) : O_2$, forming long acicular, pale-yellow, silky, odorless, and tasteless crystals, almost insoluble in water. It is said to act as an acid, forming compounds (gentianates) with bases. The *g. a.* of Hlasiwetz and Habermann is a crystalline substance, $C_7H_6O_4$, produced by decomposing gentianin (*g. a.* of most authors) with caustic potash. According to some, g. a. is a tannin (gentiotannic acid). [B, 10, 270; "Proc. of the Am. Pharm. Assoc.," xxiv (*a*, 14).]

GENTIANIN, n. Je^{2}n'shi^2-a^{2}n-i^{2}n. Lat., *gentianinum*, *gentiania*, *gentianeina*. Fr., *g.*, *gentianine*. Ger., *G.* A name given to various substances extracted from gentian-root, either identical with gentianic acid (*q. v.*) or consisting of a mixture of the latter and gentiopicrin. The g. of the Ferr. Ph. was obtained by repeated extractions of gentian-root with ether. [B, 119, 270.]—**Alcoolé de g.** See *Tinctura* GENTIANIÆ.—**Sirop de g.** See *Syrupus* GENTIANIÆ.—**Teinture de g.** See *Tinctura* GENTIANIÆ.

GENTIANITE, GENTIANOSE, n's. Je^{2}n'shi^2-a^{2}n-it, -os. Fr., *g.* Ger., *G.* A crystalline substance, $C_{16}H_{66}O_{33}$, found in the roots of different species of gentian (*Gentiana lutea*, etc.) the juice of which by fermentation yields an alcoholic drink. G. is readily soluble in water, and its aqueous solution has a specific dextrorotary power of 65·7°. It suffers inversion on warming with sulphuric acid, and melts at 210° C. [A. Meyer, "Ztschr. f. Physiol. Chem.," vi (B).]

GENTILITIOUS, adj. Je^{2}n-ti^{2}l-i^{2}sh'u^{3}s. Lat., *gentillicius*. Peculiar to a race or to a family. [A, 318.]

GENTIOGENIN, n. Je^{2}n''shi^2-o^{2}j'e^{2}n-i^{2}n. Fr., *gentiogénine*. Ger., *G.* A decomposition product, $C_{14}H_{16}O_6$, of gentiopicrin, occurring in the form of an amorphous yellow-brown, stable powder. [B, 270.]

GENTIOPICRIN, n. Je^{2}n-shi^2-o-pi^{2}k'rin. Fr., *gentiopicrine*. Ger., *Gentiopikrin*, *Enzianbitter*. A crystalline glucoside, $C_{20}H_{30}O_{12}$, constituting the bitter principle of gentian-root. It is readily soluble in water, and, on heating with dilute acids, decomposes into gentiogenin and sugar. [B, 270 (*a*, 27).]

GENTIOTANNIC ACID, GENTIOTANNIN, n's. Je^{2}n-shi^2-o-ta^{2}n'i^{2}k, -i^{2}n. Fr., *acide gentio-tannique*. Ger., *Gentiotannin*, *Enziangerbstoff*. A tannin existing, according to Ville, in gentian-root, and constituting, according to some, either in whole or in part, the gentianic acid of other authors. [B, 10; B, 93 (*a*, 14).]

GENTISATE, n. Je^{2}nt'i^{2}s-at. See GENTIANATE.

GENTISIC ACID, n. Je^{2}n'ti^{2}s-i^{2}k. Fr., *acide gentisique*. Ger., *Gentisinsäure*. See GENTIANIC ACID.

GENTISIN, n. Je^{2}n'ti^2-si^{2}n. Fr., *gentisine*. Ger., *G.* See GENTIANIC ACID. [*a*, 21.]—**G'säure** (Ger.). See GENTIANIC ACID.

GENTISINIC ACID, n. Je^{2}n-ti-sin'i^{2}k. Fr., *acide gentisinique*. See GENTIANIC ACID.

GENU (Lat.), n. n., indecl. in the sing.; pl., *genua*. Jen(ge^{2}n)'-u^2(n). Gr., *γόνυ*. Fr., *genou*. Ger., *Knie*. See KNEE.—**G. aquæductus Falloppii.** The abrupt bend in the aqueduct of Falloppius close to the hiatus Falloppii. [L, 332.]—**Genua arcuata.** See *G. varum*.—**G. capsulæ internæ.** Ger., *Knie der inneren Kapsel*. Of Schwalbe, a bend in the course of the fibres forming the internal capsule of the brain by which the latter is divided into two portions, the anterior of which is included between the caudate and lenticular nuclei, the posterior between the thalamus and the lenticular nucleus. [I, 17 (K).]—**G. corporis callosi.** See *G. of the corpus callosum*.—**G. eversum, G. excurvatum, G. extrorsum.** See *G. varum*.—**G. facialis.** See *G. nervi facialis*.—**G. introrsum flexum, G. inversum.** See *G. valgum*.—**G. nervi facialis.** Fr., *genou du* (*nerf*) *facial*. Ger., *Facialisknie*. 1. A bend in the root of the facial nerve as it turns around the abducens nucleus and passes cephalad and laterad to the caudal margin of the pons. [I,

15 (K).] 2. The curvature of the facial nerve at the g. aquæductus Falloppii. [L, 31, 332.]—**G. of the corpus callosum.** The rounded cephalic margin of the corpus callosum. [I, 15 (K).]—**G. recurvatum.** Fr., *genou recourbé paralytique.* Ger., *Hohlbein*, *Hohlknie.* A deformity of the knee joint, the rarest form of curvature of the knee, consisting in a superextension (curving backward) of the articulation due to paresis of the muscles of the thigh and leg, having either an idiopathic or traumatic origin, and associated with weakening of the posterior wall of the capsular ligament and of the crucial ligaments. [Lorenz, "Sem. méd.," Dec. 5, 1888, p. 462 (*α*, 18); E. Gurlt (A, 319 [*α*, 21]).]—**G. valgum.** Fr., *genou valgus* (ou *cagneux*, ou *en dedans*). Ger., *Bäckerbein*, *Knickbein*, *Knieeng*, *Ziegenbein*, *Schemelbein.* It., *ginocchio valgo.* Syn.: *g. introrsum*, *knock-knee*, *in-knee.* A deformity in which the leg is deflected outward abnormally from the general axis of the lower limb, so that the feet can not be brought together side by side with both legs extended.—**G. valgum adolescentium.** A form of g. valgum arising at the age of puberty in weak male persons. [E. Gurlt (A, 319 [*α*, 21]).]—**G. valgum infantum.** A rare form of g.

GENU VALGUM.

valgum occurring in early years in connection with a rhachitic softening of the knee and less frequently in connection with a deformity resulting from a fracture in the neighborhood of the knee. [E. Gurlt (A, 319 [*α*, 21]).]—**G. varum.** Fr., *genou en dehors.* Ger.,

GENU VARUM.

Säbelbein, *O-Bein*, *Sichelbein.* It., *ginocchio varo.* Syn.: *entogonyancon*, *varum*, *g. extrorsum* (*curvatum*), *bow-legs*, *bandy-legs.* An outward bending of the legs, opposed to g. valgum, arising sometimes from caries of the joints and sometimes from a rhachitic bending of the bones; generally on both sides, but sometimes unilateral and associated with valgum on the other side. [E. Gurlt (A, 319 [*α*, 21]).]—**Posterior g. of the corpus callosum.** Fr., *genou postérieur du corps calleux.* See SPLENIUM.

GENUAL (Ger.), adj. Ge[2]n-u-a[3]l'. 1. Pertaining to the knee. [A, 521.] 2. Pertaining to the genu of the corpus callosum. [I, 98.]

GENUCLAST, n. Je[2]n'u[2]-kla[2]st. From *genu*, the knee, and **κλᾶν**, to break. An apparatus consisting of two parts, one fitted to the lower part of the thigh, the other to the upper part of the leg and united by strong joints, and acted upon by powerful levers, by which great force can be brought to bear on the knee joint in order to break up adhesion and reduce deformity. [*α*, 36.]

GENUFLEXED, adj. Je[2]n'u[2]-fle[2]xt. From *genu*, the knee, and *flectere*, to bend. Fr., *agenouillé.* See GENICULATE.

GENUFLEXION, n. Je[2]n-u[2]-fle[2]k'shu[3]n. Lat., *genuflexio* (from *genu*, the knee, and *flexio*, a bending). Fr., *génuflexion.* Ger., *Kniebeugung.* Flexion of the knee.

GENUGRA [Paracelsus]. See GONAGRA.

GENUPECTORAL, adj. Je[2]n-u[2]-pe[2]k'to[2]r-a[2]l. From *genu*, the knee, and *pectus*, the breast. Pertaining to the knees and to the anterior part of the chest. See *G.* POSTURE.

GENUS (Lat.), n. n. Jen(ge[2]n)'u[3]s(u[4]s). Gen., *gen'eris.* Gr., **γένος.** Fr., *genre.* Ger., *Geschlecht*, *Gattung.* An assemblage of species, or a single species, having in common important characteristics distinct from those of other species. [L, 343.]

GENUSSMITTEL (Ger.), n. Ge[2]-nus'mi[2]t-te[2]l. See CONDIMENT.

GENYANTRALGIA (Lat.), n. f. Je[2]n(ge[2]n)-i[2](u[6])-a[2]nt(a[3]nt)-ra[2]l(ra[3]l)'ji(gi[2])-a[3]. From **γένυς**, the lower jaw, **ἄντρον**, a cavern, and **ἄλγος**, pain. Pain in the maxillary antrum. [B.]

GENYANTRIC, adj. Je[2]n-i[2]-a[2]nt'ri[2]k. Lat., *genyantricus* (from **γένυς**, the lower jaw, and **ἄντρον**, a cavern). Pertaining to the maxillary antrum. [A, 322.]

GENYANTRITIS (Lat.), n. f. Je[2]n(ge[2]n)-i[2](u[6])-a[2]nt(a[3]nt)-ri(re)'-ti[2]s. Gen., *-it'idos* (*-idis*). From **γένυς**, the lower jaw, and **ἄντρον**, a cavern (see also *-itis* *). Inflammation of the mucous membrane of the maxillary antrum. [E.]

GENYANTRON (Lat.), **GENYANTRUM** (Lat.), n's n. Je[2]n-(ge[2]n)-i[2](u[5])-a[2]nt(a[3]nt)'ro[2]n, -ru[3]m(ru[4]m). See *Maxillary* ANTRUM.

GENYOCYNANCHE (Lat.), n. f. Je[2]n(ge[2]n)-i[2](u[6])-o(o[3])-si[2]n-(ku[5]n)-a[2]n[2](a[3]n[2])'ke(ch[2]a). Gen., *-anch'es* (*-æ*). From **γένυς**, the lower jaw, and **κυνάγχη**, cynanche. See CYNANCHE *parotidœa.*

GENYOPLASTY, n. Jen'i[2]-o-pla[2]st-i[2]. See GENIOPLASTY.

GENYS (Lat.), n. f. Jen(ge[2]n)'i[2]s(u[6]s). Gen., *gen'ydos* (*-is*). Gr., **γένυς.** See GENEION.

GEOBLAST, n. Je'o-bla[2]st. Lat., *geoblastus* (from **γῆ**, the earth, and **βλαστός**, a sprout). A plumule (*e. g.*, that of the pea) which rises from underground in germinating. [*α*, 35.]

GEOBLASTOUS, adj. Je-o-blas'tu[3]s. Lat., *geoblastus* (from **γῆ**, the earth, and **βλαστός**, a sprout). Fr., *géoblaste.* Earth-grown; of embryos, germinating under the earth. The *Geoblastœ* of Willdenow (Ger., *Erdkeimer*) are a class of plants including the *Rhizoblastœ* and the *Arrhizoblastœ.* [B, 1, 121 (*α*, 24).]

GÉOCÉRINE (Fr.), n. Zha-o-sa-ren. A neutral serous substance, $C_{28}H_{58}O_2$, obtained from lignite, isomerous with geocerinic acid, but melting at 80° C., and soluble in cold water. [B, 46, 93 (*α*, 14).]

GEOCERINIC ACID, n. Je-o-se[2]r-i[2]n'i[2]k. From **γῆ**, earth, and **κηρός**, wax. Fr., *acide géocérinique.* A substance, $C_{28}H_{56}O_2 = C_{27}H_{55}.CO.OH$, obtained from lignite and homologous with cerotic acid. It crystallizes in white laminæ, and is soluble in boiling alcohol. [B, 46, 93 (*α*, 14); *α*, 27.]

GÉOCÉRINONE (Fr.), n. Zha-o-sa-re-non. A crystalline product, $C_{55}H_{110}O = (C_{27}H_{55})_2 : CO$, of the dry distillation of lignite, bearing chemically the same relation to geocerinic acid that acetone does to acetic acid. It is soluble in boiling alcohol and melts at 50° C. [B.]

GEOCHOSIA (Lat.), n. f. Je(ga)-o(o[3])-ko(ch[2]o)'zi[2](si[2])-a[3]. From **γῆ**, earth, and **χῶσις**, a heaping up. Ger., *Erdbad.* See *Earth* BATH.

GEOCORES (Lat.), n. Je(ge[2])-o(o[3])-kor'ez(e[2]s). A tribe of the terrestrial *Hemiptera.* [L.]

GEÖFFNET (Ger.), adj. Ge[2]-u[5]f'ne[2]t. Open. [*α*, 21.]

GEOFFRÆA (Lat.), n. f. Zhe[2]-o[2]f-fre'(fra[3]'e[2])-a[3]. From *Geoffroy*, a French savant. Fr., *geoffrée*, *geoffréa*, *g.* A small genus of leguminous trees growing in tropical America, of the *Dalbergieœ*, and closely allied to the genus *Andira.* The *Geoffrœeœ*, or *Geoffreœ* (Fr., *geoffrées*), are: Of De Candolle, a division of leguminous plants of the *Cœsalpineœ* (or [Reichenbach] of the *Hedysareœ*, and subsequently of the *Cassiaceœ*, or [Bentham and Hooker and others] of the *Dalbergieœ*). [B, 14, 42, 49, 121, 170, 173 (*α*, 24).]—**Alcoolé de g.** (Fr.). See *Tinctura geoffrœœ.*—**Décoction de g.** (Fr.). See *Decoctum geoffrœœ inermis.*—**Decoctum geoffrææ inermis** (seu **jamaicensis**) [Dutch Ph., Niemann's Notes, 1811, Edinb. Ph., 1826]. Fr., *décoction de geoffrée.* Decoction of worm-bark; made by boiling 1 part of bruised bark of *Andira inermis* in 24 parts of water till reduced to one half [Edinb. Ph.]; or 3 parts of bark in 64 of water till reduced to one fourth [Dutch Ph.]. [B, 97, 119 (*α*, 14).]—**Decoctum geoffrææ surinamensis** [Dutch Ph., Niemann's Notes, 1811]. Fr., *décoction de g.* A decoction made by boiling 1 part of the bark of *Andira retusa* in 16 parts of water till reduced to one half, and adding 2 parts of alcohol; or by boiling 1 part of the bark in 12 parts of water, straining, and adding 2 parts of tincture of g. and 1 part of syrup of orange-peel. [B, 97 (*α*, 14).]—**Essentia geoffrææ.** See *Tinctura geoffrœœ.*—**Extractum geoffrææ** [Amst. Ph., 1792; Dutch Ph., 1805; Antw. Ph., 1812; Belg. Ph., 1823; Dan. Ph., 1805]. An aqueous extract of the bark of *Andira retusa.* [B, 97, 119 (*α*, 14).]—**G. inermis, G. jamaicensis.** Fr., *geoffréa sans épines.* See ANDIRA *inermis.*—**G. pisonia, G. racemosa.** See ANDIRA *racemosa.*—**G. retusa.** See ANDIRA *retusa.*—**G. spinulosa.** A species indigenous to Brazil, furnishing angelim-seed, used as a vermifuge. [B, 180 (*α*, 24).]—**G.**

superba. The *almendora*, or almond of the Amazon; a species found in Brazil and Venezuela. The fruits, called *mari* in Brazil, are of about the size and form of a walnut, and are eaten by the inhabitants of the Ilha de São Pedro. [B, 19 (*a*, 24).]—**G. surinamensis.** See ANDIRA *surinamensis.*—**G. vermifuga.** See ANDIRA *vermifuga.*—**Tinctura geoffrææ** [Austr. Ph., 1792; Dutch Ph., 1805; Antw. Ph., 1812; Belg. Ph., 1823]. Fr., *alcoolé* (ou *teinture*) *de geoffrée.* Syn.: *essentia geoffrææ.* An alcoholic tincture of the bark of *Andira retusa.* [B, 97, 119 (*a*, 14).]

GEOFFRÉA (Fr.), n. Zhe^2-o^{2}f-fra-a^3. See GEOFFRÆA.—**G. sans épines.** See GEOFFRÆA *inermis.*

GEOFFRÉE (Fr.), n. Zhe^2-o^{2}f-fra. 1. See GEOFFRÆA. 2. In the pl., *g's*, the *Geoffrææ.*—**G. de Jamaïque** (ou **des Antilles**). See ANDIRA *inermis.*

GEOFFRŒA (Lat.), **GEOFFROYA** (Lat.), n's f. Zhe^2-o^{2}f-fre'(fro^2'e^2)-a. See GEOFFRÆA.

GEOGASTERES (Lat.), **GEOGASTRI** (Lat.), n's, m. pl. Je-(ga)-o(o^3)-ga^{2}st(ga^{3}st)'e^{2}r-ez(es), -ri(re). From γῆ, the earth, and γαστήρ, the belly. Of Link, a section of the *Gasteromycetes*, including genera which in modern classifications comprise the true *Gasteromycetes.* [B, 121, 173 (*a*, 24).]

GEOGENOUS, adj. Je-o^{2}j'e^{2}n-u^{3}s. From γῆ, the earth, and γίγνεσθαι, to come into being. Growing from or out of the earth; said especially of *Fungi* (*Hymenomycetes*) the mycelia of which are underground. The *Geogenei* are a group of *Hyphomycetes* comprising only a few sterile mycelia with a terrestrial habit. [B, 77, 121 (*a*, 35).]

GEOGRAPHICAL, adj. Je-o-gra^{2}f'i^{2}k-a^{2}l. From γῆ, the earth, and γράφειν, to write. Fr., *géographique.* Ger., *geographisch.* Pertaining to geography.

GEOGRAPHY, n. Je-o^{2}g'ra^{2}f-i^2. Gr., γεωγραφία. Lat., *geographia.* Fr., *géographie.* Ger., *Erdbeschreibung.* The science of the natural and political divisions of the earth's surface with reference to their physical characters, products, etc.—**Botanical g.** Lat., *geographia botanica.* Fr., *géographie botanique.* Ger., *botanische Erdbeschreibung.* The science of plants with reference to their distribution upon the earth, the influence of climate or soil upon them, etc. [*a*, 24.]—**Medical g.** Fr., *géographie médicale.* The science of the geographical distribution of diseases.

GEÖHRELT (Ger.), adj. Ge^2-u^{5}r'e^{2}lt. See AURICULATE.

GEÖHRT (Ger.), adj. Ge^2-u^{5}rt'. See AURITUS and EARED.

GEOLINE, n. Je'o^{2}l-en. From γῆ, the earth, and *oleum*, oil. Fr., *géoline.* A petroleum product, similar to vaseline, melting at 105° F. [B. Atthill, "Brit. Med. Jour.," Jan. 23, 1886, p. 151.]

GEOMETRIDÆ (Lat.), n. f. pl. Je(ga)-o(o^3)-me^{2}t'ri^{2}d-e(a^3-e^2). From γῆ, the earth, and μετρεῖν, to measure. The loopers or measuring worms; a family of the *Lepidoptera*, characterized, in the larval state, by their mode of progression by arching themselves as they drag the posterior extremity of the body forward and then project the anterior end. [L, 353 (*a*, 27).]

GÉOMYRICINE (Fr.), n. Zha-o-me-re-sen. A pulverulent, crystalline substance, $C_{34}H_{68}O_2$, extracted by boiling alcohol from lignite, and fusible at 80° to 83° C. [B, 46, 93 (*a*, 14).]

GEOPHAGISM, n. Je-o^{2}f'a^{2}j-i^{2}z'm. See GÆOPHAGIA.

GEOPHAGIST, n. Je-o^{2}f'a^{2}j-i^{2}st. See GÆOPHAGUS.

GEOPHILA (Lat.), n. f. Je(ga)-o^{2}f'i^{2}l-a^3. From γῆ, the earth, and φιλεῖν, to love. Of Bentham and Hooker, a genus of rubiaceous plants, of the *Psychotrieæ.* [B, 19, 42 (*a*, 24).]—**G. diversifolia.** A species found in Java and the East Indies. In Malabar, boiled with whey, it is employed in diarrhœa, and, with oil, as an external application in eye diseases. [B, 180 (*a*, 24).]—**G. macropoda.** The *Psychotria macropoda.* [B, 214, 309 (*a*, 35).]—**G. reniformis.** A West Indian and South American species having emetic properties. [B, 180 (*a*, 24).]

GEOPHILUS (Lat.), adj. Je(ga)-o^{2}f'i^{2}l-u^{3}s(u^{4}s). From γῆ, the earth, and φιλεῖν, to love. Fr., *géophile.* Living or growing upon the earth. As a n., of Leach, a genus of the *Myriopoda.* As a n. in the m. pl., *Geophili* (Fr., *géophiles*), of Hartmann, Férussac, and Menke, a division of the pulmonate *Gasteropoda* comprising those which live upon the earth. The *Geophilidæ* (Fr., *geophilidées*) of Leach are a family of the cheilopodous *Myriapoda.* [L, 180 (*a*, 21).]

GEOPHYLLOUS, adj. Je-o-fi^{2}l'u^{3}s. From γῆ, the earth, and φύλλον, a leaf. Having leaves of a dull earthy color. [*a*, 35.]

GEORGIA-BARK-TREE, n. Jo^{2}rj'i^2-a^3-ba^{3}rk-tre. The *Pinckneya pubens.* [B, 275 (*a*, 24).]

GEORGOPATHIA (Lat.), n. f. Je(ge^2)-o^{2}rg(org)-o(o^3)-pa^{2}th-(pa^{3}th)-i(e)'a^3. From γεωργός, a husbandman, and πάθος, disease. See PELLAGRA.

GEORRHETINIC ACID, n. Je-o^{2}r-re^{2}t-i^{2}n'i^{2}k. From γῆ, the earth, and ῥητίνη, resin. Fr., *acide géorrhétinique.* A resin, $C_{28}H_{48}O_{31}$, obtained from certain varieties of lignite. [A, 385; B, 46 (*a*, 14).]

GEOTACTISM, n. Je-o-ta^{2}kt'i^{2}z'm. From γῆ, the earth, and τάττειν, to arrange. Of Van Tieghem, the stimulus of gravity on the movements of protoplasmic masses in plants. [B, 77 (*a*, 35).] Cf. GEOTROPISM and PHOTOTACTISM.

GEOTROPIC, adj. Je-o-tro^{2}p'i^{2}k. From γῆ, the earth, and τρόπος, a turn. Having the property of geotropism. [*a*, 24.]

GEOTROPISM, n. Je-o^{2}t'rop-i^{2}zm. Lat., *geotropismus* (from γῆ, the earth, and τρέπειν, to turn). Fr., *géotropisme.* Ger., *Geotropismus.* 1. Of Sachs, the movement of growth in plants in a direction determined by the stimulus or retardation produced by gravity on the growing organs. [B, 229, 291 (*a*, 24).] 2. Of Darwin, see *Positive g.*—**Animal g.** Fr., *géotropisme animal.* Ger., *thierischer Geotropismus.* The instinct possessed by animals which enables them to recognize their situation and to direct their movements with reference to the action of gravity. ["Rev. des sci. méd.," Oct. 15, 1888, p. 428 (*a*, 18).]—**Negative g.** [Sachs]. The state of being apogeotropic. [B, 167, 291 (*a*, 24).]—**Positive g.** Of Sachs and others, the retarded growth of a plant-organ on the side directed toward the earth, due to the action of gravity on the tissues of the inferior side of the organ. [B, 167, 291 (*a*, 24).]—**Transverse g.** A g. in which the plant-organ is *transversely geotropic*—that is, it assumes a position at right angles, or nearly so, to the pull of gravity. [B, 229, 291 (*a*, 35).] Cf. DIAGEOTROPIC.

GEPAART (Ger.), adj. Ge^2-pa^{3}rt'. See PAIRED, CONJUGATE, and GEMINATE.

GEPUDERT (Ger.), adj. Ge^2-pud'e^{2}rt. Powdered.

GEQUETSCHT (Ger.), adj. Ge^2-kwe^{2}tsht'. See CONTUSED.

GERADE (Ger.), adj. Ge^2-ra^{3}d'e^2. Direct, straight.

GERADEHALTER (Ger.), n. Ge^2-ra^{3}d'e^2-ha^{3}lt-e^{2}r. A brace for holding a part upright. [A, 521.]

GERADESTEHEND (Ger.), adj. Ge^2-ra^{3}d'e^2-sta-e^{2}nd. Standing upright. [*a*, 21.]

GERADFLÜGLER (Ger.), n. pl. Ge^2-ra^{3}d'flu^{5}g-le^{2}r. See ORTHOPTERA.

GERADLÄUFIG (Ger.), adj. Ge^2-ra^{3}d'loif-i^{2}g. See ORTHOTROPOUS.

GERADNERVIG (Ger.), adj. Ge^2-ra^{3}d'ne^{2}rf-i^{2}g. See RECTINERVIUS.

GERADSAMIG (Ger.), adj. Ge^2-ra^{3}d'za^{2}m-i^{2}g. Orthospermous. [*a*, 24.]

GERADWENDIG (Ger.), adj. Ge^2-ra^{3}d've^{2}nd-i^{2}g. See ORTHOTROPOUS.

GERÆOLOGY, n. Je^{2}r-e-o^{2}l'o-ji^2. From γεραιός, old, and λόγος, understanding. See GERATOLOGY.

GERAFLOUR, n. Je^{2}r'a^3-flu^5-u^4-u^{5}r. The *Cheiranthus cheiri.* [A, 505 (*a*, 21).]

GÉRAÏNE (Fr.), n. Zha-ra^3-eṅ. See GERANIUM.

GERÄNDERT (Ger.), adj. Ge^2-rand'e^{2}rt. See MARGINATE and EDGED.

GERANENE, n. Je^{2}r-an'en. A colorless, mobile liquid, $C_{10}H_{16}$, obtained by distilling geraniol with zinc chloride or phosphoric anhydride. [B, 2.]

GERANIIN, n. Je^{2}r-an'i^2-i^{2}n. Fr., *géranine, géraniine.* A bitter, astringent substance, extracted from the rhizome of various species of *Geranium*; a reddish-brown powder of aromatic odor, slightly soluble in water, in alcohol, and in ether, readily soluble in a solution of potassium carbonate. [B, 93 (*a*, 14).]

GERANIOL, n. Je^{2}r-an'i^2-o^{2}l. A colorless, highly refracting liquid, $C_{10}H_{18}O$, having a strong odor of roses, obtained from Indian geranium-oil; isomeric with borneol. [B, 2.]

GÉRANION (Fr.), n. Zha-ra^3-ne-o^{2}n^2. Of Lamarck, the genus *Geranium.* [B, 121 (*a*, 24).]

GERANIS (Lat.), n. f. Je^{2}r(ge^{2}r)'a^{2}n(a^{3}n)-i^{2}s. Gen., *-ran'idos* (*-idis*). Gr., γερανίς. Of Galen, a certain bandage for fracture of the clavicle, dislocation of the shoulder, etc. [A, 311, 322 (*a*, 21).]

GERANIUM (Lat.), n. n. Je^{2}r(ge^{2}r)-an(a^{3}n)'i^2-u^{3}m(u^{4}m). Gr., γεράνιον. Fr., *géranium, géraïne, géranier, géranion* (1st def.), *racine de bec-de-grue tacheté, racine de pied-de-corneille* (2d def.). Ger., *Storchschnabel* (1st def.), *Fleckstorchschnabelwurzel* (2d def.). It., Sp., *geranio.* 1. Of Linnæus, an extensive genus of the *Geraniaceæ*, the species of which grow chiefly in the temperate regions of both hemispheres. The *Geranarieæ* of Dumortier are an order of the *Tropetalæ*, comprising the *Zygophylleæ, Oxalideæ, Balsamineæ, Geraniaceæ*, and *Linideæ.* The *Gerania* are: Of B. Jussieu (1759), an order of plants comprising *Malpighia, Banisteria, Bombax, Triopteris, Vitis, Cissus, Cissampelos*, etc.; of Jussieu (1789), an order of plants comprising *Geranium, Monsonia*, etc. The *Geraniaceæ* [St.-Hilaire] (Fr., *géraniacées*; Ger., *Geraniaceen, Storchschnabelgewächse*) are the crane-bills; of De Candolle, an order of the *Thalamifloræ*; of Agardh, an order of the *Gynobaseæ*; of Reichenbach, a family of the *Columniferæ* and, subsequently, of *Geraniifloræ*; of Dumortier, a family of the *Geranarieæ*; of Lindley, an order of the *Geraniales*; of Link, an order of the *Allostemones.* The species have aromatic and astringent qualities, many are fragrant, some have a musky odor. The *Geraniales* (the *geranials*, the *geranial alliance* [Lat., *nixus geranialis*] of Lindley) are: Of Lindley (1833), an alliance of the *Gynobasieæ*, consisting of the *Hydrocereæ, Tropæoleæ, Geraniaceæ, Oxalideæ*, and *Balsamineæ*; subsequently (1847) an alliance of hypogynous exogens (*Exogenæ hypogynæ*), comprising the *Linaceæ, Chlænaceæ, Oxalidaceæ, Balsaminaceæ*, and *Geraniaceæ*; of Bentham and Hooker, a cohort of polypetalous dicotyledons of the *Discifloræ*, including the *Lineæ. Humiriaceæ, Malpighiaceæ, Zygophylleæ, Geraniaceæ, Rutaceæ, Simarubeæ, Ochnaceæ, Burseraceæ. Meliaceæ*, and *Chailletiaceæ.* The *Geranidiæ* of Dumortier are a family of the *Thalamiscrtia*, comprising *Geranium* and *Erodium.* The *Geranieæ* (Fr., *géraniées*) of De Candolle are a family of polypetalous dicotyledons, regarded by others as a division of the *Geraniaceæ*; of Bentham and Hooker, a tribe of the *Geraniaceæ*, including *Geranium, Erodium*, etc. The *Geraniifloræ* of Reichenbach are a formation of the *Schizocarpicæ*, comprising the *Malvaceæ, Geraniaceæ, Bombaceæ*, and *Oxalideæ.* The *Geranioideæ* are: Of Ventenat, an order of his 13th class, comprising *Erodium, Geranium, Pelargonium, Monsonia*, etc.; of Meissner and of Brongniart, a class of plants (*Dialypetalæ hypogynæ*) comprising the *Geraniaceæ* and allied groups, such as the *Tropæoleæ, Lineæ, Oxalideæ*, etc. 2. Of the U. S. Ph., the rhizome of *G. maculatum.* [B, 1, 5, 19, 34, 42, 121, 170, 173, 180 (*a*, 24).]—**Australian g.** The *G. dissectum.* [B, 275 (*a*, 24).]—**Bassinet g.** See *G. silvati-*

cum.—**Blood-red-flowered g.** The *G. sanguineum.* [B, 275 (*a*, 24).]—**Cut-leaved g.** The *G. dissectum.* [B, 275 (*a*, 24).]—**Dove's-foot-g.** See *G. molle.*—**Extract of rose-leaf g.** A perfume made by dissolving 3 oz. of the volatile oil of the leaves of *Pelargonium odoratissimum* in 1 gallon of alcohol. [B, 5 (*a*, 14).]—**Extractum geranii fluidum** [U. S. Ph.]. Fr., *extrait liquide de géranium maculé.* Ger., *flüssiges Fleckstorchschnabel-Extrakt.* A fluid extract made by extracting the powdered rhizome of *g. maculatum* with dilute alcohol in such a way that 1 part by volume of the extract corresponds to 1 part by weight of the rhizome. [B, 80, 95 (*a*, 14).]—**Feather-g.** See Chenopodium *botrys.*—**Fluid extract of g.** See *Extractum geranii fluidum.*—**Fox-g.** See *G. robertianum.*—**Garden-g.** A name for various species of *Pelargonium.* [B, 19 (*a*, 24).]—**G. argenteum.** Fr., *géranium argenté.* A variety of *G. silvaticum.* [B, 173 (*a*, 24).]—**G. batrachioides.** Fr., *géranium à feuilles de renoncule.* According to some, a variety of *G. silvaticum*; according to others, the *G. pratense.* [B, 173, 180 (*a*, 24).]—**G. carolinianum.** The Carolina crane's-bill; a diffusely branched species growing in fields and on hills in the United States and Canada; doubtfully identified with *G. dissectum.* [B, 34 (*a*, 35).]—**G. chærophyllum.** The *Erodium cicutarium.* [B, 180 (*a*, 24).]—**G. ciconium.** The *Erodium ciconium.* [B, 180 (*a*, 24).]—**G. cicutarium.** The *Erodium cicutarium.* [B, 180 (*a*, 24).]—**G. columbinum.** Fr., *pied de pigeon.* Core-core, long-stalked g.; a species found in dry and stony places throughout Europe. It is now little used medicinally. Its herb was formerly employed like that of *G. robertianum.* [B, 173, 180 (*a*, 24).]—**G. cuculiatum.** The *Pelargonium cucullatum.* [B, 173, 180 (*a*, 24).]—**G. dissectum.** Australian g., cut-leaved g., jagged-leaved dove's-foot, crane's-bill. A purple-flowered species growing in Australia and Europe, formerly used in medicine, especially as a vulnerary. [A, 511; B, 34, 64, 275 (*a*, 35).]—**G. fœtidum.** See *G. robertianum.*—**G. gruinum.** The *Erodium gruinum.* [B, 173, 180 (*a*, 24).]—**G. Hernandezii.** A species indigenous to Mexico; very similar to *G. mexicanum,* which it resembles in properties and uses. [B, 180 (*a*, 24).]—**G. hirtum.** The *Erodium hirtum.* [B, 173 (*a*, 24).]—**G. lancastriense.** Fr., *géranium couché.* A variety of *G. sanguineum.* [B, 173 (*a*, 24).]—**G. macrorrhizum.** Fr., *géranium à grosses racines.* Long-rooted crane's-bill; a species indigenous to southern Europe. Its root is astringent. [B, 173 (*a*, 24).]—**G. maculatum.** Fr., *géranium maculé.* Ger., *gefleckter Storchschnabel.* Spotted crane's-bill, alum-root, American crow-foot; a species growing throughout the United States in moist woods, thickets, and hedges, generally in low grounds. Its rhizome (*g.* [U. S. Ph.]) is a mild and delicate astrin-

GERANIUM MACULATUM. [A, 327.]

gent, used internally in diarrhœa, cholera infantum, and hæmorrhage, and externally as an application to indolent ulcers. [B, 5, 19, 173, 180, 275 (*a*, 24).]—**G. malvaceum.** See *G. rotundifolium.*—**G. malvæfolium.** See *G. pusillum.*—**G. mexicanum.** Ger., *mexikanischer Storchschnabel.* A species found in Mexico, where its root is employed as an astringent in diarrhœa and dysentery and in eye diseases. [B, 180 (*a*, 24).]—**G. molle.** Fr., *géranium pied-de-pigeon.* Ger., *weicher Storchschnabel.* Dove's-foot-g.; a European species having properties similar to those of *G. robertianum.* [B, 180 (*a*, 24).]—**G. moschatum.** The *Erodium moschatum.* [B, 173, 180 (*a*, 24).]—**G. nodosum.** Ger., *knotiger Storchschnabel.* A species found in southern Germany and Europe. Its roots are astringent, and in Italy are often substituted for *radix tormentillæ.* [B, 180 (*a*, 24).]—**G. noveboracense.** See *G. maculatum.*—**G.-oil.** 1. In Europe, the volatile oil of *Andropogon schœnanthus*; used to adulterate attar of roses. 2. The fragrant oil of *Pelargonium roseum* and other species of *Pelargonium.* [B, 5, 18, 185 (*a*, 24).]—**G. parviflorum.** See *G. pusillum.*—**G. pratense.** Fr., *géranium des prés.* Ger., *Wiesen-Storchschnabel.* Crane's-bill crow-foot, wild g., meadow-g.; a species found in central and northern Europe. The herb was formerly used as a vulnerary. [B, 173, 180 (*a*, 24).]—**G. prostatum.** See *G. lancastriense.*—**G. purpureum.** Fr., *géranium pourpré.* A variety of *G. robertianum.* [B, 173 (*a*, 24).]—**G. pusillum.** Ger., *kleiner Storchschnabel.* Small-flowered g.; a species found throughout Europe. The herb was formerly used like that of *G. robertianum.* [B, 180 (*a*, 24).]—**G. robertianum.** Fr., *herbe à Robert, bec de cigogne* (ou *de grue à Robert*), *herbe à l'esquinancie, patte d'alouette, persil marsigoin, pied de colombe, Robertin.* Ger., *Roberts-Storchschnabel, Ruprechtskraut, Rothlaufskraut, Gottesgnad, Gichtkraut, Taubenfusskraut.* Herb-Robert, fox-g., wild g.; a species growing wild in Europe and the United States. It has a disagreeable astringent taste, and has been employed in intermittent fever, hæmorrhage, consumption, nephritic complaints, etc., as a gargle in throat affections, and externally as an application to swollen breasts and other swellings. [B. 5, 173, 180 (*a*, 24).]—**G. rotundifolium.** Fr., *géranium à feuilles rondes.* Ger., *rundblättriger Storchschnabel.* It., *crisettina silvatica.* 1. Round-leaved g., a species found in Europe, the herb of which was used like that of *G. columbinum* and *G. robertianum.* [B, 173, 180 (*a*, 24).] 2. Of Pollich, see *G. pusillum.*—**G. sanguineum.** Blood-red-flowered g., a species rich in tannin; formerly used as an astringent and styptic. [B, 173, 180 (*a*, 24).]—**G. silvaticum.** Fr., *géranium des bois.* Crow-flower, bassine-g., wood-g.; an Alpine species of which the flowers (together with iron sulphate) furnish a black dye, and both roots and flowers are astringent. [B, 173 (*a*, 24).]—**G. striatum.** Ger., *gestreifter Storchschnabel.* Striped crane's-bill, a species found in southern Europe. The root is astringent, and, like that of *G. nodosum*, is often sold in the Italian shops for *radix tormentillæ.* [B, 180 (*a*, 24).]—**G. tuberosum.** Ger., *knolliger Storchschnabel.* Tuberous-rooted crane's-bill, the γεράνιον of Dioscorides; a species of which the tuberous roots were formerly used as a tonic and stimulant, and, infused in wine, as a lotion in inflammation of the pudenda. [B, 180 (*a*, 24).]—**Horse-shoe-g.** See Pelargonium *zonale.*—**Indian g.** The *Andropogon nardus.* [B, 19, 275 (*a*, 24).]—**Long-stalked g.** See *G. columbinum.*—**Meadow-g.** See *G. pratense.*—**Nettle-g.** The *Coleus fruticosus.* [B, 19, 275 (*a*, 24).]—**Nutmeg-scented g.** The Pelargonium *odoratissimum.* [*a*, 35.]—**Pin-grass g.** The *Erodium cicutarium.* [*a*, 24.]—**Round-leaved g.** The *G. rotundifolium.* [B, 275 (*a*, 24).]—**Rose-g.** The *Pelargonium odoratissimum.* [B, 5 (*a*, 24).]—**Scarlet g.** The *Pelargonium inquinans.* [*a*, 24.]—**Shining-leaved g.** The *G. lucidum.* [B, 275 (*a*, 24).]—**Small-flowered g.** See *G. pusillum.* [B, 275 (*a*, 24).]—**Strawberry-g.** The *Saxifraga sarmentosa.* [B, 275 (*a*, 24).]—**Turkish essence of g.** It., *olio turco di geranio.* A pale, brownish-yellow volatile oil, fluid at ordinary temperatures, distilled from the leaves of *Pelargonium odoratissimum.* It resembles attar of roses in smell, and is extensively used for adulterating the latter. [B, 5 (*a*, 14).]—**Wild g.** 1. In California, the *Erodium cicutarium.* ["Proc. of the Am. Pharm. Assoc.," xxvii (*a*, 14).] 2. See *G. pratense* and *G. robertianum.*—**Wood-g.** See *G. silvaticum.*

GERANIUM ROBERTIANUM. [A, 327.]

GÉRANIUM (Fr.), n. Zha-ra^3-ne-u^{3}m. See Geranium.—**Extrait liquide de g. maculé.** See *Extractum* geranii *fluidum.*—**G. à feuilles de renoncule.** See Geranium *batrachioides.*—**G. à feuilles rondes.** See Geranium *rotundifolium.*—**G. à grosses racines.** See Geranium *macrorrhizum.*—**G. à Robert.** See Geranium *robertianum.*—**G. couché.** See Geranium *lancastriense.*—**G. des bois.** See Geranium *silvaticum.*—**G. des prés.** See Geranium *pratense.*—**G. épineux.** See Geranium *spinosum.*—**G.-lierre.** The *Pelargonium peltatum.* [B, 121 (*a*, 24).]—**G. maculé.** See Geranium *maculatum.*—**G. sanguin.** See Geranium *sanguineum.*

GERANYL, n. Je^{2}r'a^{2}n-i^{2}l. The radicle, $C_{10}H_{17}$, found in geraniol. [B, 2.]—**G. benzoate.** An oily liquid of pungent odor. [B, 2.]—**G. bromide.** A substance, $C_{10}H_{17}Br$. [B, 2.]—**G. chloride.** A yellowish oily liquid, $C_{10}H_{17}Cl$, of camphoraceous odor. [B, 2.]—**G. oxide.** A colorless liquid, $(C_{10}H_{17})_2O$. [B, 2.]—**G. succinate.** An oily compound of g. and succinic acid. [B, 2.]—**G. sulphide.** A yellowish liquid, $(C_{10}H_{17})_2S$, of disagreeable odor. [B, 2.]—**G. valerate.** An oily compound of g. and valeric acid. [B, 2.]

GERARD, n. Je^{2}r-a^{3}rd'. See Ægopodium *podagraria.*

GERARDIA (Lat.), n. f. Zha-ra^{3}rd'i^2-a^3. From *Gérard* (*Louis*), a botanist. Fr., *gérardie.* False fox-glove; of Linnæus, a genus of the *Scrophularineæ*, tribe *Gerardieæ.* The *Gerardieæ* (Fr., *gérardiées*) are a tribe of scrophulariaceous plants made by Bentham, belonging, according to Bentham and Hooker and Wood, to the series or suborder *Rhinanthideæ*, comprising *Escobedia, Physocalyx,* and other genera included in the subtribes *Escobedieæ, Hyobancheæ, Buchnereæ,* and *Eugerardieæ.* [B, 34. 42, 170 (*a*, 24).]—**G. pedicularia.** The bushy g., or American foxglove; a species growing in Michigan. ["Proc. of the Am. Pharm. Assoc.," vii (*a*, 14).]—**G. quercifolia.** The golden oak; a species growing in Michigan, also in Mississippi, where its root is used in snake-bites. ["Proc. of the Am. Pharm. Assoc.," vii, xxii (*a*, 14).]—**G. tuberosa.** Fr., *gérardie tubéreuse, herbe au charpentier.* A species the flowers of which are employed at Martinique in pectoral complaints, and the leaves as a discutient. [B, 173 (*a*, 24).]

GERAS (Lat.), n. n. Je(ga)'ra^{2}s(ra^{3}s). Gen., *ger'aos* (*-is*). Gr., γῆρας. 1. Old age, senility. 2. An old man. [L, 50 (*a*, 14).]

GERATACEA, n. In Brazil, the *Acacia jurema*. [B, 121 (*a*, 24).]

GERÄTH (Ger.), n. Ge^{2}-rat′. A tool. [L, 46 (*a*, 21).]

GERATIC, adj. Je^{3}r-a^{2}t′i^{2}k. Lat., *geraticus* (from γῆρας, old age). Of or pertaining to senility. The *Geratici* are an order of diseases of the aged. [L, 107.]

GERATOLOGY, n. Je^{2}r-a^{2}t-o^{3}l′o-ji^{3}. From γῆρας, old age, and λόγος, understanding. The pathology, hygiene, etc., of old age. [L, 50 (*a*, 14).]

GERÄUMIGKEIT (Ger.), n. Ge^{3}-roim′ig-kit. Capacity. [L, 80.]

GERÄUSCH (Ger.), n. Ge^{3}roish′. 1. A murmur, bruit, râle, or souffle. 2. An epizootic observed among cattle in the Alps in 1794. [A, 301.]—**Arterieng'e.** An arterial murmur or thrill.—**Blasenrasselg'.** See *Vesicular* RÂLE.—**Bronchialg'.** See *Bronchial* RESPIRATION.—**Bronchialrusselg'.** See BRONCHIORRHONCHUS.—**Gebärmutterg'.** See *Uterine* SOUFFLE.—**Glou-glou-G.** See BRUIT *de glou-glou pleural.*—**Diastolisches G.** A diastolic murmur. [A, 319 (*a*, 21).]—**Druckg'.** A souffle caused by pressure upon a blood-vessel. [*a*, 18.]—**Feileng'.** See BRUIT *de lime.*—**Gefässg'.** A vascular murmur, bruit, or souffle. [A, 521.]—**Glucksseng'.** See BRUIT *de glou-glou pleural.*—**Gurgelndes G.** See BORBORYGMUS.—**Herzg'.** A cardiac murmur.—**Muskelg'.** See BRUIT *musculaire* and *Muscle*-SOUND.—**Nonneng'.** A venous murmur. [*a*, 34.]—**Plätschernde G'e.** A splashing sound heard on auscultation in the cæcal region. [*a*, 34.]—**Respirationsg'.** See *Respiratory* MURMUR.—**Schülpg'.** See CYMECHOS.—**Veneng'.** A venous murmur. [*a*, 34.]—**Welleng'.** See CYMECHOS.

GERBE (Fr.), n. Zhe^{3}rb. A sheaf, bundle. [*a*, 24.]

GERBERA (Lat.), n. f. Ge^{3}rb′e^{2}r-a^{3}. From *Gerber*. Of Bentham and Hooker, a genus of the *Compositæ*, tribe *Mutisiaceæ*. The *Gerbereæ*, or *Gerberieæ*, of Endlicher and of Cassini are a subtribe of composite plants of the *Mutisieæ* (or of the *Mutisiaceæ* [Bentham and Hooker]), including (Endlicher) the genera of De Candolle's *Barnadesieæ* and *Eumutisieæ*, and (Cassini) *Onoseris*, *Isotypus*, *Trichocline*, *Gerberia*, etc. [B, 42, 47, 170 (*a*, 24).]—**G. anandria.** A species of which the pollen is used by the Chinese as an antiseptic application to wounds. [L, 75.]

GERBERBAUM (Ger.), n. Ge^{2}rb′e^{2}r-ba^{3}-u^{4}m. 1. The genus *Coriaria*. 2. The *Coriaria myrtifolia*. [B, 48, 92 (*a*, 14).]

GERBERSTRAUCH (Ger.), n. Ge^{2}rb′e^{2}r-stra^{3}-u^{4}ch^{3}. The genus *Coriaria*. [B, 121, 180 (*a*, 24).]—**Myrtenblättriger G.** See CORIARIA *myrtifolia*.

GERBSAUER (Ger.), adj. Ge^{2}rb′za^{3}-u^{4}-e^{3}r. Tannic.

GERBSÄURE (Ger.), n. Ge^{3}rb′zoir-e^{2}. Tannic acid. [A, 324 (L).]—**Filixg'.** See FILICITANNIC ACID.—**Galläpfelg'.** Gallotannic acid. [B.]—**Gallusg'.** See GALLOTANNIC ACID and PYROGALLIC ACID.—**Gelbg'.** Luteogallic acid. [B, 48 (*a*, 14).]—**G'bleisalbe.** Lead-tannate plaster. [*a*, 21.]—**G'salbe.** See *Unguentum* ACIDI TANNICI.

GERBSTOFF (Ger.), n. Ge^{2}rb′sto^{3}f. Tannin. [L, 46 (*a*, 21).]—**G'ig.** Containing tannin.

GERBSTOFFRINDE (Ger.), n. Ge^{3}rb′sto^{3}f-ri^{2}nd-e^{2}. An astringent bark.—**Aechte G.** See CORTEX *adstringens brasiliensis*.

GERCEAU (Fr.), n. Zhe^{2}r-so. The *Ervum hirsutum*. [B, 173 (*a*, 24).]—**G. luisset.** See ERVUM *hirsutum*.

GERÇURE (Fr.), n. Zhe^{3}r-su^{6}r. A fissure of the skin or of a mucous membrane.

GEREIFT (Ger.), adj. Gé^{3}-rift′. See COSTATE (1st def.).

GEREIHET (Ger.), adj. Ge^{2}-ri′e^{2}t. Arranged in a series. [*a*, 24.]

GEREINIGT (Ger.), adj. Ge^{2}-rin′i^{3}gt. Cleaned, refined, purified. [L, 46 (*a*, 21).]

GEREIZT (Ger.), adj. Ge^{3}-ritzt′. Irritated. [A, 521.]

GEREMMA (Lat.), n. f. Je^{2}r(ge^{2}r)-e^{2}m′ma^{3}. See JUREMA.—**G'rinde** (Ger.). See *Jurema*-BARK.

GERGELIMÖL (Ger.), n. Ge^{2}rg′e^{2}l-em-u^{6}l. An oil obtained from the seed of *Sesamum orientale*. [B, 180 (*a*, 24).]

GERICHTLICH (Ger.), adj. Ge^{3}-ri^{2}ch^{3}t′li^{3}ch^{3}. Judicial, legal. forensic. [L, 46 (*a*, 21).]

GERICHTSARZT (Ger.), n. Ge^{3}-rich^{2}ts′a^{3}rtzt. In Germany, a medico-legal officer, a coroner, also a physician versed in forensic medicine. [A, 319 (*a*, 21) ; A, 521, 523.]

GERICHTSÄRZTLICH (Ger.), adj. Ge^{3}-ri^{2}ch^{2}ts′artzt-li^{3}ch^{3}. Pertaining to forensic medicine.

GERICTERUS (Lat.), n. m. Je^{3}r(gar)-i^{3}k′te^{3}r-u^{3}s(u^{4}s). From γῆρας, old age, and ἴκτερος, the jaundice. Ger., *Greisengelbsucht*. Senile jaundice. [L, 50 (*a*, 14).]

GERIEFT (Ger.), adj. Ge^{3}-reft′. See COSTATE (2d def.).

GERILLE (Fr.), n. Zhe^{3}r-el. The *Cantharellus cibarius*. [B, 121, 173 (*a*, 24).]

GERILLT (Ger.), adj. Ge^{3}-ri^{3}lt′. Striate, valleculate. [*a*, 24.]

GERINGELT (Ger.), **GERINGT** (Ger.), adj's. Ge^{3}-ri^{3}n^{3}′e^{2}lt, -ri^{3}n^{2}t′. See ANNULATE.

GERINGSWALDE (Ger.), n. Ge^{3}-ri^{2}n^{3}z′va^{3}ld-e^{2}. A place in the district of Zwickau, Saxony, where there is a mineral spring. [A, 375 (*a*, 14).]

GERINNBAR (Ger.), adj. Ge^{2}-ri^{3}n′ba^{3}r. See COAGULABLE.—**G'keit.** See COAGULABILITY.

GERINNELT (Ger.), adj. Ge^{3}-ri^{3}n′ne^{3}lt. See CANALICULATE.

GERINNSEL (Ger.), n. Ge^{3}-ri^{3}n′ze^{2}l. See COAGULUM.

GERINNT (Ger.), adj. Ge^{3}-ri^{3}nt′. See CANALICULATE.

GERINNUNG (Ger.), n. Ge^{2}-ri^{2}n′nun^{2}. See COAGULATION.—**G'sfähigkeit.** Coagulability. [A, 521.]—**Labg'.** The coagulation of milk by means of the rennet ferment. [K.]—**Säureg'.** Coagulation effected by the action of an acid. [K.]

GERIPPE (Ger.), n. Ge^{2}-ri^{2}p′pe^{2}. A skeleton. [L, 46 (*a*, 21).]

GERIPPT (Ger.), adj. Ge^{2}-ri^{2}pt′. See COSTATE.

GERM, n. Ju^{5}rm. Gr., βλαστός. Lat., *germen*. Fr., *germe*. Ger., *Keim* (1st def.), *Fruchtknoten* (2d def.), *Fruchtknopf*. It., *germe*. Sp., *germen*, *brote*. 1. The primitive rudiment of an animal or vegetable organism, of a particular part of such organism, or of anything (material or of the nature of a process) that may be developed. 2. In botany, the ovary, the embryo, or the bud. [*a*, 24.]—**Common enamel g.** See under *Enamel g.*—**Dental g.** Lat., *germen dentale*. Fr., *germe dentaire*. Ger., *Zahnkeim*. An embryonic tooth. [J, 33.] See *Dental* FOLLICLE.—**Disease g's.** Micro-organisms to which, or to certain products of their processes of growth, various infectious diseases are attributed.—**Enamel g.** Fr., *germe de l'émail*. Ger., *Schmelzkeim*. Of Kölliker (1863), the invagination or downward growth of the Malpighian layer of the oral epithelium along the line of the jaws. By special growth at various points it appears to become divided into segments, each of which becomes the enamel of a tooth. The entire downward growth of epithelium before it has divided into segments is sometimes known as the *common enamel g.* After it has divided into segments, each segment is known as a *special enamel g.* [J.] See also *Enamel* ORGAN.—**Feather g.** Fr., *germe de la plume*. In birds, a papillar elevation of the dermal tissue in the region where a feather is found, forming an elongated cone with a pointed apex which subsequently gives rise to the feather follicle. [*a*, 27.]—**Flesh g.** See SARCOPHYTE.—**G.-dise, G. hill.** See DISCUS *proligerus*.—**Special enamel g.** See under *Enamel g.*

GERMAN, adj. Ju^{5}rm′a^{3}n. Lat., *germanicus*. Fr., *allemand*. Ger., *deutsch*. 1. Indigenous to or obtained from Germany. 2. Described by G. writers (see *G.* MEASLES).

GERMANDER, n. Ju^{5}r-ma^{2}nd′u^{5}r. Gr., χαμαίδρυς. Lat., *g.* Fr., *germandrée chamædrys* [Fr. Cod.]. Ger., *G.*, *edler G.* It., *calamandrina*, *camedrio*. Sp., *germandria*. 1. The *Teucrium chamædrys*. 2. The *Veronica agrestis*. [A, 505 (*a*, 21).]—**American g.** See TEUCRIUM *canadense*.—**Bastard g.** The *Stemodia maritima*. [B, 275, 282 (*a*, 24).]—**Common g.** Ger., *gemeiner Gamander*. The *Teucrium chamædrys*. [B, 19, 180 (*a*, 35).]—**Creeping g.** The *Teucrium scordium*. [B, 19 (*a*, 35).]—**Decoction of g.** See *Decoctum* CHAMÆDRYOS *amarum*.—**Extract of g.** See *Extractum* CHAMÆDRYOS.—**Garlic g.** The *Teucrium scordium*. [A, 505 (*a*, 21).]—**G. marum.** The *Teucrium maritimum*. [B, 173 (*a*, 24).]—**Golden g.** The *Teucrium aureum*.—**Jagged g.** See TEUCRIUM *botrys*.—**Madeira g.** See TEUCRIUM *betonicum*.—**Poly g.** See TEUCRIUM *polium*.—**Pyrenean g.** See TEUCRIUM *pyrenaicum*.—**Sea-side g.** See *Bastard g.*—**Shining g.** See TEUCRIUM *lucidum*.—**Small-flowered g.** See TEUCRIUM *campanulatum*.—**Small g.** See TEUCRIUM *chamædrys*.—**Sweet-scented g.** See TEUCRIUM *massiliense*.—**Tree-g.** See TEUCRIUM *fructicans*.—**Wall-g.** See TEUCRIUM *chamædrys*.—**Water-g.** Fr., *germandrée aquatique* (ou *d'eau*). See TEUCRIUM *scordium*.—**Wild g.** The *Teucrium chamædrys*. [B, 275 (*a*, 24).]—**Wood-g.** Fr., *germandrée des bois*. The *Teucrium scorodonia*. [A, 505 (*a*, 21).]

GERMANDRÉE (Fr.), n. Zhe^{3}r-ma^{3}n^{3}-dra. See GERMANDER.—**Extrait de g.** See *Extractum* CHAMÆDRYOS.—**G. à feuilles de scordium.** The *Teucrium scordioides*. [B, 173 (*a*, 24).]—**G. aquatique.** See *Water*-GERMANDER.—**G. bâtarde.** The *Veronica teucrium*. [B, 121, 173 (*a*, 24).]—**G. botrys.** The *Teucrium botrys*. [B, 46 (*a*, 14).]—**G. chamædrys.** The *Teucrium chamædrys*. [B, 173 (*a*, 24).]—**G. d'eau** [Fr. Cod.]. See *Water*-GERMANDER.—**G. de montagne.** The *Teucrium montanum*. [B, 173 (*a*, 24).]—**G. des bois.** See *Wood*-GERMANDER.—**G. élevée.** The *Teucrium tomentosum*. [B, 173 (*a*, 24).]—**G. en tête.** The *Teucrium belium*. [B, 173 (*a*, 24).]—**G. fausse.** The *Veronica chamædrys*. [B, 121, 173 (*a*, 24).]—**G. femelle.** The *Teucrium botrys*. [B, 19, 121, 173 (*a*, 24).]—**G. jaune.** The *Teucrium flavum*. [B, 173 (*a*, 24).]—**G. maritime.** The *Teucrium maritimum*. [B, 173 (*a*, 24).]—**G. officinale, G. petit chêne.** The *Teucrium chæmadrys*. [B, 19, 173 (*a*, 24) ; B, 46 (*a*, 14).]—**G. renflée.** The *Teucrium inflatum*. [B, 173 (*a*, 24).]—**G. sauvage.** The *Teucrium scorodonia*. [B, 19, 173 (*a*, 24).]—**G. théa.** The *Teucrium thea*. [B, 173 (*a*, 24).]

GERMANIUM (Lat.), n. n. Ju^{5}rm(ge^{2}rm)-a(a^{3})′ni^{2}-u^{3}m(u^{4}m). Ger., *G.* Syn. : *ekasilicium*. An element which, as obtained by reduction of its oxide and subsequent fusion, is a grayish, lustrous metal crystallizing in regular octaedra, of the sp. gr. of 5·469 at 20·4° C., and melting at 900° C. ; soluble in aqua regia, insoluble in hydrochloric acid, converted by nitric acid into a white oxide, and by sulphuric acid into a sulphate. Atomic weight, 72·32 ; symbol, Ge. [Winkler, "Am. Jour. of Sci.," Jan., 1887 (B).]

GERMARIUM (Lat.), n. n. Ju^{5}rm(ge^{2}rm)-a(a^{3})′ri^{3}-u^{3}m(u^{4}m). From *germen*, a germ. A portion of the female generative apparatus in which ova are developed. [A, 12.]

GERME (Fr.), n. Zhé^{3}rm. See GERM.—**Faux g.** A blighted ovum. [A, 44.] See MOLE.—**G. animé, G. atmosphérique, G. de contagion.** See *G. morbifère*.—**G. de l'émail.** See *Enamel* GERM.—**G. dentaire.** See *Dental* GERM.—**G. de la plume.** See *Feather* GERM.—**G. du poil.** See *Hair* PAPILLA.—**G. infectieux, G. morbifère, G. nocif, G. putride.** A micro-organism giving rise to disease or to putrefaction. [A, 385.]—**G. rabique.** The micro-organism of rabies. [L, 88.]—**G. urogénital.** See *Wolffian* BODY.

GERMEMENT (Fr.), n. Zhe^{2}rm-ma^{3}n^{3}. A newly hatched leech. [A, 385.]

GERMEN (Lat.), n. n. Ju^{5}rm(ge^{2}rm)′e^{2}n. Gen., *germ'inis*. See GERM and SEMEN.—**G. dentale.** See *Dental* GERM.—**G. falsum.**

A blighted ovum.—**G. fœmineum.** Of Purkinje, see *Germinal* VESICLE.—**G. spurium.** See *G. falsum.*

GERMER (Ger.), n. Ge^{2}rm'e^{2}r. The genus *Veratrum.* [B, 180 (*a*, 24).]—**Gebräuchlicher G.** The *Veratrum officinale.* [B, 180 (*a*, 24).]—**G'wurzel.** The root of *Veratrum album.* [B, 180 (*a*, 24).]—**Grüner G.** The *Veratrum viride.* [B, 180 (*a*, 24).]—**Lobel's G.** The *Veratrum lobelianum.* [B, 180 (*a*, 24).]—**Officineller G.** The *Veratrum officinale.* [B, 180 (*a*, 24).]—**Schwarzer G.** The *Veratrum nigrum.* [B, 180 (*a*, 24).]—**Weisser G.** The *Veratrum album.* [B, 180 (*a*, 24).]

GERMICIDAL, adj. Ju^{5}rm-i^2-sid'a^{2}l. Fr., *germicide.* Destructive of germs, intended to kill germs (said of treatment).

GERMICIDE, n. Ju^{5}rm'i^2-sid. From *germen*, a germ, and *cædere*, to kill. Fr., *g.* An agent that kills germs.

GERMIDUCT, n. Ju^{5}rm'i^2-du^{3}kt. From *germen*, a germ, and *ducere*, to lead. Fr., *germiducte.* The efferent canal of the germigene. [A, 385.]

GERMIFUGE (Fr.), adj. and n. Zhe^{2}r-me-fu^{6}zh. From *germen*, a germ, and *fugare*, to banish. Having the power of expelling germs; as a n., an agent having that power. [A, 385.]

GERMIGENE, n. Ju^{5}rm'i^2-jen. From *germen*, a germ, and *genere* (= *gignere*), to engender. Fr., *germigène.* In the *Tæniadæ*, that portion of the female genital apparatus which is considered formative of the germinal vesicles. [A, 385.]

GERMINAL, adj. Ju^{5}rm'i^{2}n-a^{2}l. Lat., *germinalis* (from *germen*, a germ), *germinativus.* Fr., *g.* Ger., *keimartig, keimbar.* Pertaining to germination or to a germ; capable of germinating. [B (*a*, 24).]

GERMINATING, adj. Ju^{5}rm'i^{2}n-at-i^{2}n^2. In process of germination.

GERMINATIO (Lat.), n. f. Ju^{5}rm(ge^{2}rm)-i^{2}n-a(a^3)'shi^2(ti^2)-o. Gen., *-on'is.* See GERMINATION.—**G. admotiva.** See under ADMOTIVUS.

GERMINATION, n. Ju^{5}rm-i^{2}n-a'shu^{3}n. Gr., *βλάστησις.* Lat., *germinatio* (from *germinare*, to sprout forth). Fr., *g.* Ger., *Keimen, Keimung.* It., *germinazione.* Sp., *germinación.* The process of sprouting of a seed or spore. [B, 1, 123, 291 (*a*, 24).]

GERMINATIVE, adj. Ju^{5}rm'i^{2}n-at-i^{2}v. Lat., *germinativus.* Fr., *germinatif.* Ger., *germinativ.* 1. Germinating. 2. Capable of germination. 3. Representing a germ. [A, 385.]

GERMITOX, n. Ju^{5}rm'i^2-to^{2}x. A germicide. [A. D. Macdonald, "Brit. Med. Jour.," Feb. 10, 1883, p. 251.]

GERMOGEN, n. Ju^{5}rm'o-je^{2}n. From *germen*, a germ, and *genere*, to engender. 1. Of Balfour, a nucleated mass of protoplasm (syncytium) in which cell outlines are apparently absent, but which ultimately divides into ova. 2. Of Jigima, one of the masses of more or less distinct cells which ultimately become ova. [J, 1; "Quart. Jour. of Micr. Sci.," 1882, p. 203 (J).]

GERMS (Fr.), n. Zhe^{2}rms. A village in the department of the Hautes-Pyrénées, France, where there are sulphurous springs. [L, 87 (*a*, 14).]

GERMSELKRAUT (Ger.), n. Ge^{2}rm'ze^{2}l-kra^3-u^{4}t. The *Sisymbrium alliaria.* [B, 180 (*a*, 24).]

GERMULE, n. Ju^{5}rm'u^{2}l. A minute germ. [J.]—**Inclusion des g's** (Fr.). See under INCLUSION.

GEROCOMEUM (Lat.), n. n. Je(ga)-ro(ro^3)-ko^{2}m-e(a)'u^{3}m(u^{4}m). See GEROCOMIUM.

GEROCOMIA (Lat.), **GEROCOMICA** (Lat.), **GEROCOMICE** (Lat.), n's f. Je(ga)-ro(ro^3)-kom(ko^{2}m)'i^2-a^3, -ka^3, -se(ka). Gr., *γηροκομία, γηροκομική* (from *γῆρας*, old age, and *κομεῖν*, to take care of). Fr., *gerocomie.* Ger., *Gerokomie, Alterspflege.* The hygienic, dietetic, and medical care of the aged. [A, 322, 385, 387.]

GEROCOMIUM (Lat.), n. n. Je(ga)-ro(ro^3)-ko^{2}m-i(e)'u^{3}m(u^{4}m). Gr., *γηροκομεῖον.* Fr., *gérontocomium.* Ger., *Altersspital.* A hospital for the aged. [A, 387.]

GEROCOMY, n. Je^{2}r-o^{2}k'o-mi^2. See GEROCOMIA.

GÉROFLE (Fr.), n. Zha-ro-fl'. See GIROFLE.

GÉROFLIER (Fr.), n. Zha-ro-fle-a. See CARYOPHYLLUS.—**G. aromatique.** The *Caryophyllus aromaticus.* [B, 173 (*a*, 24).]

GEROLDSGRÜN (Ger.), n. Ge^{2}r'olds-gru^{6}n. A place in the principality of Reuss, Germany, where there is a ferruginous spring. [L, 49, 135 (*a*, 14).]

GEROLLT (Ger.), adj. Ge^2-rolt'. In botany, contorted. [B.]

GEROMARASMUS (Lat.), n. m. Je(ga)-ro(ro^3)-ma^{2}r(ma^{3}r)-a^{2}z(a^{3}s)'mu^{3}s(mu^{4}s). From *γῆρας*, old age, and *μαρασμός*, marasmus. Ger., *Altersschwäche.* Syn.: *marasmus senilis.* A high degree of senile weakness and emaciation. [A, 322 (*a*, 21).]

GEROMENINGURIA (Lat.), n. f. Je(ge^2)-ro(ro^3)-me^{2}n(man)-i^{2}n^2-gu^2(gu)'ri^2-a^3. From *γέρων*, an old man, *μῆνιγξ*, a membrane, and *οὖρον*, urine. A condition of the aged in which membranous shreds are voided with the urine. [A, 322.]

GERONNEN (Ger.), adj. Ge^2-ron'ne^{2}n. See COAGULATED.

GÉRONSTÈRE (Fr.), n. Zha-ro^{2}n^2-ste^{2}r. One of the many mineral springs around the town of Spaa, in the province of Liege, Belgium. It is ferruginous and contains potassium carbonate. [L, 30 (*a*, 14).]

GERONTATROPHY, n. Je^{2}r-o^{2}nt-a^{2}t'ro-fi^2. From *γέρων*, an old man, and *ἀτροφία*, atrophy. See GEROMARASMUS.

GERONTEA (Lat.), n. f. Je^{2}r(ge^{2}r)-o^{2}n-te(ta)'a^3. Gr., *γεροντεία.* Of Apuleius, the *Senechio vulgaris.* [B, 114 (*a*, 24).]

GERONTIC, adj. Je^{2}r-o^{2}nt'i^{2}k. Gr., *γεροντικός.* Lat., *geronticus.* Pertaining to old age. [A, 322.]

GERONTOCOMICA (Lat.), **GERONTOCOMICE** (Lat.), **GERONTOCOMIA** (Lat.), n's f. Je^{2}r(ge^{2}r)-o^{2}nt-o(o^3)-ko^{2}m'i^{2}k-a^3, -se(ka), kom(ko^{2}m)'i^2-a^3. See GEROCOMIA.

GERONTOCOMIUM (Lat.), n. n. Je^{2}r(ge^{2}r)-o^{2}nt-o(o^3)-ko^{2}m-i-(e)'u^{3}m(u^{4}m). Gr., *γεροντοκομεῖον.* See GEROCOMIUM.

GERONTOGÆOUS, adj. Je^{2}r-o^{2}nt-o-je'u^{3}s. Lat., *gerontogæus* (from *γέρων*, old, and *γαῖα*, the earth). Of plants (the *Gerontogææ*), indigenous to the Old World. [B, 42, 214.]

GERONTOPHTHALMIA (Lat.), n. f. Je^{2}r(ge^{2}r)-o^{2}nt-o^{2}f-tha^{2}l(tha^{3}l)'mi^2-a^3. From *γέρων*, an old man, and *ὀφθαλμία*, a disease of the eye. See OPHTHALMIA *senilis.*

GERONTOPIA (Lat.), n. f. Je^{2}r(ge^{2}r)-o^{2}nt-op(o^{2}p)'i^2-a. From *γέρων*, an old man, and *ὄψις*, sight. See PRESBYOPIA.

GERONTOPITYRIASIS (Lat.), n. f. Je^{2}r(ge^{2}r)-o^{2}nt-o(o^3)-pi^{2}t-i^2(u^6)-ri^2-a(a^3)'si^{2}s. Gen., *-as'eos (-is).* See PITYRIASIS *senilis.*

GERONTOPOGON (Lat.), n. n. Je^{2}r(ge^{2}r)-o^{2}nt-o(o^3)-pog'o^{2}n-(on). A more correct form of *geropogon* (*q. v.*).

GERONTOTOXON (Lat.), **GERONTOXON** (Lat.), n's n. Je^{2}r(ge^{2}r)-o^{2}nt-o(o^3)-to^{2}x'o^{2}n, -o^{2}nt-o^{2}x'o^{2}n. From *γέρων*, an old man, and *τόξον*, a bow or arch. Fr., *gérontotoxon, gérontoxon.* See ARCUS *senilis.*—**G. corneæ.** See ARCUS *senilis corneæ.*—**G. lentis.** See ARCUS *senilis lentis.*

GEROPITYRIASIS (Lat.), n. f. Je^{2}r(ge^{2}r)-o(o^3)-pi^{2}t-i^2(u^6)-ri^2-a(a^3)'si^{2}s. Gen., *-as'eos (-is).* See PITYRIASIS *senilis.*

GEROPOGON (Lat.), n. m. Je^{2}r(ge^{2}r)-o^{2}p-og'o^{2}n(on). Gen., *-gon'os (-is).* From *γέρων*, an old man, and *πώγων*, the beard. Of Schultz, the only genus of the *Geropogoneæ* (a division of the *Tragopogoneæ*). [B, 121, 170 (*a*, 24).]

GERÖSTET (Ger.), adj. Ge^2-ru^{5}st'e^{2}t. Toasted. [A, 523.]

GERÖTHET (Ger.), adj. Ge^2-ru^{5}t'e^{2}t. Reddened, slightly inflamed. [L, 50 (*a*, 14).]

GEROTOXON (Lat.), n. n. Je(ge^2)-ro(ro^3)-to^{2}x'o^{2}n. See GERONTOTOXON.

GEROTROPHEUM (Lat.), n. n. Je(ga)-ro(ro^3)-tro^{2}f-e(a)'u^{3}m-(u^{4}m). Gr., *γηροτροφεῖον* (from *γῆρας*, old age, and *τρέφειν*, to nourish). See GEROCOMIUM.

GEROTROPHIA (Lat.), n. f. Je(ga)-ro(ro^3)-trof(tro^{2}f)'i^2-a^3. Gr., *γηροτροφία.* See GEROCOMIA.

GERSA, n. See CERUSSA and FÆCULA.—**G. serpentariæ.** See LEAD *acetate.*

GERSE, n. Ju^{5}rz. The *Briza media.* [A, 505 (*a*, 21).]

GERSTE (Ger.), n. Ge^{2}rst'e^2. See BARLEY and HORDEUM.—**Gemeine G.** The *Hordeum vulgare.* [B, 180 (*a*, 24).]—**G'nabkochung.** See *Ptisana* HORDEI.—**G'ndecoct.** See *Decoctum* HORDEI.—**G'ngraupen, G'ngrütze.** See *Hulled* BARLEY.—**G'nkleie.** Barley bran. [*a*, 14.]—**G'nkorn.** See CHALAZION and CRITHE.—**G'nkornförmig.** Barleycorn-shaped. [A, 521.]—**G'nmalz.** Barley malt. [L, 46 (*a*, 14).]—**G'nmehl.** See BARLEY *meal.*—**G'nmilch.** Barley-and-milk gruel. [L, 43.]—**G'nschleim.** See *Decoctum* HORDEI.—**G'nstoff.** See HORDEIN.—**G'ntrank.** See *Decoctum* HORDEI.—**G'nstärke.** Barley starch. [A, 521.]—**G'nwalch.** The *Bromus sterilis.* [B, 131 (*a*, 14).]—**G'nwasser.** Barley-water. [L, 80.]—**G'nzucker.** See *Barley* SUGAR.—**Grosse G.** The *Hordeum distichon.* [B.]—**Schwarze G.** The *Hordeum nigrum.* [B, 180 (*a*, 24).]—**Sechszeilige G.** The *Hordeum hexastichon.* [B, 180 (*a*, 24).]—**Vierzeilige G.** Ordinary barley (the *Hordeum vulgare*). [B.]—**Zweizeilige G.** The *Hordeum distichon.* [B, 180 (*a*, 24).]

GERTENARTIG (Ger.), adj. Ge^{2}rt'e^{2}n-a^{3}rt-i^{2}g. Viminal. [B, 123 (*a*, 24).]

GERTENKRAUT (Ger.), **GERTENWURZ** (Ger.), n's. Ge^{2}rt'-e^{2}n-kra^3-u^{4}t, -vurtz. The *Artemisia abrotanum* and the *Ferula communis.* [B, 131 (*a*, 14).]

GERUCH (Ger.), n. Ge^2-ruch^2'. 1. An olfactory organ. [*a*, 14.] 2. See ODOR.—**Aasg'.** A cadaveric odor.—**Beschwerlicher G.** See DYSOSMIA (1st def.).—**G'los.** Devoid of odor. [B.]—**G'losigkeit.** See ANOSMIA.—**G'sapparat.** See *Olfactory* APPARATUS.—**G'seindruck.** An olfactory impression. [A, 521.]—**G'sempfindung.** The appreciation of an olfactory impression. [A, 521.]—**G'sschärfe.** Acuteness of olfaction. [L, 178.]—**G'ssinn.** The sense of smell. [A, 521.]—**G'stoff.** See AROMA.—**G'svermögen.** The power of smelling. [A, 521.]—**G'swerkzeug.** See *Olfactory* APPARATUS.

GERU MÂTÉ (Guz., Hind.), n. See *Red* BOLE.

GERUNZELT (Ger.), adj. Ge^2-runtz'e^{2}lt. See CORRUGATED.

GERÜST (Ger.), n. Ge^2-ru^{6}st'. See STROMA.—**Horn-G.** See *Horny* FRAMEWORK.—**Intranucleäres G.** See *Nuclear* FIBRILS.—**Kiemeng'.** A gill or branchial network or basket-work as seen in *Branchiostoma.* [J.]

GERVAO (Port.), n. Zhe^{2}r-va^{4}n^2. In Brazil, the *Verbena jamaicensis.* [B, 121 (*a*, 24).]

GERYDROCEPHALUS (Lat.), n. m. Je^{2}r(ge^{2}r)-id(u^{6}d)-ro(ro^3)-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From *γέρων*, an old man, and *ὑδροκέφαλος*, hydrocephalus. See HYDROCEPHALUS *senilis.*

GERYON (Lat.), n. m. Je(ga)'ri^2(ru^6)-o^{2}n(on). Gen., *-ry'onos (-is).* Gr., *Γηρύων* (a fabled three-headed monster that was King of Spain). An old name for mercury (the metal). [A, 325.]

GERZEAU (Fr.), n. Zhe^{2}r-zo. The *Githago segetum.* [B, 121, 173 (*a*, 24).]

GERZÉRIE (Fr.), n. Zhe^{2}r-za-re. The *Lolium temulentum.* [B, 121 (*a*, 24).]

GESÄGT (Ger.), adj. Ge^2-zagt'. See SERRATE.—**Doppelt g.** See BISERRATE.

GESALZEN (Ger.), adj. Ge^2-za^{3}ltz'e^{2}n. Salted. [L, 80.]—**G'sein.** Saltness. [L, 80.]

GESÄME (Ger.), n. Ge^2-zam'e^2. See STROPHULUS *intertinctus.*

GESÄMTE (Ger.), n. Ge^2-zamt'e^2. See STROPHULUS.—**Weisse G.** See STROPHULUS *albidus.*

GESAR (Ar.), n. The parsnip and the carrot. [B, 121 (*a*, 24).]

GESÄSS (Ger.), n. Ge^2-zas'. The breech, buttocks. [*a*, 14.]—**G'bruch.** See ISCHEOCELE.—**G'fistel.** See FISTULA *in ano.*—**G'gegend.** The gluteal region. [A, 521.]

GESÄTTIGT (Ger.), adj. Ge^2-zat'ti^{2}gt. Saturated. [B.]

GESÄUERT (Ger.), adj. Ge^2-zol'e^{2}rt. Acidulated. [A, 521.]

GESÄUMT (Ger.), adj. Ge^2-zolmt'. Limbate. [B, 123 (*a*, 24).]

GESCHÄRFT (Ger.), adj. Ge^2-she^{2}rft'. See ARGUTUS.

GESCHECKT (Ger.), adj. Ge^2-she^{2}kt'. Variegated. [B, 123 (*a*, 24).]

GESCHICHTET (Ger.), adj. Ge^2-shi^{2}ch^{2}t'e^{2}t. See LAMINATED.

GESCHINDELT (Ger.), adj. Ge^2-shi^{2}nd'e^{2}lt. Imbricate. [B, 123 (*a*, 24).]

GESCHLECHT (Ger.), n. Ge^2-shle^{2}ch^{2}t'. 1. A species or genus. 2. Origin, birth, or race. 3. Sex. [L, 46 (*a*, 21).]—**G'lich.** 1. Generic. 2. Sexual. [L, 43, 46 (*a*, 21).]—**G'los.** Neuter; without sexual distinction. [L, 46 (*a*, 21).]—**G'losigkeit.** The absence of the characteristics of sex or of genus. [L, 46 (*a*, 21).]—**G'sabneigung.** See ANAPHRODISIA.—**G'sakt.** See COPULATION.—**G'sapparat.** The sexual apparatus. [A, 521.[—**G'sart.** See *G.* (1st and 2d def's).—**G'sausschweifung.** Sexual excess. [A, 521.]—**G'sbaum.** A pedigree. [L, 46 (*a*, 21).]—**G'sdrüsen.** The sexual glands.—**G'seigenthümlichkeiten.** Generic peculiarities, sexual characteristics. [L, 46 (*a*, 21).]—**G'sempfindung.** Sexual feeling. [A, 521.]—**G'sentwickelung.** Sexual development. [A, 521.]—**G'sfähig.** Sexually mature.—**G'sfalten.** See *Genital* FOLDS.—**G'sgefühl.** See *G'sempfindung.*—**G'sgenuss.** Sexual pleasure. [A, 521.]—**G'sleben.** The state of one's sexual relations or habits. [A, 521.]—**G'slust, G'sneigung.** Sexual desire. [L, 46 (*a*, 21).]—**G'sreif.** Sexually mature.—**G'sreife.** Puberty, pubescence. [L, 46 (*a*, 21).]—**G'sreiz.** The sexual impulse. [A, 521.]—**G'reizend.** See APHRODISIAC.—**G'ssinn.** See *G'sempfindung.*—**G'stheilträger.** See GONOPHORE.—**G'strieb.** The sexual impulse. [L, 46 (*a*, 21).]—**G'striebvermindernd.** See ANAPHRODISIAC.—**G'sverbindung.** Sexual intercourse. [L, 46 (*a*, 21).]—**G'svereinigung.** In botany, hermaphroditism. [L, 80.]—**G'sverrichtungen.** Sexual acts. [L, 80.]—**G'swerkzeug.** The sexual apparatus.—**G'szeichen.** The genitals. [L, 46 (*a*, 21).]

GESCHLEIERT (Ger.), adj. Ge^2-shli'e^{2}rt. Indusiate. [B, 123 (*a*, 24).]

GESCHLITZT (Ger.), adj. Ge^2-shli^{2}tzt'. Cleft, laciniate. [A, 521; B, 123 (*a*, 24).]

GESCHLOSSEN (Ger.), adj. Ge^2-shlo^{3}s'se^{2}n. Closed. [B, 123 (*a*, 24).]

GESCHMACK (Ger.), n. Ge^2-shma^{3}k'. Taste, flavor. [L, 43.]—**G'los.** Tasteless, insipid, flat, stale. [L, 46 (*a*, 21).]—**G'reizend.** Capable of impressing the sense of taste.—**G'sbecher.** See *Taste*-BUDS.—**G'scorrigens.** A substance added to a medicinal preparation for the purpose of improving its taste.—**G'smangel.** See AGEUSIA.—**G'ssinn.** The sense of taste. [K.]—**G'sstörung.** Derangement of the sense of taste. [A, 521.]—**G'stäuschung.** See ALLOTRIOGEUSIA.—**G'sverlust.** See AGEUSTIA.—**G'swerkzeug.** See *Gustatory* APPARATUS.—**Krankhafter G.** See DYSGEUSIA.—**Nachg'.** An after-taste. [K.]

GESCHMEIDIG (Ger.), adj. Ge^2-shmid'i^{2}g. See MALLEABLE.—**G'keit.** See MALLEABILITY.

GESCHMOLZEN (Ger.), adj. Ge^2-shmo^{2}ltz'e^{2}n. Fused. [L, 43.]

GESCHNABELT (Ger.), adj. Ge^2-shna^{3}b'e^{2}lt. Rostrate. [B, 123 (*a*, 24).]

GESCHNITTEN (Ger.), adj. Ge^2-shni^{2}t'te^{2}n. Sectate. [*a*, 24.]

GESCHOREN (Ger.), adj. Ge^2-shor'e^{2}n. Glabrate, shorn smooth. [*a*, 24.]

GESCHREI (Ger.), n. Ge^2-shri'. See CRY.

GESCHRUMPFT (Ger.), adj. Ge^2-shrumpft'. See CORRUGATED.

GESCHUPPT (Ger.), adj. Ge^2-shupt'. Scaly. [L, 43.]

GESCHWÄNGERT (Ger.), adj. Ge^2-shwan^2'e^{2}rt. 1. Fecundated, impregnated. 2. Saturated. [A, 521; L, 46 (*a*, 21).]

GESCHWÄNZT (Ger.), adj. Ge^2-shwantzt'. Caudate. [L. 80.]

GESCHWÄTZIG (Ger.), adj. Ge^2-shwatz'i^{2}g. Loquacious. [A, 521, 523.]—**G'keit.** Loquacity. [A, 521.]

GESCHWEFELT (Ger.), adj. Ge^2-shwaf'e^{2}lt. Combined with sulphur. [B.]

GESCHWEIFT (Ger.), adj. Ge^2-shwift'. 1. Caudate. [A, 521, 523.] 2. Ligulate, semiflosculate. [*a*, 24.]

GESCHWOLLEN (Ger.), adj. Ge^2-shwo^{3}l'le^{2}n. Swollen, distended.

GESCHWULST (Ger.), n. Ge^2-shwulst'. A swelling or tumor. [A, 521, 523.]—**Aderg'.** An aneurysm, varix, or thrombus.—**Afterg'.** Any tumor about the anus.—**Augenwinkelg'.** See ANCHILOPS.—**Brandige Halsg'.** See ANGINA *carbuncularis.*—**Brennende G.** See CELOS.—**Drüseng'.** See ADENOMA.—**Entzündlich-fungöse G.** [Geber]. See GRANULOMA *fungodes.*—**Epibulbäre Geschwülste.** Tumors on the eyeball. [A, 319 (*a*, 21).]—**Faserg'.** See FIBROMA.—**Fettg', Fettgewebsg'.** See LIPOMA.—**Filzg'.** See CARCINOMA *reticulatum.*—**Fleischg', Fleischige G.** See SARCOMA and MYOMA.—**Fleischknocheng'.** See OSTEOSARCOMA.—**Flussg'.** A fluctuating tumor. [*a*, 34.]—**Froschg'.** See RANULA.—**Fröschleing'.** See RANULA.—**Fussg', Fusswurzelg'.** See TARSOPHYMA.—**Gallertg'.** See MYXOMA.—**Geburtsg'.** See CAPUT *succedaneum.*—**Gefässg'.** See ANGEIOMA.—**Gelenkknocheng'.** See GELENKGESCHWULST.—**Gelenksackg'.** See HYDRARTHROSIS.—**Gerstenkorng'.** See HORDEOLUM.—**G'ähnlich.** Tumor-like. [L, 80.]—**G'anlage.** The rudiment of a tumor. [A, 521, 523.]—**G'artig.** Tumor-like.—**G'bildung.** The formation of a tumor. [A, 521.]—**G'entwickelung.** The development of a tumor.—**G'förmig.** Tumor-like.—**G'gewebe.** The tissue of a tumor.—**G'herd.** A centre or focus of tumor formation.—**G'kapsel.** The capsule of a tumor.—**G'keim.** See *G'anlage.*—**G'knoten.** A tumor in the form of a node.—**G'kraut.** The *Sedum telephium.* [B, 180 (*a*, 24).]—**G'lehre.** See ONCOLOGY.—**G'mantel.** 1. The capsule of a tumor. 2. All the tissue overlying a subcutaneous or a submucous tumor.—**G'sack.** The sac of a tumor. [A, 521.]—**G'wachsthum.** The growth of a tumor. [A, 521.]—**G'wucherung.** Proliferation of a tumor. [A, 521.]—**G'zerfall.** Tumor degeneration. [*a*, 34.]—**Gichtg'.** A gouty swelling. [L, 80.]—**Gliederg'.** A swelling of the limbs. [L, 46 (*a*, 21).]—**Goldaderg'.** A hæmorrhoidal tumor. [L, 80.]—**Grützbeutelg', Grützg'.** See ATHEROMA (1st def.).—**Gummig'.** See SYPHILOMA.—**Gurgelg'.** See GOÎTRE.—**Hautg'.** See DERMATOPHYMA.—**Hervorragende G.** See EXONCOMA.—**Kalte G.** An indolent swelling. [L, 80.]—**Knorpelartige G.** See CHONDROPHYMA (1st def.).—**Knorpelg'.** See CHONDROPHYMA (2d def.).—**Krebsg'.** See CANCER (3d def.).—**Lymphatische G.** See LYMPHOMA.—**Mischg'.** A tumor of a compound nature (*e. g.*, a chondro-myo-sarcoma). [A. W. Hoisholt, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," civ, 1, 1886, p. 118.]—**Röhreng'.** See CYLINDROMA.—**Sackg'.** See CYST.—**Sacklymphg'.** See CYSTHYGROMA.—**Schamlippeng'.** See CREMNONCUS.—**Unterleibsg'.** See ETRONCUS.—**Zotteng'.** See *Papillary* EPITHELIOMA.

GESCHWÜLSTIG (Ger.), adj. Ge^2-shwu^{6}lst'i^{2}g. 1. Tumefied. [E.] 2. Affected with tumors. [A, 521.]

GESCHWÜR (Ger.), n. Ge^2-shwu^{6}r'. See ABSCESS, BOIL, SORE, and ULCER.—**Achilleisches G.** See ULCUS *achilleum.*—**Aegyptisches G.** See *Egyptian* ULCERS.—**Altes G.** A chronic ulcer. [L, 80.]—**Atonisches G.** See *Atonic* ULCER.—**Bösartiges G., Böses G.** A malignant ulcer.—**Decubitalg'.** A bed-sore. [A, 319 (*a*, 21).]—**Diphtheritisches G.** See *Diphtheritic* ULCER.—**Embolisches G.** An embolic abscess.—**Faulichtes G.** A putrid ulcer. [L, 80.]—**Fistelg'.** See under FISTEL.—**Fistulöses G.** See FISTULA *incompleta.*—**Flechteng'.** A serpiginous ulcer. [L, 80.]—**Fremdkörperg'.** An ulcer due to a foreign body. [A, 521.]—**Fressendes G.** A corroding ulcer. [L, 80.]—**Fungöses G.** A fungous ulcer. [L, 80.]—**Gefässg'.** See ANGEIELCUS.—**Gelenkg'.** See ARTHRELCOSIS.—**G'artig.** Ulcerous, ulcerative. [L, 80.]—**G'bildung.** Ulceration.—**G'boden.** The floor of an ulcer.—**G'chen.** A small ulcer. [L, 80.]—**G'fläche.** The surface of an ulcer.—**G'grund.** See *G'boden.*—**G'ig.** 1. See *G'artig.* 2. Affected with ulcers.—**G'kruste.** See EPHELCIS (1st def.).—**G'öffnung, G'schnitt.** See ONCOTOMY.—**G'srand.** The edge of an ulcer.—**Gichtg', Gichtisches G.** A gouty ulcer. [L, 80.]—**Gutartiges G.** A benign ulcer. [L, 80.]—**Habituelles G.** A chronic ulcer. [L, 80.]—**Harng'.** See URELCOMA.—**Hartes G.** See *Indurated* CHANCRE.—**Hohlg', Höhleng'.** An excavated ulcer.—**Interlamelläres G. des Trommelfells.** See *Interlamellar* ABSCESS *of the membrana tympani.*—**Krebsartiges G.** A cancerous ulcer. [L, 80.]—**Künstliches G.** An artificial ulcer. [L, 80.]—**Oedematöses G.** An œdematous ulcer. [L, 80.]—**Oertliches G.** A local ulcer. [L, 80.]—**Pendeh-G.** See *Delhi* BOIL.—**Perforirtes G.** See FISTULA and *Perforating* ULCER.—**Röhrenförmiges G.** See FISTULA *incompleta.*—**Saharag'.** See *Aleppo* BOIL.—**Schwammiges G.** A fungous ulcer. [L, 80.]—**Schwieliges G.** A callous ulcer. [L, 80.]—**Scorbutisches G.** A scorbutic ulcer. [L, 80.]—**Scrophulöses G.** A scrofulous ulcer. [L, 80.]—**Taschkent G.** See *Sarten*-KRANKHEIT.—**Unempfindliches G.** An indolent ulcer. [L, 80.]—**Unreines G.** A foul ulcer. [L, 80.]—**Venerisches G.** A venereal ulcer. [L, 80.]—**Wucherndes G.** A fungous ulcer. [L, 80.]

GES ENGEBIN (Pers.), n. Astragalus manna. ["Proc. of the Am. Pharm. Assoc.," xix (*a*, 14).]

GESENKT (Ger.), adj. Ge^2-zen^{2}kt'. Sunk. [L, 46 (*a*, 21).]

GESETZ (Ger.), n. Ge^2-ze^{2}tz'. A law or rule. [L, 46 (*a*, 21).]—**G'buch.** A code. [L, 43.]—**G. der vielfachen Verbindungsverhältnisse.** See LAW *of multiple proportions.*—**Volta'sches Spannungsg'.** See *Volta's* LAW *of tension.*

GESICHT (Ger.), n. Ge^2-zi^{2}ch^{2}t'. 1. The sense of sight. 2. The face.—**Fieberg'.** The facial expression of a feverish individual.—**G'los.** Blind. [A, 521.]—**G'losigkeit.** 1. Blindness. [A, 521.] 2. See APROSOPIA.—**G'sachse.** See *Visual* AXIS.—**G'sasymmetrie.** Facial asymmetry.—**G'satrophie.** See *Progressive facial* ATROPHY.—**G'sausdruck.** The expression of the face. [*a*, 18.]—**G'saxe.** See *Visual* AXIS.—**G'sbeschauung.** Inspection of the face. [A, 521.]—**G'sbetrug.** An optical illusion. [A, 521.]—**G'sbildung.** Facial expression or formation. [L, 46 (*a*, 21).]—**G'sblatter, G'sblätterchen.** See BOTHOR.—**G'sblödigkeit.** See AMBLYOPIA.—**G'sblutader.** The facial vein. [L.]—**G'scentrum.** See *Visual* CENTRE.—**G'sdeutung.** The science of physiognomy. [L, 46 (*a*, 21).]—**G'sermüdung.** See ASTHENOPIA.—**G'serscheinung.** An optical phenomenon. [A, 521.]—**G'sfarbe.** The complexion. [L, 46 (*a*, 21).]—**G'sfehler.** See DYSOPIA.—**G'sfeld.** See FIELD *of vision.*—**G'sfeldmesser.** See PERIMETER.—**G'sfinne.** Acne of the face.—**G'sfläche.** The surface of the face. [L, 46 (*a*, 21).]—**G'sforschung.** The science of physiognomy. [L, 80.]—**G'sgegend.** The region of the face. [L, 80.]—**G'shöhe.** See *G'slänge.*—**G'shypertrophie.** Facial hypertrophy. [A, 319 (*a*, 21).]—**G'skenntniss.** See PHYSIOGNOMY.—**G'skopfbeuge.** The principal cranial flexure of the embryo. [L.]—**G'skrampf.** Facial spasm. See *Convulsive* TIC.—**G'skrebs.** Cancer of the face, lupus. [E.]—**G'slähmung.** Facial paralysis.—**G'slänge.** The distance between the chin and the root of the nose. [L, 332.]—**G'smangel.**

See APROSOPIA.—**G'snerv.** See *Facial* NERVE.—**G'sprüfung.** The process of testing the vision. [A, 521.]—**G'sröthe.** Suffusion of the face. [A, 521.]—**G'sschmerz.** See *Facial* NEURALGIA.—**G's-schwäche.** See ASTHENOPIA.—**G'sschweiss.** Sweating of the face. [L, 80.]—**G'ssinn.** The sense of sight.—**G'sstörung.** Any disturbance of vision.—**G'stäuschung.** An optical illusion. [L, 46 (α, 21).]—**G'sveränderung.** A change of facial expression. [A, 521.]—**G'sverdrehung.** Distortion of the face.—**G'sverdunkelung.** Dimness of vision. [A, 521.]—**G'sverzerrung.** See *G'sverdrehung.*—**G'svorstellung, G'swahrnehmung.** Visual perception.—**G'sweite.** The range of vision. [α, 29.]—**G's-werkzeug.** See *Visual* APPARATUS.—**G'szug.** A lineament, facial line, feature. [L, 46 (α, 21).]—**Hippocratisches G.** See FACIES *hippocratica.*—**Kleines G.** See FACET.

GÉSIER (Fr.), n. Zha-ze-a. The gizzard. [A, 385.]

GÉSINE (Fr.), n. Zha-zen. From *jacere*, to lie. A provincial term for the lying-in chamber of a hospital. [A, 301, 385.]

GESNERA (Lat.), n. f. Ge^{2}s'ne^{2}r-a^{3}. Fr., *gesnérie.* The typical genus of the *Gesneraceæ;* named in honor of C. Gesner, a Swiss botanist. The *gesnerworts* (Lat., *Gesneraceæ, Gesneriaceæ;* Fr., *gesneracées;* Ger., *Gesneraceen*) are: Of Lindley, an order of the *Bignoniales* (of Endlicher, an order of the *Personatæ;* of Bentham and Hooker, an order of the *Personales*), comprising the *Gesnereæ* and *Cyrtandreæ.* The *Gesnereæ* (Fr., *gesnerées*) are: Of Martius and others, an order corresponding to the *Gesneraceæ;* of Hanstein and others, a tribe of the *Gesneraceæ*, comprising the *Niphеæ, Achimeneæ, Brachyomateæ, Eugesnereæ, Ligerieæ,* and *Rhytidophylleæ*, or, according to Bentham and Hooker, the *Bellonieæ, Gloxinieæ, Eugesnereæ,* and *Pentarhaphieæ.* The *Gesneridiæ* of Dumortier are a family of *Calicitubia.* The *Gesnerieæ* (Fr., *gesnériées*) of De Candolle are the *Gesnereæ.* [B, 19, 42, 121, 170 (α, 24).]

GESONDERT (Ger.), adj. Ge^{2}-zo^{3}nd'e^{2}rt. See DISTINCT.

GESOR, n. Of the alchemists, galbanum. [Ruland (A, 325).]

GESPALTEN (Ger.), adj. Ge^{2}-spa^{3}lt'e^{2}n. 1. Split, fissured. 2. Of the heart sounds, reduplicated. [A, 521.]—**G'blüthig.** See FISSIFLORUS.

GESPANNT (Ger.), adj. Ge^{2}-spa^{3}nt'. 1. Tense. 2. In a state of exaltation. [A, 523.]

GESPENSTERSEHEN (Ger.), n. Ge^{2}-spe^{2}nst'e^{2}r-za-e^{2}n. See PHANTASMOSCOPIA.

GESPITZT (Ger.), adj. Ge^{2}-spi^{2}tzt'. Fastigiate, cuspidate. [L, 46 (α, 21).]

GESPORNT (Ger.), adj. Ge^{2}-spo^{3}rnt'. See CALCARATUS (1st def.).

GESPRENKELT (Ger.), adj. Ge^{2}-spre^{2}n^{2}k'e^{2}lt. See ASPERSUS.

GESSE (Fr.), n. Zhe^{2}s. See CICER and LATHYRUS.—**Fausse g.** The *Vicia lathyroides.* [B, 173 (α, 24).]—**G. à feuilles larges.** The *Lathyrus latifolius.* [B, 173 (α, 24).]—**G. à feuilles variables.** The *Lathyrus heterophyllus.* [B, 173 (α, 24).]—**G. à moitié ponctuée.** The *Lathyrus sativus*, var. *semimaculatus.* [B, 173 (α, 24).]—**G. aphaca.** The *Lathyrus aphaca.* [B, 173 (α, 24).]—**G. cultivée.** The *Lathyrus sativus.* [B, 173 (α, 24).]—**G. des bois.** The *Lathyrus silvestris.* [B, 173 (α, 24).]—**G. des marais.** The *Lathyrus palustris.* [B, 173 (α, 24).]—**G. des prés.** The *Lathyrus pratensis.* [B, 173 (α, 24).]—**G. de Tanger.** The *Lathyrus tingitanus.* [B, 173 (α, 24).]—**G. sillonnée.** The *Lathyrus cicera.* [B, 173 (α, 24).]—**G. tubéreuse.** The *Lathyrus tuberosus.* [B, 173 (α, 24).]—**G. velue.** The *Lathyrus hirsutus.* [B, 173 (α, 24).]

GESSETTE (Fr.), n. Zhe^{2}s-se^{2}t. The *Lathyrus cicera.* [B, 121, 173 (α, 24).]

GESTA (Lat.), n. n. pl. Je^{2}st(ge^{2}st)'a^{3}. From *gerere*, to accomplish. Fr., *choses faites.* Of certain writers on hygiene, the various states of the body, such as waking, sleeping, etc. [A, 301, 385.]

GESTADE (Ger.), n. Ge^{2}-sta^{3}d'e^{2}. Of a bone, its border. [L, 80.]

GESTALT (Ger.), n. Ge^{2}-sta^{3}lt'. Form, shape, figure, size, appearance. [L, 46 (α, 21).]—**G'los.** See AMORPHOUS.—**G'losigkeit.** See AMORPHIA.—**G'veränderung.** A change of shape. [I, 17 (K).]

GESTALTUNG (Ger.), n. Ge^{2}-sta^{3}lt'un^{2}. See CONFIGURATION.—**Aehnliche G.** Homœomorphism. [L, 80.]—**Falsche G.** Pseudomorphism. [L, 80.]

GESTAMMEL (Ger.), n. Ge^{2}-sta^{3}m'me^{2}l. Stammering, stuttering. [A, 521.]

GESTANK (Ger.), n. Ge^{2}-sta^{3}nk'. 1. A stench. 2. Dysodia.

GESTATEUR (Fr.), adj. Zhe^{2}s-ta^{3}-tu^{5}r. See GESTATIVE.

GESTATIO (Lat.), n. f. Je^{2}s(ge^{2}s)-ta(ta^{3})'shi^{2}(ti^{2})-o. Gen., *-tatio'nis.* See GESTATION.—**G. extra-uterina.** See *Ectopic* GESTATION.—**G. ovaria.** See *Ovarian* GESTATION.

GESTATION, n. Je^{2}st-a'shu^{3}n. Gr., φόρησις, φορά. Lat., *gestatio* (from *gestare*, to bear). Fr., *g., grossesse* (2d def.). Ger., *Schwangerschaft* (2d def.) (in the lower animals, *Trächtigkeit*). It., *gestazione.* Sp., *gestación.* 1. A carrying; that form of passive exercise in which the person is carried, as on horseback, in a vehicle, etc. [A, 301.] 2. Of a female viviparous animal, the function of carrying the product of conception within the body from the time of fecundation to that of delivery. Cf. PREGNANCY.—**Abdominal g.** Lat., *eccyesis abdominalis.* Fr., *g. abdominale.* Ger., *Abdominalschwangerschaft.* That form of ectopic g. in which the product of conception is lodged in the peritoneal cavity.—**Cervical g.** Lat., *graviditas cervicalis.* Fr., *g. cervicale.* Ger., *Cervicalschwangerschaft.* The temporary retention of the ovum within the canal of the cervix uteri after its expulsion from the body of the uterus in a case of abortion. [α, 34.] Cf. *Incomplete* ABORTION.—**Double g.** Fr., *grossesse double* (1st def.), *grossesse gémellaire* (2d def.). 1. The coexistence of uterine and extra-uterine g. 2. See *Twin g.*—**Ectopic g.** Lat., *eccyesis, gestatio ectopica.* Fr., *g. ectopique.* Ger., *ectopische Schwangerschaft.* G. (2d def.) in which the product of conception is carried elsewhere than within the cavity of the body of the uterus.—**Extra-abdominal g.** An extra-uterine g. in which the ovum is situated within a hernial sac. [α, 34.]—**Extra-peritoneal g.** Fr., *grossesse extra-péritonéale.* Ger., *Extraperitonäalschwangerschaft.* 1. See *Subperitoneo-pelvic g.* 2. A form of ectopic g. described by Dezeimeris, and admitted by some other authors, in which the ovum is said to be developed primarily in the connective tissue between the folds of the broad ligament. [A, 15.]—**Extra-uterine g.** Lat., *gestatio extra-uterina.* Fr., *grossesse extra-utérine.* Ger., *Extrauterinschwangerschaft.* See *Ectopic g.*—**Fallopian g.** See *Tubal g.*—**G. à cheval** (Fr.). Horseback riding. [A, 301.]—**G. en voiture** (Fr.). Carriage riding. [A, 301.]—**Hydatid g.** G. in which the product of conception has become a vesicular mole.—**Interstitial (tubo-uterine) g., Intramural g.** Lat., *graviditas interstitialis.* Fr., *grossesse (tubo-utérine) interstitielle.* Ger., *Interstitiellschwangerschaft.* The sixth of Dezeimeris's ten species of ectopic g.; a variety of tubal g. in which the ovum is developed in that portion of the oviduct that traverses the wall of the uterus. [A, 123.] Cf. *Utero-interstitial g.*—**Intra-ovarian g.** See *Ovarian g.*—**Intraperitoneal g.** See *Abdominal g.*—**Multiple g.** Fr., *grossesse multiple.* See *Plural g.*—**Mural g.** See *Interstitial g.*—**Ovarian g.** Lat., *eccyesis* (seu *gestatio*) *ovaria, graviditas ovarica.* Fr., *g. ovarique.* Ger., *Ovarialschwangerschaft.* That form of ectopic g. in which the product of conception is lodged in the ovary.—**Parietal g.** Of Ramsbotham, interstitial g. [α, 34.]—**Peritoneal g.** See *Abdominal g.*—**Plural g.** Fr., *grossesse composée.* Ger., *mehrfache Schwangerschaft.* G. (2d def.) with more than one embryo.—**Primary g.** Lat., *graviditas primaria.* Fr., *grossesse abdominale* (ou *péritonéale*) *primitive.* Ger., *ursprüngliche Schwangerschaft.* That variety of abdominal g. in which the fecundated ovum does not enter the oviduct, but becomes attached primarily to the peritonæum. [A, 15.] Cf. *Secondary abdominal g.*—**Prolonged g., Protracted g.** Lat., *graviditas diuturna* (seu *prolongata*, seu *perennis*). Fr., *grossesse prolongée.* G. (2d def.) prolonged beyond the usual period.—**Quadruple g.** Fr., *grossesse quadri-gémellaire.* G. (2d def.) with four embryos.—**Quintuple g.** Fr., *grossesse quinti-gémellaire.* G. (2d def.) with five embryos.—**Secondary abdominal g.** Fr., *grossesse abdominale* (ou *péritonéale*) *secondaire.* Ger., *secundäre Bauchschwangerschaft.* That variety of extra-uterine g. in which the fœtus, originally situated in the oviduct or elsewhere, has become lodged in the abdominal cavity in consequence of the rupture of the fœtal sac. [A, 24.]—**Secondary g.** Lat., *graviditas secundaria.* Ger., *zufällige Schwangerschaft.* G. in which the ovum has become dislodged from its original seat of implantation, and continues to develop in a new situation. [A, 85.]—**Serotine g.** See *Protracted g.*—**Subperitoneo-pelvic g.** Fr., *grossesse sous-péritonéo-pelvienne.* The second of Dezeimeris's ten species of ectopic g., in which the ovum is developed in the space between the two layers of the broad ligament; probably the terminal stage of a tubal g. in which rupture of the sac has allowed the ovum to take this extra-peritoneal situation. [A, 123.]—**Triple g.** Fr., *grossesse tri-gémellaire.* G. (2d def.) with three embryos.—**Tubal g., Tubarian g.** Lat., *eccyesis tubalis.* Fr., *g. tubaire.* Ger., *Tubarschwangerschaft.* That form of ectopic g. in which the product of conception is lodged in the oviduct.—**Tubo-abdominal g.** Lat., *graviditas tubo-abdominalis.* Fr., *grossesse tubo-abdominale.* That form of extra-uterine g. in which the fœtal sac is formed partly of the abdominal extremity of the oviduct and partly of plastic exudation in the neighborhood.—**Tubo-interstitial g.** A term sometimes applied to interstitial g. [C. McBurney, "N. Y. Med. Jour.," xxvii, p. 273.]—**Tubo-ovarian g.** Lat., *graviditas tubo-ovaria.* Fr., *grossesse tubo-ovarique.* That form of extra-uterine g. in which the fœtal sac is made up of the ovary and the abdominal end of the oviduct.—**Tubo-uterine g.** Lat., *graviditas tubo-uterina.* See *Interstitial g.*—**Tubular g.** See *Tubal g.*—**Twin g.** Fr., *grossesse gémellaire.* G. (2d def.) with two embryos.—**Utero-g.** See G. (2d def.).—**Utero-interstitial g.** Lat., *graviditas uterino-interstitialis.* The seventh of Dezeimeris's ten species of ectopic g.; g. in that part of the oviduct which traverses the uterine wall, terminating in rupture of the sac and the escape of the ovum into the uterine tissue. [A, 123.]—**Utero-tubal g.** The eighth of Dezeimeris's ten species of ectopic g.; one in which the ovum is developed partly in the uterine portion of the oviduct and partly within the cavity of the uterus. [A, 123.]—**Utero-tubo-abdominal g.** Lat., *graviditas utero-tubo-abdominalis.* Ger., *Gebärmuttertubenbauchhöhlenschwangerschaft.* That form of extra-uterine g., admitted by some authors to be possible, in which the placenta is implanted within the uterine cavity, the umbilical cord runs through the oviduct, and the whole or a part of the fœtus is lodged in the abdominal cavity. [A, 85.]—**Vaginal g.** Fr., *grossesse vaginale.* Ger., *Mutterscheidenschwangerschaft.* A supposed form of ectopic g. in which the ovum is developed in the vagina. Its occurrence is very doubtful. [A, 123.]—**Ventral g.** Fr., *grossesse ventrale.* See *Abdominal g.*

GESTATIVE, adj. Je^{2}st'at-i^{2}v. Lat., *gestatorius.* Fr., *gestateur.* Pertaining or adapted to gestation.

GESTICULATION, n. Je^{2}st-i^{2}k-u^{2}l-a'shu^{3}n. Lat., *gesticulatio* (from *gesticulari*, to make gestures). Fr., *g.* Ger., *Geberdung.* Movement of the body or of a part, especially of one or both upper limbs, in such a manner as to take the place of speech or to add to its force; also similar involuntary or insane movement.

GESTIELT (Ger.), adj. Ge^{2}-stelt'. Pedunculated, petiolate. [B.]

GESTIRNT (Ger.), adj. Ge^{2}-sternt'. 1. Having a forehead. 2. Stellate. [L, 46 (α, 21); L, 80.]

GESTÖRT (Ger.), adj. Ge^{2}-stu^{5}rt'. See DERANGED.

GESTRAHLT (Ger.), adj. Ge^{2}stra^{3}lt'. Radiated.

GESTRECKT (Ger.), adj. Ge^{2}-stre^{2}kt'. Stretched. [A, 523.]

GESTREIFT (Ger.), adj. Ge^{2}-strift'. See STRIATE.

GESTRICHELT (Ger.), adj. Ge^2-stri^{2}ch^2'e^{2}lt. Streaked; striped. [L, 80.]

GESTÜTZT (Ger.), adj. Ge^2-stu^{6}tzt'. See FULCRACEOUS.

GESUND (Ger.), adj. Ge^2-zund'. Sound, healthy. [L, 46 (a, 21).]—**G'heit.** Health.—**G'heitlich.** Pertaining to health, sanitary. [L, 46 (a, 21).]—**G'heitsamt.** A sanitary bureau. [A, 523.]—**G'heitsbeamter.** A health officer. [L, 46 (a, 21).]—**G'heitsbeschaffenheit.** The state of health. [L, 80.]—**G'heitskommission.** A board of health. [A, 521.]—**G'heitskunde, G'heitslehre.** See HYGIENE.—**G'heitspass.** A bill of health. [A, 521.]—**G'sheitspflege.** A regimen. [L, 46 (a, 21).]—**G'heitspflegegesetz.** A sanitary law or ordinance. [A, 521.]—**G'heitsrath.** A board of health. [A, 521.]—**G'heitsregel.** A regimen. [L, 46 (a, 21).]—**G'heitsschädlich.** Injurious to the health. [A, 523.]—**G'heitsvorschrift.** A sanitary ordinance. [A, 521.]—**G'heitswesen.** The state of health. [A, 521.]—**G'heitswidrig.** See *G'heitsschädlich.*—**G'szustand.** The state of health. [L, 80.]

GETAHLAHOE, n. Sumatra vegetable wax; in the Indian Archipelago, a cereous substance produced by *Ficus cerifera;* grayish-black exteriorly, rose-colored within, viscous at 35°, syrupy up to 50°, and liquid at 75° C. It dissolves in hot alcohol, and by refrigeration is precipitated as a white crystalline powder, melting at 75° C. [B, 93 (a, 14).]

GETAH PERTJA, n. Gutta-percha. [a, 24.]

GETAIBA (Port.), n. Ja-ta^3-e'ba^3. In Brazil, the *Hymenœa martiana.* [B, 121 (a, 24).]

GETAST (Ger.), n. Ge^2-ta^{3}st'. The touch. [L, 80.]

GETHEILT (Ger.), adj. Ge^2-tilt'. Divided; partite. [B, 132.]

GETHSEMANE, n. Ge^{2}th-se^{2}m'a^{2}n-e. The *Orchis mascula.* [B, 275 (a, 24).]

GETHYLLIS (Lat.), n. f. Ge^{2}th(gath)-i^{2}l(u^{6}l)'li^{2}s. Gen., *-yl'lidos (-is).* Gr., γηθυλλίς. Cape crocus; a genus of amaryllidaceous, dwarf, bulbous plants, allied to the genera *Sternbergia* and *Oporanthus.* The *Gethyllidæ* of Dumortier are a tribe of the *Hypoxideæ.* [B, 19, 121 (a, 24).]—**G. spiralis.** A species growing at the Cape of Good Hope, having white flowers, very narrow, flat leaves, a white, oval, scaly bulb, and a pleasantly scented, edible berry. [B, 309, 310 (a, 35).]

GETIGERT (Ger.), adj. Ge^2-teg'e^{2}rt. See MACULATE.

GETRÄNK (Ger.), n. Ge^2-trank'. 1. A beverage. 2. A potion. [L, 46 (a, 21).] Cf. TRANK and TRUNK.

GETREIDE (Ger.), n. Ge^2-trid'e^2. See CORN (1st def.).—**G'artig.** See FRUMENTACEOUS.

GETRENNT (Ger.), adj. Ge^2-tre^{2}nt'. Segregated. [L, 46 (a, 21).]—**G'blättrig.** Having separated leaves; polysepalous, polypetalous. [B.]—**G'geschlechtlich.** See DICLINOUS.

GETROCKNET (Ger.), adj. Ge^2-tro^{3}k'ne^{2}t. Dried.

GETROPFT (Ger.), adj. Ge^2-tro^{3}pft'. See GUTTATE.

GETRÜBT (Ger.), adj. Ge^2-tru^{6}bt'. Cloudy, opaque. [A, 521.]

GETSAKAIA (Tel.), n. The *Cœsalpinia bonduc.* [B, 172 (a, 24).]

GETTAJONE (It.), n. Je^{2}t-ta^3-yo'na. The *Githago segetum.* [B, 121 (a, 24).]

GETTANIA (Mal.), n. Gutta-percha. [B, 121 (a, 24).]

GETTÉ, n. In Senegal, the *Arachis africana.* [B, 121 (a, 24).]

GETTYSBURG SPRINGS, n. Ge^{2}t'i^{2}z-bu^{6}rg. A place in Adams County, Pennsylvania, where there are alkaline springs. [A, 363 (a, 21).]

GETÜPFELT (Ger.), adj. Ge^2-tu^{6}pf'e^{2}lt. See PUNCTATE.

GEULA, n. An aromatic seed like coriander, obtained from the East Indies. [B, 121 (a, 24).]
